NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1: Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included.

The results of operations for the periods are not necessarily indicative of the results to be expected for the full year.

These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Form 10-K annual report for 2007 filed with the Securities and Exchange Commission. The condensed consolidated statement of financial condition of the Company as of December 31, 2007, has been derived from the audited consolidated statement of financial condition of the Company as of that date. Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted.

Note 2: Principles of Consolidation

The accompanying consolidated financial statements include the accounts of Guaranty Federal Bancshares, Inc. (the "Company") and its wholly owned subsidiary, Guaranty Bank (the "Bank"). All significant intercompany transactions and balances have been eliminated in consolidation.

Note 3: Benefit Plans

The Company has stock-based employee compensation plans, which are described fully in the Company's December 31, 2007 Annual Report on Form 10-K.

The table below summarizes transactions under the Company's stock option plans for the six months ended June 30, 2008:

| | Number of shares | | Weighted Average Exercise Price |
|---|---------------------------|-------------------------------|--|
| | Incentive Stock Option | Non-Incentive Stock Option | |
| Balance outstanding as of January 1, 2008 | 118,033 | 114,206 | \$ 20.48 |
| Granted | 27,000 | 20,000 | 28.74 |
| Exercised | (26,313) | (15,002) | 13.42 |
| Forfeited | - | - | - |
| Balance outstanding as of June 30, 2008 | 118,720 | 119,204 | \$ 23.33 |
| Options exercisable as of June 30, 2008 | 43,623 | 64,204 | \$ 18.89 |

Stock-based compensation expense recognized for the three months ended June 30, 2008 and 2007 was \$24,172 and \$18,116, respectively. Stock-based compensation expense recognized for the six months ended June 30, 2008 and 2007 was \$48,476 and \$31,235, respectively. As of June 30, 2008, there was \$269,938 of unrecognized compensation expense related to nonvested stock options, which will be recognized over the remaining vesting period.

| Other Comprehensive Loss | \$ (2,294,815) | \$ (395,347) |

Note 6: New Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 157, Fair Value Measurements. This Statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosure related to the use of fair value measures in financial statements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, and does not expand the use of fair value measures in financial statements, but standardizes its definition and guidance in generally accepted accounting principles. SFAS No. 157 emphasizes that fair value is a market-based measurement based on an exchange transaction between market participants in which an entity sells an asset or transfers a liability. SFAS No. 157 also establishes a fair value hierarchy from observable market data as the highest level to fair value based on an entity's own fair value assumptions as the lowest level. The provisions of FASB 157 were effective as of January 1, 2008. The adoption of the standard did not have a material impact on the consolidated financial

statements. In February 2008, Financial Accounting Standards Board Staff Position No. 157-2, Effective Date of FASB Statement No. 157 was issued that delayed the application of SFAS No. 157 for non-financial assets and non-financial liabilities, until January 1, 2009.

Table of Contents

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. This statement permits companies to choose to measure financial instruments and certain other financial assets and liabilities at fair value. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007, with earlier adoption permitted. The provisions of this statement were effective for the Company as of January 1, 2008. The Company elected not to measure any eligible items using the fair value option in accordance with SFAS No. 159 and therefore, SFAS No. 159 did not have a material impact on the consolidated financial statements at adoption.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, and Amendment of FASB Statement No. 133. SFAS 161 amends SFAS 133, "Accounting for Derivative Instruments and Hedging Activities," to amend and expand the disclosure requirements of SFAS 133 to provided greater transparency about (i) how and why and entity uses derivative instruments, (ii) how derivative instruments and related hedge items are accounted for under SFAS 133 and its related interpretations, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. To meet those objectives, SFAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and disclosures about credit-risk-related contingent features in derivative agreements. SFAS 161 is effective for the Company on January 1, 2009. The Company is in the process of evaluating the impact on the Company's financial position, results of operations or cash flows.

Note 7: Derivative Financial Instruments

The Company records all derivative financial instruments at fair value in the financial statements. Derivatives are used as a risk management tool to hedge the exposure to changes in interest rates or other identified market risks.

