

Storm Cat Energy CORP
Form 20-F/A
January 05, 2007

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 20-F/A
(Amendment No. 1)

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2005

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: 001-32628

Storm Cat Energy Corporation

(Exact name of Registrant as specified in its charter)

British Columbia, Canada

(Jurisdiction of incorporation or organization)

1125 17th Street, Suite 2310, Denver, Colorado, 80202

(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class

Common Shares, Without Par Value

Name of each exchange on which registered

The American Stock Exchange

Securities registered or to be registered pursuant to Section 12(g) of the Act. **None**

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act. **None**

Indicate the number of outstanding shares of each of the issuer's classes of capital or common shares as of the close of the period covered by the annual report:

65,654,388 Common Shares

Indicate by check mark if the registrant is a well-known seasoned issuer. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer.

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company as defined in Rule 12b-2 of the Exchange Act. Yes No

Explanatory Note

This Annual Report on Form 20-F/A has been amended to address comments made by the Securities and Exchange Commission (SEC) relative to the original filing of our Annual Report on Form 20-F which was filed with the SEC on June 16, 2006 (the Original Filing). We have added the Note Regarding Reserves Data and Other Oil and Gas Information to clarify that the reserves data in this Annual Report were prepared under SEC guidelines, but that Storm Cat also files separate reserve disclosure data in Canada under National Instrument 51-101 of the Canadian Securities Administrators. We also added a glossary of pertinent industry terms used throughout this Annual Report to such Note.

We made additional changes from the Original Filing to include a definition of unconventional gas reserves. We removed certain mitigating language from the Risk Factors section, identified the percentage of our undeveloped reserves (61.3%) and clarified the potential effects of unsuccessful drilling efforts or a decision not to drill would have on our future results of operations. Storm Cat also noted that it has no current or future planned wells that are not serviced by existing pipelines or where the right-of-way to a pipeline is not already established. We identified that 79.8% of our Power River Basin leases are on federal land, and that there are no pending environment impact studies relating to our existing properties. We clarified that a proportionate reduction in our net revenue interest would occur after payout on our Jamison / North Twenty Mile property, and that payout occurs after Storm Cat recovers 400% of its drilling capital. Storm Cat's working interest in the North East Spotted Horse Field was identified as being 91.61% at December 31, 2005. A table which reflects Storm Cat's total gross and net acreage by area and by field as of August 1, 2006 was also added, and a Percent of Total column was added to the table depicting Storm Cat's reserves by category under the caption Powder River Basin Production and Reserves. Certain other clarifying language was added to indicate that Storm Cat recorded only one month of production in 2005 from its Jamison / North Twenty Field. Finally, Note 12 Oil and Gas Production Activities (Unaudited) to our Notes to the Consolidated Financial Statements was updated (1) to reference Statement of Financial Accounting Standards No. 69 (SFAS 69), (2) to remove dollar signs previously reflected on reserve volume figures for the years ended December 31, 2005 and 2004, respectively, (3) to move the Reserve Quantities table before the Standardized Measure of Discounted Future Net Cash Flows information and table to eliminate any confusion regarding such reserve information and such cash future cash flow information, and (4) to break out future production and development cost for these same periods on separate lines in the Standardized Measure of Discounted Future Net Cash Flows table.

Except for the foregoing amended information, this Form 20-F/A continues to describe conditions as of the date of the Original Filing, including our expectations with respect to our 2006 capital program and other forward-looking information, and we have not updated the disclosures contained herein to reflect events that occurred at a later date. Other events occurring after the filing of the Original Filing or other disclosures necessary to reflect subsequent events have been or will be addressed in either our Quarterly Reports on Form 10-Q for the quarterly period ended June 30, 2006 or our Quarterly Report on Form 10-Q/A for the quarterly period ended September 30, 2006, or in other reports filed with the SEC subsequent to the date of this filing.

In this Annual Report, the terms Storm Cat, the Corporation, the Company we, our and us refer to Storm Cat Energy Corporation and its consolidated subsidiaries unless the context otherwise requires. All dollar amounts in this Annual Report are expressed in United States dollars unless otherwise specified. References in this document to \$ and US\$ refer to United States dollars and references to C\$ refer to Canadian dollars. In certain instances in this Annual Report, figures reported in United States dollars have been converted from Canadian dollars, based on the foreign exchange rate of December 31, 2005, of C\$0.8580 convertible to US\$1.00; however, any equity issuance was converted based on the exchange rate on the date of such equity issuance and the amounts in our income statement were converted based on the average of the exchange rate of December 31, 2005 and December 31, 2004, or C\$0.84411.

Cautionary Statement Regarding Forward-Looking Statements

This Annual Report and the documents incorporated herein by reference contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended:

- i. any statements contained herein or therein regarding the prospects for our business or any of our services;
- ii. any statements preceded by, followed by or that include the words may, will, seeks, believes, expects, anticipates, intends, contains, estimates, plans or similar expressions; and
- iii. other statements contained herein or therein regarding matters that are not historical facts.

Forward-looking statements in this Annual Report and our filings with the SEC include, without limitation, statements regarding:

- financial position;
- business strategy;
- budgets;
- amount, nature and timing of capital expenditures;
- drilling of wells;
- potential reserves;
- timing and amount of future production of natural gas and oil;
- operating costs and other expenditures;
- future net revenues from production and estimates of potential oil and gas reserves;
- cash flow and anticipated liquidity; and
- prospect development and property acquisitions.

Our business and results of operations are subject to risks and uncertainties, many of which are beyond our ability to control or predict. Because of these risks and uncertainties, actual results may differ materially from those expressed or implied by forward-looking statements, and investors are cautioned not to place undue reliance on such statements, which speak only as of the date thereof. In addition to the specific risk factors described in the section of this Form 20-F entitled Risk Factors, important factors that could cause actual results to differ materially from our expectations and may affect our operations, revenues or the common shares, include, but are not limited to:

- the effects of competition;

- risks associated with oil and gas exploration;
- operational hazards;
- availability and cost of material and equipment;
- availability of capital and unexpected substantial variances in capital requirements;
- uncertainty of reserve estimates and timing of development expenditures;
- the impact of petroleum and natural gas price fluctuations;
- our ability to find, acquire, market, develop and produce new properties;
- the threat of terrorist attacks or war;

4

- the impact of current and future laws and governmental regulations;
- climactic conditions;
- liability for environmental claims;
- the impact of the departure of any key officers; and
- general economic, market or business conditions.

We do not intend to update these forward-looking statements except as required by law.

Note Regarding Reserves Data and Other Oil and Gas Information

National Instrument 51-101 (NI 51-101) of the Canadian Securities Administrators imposes oil and gas disclosure standards for Canadian public companies engaged in oil and gas activities. NI 51-101 and its companion policy specifically contemplate the granting of exemptions from some of the disclosure standards prescribed by NI 51-101 to companies that are active in the U.S. capital markets, to permit the substitution of the standards required by the SEC in order to provide for comparability of oil and gas disclosure with that provided by U.S. and other international issuers. Storm Cat has submitted an application to the Canadian securities regulatory authorities for an exemption that would permit it to provide oil and gas disclosure in Canada in accordance with the relevant legal requirements of the SEC. Storm Cat has provided the reserves data and other oil and gas information included in this Annual Report in accordance with U.S. disclosure requirements and practices and has filed in Canada, and will continue to file in Canada until such time as its exemption is approved by Canadian securities regulatory authorities, a separate NI 51-101 report. The information disclosed in this Annual Report, as well as the information that Storm Cat discloses in the future in SEC filings, may differ from the corresponding information prepared in accordance with NI 51-101 standards.

The primary differences between the U.S. requirements and the NI 51-101 requirements are that (1) the U.S. standards require disclosure only of proved reserves, whereas NI 51-101 requires disclosure of proved and probable reserves, and (2) the U.S. standards require that the reserves and related future net revenue be estimated under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made, whereas NI 51-101 requires disclosure of proved reserves and the related future net revenue estimated using constant prices and costs as at the effective date of the estimation, and of proved and probable reserves and related future net revenue using forecast prices and costs. The definitions of proved reserves also differ, but according to the Canadian Oil and Gas Evaluation Handbook (the reference source for the definition of proved reserves under NI 51-101), differences in the estimated proved reserve quantities based on constant prices should not be material. Storm Cat concurs with this assessment.

Storm Cat has disclosed proved reserve quantities using the standards contained in SEC Regulation S-X, and the standardized measure of discounted future net cash flows relating to proved oil and gas reserves determined in accordance with United States Statement of Financial Accounting Standards No. 69 Disclosures About Oil and Gas Producing Activities (SFAS 69).

Under U.S. disclosure standards, reserves and production information is disclosed on a net basis (after royalties). The reserves and production information contained in this annual information form is shown on that basis.

In this Annual Report, we also use a number of terms used in the oil and gas industry as defined below.

Bcf. Billion cubic feet of natural gas.

Btu or British Thermal Unit. The quantity of heat required to raise the temperature of one pound of water by one degree Fahrenheit.

Completion. The installation of permanent equipment for the production of natural gas or oil.

Condensate. Liquid hydrocarbons associated with the production of a primarily natural gas reserve.

Developed acreage. The number of acres that are allocated or assignable to productive wells or wells capable of

production.

Development well. A well drilled within the proved area of an oil or gas reservoir to the depth of a stratigraphic horizon known to be productive.

5

Dth. Decatherms.

Dth/D. Decatherms per day.

Dry hole. A well found to be incapable of producing hydrocarbons in sufficient quantities such that proceeds from the sale of such production exceed production expenses and taxes.

Exploratory well. A well drilled to find and produce natural gas or oil reserves not classified as proved, to find a new reservoir in a field previously found to be productive of natural gas or oil in another reservoir or to extend a known reservoir. Generally, an exploratory well is any well that is not a development well, a service well, or a stratigraphic test well.

Farm-in or farm-out. An agreement under which the owner of a working interest in a natural gas and oil lease assigns the working interest or a portion of the working interest to another party who desires to drill on the leased acreage. Generally, the assignee is required to drill one or more wells in order to earn its interest in the acreage. The assignor usually retains a royalty or reversionary interest in the lease. The interest received by an assignee is a farm-in while the interest transferred by the assignor is a farm-out.

Field. An area consisting of either a single reservoir or multiple reservoirs, all grouped on or related to the same individual geological structural feature and/or stratigraphic condition.

Gross acres or gross wells. The total acres or wells, as the case may be, in which a working interest is owned.

Lead. A specific geographic area which, based on supporting geological, geophysical or other data, is deemed to have potential for the discovery of commercial hydrocarbons.

MBtu. Thousand British Thermal Units.

Mcf. Thousand cubic feet of natural gas.

Mcfe. Thousand cubic feet equivalent, determined using the ratio of six Mcf of natural gas to one Bbl of crude oil, condensate or natural gas liquids.

MMBtu. Million British Thermal Units.

MMcf. Million cubic feet of natural gas.

MMcf/d. One MMcf per day.

MMcfe. Million cubic feet equivalent, determined using the ratio of six Mcf of natural gas to one Bbl of crude oil, condensate or natural gas liquids.

Net acres or net wells. The sum of the fractional working interest owned in gross acres or wells, as the case may be.

Net feet of pay. The true vertical thickness of reservoir rock estimated to both contain hydrocarbons and be capable of contributing to producing rates.

Present value of future net revenues or present value or PV-10. The pre-tax present value of estimated future revenues to be generated from the production of proved reserves calculated in accordance with SEC guidelines, net of estimated

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

production and future development costs, using prices and costs as of the date of estimation without future escalation, without giving effect to non-property related expenses such as general and administrative expenses, debt service and depreciation, depletion and amortization, and discounted using an annual discount rate of 10%.

Productive well. A well that is found to be capable of producing hydrocarbons in sufficient quantities such that proceeds from the sale of the production exceed production expenses and taxes.

Prospect. A specific geographic area which, based on supporting geological, geophysical or other data and also preliminary economic analysis using reasonably anticipated prices and costs, is deemed to have potential for the discovery of commercial hydrocarbons.

6

Proved area. The part of a property to which proved reserves have been specifically attributed.

Proved developed oil and gas reserves. Reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery should be included as proved developed reserves only after testing by a pilot project or after the operation of an installed program has confirmed through production responses that increased recovery will be achieved.

Proved oil and gas reserves. The estimated quantities of crude oil, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Reservoirs are considered proved if economic producibility is supported by either actual production or conclusive formation test. The area of a reservoir considered proved includes (a) that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any, and (b) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir. Reserves which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the proved classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based. Estimates of proved reserves do not include the following: (a) oil that may become available from known reservoirs but is classified separately as indicated additional reserves ; (b) crude oil, natural gas and natural gas liquids, the recovery of which is subject to reasonable doubt because of uncertainty as to geology, reservoir characteristics or economic factors; (c) crude oil, natural gas and natural gas liquids that may occur in undrilled prospects; and (d) crude oil, natural gas and natural gas liquids that may be recovered from oil shales, coal, gilsonite and other such sources.

Proved properties. Properties with proved reserves.

Proved undeveloped reserves. Reserves that are expected to be recovered from new wells on undrilled acreage or from existing wells where a relatively major expenditure is required for recompletion. Reserves on undrilled acreage are limited to those drilling units offsetting productive units that are reasonably certain of production when drilled. Proved reserves for other undrilled units can be claimed only where it can be demonstrated with certainty that there is continuity of production from the existing productive formation. Proved undeveloped reserves may not include estimates attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual tests in the area and in the same reservoir.

Reservoir. A porous and permeable underground formation containing a natural accumulation of producible natural gas and/or oil that is confined by impermeable rock or water barriers and is separate from other reservoirs.

Service well. A well drilled or completed for the purpose of supporting production in an existing field. Specific purposes of service wells include gas injection, water injection, steam injection, air injection, salt-water disposal, water supply for injection, observation, or injection for in-situ combustion.

Undeveloped acreage. Lease acreage on which wells have not been drilled or completed to a point that would permit the production of commercial quantities of natural gas and oil regardless of whether such acreage contains proved reserves.

Unproved properties. Properties with no proved reserves.

Working interest. The operating interest that gives the owner the right to drill, produce and conduct operating activities on the property and receive a share of production.

7

Part I

Item 1. Identity Directors, Senior Management and Advisers

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Storm Cat is filing this Form 20-F as an annual report and therefore, this item is not required.

Item 2. Offer Statistics and Expected Timetable

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Storm Cat is filing this Form 20-F as an annual report and therefore, this item is not required.

Item 3. Key Information

Selected Financial Data

The selected historical financial data presented in the table below for each of the years ended December 31, 2005, 2004, 2003, 2002 and 2001 was derived from the audited consolidated financial statements of the Corporation. The audited consolidated financial statements of the Corporation for the years ended December 31, 2005, 2004 and 2003 are included in this filing. The selected financial data presented in the table below should be read in conjunction with the consolidated financial statements and the notes thereto (Item 17) and with the information appearing under the heading Item 5 Operating and Financial Review and Prospects.

