**x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the quarterly period ended March 28, 2009

OR

**.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

Commission file number 1-3344

Sara Lee Corporation

(Exact name of registrant as specified in its charter)

Edgar Filing: Sara Lee Corp - Form 10-Q

Maryland
(State or other jurisdiction of
incorporation or organization)
36-2089049
(I.R.S. Employer
Identification No.)
3500 Lacey Road, Downers Grove, Illinois 60515
(Address of principal executive offices)
(Zip Code)
(630) 598-6000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of accelerated filer, large accelerated filer, smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒ Accelerated filer ☐
Non-accelerated filer ☐ Smaller reporting company ☐
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

On March 28, 2009, the Registrant had 695,630,434 outstanding shares of common stock \$.01 par value, which is the Registrant's only class of common stock.

SARA LEE CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

1. Basis of Presentation

The consolidated financial statements for the nine months ended March 28, 2009 and March 29, 2008 have not been audited by an independent registered public accounting firm, but in the opinion of Sara Lee Corporation (the corporation or the company), these financial statements include all normal and recurring adjustments necessary for a fair presentation of our financial position, operating results, and cash flows. The results of operations for the nine months ended March 28, 2009 are not necessarily indicative of the operating results to be expected for the full fiscal year. The Condensed Consolidated Balance Sheet as of June 28, 2008 has been derived from the corporation's audited financial statements included in our Annual Report on Form 10-K for the year ended June 28, 2008.

The interim consolidated financial statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Although the corporation believes the disclosures are adequate to make the information presented not misleading, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. These unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the corporation's Form 10-K for the year ended June 28, 2008 and other financial information filed with the Securities and Exchange Commission.

The corporation's fiscal year ends on the Saturday closest to June 30. The third quarter and first nine months of fiscal 2009 ended on March 28, 2009 and the third quarter and first nine months of fiscal 2008 ended on March 29, 2008. Each of these quarters was a thirteen-week period and each of the nine month periods was a thirty-nine week period. Unless otherwise stated, references to years relate to fiscal years.

During the third quarter of 2009, the corporation corrected income tax expense and certain balance sheet accounts for errors discovered during the quarter which increased third quarter net income by \$17 million. The \$17 million error consisted of a \$10 million overstatement of income tax expense in prior periods and \$7 million related to the adjustment of certain individually insignificant balance sheet amounts. The \$10 million tax error is comprised of \$13 million in charges related to an understatement of 2008 tax expense (see Note 11) offset by \$23 million in overstatement of tax expense in the first half of 2009 related to a \$29 million non-recurring tax benefit from current year foreign exchange gains (see Note 11). On a year to date basis, the total impact of the corrections decreased net income by \$8 million comprised of \$5 million of income related to the correction of individually insignificant balance sheet amounts offset by \$13 million of additional tax expense discussed above. The impact of correcting these errors in 2008 would have decreased net income by \$8 million while the impact on periods prior to 2008 would have been de minimis. We evaluated these errors taking into account both qualitative and quantitative factors and considered the impact of these errors in relation to the current period, which is when they were corrected, as well as the periods in which they originated. Management believes these errors are immaterial to both the consolidated quarterly and annual financial statements.

2. Net Income Per Share

Net income per share basic is computed by dividing income available to common stockholders by the weighted average number of shares of common stock outstanding for the period. Net income per share diluted reflects the potential dilution that could occur if options or fixed awards to be issued under stock-based compensation awards were converted into common stock. For the quarter and first nine month periods ended March 28, 2009, options to purchase 28.3 million shares of the corporation's common stock had exercise prices that were greater than the average market price of those shares during the respective reporting periods. For the quarter and first nine month periods ended March 29, 2008, options to purchase 31.4 million and 29.4 million shares, respectively, of the corporation's common stock had exercise prices that were greater than the average market price of those shares during the respective reporting periods. As a result, these shares are excluded from the earnings per share calculation as they are anti-dilutive.

Table of Contents

The average shares outstanding declined in the first nine months of 2009 as compared to the first nine months of 2008 as a result of shares repurchased under the corporation's ongoing share repurchase program. The corporation repurchases common stock at times management deems appropriate, given current market valuations. During the first nine months of 2009, the corporation repurchased 11.4 million shares of common stock. At March 28, 2009, 13.5 million shares remain authorized for repurchase under the corporation's share repurchase program. The timing and amount of future share repurchases will be based upon market conditions and other factors.