When a derivative is intended to be a qualifying hedged instrument, the Company prepares written hedge documentation that designates the derivative as 1) a hedge of fair value of a recognized asset or liability (fair value hedge) or 2) a hedge of a forecasted transaction, such as, the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge). The written documentation includes identification of, among other items, the risk management objective, hedging instrument, hedged item, and methodologies for assessing and measuring hedge effectiveness and ineffectiveness, along with support for management's assertion that the hedge will be highly effective.

In June 2008, the Company entered into three, 2 year interest rate swap agreements totaling a \$90 million notional amount to hedge against interest rate risk. As a cash flow hedge, the portion of the change in the fair value of the derivative that has been deemed highly effective is recognized in other comprehensive income until the related cash flows from the hedged item are recognized in earnings. At June 30, 2008, the Company reported a \$74,330 unrealized loss, net of a \$43,654 tax effect, in other comprehensive loss related to cash flow hedges. The Company documents, both at inception and periodically over the life of the hedge, its analysis of actual and expected hedge effectiveness. To the extent that the hedge of future cash flows is deemed ineffective, changes in the fair value of the derivative are recognized in earnings as a component of other noninterest expense. For the quarter ended June 30, 2008, there was no ineffectiveness attributable to the cash flow hedges. A summary of the Company's derivative financial instruments at June 30, 2008 is shown in the following table:

| Inception Date | Termination Date | Derivative Type | Notional Amount | Rate Received | Rate Hedged | Estimated Fair Value at June 30, 2008 |
|----------------|------------------|-----------------|-----------------|---------------|----------------|---------------------------------------|
| 6/3/2008 | 6/3/2010 | | \$ 50,000,000 | | Prime Floating | \$ (174,326) |

Edgar Filing: GUARANTY FEDERAL BANCSHARES INC - Form 10-Q

Table of Contents

Note 8: Fair Value Disclosures

As discussed in Note 6, SFAS No. 157 was implemented by the Company effective January 1, 2008. SFAS No. 157 establishes a hierarchy that prioritizes the use of fair value inputs used in valuation methodologies into the following three levels:

Level 1: Unadjusted quoted prices for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; or other inputs that are observable or can be derived from or corroborated by observable market data by correlation or other means.

Level 3: Significant unobservable inputs that reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The following is a description of the Company's valuation methodologies used to measure and disclose the fair values of its financial assets and liabilities on a recurring or nonrecurring basis:

Available-for-sale securities: Securities classified as available for sale are recorded at fair value on a recurring basis utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, benchmark yields, market spreads, live trading levels, market consensus prepayment speeds, among other things.

Loans: The Company does not record loans at fair value on a recurring basis. However, nonrecurring fair value adjustments to collateral dependent loans are recorded to reflect partial write-downs based on the observable market price or current appraised value of the underlying collateral.

Impaired loans: Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using third party appraisals or internally developed appraisals or discounted cash flow analysis.

Derivative Financial Instruments: Derivatives are recorded at fair value on a recurring basis utilizing Level 2 inputs. The Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, live trading levels, among other things.

Table of Contents

The following table summarizes financial assets and liabilities measured at fair value on a recurring basis as of June 30, 2008, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (dollar amounts in thousands):

Financial Assets:

| | Level 1 inputs | Level 2 inputs | Level 3 inputs | Total fair value |
|-------------------------------|-------------------|-------------------|-------------------|---------------------|
| Available-for-sale securities | \$ 1,172 | \$ 62,524 | \$ - | \$ 63,696 |

Financial Liabilities:

| | Level 1 inputs | Level 2 inputs | Level 3 inputs | Total fair value |
|---------------------|-------------------|-------------------|-------------------|---------------------|
| Interest rate swaps | \$ - | \$ 118 | \$ - | \$ 118 |

Certain financial assets are measured at fair value on a nonrecurring basis, that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets measured at fair value on a non-recurring basis during the three months ended June 30, 2008, that were still held on the balance sheet at June 30, 2008, were valued using the valuation inputs shown below (dollar amounts in thousands):

| | Level 1 inputs | Level 2 inputs | Level 3 inputs | Total fair value |
|----------------|-------------------|-------------------|-------------------|---------------------|
| Impaired loans | \$ - | \$ - | \$ 5,130 | \$ 5,130 |