We have presented our financial statements for Fiscal 2005 in conformity with United States generally accepted accounting principles (U.S. GAAP). We have reclassified certain prior year amounts to conform to the current year s presentation. In previous years, we prepared and reported our financial statements in conformity with Canadian generally accepted accounting principles and provided a reconciliation to U.S. GAAP.

8

Selected Financial Data
(US\$ in Thousands, except per share data)

	Year Ended 12/31/05	Year Ended 12/31/04	Year Ended 12/31/03	Year Ended 12/31/02	Year Ended 12/31/01
Operating Revenue	\$ 4,627	\$ 104	\$	\$	\$
Loss from Operations	(8,395)	(909)	(173)	(153)	(59)
Net Loss	(8,368)	(909)	(173)	(153)	(59)
Loss Per Basic Share (1)	(0.17)	(0.04)	(0.01)	(0.01)	(0.01)
Loss Per Diluted Share (1, 2)	(0.17)	(0.04)	(0.01)	(0.01)	(0.01)
Weighted Average Shares Outstanding	49,107,553	21,455,630	11,236,892	10,653,330	7,086,652
Working Capital	\$ 18,445	\$ 2,257	\$ 430	\$ 85	\$ 237
Total Assets	56,953	5,743	489	86	240
Net Assets	25,623	2,859	28	17	17
Total Liabilities	13,502	680	30		
Shareholders' Equity	43,451	5,063	459	86	240
Common Shares Outstanding at End of Year	65,654,388	32,560,714	13,653,330	10,653,330	10,653,330
Dividends Per Share (1, 3)					

(1) Effective March 31, 2005, we completed a forward share split of our common shares on a two-for-one basis. All per share amounts have been adjusted to reflect this share split.

(2) As a result of net losses incurred, diluted earnings per share is not presented.

(3) As of December 31, 2005, we have not paid any dividends on our common shares.

Capitalization and Indebtedness

Storm Cat is filing this Form 20-F as an annual report and therefore, this item is not required.

Reasons for the Offer and Use of Proceeds

Storm Cat is filing this Form 20-F as an annual report and therefore, this item is not required.

Risk Factors

Our business, operations and financial condition are subject to various risks. If any of these risks and uncertainties actually occur, our business, financial condition or results of operations could be materially and adversely affected and the value of our common shares could decline.

Risks Related to Our Business

We have recently changed our business model.

From 2000 to late 2003, our business consisted of mineral exploration operations in Canada and Argentina. In 2003 and 2004 we disposed of, or abandoned, substantially all of our interests in mineral exploration properties. In 2004, we changed our name from Toby Ventures Inc. to Storm Cat Energy Corporation and began to focus on exploring conventional and unconventional resource plays. Unconventional resources are reserves from fractured shales, coal beds and tight sand formations. In January 2004, we began acquiring exploration, development and/or production rights for coalbed methane and/or natural gas in Mongolia, Wyoming, Alaska and Canada. Our limited financial history makes it difficult for us to project our revenues, expenses, and potential for successful development of these exploration properties.

Price volatility may affect our financial condition.

The prices of oil and natural gas are volatile and our operating results and future rate of growth depend heavily on prevailing market prices for these resources. A substantial or extended decline in prices for these resources would have a material adverse effect on us. These prices are affected by numerous factors beyond our control, including international economic and political trends, the effects of inflation, currency exchange fluctuations, interest rates and global or regional consumption patterns, worldwide and domestic supplies of oil and gas, the ability of members of the Organization of Petroleum Exporting Countries (OPEC) to agree to and maintain oil price and production controls, actions of governmental authorities, the availability of transportation facilities, increased production due to new discoveries or improved recovery techniques and weather conditions.

We operate in a highly competitive industry.

We compete with other energy development companies for properties, equipment, materials and labor. Our industry is highly competitive in all aspects. Many of our competitors have larger operations and greater financial resources than we do. Competition in our business may adversely affect our ability to acquire properties, equipment and materials, attract and retain qualified labor, and attract the necessary capital to sustain our resource exploration and production in the future.

Oil and gas exploration is a speculative undertaking.

Oil and gas exploration is a speculative business. Our future success depends on our ability to economically locate oil and gas production and reserves in commercial quantities. Our anticipated exploration and development activities are subject to reservoir and operational risks. Even when oil and gas is found in what are believed to be commercial quantities, reservoir risks, which may be heightened in new discoveries, may lead to higher costs and/or lower production than originally anticipated. These risks include the inability to sustain deliverability at commercially productive levels as a result of decreased reservoir pressures, large amounts of water, or other factors that might be encountered. The effects of these factors may result in Storm Cat not receiving an adequate return on investment capital.

Reserves are imprecise estimates.

The information on reserves provided in this Annual Report and other filings with the SEC are estimates of our reserves and the future revenues from these reserves. If the assumptions underlying these estimates prove to be incorrect, the quantity of our reserves and our future cash flows could be materially different from these estimates.

A large percentage of our reserves are undeveloped.

A large percentage, approximately 61.3%, of our reserves are classified as proved undeveloped reserves. If we do not develop such reserves due to the lack of capital or if our drilling efforts are unsuccessful, then our future revenues and our projected future cash flows will be adversely impacted as well as our stock price.

We face operating risks in our exploration and production activities.

Our business involves operating risks, including well blowouts, craterings, explosions, uncontrollable flows of oil, natural gas or well fluids, leaks, fires, formations with abnormal pressures, pipeline ruptures or spills, pollution, releases of toxic gas and other environmental hazards and risks, any one of which can cause personal injury, damage to property, equipment and the environment, as well as interruption of our operations. We maintain insurance against some, but not all, of these risks. If any of these events occurred, we could face substantial losses that could reduce or even eliminate funds available for our operations.

Our industry is highly regulated.

Our business is heavily regulated by federal, state, and local authorities. These regulations control many aspects of our business including, among other things, land use, prospecting, the drilling and spacing of wells, protection of ground water, conservation of soil, safety standards, site reclamation, restoration, exports, labor standards, occupational health, waste disposal, toxic substances and other matters. The regulations and laws governing our industry are under constant review and may be amended or expanded. Regulation increases the cost of doing business and decreases profitability. If we fail to comply with these laws and regulations, we may be subject to substantial penalties or suspension or termination of our operations.

Our operations are subject to complex environmental regulations.

Our current and anticipated future operations require permits from various federal, state and local governmental authorities and such operations are and will be regulated by laws and regulations governing various elements of the oil and gas industries.

We cannot predict what environmental legislation, regulation or policy will be enacted or adopted in the future or how in the future laws and regulations will be administered or interpreted. The recent trend in environmental legislation and regulation generally is toward stricter standards and this trend is likely to continue in the future. This recent trend includes, without limitation, laws and regulations relating to air and water quality, waste handling and disposal, the protection of certain species and the preservation of certain lands. These regulations may require permits or other authorizations for certain activities. These laws and regulations may also limit or prohibit activities on certain lands lying within wetland areas, areas providing for habitat for certain species or other protected areas. Compliance with more stringent laws and regulations, as well as potentially more vigorous enforcement policies or stricter interpretation of existing laws, may necessitate significant capital expenditures, may materially affect the results of our operations and business, or may cause material changes or delays in our intended activities.

There can be no assurance that we will be able to obtain all permits required for future exploration on reasonable terms or that such laws and regulations, or new legislation or modifications to existing legislation, will not have an adverse effect on any project we might undertake. Our failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing our operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions.

We have a history of net losses.

Since our incorporation in May of 2000, we have experienced annual net losses. In the year ended December 31, 2005 we had a net loss of \$8,367,697 and our cumulative net loss from date of our incorporation to December 31, 2005 is \$9,760,993. There is no guarantee as to when, if ever, we will realize a net profit.

We have limited cash flow to support our capital needs and will require additional capital to fund our operations.

Only a limited number of our projects have advanced to the commercial production stage and we have no history of positive cash flow to support our operations. Even if our current exploration programs are successful, we will require additional capital to complete future exploration activities and fund our operations. If we are unable to obtain additional financing, we may be forced to reduce or discontinue our activities, forfeit our interest in properties and/or reduce or terminate our operations, which would likely have a negative effect on our share price.

We have not paid dividends on our common shares since incorporation and do not anticipate doing so in the foreseeable future.

We may not be able to obtain additional funding to meet our capital needs and if we raise additional capital through equity, present and prospective shareholders may realize significant dilution.

There is no guarantee that we will be successful in raising additional capital or be able to obtain financing on favorable terms. Historically, our only source of funds has been through the sale of our common shares. Any transaction involving the issuance of previously authorized but unissued shares of common shares or securities convertible into common shares will result in dilution, which could be substantial, to holders of our common shares.

We operate in international markets, which subject us to additional risks.

We operate in a number of countries, subjecting our business to risks that often characterize international markets, including economic and political instability; longer payment cycles; difficulties in collecting accounts receivable; licensing requirements; unexpected changes in regulatory requirements and tariffs; potentially adverse tax consequences and fluctuations in exchange rates.

Fluctuations in foreign currency exchange rates could adversely affect our business.

We maintain accounts in U.S. and Canadian dollars. A material decrease in the value of the Canadian dollar relative to the U.S. dollar could negatively impact our income statement and share price.

We depend on certain key personnel.

We strongly depend on the business and technical expertise of our management and key personnel, particularly that of our President and Chief Executive Officer, J. Scott Zimmerman and our Chief Financial Officer, Paul Wiesner. There is little possibility that this dependence will decrease in the near term. We carry no key man life insurance on any of our executives. As our operations expand, we will require additional key personnel and related resources.

Some of our officers and directors serve as officers and directors of other companies.

Some of our officers and directors are also officers, directors or shareholders of other companies including those that are similarly engaged in the business of acquiring, developing and exploiting oil and gas producing properties. Such associations may give rise to conflicts of interest from time to time. Our directors are required by law to act honestly and in good faith with a view to the best interests of Storm Cat and to disclose any interest that they may have in any Storm Cat project or opportunity. Further, we have an internal conflict policy, which is sometimes referred to as the Policy, and a Code of Ethics, both which address directors' conflicts of interest. Under the Policy, if a conflict of interest arises at a meeting of our Board, any director with a conflict must disclose his interest and abstain from voting on such matters. In making the determination as to whether or not we will participate in any project or opportunity, the directors will primarily consider the degree of risk to us and our financial position at that time.

We focus heavily on risky unconventional plays, which rely on technological advances that in the future may not be effective.

The unconventional plays are a central element of our business model. Unconventional resources are reserves from fractured shales, coal beds and tight sand formations. The development of typical unconventional plays may involve greater extraction and retrieval costs than are involved in development of typical conventional plays. Often the quality of gas and commercial viability is less known in a typical unconventional play. Therefore, the process of developing an unconventional play involves significant expenditures before commercial viability can be ascertained and presents a risk of cost overruns and inadequate gas recovery.

Further, technological innovation is a key component to realizing the economic value of unconventional plays. We continue to explore and rely on advances in technologies such as drilling, well completion and geophysical technologies that have helped the viability of the unconventional play

Coal bed methane may not continue to rise as an energy source in the United States.

Currently, coalbed methane accounts for over 9% of U.S. natural gas production. While we expect this figure to continue to rise, there can be no guarantee that it will continue to do so. If demand for coalbed methane is flat or decreases, our business model could prove unsuccessful and our share price could decline.

We may incur compression difficulties and expense.

As production increases, more compression is generally required to maximize the production flowing through the pipeline. Production costs increase as additional compression is required, primarily because the compression process requires more fuel. In addition, the compression process is a mechanical process, and should a breakdown occur we will be unable to deliver gas until repairs to the machinery are completed.

If we are not successful in acquiring and developing producing properties, we may be unable to expand our business and be competitive in our industry.

We anticipate that a significant portion of our growth will be the result of acquisition and the exploitation of gas producing properties. The successful acquisition of producing properties requires an assessment of recoverable reserves, future gas prices, operating costs, potential environmental and other liabilities and other factors beyond our control. This assessment is necessarily inexact and its accuracy is inherently uncertain. It will not reveal all existing or potential problems, nor will it permit us to become sufficiently familiar with the properties to assess fully their deficiencies and capabilities. Inspections may not be performed on every well, and structural and environmental problems are not always observable even when inspection is undertaken. There can be no assurance that our acquisitions will be successful, and any unsuccessful acquisition could be costly, damaging to our operations, and could have a material adverse effect on our business.

We have contracts to sell gas for some of our properties and any contracts we are able to secure may not be long-term contracts.

As of December 31, 2005, the Corporation does have short term forward gas sales contracts of a small percentage of our gas production. Please see Note 10 of the Notes to the Consolidated Financial Statements for detailed information.

There is no assurance that we will be able to secure contracts for the sale of gas on any or all of our properties, nor is there any assurance that if we are able to do so that any of these will be long-term contracts. If we are able to obtain contracts of the desired duration, there is still no assurance as to what gas prices the contracts will provide.

Pipeline capacity may be inadequate.

Due to the nature of natural gas development, during certain time periods, pipeline capacity may be inadequate to meet our transportation needs. We do not have any current or future planned wells that are not serviced by a pipeline, or where the right-of-ways to tap into a pipeline are not already established. However, often, as new development comes on-line, existing pipelines may be close to or at capacity for a period of time before new pipelines are built. During periods when pipeline capacity is inadequate to meet demand, we may be forced to reduce production or incur additional expense as existing production is compressed to fit into existing pipelines.

We do not obtain title insurance or other warranties of title with our leases and working interests.

We do not obtain title insurance or other guaranty or warranty of good title with our gas leases and well working interests. Title insurance is not available for subsurface leases. Accordingly, third parties may assert claims against our legal entitlement to the gas leases and working interests being acquired, irrespective of our leases and working well interests. In order to alleviate this risk, we require a title search and title opinion on all leases prior to drilling. There is no assurance, however, that all title defects will be cured prior to drilling.

Risks Related To Our Common Shares

U.S. Investors may have difficulty effecting service of process against some of our Canadian directors.

We are incorporated under the laws of the Province of British Columbia, Canada. Consequently, it may be difficult for United States investors to effect service of process in the United States upon our directors or officers who are not residents of the United States, or to realize in the United States upon judgments of United States courts predicated upon civil liabilities under the Securities Exchange Act of 1934, as amended (the Exchange Act). A judgment of a U.S. court predicated solely upon such civil liabilities would probably be enforceable in Canada by a Canadian court if the U.S. court in which the judgment was obtained had jurisdiction, as determined by the Canadian court, in the matter. There is substantial doubt whether an original action could be brought successfully in Canada against any of such persons or Storm Cat predicated solely upon such civil liabilities.

We are a Foreign Private Issuer and exempt from the Section 16 and the Proxy Rules of Section 14 of the Securities Exchange Act of 1934.