The following is a reconciliation of net income to net income per share—basic and diluted—for the third quarter and first nine months of fiscal years 2009 and 2008:

Computation of Net Income per Common Share

(In millions, except per share data)

Diluted	\$ 0.24	\$ 0.30	\$ 0.54	\$ 0.82

3. Segment Information

Beginning in fiscal 2009, the corporation implemented certain changes to its North American organizational structure that primarily involved the transfers of (i) the frozen bakery and beverage (Senseo) operations from the North American Retail Bakery segment into the North American Retail Meats segment, and (ii) a small component of the Foodservice meats operation into the North American Retail Meats segment. As a result of this reorganization, the three North American segments have been renamed as follows—North American Retail (previously named North American Retail Meats), North American Fresh Bakery (previously North American Retail Bakery) and North American Foodservice (previously Foodservice). The changes did not impact the international segments and did not have a material impact on the segment assets of the North American operations. The corporation has revised the name of the Household and Body Care segment to International Household and

Edgar Filing: Sara Lee Corp - Form 10-Q

Body Care. Segment information has been revised to be consistent with the new basis of presentation.

The corporation uses derivative financial instruments to manage its exposure to commodity prices. A commodity derivative not declared a hedge in accordance with SFAS 133, Accounting for Derivative Instruments and Hedging Activities, is accounted for under mark-to-market accounting with changes in fair value recorded in the Consolidated Statements of Income. Prior to 2009, gains and losses on unrealized commodity derivatives accounted for under mark-to-market accounting were included in segment operating income. In 2009, the corporation now includes these unrealized mark-to-market gains and losses in general corporate expenses until such time that the exposure being hedged affects the earnings of the business segment. At that time, the cumulative gain or loss previously recorded in general corporate expenses for the derivative instrument will be reclassified into the business segment's results. Segment information has been revised to be consistent with the new basis of presentation.

Table of Contents

The following is a general description of the corporation's six business segments:

North American Retail sells a variety of packaged meat and frozen bakery products to retail customers in North America and includes the corporation's U.S. *Senseo* retail coffee business.

North American Fresh Bakery sells a variety of fresh bakery products to retail customers in North America.

North American Foodservice sells a variety of meats, bakery, and beverage products to foodservice customers in North America.

International Beverage sells coffee and tea products in major markets around the world, including Europe, Australia and Brazil.

International Bakery sells a variety of bakery and dough products to retail and foodservice customers in Europe and Australia.

International Household and Body Care sells products in four primary categories body care, air care, shoe care and insecticides in markets around the world, including the U.S., Europe, India and the Asia Pacific region.

The following is a summary of net sales and operating segment income by business segment for the third quarter and first nine months of fiscal years 2009 and 2008.

(In millions)	Net Sales			
	Third Quarter 2009	Third Quarter 2008	Nine Months 2009	Nine Months 2008

Table of Contents

4. Discontinued Operations and Sold Businesses

There were no results related to discontinued operations in the third quarter or first nine months of 2009. In the third quarter of 2008, discontinued operations reported \$79 million of net sales, \$1 million of pretax income and \$1 million of net income. In the first nine months of 2008, discontinued operations reported \$238 million of net sales, \$1 million of pretax income, \$1 million of net income and \$10 million of cash from operating activities. The results of discontinued operations in 2008 were related to the retail meats business in Mexico. The corporation completed the disposition of its Mexican meat business in March 2008 and recognized a pretax loss of \$23 million and an after tax loss of \$24 million.

In December 2008, the corporation entered into a definitive agreement to sell its U.S. Direct Store Delivery (DSD) foodservice coffee business for \$45 million. The transaction closed in the third quarter of 2009 and net proceeds of \$41 million were received. The net proceeds included an adjustment for working capital. The loss on disposition of this business was less than \$1 million. The DSD operations were integrated into the corporation's other operations and shared common distribution, sales and administrative functions. Since the operations and cash flows of this business could not be clearly distinguished from the retained businesses, the operating results of the DSD business are included in continuing operations up through the date of sale.

5. Impairment Review and Goodwill

The corporation tests goodwill and intangible assets not subject to amortization for impairments in the second quarter of each fiscal year and whenever a significant event occurs or circumstances change that would more likely than not reduce the fair value of these intangible assets. As a result of the review performed in the second quarter of 2009, the corporation determined that the carrying amount of its foodservice beverage reporting unit, which is reported in the North American Foodservice segment, exceeded its fair value. The foodservice beverage reporting unit had experienced a significant decline in profitability due to a highly competitive marketplace and difficult economic conditions. Based upon our consideration of the results of an appraisal of long-lived assets and internal estimates of discounted cash flows, management compared the implied fair value of the goodwill in the reporting unit with the carrying value and concluded that a \$107 million impairment charge needed to be recognized. The impairment loss recognized equaled the entire remaining amount of goodwill in the foodservice beverage reporting unit. No tax benefit was recognized on the goodwill impairment charge. The remaining change in the goodwill balance from June 28, 2008 is due to the impact of changes in foreign currency exchange rates on foreign denominated goodwill.

