Independent Auditors Report

To the Stockholders and Board of Directors of
SK Telecom Co., Ltd.

We have audited the accompanying non-consolidated balance sheets of SK Telecom Co., Ltd. (the Company) as of December 31, 2004 and 2003, and the related non-consolidated statements of income, appropriations of retained earnings, and cash flows for the years then ended (all expressed in Korean won). These non-consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these non-consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the non-consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the non-consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall non-consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements presents fairly, in all material respects, the financial position of the Company as of December 31, 2004 and 2003, and the results of its operations, the appropriations of its retained earnings and its cash flows for the years then ended, in conformity with financial accounting standards generally accepted in the Republic of Korea.

Our audits also comprehended the translation of the Korean won amounts into U.S. dollar amounts and, in our opinion, such translation has been made in conformity with the basis stated in Note 2(a) to the accompanying non-consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers outside of the Republic of Korea.

Table of Contents

Without qualifying our opinion, we draw attention to the following :

As described in Note 26(a) to the accompanying non-consolidated financial statements, the Company acquired the license for WiBro, a portable internet service which is scheduled to start commercial operations in June 2006, together with KT Corporation and Hanaro Telecom Inc. through deliberation of the Committee of Information and Communication Policy dated January 20, 2005. With regard to this service, the Company is scheduled to make contribution of W117 billion and receive the WiBro license from the Ministry of Information and Technology by the end of February 2005.

As described in Note 26(b) to the accompanying non-consolidated financial statements, in accordance with the resolution of the Company's board of directors dated January 26, 2005, the Company and EarthLink, Inc., an internet service provider in the United States of America, agreed to establish SK-EarthLink, a joint venture company, in the United States of America in February 2005 in order to provide wireless telecommunication service across the United States of America. The Company will invest US\$220 million for a 50% equity interest in the joint venture company from 2005 through 2007. SK-EarthLink plans to launch cellular voice and data services across the United States of America by the third quarter of 2005 by renting networks from network operators throughout the United States of America, also known as partial mobile virtual network operator (MVNO) system.

As described in Note 24 to the accompanying non-consolidated financial statements, on May 1, 2003, the Company merged with SK IMT Co., Ltd. in the accordance with a resolution of the Company's board of directors dated December 20, 2002, and the approval of the shareholders of SK IMT Co., Ltd. dated February 21, 2003.

Accounting principles and auditing standards and their application in practice vary among countries. The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying financial statements are for use by those knowledgeable about Korean accounting procedures and auditing standards and their application in practice.

SK TELECOM CO., LTD.
NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2004 AND 2003

1. GENERAL

SK Telecom Co., Ltd. (the Company) was incorporated in March 1984 under the laws of Korea to engage in providing nationwide cellular telephone communication services in the Republic of Korea. The Company's common shares and depositary receipts (DRs) are listed on the Korea Stock Exchange and the New York and London Stock Exchanges, respectively. As of December 31, 2004, the Company's total issued shares are held by the following :

	Number of shares	Percentage of total shares issued (%)
SK Group	19,772,914	24.03
POSCO Corp.	4,098,496	4.98
Institutional investors and other minority shareholders	49,742,886	60.46
Treasury stock	8,662,415	10.53
	82,276,711	100.00

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying non-consolidated financial statements of the Company have been prepared in accordance with Korean Financial Accounting Standards and Statements of Korea Accounting Standards (SKAS) No.1 through No.10, No.12 and No.13 and significant accounting policies followed in preparing the accompanying non-consolidated financial statements are summarized as follows. The accompanying non-consolidated financial statements were approved by the Company's board of directors on January 26, 2005.

a. Basis of Presentation

The Company maintains its official accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea (Korean GAAP). Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying non-consolidated financial statements have been restructured and translated into English from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations or cash flows, is not presented in the accompanying non-consolidated financial statements.