Certain non-financial assets and non-financial liabilities measured at fair value on a recurring and non-recurring basis include non-financial long-lived assets, such as premises and equipment. As stated above in Note 6, SFAS 157 will be applicable to these fair value measurements beginning January 1, 2009.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

The primary function of the Company is to monitor and oversee its investment in Guaranty Bank (the "Bank"), a wholly-owned subsidiary of the Company. The Company engages in few other activities, and the Company has no significant assets other than its investment in the Bank. As a result, the results of operations of the Company are derived primarily from operations of the Bank. The Bank's results of operations are primarily dependent on net interest margin, which is the difference between interest income on interest-earning assets and interest expense on interest-bearing liabilities. The Bank's income is also affected by the level of its noninterest expenses, such as employee salaries and benefits, occupancy expenses and other expenses. The following discussion reviews the Company's financial condition as of June 30, 2008, and the results of operations for the three and six months ended June 30, 2008 and 2007.

The discussion set forth below, as well as other portions of this Form 10-Q, may contain forward-looking comments. Such comments are based upon the information currently available to management of the Company and management's perception thereof as of the date of this Form 10-Q. When used in this Form 10-Q, words such as "anticipates," "estimates," "believes," "expects," and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. Such statements are subject to risks and uncertainties. Actual results of the Company's operations could materially differ from those forward-looking comments. The differences could be caused by a number of factors or combination of factors including, but not limited to: changes in demand for

banking services; changes in portfolio composition; changes in management strategy; increased competition from both bank and non-bank companies; changes in the general level of interest rates, in general or local economic conditions, in the real estate market, and in federal and state regulations and legislation governing the operations of the Company or the Bank; and other factors set forth in reports and other documents filed by the Company with the Securities and Exchange Commission from time to time, including the risk factors described under Item 1A. of the Company's Form 10-K for the fiscal year ended December 31, 2007.

Table of Contents

Financial Condition

The Company's total assets increased \$101,426,135 (18%) from \$565,777,980 as of December 31, 2007, to \$667,204,115 as of June 30, 2008.

Cash and cash equivalents increased \$6,182,198 (51%) from \$12,046,202 as of December 31, 2007, to \$18,228,400 as of June 30, 2008.

Securities available-for-sale increased \$48,966,306 (332%) from \$14,729,938 as of December 31, 2007, to \$63,696,244 as of June 30, 2008. The increase is primarily due to purchases of \$55,304,401 offset by maturities and principal repayments of \$2,585,092. Approximately \$35 million of the purchases were due to a structured leveraged transaction completed during the period. The Bank currently holds 26,600 shares of Federal Home Loan Mortgage Corporation ("FHLMC") stock with an amortized cost of \$26,057 in the available-for-sale category. As of June 30, 2008, the gross unrealized gain on the FHLMC stock was \$410,183, a decrease from \$880,205 as of December 31, 2007.

Securities held-to-maturity decreased primarily due to principal repayments by \$45,010 (7%) from \$654,775 as of December 31, 2007, to \$609,765 as of June 30, 2008.

Stock in Federal Home Loan Bank of Des Moines ("FHLB") increased by \$2,156,100 (54%), due to purchases of such stock to continue to maintain a level to meet FHLB advance requirements.

Net loans receivable increased by \$38,994,210 (8%) from \$514,100,035 as of December 31, 2007, to \$553,094,245 as of June 30, 2008. Commercial real estate loans increased by \$38,534,536 (22%) from \$175,995,074 as of December 31, 2007, to \$214,529,610 as of June 30, 2008. Commercial loans increased \$7,119,969 (7%) from \$104,025,575 as of December 31, 2007, to \$111,145,544 as of June 30, 2008. Permanent multi-family loans decreased by \$8,955,093 (21%) from \$41,947,555 as of December 31, 2007, to \$32,992,462 as of June 30, 2008. Construction loans decreased by \$11,128,477 (12%) to \$78,595,743 as of June 30, 2008 compared to \$89,724,220 as of December 31, 2007. Loan growth is anticipated in future quarters and represents a major part of the Bank's planned asset growth.