Under the U.S. federal securities laws, we are a foreign private issuer. Unless and until such time as we become a U.S. Issuer under these laws, we are not subject to certain regulation under U.S. securities laws, such as Section 16 and the Proxy Rules of Section 14 of the Exchange Act. Further, as a foreign private issuer, we make our Annual Report on Form 20-F and report our current events, including the dissemination of proxy materials and information regarding our annual meeting of shareholders, on Form 6-K. These disclosure obligations may result in the reduced availability public information regarding us, compared to the disclosure required of U.S. Issuers under U.S. federal securities laws.

Our common shares are traded on more than one market and this may result in price variations.

Our common shares are traded primarily on the American Stock Exchange and on the TSX Venture Exchange. Trading in our common shares on these markets is effected in different currencies (U.S. dollars on the American Stock Exchange and Canadian dollars on the TSX Venture Exchange) and at different times, as the result of different time zones, different trading days and different public holidays in the United States and Canada. Consequently, the trading prices of our common shares on these two markets often differ, resulting from the factors described herein as well as differences in exchange rates and from political events and economic conditions in the United States and Canada. Any decrease in the trading price of our common shares on one of these markets could cause a decrease in the trading price of our common shares on the other market.

We are subject to the Continued Listing Criteria of The American Stock Exchange (AMEX).

Our common shares are currently listed on AMEX. In order to maintain our listing on AMEX, we must maintain certain share prices, financial and distribution targets, including maintaining a minimum amount of shareholders' equity and a minimum number of public shareholders. In addition to objective standards, AMEX may delist the securities of any issuer if in its opinion, the issuer's financial condition and/or operating results appear unsatisfactory; if it appears that the extent of public distribution or the aggregate market value of the security has become so reduced as to make further dealings on AMEX inadvisable; if the issuer sells or disposes of principal operating assets or ceases to be an operating company; if an issuer fails to comply with AMEX's listing requirements; if an issuer's common shares sell at what AMEX considers a low selling price and the issuer fails to correct this via a reverse split of shares after notification by AMEX; or if any other event shall occur or any condition shall exist which makes further dealings with AMEX, in its opinion, inadvisable.

If AMEX delists our common shares, investors may face material adverse consequences, including, but not limited to, a lack of trading market for our securities, decreased analyst coverage of our securities, and an inability for us to obtain additional financing to fund our operations.

Our share price has fluctuated and could continue to fluctuate significantly.

The market price for our common shares, as well as the price of shares of other energy companies, has been volatile. Numerous factors, many of which are beyond our control, may cause the market price of our common shares to fluctuate significantly, such as:

- Fluctuations in our quarterly revenues and earnings and those of our publicly held competitors;
- Shortfalls in our operating results from levels forecast by securities analysts;
- Announcements concerning us or our competitors;
- Changes in pricing policies by us or our competitors;
- General market conditions and changes in market conditions in our industry; and
- The general state of the securities market.

In addition, trading in shares of companies listed on AMEX and the TSX Venture Exchange, generally, and trading in shares of energy companies, specifically, has experienced price and volume fluctuations that have often been unrelated or disproportionate to operating performance. These broad market and industry factors may depress our share price, regardless

of our actual operating results. In addition, if we issue additional shares in financings or acquisitions, our shareholders will experience additional dilution and the existence of more shares could decrease the amount that purchasers are willing to pay for our common shares.

Item 4. Information on the Corporation

History and Development of the Corporation

Corporate and General

Storm Cat is an independent oil and gas company focused on the pursuit, exploration and development of large unconventional gas reserves, which are reserves from fractured shales, coalbeds and tight sand formations.

The Corporation was incorporated under the laws of British Columbia, Canada on May 15, 2000 under the name Toby Ventures Inc. We conducted an Initial Public Offering in Canada and our shares began trading on the Canadian Venture Exchange (now the TSX Venture Exchange) on November 15, 2001 under the symbol SME.

Since incorporation, we have been involved in the exploration of natural resource properties. We commenced active exploration and acquisition of mineral resource properties in 2000. In late 2003, we decided to dispose, sell or abandon our mineral exploration interests and enter the oil and gas industry through the acquisition of interests in conventional, unconventional and coalbed methane gas projects.

Under a special resolution passed by its shareholders, the Corporation changed its name to Storm Cat Energy Corporation effective January 30, 2004.

We currently have producing properties in Wyoming's Powder River Basin and have exploration and development acreage in Canada and Alaska. We have also conducted exploration activities in Mongolia.

The Corporation's corporate headquarters and executive offices are located at 125 17th St., Suite 2310, Denver, Colorado 80202. The telephone number is (303) 991-5070. Contact person is J. Scott Zimmerman, President. The Corporation's Canadian registered office is located at 209 8th Avenue, Alberta, Canada, T2P 1B8. The telephone number is (403) 451-5070. Our website address is www.stormcatenergy.com.

Development of the Corporation's Business.

Mineral Resources Activities. From inception until late 2003, our primary business consisted of mineral resource activities. In 2000, we acquired the Sadim Property of 4 mineral claims located in the Similkameen Mining Division in British Columbia. We began exploration at Sadim in November 2001 and commenced a drill program on the property in June 2002.

In January and February 2002, we applied for and received 3 mineral exploration claim blocks located in Northern Quebec. These properties were located in an area that was being explored for diamonds by many different companies. During the year ended December 31, 2003, we abandoned the claims.

During 2003, we applied for and received a 100% interest in 5 mineral exploration properties in Argentina.

In late 2003, our management and board of directors determined that we would exit the mineral resources business and focus our efforts on oil and gas operations. Through December 31, 2003, our cumulative expenditures with respect to mineral resources activities totaled \$0.5 million. All of these amounts had been expensed under U.S. GAAP.

Under a Special Resolution passed by our shareholders, the Corporation changed its name, effective January 30, 2004 to Storm Cat Energy Corporation. We adopted new Articles of incorporation under the *Business Corporations Act* of British Columbia on May 21, 2004. In June 2004, the Corporation changed its authorized share capital to an unlimited number of common shares without par value. Prior to June 2004, the authorized share capital was 20,000,000 common shares without par value. Effective March 31, 2005, the Corporation undertook a two-for-one share split. All share and per share amounts included in this filing have been restated to give retroactive effect, as necessary, to the effect of the share split.

The Corporation's common shares began trading on AMEX on October 3, 2005 under the symbol SCU.

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Throughout 2004, we disposed of our interests in mineral resources properties and claims. In January 2004, we entered into an option agreement to sell a 50% undivided interest in our Sadim claims in British Columbia to an affiliated company of a former Storm Cat director. We received C\$10,000 related to this option agreement. The agreement was subsequently terminated and we ceased all activities related to these claims.

In February 2004, we sold 100% of the interests in Argentina for C\$10,000 to a third party, one of whose directors was also a director of Storm Cat.

At December 31, 2005, we hold the Sadim claims in British Columbia but attribute no value to the property.

Oil and Gas Operations. Since the beginning of 2004, we have concentrated our efforts on the oil and gas business. Our business model consists of three strategies: (1) acquiring producing properties with drilling prospects in focused basins in both the U.S. and Canada; (2) exploring areas of moderate risk; and (3) initiating higher risk projects with the potential for higher reward.

Our primary source of financing for our exploration and drilling programs has been the net proceeds from private placements of our common shares and warrants. In 2004 and 2005, we raised a total of \$51.1 million in connection with private equity offerings and issuance of common shares pursuant to warrant exercises net of issuance costs.

As part of the 2005 private placements, we entered into registration rights agreements with our investors requiring us to file with the Securities and Exchange Commission (SEC) a registration statement covering the resale of the common shares issued as well as any common shares issuable upon exercise of the warrants. Additionally, certain of our shares have flow-through rights which entitle the holders to certain tax deductions in Canada as a result of our exploration and development activities.

Since the beginning of 2004, we have also retained key oil and gas exploration personnel, included as a significant cost in our general and administrative expenses, in order to maintain our work commitments, undertake our acquisition and exploration efforts, manage our producing properties and provide administrative support. We have also incurred significantly higher general and administrative expenses for legal, accounting and other professional services related to our various undertakings.

During the past two years, our oil and gas activities have been conducted in the United States, Canada and Mongolia. During 2005, the two significant events occurred with respect to our oil and gas operations. First, in February 2005 we acquired producing leases in the NE Spotted Horse Field in the Powder River Basin of Wyoming for approximately \$8.7 million. The production from this field represented 68% of our 2005 production volumes and 69% of our 2005 natural gas revenue, and the reserves attributable to this acquisition comprise approximately 86% of our estimated proved reserves as of December 31, 2005.

The second significant event with respect to our oil and gas properties was the impairments of our investments in Mongolia. As of December 31, 2004, we had approximately \$1.3 million of capitalized costs related to our Noyon and Tsaidam prospects in Mongolia, and our 2005 capital spending in Mongolia was \$0.8 million. Our exploration programs on these prospects during 2005 showed that, while the potential resource is relatively large, production of the reserves would not be economic under current conditions due to lack of infrastructure. In addition, the government of Mongolia's senior cabinet members resigned in January 2006; although, the Petroleum Authority of Mongolia (PAM) is still an active body. The Corporation cannot be assured that we will be granted any further rights under the five-year Production Sharing Contract that was granted to us in 2004 by the government as it was constituted at that time. As a result of the foregoing factors, as of December 31, 2005 we have impaired the full amount of our capitalized costs in Mongolia. The amount of the impairment was \$2.1 million. We are maintaining a presence in Mongolia and once the government and PAM re-stabilize we will re-evaluate our activities there.

Capital Expenditures and Dispositions.

The following table summarizes capital expenditures made by Storm Cat with respect to its oil and gas operations during the periods indicated:

16

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

	Year Ended December 31, 2005			
	United States (In thousands)	Canada	Mongolia	Total
Acquisitions:				
Producing properties	\$ 6,918	\$	\$	\$ 6,918
Undeveloped acreage	1,814		232	2,046
Total acquisitions	8,732		232	8,964
Exploration and development:				
Land and seismic	471	1,933		2,404
Drilling, facilities and equipment	9,036	3,328	618	12,982
Capitalized overhead	312	254		566
Total exploration and development	9,819	5,515	618	15,952
Asset retirement obligations	714			714
Other property and equipment	628	245	(56)	817
Total capital expenditures	19,893	5,760	794	26,447
Dispositions				
Net capital expenditures	\$ 19,893	\$ 5,760	\$ 794	\$ 26,447

	Year Ended December 31, 2004			
	United States (In thousands)	Canada	Mongolia	Total
Acquisitions:				
Producing properties	\$ 1,267	\$	\$	\$ 1,267
Undeveloped acreage	166		433	599
Total acquisitions	1,433		433	1,866
Exploration and development:				
Drilling, facilities and equipment	13		819	832
Capitalized overhead				
Total exploration and development	13		819	832
Asset retirement obligations	79			79
Other property and equipment		34	56	90
Total capital expenditures	1,525	34	1,308	2,867
Dispositions				
Net capital expenditures	\$ 1,525	\$ 34	\$ 1,308	\$ 2,867

During the year ended December 31, 2003, we incurred capital expenditures of \$24,000 in Mongolia, and there were no dispositions of properties.

Principal Capital Expenditures and Divestitures Currently in Progress.

From December 31, 2005 to March 15, 2006 we completed 2 wells in Elk Valley that were drilled in 2005 and we drilled and completed 1 well in Alaska. Funding for these wells and related facilities and equipment has been through expenditure of a portion of our cash and cash equivalents on hand at December 31, 2005.

In January 2006, we completed the sale of certain gathering assets in the Powder River Basin for \$1.0 million. Concurrently, we entered into an agreement with the purchaser to provide natural gas gathering and compression services for our properties in this area.

Our capital program for 2006 includes approximately \$32.0 million of capital expenditures, including \$22.0 million of exploration and \$10.0 million for development. In addition to our planned exploration and development spending, in early May 2006, we closed on acquisitions of approximately 16,000 net unproved mineral acres in Van Buren, Pope and Searcy counties, Arkansas and approximately 3,550 net unproved acres in Campbell County, Wyoming. In March 2006, the Corporation acquired 2,560 acres of land prospective for gas from the Duvernay shale in the Redwater area of Central Alberta. Total payment for the lease was C\$362,383. We are also investigating additional exploration and development projects for possible acquisition.

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Currently, we do not have sufficient funds to carry out our 2006 capital program or to undertake additional acquisitions. We intend to fund our operations in 2006 by establishing a bank line of credit secured by our proved properties, or through additional equity issuances, or a combination thereof. There can be no assurance that we will be able to obtain the required funds for all or any of our capital program.

We have, from inception, financed our activities through the distribution of equity capital. We anticipate having to raise additional funds by equity issuance in the next several years in order to fund planned exploration and development programs on existing properties, to acquire interests in additional exploration and development projects, and to fund exploration and development programs on such acquisitions. The amount and timing of such offerings is dependent upon the success of our exploration programs as well as the amount of cash flow generated by our producing properties and the general economic climate.

Public Takeover Offers.

During the years ended December 31, 2005 and 2004, and the period from January 1, 2006 to May 31, 2006, we have not received any public takeover offers nor have we made any such takeover offers.

Business Overview

Operations and Principal Activities. Our operations and principal activities focus on the pursuit, exploration and development of large unconventional gas reserves from fractured shales, coalbeds and tight sand formations. All of our production volumes and product sales to date have been from the production of coalbed methane in the Powder River Basin in Wyoming. We have also conducted exploration activities in Canada and Mongolia.

Competition. All aspects of the oil and gas industry are highly competitive and we compete with other entities primarily in the areas of (1) exploration for and development of new sources of oil and natural gas reserves; (2) reserve and property acquisitions; (3) transportation and marketing of products; (4) access to services and equipment to carry out our capital programs and operating activities; and (5) attracting and retaining experienced personnel. The oil and gas industry also competes with other industries in many of these areas.

Seasonality. Market prices for natural gas frequently exhibit volatile characteristics, some of which may be seasonal. In addition, seasonal weather conditions may affect our operations, particularly with respect to access to worksites and drilling operations. To date, however, we have not experienced any significant seasonal impacts on our operations.

Raw Materials. Not applicable.

Marketing. We market our natural gas to purchasers in the Powder River Basin. In 2004 and 2005, we sold a significant portion of our production to Enserco Energy, Inc., as described in Note 1 of Notes to the Consolidated Financial Statements in Item 17 of this Annual Report. Although we sell the majority of our production to a few purchasers, there are numerous other purchasers in the areas in which our properties are located. Accordingly, we do not believe that a loss of one or more of our major purchasers would have a significant adverse effect on our operations.

The price we receive for our natural gas is determined by negotiation with our purchasers. Such price depends, in part, on natural gas quality, prices of competing natural gas and other fuels, distance to market, access to transportation, length of contract term and the supply/demand balance. We have chosen to enter into certain gas sales contracts in order to optimize the prices we receive for our natural gas. Our delivery commitments pursuant to these contracts as of December 31, 2005 is disclosed in Note 8 of Notes to the Consolidated Financial Statements in Item 17 of this Annual Report.

