FIRST BUSEY CORPORATION and Subsidiaries

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1: Basis of Presentation

The accompanying unaudited consolidated interim financial statements of First Busey Corporation (First Busey or the Company), a Nevada corporation, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC) for Quarterly Reports on Form 10-Q and do not include certain information and footnote disclosures required by U.S. generally accepted accounting principles (GAAP) for complete annual financial statements. Accordingly, these financial statements should be read in conjunction with the Company s Annual Report on Form 10-K for the year ended December 31, 2014.

On May 20, 2015, at the Company s Annual Meeting of Stockholders, the Company s stockholders approved a resolution to authorize the board of directors to implement a reverse stock split of the Company s common stock at a ratio of one-for-three (the Reverse Stock Split). On August 17, 2015, the board of directors authorized the Reverse Stock Split, which became effective on September 8, 2015. All share and per share information has been restated for all prior periods presented in this Quarterly Report on Form 10-Q to give retroactive effect to the Reverse Stock Split.

The accompanying Consolidated Balance Sheet as of December 31, 2014, which has been derived from audited financial statements, and the unaudited consolidated interim financial statements have been prepared in accordance with GAAP and reflect all adjustments that are, in the opinion of management, necessary for the fair presentation of the financial position and results of operations as of the dates and for the periods presented. All such adjustments are of a normal recurring nature. The results of operations for the three and nine months ended September 30, 2015 are not necessarily indicative of the results that may be expected for the year ending December 31, 2015.

The consolidated financial statements include the accounts of the Company and its subsidiaries. All material intercompany transactions and balances have been eliminated in consolidation. Certain prior-year amounts have been reclassified to conform to the current presentation with no effect on net income or stockholders equity.

In preparing the accompanying consolidated financial statements, the Company s management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from those estimates. Material estimates which are particularly susceptible to significant change in the near term relate to the fair value of investment securities, the determination of the allowance for loan losses, and the valuation allowance on the deferred tax asset.

The Company has evaluated subsequent events for potential recognition and/or disclosure through the date the consolidated financial statements included in this Quarterly Report on Form 10-Q were issued. There were no significant subsequent events for the quarter ended September 30, 2015 through the issuance date of these consolidated financial statements that warranted adjustment to or disclosure in the consolidated financial statements.

Note 2: Acquisitions

On January 8, 2015, First Busey acquired Herget Financial Corp. (Herget Financial), headquartered in Pekin, Illinois and its wholly owned bank subsidiary, Herget Bank, National Association (Herget Bank). First Busey operated Herget Bank as a separate banking subsidiary from January 9, 2015 until March 13, 2015, when it was merged with and into Busey Bank, the Company s wholly owned bank subsidiary. At that time, Herget Bank s three branches in Pekin, Illinois became branches of Busey Bank. The operating results of Herget Financial are included with the Company s results of operations since the date of acquisition.

The acquisition of Herget Financial allowed First Busey to further increase its presence in the Pekin and greater Peoria market. Additionally, Herget Financial held a dominant deposit market position in its community and offered trust, estate and asset management services, as well as competitive commercial loan and mortgage offerings, all of which complement First Busey s offerings. First Busey acquired 100% of Herget Financial s outstanding common stock for aggregate cash consideration of \$34.1 million, which was funded through internal sources. Each holder of Herget Financial common stock received \$588.00 per share in cash.

Expenses related to the acquisition of Herget Financial for the three months ended September 30, 2015 were insignificant. During the nine months ended September 30, 2015, expenses related to the acquisition of Herget Financial totaled \$1.0 million. Additionally, during 2014, First Busey incurred \$0.4 million of acquisition expenses related to this transaction. The expenses were comprised primarily of system conversion, restructuring, legal, consulting, regulatory and marketing costs, all of which are reported as a component of other expense in the accompanying unaudited consolidated interim financial statements.

This transaction was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed, and consideration exchanged were recorded at estimated fair values on the date of acquisition. Fair values are subject to refinement for up to one year after the closing date of January 8, 2015 as additional information regarding the closing date fair values becomes available; however, the Company does not expect any adjustments will be necessary.

The following table provides an assessment of Herget Financial s assets purchased and liabilities assumed (dollars in thousands):

Cash and due from banks	\$ 46,214
Securities	111,760
Loans held for sale	1,933
Loans	105,207
Premises and equipment	2,034
Goodwill	4,824
Other intangible assets	3,937
Other assets	2,931
Deposits	241,901
Other liabilities	2,839

The loans acquired in this transaction were recorded at fair value with no carryover of any existing allowance for loan losses. Loans that were not deemed to be credit impaired at acquisition were accounted for under Financial Accounting Standards Board (FASB) ASC 310-20, *Receivables-Nonrefundable Fees and Other Costs* and were subsequently considered as part of the Company's determination for the adequacy of the allowance for loan losses. Purchased credit-impaired (PCI) loans, loans with evidence of credit quality deterioration, were accounted for under FASB ASC 310-30, *Receivables Loans and Debt Securities Acquired with Deteriorated Credit Quality*. The fair value of the acquired performing loans totaled \$103.7 million and the fair value of the PCI loans totaled \$1.5 million. The other intangible assets acquired in this transaction will be amortized using an accelerated method over 10 years.

Note 3: Recent Accounting Pronouncements

Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers (Topic 606). ASU 2014-09 outlines a single model for companies to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. ASU 2014-09 will require that companies recognize revenue based on the value of transferred goods or services as they occur in the contract and will also require additional disclosures. The new authoritative guidance was originally effective for reporting periods after December 15, 2016. In August 2015, ASU 2015-14, Revenue from Contracts with Customers (Topic 606) was issued to delay the effective date of ASU 2014-09 by one year. The Company is evaluating the impact this guidance will have on its consolidated financial statements and related disclosures.

ASU 2015-16, Simplifying the Accounting for Measurement-Period Adjustments (Topic 805): Business Combinations. ASU 2015-16 replaces the requirement that an acquirer in a business combination account for measurement period adjustments retrospectively with a requirement that an acquirer recognize adjustments to the provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. ASU 2015-16 is effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. The guidance is to be applied prospectively to adjustments to provisional amounts that occur after the effective date of the guidance, with earlier application permitted for financial statements that have not been issued. The guidance is not expected to have a significant impact on the Company s financial statements.

Note 4: Securities

Securities are classified as held to maturity when First Busey has the ability and management has the intent to hold those securities to maturity. Accordingly, they are stated at cost, adjusted for amortization of premiums and accretion of discounts. Securities are classified as available for sale when First Busey may decide to sell those securities due to changes in market interest rates, liquidity needs, changes in yields on alternative investments, and for other reasons. They are carried at fair value with unrealized gains and losses, net of taxes, reported in other comprehensive income.

The amortized cost, unrealized gains and losses and fair values of securities classified as available for sale and held to maturity are summarized as follows:

1	Amortized Cost		Gains	-	Losses		Fair Value
\$	65,062	\$	701	\$		\$	65,763
	149,620		813				150,433

The amortized cost and fair value of debt securities available for sale and held to maturity as of September 30, 2015, by contractual maturity, are shown below. Mutual funds and other equity securities do not have stated maturity dates and therefore are not included in the following maturity summary. Mortgages underlying the residential mortgage-backed securities may be called or prepaid without penalties; therefore, actual maturities could differ from the contractual maturities. All residential mortgage-backed securities were issued by U.S. government agencies and corporations.