The corporation has also concluded that it is reasonably likely that certain other reporting units may become impaired in future periods. The term "reasonably likely" refers to an occurrence that is more than remote but less than probable in the judgment of management. These reporting units include a bakery operation in Spain with \$119 million of goodwill and a beverage business in Poland with \$58 million of goodwill. As of the second quarter of 2009, these two reporting units had fair values that exceeded carrying value by at least 6%. However, because some of the inherent assumptions and estimates used in determining fair value of these reporting units are outside the control of management, including interest rates, the cost of capital, and tax rates, changes in these underlying assumptions and our credit rating can also adversely impact the business units' fair value. The amount of any impairment is dependent on all these factors, which cannot be predicted with certainty, and may result in impairment for a portion or all of the goodwill amounts noted previously. Holding all other assumptions constant at the test date, a 100 basis point increase in the discount rate would reduce the enterprise value for the two reporting units discussed above between 10% to 13%, indicating potential impairment for those reporting units.

The fair value of goodwill is estimated based on a discounted cash flow model using management's business plans and projections as the basis for expected future cash flows for the first ten years and a 2% residual growth rate thereafter. Management believes the assumptions used for the impairment test are consistent with those utilized by a market participant in performing similar valuations of our reporting units. A separate discount rate was utilized for each reporting unit derived from published sources, and, on a weighted average basis, the discount rate used was 8.9%.

Table of Contents

6. Exit, Disposal and Transformation/Accelerate Activities

As part of its ongoing efforts to improve its operational performance and reduce cost, the corporation initiated Project Accelerate (Accelerate) in 2009, which is a series of global initiatives designed to drive significant savings in the next three years. It is anticipated that the overall cost of the initiatives will include severance costs as well as transition costs associated with transferring services to an outside third party. An important component of Project Accelerate involves outsourcing pieces of the North American and European Finance (transaction processing) and Global Information Services (applications development and maintenance) groups as well as the company's global indirect procurement activities. In addition to cost savings, this business process outsourcing will help the corporation drive standardization, increase efficiency and provide flexibility. The corporation began implementation of the initiative in North America and Europe in the second quarter of 2009 and plans to complete global implementation within three years.

The company announced a transformation plan in February 2005 designed to improve performance and better position the company for long-term growth. The plan involved significant changes in the company's organizational structure, portfolio changes involving the disposition of a significant portion of the corporation's business, and a number of actions to improve operational efficiency. The corporation has recognized certain trailing costs related to these transformation actions, including the impact of certain activities that were completed for amounts more favorable than previously estimated.

The nature of the costs incurred under these plans includes the following:

1) Exit Activities, Asset and Business Disposition Actions These amounts primarily relate to:

Employee termination costs

Lease exit costs

Gains or losses on the disposition of assets or asset groupings that do not qualify as discontinued operations

2) Transformation/Accelerate Costs recognized in Cost of Sales and Selling, General and Administrative Expenses primarily relate to:

Expenses associated with the installation of new information systems, including the amortization of capitalized software costs

Costs to retain and relocate employees

Consulting costs

Depreciation and amortization associated with decisions to dispose of or abandon the use of certain tangible and intangible assets at dates earlier than previously anticipated, pursuant to an exit plan. This amount represents the incremental impact of the revised estimate of remaining depreciation expense in excess of the original depreciation expense.

Costs associated with the transition of services to an outside third party vendor as part of a business process outsourcing initiative Transformation/Accelerate costs are recognized in Cost of Sales or Selling, General and Administrative Expenses in the Consolidated Statements of Income as they do not qualify for treatment as an exit activity or asset and business disposition under Statement of Financial Accounting Standards No. 146, Accounting for Costs Associated with Exit or Disposal Activities. However, management believes the disclosure of these transformation/Accelerate related charges provides the reader greater transparency to the total cost of the initiatives.