Dependency on patents, licenses, contracts or new manufacturing processes. This is not applicable, except as to the marketing contracts disclosed above.

Effects of Government Regulation.

Regulation

Our oil and gas operations are subject to various U.S. federal, state, and local laws and regulations, as well as foreign laws and regulations.

United States

The state of Wyoming has adopted laws regulating the exploration for and production of coalbed methane gas, including laws requiring permits for the drilling of wells, imposing bonding requirements in order to drill or operate wells, and providing authority for regulation relating to the location of wells, the method of drilling and casing wells, the surface use and restoration of properties upon which wells are drilled, and the abandonment of wells. Our operations are also subject to various conservation laws and regulations.

Currently, 79.8% of our Power River leases are on federal land pursuant to oil and gas leases administered by the Bureau of Land Management (BLM). These leases contain relatively standardized terms and require compliance with detailed regulations and orders. In addition to permits required from other agencies, lessees must obtain a permit from the BLM prior to the commencement of drilling, and comply with regulations governing, among other things, engineering and construction specifications for production facilities, safety procedures, plugging and abandonment of wells, the valuation of production, and the removal of facilities. Under certain circumstances, the BLM or the Mineral Management Service (MMS), as applicable, may require our operations on federal leases to be suspended or terminated. Any such suspension or termination could materially and adversely affect our financial condition and operations. There are currently no environmental impact studies underway which would affect our properties. All required environmental impact studies were completed and approved prior to acquisition. However, regular course of business permitting is required for water discharge and drilling.

In August 2005, Congress enacted the Energy Policy Act of 2005 (EP Act 2005), which amends the Natural Gas Act (NGA), to make it unlawful for any entity, as defined in EP Act 2005, to use any deceptive or manipulative device or contrivance in connection with the purchase or sale of natural gas or the purchase or sale of transportation services subject to regulation by the Federal Energy Regulatory Commission (FERC), in contravention of rules prescribed by the FERC. The EP Act 2005 also gives the FERC authority to impose civil penalties for violations of the NGA. The EP Act 2005 reflects a significant expansion of the FERC's enforcement authority. Storm Cat does not anticipate it will be affected by the EP Act 2005 any differently than other producers of natural gas of similar size with operations in the United States.

Additional proposals and proceedings that might affect the oil and gas industry are regularly considered by Congress, the states, the FERC, and the courts. We cannot predict when or whether any such proposals may become effective. No material portion of our business is subject to renegotiation of profits or termination of contracts or subcontracts at the election of the federal government.

Canada

The oil and natural gas industry in Canada is subject to extensive controls and regulations imposed by various levels of government. Federal authorities do not regulate the price of oil and gas in export trade. Legislation exists, however, that regulates the quantities of oil and natural gas which may be removed from the provinces and exported from Canada in certain circumstances. Regulatory requirements also exist related to licensing for drilling of wells, the method and ability to produce wells, surface usage, transportation of production from wells, and conservation matters. We do not expect that any of these controls and regulations will affect Storm Cat in a manner significantly different from other oil and natural gas companies of similar size with operations in Canada.

The provinces in which we operate have legislation and regulation which govern land tenure, royalties, production rates and taxes, and environmental protection and other matters under their respective jurisdictions. The royalty regime in the provinces in which we operate will represent a significant factor in the profitability of any production. Crown royalties are determined by government regulation and are typically calculated as a percentage of the value of production. The value of the production and the rate of royalties payable depends on prescribed reference prices, well productivity, geographical location, and the type or quality of the product produced.

Mongolia

Several members of the Mongolian government resigned in January 2006. The Corporation's production sharing agreements are still valid according to PAM, however given the recent events; there is no assurance as to the enforceability and validity of the agreements under a new regime.

As of December 31, 2005, the Corporation has taken a full impairment on its Mongolian assets. Storm Cat will continue to keep a skeletal work force in place and monitor the situation.

Environmental Regulation

Our operations are subject to government laws and regulations concerning pollution, protection of the environment and the handling and transport of hazardous materials in both the United States and Canada. These laws and regulations generally require Storm Cat to remove or remedy the effect of our activities on the environment at present and former operating sites, including dismantling production facilities and remediating damage caused by the use or release of specified substances. We believe that it is reasonably likely that the trend in environmental legislation and regulation will continue toward stricter standards. While we believe that we are in substantial compliance with applicable environmental laws and regulations in effect at the present time and that continued compliance with existing requirements will not have a material adverse impact on us, we cannot give any assurance that we will not be adversely affected in the future.

Storm Cat expects to incur abandonment and site reclamation costs as existing oil and gas properties are abandoned and reclaimed in the United States and Canada. As of the date of this Annual Report, such expenditures have been insignificant and we do not anticipate making material expenditures beyond normal compliance with environmental regulations in 2006.

Organizational Structure

Storm Cat is incorporated under the laws of British Columbia, Canada. We are a public company whose common shares are listed on the TSX Venture Exchange under the symbol `SME` on the American Stock Exchange under the symbol `SCU`. Our operations are conducted in part through our wholly-subsiidiaries listed below. All of our subsidiaries are 100% owned and we hold 100% of the voting rights.

Storm Cat Energy Mongol Co. Ltd.

Storm Cat Energy (USA) Corporation

Storm Cat Energy (USA) Operating Corporation

Storm Cat Energy (Powder River) LLC

Storm Cat Energy (Alaska) LLC

Triple Crown Gathering Corporation

Oil and Gas Properties

Powder River Basin, Wyoming, United States

In December 2004, we acquired a 100% working interest before payout (90% after payout; with a proportionate reduction in net revenue interest) in 1,481 acres of the Jamison/North Twenty Mile fields, located in Campbell County, Wyoming, for consideration of approximately \$1.25 million. Payout occurs after the Company recovers 400% of its drilling capital. In February 2005, we acquired producing leases in the NE Spotted Horse Field, located on the eastern portion of the Powder River Basin approximately 35 miles northwest of Gillette, Wyoming, for consideration of approximately \$8.7 million after purchase price adjustments. The acquisition included the seller's gas gathering assets, which we subsequently sold in January 2006. All of our natural gas production in 2005 and 2004 relates to these Powder River Basin fields.

21

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

The following table reflects the Company's total gross and net acreage by area and by field as of August 1, 2006:

Storm Cat Energy Corporation Acreage as of August 1, 2006

Area	Gross Acres	Net Acres
<u>Powder River Basin, WY</u>		
Northeast Spotted Horse	6,320	5,790
Jamison	723	651
20 Mile	760	684
Ford Ranch (Focus + Ellbogen/Westbrook Leases)	4,711	3,604
Sheridan (State Lease Sale)	1,521	1,521
PRB Acquisition	25,200	17,000
Total	39,235	29,250
<u>Fayetteville Shale, AR</u>		
Jordan Acquisition	16,166	12,044
Subsequent Lease Purchases	1,631	946

Northeast Spotted Horse Field

The Northeast Spotted Horse Field is a producing coalbed methane project located in the Powder River Basin of Wyoming, approximately 35 miles northwest of Gillette, Wyoming. The project consists of 6,320 gross contiguous acres located in the eastern portion of the Powder River Basin. The property contains 111 producing wells, all of which are operated by Storm Cat. The Corporation paid \$8.6 million to acquire the property.

The Corporation began drilling the undeveloped acreage in July 2005. Through December 31, 2005, the Corporation drilled 43 wells. Twenty-nine multi-seam completion wells were drilled in a combination of the Cook, Wall and Pawnee coal seams. The remaining 14 wells were completed only in the shallower Canyon coal seam on an experimental 160-acre pattern. The Corporation invested \$6.5 million on the Northeast Spotted Horse Field development program.

In 2006, we plan to complete our drilling program in the North East Spotted Horse Field. As of the date of this Annual Report, the Corporation has begun the drilling program.

Jamison/North Twenty Mile Fields

The Jamison/North Twenty Mile Fields are producing coalbed methane projects located on the eastern flank of the Powder River Basin coalbed methane natural gas region in Campbell County, Wyoming. The Corporation has a 100% Working Interest (81.5% Net Interest) in the projects. The projects cover approximately 1,481 acres and currently contain 28 producing wells that were originally placed into production in early 2002. Storm Cat paid \$1.25 million to acquire the property.

In 2005, the Corporation initiated a comprehensive recompletion and rework program on the projects. This program consists of pulling and reinstalling bottomhole pumps, re-perforating currently producing formations and deepening of some wells to test new zones. Storm Cat invested \$750,000 to develop the Jamison/North Twenty Mile Fields in 2005.

In 2006, the Corporation plans to drill up to 20 wells late in the third quarter to test the deeper Cook/Wall coals.

Powder River Basin Production and Reserves

In 2004, we reported net production of 17.3 MMcf attributable to one month of ownership of our interests in the Jamison/North Twenty Mile fields. In 2005, we reported net production of 463 MMcf attributable to ten months of ownership of our interests in the NE Spotted Horse field and 219.4 MMcf related to a full year of ownership of the Jamison/North Twenty Mile fields.

Netherland, Sewell & Associates, Inc. of Houston, Texas, independent reserve engineers, prepared an estimate of our proved reserves in the NE Spotted Horse and Jamison/North Twenty Mile fields as of December 31, 2005. A summary of the estimated net proved reserves by category is as follows:

Reserves Category	Volumes (MMcf)	Percent of Total	
Proved Developed Producing	3,340.7	33.4	%
Proved Developed Non-Producing	528.2	5.3	%
Proved Undeveloped	6,141.1	61.3	%
Total Proved	10,010.0	100.0	%

For additional information regarding our estimated proved reserves and changes therein, please refer to Note 12, Oil and Gas Producing Activities of Notes to the Consolidated Financial Statements included in Item 17 of this Annual Report.

Alaska Exploration Licenses, United States

In November 2004, Storm Cat acquired two Petroleum and National Gas leases in the onshore Cook Inlet region of Alaska comprising approximately 18,400 gross unproven acres for total consideration of approximately \$204,000. The rentals are \$1.50 per acre for 2006 (the second year), \$2.00 per acre for the third year, \$2.50 per acre for the fourth year and \$3.00 per acre for the fifth year.

In January 2005, the Corporation acquired an additional lease in the Cook Inlet region comprising approximately 3,751 gross unproven acres in close proximity to the existing acreage. Consideration for this lease was a payment of approximately \$9,000 and the assumption by Storm Cat of all future rental obligations with estimated annual rental of \$3.00 per acre and expiring January 1, 2009.

In May 2005, Storm Cat was the successful bidder at the May 2005 Cook Inlet State Lease Sale on 8 tracts in the Cook Inlet. Total annual consideration for these leases is estimated at \$6.00 per acre. We tendered a deposit in the amount of \$56,693. The final determination of the Corporation's final acreage position from the State of Alaska is expected in the second quarter of 2006. When the leases are issued, Storm Cat will owe the remaining consideration due the State on approximately 20,000 unproven acres. The term of the leases will be 7 years and rentals are \$1.00 per acre for the first year, \$1.50 per acre for the second year, \$2.00 per acre for the third year, \$2.50 per acre for the fourth year and \$3.00 per acre for the fifth and following years.

Storm Cat has completed a geological evaluation of the licenses and established a drilling target in December 2005. On February 14, 2006, the Corporation spud the Northern Dancer #1 well. Currently, Storm Cat is evaluating the drilling results. From inception through December 31, 2005, Storm Cat spent approximately \$0.6 million on the exploration program in Alaska.

Canada

British Columbia, Canada

In June 2005, we entered into a Farm-In and Joint Venture agreement on approximately 78,000 acres of provincial lands and freehold mineral rights in the Elk Valley area in the southeast part of British Columbia. Under the terms of the agreement, the Corporation has access to all existing infrastructure and facilities on the lands. To earn a 50% working interest in the property and all existing development and infrastructure, the Corporation must spend a total of C\$12.0 million over three years (of which C\$2.0 million must be spent in the first year). The Corporation has met its C\$2.0 million spending commitment in the first year.

During 2005, the Corporation re-activated three existing wells on the West test pilot. On two of the re-activated wells the Corporation completed into a lower coal seam that had not been tested. Two new wells were drilled in the West pilot using the methods the Corporation believes are critical to drilling CBM wells.

In 2006, the two new wells were completed and are in the process of dewatering. The Corporation has licensed 6 additional drilling locations with estimated spud dates in the second quarter. Storm Cat will also submit licenses for an additional 6 wells providing the Corporation with 12 potential drilling locations and licenses. Work will also begin on evaluating and planning for facilities, water management, and compression to a sales point depending upon the success of the drilling program.

Saskatchewan, Canada

In February 2005, we entered into a Farm-In agreement with respect to a large exploration permit called "Moose Mountain" in eastern Saskatchewan. The Moose Mountain exploration permit comprises approximately 236,000 acres of land (368 contiguous sections). Storm Cat paid C\$750,000 consideration to the lessee upon execution of the Farm-In agreement, and agreed to pay approximately C\$475,000 of the first two years' work commitment and approximately C\$95,000 of technical and geological expenses. Subsequently, we will pay our 45% working

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

interest share of costs and will receive our 45% working interest share of production until payout, which will be considered to have occurred when gross production reaches 5.5 bcfe. After payout, our interest will convert to a 30% working interest in these lands.

25

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

The Moose Mountain transaction is considered to be a related party transaction as Michael J. O'Byrne, a director of Storm Cat, is Vice-President of Land and a Principal of the lessee. Mr. O'Byrne abstained from Storm Cat's decision to enter into the farm-in agreement. A copy of the Moose Mountain acquisition agreement has been filed as an exhibit to this Annual Report.

The Corporation drilled a single well on the Moose Mountain prospect in June of 2005 to meet the terms of the farm-in agreement. The well had to be abandoned because of a stuck drill pipe. However, the Corporation was able to log the well and the test results provided enough encouragement to continue the exploration program in Moose Mountain. For 2006, the Corporation has licensed three drilling locations. Depending on rig availability, these wells should be spud in the second quarter of 2006. From inception through December 31, 2005, Storm Cat spent approximately \$1.3 million on the exploration program in Saskatchewan.

Alberta, Canada

In the fourth quarter of 2005, we acquired two exploration prospects in the south central portion of Alberta. In the Cessford area, we secured access to approximately 3,200 gross unproven acres through a drill-to-earn agreement whereby the Corporation must drill prior to March 15, 2006 (subject to rig availability). Storm Cat spud this well on May 23, 2006. The Corporation has 60 days after rig release of each well to elect to drill the next one. Each well earns the Corporation 640 acres. To earn all 3,200 acres, the Corporation must drill a total of 5 wells. In the Red Deer area, we were the successful bidder on approximately 2,100 acres in the December 2005 Alberta Crown Land Sale. Consideration paid for the Red Deer leases, which have a lease term of five years, was approximately C\$1.1 million and consideration from the Alberta Crown Land Sale was C\$0.95 million.