Table of Contents

The official accounting records of the Company are maintained and expressed in Korean won, the currency of the country in which the Company is incorporated and operates. The translations of Korean won amounts into U.S. dollar amounts in the accompanying non-consolidated financial statements are included solely for the convenience of readers outside of Korea and have been made at the rate of W1,035.1 to US\$1, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York on the last business day of the year ended December 31, 2004. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at the above or any other rate.

b. Allowance for Doubtful Accounts

An allowance for doubtful accounts is maintained based on the estimated collectibility of individual accounts and historical bad debt experience.

c. Inventories

Inventories, which consist mainly of replacement units for wireless telecommunication facilities and supplies for sales promotion, are stated at the lower of cost or market value, with cost determined using the moving average method. During the year, perpetual inventory systems are used to value inventories, which are adjusted to physical inventory counts performed at the end of the year. When the market value of inventories is less than the acquisition cost, the carrying amount shall be reduced to the market value and any difference is charged to current operations as operating expenses. There was no such loss for the years ended December 31, 2004 and 2003.

d. Securities (excluding securities accounted for using the equity method of accounting)

Debt and equity securities are initially recorded at their acquisition costs (fair value of considerations paid) including incidental cost incurred in connection with acquisition of the related securities and classified into trading, available-for-sale and held-to-maturity securities depending on the acquisition purpose and nature.

Trading securities are stated at fair value with gains or losses on valuation reflected in current operations.

Securities classified as available-for-sale are reported at fair value. Unrealized gains or losses on valuation of available-for-sale securities are included in capital adjustments and the unrealized gains or losses are reflected in net income when the securities are sold or if an impairment is other than temporary as discussed below. Equity securities are stated at acquisition cost if fair value cannot be reliably measured. If the declines in the fair value (or recoverable value) of individual available-for-sale securities below their acquisition or amortized cost are other than temporary and there is objective evidence of impairment, write-downs of the individual securities are recorded to reduce the carrying value to their fair value. The related write-downs are recorded in current operations as loss on impairment of investment securities.

Held-to-maturity securities are presented at acquisition cost after premiums or discounts for debt securities are amortized or accreted, respectively. The Company recognizes write-downs resulting from the other-than-temporary declines in the fair value below its book value on the balance sheet date if there is objective evidence of impairment. The related write-downs are recorded in current operations as loss on impairment of investment securities.

Trading securities are presented in the current asset section of the balance sheet, and available-for-sales and held-to-maturity securities are presented in the current and/or non-current asset section of the balance sheet as

long-term investment securities, based on their maturities from the balance sheet date.

Table of Contents

e. Investment Securities with 20% or More Ownership Interest

Investment securities of affiliated companies, in which the Company has a 20% or more ownership interest, are carried using the equity method of accounting, whereby the Company's initial investment is recorded at cost and the carrying value is subsequently increased or decreased to reflect the Company's portion of shareholders equity of the investee. Differences between the purchase cost and net asset value of the investee are amortized over 20 years using the straight-line method. When applying the equity method of accounting, unrealized intercompany gains and losses are eliminated and the effect of eliminations is reflected in the investment securities account.

f. Property and Equipment

Property and equipment are stated at cost. Major renewals and betterments, which prolong the useful life or enhance the value of assets, are capitalized; expenditures for maintenance and repairs are charged to expense as incurred.

Depreciation is computed using the declining balance method (except for buildings and structures acquired on or after January 1, 1995 which are depreciated using the straight-line method) over the estimated useful lives (4 ~ 30 years) of the related assets.

Interest expense and other financing charges for borrowings related to the manufacture or constructions of property and equipment are charged to current operations as incurred.

g. Intangible Assets

Intangible assets are stated at cost, less amortization computed using the straight-line method over 5 to 20 years. The amortization for the years ended December 31, 2004 and 2003 were W317,394 million and W202,449 million, respectively.

With its application for a license to provide IMT 2000 service, the Company has a commitment to pay W1,300,000 million to the Ministry of Information Communication (MIC). W650,000 million was paid in March 2001 by SK IMT Co., Ltd. (a former subsidiary of the Company), which was merged into the Company on May 1, 2003, and the remainder is required to be paid over 10 years with an annual interest rate equal to the 3-year-maturity government bond rate minus 0.75% (3.20% as of December 31, 2004). On December 4, 2001, SK IMT Co., Ltd. received the IMT 2000 license from the MIC, and recorded the total license cost as an intangible asset. As a result of the merger with SK IMT Co., Ltd., the Company acquired such IMT license of W1,259,253 million and assumed the related long-term payable with a principal amount of W650,000 million on May 1, 2003 (the date of merger). Amortization of the IMT license commenced when the Company started its commercial IMT 2000 service in December 2003, using the straight-line method over the estimated useful life of the IMT license which expires in December 2016.

h. Convertible Bonds

The proceeds from issuance of convertible bonds are allocated between the conversion rights and the debt issued; the portion allocable to the conversion rights is accounted for as capital surplus with corresponding conversion right adjustment which is deducted from related bonds. Such conversion right adjustment is amortized to interest expense using the effective interest rate method over the redemption period of the convertible bonds. The portion allocable to the conversion rights is measured by deducting the present value of the debt at time of issuance from the gross proceeds from issuance of convertible bonds, with the present value

of the debt being computed by discounting the expected future cash flows (including call premium, if any) using the effective interest rate applied to ordinary or straight debt of the Company at the issue date.