Allowance for loan losses increased \$4,836,210 (81%) from \$5,962,923 as of December 31, 2007 to \$10,799,133 as of June 30, 2008. The allowance increased due to the provision for loan losses of \$6,504,079 exceeding net loan charge-offs of \$1,667,869 recorded during the period. During the six month period, management charged-off \$1.2 million relating to two specific loans that had been identified and classified as impaired at December 31, 2007. Due to loan growth, the charge-offs noted and increasing concerns about declining real estate values and the difficult market conditions created by the softening economy, management decided to record a provision for loan losses for the period in order to maintain the allowance at a level in accordance with management's internal review and methodology. A significant portion of additional reserves were made on a few problem loans already identified by management in previous quarters. Due to the concerns discussed above, and as a result of continuing analysis, including new information obtained after the quarter, the reserves are warranted. See discussion under "Results of Operations – Comparison of Three and Six Month Periods Ended June 30, 2008 and 2007 – Provision for Loan Losses." The allowance for loan losses, as a percentage of net loans outstanding, as of June 30, 2008 and December 31, 2007 was 1.95% and 1.16%, respectively. The allowance for loan losses, as a percentage of nonperforming loans outstanding, as of June 30, 2008 and December 31, 2007 was 149.9% and 82.2%, respectively. Management believes the allowance for loan losses is at a level to be sufficient in providing for potential loan losses in the Bank's existing loan portfolio at June 30, 2008.

Deposits increased \$28,534,663 (7%) from \$418,191,284 as of December 31, 2007, to \$446,725,947 as of June 30, 2008. For the six months ended June 30, 2008, checking and savings accounts increased by \$17,588,346 and

certificates of deposits increased by \$10,946,317. The increase in checking and savings was due to the Bank's continued emphasis on developing commercial checking business. The increase in certificates of deposit was primarily due to the Company's emphasis on retail customers offset by a decrease in brokered deposits. See also the discussion under "Quantitative and Qualitative Disclosure about Market Risk – Asset/Liability Management."

Table of Contents

FHLB advances increased by \$47,350,000 from \$76,086,000 as of December 31, 2007, to \$123,436,000 as of June 30, 2008 primarily to fund asset growth during the period.

Securities sold under agreements to repurchase increased \$29,900,705 (304%) from \$9,849,295 as of December 31, 2007, to \$39,750,000 as of June 30, 2008, due to the structured leveraged transaction completed during the period.

Stockholders' equity (including unrealized depreciation on securities available-for-sale, net of tax) decreased \$5,681,749 from \$42,686,660 as of December 31, 2007, to \$37,004,911 as of June 30, 2008. The Company's net loss during this period was \$1,879,422. The Company also declared two quarterly dividends totaling \$931,013 during the period. Unrealized depreciation on securities available-for-sale and changes in fair value of interest rate swaps, net of tax, increased \$2,294,815 during the period due primarily to increased volatility in the investment portfolio. In addition, stockholders' equity further declined as the Company repurchased 60,401 shares of treasury stock at an aggregate cost of \$1,465,150 (an average cost of \$24.25 per share). On a per share basis, stockholders' equity decreased from \$16.37 as of December 31, 2007 to \$14.23 as of June 30, 2008.

Average Balances, Interest and Average Yields

The Company's profitability is primarily dependent upon net interest income, which represents the difference between interest and fees earned on loans and debt and equity securities, and the cost of deposits and borrowings. Net interest income is dependent on the difference between the average balances and rates earned on interest-earning assets and the average balances and rates paid on interest-bearing liabilities. Non-interest income, non-interest expense, and income taxes also impact net income.

The following tables sets forth certain information relating to the Company's average consolidated statements of financial condition and reflects the average yield on assets and average cost of liabilities for the periods indicated. Such yields and costs are derived by dividing income or expense annualized by the average balance of assets or liabilities, respectively, for the periods shown. Average balances were derived from average daily balances. The average balance of loans includes loans on which the Company has discontinued accruing interest. The yields and costs include fees which are considered adjustments to yields. All dollar amounts are in thousands.

