Independent Auditors Report

To the Board of Directors and Shareholders of

Woori Finance Holdings Co., Ltd.

We have audited the accompanying non-consolidated balance sheets of Woori Finance Holdings Co., Ltd. (the Company) as of December 31, 2003 and 2002, and the related non-consolidated statements of income, appropriations of retained earnings and cash flows for the years then ended (all expressed in Korean won). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such non-consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2003 and 2002, and the results of its operations, the appropriations of its retained earnings and its cash flows for the years then ended, in conformity with financial accounting standards generally accepted in the Republic of Korea.

Our audits also comprehended the translation of the Korean won amounts into U.S. dollar amounts and in our opinion, such translation has been made in conformity with the basis stated in Note 2 to the accompanying non-consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers outside of Korea.

Table of Contents

Without qualifying our opinion, we draw attention to the following:

As explained in Note 1 to the accompanying non-consolidated financial statements, Woori Finance Holdings Co., Ltd. was registered with the Securities and Exchange Commission in the United States of America and listed its American Depositary Shares on the New York Stock Exchange on September 29, 2003.

As explained in Note 1 to the accompanying non-consolidated financial statements, the Company purchased 40 million shares of Woori Credit Card Co., Ltd. (WCC), a subsidiary of the Company, for (Won)200 billion (US\$166.9 million) on March 27, 2003 and 128 million shares for (Won)640 billion (US\$534.3 million) on September 30, 2003. However, WCC curtailed 380 million shares amounting to (Won)1,900 billion (US\$1,586.2 million) on December 22, 2003, in a capital reduction without compensation. As a result, the number of issued common stock and capital of WCC decreased to 22,600,000 shares and (Won)113 billion (US\$94.3 million), respectively, as of December 31, 2003.

As explained in Note 24 to the accompanying non-consolidated financial statements, Woori Bank has a loan receivable from and payment guarantees for SK Networks Co., Ltd. (formerly known as SK Global) and its overseas subsidiaries (collectively referred to as SK Networks) in the total amount of (Won)177 billion (US\$147.7 million) and available-for-sale securities in the total amount of (Won)89 billion (US\$74.3 million) ((Won)47 billion of common stock and (Won)42 billion of preferred stock). In connection therewith, Woori Bank provided (Won)106 billion (US\$88.5 million) as allowances for credit losses as of December 31, 2003. However, SK Networks is currently undergoing a corporate restructuring and depending on the result of this restructuring, Woori Bank's actual loss on SK Networks credit may differ from the current estimate.

As explained in Note 25 to the accompanying non-consolidated financial statements, Woori Bank, Kyongnam Bank and Kwangju Bank, subsidiaries of the Company, have loan receivables from LG Card Co., Ltd. (LG Card) in the total amount of (Won)279 billion (US\$232.9 million) as of December 31, 2003. In connection therewith, the banks provided (Won)80 billion (US\$66.8 million) as allowances for credit losses. In addition, those banks have corporate bonds of (Won)200 billion (US\$167.0 million) and asset backed securities of (Won)100 billion (US\$83.5 million) issued by LG Card and beneficiary certificates of (Won)22 billion (US\$18.4 million) relating to LG Card. The banks recognized losses on valuation of trading securities of (Won)34 billion (US\$28.4 million), losses on impairment of available-for-sale securities of (Won)43 billion (US\$35.9 million), and losses on impairment of held-to-maturity securities of (Won)11 billion (US\$9.2 million) for the year ended December 31, 2003. With relation to Commercial Paper (CP) in trust accounts, for which repayment of principal or interest is guaranteed by the banks, in the total amount of (Won)145 billion (US\$121.1 million), the banks charged (Won)63 billion (US\$52.6 million) in losses on trust management. However, LG card is currently undergoing a corporate restructuring and depending on the result of this

Table of Contents

restructuring, the Company's bank subsidiaries' actual losses on LG Card credit may differ from the current estimate.

As explained in Note 27 to the accompanying non-consolidated financial statements, Woori Bank, a subsidiary of the Company, merged with Woori Investment Bank (WIB), a subsidiary of the Company, on July 31, 2003 pursuant to a merger agreement dated June 25, 2003. As a result, Woori Bank took over substantially all of the assets and liabilities of WIB by exchanging one common share of WIB for 0.0355 share of Woori Bank. Accordingly, the number of issued common shares of Woori Bank increased from 553 million to 571 million and contributed capital of Woori Bank increased from (Won)2,764 billion (US\$2,307.5 million) to (Won)2,853 billion (US\$2,381.8 million).

As explained in Note 29 to the accompanying non-consolidated financial statements, on February 5, 2004, WCC, a subsidiary of the Company, made a resolution to split off a part of its credit card business, which was previously purchased from Kwangju Bank, and to transfer back such part to Kwangju Bank. In addition, WCC resolved to transfer all other assets and liabilities including credit card subscriber base to Woori Bank and entered into a merger agreement (the Merger Agreement) with Woori Bank. The transfers to Kwangju Bank and Woori Bank are scheduled to be on March 29, 2004 and March 31, 2004, respectively. According to the Merger Agreement, one common share of Woori Bank will be issued for 0.3581 common share of WCC and as a result, the number of issued common shares of Woori Bank will increase from 571 million to 636 million and contributed capital of Woori Bank will increase from (Won)2,853 billion (US\$2,381.9 million) to (Won)3,180 billion (US\$2,654.9 million). There will be no newly issued common shares of Kwangju Bank for the transfer of WCC's credit card business back to Kwangju Bank.