Table of Contents

The following is a summary of the (income) expense associated with new and ongoing actions, which also highlights where the costs are reflected in the Consolidated Statements of Income along with the impact on diluted EPS:

(In millions)	Quarter ended		Nine months ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Cost of sales:				
Transformation charges IT costs	\$ 1	\$ 1	\$ 4	\$ 7
Accelerated depreciation				1
Selling, general and administrative expenses:				
Transformation charges IT costs	5	8	17	30
Transformation/Accelerate charges other	5	1	7	3
Net charges for (income from):				
Exit activities	16		55	10
Asset and business dispositions		(3)	(3)	(2)
Reduction in income before income taxes	27	7	80	49
Income tax benefit	(8)	(2)	(21)	(17)
Reduction in net income	\$ 19	\$ 5	\$ 59	\$ 32
Impact on diluted EPS	\$ 0.03	\$ 0.01	\$ 0.08	\$ 0.05

The impact of these actions on the corporation's business segments and unallocated corporate expenses is summarized as follows:

(In millions)	Quarter ended		Nine months ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
North American Retail	\$	\$ (1)	\$ (1)	\$ 1
North American Fresh Bakery				
North American Foodservice	2	(1)	(2)	(1)
International Beverage	6	1	12	8
International Bakery	1		30	8
International Household and Body Care	6	3	14	6
Decrease in operating segment income	15	2	53	22
Increase in general corporate expenses	12	5	27	27
Total	\$ 27	\$ 7	\$ 80	\$ 49

The following discussion provides information concerning the exit, disposal and transformation/Accelerate activities for each year where actions were initiated and material reserves exist.

2009 Actions

During 2009, the corporation approved certain actions related to exit, disposal, transformation and Accelerate activities and recognized net charges of \$83 million related to these actions. Each of these activities is to be completed within a 12-month period after being approved and include the following:

Edgar Filing: Sara Lee Corp - Form 10-Q

Recognized a charge to implement a plan to terminate 570 employees, related to both European and North American operations, and provide them with severance benefits in accordance with benefit plans previously communicated to the affected employee group or with local employment laws. Of the 570 targeted employees, 546 employees have not yet been terminated, but are expected to be terminated within the next 12 months.

Recognized a net gain associated with the disposal of the sauces and dressings business in the North American Foodservice segment.

Recognized costs related to the implementation of common information systems across the organization in order to improve operational efficiencies. These costs primarily relate to the amortization of certain capitalized software costs.

Recognized costs associated with the transition of services to an outside third party vendor as part of a business process outsourcing initiative.

Table of Contents

The following table summarizes the net charges taken for the exit, disposal and transformation/Accelerate activities approved during 2009 and the related status as of March 28, 2009. The accrued amounts remaining represent those cash expenditures necessary to satisfy remaining obligations. The majority of the cash payments to satisfy the accrued costs are expected to be paid in the next year. The composition of these charges and the remaining accruals are summarized below. Approximately \$10 million of additional charges are expected to be recognized in the remainder of 2009.

(In millions)	Employee termination and other benefits	Asset and business disposition actions	Transformation/ accelerate costs IT and other	Total
Exit, disposal and other costs (income) recognized during 2009	\$ 58	\$ (3)	\$ 28	\$ 83
Asset and business disposition gains		3		3
Non-cash charges			(16)	(16)
Cash payments	(13)		(11)	(24)
Foreign exchange impacts	(1)			(1)
Accrued costs as of March 28, 2009	\$ 44	\$	\$ 1	\$ 45

2008 Actions

During 2008, the corporation approved certain actions related to exit, disposal and transformation activities and recognized cumulative net charges of \$90 million related to these actions. Each of these activities is to be completed within a 12-month period after being approved and included the following:

Implemented a plan to terminate 591 employees, primarily from the North American operations, and provide them with severance benefits in accordance with benefit plans previously communicated to the affected employee group or with local employment laws. Of the 591 targeted employees, 94 employees have not yet been terminated, but are expected to be terminated before the end of fiscal 2009.

Incurred costs to exit certain leased space, including the exit of a North American R&D facility.

Recognized net gains associated with the disposal of several asset groupings, the largest of which was a \$3 million gain related to the disposition of a North American Foodservice manufacturing facility. Total proceeds from these disposals were \$9 million.

Recognized costs related to the implementation of common information systems across the organization in order to improve operational efficiencies. These costs primarily relate to the amortization of certain capitalized software.

Significant actions completed during the first nine months of 2009 and the status of the remaining elements of the 2008 actions, along with the remaining accruals, is described below. The accrued amounts remaining represent those cash expenditures necessary to satisfy remaining obligations. The majority of the cash payments to satisfy the accrued costs are expected to be paid in the next year. The corporation does not anticipate any additional material future charges related to the 2008 actions.