Table of Contents

i. Discounts on Bonds

Discounts on bonds are amortized to interest expense using the effective interest rate method over the redemption period of the bonds and long-term payables.

j. Valuation of Long-term Payables

Long-term payables resulting from long-term installment transactions are stated at the present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts which are deducted directly from the related nominal payable balances. Such imputed interest is included in operations using the effective interest rate method over the redemption period.

k. Accrued Severance Indemnities

In accordance with the Company's policy, all employees with more than one year of service are entitled to receive severance indemnities, based on length of service and rate of pay, upon termination of their employment. Accruals for severance indemnities are recorded to approximate the amount required to be paid if all employees were to terminate at the balance sheet date.

The Company has deposits with insurance companies to fund the portion of the employees' severance indemnities which is in excess of the tax deductible amount allowed under the Corporate Income Tax Law, in order to take advantage of the additional tax deductibility for such funding. Such funding of severance indemnities in outside insurance companies, of which the beneficiary is its employees, totaling W155,228 million and W138,839 million as of December 31, 2004 and 2003, respectively, is deducted from accrued severance indemnities.

In accordance with the Korean National Pension Fund Law, the Company transferred a portion of its accrued severance indemnities to the Korean National Pension Fund through March 1999. Such transfers, amounting to W5,612 million and W6,148 million as of December 31, 2004 and 2003, respectively, are deducted from accrued severance indemnities.

Actual payment of severance indemnities amounted to W26,728 million and W22,731 million for the years ended December 31, 2004 and 2003, respectively.

l. Accounting for Employee Stock Option Compensation Plan

The Company adopted the fair value based method of accounting for its employee stock option compensation plan. Under the fair value based method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period. For stock options, fair value is determined using an option-pricing model that takes into account the stock price at the grant date, the exercise price, the expected life of the option, the volatility of the underlying stock, expected dividends and the current risk-free interest rate for the expected life of the option. However, as permitted under Korean GAAP the Company excludes the volatility factor in estimating the value of its stock options granted before December 31, 2003, which results in measurement at minimum value. The total compensation cost of an option estimated at the grant date is not subsequently adjusted for changes in the price of the underlying stock or its volatility, the actual life of the option, dividends on the stock, or the risk-free interest rate.

Table of Contents

m. Accounting for Leases

Lease agreements that include a bargain purchase option, result in the transfer of ownership at the end of the lease term, have a lease term equal to 75% or more of the estimated economic life of the leased property or where the present value of minimum lease payments equals or exceeds 90% of the fair value of the leased property, are accounted for as capital leases. All other leases are accounted for as operating leases.

Assets and liabilities related to capital leases are recorded as property and equipment and obligations under capital leases, respectively, and the related interest is calculated using the effective interest rate method and charged to expense. For operating leases, the future minimum lease payments are expensed ratably over the lease term while contingent rentals are expensed as incurred.

n. Research and Development Costs

The Company charges substantially all research and development costs to expense as incurred. The Company incurred internal research and development costs of W203,741 million and W199,074 million for the years ended December 31, 2004 and 2003, respectively, and external research and development costs of W68,549 million and W64,419 million for the years ended December 31, 2004 and 2003, respectively.

o. Accounting for Foreign Currency Transactions and Translation

Transactions denominated in foreign currencies are recorded in Korean won translated at the exchange rate prevailing on the transaction date. Monetary assets and liabilities denominated in foreign currency are translated into Korean won at the Base Rates announced by Seoul Money Brokerage Services, Ltd. on the balance sheet date, which were, for US dollars, W1,043.80=US\$1 and W1,197.80=US\$1 at December 31, 2004 and 2003, respectively. The resulting gains or losses arising from the settlement of foreign currency transactions and the translation of foreign currency assets and liabilities are charged or credited to current operations.