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and whether the Company has the intent to sell the security and it is more-likely-than-not it will have to sell the security before recovery of its cost basis.

The total number of securities in the investment portfolio in an unrealized loss position as of September 30, 2015 was 87, and represented a loss of 0.6% of the aggregate carrying value. Based upon a review of unrealized loss circumstances, the unrealized losses resulted from changes in market interest rates and liquidity, not from changes in the probability of receiving the contractual cash flows. The Company does not intend to sell the securities and it is more-likely-than-not that the Company will recover the amortized cost prior to being required to sell the securities. Full collection of the amounts due according to the contractual terms of the securities is expected; therefore, the Company does not consider these investments to be other-than-temporarily impaired at September 30, 2015.

The Company had available for sale obligations of state and political subdivisions with a fair value of \$192.6 million and \$220.2 million as of September 30, 2015 and December 31, 2014, respectively. In addition, the Company had held to maturity obligations of state and political subdivisions with a fair value of \$49.2 million and \$1.4 million at September 30, 2015 and December 31, 2014, respectively.

As of September 30, 2015, the fair value of the Company s obligations of state and political subdivisions portfolio was comprised of \$206.2 million of general obligation bonds and \$35.6 million of revenue bonds issued by 292 issuers, primarily consisting of states, counties, cities, towns, villages and school districts. The Company held investments in general obligation bonds in 30 states (including the District of Columbia), including seven states in which the aggregate fair value exceeded \$5.0 million. The Company held investments in revenue bonds in 17 states, including two states where the aggregate fair value exceeded \$5.0 million.

As of December 31, 2014, the Company s obligations of state and political subdivisions portfolio was composed of \$183.7 million of general obligation bonds and \$37.9 million of revenue bonds issued by 220 issuers, primarily consisting of states, counties, cities, towns, villages and school districts. The Company held investments in general obligation bonds in 23 states (including the District of Columbia), including seven states in which the aggregate fair value exceeded \$5.0 million. The Company held investments in revenue bonds in 15 states, including two states where the aggregate fair value exceeded \$5.0 million.

The amortized cost and fair values of the Company s portfolio of general obligation bonds are summarized in the following tables by the issuers state:

September 30, 2015:

U.S. State	Number of Issuers	Issuers Cost		rs in tho	Fair Value usands)	А	verage Exposure Per Issuer (Fair Value)
Illinois	88	\$	71,965	\$	73,122	\$	831
Wisconsin	38		32,955		33,304		876
Michigan	39		29,111		29,600		759

Texas	18		12,179		12,279		682
Iowa	3		5,551		5,617		1,872
Other	49		27,775		28,362		579
Total general obligations bonds	255	\$	203,346	\$	206,247	\$	809

December 31, 2014:

U.S. State	Number of Issuers	Amortized Cost (dolla	ars in the	Fair Value ousands)	А	verage Exposure Per Issuer (Fair Value)
Illinois	63	\$ 59,979	\$	61,058	\$	969
Wisconsin	39	36,165		36,365		932
Michigan	33	30,400		30,739		931
Pennsylvania	10	12,756		12,761		1,276
Ohio	8	9,954		9,922		1,240
Texas	7	7,364		7,313		1,045
Iowa	3	6,116		6,142		2,047
Other	24	18,862		19,370		807
Total general obligations bonds	187	\$ 181,596	\$	183,670	\$	982

The general obligation bonds are diversified across many issuers, with \$3.4 million being the largest exposure to a single issuer at September 30, 2015 and December 31, 2014. Accordingly, as of September 30, 2015 and December 31, 2014, the Company did not hold general obligation bonds of any single issuer, the aggregate book or market value of which exceeded 10% of the Company s stockholders equity. Of the general obligation bonds in the Company s portfolio, 97.5% had been rated by at least one nationally recognized statistical rating organization and 2.5% were unrated, based on the fair value as of September 30, 2015. Of the general obligation bonds in the Company s portfolio, 97.1% had been rated by at least one nationally recognized statistical rating organization and 2.9% were unrated, based on the fair value as of December 31, 2014.

The amortized cost and fair values of the Company s portfolio of revenue bonds are summarized in the following tables by the issuers state:

September 30, 2015:

U.S. State	Number of Issuers	P	Amortized Cost (dolla	rs in tho	Fair Value usands)	A	Average Exposure Per Issuer (Fair Value)
Illinois	7	\$	8,908	\$	8,925	\$	1,275
Indiana	9		10,194		10,255		1,139
Other	21		16,315		16,408		781
Total revenue bonds	37	\$	35,417	\$	35,588	\$	962

December 31, 2014:

U.S. State	Number of Issuers	Amortized Cost		Fair Value	Average Exposure Per Issuer (Fair Value)		
		(dolla	rs in tho	usands)			
Illinois	4	\$ 6,772	\$	6,708	\$	1,677	
Indiana	8	12,520		12,469		1,559	

Other	21	18,721	18,685	890
Total revenue bonds	33	\$ 38,013	\$ 37,862	\$ 1,147

The revenue bonds are diversified across many issuers and revenue sources with \$3.0 million being the largest exposure to a single issuer at each of September 30, 2015 and December 31, 2014. Accordingly, as of September 30, 2015 and December 31, 2014, the Company did not hold revenue bonds of any single issuer, the aggregate book or market value of which exceeded 10% of the Company s stockholders equity. All of the revenue bonds in the Company s portfolio had been rated by at least one nationally recognized statistical rating organization as of September 30, 2015 and December 31, 2014. Some of the primary types of revenue bonds owned in the Company s portfolio include: primary education or government building lease rentals secured by ad valorem taxes, utility systems secured by utility system net revenues, housing authorities secured by mortgage loans or principal receipts on mortgage loans, secondary education secured by student fees/tuitions, and pooled issuances (i.e. bond bank) consisting of multiple underlying municipal obligors.

Substantially all of the Company s obligations of state and political subdivision securities are owned by Busey Bank, whose investment policy requires that state and political subdivision securities purchased be investment grade. Busey Bank s investment policy also limits the amount of rated state and political subdivision securities to an aggregate 100% of the Bank s Total Risk Based Capital at the time of purchase and an aggregate 15% of Total Risk Based Capital for unrated state and political subdivision securities issued by municipalities having taxing authority or located in counties/micropolitan statistical areas/metropolitan statistical areas in which an office of Busey Bank is located. The investment policy states fixed income investments that are not Office of the Comptroller of the Currency Type 1 securities (U.S. Treasuries, agencies, municipal government general obligation and, for well-capitalized institutions, most municipal revenue bonds) should be analyzed prior to acquisition to determine that (1) the security has low risk of default by the obligor, and (2) the full and timely repayment of principal and interest is expected over the expected life of the investment. All securities in Busey Bank s obligations of state and political subdivision securities portfolio are subject to ongoing review. Factors that may be considered as part of ongoing monitoring of state and political subdivision securities include credit rating changes by nationally recognized statistical rating organizations, market valuations, third-party municipal credit analysis, which may include indicative information regarding the issuer s capacity to pay, market and economic data and such other factors as are available and relevant to the security or the issuer such as its budgetary position and sources, strength and stability of taxes and/or other revenue.

As of September 30, 2015, the Company s regular monitoring of its obligations of state and political subdivisions portfolio had not uncovered any facts or circumstances resulting in significantly different credit ratings than those assigned by a nationally recognized statistical rating organization.

(1) Loans held for sale are included in retail real estate.