(In millions)	Employee termination and other benefits	Non-cancelable lease and other contractual obligations	Transformation costs IT and other	Total
---------------	--	--	--	-------

Edgar Filing: Sara Lee Corp - Form 10-Q

Accrued costs as of June 28, 2008	\$	29	\$	3	\$	2	\$	34
Cash payments		(13)				(2)		(15)
Accrued costs as of March 28, 2009	\$	16	\$	3	\$		\$	19

2007 Actions

During 2007, the corporation approved certain actions related to exit, disposal and transformation activities and recognized cumulative net charges of \$251 million related to these actions. Each of these activities was to be completed within a 12-month period after being approved and included the following:

Implemented a plan to terminate 2,512 employees and provide them with severance benefits in accordance with benefit plans previously communicated to the affected employee group or with local employment laws. The employees were concentrated primarily in our North American Retail, North American Fresh Bakery, North American Foodservice, International Beverage and International Bakery segments. All of these employees have been terminated.

Table of Contents

Incurring costs to exit certain leased space and other contractual obligations, including those costs related to the relocation of the corporation's headquarters to Downers Grove, Illinois.

Recognized a loss related to the decision to abandon certain capitalized software in the International Beverage segment.

Recognized net gains associated with the disposal of several asset groupings, the largest of which was a net \$19 million gain related to the disposition of two International Household and Body Care facilities, offset by charges related to various disposition costs primarily associated with the spin off of the Branded Apparel business. Total proceeds from these disposals were \$31 million.

Recognized depreciation primarily on domestic meat processing facilities and equipment. All of the facilities were closed by the end of 2007.

Incurring transformation costs as a result of management's decision to centralize the management of its North American and European operations. Costs were incurred to relocate employees, recruit new employees, and pay retention bonuses to preserve business continuity. The corporation also incurred consulting costs to assist in the development of strategic operating and financial plans and employee training. Certain information technology costs were also incurred and related to the implementation of common information systems across the organization.

Activity during the first nine months of 2009 and the status of the remaining elements of the 2007 actions, along with the remaining accruals, is described below. The accrued amounts remaining represent those cash expenditures necessary to satisfy remaining obligations. The majority of the cash payments to satisfy the accrued costs are expected to be paid in the next year. The corporation does not anticipate any additional material future charges related to the 2007 actions.

(In millions)	Employee termination and other benefits	Non-cancelable lease and other contractual obligations	Total
Accrued costs as of June 28, 2008	\$ 31	\$ 4	\$ 35
Cash payments	(9)	(2)	(11)
Change in estimate	(1)		(1)
Foreign exchange impacts	(3)		(3)
Accrued costs as of March 28, 2009	\$ 18	\$ 2	\$ 20

2006 Actions

During 2006, the corporation approved certain actions related to exit, disposal and transformation activities and recognized net charges of \$277 million related to these actions. Each of these activities was to be completed within a 12-month period after being approved and included the following:

Implemented a plan to terminate 1,873 employees concentrated primarily in our North American Retail, North American Fresh Bakery, International Beverage, and International Household and Body Care segments. All of these employees were terminated by the end of 2007.

Incurring costs to exit certain leased space as well as costs to terminate contracts with foreign sales agents.

Edgar Filing: Sara Lee Corp - Form 10-Q

Recognized net gains related to various asset and business disposition actions related primarily to our European operations. All of these assets were disposed of by the end of 2006.

Recognized depreciation on disposed manufacturing facilities and equipment impacting all of our segments and also recognized charges related to closure of administrative buildings in order to consolidate the administration of our North American operations.

Incurred transformation costs as a result of management's decision to improve operational efficiency and standardize systems. Costs were incurred to relocate employees, recruit new employees, and pay retention bonuses to preserve business

Table of Contents

continuity. The corporation also incurred consulting costs to assist in the development of strategic operating and financial plans and employee training costs. Certain information technology costs were also incurred and related to the implementation of common information systems across the organization.

Realized a net gain related to the corporation's decision to modify its vacation policy for U.S. employees.

Activity during the first nine months of 2009 and the status of the remaining elements of the 2006 actions, along with the remaining accruals, is described below. The accrued amounts remaining represent those cash expenditures necessary to satisfy remaining obligations. The majority of the cash payments to satisfy the accrued costs are expected to be paid in the next year. The corporation does not anticipate any additional material future charges related to the 2006 actions.

