### **Petrobras cuts insurance costs by 42%**

---

(Rio de Janeiro, May 20, 2003). PETRÓLEO BRASILEIRO S.A. Petrobras, (BOVESPA: PETR3 / PETR4, NYSE: PBR / PBRA, LATIBEX: XPBR / XPBRA), Brazil's largest oil and gas, petrochemicals and energy company, announces that it today renewed its insurance policies covering operating risks (refineries and platforms) for US\$ 27 million, a reduction of 42% compared with the previous year (US\$ 46.4 million). The insured value has risen from US\$ 18 billion to US\$ 21 billion in 2003.

The tender bid for this business was won by a pool of insurance companies led by Bradesco with the participation of Itaú, Unibanco and AGF. Additionally, with the authorization of IRB BRASIL-RE (Brazilian Reinsurance Institute), Petrobras quoted prices on the international market for 25% of the required reinsurance, the winning price being offered by the broker, Aon-RE.

This significant reduction in premium costs during the current period of difficulties for the insurance sector, represents market recognition of Petrobras's investments amounting to US\$ 1.5 billion for the period 2001-2002 in the areas of the environment and occupational health and safety.

In 2002, Petrobras recorded one of the lowest levels of leakages in its history. Leakage volumes were only 50 m<sup>3</sup> in the first quarter of 2003 against 197 m<sup>3</sup> in 2002, 2,619 m<sup>3</sup> in 2001 and 5,983 m<sup>3</sup> in 2000, constituting a landmark achievement for the oil industry.

Approximately 75% of the Company's main trunk pipelines, equivalent to 7,000 kilometers, have been automated. In turn, a centralized control unit using state of the art technology now operates a large part of these lines, thereby increasing the safety and reliability of the system.

In addition, nine Environmental Defense Centers have been set up to respond immediately to accidents. All the Company's business units have received ISO 14001 (environment) and BS 8800 or OHSAS 18001 (occupational health and safety) certification.

Petrobras's risk profile has never been more transparent to the insurance industry. The refineries and platforms undergo regular independent risk inspections. The recommendations made by the inspectors and the subsequent measures taken by the company are all passed on to the insurance market, which is thus able to monitor the ongoing improvements in Petrobras risk.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