The Corporation is actively seeking a rig to drill the initial test well on the Cessford prospect. Development plans for Red Deer are to drill an exploratory well to the Mannville formation sometime during the fourth quarter of 2006. From inception through December 31, 2005, Storm Cat spent approximately \$4.2 million on the exploration program in Alberta.

Mongolia

In the second quarter of 2004, pursuant to a five-year Production Sharing Contract, the Mongolian government granted Storm Cat the exclusive rights for conducting coalbed methane gas operations in the Noyon prospect area in the South Gobi region of Mongolia. In the fourth quarter of 2004, we were granted a second exploration block known as the Tsiadam prospect area. The Corporation paid \$0.7 million to acquire the property.

The exploration program on the Noyon prospect was completed in March 2005. Results of testing showed that, while the potential resource is relatively large, production of the reserves would be not economic under current conditions and due to a lack of infrastructure. Exploration activities on the Tsiadam prospect were undertaken throughout 2005. The Corporation has concluded that this block of acreage can not be developed economically because of a lack of infrastructure.

From inception through December 31, 2005, Storm Cat spent approximately \$2.1 million on the Mongolian exploration program, all of which has been written off. In January of 2006, the government of Mongolia resigned. The Corporation cannot be assured that it will be granted any further rights under the Production Sharing Contract. However, the Corporation is maintaining a small presence in the country and is assessing its opportunities in Mongolia.

Item 4A. Unresolved Staff Comments

Not applicable.

Item 5. Operating and Financial Review and Prospects

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

This discussion and analysis should be read in conjunction with the consolidated audited financial statements for the years ended December 31, 2005, 2004 and 2003 and related notes thereto included in Item 17 of this Annual Report and with the Selected Financial Data set forth in Item 3 above. Our financial statements are prepared in accordance with U.S. GAAP and are presented in U.S. dollars. All share and per-share amounts have been retroactively adjusted to reflect a 2-for-1 share split that took place in March, 2005.

26

Operating Results

Fiscal Year 2005 Ended December 31, 2005 versus Fiscal Year 2004 ended December 31, 2004.

In 2005, we recorded our first full year of coalbed methane sales revenue from the Jamison/Twenty Mile field and 10 months of sales from the NE Spotted Horse field. Prior to 2005, the Company recorded only one month of revenue from production for the Jamison/Twenty Mile field and it had no other producing properties. Total revenue of \$4,627,000 in 2005 represented a 4,349% increase compared to revenue of \$104,000 recorded in December 2004. The significant increase was attributable to more months of production from these acquisitions, higher average sales prices, and the favorable results of our 43 well drilling program. Total sales volumes for the year ended December 31, 2005 were approximately 682.4 MMcf, an increase of 3,845% compared to 17.3 MMcf recorded for one month of sales in 2004.

Depletion of property and equipment was \$1,350,000 or \$1.97 per Mcfe, in 2005 compared to \$20,000 or \$1.18 per Mcfe, in 2004. The increase in depletion expense is attributable primarily to higher production in 2005.

In 2005, impairment expense of \$2,125,000 is attributable to the writedown in the value of our Mongolian cost pool. In 2004, we did not record any impairment expense.

General and administrative expense for the year ended December 31, 2005 was \$5,520,000 compared to \$951,000 for the year ended December 31, 2004. The increased expense is attributable to increasing the Corporation's technical workforce, increases in legal and accounting fees, additional consulting and investor relations expenses. Additional legal fees are attributable to the Corporation's special Extraordinary General Meeting held in September, listing application on the American Stock Exchange, three private placements closed in the fourth quarter of 2005, and the filing of the resale registration statement of Form F-3 relating to the private placements, which closed in the fourth quarter of 2005.

Interest income of \$125,000 for the year ended December 31, 2005 was attributable to higher average cash balances on hand throughout the year, primarily as a result of net proceeds from equity offerings.

As a result of the increased level of general and administrative expenditures and the impairment of our Mongolian cost center, offset partially by the profit margin contributed by natural gas sales, the net loss of \$8,368,000, or \$0.17 per basic share, was significantly higher than the \$909,000, or \$0.04 per share, reported in 2004.

Fiscal Year 2004 Ended December 31, 2004 versus Fiscal Year 2003 Ended December 31, 2003

During the year, we shifted our focus from mineral exploration to petroleum exploration and production. We reported one month of production and sales revenue from one field during the 2004 year.

The net loss of the year was (\$909,735), or (\$0.04) per share, compared to a net loss of (\$173,116), or (\$0.01) per share, in the prior year. The higher loss was due to increased levels of corporate activity as management refocused our operations from mineral exploration to natural gas exploration and production. The Jamison/North Twenty Mile fields were acquired December 1, 2004 and revenue recorded from one month of production totaled \$103,999. Direct Costs related to production totaled (\$42,000), which included Gathering and Transportation of (\$39,000), and Operating Expense of (\$4,000).

Expenses totaled (\$1,013,000) compared to (\$173,000) in fiscal 2003. Large changes in expenses occurred in General & Administration Fees, which rose to (\$951,000) compared to (\$173,000) in the prior year; Depreciation, Depletion and Amortization rose to (\$19,000) from zero in the prior year.

The Corporation does not consider the impact of inflation or foreign currency fluctuations to be material.

Liquidity and Capital Resources

The Corporation's primary source of funds since inception has been through the issuance of its common shares in equity offerings and through the exercise of options and warrants. We have not utilized debt financing or otherwise encumbered any of our assets.

The Corporation's working capital position as of December 31, 2005 was \$18.4 million, including cash and cash equivalents of \$29.5 million. The cash balances represent primarily the net proceeds of the private placements completed in 2005.

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Storm Cat plans to invest \$32.0 million to execute its 2006 drilling and exploration program: \$15.0 million in Elk Valley, British Columbia, \$10.0 million in the Powder River Basin, \$3.0 million in Alaska, \$1.8 million in Saskatchewan, \$1.2 million in Alberta and \$1.0 million in other projects. The Corporation has \$30 million in cash as of December 31, 2005. When adjusting for payments relating to 2005, Storm Cat will have approximately \$20 million plus cash flow from its properties to fund its \$32 million capital budget for 2006.

We expect to fund our 2006 programs through the private placement of common shares and/or the issuance of debt. There can be no assurance that we will be able to obtain the required funds to finance such programs.

The Corporation does not know of any trends, demands, commitments, events or uncertainties that will result in, or that are reasonably likely to result in, the Corporation's liquidity either materially increasing or decreasing at present or in the foreseeable future. Material increases or decreases in the Corporation's liquidity are substantially determined by the cash flow from natural gas production at the Corporation's producing projects, the success or failure of the Corporation's exploration programs, and any future acquisition of new project interests.

As of the following fiscal year ends, the Corporation's deficit and working capital were as follows:

Liquidity Measures	December 31, 2005	December 31, 2004
Deficit	\$ 9.761 million	\$ 1.393 million
Working capital	\$ 18.445 million	\$ 2.257 million

Fiscal Year Ended December 31, 2005

The Corporation's working capital totaled \$18.445 million as of December 31, 2005 compared to \$2.257 million as of December 31, 2004. The increase in cash was due to the issuance of common shares for cash for \$45.652 million.

Operating activities used cash of (\$2.272 million). the net loss for the year of (\$8.368 million) was partially offset by items not involving cash of, depreciation, depletion and amortization of \$1.572 million and a \$2.125 million impairment. changes in non-cash working capital items included an increase in other current assets of (\$360,000), and accounts receivable of (\$1.099 million), other liabilities of \$1.426 million and accounts payable of \$509,000.

Financing activities provided cash of \$44.920 million and consisted of issuance of common shares for cash.

Investing activities used cash of (\$15.733 million), with restricted investments using cash of (\$150,000), capital expenditures - oil and gas properties using cash of (\$14.766 million) and other capital expenditures using cash of (\$817,000). the corporation's cash position as of December 31, 2005 was \$29.502 million, which was an increase of \$26.837 million from the end of fiscal 2004.

During the year, the Corporation issued a total of 33,093,674 (post-split) common shares for proceeds of \$44.920 million, net of share issuance costs of (\$3.043 million). 18,993,826 (post-split) shares were issued in pursuant to private placements for proceeds of \$37.745 million; 646,668 (post-split) shares were issued pursuant to the exercise of stock options for proceeds of \$287,000; 13,453,180 (post-split) shares were issued pursuant to the exercise of stock purchase warrants for proceeds of \$10.661 million.

Of the common share issued by the Corporation in 2005, 2.143 million are subject to Canadian flow-through provisions that provide certain tax benefits to Canadian shareholders. Please refer Note 15 in the Corporation's 2005 Consolidated Financial Statements.

Fiscal Year Ended December 31, 2004

The Corporation's working capital totaled \$2.257 million as of December 31, 2004 compared to \$430,000 as of December 31, 2003. The increase in cash was due to the issuance of common shares for cash, as well and from the disposal of certain of the Corporation's mineral property interests. The Corporation also began natural gas production in December 2004 through the acquisition of the Jamison/North Twenty Mile Fields in Wyoming and recorded one month of cash flow from natural gas sales.

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Operating activities used cash of (\$135,000). The net loss for the year of (\$909,000) was partially offset by items not involving cash of amortization and depletion of \$36,000. Changes in non-cash working capital items included an increase in account receivable of (\$108,000), other current assets of (\$78,000), and other current liabilities of \$599,000 and a decrease in accounts payable of (\$28,000).

Financing activities provided cash of \$5.056 million and consisted entirely of issuance of common shares for cash. investing activities used cash of (\$2.893 million), with restricted investments using cash of (\$26,000), capital expenditures - oil and gas properties using cash of (\$2.777 million) and other capital expenditures using cash of (\$90,000). The Corporation's cash position as of December 31, 2004 was \$2.665 million, which was an increase of \$2.212 million from the end of fiscal 2003.

During the year, the Corporation issued a total of 18,907,384 (post-split) common shares for proceeds of \$5.409 million, net of share issuance costs of (\$276,000); 15,041,000 (post-split) shares were issued in pursuant to private placements for proceeds of \$4.866 million; 93,334 (post-split) shares were issued pursuant to the exercise of stock options for proceeds of \$38,000; 3,684,500 (post-split) shares were issued pursuant to the exercise of stock purchase warrants for proceeds of \$745,000; and 88,550 (post-split) common shares were issued for Finders Fees.

Research and development, patents and licenses, etc.

Not applicable.

Trend Information

The Corporation is presently exploring certain of its properties for sufficient reserves to justify production, while natural gas is being produced from the Jamison/North Twenty Mile and Northeast Spotted Horse Fields in Wyoming. The Corporation's revenue in future periods is expected to vary due to the price of natural gas as well as the amount of natural gas produced as new wells are drilled and begin producing and existing wells decline.

The price we receive for our natural gas production is driven by the fundamentals of the North American gas markets. Over the past two years, prices have remained strong due to continuing supply concerns in North America. We expect to see continuing strong prices in 2006.

Off-Balance Sheet Arrangements

The Corporation has no off-balance sheet arrangements.

Tabular Disclosure of Contractual Arrangements

	less 1 year	1-3 years	3-5 years	more than 5 years	Total
Bank debt					
Other long-term debt					
Office Space leases	223	654	66		943
Gathering Fee Commitments	1,220	2,874	496		4,590
Total contractual obligations	1,443	3,528	562		5,533

The Company has not included asset retirement obligations as discussed in Note 5 of the accompanying financial statements, as the Company cannot determine with accuracy the timing of such payments.

Item 6. Directors, Senior Management and Employees

Directors and Senior Management

As of April 4, 2006, the directors and officers of the Corporation are:

29

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Name and Municipality of Residence	Position with Corporation	Date of Appointment
J. Scott Zimmerman Denver, Colorado	President, Chief Executive Officer and Director	August 9, 2004 (Director) October 19, 2004 (President) June 23, 2005 (Chief Executive Officer)
Paul Wiesner Centennial, Colorado	Secretary-Treasurer and Chief Financial Officer	March 16, 2005 (Chief Financial Officer) June 23, 2005 (Secretary-Treasurer)
Robert J. Clark Denver, Colorado	Director	January 5, 2006
Michael O Byrne Calgary, Alberta	Director	September 30, 2003
Robert Penner Calgary, Alberta	Director	January 4, 2005
Michael J. Wozniak Denver, Colorado	Director	June 23, 2005
Keith Knapstad Littleton, Colorado	Vice-President, Operations (USA)	April 15, 2005
Don Martin Calgary, Alberta	Vice-President, Canada & International Operations	August 18, 2005

All directors have a term of office expiring at the next annual meeting of the Corporation expected to be held in June of 2006. All officers have a term of office lasting until their removal or replacement by the board of directors.

J. Scott Zimmerman serves as President, Chief Executive Officer and a Director of the Corporation. He is a Petroleum Engineer and member of the Society of Petroleum Engineers. He graduated from Texas Tech University with a BS in Petroleum Engineering in 1979. Mr. Zimmerman has spent 20 years specializing in coalbed methane gas exploration and production in the Rocky Mountain Region. He is a former Senior Production & Reservoir Engineer with Amoco Production Corporation and was Vice-President, Energy Sector, for J.M. Huber Corporation. Mr. Zimmerman was employed at J.M. Huber Corporation from June 1982 to January 2002 when he became employed in February 2002 as Vice-President of Operations and Engineering for Evergreen Resources, a developer of coalbed natural gas. Mr. Zimmerman devotes 100% of his time to the Corporation's affairs.

Paul Wiesner is the Chief Financial Officer and Secretary-Treasurer of the Corporation. Mr. Wiesner has over 20 years of experience in financial management, including 13 years in the oil and gas industry for upstream and midstream companies with financial responsibilities ranging from Analyst to Vice-President, Finance. Before joining Storm Cat, he was Chief Financial Officer for NRT Colorado Inc., a corporation with over 150 employees in 20 locations, from April 2002 to March 2005. Mr. Wiesner was a financial analyst at Bear Paw Energy and Crestone Energy Ventures from 2000 to 2002. Prior to 2000, Mr. Wiesner served as CFO for Anchor Bay Corporation, an oil and gas company with assets in the central Rockies. Mr. Wiesner holds a BA in Economics from Claremont McKenna College and an MBA from the MIT Sloan School of Management, and devotes 100% of his time to the Corporation's affairs.

Michael O Byrne serves as a Director of the Corporation. Mr. O Byrne has been involved in the oil and gas business for over 10 years as a Landman, Land Manager and Vice-President, Land. He has been President of OMJ Land Services Ltd. specializing in preparation of joint-venture documentation and other areas of oil and gas administration. He is currently Vice-President, Land for Golden Eagle Energy Ltd. and Chaperon Energy, private oil and gas companies,

and as a Director and Principal of White Max Energy, Ltd., a private oil and gas production company.