As explained in Note 29 to the accompanying non-consolidated financial statements, the Company made a resolution to increase its investment in WCC by purchasing new common stocks of WCC, amounting to (Won)800 billion (US\$667.9 million) for the purpose of maintaining capital adequacy of Woori Bank following the merger with WCC. The capital increase is scheduled to take place before the date of merger of WCC into Woori Bank.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Financial Statement Presentation

The Company maintains its official accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying financial statements have been restructured and translated into English from the Korean language financial statements.

Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations or cash flows, is not presented in the accompanying financial statements.

The US dollar amounts presented in these financial statements were computed by translating Korean won into US dollars at the rate of (Won)1,197.8 to US\$1.00 the Base Rate announced by Seoul Money Brokerage Service, Ltd at December 31, 2003, solely for the convenience of the reader. This convenience translation into US dollars should not be construed as representations that the Korean won amounts have been, could have been, or could in the future be, converted at this or any other rate of exchange.

The significant accounting policies followed in preparing the accompanying non-consolidated financial statements are summarized below.

a. Adoption of Statements of Korea Accounting Standards (SKAS)

Korea Accounting Standards Board (KASB) has issued SKASs that replaced the existing Korean Financial Accounting Standards (KFAS) in order to enhance the global convergence of existing accounting standards and usefulness of accounting information. Accordingly, the Company has adopted SKASs in 2003, except that the Company early adopted SKAS No. 6 - Subsequent Events in 2002.

b. Valuation of Investment Equity Securities

If the Company owns 20% or more of voting shares of its investees, either directly or indirectly, the Company is presumed to have significant influence on the investees' management, and accordingly, the investment equity securities in those investees are accounted for by using the equity method of accounting. Investment equity securities are initially stated at their acquisition costs including incidental cost incurred in connection with acquisition of the related securities using the moving average method. The Company's share in net income or net loss of investees is reflected in current operations. Changes in the capital adjustment accounts of the investees resulting from changes in value of their investments are recorded as valuation gain or loss on investments in the capital adjustment account of the investor. Changes in retained earnings of the investees are reflected in the retained earnings account and changes in capital surplus or other capital accounts of the investees are reflected in the capital adjustment account.

Table of Contents

c. Allowance for Possible Loan Losses

The Company provides an allowance for possible loan losses based on the management analysis of the borrowers' capacity to repay and prior bad debt experience. The allowance for possible loan losses is presented as a deduction from loans.

d. Tangible Assets and Depreciation

Tangible assets included in fixed assets are recorded at cost. Routine maintenance and repairs are expensed as incurred. Expenditures that result in enhancement of the value or extension of the useful lives of the facilities involved are capitalized as additions to tangible assets.

Depreciation is computed using the straight-line method for structures in leased offices and the declining balance method for all other assets based on the estimated useful lives of the assets. The estimated useful life is 5 years for tangible assets.

e. Intangible Assets

Intangible assets are recorded at the purchase cost, plus incidental costs. Intangible assets are amortized using the straight-line method over the estimated useful life of 5 years.

f. Amortization of Discount (Premium) on Debentures

Discounts or premiums on debentures issued are presented as deductions from or additions to the debentures. Discounts or premiums are accreted or amortized over the period from issuance to maturity using the effective interest rate method. Accretion or amortization of discounts or premiums are recognized as interest expenses or interest incomes on the debentures.

g. Accrued Severance Benefits

In accordance with the Company's policy, all employees with more than one year of service are entitled to receive severance indemnity payments at termination. Deposits for severance benefits, which will be directly paid to employees, are recorded as deductions from accrued severance indemnities.

h. Accounting for Derivative Instruments

The Company accounts for derivative instruments pursuant to the Interpretations on Financial Accounting Standards 53-70 on accounting for derivative instruments. Derivative instruments are classified as either trading or hedging depending on their transaction purpose. Derivative instruments are accounted for at fair value with the valuation gain or loss recorded as an asset or liability. The accounting for derivative transactions that are part of a qualified hedge, which is determined based both on the purpose of the transaction and on meeting the specified criteria for hedge accounting, differs depending on whether the transaction is a fair value hedge or a cash flow hedge. Fair value hedge accounting is applied to a derivative instrument designated as hedging the exposure to changes in the fair value of an asset or a liability or a firm

commitment (hedged item) that is attributable to a particular risk. The gain or loss both on the hedging

Table of Contents

derivative instruments and on the hedged item attributable to the hedged risk is reflected in current operations.

