LETTER TO SHAREHOLDERS

[PHOTO OF THOMAS E. FAUST JR.]

Thomas E. Faust Jr.
President

We are pleased to welcome shareholders of Eaton Vance Limited Duration Income Fund with this initial annual shareholder report. Based on share price (traded on the American Stock Exchange), the Fund had a total return of 0.13% for the period from inception on May 30, 2003 through April 30, 2004. That return was the result of a decrease in share price to \$17.81 on April 30, 2004 from \$19.10 on May 30, 2003, and the reinvestment of \$1.345 in regular monthly dividends.(1)

Based on net asset value, the Fund had a total return of 7.22% for the same period. That return was the result of a decrease in net asset value per share to \$19.07 on April 30, 2004 from \$19.10 on May 30, 2003, and the reinvestment of all distributions.(1)

Based on the most recent dividend and a share price of \$17.81, the Fund had a market yield of 9.06% at April 30, 2004.(2) On April 30, 2004, the Fund's share price on the American Stock Exchange traded at a 6.6% discount to its underlying net asset value.

THE FINANCIAL MARKETS RESPONDED TO SIGNS OF AN ECONOMIC RECOVERY...

The Fund made its debut during a year that provided investors with a host of challenges and opportunities, as the financial markets responded to growing economic momentum, rising inflation and ongoing geo-political concerns. The Fund's primary goal is to provide a high level of current income. The Fund typically expects to maintain a duration of between two and four years and invests primarily in three market segments: mortgage-backed securities, senior floating-rate loans, and non-investment-grade corporate bonds. At April 30, 2004, the Fund's investments (as a percentage of net assets) - including the effect of leverage were invested 50.6% in mortgage-backed securities (MBS), 48.8% in non-investment grade corporate bonds and 46.8% in senior floating-rate loans.(3)

The Fund's investment areas each made steps toward recovery during the period. The loan market recovered from its previous sharp declines. The MBS market stabilized following the dramatically lower interest rates and unusually high prepayment rates of 2003. And the non-investment grade bond market - so closely tied to economic activity - turned in a very strong performance.

THE FUND OFFERS A VERSATILE APPROACH...

A stronger economy can be a mixed blessing for fixed-income investors, as the potential for inflation and higher interest rates can pose a major threat. With its blend of asset classes - MBS, floating-rate loans and non-investment grade bonds - we believe that the Fund offers a versatile fixed-income approach in a period of economic growth. In the following pages, Scott Page, Payson Swaffield, Susan Schiff and Michael Weilheimer review the Fund's activities in its first year of operation.

Sincerely,

/s/ Thomas E. Faust Jr.

MANAGEMENT DISCUSSION

AN INTERVIEW WITH SCOTT H. PAGE, PAYSON F. SWAFFIELD, SUSAN SCHIFF AND MICHAEL W. WEILHEIMER, VICE PRESIDENTS AND PORTFOLIO MANAGERS OF EATON VANCE LIMITED DURATION INCOME FUND.

[PHOTO OF SCOTT H. PAGE]

Scott H. Page

Q: SCOTT, HOW WOULD YOU CHARACTERIZE THE LOAN MARKET IN THE PERIOD SINCE THE FUND'S INCEPTION?

A: MR. PAGE: The loan market has responded well to signs of a stronger economy. That has been especially true of economically sensitive industrial and technology companies, which have seen a recovery in orders in response to increased capital spending. In addition, many companies are now reaping the benefits of having cut costs and restructured operations during the

Edgar Filing: EATON VANCE LIMITED DURATION INCOME FUND - Form N-CSR

economic downturn, moves that left them with leaner operations, stronger finances and globally more competitive. Moreover, the overall credit environment has improved in the course of the past year.

Meanwhile, there have been signs that inflation is increasing with the the stronger economy. Short-term interest rates, which have been near 45-year lows, have begun to move higher in recent months. The Federal Reserve, which has maintained a stable monetary policy in recent months, has recently suggested that it may raise rates if it detects a growing threat from inflation. An increase in rates should result in higher income returns for the loan market.