Results of Operations - Comparison of Three and Six Month Periods Ended June 30, 2008 and 2007

Net loss for the three months and six months ended June 30, 2008 was (\$2,496,280) and (\$1,879,422) as compared to net income of \$1,416,224 and \$3,169,764 for the three months and six months ended June 30, 2007, which represents a decrease in earnings of \$3,912,504 (276%) for the three month period, and a decrease in earnings of \$5,049,186 (159%) for the six month period.

Interest Income

Total interest income for the three months and six months ended June 30, 2008, decreased \$211,555 (2%) and \$546,510 (3%), respectively, as compared to the three months and six months ended June 30, 2007. For the three month and six month periods ended June 30, 2008 compared to the same periods in 2007, the average yield on interest earning assets decreased 180 basis points to 5.73% and decreased 159 basis points to 6.08%, respectively, while the average balance of interest earning assets increased approximately \$137,969,000 and \$109,587,000, respectively. The

Company's decline in the average yield on interest earning assets was due to the Federal Reserve's significant interest rate cuts of 3.25% since September 2007. This affected the Company's yield on loans which are tied to the prime rate.

Table of Contents

Interest Expense

Total interest expense for the three months and six months ended June 30, 2008, decreased \$216,686 (4%) and increased \$37,893 (0%), respectively, when compared to the three months and six months ended June 30, 2007. For the three month and six month periods ended June 30, 2008 compared to the same periods in 2007, the average cost of interest bearing liabilities decreased 125 basis points to 3.35% and 90 basis points to 3.66%, respectively, while the average balance of interest bearing liabilities increased approximately \$136,957,000 and \$109,323,000, respectively, when compared to the same periods in 2007.

Net Interest Income

Net interest income for the three months and six months ended June 30, 2008, increased \$5,131 (0%) and decreased \$584,403 (7%), respectively when compared to the same periods in 2007. This decrease was primarily due to the significant rate cuts by the Federal Reserve as described above.

Provision for Loan Losses

Based on its internal analysis and methodology, management recorded a provision for loan losses of \$5,684,079 and \$6,504,079 for the three months and six months ended June 30, 2008, respectively, compared to \$210,000 and \$420,000 for the same periods in 2007. Due to loan growth, the charge-offs noted and increasing concerns about declining real estate values and the difficult market conditions created by the softening economy, management decided to record a provision for loan losses for the period in order to maintain the allowance at a level in accordance with management's internal review and methodology. A significant portion of additional reserves were made on a few problem loans already identified by management in previous quarters. Due to the concerns discussed above, and as a result of continuing analysis, including new information obtained after the quarter, the reserves are warranted. The Bank will continue to monitor its allowance for loan losses and make future additions based on economic and regulatory conditions. Management of the Company anticipates the need to continue increasing the allowance for loan losses through charges to the provision for loan losses as anticipated growth in the Bank's loan portfolio increases or other circumstances warrant. Although the Bank maintains its allowance for loan losses at a level which it considers to be sufficient to provide for potential loan losses in its existing loan portfolio, there can be no assurance that future loan losses will not exceed internal estimates. In addition, the amount of the allowance for loan losses is subject to review by regulatory agencies which can order the establishment of additional loan loss provisions.

Noninterest Income

Noninterest income decreased \$480,827 (37%) and \$820,289 (33%) for the three months and six months ended June 30, 2008, respectively, when compared to the three months and six months ended June 30, 2007.

Gains on sales of investment securities decreased \$291,143 (151%) and \$483,759 (125%) for the three months and six months ended June 30, 2008 when compared to the same periods in 2007. These declines were due to the Bank's suspension of selling shares of its Freddie Mac (FRE) equity investment, due to the significant financial downturn in FRE and a sharp decline in its stock price. Also, the Company recognized specific losses totaling \$97,788 on equity securities associated with companies operating in the financial services sector. Service charges on transaction accounts decreased by \$62,016 (11%) and \$155,098 (14%) for the three months and six months ended June 30, 2008 when compared to the same period in 2007, primarily due to declines in overdraft charges. Gain on sale of loans decreased \$73,743 (22%) and \$135,363 (22%) for the three months and six months ended June 30, 2008 when compared to the same period in 2007.