Cash flow hedge accounting is applied to a derivative instrument designated as hedging the exposure to variability in expected future cash flows of an asset or a liability or a forecasted transaction that is attributable to a particular risk. The effective portion of gain or loss on a derivative instrument designated as a cash flow hedge is recorded as a capital adjustment and the ineffective portion is recorded in current operations. The effective portion of gain or loss recorded as a capital adjustment is reclassified to current earnings in the same period during which the hedged forecasted transaction affects earnings. If the hedged transaction results in the acquisition of an asset or the incurrence of a liability, the gain or loss in capital adjustment is added to or deducted from the asset or the liability.

i. Stock Options

The Company values stock options at fair value. The fair value of stock options is charged to stock compensation expense (included in general & administration expense) in the statement of income and credited to capital adjustments as stock option in the equity section of the balance sheet over the contract term of the services provided.

j. Accounting for Foreign Currency Transactions and Translation

The Company maintains its accounts in Korean won. Transactions in foreign currencies are recorded in Korean won based on the prevailing rate of exchange on the transaction date. The Korean won equivalent of monetary assets and liabilities denominated in foreign currencies are translated in these financial statements based on the Base Rate announced by Seoul Money Brokerage Services, Ltd. ((Won)1,197.8 and (Won)1,200.4 to \$1.00 at December 31, 2003 and 2002, respectively) or cross rates as of the balance sheet dates. Translation gains and losses on foreign currency denominated assets and liabilities are credited or charged to current operations.

k. Income tax expense and deferred tax asset (liability)

Income tax expense consists of the amount currently payable and changes during the year in deferred income tax assets and liabilities. However, deferred income tax assets are recognized only if the future tax benefits from deductible temporary differences and tax loss carry forwards are reasonably expected to be realizable. The difference between the amount currently payable for the year and income tax expense is accounted for as deferred income tax assets or liabilities and is to be offset against deferred income tax liabilities or assets in future periods.

l. Earnings Per Common Share

Basic ordinary income per common share and basic net income per common share are computed by dividing the ordinary income (after deducting the tax effect) and net income, respectively, by the weighted average number of common shares outstanding during the year.

Table of Contents

Diluted ordinary income per common share and diluted net income per common share are computed by dividing the diluted ordinary income and diluted net income by the sum of the weighted average number of common shares and the number of dilutive potential common shares from dilutive securities. Diluted securities were assumed to be exercised or converted at the start of this fiscal year except for the securities, which were issued during this fiscal year.

m. SKAS No. 9 - Convertible Securities

KASB issued SKAS No. 9 - Convertible Securities , which revised the accounting and reporting for convertible securities. The statement requires recognizing the value of conversion rights when convertible bonds are issued. SKAS No. 9 is effective for the fiscal year beginning after December 31, 2002. Accordingly, the Company recognized the consideration for conversion rights by computing issuance price of the convertible bonds less the market price of straight bonds as of the issuance date of the convertible bonds. The consideration for conversion rights is recorded on other capital surplus when the bonds are issued and it will be credited to additional paid-in capital if the right is exercised. Reconciliation for conversion rights is presented as a deduction from the bonds and the redemption premium, if any, is added to the debentures. However, in accordance with SKAS No. 9, the convertible bonds issued before December 31, 2002 are reported in accordance with the previous accounting standards for convertible bonds.

n. Reclassification of the prior year balance sheet

The balance sheet as of December 31, 2002, which is presented for comparative purposes, are restated to reflect the accounting policy change that accrued interest receivables are recorded in other assets. As a result, (Won)3,835 million (US\$3,202 thousand) of accrued interest receivables are reclassified from loans to other assets without influences on net assets as of December 31, 2003 of the Company.

Table of Contents**14. STOCK OPTIONS**

- (1) On December 4, 2002, the Company granted stock options to 62 directors of the Company and its subsidiaries. The exercise price of 60 percent of the total number of stock options granted will be determined depending on the Korean banking industry stock index (at minimum (Won)6,800 per share). In addition, for the remaining 40 percent of the total number of stock options granted, of which the exercise price is (Won)6,800 per share, the number of stock options to be vested will be dependent on the Company's management performance target levels; non-performing loans ratio, capital adequacy ratio and net income to total asset ratio by 15%, 15%, and 10%, respectively. The stock options are exercisable during a three-year period beginning after three years from the grant date. If the stock options are exercised, the Company has the option either to issue new shares or shares held as treasury stock, or to pay the difference between the market price and the exercise price in cash or with treasury stock.
- (2) The stock options (210,000 shares) given to 8 directors of its subsidiaries, who subsequently retired, were cancelled by the decision of the Company's committee on December 11, 2003.

The Company made a resolution to increase its investment in WCC by purchasing new common stocks of WCC, amounting to (Won)800 billion (US\$667.9 million) for the purpose of maintaining capital adequacy of Woori Bank following the merger with WCC. The capital increase is scheduled to take place before the date of merger of WCC into Woori Bank.

c. Swap of loans receivables from LG Card for LG Card's common stock

On February 13, 2004, Woori Bank, a subsidiary of the Company, obtained 17,620,000 shares of LG Card's common stock for (Won)88.1 billion (US\$73.6 million) by exchanging its loans receivables, in accordance with an agreement reached among the creditors of LG Card. In addition, Woori Bank plans to provide new credit facility to LG Card and to further exchange its debt with stock of LG Card.

30. ECONOMIC UNCERTAINTIES

The economic environment in the Republic of Korea continues to be volatile. In addition, the Korean government and the private sector continue to implement structural reforms to historical business practices, including corporate governance. The Company may be either directly or indirectly affected by these economic conditions and the reform program described above. The accompanying financial statements reflect management's assessment of the impact to date of the economic environment on the financial position and results of operations of the Company. Actual results may differ materially from management's current assessment.