Net deferred loan origination costs included in the tables above were \$0.8 million as of September 30, 2015 and \$0.6 million as of December 31, 2014. Gross loans increased to \$2.58 billion at September 30, 2015 from \$2.41 billion at December 31, 2014 as a result of organic growth and the addition of loans obtained as part of the Herget Financial acquisition.

The Company believes that making sound loans is a necessary and desirable means of employing funds available for investment. Recognizing the Company s obligations to its stockholders, depositors, and to the communities it serves, authorized personnel are expected to seek to develop and make sound, profitable loans that resources permit and that opportunity affords. The Company maintains lending policies and procedures designed to focus lending efforts on the types, locations and duration of loans most appropriate for its business model and markets. While not specifically limited, the Company attempts to focus its lending on short to intermediate-term (0-7 years) loans in geographies within 125 miles of its lending offices. The Company attempts to utilize government-assisted lending programs, such as the Small Business Administration and United States Department of Agriculture lending programs, when prudent. Generally, loans are collateralized by assets, primarily real estate, of the borrowers and guaranteed by individuals. The loans are expected to be repaid primarily from cash flows of the borrowers, or from proceeds from the sale of selected assets of the borrowers.

Management reviews and approves the Company s lending policies and procedures on a routine basis. Management routinely (at least quarterly) reviews the Company s allowance for loan losses and reports related to loan production, loan quality, concentrations of credit, loan delinquencies and non-performing and potential problem loans. The Company s underwriting standards are designed to encourage relationship banking rather than transactional banking. Relationship banking implies a primary banking relationship with the borrower that includes, at a minimum, an active deposit banking relationship in addition to the lending relationship. The integrity and character of the borrower are significant factors in the Company s loan underwriting. As a part of underwriting, tangible positive or negative evidence of the borrower s integrity and character are sought out. Additional significant underwriting factors beyond location, duration, a sound and profitable cash flow basis and the borrower s character are the quality of the borrower s financial history, the liquidity of the underlying collateral and the reliability of the valuation of the underlying collateral.

Total borrowing relationships, including direct and indirect debt, are generally limited to \$20 million, which is significantly less than the Company s regulatory lending limit. Borrowing relationships exceeding \$20 million are reviewed by the Company s board of directors at least annually and more frequently by management. At no time is a borrower s total borrowing relationship permitted to exceed the Company s regulatory lending limit. Loans to related parties, including executive officers and directors of the Company and its subsidiaries, are reviewed for compliance with regulatory guidelines by the Company s board of directors at least annually.

The Company maintains an independent loan review department that reviews the loans for compliance with the Company s loan policy on a periodic basis. In addition, the loan review department reviews the risk assessments made by the Company s credit department, lenders and loan committees. Results of these reviews are presented to management and the audit committee at least quarterly.

The Company s lending can be summarized into five primary areas: commercial loans, commercial real estate loans, real estate construction loans, retail real estate loans, and other retail loans. A description of each of the lending areas can be found in the Company s Annual Report on Form 10-K for the year ended December 31, 2014. The significant majority of the lending activity occurs in the Company s Illinois and Indiana markets, with the remainder in the Florida market. Due to the small scale of the Indiana loan portfolio and its geographical proximity to the Illinois portfolio, the Company believes that quantitative or qualitative segregation between Illinois and Indiana is not materially important or warranted.

The Company utilizes a loan grading scale to assign a risk grade to all of its loans. Loans are graded on a scale of 1 through 10 with grades 2, 4 & 5 unused. A description of the general characteristics of the grades is as follows:

• *Grades 1, 3, 6-* These grades include loans which are all considered strong credits, with grade 1 being investment or near investment grade. A grade 3 loan is comprised of borrowers that exhibit credit fundamentals that exceed industry standards and loan policy guidelines. A grade 6 loan is comprised of borrowers that exhibit acceptable credit fundamentals.

• *Grade* 7- This grade includes loans on management s Watch List and is intended to be utilized on a temporary basis for a pass grade borrower where a significant risk-modifying action is anticipated in the near future.

• *Grade 8-* This grade is for Other Assets Specially Mentioned loans that have potential weaknesses which may, if not checked or corrected, weaken the asset or inadequately protect the Company s credit position at some future date.

• *Grade 9-* This grade includes Substandard loans, in accordance with regulatory guidelines, for which the accrual of interest has not been stopped. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

• *Grade 10-* This grade includes Doubtful loans that have all the characteristics of a Substandard loan with additional factors that make collection in full highly questionable and improbable. Such loans are placed on non-accrual status and may be dependent on collateral having a value that is difficult to determine.

All loans are graded at the inception of the loan. Most commercial lending relationships that are \$1.0 million or less are processed through an expedited underwriting process. If the credit receives a pass grade it is aggregated into a homogenous pool of either: \$0.35 million or less or \$0.35 million to \$1.0 million. These pools are monitored on a quarterly basis for the first year, semiannually in the second year and annually thereafter. Homogenous pool credits which are subsequently downgraded to a grading of 7 or worse are subject to the same portfolio review as loans over \$1.0 million. All commercial loans greater than \$1.0 million receive a portfolio review at least annually. Commercial loans greater than \$1.0 million that have a grading of 8 or worse receive a portfolio review on a quarterly basis. Interim grade reviews may take place if circumstances of the borrower warrant a more timely review.

Loans in the highest grades, represented by grades 1, 3, 6 and 7, totaled \$2.42 billion at September 30, 2015, compared to \$2.28 billion at December 31, 2014. Loans in the lowest grades, represented by grades 8, 9 and 10, totaled \$151.2 million at September 30, 2015, compared to \$124.0 million at December 31, 2014.

The following table presents weighted average risk grades segregated by category of loans (excluding held for sale, loan accretion, non-posted and clearings) and geography:

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on non-accrual status when, in management s opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. When interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income is subsequently recognized only to the extent cash payments are received in excess of the principal due. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

An age analysis of past due loans still accruing and non-accrual loans is as follows:

A loan is impaired when, based on current information and events, it is probable the Company will be unable to collect scheduled principal and interest payments when due according to the terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower s prior payment record, and the amount of the shortfall in relation to the principal and interest owed. The following loans are assessed for impairment by the Company: loans 60 days or more past due over \$0.25 million, loans graded 8 over \$0.35 million and loans graded 9 or 10.

Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of the expected future cash flows discounted at the loan s effective interest rate, the loan s observable market price, or the fair value of the collateral if the loan is collateral dependent. PCI loans are considered impaired. Large groups of smaller balance homogenous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and residential loans for impairment disclosures unless such loans are the subject of a restructuring agreement.

The gross interest income that would have been recorded in the three and nine months ended September 30, 2015 if impaired loans had been current in accordance with their original terms was \$0.1 million and \$0.3 million, respectively. The amount of interest collected on those loans and recognized on a cash basis that was included in interest income was insignificant for the three and nine months ended September 30, 2015.

The Company s loan portfolio includes certain loans that have been modified in a troubled debt restructuring (TDR), where concessions have been granted to borrowers who have experienced financial difficulties. The Company will restructure loans for its customers who appear to be able to meet the terms of their loan over the long term, but who may be unable to meet the terms of the loan in the near term due to individual circumstances.

