

Edgar Filing: BP PLC - Form 6-K

\$ million	7,619	4,399	4,664
Profit for the period(a)	7,619	4,399	4,664
Inventory holding (gains) losses, net of tax(b)	(1,031)	(1,004)	(220)
Replacement cost profit(b)	6,588	3,395	4,444
- per ordinary share (pence)	17.63	8.75	11.76
- per ordinary share (cents)	34.90	17.90	22.93
- per ADS (dollars)	2.09	1.07	1.38

- BP's first-quarter replacement cost profit was \$6,588 million, compared with \$4,444 million a year ago, an increase of 48%.
- Non-operating items and fair value accounting effects for the first quarter had a net \$4 million unfavourable impact compared to a net \$36 million favourable impact in the first quarter of 2007 - see further details on page 3. Non-operating items for the first quarter included a pre-tax charge of \$307 million for restructuring, integration and rationalization costs associated with BP's forward agenda.
- Net cash provided by operating activities for the quarter was \$10.9 billion compared with \$8.0 billion a year ago.
- The effective tax rate on replacement cost profit(b) for the quarter was 37%; the rate was 34% a year ago.
- Net debt at the end of the quarter was \$23.8 billion. The ratio of net debt to net debt plus equity was 19% compared with 20% a year ago. Net debt has been redefined as described on page 5.
- Capital expenditure, excluding acquisitions and asset exchanges, was \$7.1 billion for the quarter. Total capital expenditure and acquisitions was \$9.0 billion. Capital expenditure excluding acquisitions and asset exchanges, and excluding the accounting for our transaction with Husky, is expected to be around \$21-22 billion for the year. Disposal proceeds were \$0.3 billion for the quarter.
- The quarterly dividend, to be paid in June, is 13.525 cents per share (\$0.8115 per ADS) compared with 10.325 cents per share a year ago, an increase of 31%. In sterling terms, the quarterly dividend is 6.830 pence per share, compared with 5.151 pence per share a year ago, an increase of 33%. During the quarter, the company repurchased 91 million of its own shares for cancellation at a cost of \$1 billion.

(a) Profit attributable to BP shareholders.

(b) With effect from 1 January 2008, replacement cost profit excludes inventory holding gains and losses net of tax. Comparative amounts have been amended to the new basis. See page 2 for further details.

The commentaries above and following are based on replacement cost profit and should be read in conjunction with the cautionary statement on page 11.

Edgar Filing: BP PLC - Form 6-K

Analysis of replacement cost profit and reconciliation to profit for the period

	First quarter 2008	Fourth quarter 2007

Profit for the period attributable to BP shareholders	7,619	4,399
	=====	=====

(a) Replacement cost profit reflects the current cost of supplies. The replacement cost profit for the period is arrived at by excluding from profit inventory holding gains and losses. BP uses this measure to assist investors to assess BP's performance from period to period. Replacement cost profit is not a recognized GAAP measure.

(b) Effective 1 January 2008, replacement cost profit excludes inventory holding gains and losses and their associated tax effect. Previously, replacement cost profit excluded inventory holding gains and losses while the tax charge remained unadjusted and included the tax effect on inventory holding gains and losses. Comparative amounts have been amended to the new basis and the impact of the change is shown in the table below. There is no impact on profit for the period.

	(4)	(1,132)

(a) An analysis of non-operating items by type is provided on page 20 and a geographical split is shown on pages 7, 9 and 10.

(b) Tax is calculated using the quarter's effective tax rate on replacement cost profit. Amounts for comparative periods have been amended to reflect a redefinition of the effective tax rate on replacement cost profit arising as a result of the exclusion of tax effects on inventory holding gains and losses as described on page 2.

(c) An explanation of fair value accounting effects is provided on page 11.

(d) Fair value accounting effects, in respect of the first quarter 2007 for the Refining and Marketing segment, have been revised from those disclosed previously. The revisions reflect changes in the basis for valuation of certain forward supply contracts to be consistent with the method used for other forward supply contracts when calculating management's internal measure of performance. The changes to comparative figures are not material in relation to management's internal measure of the Refining and Marketing segment's performance. The changes have no impact on the results reported under IFRS.