Independent Auditors Report

To the Board of Directors and Shareholders of

Woori Finance Holdings Co., Ltd.

We have audited the accompanying consolidated balance sheets of Woori Finance Holdings Co., Ltd. (the Company) and its subsidiaries as of December 31, 2003 and 2002, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the years then ended (all expressed in Korean won). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company and its subsidiaries as of December 31, 2003 and 2002, and the results of their operations and their cash flows for the years then ended, in conformity with financial accounting standards generally accepted in the Republic of Korea.

Our audits also comprehended the translation of the Korean won amounts into U.S. dollar amounts and in our opinion, such translation has been made in conformity with the basis stated in Note 2 to the accompanying consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers outside of Korea.

Table of Contents

Without qualifying our opinion, we draw attention to the following:

As explained in Note 1 to the accompanying consolidated financial statements, Woori Finance Holdings Co., Ltd. registered its securities with the Securities and Exchange Commission in the United State of America and listed its American Depositary Shares on the New York Stock Exchange on September 29, 2003.

As explained in Note 1 to the accompanying consolidated financial statements, the Company purchased 40 million shares of Woori Credit Card Co., Ltd. (WCC), a subsidiary of the Company, for (Won)200 billion (US\$166.9 million) on March 27, 2003 and 128 million shares for (Won)640 billion (US\$534.3 million) on September 30, 2003. However, WCC cancelled 380 million shares amounting to (Won)1,900 billion (US\$1,586.2 million) on December 22, 2003, in a capital reduction without compensation. As a result, the number of issued common stock and capital of WCC decreased to 22,600,000 shares and (Won)113 billion (US\$94.3 million), respectively, as of December 31, 2003.

As explained in Note 30 to the accompanying consolidated financial statements, Woori Bank has loan receivables from and payment guarantees for SK Networks Co., Ltd. (formerly known as SK Global) and its overseas subsidiaries (collectively referred to as SK Networks) in the total amount of (Won)177 billion (US\$147.7 million) and available-for-sale securities in the total amount of (Won)89 billion (US\$74.3 million) ((Won)47 billion of common stock and (Won) 43 billion of preferred stock). In connection therewith, Woori Bank provided (Won)106 billion (US\$88.5 million) as allowances for credit losses as of December 31, 2003. However, SK Networks is currently undergoing a corporate restructuring and depending on the result of this restructuring, Woori Bank s actual loss on SK Networks credit may differ from the current estimate.

As explained in Note 31 to the accompanying consolidated financial statements, Woori Bank, Kyongnam Bank and Kwangju Bank, subsidiaries of the Company, have loan receivables from LG Card Co., Ltd. (LG Card) in the total amount of (Won)279 billion (US\$232.9 million) as of December 31, 2003. In connection therewith, the banks provided (Won)80 billion (US\$66.8 million) as allowances for credit losses. In addition, those banks have corporate bonds of (Won)200 billion (US\$167.0 million) and asset backed securities of (Won)100 billion (US\$83.5 million) issued by LG Card and beneficiary certificates of (Won)22 billion (US\$18.4 million) relating to LG Card. The banks recognized losses on valuation of trading securities of (Won)34 billion (US\$28.4 million), losses on impairment of available-for-sale securities of (Won)43 billion (US\$35.9 million), and losses on impairment of held-to-maturity securities of (Won)11 billion (US\$9.2 million) for the year ended December 31, 2003. With relation to Commercial Paper (CP) in trust accounts, for which repayment of principal or interest is guaranteed by the banks, in the total amount of (Won)145 billion (US\$121.1 million), the banks charged (Won)63 billion (US\$52.6 million) in losses on trust management. However, LG Card is currently undergoing a corporate restructuring and depending on the result of this restructuring, the Company s bank subsidiaries actual losses on LG Card credit may differ from the current estimate.

As explained in Note 33 to the accompanying consolidated financial statements, Woori Bank merged with Woori Investment Bank (WIB), a subsidiary of the Company, on July 31, 2003 pursuant to a merger agreement dated June 25, 2003. As a result, Woori Bank took over substantially all of the assets and liabilities of WIB by exchanging one common share of WIB for 0.0355 share of Woori Bank.

Table of Contents

Accordingly, the number of issued common shares of Woori Bank increased from 553 million to 571 million and contributed capital of Woori Bank increased from (Won)2,764.4 billion (US\$2,307.9 million) to (Won)2,852.8 billion (US\$2,381.7 million).

As explained in Note 34 to the accompanying consolidated financial statements, on February 5, 2004, WCC, a subsidiary of the Company, made a resolution to split off a part of its credit card business, which was previously purchased from Kwangju Bank, and to transfer back such part to Kwangju Bank. In addition, WCC resolved to transfer all other assets and liabilities including credit card subscriber base to Woori Bank and entered into a merger agreement (the Merger Agreement) with Woori Bank. The transfers to Kwangju Bank and Woori Bank are scheduled to take place on March 29, 2004 and March 31, 2004, respectively. According to the Merger Agreement, one common share of Woori Bank will be issued for 0.3581 common share of WCC and as a result, the number of issued common shares of Woori Bank will increase from 571 million to 636 million and contributed capital of Woori Bank will increase from (Won)2,852.8 billion (US\$2,381.7 million) to (Won)3,179.8 billion (US\$2,654.7 million). There will be no newly issued common shares of Kwangju Bank for the transfer of WCC's credit card business back to Kwangju Bank.