The Company considers the customer s past performance, previous and current credit history, the individual circumstances surrounding the current difficulties and the customer s plan to meet the terms of the loan in the future prior to restructuring the terms of the loan. Generally, all five primary areas of lending are restructured through short-term interest rate relief, short-term principal payment relief, short-term principal and interest payment relief or forbearance (debt forgiveness). Once a restructured loan has gone 90+ days past due or is placed on non-accrual status, it is included in the non-performing loan totals. A summary of restructured loans as of September 30, 2015 and December 31, 2014 is as follows:

	Septer	mber 30, 2015 (dollars in th	ember 31, 2014
Restructured loans:			
In compliance with modified terms	\$	8,784	\$ 11,866
30 89 days past due		61	
Included in non-performing loans		1,340	1,126
Total	\$	10,185	\$ 12,992

All TDRs are considered to be impaired for purposes of assessing the adequacy of the allowance for loan losses and for financial reporting purposes. When the Company modifies a loan in a TDR, it evaluates any possible impairment similar to other impaired loans based on present value of the expected future cash flows discounted at the loan s effective interest rate, the loan s observable market price, or the fair value of the collateral if the loan is collateral dependent. If the Company determines that the value of the TDR is less than the recorded investment in the loan, impairment is recognized through an allowance estimate in the period of the modification and in periods subsequent to the modification.

Performing loans classified as TDRs during the three months ended September 30, 2015 included one commercial modification in Illinois/Indiana for short-term principal payment relief, with a recorded investment of \$0.2 million. Performing loans classified as TDRs during the nine months ended September 30, 2015 included one commercial modification in Illinois/Indiana for short-term principal payment relief, with a recorded investment of \$0.2 million, one retail real estate modification in Illinois/Indiana for short-term interest rate relief, with a recorded investment of \$0.1 million, two retail real estate modifications in Illinois/Indiana for short-term principal payment relief, with a recorded investment of \$0.1 million and two retail real estate modifications in Florida for short-term principal payment relief, with a recorded investment of \$0.1 million and two retail real estate modifications in Florida for short-term principal payment relief, with a recorded investment of \$0.3 million.

There were no performing loans classified as TDRs during the three months ended September 30, 2014. Performing loans classified as TDRs during the nine months ended September 30, 2014 were insignificant.

The gross interest income that would have been recorded in the three and nine months ended September 30, 2015 and 2014 if performing TDRs had been operating in accordance with their original terms instead of modified terms was insignificant.

There were no TDRs that were entered into during the last twelve months that subsequently were classified as non-performing and had payment defaults (a default occurs when a loan is 90 days or more past due or transferred to non-accrual) during the three months ended September 30, 2015. TDRs that were entered into during the last twelve months that subsequently were classified as non-performing and had payment defaults during the nine months ended September 30, 2015 consisted of one Illinois/Indiana commercial real estate modification totaling \$0.4 million and one Florida commercial modification totaling \$0.6 million.

There were no TDRs that were entered into during the prior twelve months that subsequently were classified as non-performing and had payment defaults during the three and nine months ended September 30, 2014.

The following tables provide details of impaired loans, segregated by category and geography. The unpaid contractual principal balance represents the recorded balance prior to any partial charge-offs. The recorded investment represents customer balances net of any partial charge-offs recognized on the loan. The average recorded investment is calculated using the most recent four quarters.

Management s opinion as to the ultimate collectability of loans is subject to estimates regarding future cash flows from operations and the value of property, real and personal, pledged as collateral. These estimates are affected by changing economic conditions and the economic prospects of borrowers.

Allowance for Loan Losses

The allowance for loan losses represents an estimate of the amount of losses believed inherent in the Company s loan portfolio at the balance sheet date. The allowance for loan losses is evaluated geographically, by class of loans. The allowance calculation involves a high degree of estimation that management attempts to mitigate through the use of objective historical data where available. Loan losses are charged against the allowance for loan losses when management believes the uncollectibility of the loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. Overall, the Company believes the allowance methodology is consistent with prior periods and the balance was adequate to cover the estimated losses in the Company s loan portfolio at September 30, 2015 and December 31, 2014.

The general portion of the Company s allowance contains two components: (i) a component for historical loss ratios, and (ii) a component for adversely graded loans. The historical loss ratio component is an annualized loss rate calculated using a sum-of-years digits weighted 20-quarter historical average.

The Company s component for adversely graded loans attempts to quantify the additional risk of loss inherent in the grade 8 and grade 9 portfolios. The grade 9 portfolio has an additional allocation placed on those loans determined by a one-year charge-off percentage for the respective loan type/geography. The minimum additional reserve on a grade 9 loan was 3.00% as of September 30, 2015 and December 31, 2014, which is an estimate of the additional loss inherent in these loan grades based upon a review of overall historical charge-offs. As of September 30, 2015, the Company believed this minimum reserve remained adequate.

Grade 8 loans have an additional allocation placed on them determined by the trend difference of the respective loan type/geography s rolling 12and 20-quarter historical loss trends. If the rolling 12-quarter average is higher (more current information) than the rolling 20-quarter average, the Company adds the additional amount to the allocation. The minimum additional amount for grade 8 loans was 1.00% as of September 30, 2015 and December 31, 2014, based upon a review of the differences between the rolling 12- and 20-quarter historical loss averages by region. As of September 30, 2015, the Company believed this minimum additional amount remained adequate.

The specific portion of the Company s allowance relates to loans that are impaired, which includes non-performing loans, TDRs and other loans determined to be impaired. The impaired loans are subtracted from the general loans and are allocated specific reserves as discussed above.

Impaired loans are reported at the fair value of the underlying collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Collateral values are estimated using a combination of observable inputs, including recent appraisals discounted for collateral specific changes and current market conditions, and unobservable inputs based on customized discounting criteria.

The general quantitative allocation based upon historical charge off rates is adjusted for qualitative factors based on current general economic conditions and other qualitative risk factors both internal and external to the Company. In general, such valuation allowances are determined by evaluating, among other things: (i) Management & Staff; (ii) Loan Underwriting, Policy and Procedures; (iii) Internal/External Audit & Loan Review; (iv) Valuation of Underlying Collateral; (v) Macro and Local Economic Factor; (vi) Impact of Competition, Legal & Regulatory Issues; (vii) Nature and Volume of Loan Portfolio; (viii) Concentrations of Credit; (ix) Net Charge-Off Trend; and (x) Non-Accrual, Past Due and Classified Trend. Management evaluates the degree of risk that each one of these components has on the quality of the loan portfolio on a quarterly basis. Based on each component s risk factor, a qualitative adjustment to the reserve may be applied to the appropriate loan categories.

During the third quarter of 2015, the Company did not make adjustments to any qualitative factors. The Company will continue to monitor its qualitative factors on a quarterly basis.

The following table details activity on the allowance for loan losses. Allocation of a portion of the allowance to one category does not preclude its availability to absorb losses in other categories.