Dividends

Dividends Payable

BP today announced a dividend of 13.525 cents per ordinary share to be paid in June. Holders of ordinary shares will receive 6.830 pence per share and holders of American Depositary Receipts (ADRs) \$0.8115 per ADS. The dividend is payable on 9 June to shareholders on the register on 16 May. Participants in the Dividend Reinvestment Plan (DRIP) or the DRIP facility in the US Direct Access Plan will receive the dividend in the form of shares, also on 9 June.

	-----	-----
	10,072	7,870
	=====	=====

(a) Includes profit after interest and tax of equity-accounted entities.

The replacement cost profit before interest and tax for the first quarter was \$10,072 million, an increase of 60% over the first quarter of 2007. This result benefited from higher oil and gas realizations and a higher contribution from the gas marketing and trading and LNG businesses. This was partly offset by higher costs, primarily reflecting the impacts of higher depreciation and sector-specific inflation. The result also included higher income from equity-accounted entities, primarily from TNK-BP due to higher prices. In addition, BP's share of income from TNK-BP benefited from the effect of lagged tax reference prices.

The result included a net non-operating charge of \$376 million with the most significant items being fair value losses on embedded derivatives partly offset by the release of certain provisions. The corresponding quarter in 2007 contained a net non-operating gain of \$757 million. In the first quarter, fair value accounting effects had an unfavourable impact of \$259 million compared with a favourable impact of \$31 million a year ago.

Reported production for the quarter was 3,913mboe/d and was flat compared with the first quarter of 2007. After adjusting for the impact of lower entitlement in our production-sharing agreements (PSAs), production was more than 5% higher than the first quarter of 2007. This primarily reflects the ramp-up of production following the start-up of major projects in 2007. As previously indicated, if oil prices remain at \$100 per barrel we expect 2008 reported production to be broadly flat compared with 2007, with underlying production growth being offset by PSA entitlement impacts. We expect the quarterly phasing of underlying production during the year to reflect the normal seasonal effects associated with turnaround activity in the second and third quarters.

During the quarter, we had first production from the Mondo field within the Kizomba C development in Angola, where BP holds a 26.67% interest. Shortly after

Edgar Filing: BP PLC - Form 6-K

the end of the quarter, production commenced at Deep Water Gunashli on schedule; this completes the third and final phase of development of the Azeri-Chirag-Gunashli field (BP 34.1% and operator) in the Azerbaijan sector of the Caspian Sea. We had exploration success in Angola with the Portia discovery, in Egypt with the Satis discovery and in the North Sea with a discovery close to the Foinaven production facility.

On 31 March, we completed the deal with Husky Energy Inc. to create an integrated North American oil sands business by means of two separate joint ventures, one of which gives BP a 50% interest in Husky's Sunrise field in Alberta, Canada. Capital expenditure of \$2,848 million in respect of this transaction is reflected in the first quarter of 2008.

Shortly after the end of the quarter, we announced the Kodiak discovery in the deepwater Gulf of Mexico and, jointly with ConocoPhillips, announced that we have combined resources to start Denali - The Alaska Gas Pipeline.

US	154	(1,805)
Rest of World	359	97
	1,249	(1,296)
	1,249	(1,296)

(a) Includes profit after interest and tax of equity-accounted entities.

Refining and Marketing comprises Fuels Value Chains (FVC) and International Businesses. The FVCs include refineries, supply, logistics and marketing and trading activities. The International Businesses include lubricants, chemicals, LPG, aviation and marine fuels.

The replacement cost profit before interest and tax for the first quarter was \$1,249 million compared with \$804 million for the same period last year. The quarter's result included a net non-operating gain of \$609 million, primarily in respect of the gain recognized on the contribution of the Toledo refinery into a joint venture with Husky Energy Inc., as part of the integrated North American oil sands deal completed on 31 March 2008. This compares with a net non-operating charge of \$229 million for the same period last year. In the first quarter, fair value accounting effects had a favourable impact of \$101 million. A year ago, the impact was \$539 million unfavourable.