(In millions)	Employee termination and other benefits	Non-cancelable lease and other contractual obligations	Total

Cash payments	(14)		(14)
Change in estimate	(1)	(1)	(2)
Foreign exchange impacts	(4)		(4)
Accrued costs as of March 28, 2009	\$ 22	\$ 1	\$ 23

7. Derivative Reporting

Background Information

The corporation uses derivative financial instruments, including forward exchange, futures, options and swap contracts, to manage its exposures to foreign exchange, commodity prices and interest rate risks. The use of these derivative financial instruments modifies the exposure of these risks with the intent to reduce the risk or cost to the corporation. The corporation does not use derivatives for trading or speculative purposes and is not a party to leveraged derivatives.

The corporation recognizes all derivative instruments as either assets or liabilities at fair value in the consolidated balance sheet. The corporation uses either hedge accounting or mark-to-market accounting for its derivative instruments. For derivatives that qualify for hedge accounting, the corporation designates these derivatives as fair value, cash flow or net investment hedges by formally documenting the hedge relationships, including identification of the hedging instruments and the hedged items, as well as its risk management objectives and strategies for undertaking the hedge transaction. The process includes linking derivatives that are designated as hedges of specific assets, liabilities, firm commitments or forecasted transactions.

As noted above, the corporation uses derivative financial instruments to manage its exposure to commodity prices. A commodity derivative not declared a hedge in accordance with SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*, is accounted for under mark-to-market accounting with changes in fair value recorded in the Consolidated Statements of Income. Prior to 2009, gains and losses on unrealized commodity derivatives accounted for under mark-to-market accounting were included in segment operating income. In 2009, the corporation now includes these unrealized mark-to-market gains and losses in general corporate expenses until such time that the exposure being hedged affects the earnings of the business segment. At that time, the cumulative gain or loss previously recorded in general corporate expenses for the derivative instrument will be reclassified into the business segment's results.

On the date the derivative is entered into, the corporation designates the derivative as one of the following types of hedging instruments and accounts for the derivative as follows:

Fair Value Hedge A hedge of a recognized asset or liability or an unrecognized firm commitment is declared as a fair value hedge which qualify for hedge accounting. For fair value hedges, both the effective and ineffective portions of the changes in the fair value of the derivative, along with the gain or loss on the hedged item that is attributable to the hedged risk, are recorded in earnings and are reported in the Consolidated

Statements of Income on the same line as the hedged item.

Table of Contents

Cash Flow Hedge A hedge of a forecasted transaction, firm commitment or of the variability of cash flows to be received or paid related to a recognized asset or liability is declared a cash flow hedge. Cash flow hedges qualify for hedge accounting. The effective portion of the change in the fair value of the derivative that is declared as a cash flow hedge is recorded in accumulated other comprehensive income (within common stockholders' equity) and later reclassified to the income statement at the same time the underlying hedged item impacts the income statement. In addition, both the fair value of changes excluded from the corporation's effectiveness assessments and the ineffective portion of the changes in the fair value of derivatives used as cash flow hedges are reported in Selling, general and administrative expenses line in the Consolidated Statements of Income.

Net Investment Hedge A hedge of the exposure of changes in the underlying foreign currency denominated subsidiary net assets is declared as a net investment hedge. Net investment hedges qualify for hedge accounting. Net investment hedges can include either derivative or non-derivative instruments including non-U.S. dollar financing transactions or non-U.S. dollar assets or liabilities, including intercompany loans. The effective portion of the change in the fair value of net investment hedges is recorded in the cumulative translation adjustment account within common stockholders' equity. At March 28, 2009 the U.S. dollar equivalent of intercompany loans designated as net investment hedges was \$3.4 billion.

Mark-to-Market Hedge A derivative that is not qualified for hedge accounting in one of the categories above is accounted for under mark-to-market accounting and referred to as a mark-to-market hedge. Changes in the fair value of a mark-to-market hedge are recognized in the Consolidated Statements of Income to act as an economic hedge against the changes in the values of another item or transaction. Changes in the fair value of derivatives classified as mark-to-market hedges are reported in earnings in either the Cost of sales or Selling, general and administrative expenses lines of the Consolidated Statements of Income where the change in value of the underlying transaction is recorded.

Types of Derivative Instruments

Interest Rate and Cross Currency Swaps To manage interest rate risk, the corporation has entered into interest rate swaps that effectively convert certain fixed-rate debt instruments into floating rate debt instruments. Interest rate swap agreements that are effective at hedging the fair value of fixed-rate debt agreements are designated and accounted for as fair value hedges. The corporation utilizes interest rate swap derivatives in order to maintain a targeted amount of both fixed-rate and floating-rate long term debt and notes payable. Currently the corporation has a fixed interest rate on approximately 70% of long-term debt and notes payable issued.