[PHOTO OF PAYSON F. SWAFFIELD]

Payson F. Swaffield

Q: PAYSON, HOW HAS INVESTOR SENTIMENT CHANGED WITHIN THE LOAN MARKET IN THE PAST YEAR?

A: MR. SWAFFIELD: One major change has been that, as the credit climate has improved, investor demand has exceeded supply. Investors have been attracted by loans' short re-set provisions, which provide higher interest income as short-term interest rates rise. As a result of stronger demand, credit spreads - the difference between loan interest rates and the London-Interbank Offered Rate (LIBOR) - have narrowed slightly.

THE VIEWS EXPRESSED IN THIS REPORT ARE THOSE OF THE PORTFOLIO MANAGERS AND ARE CURRENT ONLY THROUGH THE END OF THE PERIOD OF THE REPORT AS STATED ON THE COVER. THESE VIEWS ARE SUBJECT TO CHANGE AT ANY TIME BASED UPON MARKET OR OTHER CONDITIONS, AND EATON VANCE DISCLAIMS ANY RESPONSIBILITY TO UPDATE SUCH VIEWS. THESE VIEWS MAY NOT BE RELIED ON AS INVESTMENT ADVICE AND, BECAUSE INVESTMENT DECISIONS FOR AN EATON VANCE FUND ARE BASED ON MANY FACTORS, MAY NOT BE RELIED ON AS AN INDICATION OF TRADING INTENT ON BEHALF OF ANY EATON VANCE FUND.

[CHART]

FIVE LARGEST SECTOR WEIGHTINGS(1)

By total net assets

Broadcasting & Entertainment	9.3%
Health Care, Education & Childcare	7.5%
Telecommunications	6.7%
Leisure, Amusement & Entertainment	5.5%
Hotels, Motels, Inns & Gaming	5.2%

(1) Five Largest Sector Weightings in aggregate account for 34.2% of the Fund's net assets, determined by dividing the total market value of the holdings by the total net assets of the Fund. Five Largest Sector Weightings refer only to senior floating-rate loan and corporate bond portions of the Fund and are subject to change.

Another change in the loan market in 2004 is that performance has been less

Edgar Filing: EATON VANCE LIMITED DURATION INCOME FUND - Form N-CSR

influenced by price movement and more so by interest payments. Following the recovery from its previous sharp declines, the loan market has generally improved, and many credits previously priced below par have returned to or near par. That has kept investors focused on the income potential of the loan market.

Q: HOW HAVE YOU POSITIONED THE FUND'S LOAN INVESTMENTS?

A: MR. PAGE: We've created a diversified portfolio of loan investments, including economically sensitive industrial sectors. These companies have fared very well in the economic recovery. However, we are not market or credit cycle timers. Therefore, our investments also included defensive sectors, such as beverages, foods and healthcare. Broadly diversifying on a sector basis helped to mitigate overall risk.

Our conservative credit approach led us to underweight the telecom sector, in general, even though this area was among the market's stronger performers during the past year. While the short-term performance of the group was impressive, we maintained very strict credit criteria and, therefore, continue to be very selective within the telecom sector.

[PHOTO OF SUSAN SCHIFF]

Susan Schiff

Q: SUSAN, HOW HAVE INTEREST RATES IMPACTED THE MORTGAGE-BACKED SECURITIES MARKET IN THE PAST YEAR?

A: MS. SCHIFF: The MBS market has fluctuated widely over the past year. 2003 was one of the worst-performing years on record for the market, due to the record number of re-financings on the part of homeowners. As homeowners refinanced to lock in low interest rates, prepayment rates for mortgages rose to record levels. Soaring prepayment rates caused larger-than-expected principal losses.

In 2004, the MBS market has stabilized somewhat. With a stronger economy, interest rates have been rising for the last few months and may quite possibly head higher in coming months. With a changed interest rate environment, the wave of refinancings has slowed, resulting in lower prepayment rates. MBS spreads over Treasury bonds have narrowed in recent months, a sign of a healthier market. Thus, while the market has seen some volatility, the trend has improved in 2004.

Q: WHERE IN THE MBS MARKET HAVE YOU FOCUSED THE FUND'S INVESTMENTS?