Compared with the first quarter of 2007, our result reflected the adverse impacts of a significantly lower US refining margin environment and higher turnaround activities, primarily at the Carson refinery.

In the FVCs, we saw weaker US integrated margins, particularly on the West Coast, which more than offset improved performance in other regions. The average refining Global Indicator Margin (GIM) and BP's actual refining margin for the first quarter were both significantly lower than those in the first quarter of 2007. Marketing margins were steady year on year, with slightly lower volumes versus a year ago.

Refining availability continued to improve for the sixth successive quarter, reaching 88.0% for the first quarter of 2008 compared with 81.6% in the first quarter of 2007. During the quarter, we completed the largest turnaround in the history of the Carson refinery, restored the Whiting refinery to its full clean fuel capability of 360mb/d in March and successfully restarted the sour crude distillation capacity at the Texas City refinery with most of its economic capability on track to be restored by mid-2008.

Refining throughput for the quarter was 2,166mb/d compared with 2,232mb/d for the same quarter last year. The lower throughput was mainly due to the turnaround activities at Carson.

Our International Businesses made a significant contribution to the segment result in both the first quarter and in the same period a year ago. We continued to make progress on reducing complexity and costs in the lubricants and aviation fuels businesses through portfolio simplification.

Operations at our new 900ktepa Zhuhai purified terephthalic acid (PTA) plant, which was successfully commissioned in early 2008, continued to improve with the production rate reaching over 90% in March.

On 17 March 2008, BP and Irving Oil entered into a memorandum of understanding

Edgar Filing: BP PLC - Form 6-K

to work together on the next phase of engineering, design, and feasibility for the proposed Eider Rock refinery in Saint John, New Brunswick, Canada. BP will contribute \$40 million as its share of funding for this stage of the study and the two companies will also investigate the possibility of forming a joint venture to build the refinery should they decide to proceed.

Refining margins have improved to date in the second quarter but still remain significantly lower than the same quarter last year. The segment marketing businesses are likely to continue to experience pressure from the effects of higher product prices and a slowing of the OECD economies. We expect continued improvement in BP's refining availability as the units at Texas City come onstream progressively during the rest of the year.

(a) Includes profit after interest and tax of equity-accounted entities.

Other businesses and corporate comprises the Alternative Energy business, Shipping, the group's aluminium asset, Treasury (which includes interest income on the group's cash and cash equivalents), and corporate activities worldwide.

The replacement cost profit before interest and tax for the first quarter was a loss of \$213 million, compared with a loss of \$98 million a year ago.

The net non-operating charge for the first quarter was \$81 million, including a charge for restructuring costs and other provisions, partly offset by a net disposal gain. This compares with a net non-operating gain of \$34 million a year ago.

Our estimates of 2008 charges for Other businesses and corporate, excluding non-operating items, remain in line with the \$1,500 million (+/- \$200 million) guidance provided in our 2008 strategy presentation.

At the start of the year, our Alternative Energy business broadened its scope to include BP's biofuels business, carbon capture and storage (CCS), clean coal and distributed energy, alongside the existing solar, wind, gas-fired power and hydrogen energy activities. In January, we announced our intention to pursue development options for a hydrogen power plant in Abu Dhabi with Abu Dhabi Future Energy Company (Masdar), through our Hydrogen Energy joint venture with Rio Tinto.

In addition, Alternative Energy and Dominion entered into a 50:50 joint venture to develop a wind farm in Indiana with a nameplate capacity of 300MW and we formed a 50:50 joint venture with NRG Energy, Inc. for the development and operation of a commercial wind farm, intended to be located in Texas and with a nameplate capacity of 150MW. Since the end of the quarter, we announced our intention to take a 50% stake in Tropical BioEnergia SA, a joint venture established by Brazilian companies Santelisa Vale and Maeda Group, which is constructing an ethanol refinery in Brazil and also plans to build a second refinery.