The corporation has issued certain foreign-denominated debt instruments and utilizes cross currency swaps to reduce the variability of functional currency cash flows related to the foreign currency debt. Cross currency swap agreements that are effective at hedging the variability of foreign-denominated cash flows are designated and accounted for as cash flow hedges. As of March 28, 2009, the total notional amount of the corporation's interest rate swaps and cross currency swaps were \$385 million and \$759 million, respectively.

In 2009, in connection with the funding of the anticipated retirement of the 6.25% notes in September 2011, the corporation executed a \$50 million forward starting swap to effectively lock in the cash flows related to interest payments on the anticipated debt issuance.

Currency Forward Exchange, Futures and Option Contracts The corporation uses forward exchange and option contracts to reduce the effect of fluctuating foreign currencies on short-term foreign-currency-denominated intercompany transactions, third-party product-sourcing transactions, foreign-denominated investments and other known foreign currency exposures. Gains and losses on the derivative instruments are intended to offset losses and gains on the hedged transaction in an effort to reduce the earnings volatility resulting from fluctuating foreign currency exchange rates. Forward currency exchange contracts mature at the anticipated cash requirement date of the hedged transaction, generally within one year to eighteen months. Forward currency exchange contracts which are effective at hedging the fair value of a recognized asset or liability are designated and accounted for as fair value hedges. All remaining currency forward and options contracts are accounted for as mark-to-market hedges.

Table of Contents

The principal currencies hedged by the corporation include the European euro, British pound, Danish krone, Hungarian forint, U.S. dollar and Australian dollar. As of March 28, 2009, the net U.S. dollar equivalent of commitments to purchase and sell foreign currencies is \$3,152 million and \$3,133 million, respectively, using the exchange rate at the reporting date. The corporation hedges virtually all foreign exchange risk derived from recorded transactions and firm commitments and only hedges foreign exchange risk related to anticipated transactions where the exposure is potentially significant.

The corporation has held foreign exchange option contracts to reduce the foreign exchange fluctuations on anticipated purchase transactions. As of March 28, 2009 there are no foreign exchange option contracts outstanding.

Commodity Futures and Options Contracts The corporation uses commodity futures and options to hedge commodity price risk. The principal commodities hedged by the corporation include hogs, beef, natural gas, diesel fuel, coffee, corn, wheat and other ingredients. The corporation does not use significant levels of commodity financial instruments to hedge commodity prices and primarily relies upon fixed rate supplier contracts to determine commodity pricing. In circumstances where commodity-derivative instruments are used, there is a high correlation between the commodity costs and the derivative instruments. For those instruments where the commodity instrument and underlying hedged item correlate between 80-125%, the corporation accounts for those contracts as cash flow hedges. However, the majority of commodity derivative instruments are accounted for as mark-to-market hedges.

As of March 28, 2009, the total notional amount of commodity futures and option contracts was \$117 million and \$12 million, respectively. The notional amount of commodity futures contracts is determined by the initial cost of the contracts while the notional amount of options contracts is determined by the delta adjusted value as of period end.

The corporation only enters into futures and options contracts that are traded on established, well-recognized exchanges that offer high liquidity, transparent pricing, daily cash settlement and collateralization through margin requirements.

Cash Flow Presentation

The settlement of derivative contracts related to the purchase of inventory, commodities or other hedged items that utilize hedge accounting are reported in the Consolidated Statements of Cash Flows as an operating cash flow, while those derivatives that utilize the mark-to-market hedge accounting model are reported in investing activities when those contracts are realized in cash. Fixed to floating rate swaps are reported as a component of interest expense and therefore are reported in cash flow from operating activities similar to how cash interest payments are reported. The portion of the gain or loss on a cross currency swap that offsets the change in the value of interest expense is recognized in cash flow from operations, while the gain or loss on the swap that is offsetting the change in value of the debt is classified as a financing activity in the Consolidated Statement of Cash Flows.

Contingent Features/Concentration of Credit Risk

All of the corporation's derivative instruments are governed by the International Swaps and Derivatives Association (i.e. ISDA) master agreement, requiring the corporation to maintain an investment grade credit rating from both Moody's and Standard & Poor's credit rating agencies. If the corporation's debt were to fall below investment grade, it would be in violation of these provisions, and the counterparties to the derivative instruments could request immediate payment or demand immediate collateralization on the derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on March 28, 2009, is \$248 million for which the corporation has posted no collateral. If the credit-risk-related contingent features underlying these agreements were triggered on March 28, 2009, the corporation would be required to post collateral of \$248 million with its counterparties.