Note 6: OREO

OREO represents properties acquired through foreclosure or other proceedings in settlement of loans. OREO is held for sale and is recorded at the date of foreclosure at the fair value of the properties less estimated costs of disposal, which establishes a new cost basis. Any adjustment to fair value at the time of transfer to OREO is charged to the allowance for loan losses. Property is evaluated regularly to ensure the recorded amount is supported by its current fair value, and valuation allowances to reduce the carrying amount to fair value less estimated costs to dispose are recorded as necessary. Revenue, expense, gains and losses from the operations of foreclosed assets are included in operations. At September 30, 2015, the Company held \$0.1 million in residential OREO and an insignificant amount of other repossessed assets. At December 31, 2014, the Company held \$0.2 million of other repossessed assets. At September 30, 2015 the Company had \$1.2 million of residential real estate in the process of foreclosure. The following table summarizes activity related to OREO:

	e Months Ended otember 30, 2015 (dollars in t	Year Ended cember 31, 2014

Note 7: Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase, which are classified as secured borrowings, generally mature either daily or within one year from the transaction date. Securities sold under agreements to repurchase are reflected at the amount of cash received in connection with the transaction. The underlying securities are held by the Company s safekeeping agent. The Company may be required to provide additional collateral based on the fair value of the underlying securities. The following table sets forth the distribution of securities sold under agreements to repurchase and weighted average interest rates:

	Sept	ember 30, 2015		ecember 31, 2014			
	(dollars in thousands)						
Balance at end of period	\$	176,961	\$	198,893			
Weighted average interest rate at end of period		0.11%		0.14%			
Maximum outstanding at any month end in year-to-date period	\$	191,531	\$	198,893			
Average daily balance for the year-to-date period	\$	177,937	\$	148,452			
Weighted average interest rate during period (1)		0.10%		0.12%			

(1)The weighted average interest rate is computed by dividing total annualized interest for the year-to-date period by the average daily balance outstanding.

Note 8: Earnings Per Common Share

Earnings per common share, adjusted to reflect the Reverse Stock Split, have been computed as follows:

Three Months Ended September 30,				Nine Months Ended September 30,			
	2015		2014		2015		2014
(in thousands, excep					hare data)		
\$	10,444	\$	8,927	\$	27,778	\$	24,636

Basic earnings per share are computed by dividing net income available to common stockholders for the period by the weighted average number of common shares outstanding, which include deferred stock units that are vested but not delivered.

Diluted earnings per common share is computed using the treasury stock method and reflects the potential dilution that could occur if the Company s outstanding stock options were exercised and restricted stock units were vested. Stock options and restricted stock units for which the exercise or the grant price exceeds the average market price over the period have an anti-dilutive effect and are excluded from the calculation. At September 30, 2015, 86,568 outstanding options, 191,278 warrants, and 112,433 restricted stock units were anti-dilutive and excluded from the calculation of common stock equivalents. At September 30, 2014, 152,543 outstanding options, 191,278 warrants, and 117,992 restricted stock units were anti-dilutive and excluded from the calculation of common stock equivalents.

Note 9: Share-based Compensation

The Company grants share-based compensation awards to its employees and members of its board of directors as provided for under the Company s 2010 Equity Incentive Plan. The Company currently grants share-based compensation in the form of restricted stock units (RSUs) and deferred stock units (DSUs). The Company grants RSUs to members of management periodically throughout the year. Each RSU is equivalent to one share of the Company s common stock. These units have a requisite service period ranging from one to five years. The Company annually grants share-based awards in the form of DSUs, which are RSUs with a deferred settlement date, to its board of directors. Each DSU is equivalent to one share of the Company s common stock. The DSUs vest over a twelve-month period following the grant date or on the date of the next Annual Meeting of Stockholders, whichever is earlier. These units generally are subject to the same terms as RSUs under the Company s 2010 Equity Incentive Plan, except that, following vesting, settlement occurs within 30 days following the earlier of separation from the board or a change in control of the Company. Subsequent to vesting and prior to delivery, these units will continue to earn dividend equivalents. The Company also has outstanding stock options granted prior to 2011.

Under the terms of the Company s 2010 Equity Incentive Plan, the Company is allowed, but not required, to source stock option exercises and grants of RSUs and DSUs from its inventory of treasury stock. As of September 30, 2015, the Company held 735,025 shares in treasury. On February 3, 2015, First Busey announced that its board of directors approved a repurchase plan under which the Company is authorized to repurchase up to an aggregate of 666,667 shares of its common stock. The repurchase plan has no expiration date and replaced the prior repurchase plan that was originally approved in 2008. During the third quarter of 2015, the Company purchased 333,333 shares under this repurchase plan. Repurchases were executed in contemplation of maintaining levels of treasury stock appropriate to satisfy compensation awards, in addition to favorable pricing opportunities that were broadly manifest in the market for bank stocks during the third quarter of 2015. At September 30, 2015 the Company had 333,334 shares that may yet be purchased under the plan.

A description of the 2010 Equity Incentive Plan can be found in the Company s Proxy Statement for the 2015 Annual Meeting of Stockholders. The Company s 2010 Equity Incentive Plan is designed to encourage ownership of its common stock by its employees and directors, to provide additional incentive for them to promote the success of its business, and to attract and retain talented personnel. All of the Company s employees and directors, and those of its subsidiaries, are eligible to receive awards under the plan.

A summary of the status of and changes in the Company s stock option awards for the nine months ended September 30, 2015 follows:

	Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term
Outstanding at beginning of year	170,026	\$ 48.99	
Granted			
Exercised			
Forfeited	517	58.23	
Expired	47,941	57.27	
Outstanding at end of period	121,568	\$ 45.68	1.59
Exercisable at end of period	121,568	\$ 45.68	1.59

The Company did not record any stock option compensation expense for the three and nine months ended September 30, 2015 or 2014.

	Restricted Stock Units	Director Deferred Stock Units	Total	Weighted- Average Grant Date Fair Value
Non-vested at beginning of year	394,624	18,581	413,205	\$ 15.75
Granted	108,945	17,899	126,844	20.07
Dividend Equivalents Earned	9,656	1,319	10,975	18.76
Vested	(73,777)	(13,236)	(87,013)	14.96
Forfeited	(17,951)		(17,951)	16.21
Non-vested at end of period	421,497	24,563	446,060	\$ 17.19
Outstanding at end of period	421,497	67,903	489,400	\$ 17.08

A summary of the changes in the Company s stock unit awards for the nine months ended September 30, 2015, is as follows:

All recipients earn quarterly dividend equivalents on their respective units. These dividend equivalents are not paid out during the vesting period, but instead entitle the recipients to additional units. Therefore, dividends earned each quarter compound based upon the updated unit balances. Upon vesting/delivery, shares are expected (though not required) to be issued from treasury.

On June 25, 2015, under the terms of the 2010 Equity Incentive Plan, the Company granted 108,945 RSUs to members of management. As the stock price on the grant date of June 25, 2015 was \$20.07, total compensation cost to be recognized is \$2.2 million. This cost will be recognized over a period of five years. Subsequent to the requisite service period, the awards will vest 100%.

In addition, on June 25, 2015, under the terms of the 2010 Equity Incentive Plan, the Company granted 12,667 DSUs to directors. As the stock price on the grant date of June 25, 2015 was \$20.07, total compensation cost to be recognized is \$0.3 million. This cost will be recognized over the requisite service period of one year from the date of grant or the next Annual Meeting of Stockholders; whichever is earlier. The Company also granted 5,232 DSUs to the Chairman of the Board. As the stock price on the grant date of June 25, 2015 was \$20.07, total compensation cost to be recognized is \$0.1 million. This cost will be recognized over a period of five years. Subsequent to the requisite service period, the awards will vest 100%.

The Company recognized \$0.4 million and \$0.3 million of compensation expense related to non-vested stock units for the three months ended September 30, 2015 and 2014, respectively. The Company recognized \$1.0 million and \$0.8 million of compensation expense related to non-vested stock units for the nine months ended September 30, 2015 and 2014, respectively. As of September 30, 2015, there was \$4.8 million of total unrecognized compensation cost related to these non-vested stock units. This cost is expected to be recognized over a period of 3.7 years.