Robert Penner serves as a Director of the Corporation. Mr. Penner is a Chartered Accountant and a recently retired senior tax partner with KPMG. Mr. Penner was with KPMG from March 1965 to April 2004. He has over 35 years of public accounting experience, and specialized in advising clients on Canadian and International tax matters, with a particular

30

emphasis on the taxation and financing of oil and gas and natural resource projects. He is a member of the Canadian Institute of Chartered Accountants, Institute of Chartered Accountants of Alberta and Manitoba, Canadian Petroleum Tax Society, and the Canadian Tax Foundation. He currently serves as a director of the following companies: Sustainable Energy Technology Ltd, a manufacturer of energy converters traded on the TSX Venture Exchange; Terra Energy, a Canadian oil and gas production company traded on the TSX Venture Exchange; Corridor Resources Inc., a Canadian TSX Venture listed oil and gas company; Golden Eagle Energy Ltd., an unlisted Canadian oil and gas company.

Michael J. Wozniak is a Director of the Corporation and was a partner in the Environmental, Natural Resources and Energy Group of the international law firm of Dorsey & Whitney LLP from March 2002 until 2005, where he also served as Partner-in-Charge of the Denver office. Mr. Wozniak is a current and founding partner of Beatty & Wozniak LLC, a natural resources law firm located in Denver, Colorado. He received his B.A. degree with distinction from Indiana University in 1976 (Phi Beta Kappa) and his J.D. from the University of Colorado School of Law in 1980. Mr. Wozniak has an active merger, divestiture and acquisition practice, representing buyers and sellers of oil and gas producing properties, midstream assets, gas processing plants and natural gas and oil pipelines throughout the United States. He represents oil and gas clients in regulatory and environmental compliance matters, Public Lands appeals, and natural resources litigation in both state and federal courts. He is licensed to practice law in the states of Colorado and Wyoming, is a member of the Colorado, Wyoming, Southern Ute Tribe and Federal Energy Bar Associations and is a frequent lecturer on natural resources matters.

Robert J. Clark is a Director of the Corporation and is a 38-year veteran of the oil and gas industry. Mr. Clark is President of Bear Cub Energy, LLC, a privately held gas gathering and processing company, which he founded in 2001. In 1995, Mr. Clark formed a predecessor company, Bear Paw Energy LLC, which was sold in early 2001 to Northern Border Partners. Earlier experience included officer positions with Snyder Oil Corporation, Ladd Petroleum Corporation and NICOR, Inc. Mr. Clark received his Bachelor of Science Degree from Bradley University and his M.B.A. from Northern Illinois University. Mr. Clark currently serves on the board of KFX Inc and is a member of the Board of Managers for Bear Cub Energy, LLC and Fluid Compressor Partners LLC. He most recently served on the Board of Directors for Evergreen Resources, Inc. which was sold in late 2004 and Patina Oil and Gas Corporation which was sold in early 2005.

Keith Knapstad is the Vice-President, Operations (USA) and has a strong managerial and operational background, most recently as Manager Powder River Basin Assets for J. M. Huber Corporation from May 2003 to April 2005; a privately held corporation with extensive unconventional resource holdings. Prior to Huber, Mr. Knapstad worked for Marathon Oil Corporation/Pennaco Energy from January 1990 to May 2003 in the Rocky Mountain region managing a multi-disciplined team responsible for engineering and development of various Rocky Mountain producing areas. Mr. Knapstad received a BS in Petroleum Engineering from Montana Tech in 1984.

Don Martin is Vice President, Canada and International Operations, of the Corporation. He has over 25 years exploration and development experience in the western Canadian sedimentary basin. Prior to joining the Corporation, Mr. Martin was with Nytis Exploration Corporation as Vice President Exploitation, a private Canadian based exploration and production company from November 2004 to August 2005. Prior to Nytis, Mr. Martin was employed by Evergreen Natural Resources Canada and its predecessor company Carbon Energy Corporation from January 2001 to October 2004. Mr. Martin rose to the position of Vice President of Canadian Exploration assuming responsibility for all exploration functions as well as the engineering and production operations groups. A professional geologist by trade, Mr. Martin is a member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta, and the Canadian Society of Petroleum Geologists.

Compensation

The following table sets forth all compensation paid and options granted by the Corporation for services rendered during the most recently completed financial year by directors, senior officers, or senior management of the Corporation.

Summary Compensation Table

Name and Position	Year	Annual Compensation			Other Compensation	Stock Options No. of Options Granted(1)	Exercise Price	Expiry Date
		Salary	Bonus					
Chris Dyakowski Former Director, Chief Administrative Officer & Chief Financial Officer(2)	2005	\$	\$	\$ 38,716			N/A	
Scott Zimmerman Director, Chief Executive Officer & President	2005	\$ 143,750	\$ 60,000	\$ 8,000	200,000	C\$ 1.90	April 29, 2010

- (1) Effective March 31, 2005, the issued shares of the Corporation were subdivided on a 1:2 basis. The number of options is on a post-split basis.
- (2) Mr. Dyakowski resigned as Chief Financial Officer of the Corporation on March 16, 2005 and as Chief Administrative Officer on June 23, 2005.
- (3) Mr. Wiesner was appointed Chief Financial Officer of the Corporation on March 16, 2005.

Board Practices**Term of office**

All directors have a term of office expiring at the next annual general meeting, to be scheduled in June 2006, unless re-elected or unless a director's office is earlier vacated in accordance with the Corporation's Articles or the provisions of the *Business Corporations Act* (British Columbia). All officers have a term of office lasting until their removal or replacement by the board of directors.

During the most recently ended financial year, two directors resigned, Ronald K. Husband on January 4, 2005 and Robert Bereskin on April 18, 2005, and two directors were appointed, Craig Steinke on April 18, 2005 and Michael J. Wozniak on June 23, 2005. In April 2006, Craig Steinke resigned from the board of directors.

Service Contracts

Mr. Dyakowski's services were provided to the Corporation under the terms of a contract for services dated May 21, 2004 between the Corporation and Max Investments Inc. pursuant to which Mr. Dyakowski was paid the sum of \$5,000 per month. This contract terminated on June 22, 2005 and Mr. Dyakowski resigned as a director of the Corporation on January 6, 2006 and as an officer of the Corporation on June 23, 2005.

Mr. Steinke's services were provided to the Corporation under the terms of a contract for services dated October 1, 2003 between the Corporation and Reconnaissance Energy International pursuant to which Mr. Steinke was paid varying amounts between \$5,000 and \$10,000 per month.

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

depending on the amount of services provided to the Corporation. This contract terminated on December 31, 2005.

Board Committees

The Board has established three committees, an Audit Committee, a Compensation Committee and a Nominating Committee. The Audit Committee is currently comprised of Michael O Byrne, Robert Penner, and Robert Clark. The Compensation Committee is currently comprised of Michael O Byrne and Michael Wozniak and the Nominating Committee is currently comprised of Michael O Byrne, Robert Clark and Michael Wozniak.

32

Audit Committee

The members of the Audit Committee do not have any fixed terms for holding their positions, are appointed by and may be replaced by the Board of Directors. Audit Committee members do not receive any separate or additional remuneration for acting as members of the committee. It has the responsibility of reviewing with management and the Corporation's independent auditors the annual financial statements and related footnotes, management's discussion and analysis and the annual information form, all for recommending their approval by the Board of Directors. The shareholders of the Corporation recently adopted an Audit Committee Charter that mandates the Audit Committee assists the Board in fulfilling its financial oversight responsibilities. The Audit Committee's primary duties and responsibilities under this mandate are to serve as an independent and objective party to monitor:

1. the quality and integrity of the Corporation's financial statements and other financial information;
2. the compliance of such statements and information with legal and regulatory requirements;
3. the qualifications and independence of the Corporation's independent external auditor (the Auditor); and
4. the performance of the Corporation's internal accounting procedures and Auditor.

The Audit Committee shall be comprised of three or more members. Each member of the Audit Committee must be a member of the Board and must be able to read and understand fundamental financial statements, including the Corporation's balance sheet, income statement, and cash flow statement.

The Audit Committee may form and delegate authority to subcommittees consisting of one or more members when appropriate, including the authority to grant pre-approvals of audit and permitted non-audit services, provided that a decision of such subcommittee to grant a pre-approval shall be presented to the full Audit Committee at its next scheduled meeting.

While the Audit Committee has the responsibilities and powers set forth in this Charter, it is not the duty of the Audit Committee to plan or conduct audits or to determine that the Corporation's financial statements and disclosures are complete and accurate and are in accordance with generally accepted accounting principles and applicable rules and regulations. These are the responsibilities of management and the Auditor.

Compensation Committee

The members of the Compensation Committee do not have any fixed terms for holding their positions, are appointed by and may be replaced by the Board of Directors. Committee members do not receive any separate or additional remuneration for acting as members of the committee. The Compensation Committee is currently comprised of Michael O Byrne and Michael Wozniak. It has the responsibility of discharging the responsibilities of the Board of Directors relating to compensation of the Corporation's officers and directors, to provide general oversight of the Corporation's compensation structure including equity compensation plans and benefits programs and to perform the additional specific duties and responsibilities set out in the Compensation Committee Charter.

The Compensation Committee will consist of at least two members, all of whom will be independent directors of the Corporation, and one of whom will act as chairperson. An independent director is a director who is independent, as determined by the Board, within the definitions prescribed for executive compensation committee members by applicable stock exchange listing standards, and applicable laws or U.S. Securities and Exchange Commission (SEC) rules. Committee members will be appointed, and the Chairperson will be selected from among them, by the Board.

The Compensation Committee will have the authority to retain, at the Corporation's expense, such outside consultants, legal counsel, and other advisors as it determines is appropriate to assist it in the full performance of its functions, including the authority to approve such advisors' fees and other engagement terms.

Nominating Committee

The members of the Nominating Committee do not have any fixed terms for holding their positions, are appointed by and may be replaced by the Board of Directors. Committee members do not receive any separate or additional remuneration for acting as members of the committee. The Nominating Committee is currently comprised of Michael O Byrne, Robert Clark and Michael Wozniak. The Corporation recently adopted a Nominating Committee Charter that requires the following:

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

The Nominating Committee (a) assists the Board, on an annual basis, by identifying individuals qualified to become Board members, and recommends to the Board the director nominees for the next annual meeting of shareholders; (b) assists the Board in the event of any vacancy on the Board by identifying individuals qualified to become Board members, and recommends to the Board qualified individuals to fill any such vacancy; and (c) recommends to the Board, on an annual basis, director nominees for each Board committee.

The Nominating Committee will consist of no fewer than three members, each of whom will be appointed and removed by the Board of Directors. A majority of the members of the Committee will constitute a quorum. Each member of the Committee will be a director of the Corporation and qualify as independent in accordance with the listing standards of the American Stock Exchange.

Employees

As of December 31, 2005, Storm Cat had 15 full-time employees. There are 4 senior officers, 6 employees focusing on geology, engineering and land, and 4 employees in administrative support and accounting. The 15 full-time employees represents a significant increase from the prior years because of the Corporation's increased asset base and activity with developing and operating those assets.

Share Ownership

The following table sets out the share ownership of the directors and officers of the Corporation as of February 28, 2006:

Name and Position	No of Common Shares Owned, Directly or Indirectly	Percentage of Issued and Outstanding Common Shares	
Chris Dyakowski Former Director, Chief Administrative Officer & Chief Financial Officer	485,400	0.732	%
Scott Zimmerman Director, Chief Executive Officer & President	1,061,500	1.6	%
Paul Wiesner Chief Financial Officer & Secretary			
Craig Steinke, Former Director and Chairman of the Board	1,776,048	2.68	%
Michael O Byrne, Director			
Robert Penner, Director			
Michael J. Wozniak, Director	10,000	0.15	%
Keith Knapstad, Vice President-Operations (USA)			
Don Martin Vice President, Canada & International Operations	4,000	0.006	%

(1) Based on 66,337,574 issued and outstanding common shares of the Corporation as of February 28, 2006.

Stock Options

The following table sets forth the number of stock options held by the directors and officers of the Corporation as of March 20, 2006.

Name and Position of Optionee	No. of Options Outstanding	Expiry Date	Exercise Price	
Michael O. Byrne Director	120,000 130,000	November 28, 2008 March 2, 2009	C\$ C\$	0.30 0.50
Craig Steinke Former Director & Chairman	130,000 200,000	March 2, 2009 April 29, 2010	C\$ C\$	0.50 1.90

Robert Clark Director	100,000	January 5, 2011	C\$	3.24

Share Option Plan

The shareholders of the Corporation adopted an Amended and Restated Share Option Plan (the *Plan*) at the extraordinary general meeting held on October 20, 2005 (the *Meeting*). The key amendments to the Plan included the following:

1. the maximum aggregate number of common shares reserved for issuance under the Plan was changed from 10% of the issued and outstanding common shares at the time of the option grant to a fixed maximum number of 7,000,000 common shares including all options that were outstanding when the Plan was adopted; and
2. a cashless exercise provision was added to permit Optionees to exercise their Option and pay the exercise price (and any applicable withholding taxes) of the Option in a number of ways without using their personal funds, at the discretion of the Board of Directors of the Corporation, as follows:
 - a. an Optionee to tender existing common shares in the Corporation;
 - b. the Corporation to withhold an appropriate number of common shares issuable upon exercise of the Option;
 - c. the Corporation to arrange a broker-assisted sale of an appropriate number of common shares; or

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

any combination thereof, in a sufficient number based on the fair market value at the time of tendering, withholding or selling such common shares to satisfy the exercise price and any applicable withholding taxes and commissions, if applicable.

35

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

The Plan provides that the directors of the Corporation may grant options to purchase common shares on terms that the directors may determine, within the limitations of the Plan.

The Plan complies with the requirements of TSX Venture Exchange (TSX-V) Policy 4.4 for Tier 1 issuers. This is a fixed plan as the maximum number of shares reserved for issuance pursuant to the grant of stock options is 7,000,000 common shares. The exercise price of an option issued under the Plan is determined by the directors, but may not be less than the closing market price of the Corporation's shares on the day preceding the date of granting of the option less any available discount, in accordance with the policies of the TSX-V. No option may be granted for a term longer than ten years. An option may expire on such earlier date or dates as may be fixed by the Board, subject to earlier termination in the event the optionee ceases to be eligible under the Plan by reason of death, retirement or otherwise.