A: MS. SCHIFF: We have focused the Fund's MBS investments on the seasoned segment of the market. Last year's spike notwithstanding, seasoned MBS have had more stable historical prepayment rates, which have contributed to more attractive performance characteristics. In addition, seasoned MBS have continued to maintain an attractive yield advantage over Treasury bonds.

Q: WAS LAST YEAR'S PERFORMANCE BY SEASONED MBS A DEPARTURE FROM HISTORICAL NORMS?

A: MS. SCHIFF: Yes, especially for seasoned MBS. As a result of the sharp rise in prepayment rates, seasoned MBS ended the year valued at very cheap levels relative to Treasuries. That was out of line with historical patterns. So much so that, in my view, seasoned MBS still represent good value, as spreads remain attractive. While there is no guarantee that past trends will repeat, we believe it's probable that spreads for seasoned MBS will revert to their historical patterns and continue to narrow further, as they have in the first months of 2004. At a minimum, lower prepayment rates should help the seasoned portion of the market.

[PHOTO OF MICHAEL W. WEILHEIMER]

Michael W. Weilheimer

Q: MIKE, HOW HAS THE NON-INVESTMENT GRADE BOND MARKET RESPONDED TO THE IMPROVED ECONOMY?

A: MR. WEILHEIMER: The non-investment grade bond market saw significant gains in 2003. That momentum carried through February 2004 before giving up some ground. Corporate earnings have improved with the economic recovery. With stronger cash flow, companies have been able to reduce their debt burden and significantly improve their balance sheets. This trend has created a much healthier credit environment, as evidenced by the decline in default rates. Investors have demonstrated greater tolerance for risk and increasing confidence in the non-investment grade market. Record new issue volume has met strong demand from investors. In that climate, the high-yield market has posted impressive gains.

Q: WHERE HAVE YOU FOCUSED THE FUND'S NON-INVESTMENT GRADE INVESTMENTS?

A: MR. WEILHEIMER: We have focused on the B-rated portion of the market, which is highly sensitive to fluctuations in the economy. Many of these companies in the industrial and technology-related sectors have enjoyed stronger sales momentum. Earnings have been further helped by the cost cuts instituted by many companies in recent years. Not surprisingly, as economic activity has picked up, these lower-rated bonds have significantly outperformed their high-rated counterparts. The Fund's largest high-yield sector weight-ings were broadcasting and entertainment; telecommunications; hotels, motels, inns and gaming; healthcare, education and childcare; and utilities.

Q: WHAT HAS BEEN NOTABLE AMONG THE FUND'S NON-INVESTMENT GRADE BOND INVESTMENTS?

A: MR. WEILHEIMER: The Fund's utility bonds have been especially strong performers. As recently as 2002, the industry was faced with financial pressures and bankruptcies. Many companies have since taken steps to improve their financial footing. The Fund's utility investments included a mix of power generating companies and pipeline companies that have pared or restructured debt, issued equity and bought back their own bonds at a discount in the market. That has greatly improved the companies' balance sheets.

Increased merger and acquisition activity benefited some of the Fund's investments in the chemical, consumer product and retailing areas. These mergers included tenders for outstanding bonds by acquiring companies, resulting in significant gains for some bonds.

Defensive areas, such as beverages and food, were less robust performers. These companies' revenues are less tied to overall economic activity and, therefore, were less influenced by the economic recovery.

EATON VANCE LIMITED DURATION INCOME FUND as of April 30, 2004

NOTES TO FINANCIAL STATEMENTS

1 SIGNIFICANT ACCOUNTING POLICIES

Eaton Vance Limited Duration Income Fund (the Fund) is registered under the Investment Company Act of 1940, as amended, as a diversified closed-end management investment company. The Fund, which was organized as a Massachusetts business trust on March 12, 2003, seeks to provide a high level of current income. The Fund may, as a secondary objective, also seek capital appreciation to the extent consistent with its primary goal of high current income. The Fund pursues its objectives by investing primarily in, mortgage-backed securities (MBS) issued, backed or otherwise guaranteed by the U.S. government or its agencies or instrumentalities; senior, secured floating rate loans made to corporate and other business entities (Senior Loans); and corporate bonds of below investment grade quality (Non-Investment Grade Bonds). The following is a summary of significant accounting policies of the Fund. The policies are in conformity with accounting principles generally accepted in the United States of America.