Note 10: Income Taxes

At September 30, 2015, the Company was under examination by the Florida Department of Revenue for the Company s 2011, 2012 and 2013 Florida income tax filings. This examination is expected to be finalized in the fourth quarter of 2015 with no adjustments or additional tax payment.

Note 11: Outstanding Commitments and Contingent Liabilities

Legal Matters

The Company is a party to legal actions which arise in the normal course of its business activities. In the opinion of management, the ultimate resolution of these matters is not expected to have a material effect on the financial position or the results of operations of the Company.

Credit Commitments and Contingencies

The Company is a party to credit-related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Consolidated Balance Sheets.

The Company s exposure to credit loss is represented by the contractual amount of those commitments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments. A summary of the contractual amount of the Company s exposure to off-balance-sheet risk relating to the Company s commitments to extend credit and standby letters of credit follows:

	Sept	September 30, 2015		ember 31, 2014		
	(dollars in thousands)					
Financial instruments whose contract amounts represent credit risk:						
Commitments to extend credit	\$	586,369	\$	561,439		
Standby letters of credit		15,736		20,466		

Commitments to extend credit are agreements to lend to a customer as long as no condition established in the contract has been violated. These commitments are generally at variable interest rates and generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for equity lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company upon extension of credit, is based on management s credit evaluation of the customer.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer s obligation to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including bond financing and similar transactions and primarily have terms of one year or less. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company holds collateral, which may include accounts receivable, inventory, property and equipment, and income producing properties, supporting those commitments if deemed necessary. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Company would be required to fund the commitment. The maximum potential amount of future payments the Company would be required to make is represented by the contractual amount shown in the summary above. If the commitment is funded, the Company would be entitled to seek recovery from the customer. As of September 30, 2015 and December 31, 2014, no amounts were recorded as liabilities for the Company s potential obligations under these guarantees.

Note 12: Capital

The ability of the Company to pay cash dividends to its stockholders and to service its debt historically was dependent on the receipt of cash dividends from its subsidiaries. However, Busey Bank sustained significant losses during 2008 and 2009 resulting in pressure on its capital, which was relieved through injections of capital from the Company. Under applicable regulatory requirements, an Illinois state-chartered bank such as Busey Bank may not pay dividends in excess of its net profits. Because Busey Bank has been in a retained earnings deficit position since 2009, it has not been able to pay dividends since that time.

With prior approval from its regulators, however, an Illinois state-chartered bank in this situation may be able to reduce its capital stock, by amending its charter to decrease the authorized number of shares, and then make a subsequent distribution to its holding company. Using this approach, and with the approval of its regulators, Busey Bank distributed \$50.0 million to the Company on January 22, 2013, and distributed \$60.0 million to the Company on October 22, 2014. The Company will continue to evaluate the appropriateness of future capital distributions.

The Company and Busey Bank are subject to regulatory capital requirements administered by federal and state banking agencies that involve the quantitative measure of their assets, liabilities, and certain off-balance-sheet items, as calculated under regulatory accounting practices. Quantitative measures established by regulations to ensure capital adequacy require the Company and Busey Bank to maintain minimum amounts and ratios (set forth in the table below) of total, Tier 1 capital and Common Equity Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined in the regulations), and, for the Bank, Tier 1 capital (as defined in the regulations) to average assets (as defined in the regulations). Failure to meet minimum capital requirements may cause regulatory bodies to initiate certain discretionary and/or mandatory actions that, if undertaken, may have a direct material effect on our financial statements. The Company, as a financial holding company, is required to be well capitalized in the capital categories shown in the table below. As of September 30, 2015, the Company and Busey Bank met all capital adequacy requirements to which they were subject, including the guidelines to be considered well capitalized.

	Actual			Minimum Capital Requirement			Minimum To Be Well Capitalized		
	Amount	Ratio		Amount (dollars in thousa	Ratio ands)		Amount	Ratio	
As of September 30, 2015:

Busey Bank	\$ 407,037	10.59%	\$	154,322	4.00%	\$	192,903	5.00%	

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) into law, which required the Board of Governors of the Federal Reserve System to establish minimum capital levels for bank holding companies on a consolidated basis that are as stringent as those required for insured depository institutions. The components of Tier 1 capital were restricted to capital instruments that at the time of signing were considered to be Tier 1 capital for insured depository institutions. As a result, the proceeds of trust preferred securities are excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by bank holding companies with less than \$15.0 billion of assets. As the Company has assets of less than \$15.0 billion, it is able to maintain its trust preferred proceeds as Tier 1 capital but it will have to comply with new capital mandates in other respects, and it will not be able to raise Tier 1 capital through the issuance of trust preferred securities in the future.

In July 2013, the U.S. federal banking authorities approved the implementation of the Basel III regulatory capital reforms and issued rules effecting certain changes required by the Dodd-Frank Act (the Basel III Rules). The Basel III Rules are applicable to all U.S. banks that are subject to minimum capital requirements, as well as to bank and savings and loan holding companies other than small bank holding companies (generally non-public bank holding companies with consolidated assets of less than \$1 billion). The Basel III Rules not only increased most of the required minimum regulatory capital ratios, but they also introduced a new Common Equity Tier 1 Capital ratio and the concept of a capital conservation buffer. The Basel III Rules also expanded the definition of capital as in effect currently by establishing criteria that instruments must meet to be considered Additional Tier 1 Capital (Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that generally qualified as Tier 1 Capital no longer qualify, or their qualifications changed, as the Basel III Rules are being fully implemented.

The Basel III Rules also permitted banking organizations with less than \$15.0 billion in assets to retain, through a one-time election, the past treatment for accumulated other comprehensive income, which did not affect regulatory capital. First Busey and the Bank made this election in the first quarter of 2015 to avoid variations in the level of their capital depending on fluctuations in the fair value of their securities portfolio. The Basel III Rules maintained the general structure of the prompt corrective action framework, while incorporating increased requirements. The prompt corrective action guidelines were also revised to add the Common Equity Tier 1 Capital ratio. In order to be a well-capitalized depository institution under the new Basel III Rules, a bank and holding company must maintain a Common Equity Tier 1 Capital ratio of 6.5% or more; a Tier 1 Capital ratio of 8% or more; a Total Capital ratio of 10% or more; and a leverage ratio of 5% or more. Financial institutions became subject to the new Basel III Rules on January 1, 2015, with phase-in periods for many of the changes. As of September 30, 2015, the Company and the Bank were in compliance with the current phase Basel III Rules and management believes that the Company and the Bank would meet all capital adequacy requirements under the Basel III Rules on a fully phased-in basis as if such requirements had been in effect.

Note 13: Reportable Segments and Related Information

The Company has three reportable segments, Busey Bank, FirsTech and Busey Wealth Management. Busey Bank provides a full range of banking services to individual and corporate customers through its branch network in downstate Illinois, through its branch in Indianapolis, Indiana, and through its branch network in southwest Florida. FirsTech provides remittance processing for online bill payments, lockbox and walk-in payments. Busey Wealth Management is the parent company of Busey Trust Company, which provides a full range of asset management, investment and fiduciary services to individuals, businesses and foundations, tax preparation and philanthropic advisory services.

The Company s three reportable segments are strategic business units that are separately managed, as they offer different products and services and have different marketing strategies. The other category consists of the Parent Company and the elimination of intercompany transactions.