The principal features of the Plan are as follows:

1. The maximum number of common shares issuable pursuant to the Plan (including all options that were outstanding when the Plan was adopted) shall not exceed 7,000,000.
2. The maximum number of shares under option to the benefit of one person under the Plan may not exceed 5%, on an annual basis, of the total of the issued and outstanding shares of the Corporation (on a non diluted basis) at the time of grant (in the case of a consultant, as defined by the Exchange's policies, the annual maximum is 2%).
3. In the case where the holder of an option is engaged in investor relations activities (as defined by the Exchange's policies) for the Corporation or one of its subsidiaries, the total number of shares under option may not exceed 2% of the total of the issued and outstanding shares of the Corporation (on a non-diluted basis) at the time of grant.
4. The options granted will have a maximum term of 10 years from the date of grant.
5. The option is non-assignable and non-transferable.
6. If an optionee ceases to be employed by the Corporation or provide services to the Corporation or a subsidiary of the Corporation (other than as a result of being dismissed from employment or service for cause), any option held by such optionee may be exercised within 90 days after the date such optionee ceases to be employed by the Corporation or ceases to provide services to the Corporation, as the case may be.
7. In the event of the death of an optionee, the optionee's heirs or administrators may exercise any portion of the outstanding option up to a period of one year from the date of the optionee's death or the termination date of the option, whichever is earlier.
8. Any common shares subject to an option which for any reason is cancelled or terminated without having been exercised shall again be available for grant under the Plan.
9. The exercise price of an option will be set by the Board of Directors of the Corporation at the time such option is allocated under the Plan and cannot be less than the discounted market price.
10. Vesting of options is at the discretion of the Board of Directors of the Corporation.

Item 7. Major Shareholders and Related Party Transactions

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Major Shareholders

A major shareholder is a shareholder owning directly or indirectly more than 5% of the issued shares of the Corporation.

As of December 31, 2005, to the best of the Corporation's knowledge, only the following hold, directly or indirectly, more than 5% of the issued common shares of the Corporation. To the best of the knowledge of the Corporation, there are no voting arrangements with other shareholders of the Corporation. The Corporation's major shareholders do not have different voting rights from other shareholders.

The information in the table above is based on the Registered Shareholder List maintained by the transfer agent of the Corporation as of December 31, 2005.

36

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Name and Address of Securityholder	Beneficial Owner(s)	Total Number of Securities Held	% of Issued Securities of this Class
Touradji Global Resources Master Fund 101 Park Ave, 47th Floor New York, NY 10178	Unknown	4,651,162	9.80 %

The Corporation is a publicly owned corporation, the majority of the common shares of which are owned by persons resident outside the United States. To the best of the Corporation's knowledge, the Corporation is not directly owned or controlled by another corporation or any foreign government. No arrangements exist, to the knowledge of the Corporation, the operations of which may at a subsequent date result in a change in control of the Corporation.

As of December 31, 2005, the Registered Shareholder List maintained by the transfer agent of the Corporation confirmed that 14,931,776 (or approximately 22.7%) of the 65,654,388 issued and outstanding common shares were held by 43 shareholders with addresses of record in the United States.

Related Party Transactions

During the period December 31, 2005 up to and including the date hereof, no related party transactions occurred other than as described below or otherwise disclosed herein.

Christopher Dyakowski, our former Chief Administrative Officer and a former Director, controls Max Investments, a private investment company that previously provided management services to the Corporation under a management contract. During the year ended December 31, 2005, the Corporation paid Max Investments \$35,000 for management services.

Craig Steinke, our former Chairman, is the owner of a private company, Reconnaissance Energy, which the Corporation paid \$154,366 in 2005 for consulting services.

Carmen Etchart, our former Corporate Secretary, was paid administrative fees of \$39,149 in 2005.

Michael Wozniak, a Director, was previously a partner in the law firm of Dorsey & Whitney LLP for which we paid \$109,436 in 2005 for legal services. We also paid \$61,933 to Beatty and Wozniak PC for legal services. Mr. Wozniak is a current partner at such firm.

Michael J. O Byrne, a director of Storm Cat, is Vice-President of Land and a Principal of the Moose Mountain lessee. In February 2005, the Corporation entered into a Farm-In agreement called Moose Mountain in eastern Saskatchewan. Storm Cat paid C\$750,000 consideration to the lessee upon execution of the Farm-In agreement, and agreed to pay approximately C\$475,000 of the first two years' work commitment and approximately C\$95,000 of technical and geological expenses. Subsequently, the Corporation will pay 45% of the working interest share of costs and will receive a 45% working interest share of production until payout. After payout, the Corporation's interest will convert to a 30% working interest in these lands. Mr. O Byrne abstained from Storm Cat's decision to enter into the farm-in agreement.

2005 Fiscal Year

On February 24, 2005, the Corporation issued by way of private placement a total of 3,200,000 (pre-split) units at a price of \$3.90 (pre-split) per unit, each unit consisting of one common share and one warrant. Each warrant entitling the holder to purchase one additional common share for a term of two years ending on February 24, 2007 at a price of \$5.20 (pre-split) per share. Effective March 31, 2005, the issued shares of the Corporation were subdivided on a 1:2 basis. J. Scott Zimmerman, a director and officer of the Corporation, and Chris Dyakowski, a director and

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

officer of the Corporation at the time, participated in this private placement as to 26,000 and 20,000 units, respectively. Mr. Dyakowski ceased as a director of the Corporation on January 5, 2006 and as an officer on June 23, 2005.

During the year ended December 31, 2005, no related party transactions occurred other than as described above or otherwise disclosed herein.

39

Memorandum and Articles of Association

Incorporation

The Corporation was incorporated under the name Toby Ventures Inc. pursuant to the *Corporation Act* (British Columbia) by registration of its memorandum in British Columbia, Canada, under Certificate of Incorporation #606963 on May 15, 2000. The Corporation changed its name to Storm Cat Energy Corporation on January 30, 2004. The Corporation transitioned under the *Business Corporations Act* (British Columbia) effective May 19, 2004. Effective June 14, 2004, the Corporation amended its Articles to increase its authorized share capital from 20,000,000 common shares without par value to an unlimited number of common shares without par value. The Corporation does not have any stated objects or purposes as such are not required by the corporate laws of the Province of British Columbia. Rather, the Corporation is, by such corporate laws, entitled to carry on any activities whatsoever that are not specifically precluded by other statutory provisions of the Province of British Columbia.

Powers and Functions of the Directors

The powers and functions of the directors are set forth in the Corporation's Articles, the current version of which were adopted on May 21, 2004 and amended on June 23, 2005, and in the *Business Corporations Act* (British Columbia). They provide that:

- (a) a director who is in any way interested in a proposed contract or transaction with the Corporation must disclose the nature and extent of his interest and abstain from voting on the approval of the proposed contract or transaction;
- (b) a director is not deemed to be interested in a proposed contract or transaction merely because it relates to the remuneration of a director in that capacity. The directors may, in the absence of an independent quorum, vote compensation to themselves;
- (c) there are no specific limitations on the exercise by the directors of the Corporation's borrowing powers;
- (d) there are no provisions for the retirement or non-retirement of directors under an age limit; and
- (e) there is no requirement for a director to hold any shares in the Corporation.

Rights and Restrictions Attached to the Shares

As all of the Corporation's authorized and issued shares are of one class of common shares, there are no special rights or restrictions of any nature or kind attached to any of the shares. All authorized and issued shares rank equally in respect to the declaration and receipt of dividends and rights to share in any profits or surplus on liquidation, dissolution or winding-up of the Corporation. Each share has attached to it one non-cumulative vote. Shareholders are not liable to further capital calls by the Corporation.

Alteration of Share Rights

The rights of holders of issued shares of the Corporation may be altered only with the approval of the holders of two-thirds or more of the shares of the Corporation voted at a meeting of the shareholders of the Corporation called and held in accordance with applicable law.

Annual General Meetings

Annual General Meetings are called and scheduled upon decision by the Board of Directors. Pursuant to the *Business Corporations Act* (British Columbia), the Corporation is required to hold an annual meeting in each year, not more than 15 months after the date of the most recent annual meeting. The directors may convene an extraordinary general meeting of the shareholders. The holders of not less than 5% of the issued shares of the Corporation may requisition an extraordinary meeting of the shareholders. All meetings of the shareholders may be attended by registered shareholders or persons who hold powers of attorney or proxies given to them by registered shareholders.

Foreign Ownership Limitations

The Corporation's Articles and charter documents do not contain limitations prohibiting non-residents, foreigners or any other group from holding or voting shares.

Change of Control

There are no provisions in the Corporation's Articles or charter documents that would have the effect of delaying, deferring or preventing a change in the control of the Corporation, or that would operate with respect to any proposed merger, acquisition or corporate restructuring involving the Corporation or any of its subsidiaries.

Share Ownership Reporting Obligations

There are no provisions in the Corporation's Articles requiring share ownership to be disclosed.

Securities legislation in Canada requires that shareholder ownership must be disclosed once a person owns beneficially or has control or direction over greater than 10% of the issued shares of the Corporation. This threshold is higher than the 5% threshold under U.S. securities legislation at which shareholders must report their share ownership.

Material Contracts

The following material contracts have been entered into by the Corporation within the past two years, copies of which may be inspected between the hours of 9:00 am and 4:00 p.m. at the head office of the Corporation located at Suite 2310, 1125 17th Street, Denver, Colorado, 80202. See the section of this Form 20-F entitled Exhibits.

Exchange Controls

There are no governmental laws, decrees or regulations in Canada relating to restrictions on the export or import of capital, or affecting remittance of interest, dividends or other payments to non-resident holders of common shares of the Corporation. Any remittances of dividends to United States residents are, however, subject to a 15% withholding tax (5% if the shareholder is a company owning at least 10% of the outstanding common shares) pursuant to the reciprocal tax treaty between Canada and the United States. See the section of this Form 20-F entitled Taxation.

Except as provided in the *Investment Canada Act* (the ICA), which has provisions which govern the acquisition of a control block of voting shares by a person who is not a Canadian resident (a non-Canadian) of a company carrying on a Canadian business, there are no limitations specific to the rights of non-Canadians to hold or vote the common shares under the laws of Canada or the Province of British Columbia or in the charter documents of the Corporation.

Investment Canada Guidelines - General Summary

The following describes those provisions of the ICA of general concern with respect to an investment in the Corporation by non-Canadians. This general description is followed by a description of the provisions of the ICA specifically concerning acquisitions of oil and gas interests in Canada. This material is only a general guide and does not include all the details found in the ICA. For the application of the ICA to a particular situation, one should consult the specific provisions of the ICA and obtain appropriate legal counsel.

The ICA requires a non-Canadian making an investment which would result in the acquisition of control of the Canadian business to notify the Investment Review Division of Industry Canada, the federal agency created by the ICA. In the case of an acquisition of a Canadian business, the gross value of the assets which exceeds certain threshold levels, or where the business activity is related to Canada's cultural heritage or national identity, an application for review needs to be filed with the Investment Review Division.

The notification procedure involves a brief statement of information about the investment on a prescribed form, which is required to be filed with Investment Canada by the investor at any time up to 30 days following implementation of the investment. It is intended that investments requiring only notification will proceed without government intervention unless the investment is in a specific type of business activity related to Canada's cultural heritage and national identity. Investments by non-Canadians subject to notification under the ICA include an investment to establish a new Canadian business and an investment to acquire control of a Canadian business that is not reviewable pursuant to the ICA.

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

If an investment is reviewable under the ICA, an application for review in the form prescribed is required to be filed with Investment Canada prior to the investment taking place, and the investment may not be implemented until the review has been completed and the Minister responsible for the Investment Canada Act is satisfied the investment is likely to be of net benefit to Canada. If the Minister is not satisfied the investment is likely to be of net benefit to Canada, the non-Canadian must not implement the investment or, if the investment has been implemented, may be required to divest himself of control of the business that is the subject of the investment. The following investments by a non-Canadian are subject to review under the ICA:

1. direct acquisitions of control of Canadian businesses with assets of C\$5 million or more, unless the acquisition is being made by a World Trade Organization (WTO) member country investor (the United States being a member of the WTO);
2. direct acquisitions of control of Canadian businesses with assets of C\$265 million or more by a WTO investor;
3. indirect acquisitions of control of Canadian businesses with assets of C\$5 million or more if such assets represent more than 50% of the total value of the assets of the entities, the control of which are being acquired, unless the acquisition is being made by a WTO investor, in which case there is no review;
4. indirect acquisitions of control of Canadian businesses with assets of C\$50 million or more even if such assets represent less than 50% or the total value of the assets of the entities, the control of which are being acquired, unless the acquisition is being made by a WTO investor, in which case there is no review; and
5. an investment subject to notification that would not otherwise be reviewable if the Canadian business engages in the activity of publication, distribution or sale of books, magazines, periodicals, newspapers, film or video recordings, audio or video music recordings, or music in print or machine-readable form.

An acquisition is direct if it involves the acquisition of control of the Canadian business or of its Canadian parent or grandparent, and an acquisition is indirect if it involves the acquisition of control of a non-Canadian parent or grandparent of an entity carrying on the Canadian business. Control may be acquired through the acquisition of actual voting control by the acquisition of voting shares of a Canadian corporation or through the acquisition of substantially all of the assets of the Canadian business. No change of voting control will be deemed to have occurred if less than one-third of the voting control of a Canadian company is acquired by an investor.

A WTO investor, as defined in the ICA, includes an individual who is a national of a member country of the World Trade Organization or who has the right of permanent residence in relation to that WTO member, a government or government agency of a WTO investor-controlled corporation, limited partnership, trust or joint venture, and a corporation, limited partnership, trust or joint venture that is neither WTO-investor controlled or Canadian controlled of which two-thirds of its board of directors, general partners, or trustees, as the case may be, are any combination of Canadians and WTO investors.

The higher thresholds for WTO investors do not apply if the Canadian business engages in activities in certain sectors such as uranium, financial services, transportation services or communications.

The ICA specifically exempts certain transactions from either notification or review. Included among this category of transactions is the acquisition of voting shares or other voting interests by any person in the ordinary course of that person's business as a trader or dealer in securities.

The Regulations under the ICA specify remedies, offences and punishments applicable. Civil penalties apply for non-compliance with any provision, and criminal penalties may also apply.

Investment Canada Guidelines Oil and Gas Interests

There are special considerations that apply in determining whether various transactions involving the acquisition of interests in oil and gas properties are subject to either notification or review under the ICA.

The ICA governs the control of a business acquired through both the acquisition of voting interests and acquisition of assets. With respect to oil and gas properties, the relationship among the participants in a particular field or well will ordinarily constitute a joint venture, as defined under the ICA. A voting interest, with respect to a joint venture, is defined to mean an ownership interest in the assets thereof that entitles the owner to receive a share of the profits and to share in the

assets on dissolution. The acquisition of a working interest is thus equivalent to the acquisition of a voting interest in a joint venture. The acquisition of less than a majority (50% or less) of the voting interests of a joint venture is deemed not to be an acquisition of control under the ICA. Therefore, if the interest being acquired, combined with any existing interest owned by the investor in the property, does not exceed 50%, there is no acquisition of control and the transaction is not subject to the ICA. However, if the minority interests being acquired represent all or substantially all of the oil and gas business of the vendor, there will be an acquisition of control of the vendor's business.