As explained in Note 34 to the accompanying consolidated financial statements, the Company made a resolution on February 11, 2004 to increase its investment in WCC by purchasing new common stocks of WCC, amounting to (Won)800 billion (US\$667.9 million) for the purpose of maintaining capital adequacy of Woori Bank following the merger with WCC. The capital increase is scheduled to take place before the date of the planned merger (March 31, 2004) of WCC into Woori Bank.

Accounting principles and auditing standards and their application in practice vary among countries. The accompanying consolidated financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying financial statements are for use by those knowledgeable about Korean accounting procedures and auditing standards and their application in practice.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**Basis of Consolidated Financial Statement Presentation**

The Company and its subsidiaries maintains its official accounting records in Korean won and prepares statutory consolidated financial statements in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company and its subsidiaries that conform with the accounting principles generally accepted in the Republic of Korea may not conform with accounting principles generally accepted in other countries. Accordingly, the accompanying consolidated financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying consolidated financial statements have been restructured and translated into English from the Korean language financial statements.

The US dollar amounts presented in these financial statements were computed by translating Korean won into US dollars at the rate of (Won)1,197.80 to US\$1.00, the Base Rate announced by Seoul Money Brokerage Service, Ltd at December 31, 2003, solely for the convenience of the reader. This convenience translation into US dollars should not be construed as representations that the Korean won amounts have been, could have been, or could in the future be, converted at this or any other rate of exchange.

Table of Contents

The significant accounting policies followed in preparing the accompanying consolidated financial statements are summarized below.

(1) Accounting for consolidation

a. Investment and equity account elimination and inter-company transaction elimination

The Company's investments in subsidiaries and equity accounts of subsidiaries were eliminated as of the date the Company obtained control of the subsidiaries. The differences between acquisition costs and net assets acquired are recorded either in goodwill or negative goodwill amortized using the straight-line method over its estimated economic useful life. If additional shares are purchased after control of the subsidiaries having been obtained, the differences between acquisition costs and net assets acquired are credited or charged to consolidated capital surplus. If the acquisition date is not the year-end balance sheet date of subsidiaries, the nearest accounting closing date to the actual acquisition date is regarded as the acquisition date. All significant inter-company transactions are eliminated in the consolidated financial statements.

b. Overseas consolidated subsidiaries' financial statements' conversion rate

The Korean won amounts presented in the financial statements of the overseas consolidated subsidiaries were computed by translating US dollar into Korean won based on the Base rate (\$1.00 to (Won)1,197.80 and (Won)1,200.40 at December 31, 2003 and 2002, respectively) published by Seoul Money Brokerage Service, Ltd. and cross rates.

c. The equity method of accounting

For investments in affiliates accounted for using the equity method of accounting, the difference between acquisition costs and net assets acquired at the acquisition date is added to or deducted from the carrying amount of investments and is being amortized using a straight-line method over five years. Changes in the Company and its subsidiaries' portion of net assets of affiliates accounted for using the equity method of accounting are added to or deducted from the carrying amount of investments. The increases or decreases in amount of investments resulting from changes in net income of the affiliates are added to or deducted from consolidated net income, changes in retained earnings of the affiliates are reflected in the consolidated retained earnings and the increases or decreases resulting from changes in capital surplus or capital adjustment of the affiliates are added to or deducted from consolidated capital surplus or consolidated capital adjustment, respectively.

d. Date of the consolidated financial statements

The accompanying consolidated financial statements are stated as of December 31, 2003 and 2002, the balance sheets date of the Company. In case the balance sheet dates of affiliates differ from the Company's, the Company used the balance sheets of affiliates as of December 31, 2003 and 2002 and the related consolidated statements of income for the year ended December 31, 2003 and 2002.

Table of Contents

e. Minority interests

Minority interests of consolidated subsidiaries gain or loss net are deducted from or added to consolidated net income.

(2) Securities (excluding investment securities accounted for using the equity method of accounting)

Debt and equity securities are initially stated at their acquisition costs (fair value of considerations paid) including incidental cost incurred in connection with acquisition of the related securities using the moving average method and divided into trading, available-for-sale, or held-to-maturity securities, based on their intent with respect to those securities. The Company and its subsidiaries classify securities as trading securities when those securities are held principally for the purpose of selling them in the near term. Debt securities, when the Company and its subsidiaries have the positive intent to hold such securities to maturity and the ability to do so, are classified as held-to-maturity securities. All other securities are classified as available-for-sales securities.

The following details the Company's accounting for securities, except for the equity securities accounted for using the equity method of accounting:

a. Trading securities

Trading securities are stated at fair value with gains or losses on valuation charged to current operations.

b. Available-for-sale securities

Securities classified as available-for-sale are stated at fair value. Unrealized gains or losses on valuation of available-for-sale securities are included in capital adjustments and the accumulated unrealized gains or losses are reflected to net income when the securities are sold or written down. Equity securities without readily determinable fair value can be stated at acquisition cost on the financial statement if the fair value of the securities is not credibly determinable.