The segment financial information provided below has been derived from the internal accounting system used by management to monitor and manage the financial performance of the Company. The accounting policies of the three segments are the same as those described in the summary of significant accounting policies in the Company s Annual Report on Form 10-K for the year ended December 31, 2014.

Following is a summary of selected financial information for the Company s business segments (dollars in thousands):

Note 14: Fair Value Measurements

The fair value of an asset or liability is the price that would be received by selling that asset or paid in transferring that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. In estimating fair value, the Company utilizes valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Such valuation techniques are consistently applied. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. FASB ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect the Company s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to those Company assets and liabilities that are carried at fair value.

Cash and due from banks were transferred to level 1 during the second quarter of 2015 as the carrying amount approximates fair value. There were no additional transfers between levels during the quarter ended September 30, 2015.

In general, fair value is based upon quoted market prices, when available. If such quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar securities for which significant assumptions are derived primarily from or corroborated by observable data. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect, among other things, counterparty credit quality and the company s creditworthiness as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company s valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company s valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates and, therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein.

Securities Available for Sale. Securities classified as available for sale are reported at fair value utilizing level 1 and level 2 measurements. For mutual funds and other equity securities, unadjusted quoted prices in active markets for identical assets are utilized to determine fair value at the measurement date and have been classified as level 1 in the ASC 820 fair value hierarchy. For all other securities, the Company obtains fair value measurements from an independent pricing service. The independent pricing service evaluations are based on market data. The independent pricing service utilizes evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information. Because many fixed income securities do not trade on a daily basis, the independent pricing service applies available information as appropriate through processes such as benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing, to prepare evaluations. In addition, the independent pricing service uses model processes, such as the Option Adjusted Spread model, to assess interest rate impact and develop prepayment scenarios. The models and processes take into account market conventions. For each asset class, a team of evaluators gathers information from market sources and integrates relevant credit information, perceived market movements and sector news into the evaluated pricing applications and models.

The market inputs that the independent pricing service normally seeks for evaluations of securities, listed in approximate order of priority, include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data including market research publications. The independent pricing service also monitors market indicators, industry and economic events. Information of this nature is a trigger to acquire further market data. For certain security types, additional inputs may be used or some of the market inputs may not be applicable. Evaluators may prioritize inputs differently on any given day for any security based on market conditions, and not all inputs listed are available for use in the evaluation process for each security evaluation on a given day. Because the data utilized was observable, the securities have been classified as level 2 in the ASC 820 fair value hierarchy.

Derivative Assets and Derivative Liabilities. Derivative assets and derivative liabilities are reported at fair value utilizing level 2 measurements. Derivative instruments with positive fair values are reported as an asset and derivative instruments with negative fair value are reported as liabilities. The fair value of derivative assets and liabilities is determined based on prices obtained from a third party. Values of derivative assets and liabilities are primarily based on observable inputs and are classified as level 2 in the ASC 820 fair value hierarchy.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of September 30, 2015 and December 31, 2014, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs	Level 2 Inputs (dollars in	thousa	Level 3 Inputs nds)	Total Fair Value
September 30, 2015					
Securities available for sale					
U.S. Treasury securities	\$	\$ 65,763	\$		\$ 65,763

Corporate debt securities			79,307				79,307
Mutual funds and other equity securities		6,345					6,345
Derivative assets							
Foreign currency forward contracts			15				15

Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

Impaired Loans. The Company does not record loans at fair value on a recurring basis. However, periodically, a loan is considered impaired and is reported at the fair value of the underlying collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Impaired loans measured at fair value typically consist of loans on non-accrual status and restructured loans in compliance with modified terms. Collateral values are estimated using a combination of observable inputs, including recent appraisals, and unobservable inputs based on customized discounting criteria. Due to the significance of the unobservable inputs, all impaired loan fair values have been classified as level 3 in the ASC 820 fair value hierarchy.

OREO. Non-financial assets and non-financial liabilities measured at fair value include OREO (upon initial recognition or subsequent impairment). OREO properties are measured using a combination of observable inputs, including recent appraisals, and unobservable inputs based on customized discounting criteria. Due to the significance of the unobservable inputs, all OREO fair values have been classified as level 3 in the ASC 820 fair value hierarchy.

The following table summarizes assets and liabilities measured at fair value on a non-recurring basis as of September 30, 2015 and December 31, 2014, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

Level 1 Inputs	Level 2 Inputs (d	Inp		Fa	Total air Value
\$	\$	\$	953	\$	953
\$	\$	\$	2,129	\$	2,129
		Inputs Inputs (d	Inputs Inputs Inp (dollars in thousands)	InputsInputsInputs\$\$\$\$\$\$\$\$	Inputs Inputs (dollars in thousands) Factor \$ \$ \$ 953

The following table presents additional quantitative information about assets measured at fair value on a non-recurring basis for which the Company has utilized level 3 inputs to determine fair value:

	E	Quan ir Value stimate in thousands)	titative Information about La Valuation Techniques	evel 3 Fair Value Measuremen Unobservable Input	ts Range (Weighted Average)
<u>September 30, 2015</u>					
Impaired loans	\$	953	Appraisal of collateral	Appraisal adjustments	-5.2% to -100.0% (-59.0)%
OREO(1)			Appraisal of collateral	Appraisal adjustments	-100.0% (-100.0)%

The fair value of loans, net reflects general changes in the interest rate curve used to calculate fair values based on cash flows.

FASB ASC Topic 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. A detailed description of the valuation methodologies used in estimating the fair value of financial instruments is set forth in the Company s Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS

OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management s discussion and analysis of the financial condition of First Busey Corporation and its subsidiaries (referred to herein as First Busey, Company, we, or our) at September 30, 2015 (unaudited), as compared with June 30, 2015 (unaudited), December 31, 2014 and September 30, 2014 (unaudited), and the results of operations for the three and nine months ended September 30, 2015 and 2014 (unaudited), and the three months ended June 30, 2015 (unaudited) when applicable. Management s discussion and analysis should be read in conjunction with the Company s consolidated financial statements and notes thereto appearing elsewhere in this Quarterly Report, as well as the Company s Annual Report on Form 10-K for the year ended December 31, 2014.

EXECUTIVE SUMMARY

Operating Results

First Busey Corporation s net income for the third quarter of 2015 was \$10.6 million and net income available to common stockholders was \$10.4 million, or \$0.36 per fully diluted common share. The Company reported net income of \$9.9 million and net income available to common stockholders of \$9.8 million, or \$0.33 per fully-diluted common share, for the second quarter of 2015 and net income of \$9.1 million and net income available to common share of \$0.31 per fully-diluted common share for the third quarter of 2014.

The Company s year-to-date net income through September 30, 2015 was \$28.3 million and net income available to common stockholders was \$27.8 million, or \$0.95 per fully-diluted common share, compared to net income of \$25.2 million and net income available to common stockholders of \$24.6 million, or \$0.85 per fully-diluted common share, for the comparable period of 2014. On January 8, 2015, the Company completed its acquisition of Herget Financial, which impacted year-to-date net income by \$1.0 million in one-time expenses, occurring primarily in the first quarter of 2015. Further, the Company undertook initiatives to refine its branch network and restructure various internal teams during the first quarter of 2015, resulting in \$0.7 million of fixed asset impairments and \$0.3 million in other corporate restructuring costs.