A INVESTMENT VALUATION -- Mortgage backed, pass-through securities are valued using an independent matrix pricing system applied by the adviser which takes into account closing bond valuations, yield differentials, anticipated prepayments and interest rates provided by dealers. Debt securities (other than seasoned mortgage backed, pass-through securities) are normally valued on the basis of valuations furnished by dealers or a pricing service. Certain senior loans are deemed to be liquid because reliable market quotations are readily available for them. Liquid senior loans are valued on the basis of prices furnished by a pricing service. Other senior loans are valued at fair value by the Fund's investment adviser, Eaton Vance Management (EVM), under procedures established by the Trustees as permitted by Section 2(a)(41) of the Investment Company Act of 1940. Such procedures include the consideration of relevant factors, data and information relating to fair value, including (i) the characteristics of and fundamental analytical data relating to the Senior Loan, including the cost, size, current interest rate, period until next interest rate reset, maturity and base lending rate of the Senior Loan, the terms and conditions of the Senior Loan and any related agreements, and the position of the Senior Loan in the Borrower's debt structure; (ii) the nature, adequacy and value of the collateral, including the Fund's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the Borrower, based on an evaluation of its financial condition, financial statements and information about the Borrower's business, cash flows, capital structure and

Edgar Filing: EATON VANCE LIMITED DURATION INCOME FUND - Form N-CSR

future prospects; (iv) information relating to the market for the Senior Loan including price quotations for and trading in the Senior Loan, and interests in similar Senior Loans and the market environment and investor attitudes towards the Senior Loan and interests in similar Senior Loans; (v) the experience, the reputation, stability and financial condition of the agent and any intermediate participant in the Senior Loan; and (vi) general economic and market conditions affecting the fair value of the Senior Loan. Other portfolio's securities (other than short-term obligations, but including listed issues) may be valued on the basis of prices furnished by one or more pricing services which determine prices for normal, institutional-size trading units of such securities which may use market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders. In certain circumstances, portfolio securities will be valued at the last sales price on the exchange that is the primary market for such securities, or the last quoted bid price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales during the day. The value of interest rate swaps will be based on dealer quotations. Short-term obligations which mature in 60 days or less, are valued at amortized cost, if their original term to maturity when acquired by the Fund was 60 days or less or are valued at amortized cost using their value on the 61st day prior to maturity, if their original term to maturity when acquired by the Fund was more than 60 days, unless in each case this is determined not to represent fair value. OTC options are valued at the mean between the bid and asked price provided by dealers. Financial futures contracts listed on commodity exchanges and exchange traded options are valued at closing settlement prices. Securities for which there is no such quotation or valuation are valued at fair value using methods determined in good faith by or at the direction of the Trustees. Repurchase agreements are valued at cost plus accrued interest. Other portfolio securities for which there are no quotations or valuations are valued at fair value as determined in good faith by or on behalf of the Trustees.

B INCOME -- Interest income from Senior Loans is recorded on the accrual basis at the then-current interest rate, while all other interest income is determined on the basis of interest accrued, adjusted for amortization of premium or accretion of discount. Dividend income is recorded on the ex-dividend date for dividends received in cash and/or securities.

C FEDERAL TAXES -- The Fund's policy is to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute to

27

shareholders each year all of its taxable income, including any net realized gain on investments. Accordingly, no provision for federal income or excise tax is necessary. At April 30, 2004, the Fund, for federal income tax purposes, had a capital loss carryover of \$26,481,368 which will reduce the Fund's taxable income arising from future net realized gains on investments, if any, to the extent permitted by the Internal Revenue Code, and thus will reduce the amount of the distributions to shareholders which would otherwise be necessary to relieve the Fund of any liability for federal income or excise tax. Such capital loss carryover will expire on April 30, 2012.