The declines in the fair value (or recoverable value) of individual available-for-sale securities below their acquisition or amortized cost that are other than temporary, result in write-downs of the individual securities to their fair value. Factors in determining whether such declines in value are other than temporary are considered on each balance sheet date. The Company and its subsidiaries recognize the write-downs, estimating the recoverable value of individual available-for-sale securities unless there is a clear evidence to indicate that such write-downs are not deemed necessary. The related write-downs are recorded in current operations as loss on impairment of available-for-sale securities.

c. Held-to-maturity securities

Held-to-maturity securities are presented at acquisition cost after premiums or discounts for debt securities are amortized or accreted, respectively. The Company and its subsidiaries recognize write-downs resulting from the declines in the fair value, which is computed by discounting expected cash flows (recoverable cash flows) using the effective interest rate on the acquisition date, below their

Table of Contents

book value on balance sheet date and states those securities at the fair value. The related write-downs are recorded in current operations as loss on impairment of securities held-to-maturity.

d. Reversal of loss on impairment of available-for-sale and held-to-maturity securities

For available-for-sale securities, the reversal is recorded in current operations up to the previously recognized impairment loss as a reversal of loss on impairment of available-for-sale securities, and any excess is included in capital adjustment as a gain on valuation of available-for-sale securities. However, if the increases in the fair value of the impaired securities are not regarded as a reversal of the impairment, the increases in the fair value are recorded on capital adjustments. For equity securities without readily determinable fair value, which were impaired based on the net asset value, the reversal is recorded up to their acquisition cost. For held-to-maturity securities, the reversal is recorded in current operations up to the amount previously recognized impairment loss as a reversal of loss on impairment of held-to-maturity securities.

e. Reclassification of securities

If the objective and ability to hold securities of the Company and its subsidiaries change, available-for-sale securities can be reclassified to held-to-maturity securities and held-to-maturity securities can be reclassified to available-for-sale securities. Whereas, if the Company and its subsidiaries sell held-to-maturity securities, exercise a right to prepay, or reclassify held-to-maturity securities to available-for-sale securities within the three fiscal years, all debt securities that are owned or purchased cannot be classified as held-to-maturity securities. On the other hand, trading securities cannot be reclassified to available-for-sale securities or held-to-maturity securities and securities in the other categories cannot be reclassified to trading securities. Nevertheless, trading securities can be reclassified to available-for-sale securities only when the fair value of the trading securities cannot be readily determinable.

When held-to-maturity securities are reclassified to available-for-sale securities, those securities are stated at the fair value on the reclassification date and the difference between the fair value and book value are recorded in capital adjustment as gains or losses on valuation of available-for-sale securities. For available-for-sale securities reclassified to held-to-maturity securities, gains or losses on valuation of available-for-sale securities, which had been accumulated until the reclassification, continue to be stated on capital adjustment and will be amortized using the effective interest method and be charged to interest income by maturity. The difference between the fair value on the reclassification date and the face value of the securities reclassified to held-to-maturity securities is amortized using the effective interest method and charged to interest income. In case the fair value of trading securities cannot be readily determinable, the securities are reclassified to available-for-sale securities at the latest fair value.

f. The effect of accounting change for adoption of Statements of Korea Accounting Statements (SKAS) No. 8

SKAS No. 8 Securities that revised the accounting and reporting for securities, is effective for the fiscal year beginning after December 31, 2002. The Company and its subsidiaries adopted SKAS No. 8 on January 1, 2003 and applied it retroactively, reclassifying the accounts relating to securities in the

Table of Contents

consolidated financial statements as of December 31, 2002, which are presented for comparative purposes in the accompanying consolidated financial statements. Such reclassification did not have an effect on the total assets, retained earnings, or net income in the consolidated financial statements as of and for the year ended December 31, 2002.

Up until the prior fiscal year, increases in fair values of impaired available-for-sale securities that were not objectively regarded as a reversal of impairment loss event were not accounted for as a capital adjustment. However, as explained above, since SKAS No. 8 was newly adopted in 2003, the increases in the fair value of the impaired available-for-sales securities are recorded as capital adjustments as gains on valuation of available-for-sales securities. As a result, (Won)220 billion (US\$184 million) of gain on valuation of available-for-sale securities relating to securitization subordinated bonds was recorded as capital adjustment as of December 31, 2003. In addition, the Company and its subsidiaries recorded (Won)14 billion (US\$12 million) of gains on valuation of the Stock Market Stabilization Fund as capital adjustment as of December 31, 2003.

(3) Convertible securities

SKAS No. 9 - Convertible Securities revises the accounting and reporting for convertible securities. The statement requires the recognition of the value of conversion rights when convertible bonds are issued. SKAS No. 9 is effective for the fiscal year beginning after December 31, 2002. Accordingly, the Company and its subsidiaries recognized the consideration for conversion rights by computing the issuance price of the convertible bonds less the market price of straight bonds as of the issuance date of the convertible bonds. The consideration for conversion rights is recorded in other capital surplus when the bonds are issued and it will be credited to additional paid-in capital if the right is exercised. Reconciliation for conversion rights is presented as a deduction from the bonds and the redemption premium, if any, is added to the debentures. In accordance with SKAS No. 9, the convertible bonds issued before December 31, 2002 are reported in accordance with the previous accounting standards for convertible bonds.

