Note 1. Organization and Significant Accounting Policies

Salomon Brothers Emerging Markets Floating Rate Fund Inc. (Fund), was incorporated in Maryland on January 21, 1994 and is registered as a non-diversified, closed-end, management investment company under the Investment Company Act of 1940, as amended.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Investment Valuation. In valuing the Fund's assets, all securities for which market quotations are readily available are valued (i) at the last sale price prior to the time of determination if there were a sale on the date of determination, (ii) at the mean between the last current bid and asked prices if there were no sales price on such date and bid and asked quotations are available, and (iii) at the bid price if there were no sales price on such date and only bid quotations are available. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market, and are valued at the mean between the last current bid and asked price at the close of business of that market. However, when the spread between bid and asked price exceeds five percent of the par value of the security, the security is valued at the bid price. Securities may also be valued by independent pricing services which use prices provided by market-makers or estimates of market values obtained from yield data relating to instruments or securities with similar characteristics. Securities for which reliable quotations are not readily available and all other securities and assets are valued at fair value as determined in good faith by, or under procedures established by, the Board of Directors. When market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the Fund calculates its net asset value, the Fund may value these investments at fair value as determined in accordance with the procedures approved by the Fund's Board of Directors. Short-term investments having a maturity of 60 days or less are valued at amortized cost which approximates value.

(b) Interest Rate Swaps. In order to manage interest rate sensitivity (duration), the Fund has entered into an interest rate swap agreement with JPMorgan Chase Bank (counterparty) pursuant to which, the Fund has guaranteed to make semi-annual payments to the counterparty at predetermined fixed rates, in exchange for floating payments from the counterparty at the 6-month LIBOR, based on notional principal amount. During the term of the outstanding swap agreement, changes in the underlying value of the swap are recorded as unrealized gains or losses. Net periodic interest payments to be received or paid are accrued daily and recorded in the Statement of Operations as an adjustment to realized gain or loss.

(c) Loan Participations. The Fund invests in fixed and floating rate loans arranged through private negotiations between a foreign sovereign entity and one or more financial institutions. The Fund's investment in such loans are in the form of participations in the loans. In connection with purchasing loan participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund will assume the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency

Notes to the Schedule of Investments (unaudited) (continued)

of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. The Fund may have difficulty disposing of participations because the market for such instruments is not highly liquid.

(d) Credit and Market Risk. The yields of emerging market debt obligations reflect, among other things, perceived credit risk. The Fund's investment in securities rated below investment grade typically involves risks not associated with higher rated securities including, among others, overall greater risk of timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund. The Fund's investment in non-dollar-denominated securities may also result in foreign currency losses caused by devaluations and exchange rate fluctuations.

(e) Investment Transactions and Investment Income. Investment transactions are recorded on the trade date.

Note 2. Investments

At November 30, 2004, the aggregate gross unrealized appreciation and depreciation of investments for Federal income tax purposes were as follows:

Gross unrealized appreciation	\$ 5,397,176
Gross unrealized depreciation	(148,479)
	<hr/>
Net unrealized appreciation	\$ 5,248,697
	<hr/>

At November 30, 2004, the Fund had outstanding the following interest rate swap agreement:

Swap Counterparty:	J.P. Morgan Chase Bank
Effective Date:	12/28/00
Notional Amount:	\$16,000,000
Payments Made by the Fund:	Fixed Rate 6.13%
Payments Received by the Fund:	Floating Rate (6-month LIBOR)
Termination Date:	12/29/10
Unrealized Depreciation as of 11/30/04:	\$(1,591,903)

Note 3. Loan

At November 30, 2004, the Fund had a \$200,000,000 loan available pursuant to a revolving credit and security agreement, with CXC Inc. (the Lenders) a commercial paper conduit issuer for which Citigroup North America, Inc., an affiliated of SBAM, acts as administrative agent. The loans generally bear interest at a variable rate based on the weighted average interest rates of the underlying commercial paper or LIBOR, plus any applicable margin. Securities held by the Fund are subject to a lien, granted to the lenders, to the extent of the borrowing outstanding and any additional expenses.