In 2008, Alternative Energy expects to achieve total solar cell sales of 170MW and to install total gross capacity for wind generation of 1GW. We plan to report changes to wind and solar capacity on a quarterly basis. Since the beginning of 2007, additional solar manufacturing capacity has been added at our Madrid plant and wind capacity has been added at Cedar Creek in Colorado, USA and Dhule in India.

Edgar Filing: BP PLC - Form 6-K

	First quarter 2008	Fourth quarter 2007
Total capacity as at period-end (megawatts)		
Wind(a)	373	373
Solar(b)	228	228

(a) Wind capacity is the sum of the rated capacities of the assets/turbines that have entered into commercial operation, including jointly controlled entities (gross).

(b) Solar capacity is the theoretical cell production capacity per annum of in-house manufacturing facilities, including jointly controlled entities (gross).

Information on fair value accounting effects

BP uses derivative instruments to manage the economic exposure relating to inventories above normal operating requirements of crude oil, natural gas and petroleum products as well as certain contracts to supply physical volumes at future dates. Under IFRS, these inventories and contracts are recorded at historic cost and on an accruals basis respectively. The related derivative instruments, however, are required to be recorded at fair value with gains and losses recognized in income because hedge accounting is either not permitted or not followed, principally due to the impracticality of effectiveness testing requirements. Therefore, measurement differences in relation to recognition of gains and losses occur. Gains and losses on these inventories and contracts are not recognized until the commodity is sold in a subsequent accounting period. Gains and losses on the related derivative commodity contracts are recognized in the income statement from the time the derivative commodity contract is entered into on a fair value basis using forward prices consistent with the contract maturity.

IFRS requires that inventory held for trading be recorded at its fair value using period end spot prices whereas any related derivative commodity instruments are required to be recorded at values based on forward prices consistent with the contract maturity. Depending on market conditions, these forward prices can be either higher or lower than spot prices resulting in measurement differences.

BP enters into contracts for pipelines and storage capacity which, under IFRS, are recorded on an accruals basis. These contracts are risk managed using a variety of derivative instruments which are fair valued under IFRS. This results in measurement differences in relation to recognition of gains and losses.

The way that BP manages the economic exposures described above, and measures performance internally, differs from the way these activities are measured under IFRS. BP calculates this difference by comparing the IFRS result with management's internal measure of performance, under which the inventory and the supply and capacity contracts in question are valued based on fair value using relevant forward prices prevailing at the end of the period. We believe that disclosing management's estimate of this difference provides useful information for investors because it enables investors to see the economic effect of these activities as a whole. The impacts of fair value accounting effects, relative to management's internal measure of performance, are shown in the table on page 3. Information for all quarters of 2005 - 2007 can be found at www.bp.com/FVAE.

Edgar Filing: BP PLC - Form 6-K

Cautionary statement: The foregoing discussion contains forward-looking statements particularly those regarding production, restoration of refinery economic capability, refining margins, likely continuing pressures on marketing businesses, improvements in refining availability, expected total solar cell sales and installed total gross capacity for wind generation. By their nature, forward-looking statements involve risk and uncertainty and actual results may differ from those expressed in such statements depending on a variety of factors including the following: the timing of bringing new fields onstream; industry product supply; demand and pricing; operational problems; general economic conditions; political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations; exchange rate fluctuations; development and use of new technology; the success or otherwise of partnering; the actions of competitors; natural disasters and adverse weather conditions; changes in public expectations and other changes to business conditions; wars and acts of terrorism or sabotage; and other factors discussed in this Announcement. For more information you should refer to our Annual Report and Accounts 2007 and our 2007 Annual Report on Form 20-F filed with the US Securities and Exchange Commission.

Notes

1. Basis of preparation

The interim financial information included in this report has been prepared in accordance with IAS 34 'Interim Financial Reporting'.

The results for the interim periods are unaudited and in the opinion of management include all adjustments necessary for a fair presentation of the results for the periods presented. All such adjustments are of a normal recurring nature. The interim financial statements and notes included in this Report should be read in conjunction with the consolidated financial statements and related notes for the year ended 31 December 2007 included in BP's Annual Report and Accounts 2007.