The acquisition of minority working interests may also be subject to the ICA where there is an acquisition of a controlling interest in a corporation which holds the minority working interests. Depending on the facts however, it may be possible to view such an acquisition as in essence the acquisition of minority voting interests in a joint venture or ventures (rather than as the acquisition of shares in a corporation), in which case the transaction would not be subject to the ICA.

A royalty interest is neither a voting interest nor an asset used in carrying on the Canadian business. The same is true for a net profit interest. Therefore, the acquisition of a royalty or net profit interest will not ordinarily be treated as the acquisition of control of a business.

Each property or well governed by a separate operating agreement is treated as a separate business. Therefore, if the investor is acquiring a package of interests in separate properties, and there is no acquisition of a majority working interest in at least one of those properties, there will be no acquisition of control of any business, notwithstanding the value of the investment.

Each set of properties subject to a unitization or pooling agreement is treated as one Canadian business. Therefore, where an investor is acquiring working interests in one or more properties that are the subject of a unitization or pooling agreement, he may acquire a majority interest in that or those properties without being subject to the ICA, so long as his overall holdings will not constitute a majority of the interests in the unit or pool.

If an investor determines that he is acquiring control of one or more oil and gas businesses, he must then determine which filing procedure applies under the ICA—notification or application for review. This depends not simply on the value of the interest being acquired but on the overall asset value of the property or properties of which control is being acquired.

The ICA thresholds for review for a direct acquisition of control of a Canadian business are set out above. Regulations under the ICA state that where control of an entity is acquired, the value of the assets shall be the value of all assets of the entity, as shown on the audited financial statements of the entity for its most recent fiscal year (i.e. book value). With respect to the acquisition of a controlling interest in an oil and gas property or unit, the entity is the joint venture between the participants on the property or unit. Financial statements are not ordinarily prepared in relation to the activities of the joint venture. Therefore, to determine the asset value of the joint venture, it is necessary to aggregate the value of the individual interests in the joint venture.

Where the investor encounters problems in aggregating the individual interests, the ICA permits the investor to complete his notification or application for review by giving reasons for his inability to provide any required information. Where control of more than one entity is acquired as part of the same investment, the investor must aggregate the value of all assets of all entities of which control is acquired to determine if the investment is reviewable. Therefore, if a number of controlling interests in different oil and gas businesses are being acquired as part of the same transaction, the investor must aggregate the values of the joint ventures in respect of all those businesses to determine which filing procedure, notification or application for review applies.

Taxation

Canadian Federal Income Tax Consequences

The following summary discusses only the material Canadian federal income tax consequences generally applicable to a holder of common shares of the Corporation who is a resident of the United States and who is not a resident of Canada and who holds the common shares as capital property (a non-resident holder). Accordingly, shareholders and prospective investors should consult their own tax advisors for advice regarding their individual tax consequences. This summary is based upon the current provisions of the Income Tax Act (Canada) (the ITA), the regulations thereunder (the Regulations), the current publicly announced administrative and assessing policies of Canada Revenue Agency, and all specific proposals (the Tax Proposals) to amend the ITA and Regulations announced by the Minister of Finance (Canada) prior to March 27, 2006. This summary assumes that the Tax Proposals will be enacted in their form as of the date of this Annual Report.

Dividends

Under the ITA, dividends paid or deemed to have been paid by a company resident in Canada to a non-resident holder will generally be subject to withholding tax at a rate of 25%. The Canada-U.S. Income Tax Convention (1980) as amended by the Protocols signed on June 14, 1983, March 28, 1984, March 17, 1995 and July 29, 1997 (the Treaty), provides that the normal 25% withholding tax rate under the ITA is reduced to 15% on dividends paid on shares of a company resident in Canada to beneficial owners of the dividends who are residents of the United States, and also provides for a further reduction of this rate to 5% where the beneficial owner of the dividends is also a company that is a resident of the United States which owns at least 10% of the voting shares of the company paying the dividend. However, if the U.S. resident shareholder is an LLC, the withholding rate is 25%.

Disposition of Common Shares

Under the ITA, a taxpayer's capital gain or capital loss from a disposition of a share is the amount, if any, by which the proceeds of disposition exceed (or are exceeded by) the aggregate of the adjusted cost base of the share and reasonable expenses of disposition. Currently, the ITA specifies that one-half of a capital gain (the taxable capital gain) is included in income, and one-half of a capital loss in a year (the allowable capital loss) is deductible from taxable capital gains realized in the same year. The amount by which a shareholder's allowable capital loss exceeds the shareholder's taxable capital gains in a year may be deducted from a taxable capital gain realized by the shareholder in the three previous or any subsequent year, subject to certain restrictions in the case of a corporate shareholder and subject to adjustment when the capital gains inclusion rate in the year of disposition differs from the inclusion rate in the year the deduction is claimed.

A non-resident holder is not subject to tax under the ITA in respect of a capital gain realized upon the disposition of a share unless the share represents taxable Canadian property to the holder thereof. Generally, a common share of a Canadian resident corporation listed on a prescribed stock exchange, including both the TSX Venture Exchange and the American Stock Exchange, such as a common share of the Corporation, will not constitute taxable Canadian property to the non-resident holder unless the non-resident holder held the common share as capital property used in carrying on a business (other than an insurance business) in Canada, or unless the non-resident holder or persons with whom the non-resident holder did not deal at arm's length alone or together held or held options to acquire, at any time within the five years preceding the disposition, 25% or more of the shares of any class of the capital shares of the Corporation.

Where a non-resident holder is an individual who has ceased to be resident in Canada, and at the time such holder ceased to be a Canadian resident elected to have the common shares treated as taxable Canadian property, the holder will be subject to Canadian tax on any capital gain realized on disposition of the common shares, subject to the relieving provisions of the Treaty described below. The common shares may also be taxable Canadian property to a non-resident holder if the non-resident holder acquired them pursuant to certain rollover transactions. This would include transactions under Sections 85 and 87 of the ITA, which apply to share for share and amalgamation transactions.

Where a U.S. resident holder realizes a capital gain on a disposition of common shares of the Corporation that constitute taxable Canadian property, the Treaty exempts the non-resident holder from liability for Canadian tax in certain circumstances. Notwithstanding the potential exemption from Canadian tax provided under the Treaty, where a non-resident holder disposes of shares that are taxable Canadian property, the non-resident holder is required to file a Canadian income tax return in respect of such dispositions. If the U.S. resident shareholder is an LLC, this potential exemption does not apply.

ALL SHAREHOLDER AND PROSPECTIVE INVESTORS ARE URGED TO CONSULT THEIR OWN TAX ADVISORS WITH RESPECT TO THE SPECIFIC TAX CONSEQUENCES OF PURCHASING COMMON SHARES OF THE CORPORATION.

Dividends and Paying Agents

Storm Cat is filing this Form 20-F as an annual report and therefore, this item is not required.

Storm Cat is filing this Form 20-F as an annual report and therefore, this item is not required.

Documents on Display

The material contracts listed herein may be inspected between the hours of 9:00am and 4:00p.m. at the head office of the Corporation located at Suite 2310, 1125 17th Street, Denver, Colorado, 80202.

Subsidiary Information

The Corporation has the following wholly owned private company subsidiaries:

Name and Head Office Address	Jurisdiction of Incorporation or Organization	Nature of Business
Storm Cat Energy (USA) Corporation Suite 2310, 1125 17th Street Denver, CO 80202 United States	United States	Oil and Gas Drilling and Exploration and holding entity for US Investments
Storm Cat Energy Mongol Co. Ltd. Prime Minister Amars Street 2 Sukhbaatar District Ulaanbaatar Mongolia	Mongolia	Operating entity for Corporation's assets in Mongolia
Storm Cat Energy USA Operating Corporation Suite 2310 1125 17th Street Denver, CO 80202 United States	United States	Operating entity for Corporation's assets in US
Triple Crown Gathering Corporation Suite 3210 1125 17th Street Denver, CO 80202 United States	United States	Well head gathering and transportation
Storm Cat Energy (Powder River) LLC Suite 2310 1125 17th Street Denver, CO 80202 United States	United States	Oil and Gas Drilling and Exploration
Storm Cat Energy (Alaska) LLC Suite 2310 1125 17th Street Denver, CO 80202 United States	United States	Oil and Gas Drilling and Exploration

Item 11. Quantitative and Qualitative Disclosures About Market Risk

Currency Exchange Rate Sensitivity

The results of the Corporation's operations are subject to currency translation risk and currency transaction risk. Regarding currency translation risk, the operating results and financial position of the Corporation and Corporation's subsidiaries are reported in US dollars in the Corporation's consolidated financial statements. The Corporation incurs certain costs in US dollars. The fluctuation of the US dollar in relation to the Canadian dollar will therefore have an impact upon the

45

profitability of the Corporation and may also affect the value of the Corporation's assets and the amount of shareholders' equity.

In regards to transaction risk, the Corporation's functional currency is the US dollar and its activities are predominantly executed using the US dollar. To date, the Corporation has completed its equity financings in both US and Canadian dollars. The Corporation has not entered into any agreements or purchased any instruments to hedge any possible currency risks at this time due to the small amount of exposure.

Interest Rate Sensitivity

The Corporation currently has no short term or long term debt requiring interest payments. As a result, the Corporation has not entered into any agreement or purchased any instrument to hedge against possible interest rate risks at this time.

Commodity Price Sensitivity

The future revenue and profitability of the Corporation will be dependent, to a significant extent, upon prevailing spot market prices for oil and gas. In the past oil and gas prices have been volatile. Prices are subject to wide fluctuations in response to changes in supply of and demand for oil and gas, market uncertainty and a variety of additional factors that are beyond the control of the Corporation. The Corporation has forward sold a portion of its gas production through October 2006. Please refer to Item 10.

Item 12. Description of Securities Other Than Equity Securities

Edgar Filing: Storm Cat Energy CORP - Form 20-F/A

Storm Cat is filing this Form 20-F as an annual report and therefore, this item is not required.

Part II

Item 13. Defaults, Dividend Arrearages and Delinquencies.

The Corporation has not had any material default, dividend arrearage or delinquency.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds.

On March 31, 2005, the Corporation completed a two-for-one forward share split.

On June 23, 2005, the Corporation's shareholders approved a resolution to increase the maximum aggregate number of shares that may be reserved for issuance under the Corporation's Amended and Restated Option Share Plan dated April 15, 2005 (the Plan), from 3,525,866 common shares to 10% of the issued and outstanding shares at the time of the option grant. In addition, on June 23, 2005, the Corporation's shareholders approved a resolution to completely accelerate the vesting of all then-unvested options, except for those options granted to consultants conducting investor relations activities, as defined in the Plan.

On October 10, 2005, the Corporation's shareholders approved a resolution providing advance approval for issuance, by private placement, of the Corporation's common shares equal to or exceeding 20% of the Corporation's issued and outstanding share capital at any time during a twelve month period beginning on October 20, 2005. In addition, on October 20, 2005, the Corporation's shareholders approved a resolution decrease the maximum aggregate number of common shares reserved for issuance under the Plan to 7,000,000 shares and provide a cashless exercise feature for optionees under the Plan.

Pursuant to Rule 463 under the Securities Act of 1933, as amended, Use of Proceeds is not required under Item 14.

Item 15. Controls and Procedures.

Disclosure Controls and Procedures.

The Corporation maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed by the Corporation in the reports that the Corporation files or submits to the Securities and Exchange

Commission under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified by the Commission's rules and forms, and that information is accumulated and communicated to the Corporation's management, including the Corporation's principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. The Corporation's management evaluated, with the participation of the Corporation's principal executive and principal financial officers, the effectiveness of the Corporation's disclosure controls and procedures as of the fiscal year ended December 31, 2005. Based upon this evaluation, the Corporation's principal executive and principal financial officers concluded that, as of December 31, 2005, the Corporation's disclosure controls and procedures were effective.

Item 16. [Reserved]

Not Applicable.

Item 16A. Audit Committee Financial Expert.

The Corporation's Board of Directors has determined that Robert Penner is the audit committee financial expert. The Board of Directors has also determined that Robert Penner is independent under the listing standards of the American Stock Exchange.

Item 16B. Code of Ethics.

The Corporation has adopted a code of ethics that applies to the Corporation's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. A copy of the Corporation's code of ethics is attached hereto as Exhibit 11 hereto.

Item 16C. Principal Accountant Fees and Services.

Hein & Associates LLP, an independent registered public accounting firm, audited the Corporation's financial statement for the year ended December 31, 2005. Amisano Hanson, Chartered Accountants, an independent registered public accounting firm, audited the Corporation's financial statements for the year ended December 31, 2004. The Audit Committee pre-approves all audit and non-audit services provided by the Corporation's auditors.

The Corporation paid its auditors the following fees for services in the years ended December 31, 2005 and December 31, 2004:

	Fiscal Year 2005	Fiscal Year 2004
Audit Fees(1)	\$ 85,000	\$ 38,450
Audit Related Fees(2)	2,971	
Tax Fees(3)	1,395	

(1) These figures include the aggregate fees billed for services rendered by the Corporation's auditors for the audit of our annual financial statements included in our Form 20-F and the review of the financial statements included in certain of our reports furnished on Form 6-K.

(2) These figures include the aggregate fees, if any, billed for services rendered by the Corporation's auditors for assurance and related services that are reasonably related to the performance of the audit or review of our financial statements, which were not included under the caption, Audit Fees, above.

(3) These figures include the aggregate fees, if any, billed for services rendered by the Corporation's auditors for tax compliance, tax advice, and tax planning.

Item 16D. Exemptions from the Listing Standards for Audit Committees.

The Corporation is not operating under an exemption from the listing standards for audit committees.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

There were no purchases of the Corporation's equity securities made by or on behalf of the Corporation or any affiliated purchaser during the fiscal year ended December 31, 2005.

Item 17. Financial Statements

See attached Schedule of Financial Statements.

Item 18. Financial Statements

Not applicable.

Item 19. Exhibits.

Exhibit

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors

Storm Cat Energy Corporation

Denver, Colorado

We have audited the consolidated balance sheet of Storm Cat Energy Corporation and subsidiaries (the Company) as of December 31, 2005, and the related consolidated statements of operations, stockholders' equity and comprehensive loss, and cash flows for the year ended December 31, 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company and subsidiaries as of December 31, 2005, and the results of their operations and their cash flows for the year ended December 31, 2005, in conformity with U.S. generally accepted accounting principles.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders,
Storm Cat Energy Corporation

We have audited the consolidated balance sheet of Storm Cat Energy Corporation and subsidiaries as of December 31, 2004 and the consolidated statements of operations, stockholders' equity and comprehensive loss, and cash flows for the years ended December 31, 2004 and 2003. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Storm Cat Energy Corporation and subsidiaries as at December 31, 2004 and the results of their operations and their cash flows for the years ended December 31, 2004 and 2003, in accordance with U.S. generally accepted accounting principles.