(4) Interest income recognition

The Company and its subsidiaries recognize interest income on loans on the accrual basis, except for interest income on loans having overdue interest and principal, and loans to customers who are bankrupt. When a loan is reclassified as a non-interest-accrued loan, accrued interest income recorded in prior periods is reversed and future interest income is recognized on a cash basis.

(5) Allowance for possible losses on credits

The Company and its subsidiaries classify corporate credits, including loans and confirmed acceptances and guarantees based on the borrowers capacity to repay in consideration of the borrowers business operations, financial position and future cash flows, past due period and status of any bankruptcy proceedings. Credits to small companies and to households, however, are classified by past due period and status of bankruptcy proceedings and not by evaluating the debt repayment capability of a borrower or customer. The Company and its subsidiaries classify all credits to a single borrower in the same category of classification, but credits guaranteed or credits collateralized by bank deposits, real estate

Table of Contents

and other assets may be classified differently based on the borrowers' guarantor's capability to service such guarantee or based on the value of collateral securing such credits.

The classification of the loans and the minimum percentages of allowances for possible loan losses by types of loans applied by the Company and its subsidiaries as of December 31, 2003 are as follows:

Class	Classification	Loans to corporate	Loans to households	Credit card accounts
1 ~ 6	Normal	Not less than 0.5%	Not less than 0.75%	Not less than 1%
7	Precautionary	Not less than 2%	Not less than 8%	Not less than 12%
8	Substandard	Not less than 20%	Not less than 20%	Not less than 20%

Confirmed acceptances and guarantees are classified, as of the balance sheet date, using the same criteria as for loan classification. The allowance for possible losses on confirmed acceptances and guarantees is presented in other liabilities.

The Company and its subsidiaries classify loans and confirmed acceptances and guarantees extended to borrowers under workout and court receivership and mediation, financial institutions, and the top 50 percent of borrowers based on more detailed classification criteria than provided by the five categories above. An allowance for possible losses on those credits is calculated on the balances using 0.5 to 100 percent allowance rates and the resulting effect is charged to current operations.

(6) Restructuring of loans

A loan, whose contractual terms are modified in a troubled debt restructuring due to mutual agreements such as commencement of reorganization, court mediation and workout plans, is accounted for at the present value of expected future cash flows, if the book value of the loan differs from the present value. The difference between book value and present value is offset against the allowance for possible loan losses and any remaining amounts are charged to operations as bad debt expense. The difference between the book value of a loan and its present value is recorded as present value discount, which is presented as a deduction from the loan. The present value discount is amortized over the remaining maturity using the effective interest rate method, and the amortization amount is recorded as interest income.

(7) Disposition of loans

As loans are sold, which are evaluated by an independent appraiser, the losses or gains on disposition of the loans are charged to the allowance for possible losses on the loans.

Table of Contents

(8) Valuation of receivables and payables at present value

Receivables and payables incurred through long-term installment transactions, long-term borrowing and lending transactions and other similar transactions are stated at present value of expected future cash flows with the gain or loss on disposition of related receivables and payables reflected in current operations, unless the difference between nominal value and present value is immaterial. Present value discount or premium is amortized using the effective interest rate method with the amortization recorded as interest income or interest expense.

(9) Tangible assets and depreciation

Tangible assets included in fixed assets are recorded at acquisition cost, except for assets revalued upward in accordance with the Asset Revaluation Law. Routine maintenance and repairs are expensed as incurred. Expenditures that result in enhancement of the value or extension of the useful lives of the facilities involved are capitalized as additions to tangible assets.

Depreciation is computed using the declining balance method or straight-line method based on the estimated useful lives of the assets.

(10) Intangible assets and amortization

Intangible assets included in fixed assets are recorded at the production cost or acquisition cost, plus incidental expenses. Expenditures incurred in conjunction with development of new products or technology and others, in which the elements of costs can be individually identified and future economic benefits are probably expected, are capitalized as development costs under intangible assets. If the Company or its subsidiaries donate assets such as buildings to the national government or to the local government and is given a right to use or benefit from the assets, the donated assets are recorded as beneficial donated assets under intangible assets. Intangible assets are amortized using the straight-line method over the estimated useful lives or contractual benefit period.

(11) Valuation allowance for non-business use property

Non-business use property included in fixed assets is recorded when the Company acquires collateral by foreclosure. If the auction-bidding price is lower than book value, the difference is provided as a valuation allowance with the valuation loss charged to current operations.

(12) Amortization of discount (premium) on debentures

Discounts or premiums on debentures issued are accreted or amortized over the period from issuance to maturity using the effective interest rate method. Accretion or amortization of discounts or premiums are recognized as interest expense or interest income on the debentures.

Table of Contents

(13) Recognition of asset impairment

When the book value of assets (except for trading securities, investment securities and assets valued at present value) exceeds the recoverable value of the assets due to obsolescence, physical damage or a sharp decrease in market value and the difference is material, those assets are adjusted to recoverable value in the balance sheet with the resulting impairment loss charged to current operations. If the recoverable value of assets increases in subsequent years, the increase in value is credited to operations as a gain until the recoverable value equals the book value of the assets before the impairment loss was recognized.