At April 30, 2004, net capital losses of \$17,668,020 attributable to security transactions incurred after October 31, 2003, are treated as arising on the first day of the Fund's taxable year ending April 30, 2005. At April 30, 2004 the undistributed ordinary income on a tax basis was \$10,821,853 and differed from accumulated net investment loss due to the

Edgar Filing: EATON VANCE LIMITED DURATION INCOME FUND - Form N-CSR

different treatment for paydown gains/losses on mortgage-backed securities and premium amortization. All distributions in the year ended April 30, 2004 were from ordinary income for tax purposes.

D INVESTMENT TRANSACTIONS -- Investment transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined using the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may be settled a month or more after the transaction date. The securities so purchased are subject to market fluctuations during this period. To the extent that when-issued or delayed delivery purchases are outstanding, the Fund instructs the custodian to segregate assets in a separate account, with a current value at least equal to the amount of its purchase commitments.

E OFFERING COSTS -- Costs incurred by the Fund in connection with the offering of the common shares and preferred shares were recorded as a reduction of capital paid in excess of par applicable to common shares.

F EXPENSE REDUCTION -- Investors Bank & Trust Company (IBT) serves as custodian of the Fund. Pursuant to the custodian agreement, IBT receives a fee reduced by credits which are determined based on the average daily cash balances the Fund maintains with IBT. All significant credit balances used to reduce the Fund's custodian fees are reported as a reduction of expenses on the Statement of Operations

G WRITTEN OPTIONS -- Upon the writing of a call or a put option, an amount equal to the premium received by the Fund is included in the Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current value of the option written in accordance with the Fund's policies on investment valuations discussed above. Premiums received from writing options which expire are treated as realized gains. Premiums received from writing options which are exercised or are closed are added to or offset against the proceeds or amount paid on the transaction to determine the realized gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by the Fund. The Fund, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities underlying the written option.

H PURCHASED OPTIONS -- Upon the purchase of a call or put option, the premium paid by the Fund is included in the Statement of Assets and Liabilities as an investment. The amount of the investment is subsequently marked-to-market to reflect the current market value of the option purchased, in accordance with the Fund's policies on investment valuations discussed above. If an option which the Fund has purchased expires on the stipulated expiration date, the Fund will realize a loss in the amount of the cost of the option. If the Fund enters into a closing sale transaction, the Fund will realize a gain or loss, depending on whether the sales proceeds from the closing sale transaction are greater or less than the cost of the option. If a Fund exercises a put option, it will realize a gain or loss from the sale of the underlying security, and the proceeds from such sale will be decreased by the premium originally paid. If the Fund exercises a call option, the cost of the security which the Fund purchases upon exercise will be increased by the premium originally paid.

I FINANCIAL FUTURES CONTRACTS -- Upon entering into a financial futures contract, the Fund is required to deposit an amount (initial margin) either in cash or securities equal to a certain percentage of the purchase price indicated in the financial futures contract. Subsequent payments are made or received by the Fund (margin maintenance) each day, dependent on the daily fluctuations in the value of the underlying securities, and are recorded for

Edgar Filing: EATON VANCE LIMITED DURATION INCOME FUND - Form N-CSR

book purposes as unrealized gains or losses by the Fund.

If the Fund enters into a closing transaction, the Fund will realize, for book purposes, a gain or loss equal to the difference between the value of the financial futures

28

contract to sell and the financial futures contract to buy. The Fund's investment in financial futures contracts is designed only to hedge against anticipated future changes in interest rates. Should interest rates move unexpectedly, the Fund may not achieve the anticipated benefits of the financial futures contracts and may realize a loss.

J REVERSE REPURCHASE AGREEMENTS -- The Fund may enter into reverse repurchase agreements. Under such an agreement, the Fund temporarily transfers possession, but not ownership, of a security to a counterparty, in return for cash. At the same time, the Fund agrees to repurchase the security at an agreed-upon price and time in the future. The Fund may enter into reverse repurchase agreements for temporary purposes, such as to fund withdrawals, or for use as hedging instruments where the underlying security is denominated in a foreign currency. As a form of leverage, reverse repurchase agreements may increase the risk of fluctuation in the market value of the Fund's assets or in its yield. Liabilities to counterparties under reverse repurchase agreements are recognized in the Statement of Assets and Liabilities at the same time at which cash is received by the Fund. The securities underlying such agreements continue to be treated as owned by the Fund and remain in the Portfolio of Investments. Interest charged on amounts borrowed by the Fund under reverse repurchase agreements is accrued daily.