Noninterest Expense

Noninterest expense increased \$217,312 (7%) and \$444,172 (8%) for the three months and six months ended June 30, 2008 when compared to the same periods in 2007.

Table of Contents

Salaries and employee benefits increased \$107,887 (6%) and \$256,465 (7%) for the three months and six months ended June 30, 2008 when compared to the same period in 2007. This increase was primarily due to additions in several staff positions in the areas of commercial lending, corporate services, human resources, marketing and internal audit throughout fiscal year 2007.

Federal Deposit Insurance Corporation (“FDIC”) deposit insurance premiums increased \$51,917 (491%) and \$104,751 (517%) for the three months and six months ended June 30, 2008 when compared to the same periods in 2007. This was due to an increase in FDIC insurance premium assessments in 2007. Because of credits available to the Company for 2007, these increased costs were not owed by the Company until the first quarter of 2008.

Provision for Income Taxes

The Company recorded a credit for income taxes of \$1,466,995 and \$1,093,443 for the three and six months ended June 30, 2008, respectively, due to the pre-tax loss recognized for those periods. This compares to a provision for income taxes of \$787,588 and \$1,790,314 for the three and six months ended June 30, 2007, respectively.

Nonperforming Assets

The allowance for loan losses is calculated based upon an evaluation of pertinent factors underlying the various types and quality of the Bank’s existing loan portfolio. When making such evaluation, management considers such factors as the repayment status of its loans, the estimated net realizable value of the underlying collateral, borrowers’ intent (to the extent known by the Bank) and ability to repay the loan, local economic conditions and the Bank’s historical loss ratios. The allowance for loan losses, as a percentage of nonperforming loans outstanding, as of June 30, 2008 and December 31, 2007 was 149.9% and 82.2%, respectively. Total loans classified as substandard, doubtful or loss as of June 30, 2008, were \$40.9 million or 6.13% of total assets as compared to \$17.8 million, or 3.41% of total assets at December 31, 2007. Management considered impaired and total classified loans in evaluating the adequacy of the Bank’s allowance for loan losses.

The ratio of nonperforming assets to total assets is another useful tool in evaluating exposure to credit risk. Nonperforming assets of the Bank include impaired loans and assets which have been acquired as a result of foreclosure or deed-in-lieu of foreclosure. All dollar amounts are in thousands.

| | 6/30/2008 | 12/31/2007 | 12/31/2006 |
|--|-----------|------------|------------|
| Nonperforming loans | \$ 7,202 | \$ 7,254 | \$ 2,748 |
| Real estate acquired in settlement of loans | 2,578 | 727 | 173 |
| Total nonperforming assets | \$ 9,780 | \$ 7,981 | \$ 2,921 |
| Total nonperforming assets as a percentage of total assets | 1.47% | 1.41% | 0.56% |
| Allowance for loan losses | \$ 10,799 | \$ 5,963 | \$ 5,783 |
| Allowance for loan losses as a percentage of net loans | 1.95% | 1.16% | 1.20% |
| Allowance for loan losses as a percentage of nonperforming loans | 149.94% | 82.20% | 210.44% |

Liquidity and Capital Resources

The Bank’s primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities, proceeds from maturing investment securities and extensions of credit from FHLB. While scheduled loan and security repayments and the maturity of short-term investments are somewhat predictable sources of funding, deposit flows are influenced by many factors, which make their cash flows difficult to anticipate.

The Bank uses its liquidity resources principally to satisfy its ongoing commitments which include funding loan commitments, funding maturing certificates of deposit as well as deposit withdrawals, maintaining liquidity, purchasing investments, and meeting operating expenses. Management believes that anticipated cash flows and deposit growth will be adequate to meet the Bank's liquidity needs.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Asset/Liability Management

The goal of the Bank's asset/liability policy is to manage interest rate risk so as to maximize net interest income over time in changing interest rate environments. Management monitors the Bank's net interest spreads (the difference between yields received on assets and paid on liabilities) and, although constrained by market conditions, economic conditions, and prudent underwriting standards, the Bank offers deposit rates and loan rates designed to maximize net interest income. Management also attempts to fund the Bank's assets with liabilities of a comparable duration to minimize the impact of changing interest rates on the Bank's net interest income. Since the relative spread between financial assets and liabilities is constantly changing, the Bank's current net interest income may not be an indication of future net interest income.