p. Derivative Instruments

The Company records rights and obligations arising from derivative instruments as assets and liabilities, which are stated at fair value. The gains and losses that result from the change in the fair value of derivative instruments are reported in current earnings. However, for derivative instruments designated as hedging the exposure of variable cash flows, the effective portion of the gains or losses on the hedging instruments are recorded as a separate component of shareholders' equity and credited/charged to operations at the time the hedged transactions affect earnings, and the ineffective portions of the gains or losses is credited/charged immediately to operations.

q. Revenue Recognitions

Operating revenue is recognized when cellular telephone communication services are provided.

r. Income Taxes

Deferred tax assets and liabilities are recorded for future tax consequences of operating loss carryforwards, tax credits and temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets are recognized to the extent that they are expected to be realizable. Deferred tax assets and liabilities are presented on the balance sheet as a single non-current

net number.

All of the above bonds will be paid in full at maturities.

On May 27, 2004, the Company issued zero coupon convertible bonds with a maturity of five years in the principal amount of US\$329,450,000 for US\$324,923,469, with an initial conversion price of W235,625 per share of the Company's common stock, subject to certain redemption right. The Company may redeem their principal amount after 3 years from the issuance date if the market price exceeds 130% of the conversion price during predetermined period. In other hand, the bond holders may redeem their notes at 103.81% of the principal amount on May 27, 2007 (3 years from the issuance date). The conversion right may be exercised during the period from July 7, 2004 to May 13, 2009 and the number of common shares to be converted as of December 31, 2004 is 1,644,978 shares. Conversion of notes to common shares may be prohibited under the Telecommunications Law or other legal restrictions which restrains foreign governments, individuals and entities from owning more than 49% of the Company's voting stock, if this 49% ownership limitation is violated due to the exercise of conversion rights. In this case, the Company will pay a bond holder a cash settlement determined at the average price of one day after a holder exercises its conversion right or the weighted average price for the following five business days. The Company intends to sell treasury shares held in trust by the Company that corresponds to the number of shares of common stock that would have been delivered in the absence of the 49% foreign shareholding restrictions. The Company entered into an agreement with Credit Suisse First Boston International to fix its exposure with respect

to cash settlement payments which may be more or less than the proceeds from sales of treasury shares held in trust. Unless either previously redeemed or converted, the notes are redeemable at 106.43% of the principal amount at maturity.

Total	W4,733,936	W4,743,822

a. Legal Reserve

The Korean Commercial Code requires the Company to appropriate as a legal reserve at least 10% of cash dividends for each accounting period until the reserve equals 50% of outstanding capital stock. The legal reserve may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

b. Reserve for Improvement of Financial Structure

The Financial Control Regulation for listed companies in Korea requires that at least 10% of net income (net of accumulated deficit), and an amount equal to net gain (net of related income taxes, if any) on the disposal of property and equipment be appropriated as a reserve for improvement of financial structure until the ratio of stockholders' equity to total assets reaches 30%. The reserve for improvement of financial structure may not be utilized for cash dividends, but may only be used to offset a future deficit, if any, or may be transferred to capital stock.

c. Reserves for Loss on Disposal of Treasury Stock and Research and Manpower Development

Reserves for loss on disposal of treasury stock and research and manpower development were appropriated in order to recognize certain tax deductible benefits through the early recognition of future expenditures. These reserves will be unappropriated from appropriated retained earnings in accordance

with the relevant tax laws. Such unappropriation will be included in taxable income in the year of unappropriation.

Table of Contents

The value of stock options granted is determined using the Black-Scholes option-pricing model, without considering a volatility factor in estimating the value of its stock options, as permitted under Korean GAAP. The following assumptions are used to estimate the fair value of options granted in 2000, 2001 and 2002; risk-free interest rate of 9.1% for 2000, 5.9% for 2001 and 6.2% for 2002; expected life of three years for 2000, 2001 and 2002; expected dividend of W500 for 2000, 2001 and 2002. Under these assumptions, total compensation cost, the recognized compensation cost for the years ended December 31, 2004 and 2003, the compensation cost to be recognized for the following period after December 31, 2004 and the outstanding balance of stock option in capital adjustment as of December 31, 2004 and 2003 are as follows (in millions of Korean won) :

Grant date	Total compensation cost	Recognized compensation cost		Compensation cost to be recognized	Stock option in capital adjustment	
		2004	2003		2004	2003
March 17, 2000	W1,533	W	W 128	W	W1,533	W1,533