K TOTAL RETURN SWAPS -- The Fund may enter into swap agreements to enhance return, to hedge against fluctuations in securities prices or interest rates or as substitution for the purchase or sale of securities. Pursuant to these agreements, the Fund makes monthly payments at a rate equal to a predetermined spread to the one-month LIBOR. In exchange, the Fund receives payments based on the rate of return of a benchmark industry index. During the term of the outstanding swap agreement, changes in the underlying value of the swap are recorded as unrealized gains and losses. Payments received or made at the end of the measurement period are recorded as realized gains and losses. The value of the swap is determined by changes in the relationship between the rate of interest and the benchmark industry index. The Fund is exposed to credit loss in the event of non-performance by the swap counterparty. However, the Fund does not anticipate non-performance by the counterparty. Risk may also arise from the unanticipated movements in value of interest rates or the index.

L OTHER -- Investment transactions are accounted for on the date the securities are purchased or sold. Realized gains and losses are computed based on the specific identification of securities sold.

M USE OF ESTIMATES -- The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates.

N INDEMNIFICATIONS -- Under the Fund's organizational documents, its officers and Trustees may be indemnified against certain liabilities and expenses arising out of the performance of their duties to the Fund, and

Edgar Filing: EATON VANCE LIMITED DURATION INCOME FUND - Form N-CSR

shareholders are indemnified against personal liability for obligations of the Fund. Additionally, in the normal course of business, the Fund enters into agreements with service providers that may contain indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred.

2 AUCTION PREFERRED SHARES (APS)

The Fund issued 7,600 shares of Auction Preferred Shares Series A, 7,600 shares of Auction Preferred Shares Series B, 7,600 shares of Auction Preferred Shares Series C, 7,600 shares of Auction Preferred Shares Series D, and 7,600 shares of Auction Preferred Shares Series E on July 25, 2003 in a public offering. The underwriting discount and other offering costs were recorded as a reduction of the capital of the common shares. Dividends on the APS, which accrue daily, are cumulative at a rate which was established at the offering of the APS and have been reset every 7 days thereafter by an auction. Dividend rates ranged from 1.02% to 1.59% for Series A Shares, from 1.02% to 1.59% for Series B Shares, from 1.03% to 1.59% for Series C Shares, from 1.03% to 1.59% for Series D Shares and from 1.02% to 1.59% for Series E Shares, during the period from the commencement of the offering, July 25, 2003, to April 30, 2004.

The APS are redeemable at the option of the Fund, at a redemption price equal to \$25,000 per share, plus accumulated and unpaid dividends on any dividend payment date. The APS are also subject to mandatory redemption at a redemption price equal to \$25,000 per share, plus accumulated and unpaid dividends, if the Fund is in default for an extended period on its asset maintenance requirements with respect to the APS. If the dividends on the APS shall remain unpaid in an amount

29

equal to two full years' dividends, the holders of the APS as a class have the right to elect a majority of the Board of Trustees. In general, the holders of the APS and the common shares have equal voting rights of one vote per share, except that the holders of the APS, as a separate class, have the right to elect at least two members of the Board of Trustees. The APS have a liquidation preference of \$25,000 per share, plus accumulated and unpaid dividends. The Fund is required to maintain certain asset coverage with respect to the APS as defined in the Fund's By-Laws and the Investment Company Act of 1940. The Fund pays an annual fee equivalent to 0.25% of the preferred shares' liquidation value for the remarketing efforts associated with the preferred auctions.

3 DISTRIBUTION TO SHAREHOLDERS

The Fund intends to make monthly distributions of net investment income, after payment of any dividends on any outstanding Auction Preferred Shares. Distributions are recorded on the ex-dividend date. Distributions to preferred shareholders are recorded daily and are payable at the end of each dividend period. Each dividend payment period for the Auction Preferred Shares is generally seven days. The applicable dividend rate for the Auction Preferred Shares on April 30, 2004 was 1.12%, 1.09%, 1.15%, 1.18% and 1.10%, for Series A, Series B, Series C, Series D and Series E Shares, respectively. For the period from the commencement of the offering, July 25, 2003, to April 30, 2004, the Fund paid dividends to Auction Preferred shareholders amounting to \$1,649,266, \$1,643,300, \$1,658,941, \$1,666,304, and \$1,662,296 for Series A, Series B, Series C, Series D and Series E Shares, respectively, representing an average APS dividend rate for such period of 1.13%, 1.13%, 1.14%, 1.15% and 1.14%, respectively.