As a part of its asset and liability management strategy and throughout the past several years, the Bank has continued to emphasize the origination of adjustable-rate or relatively short-term commercial real estate, commercial business and consumer loans, while originating fixed-rate, one- to four-family residential loans primarily for immediate resale in the secondary market on either a service-retained basis or service-released basis. This allows the Bank to serve the customer's needs and retain a banking relationship with respect to such fixed-rate residential loans, while limiting its exposure to the risk associated with carrying a long-term fixed-rate loan in its loan portfolio.

The Bank constantly monitors its deposits in an effort to decrease their interest rate sensitivity. Rates of interest paid on deposits at the Bank are priced competitively in order to meet the Bank's asset/liability management objectives and spread requirements. The Bank believes, based on historical experience, that a substantial portion of such accounts represents non-interest rate sensitive core deposits.

Interest Rate Sensitivity Analysis

The following table sets forth as of June 30, 2008 management's estimates of the projected changes in net portfolio value ("NPV") in the event of 100, 200, and 300 basis point ("bp") instantaneous and permanent increases and 100, 200 and 300 basis point instantaneous and permanent decreases in market interest rates. Dollar amounts are expressed in thousands.

| BP Change in Rates | Estimated Net Portfolio Value | | | NPV as % of PV of Assets | | |
|-----------------------|-------------------------------|-----------|----------|--------------------------|--------|--|
| | \$ Amount | \$ Change | % Change | NPV Ratio | Change | |
| +300 | \$ 49,330 | \$ 11,666 | 31% | 7.52% | 1.92% | |
| +200 | 46,358 | 8,694 | 23% | 7.01% | 1.40% | |
| +100 | 42,443 | 4,779 | 13% | 6.36% | 0.76% | |
| NC | 37,664 | - | - | 5.60% | - | |
| -100 | 32,185 | (5,479) | -15% | 4.75% | -0.85% | |
| -200 | 28,390 | (9,274) | -25% | 4.16% | -1.45% | |
| -300 | 31,824 | (5,840) | -16% | 4.62% | -0.99% | |

Computations of prospective effects of hypothetical interest rate changes are based on an internally generated model using actual maturity and repricing schedules for the Bank's loans and deposits, and are based on numerous assumptions, including relative levels of market interest rates, loan repayments and deposit run-offs, and should not be relied upon as indicative of actual results. Further, the computations do not contemplate any actions the Bank may undertake in response to changes in interest rates.

Management cannot predict future interest rates or their effect on the Bank's NPV in the future. Certain shortcomings are inherent in the method of analysis presented in the computation of NPV. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in differing degrees to changes in market interest rates. Additionally, certain assets, such as adjustable-rate loans, have an initial fixed rate period typically from one to five years, and over the remaining life of the asset changes in the interest rate are restricted. In addition, the proportion of adjustable-rate loans in the Bank's portfolio could decrease in future periods due to refinancing activity if market interest rates remain steady in the future. Further, in the event of a change in interest rates, prepayment and early withdrawal levels could deviate significantly from those assumed in the table. Finally, the ability of many borrowers to service their adjustable-rate debt may decrease in the event of an interest rate increase.

Table of Contents

The Bank's Board of Directors (the "Board") is responsible for reviewing the Bank's asset and liability policies. The Board meets quarterly to review interest rate risk and trends, as well as liquidity and capital ratios and requirements. The Bank's management is responsible for administering the policies and determinations of the Board with respect to the Bank's asset and liability goals and strategies.

Derivative Financial Instruments

The Company records all derivative financial instruments at fair value in the financial statements. Derivatives are used as a risk management tool to hedge the exposure to changes in interest rates or other identified market risks.