BP prepares its consolidated financial statements included within its Annual Report and Accounts on the basis of International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), IFRS as adopted by the European Union (EU) and in accordance with the provisions of the Companies Act 1985. IFRS as adopted by the EU differs in certain respects from IFRS as issued by the IASB, however, the differences have no impact on the group's consolidated financial statements for the periods presented. The financial information presented herein has been prepared in accordance with the accounting policies expected to be used in preparing the Annual Report and Accounts 2008, which do not differ significantly from those used in the Annual Report and Accounts 2007.

2. Resegmentation and other changes to comparatives

(a) Resegmentation

On 11 October 2007, we announced our intention to simplify the organizational structure of BP. From 1 January 2008, there are only two business segments - Exploration and Production and Refining and Marketing. A separate business, Alternative Energy, handles BP's low-carbon businesses and future growth options outside oil and gas. This includes solar, wind, gas-fired power, hydrogen, biofuels and coal conversion.

As a result, and with effect from 1 January 2008:

- The Gas, Power and Renewables segment ceased to report separately.
- The natural gas liquids (NGLs), liquefied natural gas and gas and power marketing and trading businesses were transferred from the Gas, Power and Renewables segment to the Exploration and Production segment.
- The Alternative Energy business was transferred from the Gas, Power and Renewables segment to Other businesses and corporate.
- The Emerging Consumers Marketing Unit was transferred from Refining and Marketing to Alternative Energy.

Edgar Filing: BP PLC - Form 6-K

- The Biofuels business was transferred from Refining and Marketing to Alternative Energy.
- The Shipping business was transferred from Refining and Marketing to Other businesses and corporate.

As a result of the transfers identified above, Other businesses and corporate has been redefined. It now consists of the Alternative Energy business, Shipping, the group's aluminium asset, Treasury (which includes interest income on the group's cash and cash equivalents) and corporate activities worldwide.

Financial information for 2003 to 2007 has been restated to reflect the resegmentation and is available in BP Financial and Operating Information 2003-2007 and to download from www.bp.com/investors. Quarterly data is provided for 2004-2007 and annual data for 2003.

Notes

(b) Revised income statement presentation

We have implemented a minor change in the presentation of the group income

Edgar Filing: BP PLC - Form 6-K

statement whereby the unwinding of the discount on provisions and on other payables is now included within finance costs. Previously, this was included within other finance income or expense. This line item has now been renamed net finance income or expense relating to pensions and other post-retirement benefits. This change does not affect profit before interest and taxation, profit before taxation or profit for the period. The financial information for comparative periods shows the revised presentation, as set out below.

	Fourth quarter 2007	Fir quart 20

	=====	=====

Notes

2. Resegmentation and other changes to comparatives (continued)

(c) Revised definition of net debt

Net debt has been redefined to include the fair value of associated derivative financial instruments that are used to hedge foreign exchange and interest rate risks relating to finance debt, for which hedge accounting is claimed. The derivatives are reported on the balance sheet within the headings 'Derivative financial instruments'. Amounts for comparative periods are presented on a consistent basis.

Equity	94,652	85,7
Ratio of net debt to net debt plus equity	22%	2

Notes

3. Significant transaction in the period

In December 2007, BP signed a memorandum of understanding with Husky Energy Inc. to form an integrated North American oil sands business. The transaction was completed on 31 March 2008, with BP contributing its Toledo refinery to a US jointly controlled entity to which Husky contributed \$250 million cash and a payable of \$2,483 million. In Canada, Husky contributed its Sunrise field to a second jointly controlled entity, with BP contributing \$250 million in cash and a payable of \$2,290 million. The Toledo refinery assets and associated liabilities were classified as a disposal group held for sale at 31 December 2007.

Both jointly controlled entities are owned 50:50 by BP and Husky and are accounted for using the equity method.

As a result of the transaction, the items detailed below are included in the financial statements for the first quarter of 2008.