The Fund distinguishes between distribution on a tax basis and a financial

Edgar Filing: EATON VANCE LIMITED DURATION INCOME FUND - Form N-CSR

reporting basis. Accounting principles generally accepted in the United States of America require that only distributions in excess of tax basis earnings and profits be reported in the financial statements as a return of capital. Permanent differences between book and tax accounting relating to distributions are reclassified to paid in capital. These differences relate primarily to the different treatment for paydown gain/losses on mortgage-backed securities and the method for amortizing premiums.

4 INVESTMENT ADVISER FEE AND OTHER TRANSACTIONS WITH AFFILIATES

The investment adviser fee, computed at an annual rate of 0.75% of the Fund's weekly gross assets, was earned by Eaton Vance Management (EVM), as compensation for management and investment advisory services rendered to the Fund. For the period from the start of business, May 30, 2003, to April 30, 2004 the fee was equivalent to 0.75% (annualized) of the Fund's average weekly gross assets for such period and amounted to \$20,499,825.

In addition, the Adviser has contractually agreed to reimburse the Fund for fees and other expenses in the amount of 0.20% (annualized) of average weekly gross assets of the Fund for the first five years of the Fund's operations 0.15% of average weekly gross assets of the Fund in year 6, 0.10% in year 7 and 0.05% in year 8. For the period from the start of business, May 30, 2003, to April 30, 2004 the Investment Adviser waived \$5,474,120 of its advisory fee.

EVM serves as the administrator of the Fund, but currently receives no compensation for providing administrative services to the Fund.

Certain officers and Trustees of the Fund are officers of the above organizations.

5 PURCHASES AND SALES OF INVESTMENTS

Purchases and sales of investments, other than short-term obligations and including paydowns, aggregated \$5,101,069,210 and \$2,003,953,416 respectively.

6 SECURITIES LENDING AGREEMENT

The Fund has established a securities lending agreement with brokers in which the Fund lends portfolio securities to a broker in exchange for collateral consisting of either cash or U.S. government securities in an amount at least equal to the market value of the securities on loan. Under the agreement, the Fund continues to earn interest on the securities loaned. Collateral received is generally cash, and the Fund invests the cash and receives any interest on the amount invested but it must also pay the broker a loan rebate fee computed as a varying percentage of the collateral received. The loan rebate fee paid by the Fund offsets a portion of the interest income received and amounted to \$861,336 for the period from the start of business, May 30, 2003, to April 30, 2004. At April 30, 2004, the value of the securities loaned and the value of the collateral amounted to \$120,965,769 and \$123,955,543, respectively. In the event of counterparty default, the Fund is subject to potential loss if it is delayed or prevented from exercising its right to dispose of the collateral. The Fund bears risk in the event that invested collateral is not sufficient to meet obligations due on the loans. The Fund has the right under the lending agreement to recover the securities from the borrower on demand.

- 9 FINANCIAL INSTRUMENTS
The Fund regularly trades in financial instruments with off-balance sheet risk in the normal course of its investing activities to assist in managing exposure to various market risks. These financial instruments include written options and financial futures contracts, and may involve, to a varying degree, elements of risk in excess of the amounts recognized for financial statement purposes. The notional or contractual amounts of these instruments represent the investment the Fund has in particular classes of financial instruments and does not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments is meaningful only when all related and offsetting transactions are considered. At April 30, 2004 there were no outstanding obligations under these financial instruments.