(14) Accrued severance benefits

Employees and directors with more than one year of service are entitled to receive a lump-sum payment upon termination of their service with the Company and its subsidiaries. The accrued severance benefits that would be payable assuming all eligible employees and directors were to terminate as of December 31, 2003 and 2002 amount to (Won)219,672 million (US\$183,396 thousand) and (Won)133,996 million (US\$111,868 thousand), respectively.

(15) Bonds under resale or repurchase agreements

Bonds purchased under resale agreements are recorded as loans and bonds sold under repurchase agreements are recorded as borrowings when the Company's subsidiaries purchase or sell securities under resale or repurchase agreements.

(16) Accounting for derivative instruments

Derivative instruments are classified as either trading or hedging depending on their transaction purpose. Derivative instruments are accounted for at fair value with the valuation gain or loss recorded as assets or liabilities. The accounting for derivative transactions that are part of a qualified hedge, which is determined based both on the purpose of the transaction and on meeting the specified criteria for hedge accounting, differs depending on whether the transaction is a fair value hedge or a cash flow hedge. Fair value hedge accounting is applied to a derivative instrument designated as hedging the exposure to changes in the fair value of an asset or a liability or a firm commitment (hedged item) that is attributable to a particular risk. The gain or loss both on the hedging derivative instruments and on the hedged item attributable to the hedged risk is reflected in current operations. Cash flow hedge accounting is applied to a derivative instrument designated as hedging the exposure to variability in expected future cash flows of an asset or a liability or a forecasted transaction that is attributable to a particular risk. The effective portion of gain or loss on a derivative instrument designated as a cash flow hedge is recorded as a capital adjustment and the ineffective portion is recorded in current operations. The effective portion of gain or loss recorded as a capital adjustment is reclassified to current earnings in the same period during which the hedged forecasted transaction affects earnings. If the hedged transaction results in the acquisition of an asset or the incurrence of a liability, the gain or loss in capital adjustment is added to or deducted from the asset or the liability.

(17) Income tax expense

Income tax expense is the amount currently payable and changes during for the year in deferred income tax assets and liabilities. However, deferred income tax assets are recognized only if the future tax benefits from accumulated temporary differences and tax loss carry forwards are realizable. The difference between the amount currently payable for the period and income tax expense is accounted for as deferred income tax assets or liabilities and offset against income tax assets and liabilities in future periods. The deferred income tax assets and liabilities from the individual financial statements of consolidated subsidiaries are not netted against each other in the accompanying consolidated balance sheets.

(18) Accounting for foreign currency translation

The Korean won equivalent of assets and liabilities denominated in foreign currencies are translated in these consolidated financial statements based on Base Rate announced by Seoul Money Brokerage Service Ltd. ((Won)1,197.80 and (Won)1,200.40 to \$1.00 at December 31, 2003 and 2002, respectively) or cross rates as of the balance sheets date. Translation gains and losses on foreign currencies denominated assets and liabilities are credited or charged to operations.

(19) Stock options

The Company and its subsidiaries value the stock options at fair value. The fair value of stock options is charged to salary expense (included in administration expense) in the consolidated statement of income and credited as stock option (included in capital adjustment) in the consolidated balance sheet over the contract term of the services provided.

(20) Earnings per common share

Basic ordinary income per common share and basic net income per common share are computed by dividing the ordinary income (after deducting the tax effect) and net income, respectively, by the weighted average number of common shares outstanding during the year.

Diluted ordinary income per common share and diluted net income per common share are computed by dividing the diluted ordinary income and diluted net income by the sum of the weighted average number of common shares and the number of dilutive potential common shares from dilutive securities. Diluted securities were assumed to exercise or converted at the start of this fiscal year except for the securities, which were issued during this fiscal year.

(21) Adoption of SKAS

Korea Accounting Standards Board (KASB) has issued SKASs that replaced existing Korean Financial Accounting Standards (KFAS) in order to enhance the global convergence of existing accounting standards and usefulness of accounting information. Accordingly, the Company has adopted SKASs in 2003, except that the Company early adopted SKAS No. 6 - Subsequent Events in 2002.

Table of Contents**19. STOCK OPTIONS**

- (1) On December 4, 2002, the Company granted stock options to 62 directors of the Company and its subsidiaries. The exercise price of 60 percent of the total number of stock options granted will be determined depending on the Korean banking industry stock index (at minimum (Won)6,800 per share). In addition, for the remaining 40 percent of the total number of stock options granted, of which the exercise price is (Won)6,800 per share, the number of stock options to be vested will be dependent on the Company's management performance target levels; non-performing loans ratio, capital adequacy ratio and net income to total asset ratio by 15%, 15%, and 10%, respectively. The stock options are exercisable during a three-year period beginning after three years from the grant date. If the stock options are exercised, the Company has the option either to issue new shares or shares held as treasury stock, or to pay the difference between the market price and the exercise price in cash or with treasury stock.
- (2) The stock options (210,000 shares) given to 8 directors of its subsidiaries, who subsequently retired, were cancelled by the decision of the board of directors of the Company on December 11, 2003.