On May 20, 2015, at the Company s Annual Meeting of Stockholders, the Company s stockholders approved a resolution to authorize the board of directors to implement a Reverse Stock Split of the Company s common stock. On August 17, 2015, the board of directors authorized the Reverse Stock Split, which became effective on September 8, 2015. With the number of our outstanding shares now more closely conforming to those of peer organizations, the Reverse Stock Split allows our stockholders, potential investors and our other stakeholders to more easily evaluate our financial results comparatively to other financial institutions, particularly with regard to earnings per share and other share-based capital metrics. All share and per share information has been restated for all prior periods presented in this Quarterly Report on Form 10-Q, giving retroactive effect to the Reverse Stock Split.

Revenues from trust fees, commissions and brokers fees, and remittance processing activities - which are primarily generated through Busey Wealth Management and FirsTech - represented 51.8% of the Company s non-interest income for the quarter ended September 30, 2015, providing a balance to revenue from traditional banking activities. Trust fees and commissions and brokers fees seasonally decreased to \$5.3 million for the third quarter of 2015 compared to \$6.0 million for the second quarter of 2015, but increased from \$4.9 million for the third quarter of 2014. Trust fees and commission and brokers fees increased to \$17.8 million for the nine months ended September 30, 2015, compared to \$16.9 million for the nine months ended September 30, 2014.

FirsTech s remittance processing revenue decreased to \$2.9 million for the third quarter of 2015, compared to \$3.0 million for the second quarter of 2015, but increased from \$2.4 million for the third quarter of 2014. Remittance processing revenue increased to \$8.4 million for the nine months ended September 30, 2015 compared to \$7.1 million, up 17.6%, for the nine months ended September 30, 2014.

The Company continues to prioritize strengthening its balance sheet, diversifying revenue streams and developing appropriate platforms to sustain profitable growth. An active business outreach across the Company s footprint continues to support ongoing business expansion. Various actions were undertaken through the year across our franchise to shape the future, trimming certain areas where sensible and adding in others with a continuing commitment to deliver optimal value.

Asset Quality

While much internal focus has been directed toward growth, the Company s commitment to credit quality continues to be evident by strong performance across a range of credit indicators. The September 30, 2015 asset metrics reflect the post combination results of acquiring Herget Financial. As of September 30, 2015, the Company reported non-performing loans of \$8.0 million compared to \$8.4 million as of June 30, 2015 and \$8.7 million as of September 30, 2014.

The Company recorded net charge-offs of \$0.6 million for the third quarter of 2015. By comparison, the Company recorded net recoveries of \$0.1 million for second quarter of 2015 and net charge-offs of \$0.4 million for the third quarter of 2014. Net charge-offs for the first nine months of 2015 were \$0.8 million compared to \$2.6 million for the same period of 2014. The Company recorded a provision for loan loss of \$0.1 million in the third quarter of 2015, compared to no provision in the second quarter of 2015 and third quarter of 2014. For the first nine months of 2015, the provision for loan loss was \$0.6 million, compared to \$2.0 million for the same period of 2014, as the Company s dedication to improving asset quality and building balance sheet strength continues to yield positive results.

The allowance for loan losses as a percentage of loans decreased to 1.83% at September 30, 2015 compared to 1.90% at June 30, 2015 and 1.98% at September 30, 2014. During the current year, the Company is holding acquired loans from the Herget Financial acquisition with uncollected principal balances. These loans are carried net of a fair value adjustment for credit and interest rate and are only included in the allowance calculation to the extent that the reserve requirement exceeds their credit fair value adjustment.

With a continued commitment to the quality of assets and the strength of our balance sheet, near-term loan losses are expected to remain generally low. While these results are encouraging, asset quality metrics can be generally influenced by market-specific economic conditions beyond the control of the Company, and specific measures may fluctuate from quarter to quarter. The key metrics are as follows:

	As of and for the Three Months Ended

(1) Includes loans held for sale.

(2) Includes loans categorized as commercial, commercial real estate and real estate construction.

Economic Conditions of Markets

Our primary markets, which are generally in micro-urban communities in downstate Illinois, are distinct from the smaller rural populations of Illinois and have strong industrial, academic or healthcare employment bases. Our primary downstate Illinois markets of Champaign, Macon, McLean and Peoria counties are anchored by several strong, familiar and stable organizations.

Champaign County is home to the University of Illinois Urbana/Champaign (U of I), the University s primary campus. U of I has in excess of 44,000 students. Additionally, Champaign County healthcare providers serve a significant area of downstate Illinois and western Indiana. Macon County is home to the North American headquarters for Archer Daniels Midland (ADM), a Fortune 100 company and one of the largest agricultural processors in the world. ADM s presence in Macon County supports many derivative businesses in the agricultural processing arena. Additionally, Macon County is home to Millikin University, and its healthcare providers serve a significant role in the market. McLean County is home to State Farm, Country Financial, Illinois State University and Illinois Wesleyan University. State Farm, a Fortune 100 company, is the largest employer in McLean County, and Country Financial and the universities provide additional stability to a growing area of downstate Illinois. Peoria County is home to Caterpillar, a Fortune 100 company, and Bradley University, in addition to a large healthcare presence serving much of the western portion of downstate Illinois. Caterpillar recently announced significant restructuring and cost cutting initiatives that began in the third quarter of 2015 and while no substantial direct exposure exists, we will continue to monitor the potential impact to the surrounding community and our customers. The institutions noted above, coupled with a large agricultural sector, anchor the communities in which they are located, and have provided a comparatively stable foundation for housing, employment and small business.

Recent pressure on commodity prices appears to be muted by healthy yields of corn and soybeans in local markets. Loans to finance agricultural production and other loans to farmers do not represent a significant portion of our total loan portfolio, with balances of \$61.1 million or approximately 2% of total loans as of September 30, 2015. Additionally, loans secured by farmland totaled \$127.6 million or approximately 5% of total loans for the same period. The financial condition of these customers and the agriculture base in our communities is monitored by management on an ongoing basis as appropriate for prudent risk management.

The State of Illinois, where the largest portion of the Company s customer base is located, continues to be one of the most troubled of any state in the United States with pension under-funding, a current budget impasse, continued budget deficits and a declining credit outlook. Additionally, the Company is located in markets with significant universities and healthcare companies, which rely heavily on state funding and contracts. A temporary income tax increase passed in 2011 began phasing out in 2015, which may affect the State s revenue. Payment lapses by the State of Illinois to its vendors and government sponsored entities may have negative effects on our primary market areas.

The Company has one banking center in the Indianapolis, Indiana area, which is the most populous city of Indiana with a diverse economy. Many large corporations are headquartered in Indianapolis and it is the host to numerous conventions and sporting events annually.

The Company has six banking centers in southwest Florida. Southwest Florida has shown continuing signs of improvement in areas such as job growth and home sales over the last few years. Although we have seen recent improvement in certain economic indicators, we do not believe that southwest Florida has yet returned to its peak economic strength.

OPERATING PERFORMANCE

NET INTEREST INCOME

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income. Net interest margin is tax-equivalent net interest income as a percent of average earning assets.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes a federal income tax rate of 35%. Tax favorable assets generally have lower contractual pre-tax yields than fully taxable assets. A tax-equivalent analysis is performed by adding the tax savings to the earnings on tax favorable assets. After factoring in the tax favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process.

The following tables show our consolidated average balance sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related interest rates for the periods shown. The tables also show, for the periods indicated, a summary of the changes in interest earned and interest expense resulting from changes in volume and rates for the major components of interest-earning assets and interest-bearing liabilities. All average information is provided on a daily average basis.