 DIVIDEND REINVESTMENT PLAN

Edgar Filing: EATON VANCE LIMITED DURATION INCOME FUND - Form N-CSR

The Fund offers a dividend reinvestment plan (the Plan) pursuant to which shareholders may elect to have dividends and capital gains distributions reinvested in common shares (the Shares) of the Fund. You may elect to participate in the Plan by completing the Dividend Reinvestment Plan Application Form. If you do not participate, you will receive all distributions in cash paid by check mailed directly to you by PFPC Inc. as dividend paying agent. On the distribution payment date, if the net asset value per Share is equal to or less than the market price per Share plus estimated brokerage commissions then new Shares will be issued. The number of Shares shall be determined by the greater of the net asset value per Share or 95% of the market price. Otherwise, Shares generally will be purchased on the open market by the Plan Agent. Distributions subject to income tax (if any) are taxable whether or not shares are reinvested.

If your shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the Plan on your behalf. If the nominee does not offer the Plan, you will need to request that your shares be re-registered in your name with the Fund's transfer agent, PFPC, Inc. or you will not be able to participate.

The Plan Agent's service fee for handling distributions will be paid by the Fund. Each participant will be charged their pro rata share of brokerage commissions on all open-market purchases.

Plan participants may withdraw from the Plan at any time by writing to the Plan Agent at the address noted on the following page. If you withdraw, you will receive shares in your name for all Shares credited to your account under the Plan. If a participant elects by written notice to the Plan Agent to have the Plan Agent sell part or all of his or her Shares and remit the proceeds, the Plan Agent is authorized to deduct a \$5.00 fee plus brokerage commissions from the proceeds.

If you wish to participate in the Plan and your shares are held in your own name, you may complete the form on the following page and deliver it to the Plan Agent.

Any inquiries regarding the Plan can be directed to the Plan Agent, PFPC, Inc., at 1-800-331-1710.

The Board of Trustees of the Trust has adopted a proxy voting policy and procedure (the "Fund Policy"), pursuant to which the Trustees have delegated proxy voting responsibility to the Fund's investment adviser and adopted the investment adviser's proxy voting policies and procedures (the "Policies") which are described below. The Trustees will review the Fund's proxy voting records from time to time and will annually consider approving the Policies for the upcoming year. In the event that a conflict of interest arises between the Fund's shareholders and the investment adviser, the administrator, or any of their affiliates or any affiliate of the Fund, the investment adviser will generally refrain from voting the proxies related to the companies giving rise to such conflict until it consults with the Board of the Fund except as contemplated under the Fund Policy. The Board's Special Committee will instruct the investment adviser on the appropriate course of action.

The Policies are designed to promote accountability of a company's management to its shareholders and to align the interests of management with those shareholders. The investment adviser will generally support company management on proposals relating to environmental and social policy issues and on matters regarding the state of organization of the company. On all other matters, the investment adviser will take management's proposals under advisement but will consider each matter in light of the guidelines set forth in the Policies. Except in the instance of routine matters related to corporate administration which are not expected to have a significant economic impact on the company or its shareholders (on which the investment adviser will routinely vote with management), the investment adviser will review each matter on a case-by-case basis and reserves the right to deviate from the Policies guidelines when it believes the situation warrants such a deviation. The Policy includes voting guidelines for matters relating to, among other things, the election of directors, approval of independent auditors, executive compensation, corporate structure and anti-takeover defenses. The investment adviser may abstain from voting from time to time where it determines that the costs associated with voting a proxy outweighs the benefits derived from exercising the right to vote.

In addition, the investment adviser will monitor situations that may result in a conflict of interest between the Fund's shareholders and the investment adviser, the administrator, or any of their affiliates or any affiliate of the Fund by maintaining a list of significant existing and prospective corporate clients. The investment adviser's personnel responsible for reviewing and voting proxies on behalf of the Fund will report any proxy received or expected to be received from a company included on that list to the investment adviser's general counsel or chief equity investment officer. The general counsel or chief equity investment officer will determine if a conflict exists. If a conflict does exist, the proxy will either be voted strictly in accordance with the Policy or the investment adviser will seek instruction on how to vote from the Board.

Effective August 31, 2004, information on how the Fund voted proxies relating to portfolio securities during the 12 month period ended June 30, 2004 [is/will be] available (1) without charge, upon request, by calling 1-800-262-1122, and (2) on the Securities and Exchange Commission's website at <http://www.sec.gov>.