When a derivative is intended to be a qualifying hedged instrument, the Company prepares written hedge documentation that designates the derivative as 1) a hedge of fair value of a recognized asset or liability (fair value hedge) or 2) a hedge of a forecasted transaction, such as, the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge). The written documentation includes identification of, among other items, the risk management objective, hedging instrument, hedged item, and methodologies for assessing and measuring hedge effectiveness and ineffectiveness, along with support for management's assertion that the hedge will be highly effective.

In June 2008, the Company entered into three, 2 year interest rate swap agreements totaling a \$90 million notional amount to hedge against interest rate risk. As a cash flow hedge, the portion of the change in the fair value of the derivative that has been deemed highly effective is recognized in other comprehensive income until the related cash flows from the hedged item are recognized in earnings. At June 30, 2008, the Company reported a \$74,330 unrealized loss, net of a \$43,654 tax effect, in other comprehensive loss related to cash flow hedges. The Company documents, both at inception and periodically over the life of the hedge, its analysis of actual and expected hedge effectiveness. To the extent that the hedge of future cash flows is deemed ineffective, changes in the fair value of the derivative are recognized in earnings as a component of other noninterest expense. For the quarter ended June 30, 2008, there was no ineffectiveness attributable to the cash flow hedges. A summary of the Company's derivative financial instruments at June 30, 2008 is shown in the following table:

| Inception Date | Termination Date | Derivative Type | Notional Amount | Rate Received | Rate Hedged | Estimated Fair Value at June 30, 2008 |
|----------------|------------------|--------------------|-----------------|---------------|------------------------|---------------------------------------|
| 6/3/2008 | 6/3/2010 | Interest rate swap | \$ 50,000,000 | 5.91% Fixed | Prime Floating | \$ (174,326) |
| 6/27/2008 | 6/27/2010 | Interest rate swap | 20,000,000 | 6.70% Fixed | Prime Floating + 0.50% | 24,619 |
| 6/27/2008 | 6/27/2010 | Interest rate swap | 20,000,000 | 5.70% Fixed | Prime Floating - 0.50% | 31,723 |
| | | | \$ 90,000,000 | | | \$ (117,984) |

Item 4. Controls and Procedures

(a) The Company maintains disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act")) that are designed to ensure that information required to be disclosed in the Company's Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company conducted an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of June 30, 2008.

(b) There have been no changes in the Company's internal control over financial reporting during the quarter ended June 30, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II

Item 1. Legal Proceedings
None.

Item 1A. Risk Factors
Not applicable.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes the repurchase activity of the Company's common stock during the Company's second quarter ended June 30, 2008.

ISSUER PURCHASES OF EQUITY SECURITIES

| Period | (a) Total Number of Shares Purchased | (b) Average Price Paid per Share | (c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1) | (d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs |
|---------------------------------|---|--|---|--|
| April 1, 2008 to April 30, 2008 | 5,703 | 25.09 | 5,703 | 235,461 |
| May 1, 2008 to May 31, 2008 | 6,033 | 23.66 | 6,033 | 229,428 |
| June 1, 2008 to June 30, 2008 | 29,151 | 22.93 | 29,151 | 200,277 |
| Total | 40,887 | 23.34 | 40,887 | |

(1)The Company has a repurchase plan which was announced on August 20, 2007. This plan authorizes the purchase by the Company of up to 350,000 shares of the Company's common stock. There is no expiration date for this plan. There are no other repurchase plans in effect at this time.

Item 3. Defaults Upon Senior Securities
Not applicable.

Item 4. Submission of Matters to a Vote of Common Security Holders

The annual meeting of stockholders of the Company was held on May 28, 2008. At the meeting the stockholders elected Gregory V. Ostergren and James L. Sivils, III to three-year terms as directors of the Company, while Don M. Gibson, Jack L. Barham, Shaun A. Burke, Kurt Hellweg, Tim Rosenbury, James R. Batten and John Griesemer continue to serve as directors. Also at that meeting, BKD, LLP was ratified as the Company's independent registered public accounting firm for the fiscal year ending December 31, 2008.