Table of Contents

A large number of major international financial institutions are counterparties to the corporation's financial instruments including cross currency swaps, interest rate swaps, and currency exchange forwards and swaps. The corporation enters into financial instrument agreements only with counterparties meeting very stringent credit standards (a credit rating of A-/A3 or better), limiting the amount of agreements or contracts it enters into with any one party and, where legally available, executing master netting agreements. These positions are continually monitored. While the corporation may be exposed to credit losses in the event of nonperformance by individual counterparties or the entire group of counterparties, it has not recognized any losses with these counterparties in the past and does not anticipate material losses in the future.

Information on the location and amounts of derivative fair values in the Condensed Consolidated Balance Sheet at March 28, 2009 is as follows:

(In millions)	Assets		Liabilities	
Derivatives designated as hedging instruments				
	Other Current	Other Non-	Other Accrued	
under Statement 133	Assets	Current Assets	Liabilities	Other
Interest rate contracts	\$	\$ 33	\$	\$

8. Fair Value Measurements

Effective the beginning of 2009, the corporation implemented SFAS 157, Fair Value Measurements (SFAS 157), which defines fair value, establishes a framework for its measurement, and expands disclosures about fair value measurements. The adoption of SFAS 157 did not have an impact on the measurement of the corporation's financial assets and liabilities, but did result in additional disclosures.

In 2007, the Financial Accounting Standards Board (FASB) issued FASB Staff Position FAS 157-2 (FSP 157-2), which provided a one year deferral for the implementation of SFAS 157 for non-financial assets and liabilities measured at fair value that are recorded or disclosed on a non-recurring basis. The corporation elected to apply the FSP 157-2 deferral, and accordingly, will not apply SFAS 157 to its goodwill impairment testing, indefinite-lived intangibles impairment testing, other long-lived assets, and non-financial assets or liabilities measured at fair value in business acquisitions, until fiscal 2010. The corporation is still evaluating the financial statement impact of the implementation of SFAS 157 for our non-financial assets and liabilities.

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (i.e., exit price) in an orderly transaction between market participants at the measurement date. SFAS 157 requires disclosures that categorize assets and liabilities measured at fair value into one of three different levels depending on the assumptions (i.e., inputs) used in the valuation. Level 1 provides the most reliable measure of fair value while Level 3 generally requires significant management judgment. Financial assets and liabilities are classified in their entirety based on the lowest level of input significant to the fair value measurement. The SFAS 157 fair value hierarchy is defined as follows:

Level 1 Unadjusted Quoted Prices Valuations are based on unadjusted quoted prices in active markets for identical assets or liabilities. An example would be a marketable equity security that is traded on a major stock exchange.

Level 2 Pricing Models with Significant Observable Inputs Valuations are based on information derived from either an active market quoted price, which may require further adjustment based on the attributes of the financial asset or liability being measured, or an inactive market transaction. Circumstances when adjustments to market quoted prices may be appropriate include (i) a quoted price for an actively traded equity investment that is adjusted for a contractual trading restriction, or (ii) the fair value derived from a trade of an identical or similar security in an inactive market. An interest rate swap derivative valued based on a LIBOR swap curve is an example of a level 2 asset or liability.

Table of Contents

Level 3 Pricing Models with Significant Unobservable Inputs Valuations are based on internally derived assumptions surrounding the timing and amount of expected cash flows for the financial instrument, which are significant to the overall fair value measurement. These assumptions are unobservable in either an active or inactive market. The inputs reflect management's best estimate of what market participants would use in valuing the asset or liability at the measurement date. A goodwill impairment test that utilizes an internally developed discounted cash flow model is an example of a level 3 asset or liability.

The following table represents the fair values of financial assets and liabilities:

(In millions)	March 28, 2009			
	Level 1	Level 2	Level 3	Total
Assets:				
Commodity derivatives	\$ 2	\$	\$	\$ 2
Foreign currency exchange derivatives		61		61
Interest rate swaps		33		33
Total assets at fair value	\$ 2	\$ 94	\$	\$ 96
Liabilities:				
Foreign currency exchange derivatives	\$	\$ 47	\$	\$ 47
Cross currency swaps		201		201
Total liabilities at fair value	\$	\$ 248	\$	\$ 248

Effective the beginning of fiscal 2009, the corporation implemented SFAS 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159), which allows companies the option to report selected financial assets and financial liabilities at fair value. The adoption of SFAS 159 had no impact on the consolidated financial statements as the corporation did not elect the fair value option.

9. Pension and Other Postretirement Benefit Plans

The components of the net periodic pension cost and the postretirement medical cost (income) for the third quarter and first nine months of 2009 and 2008 are as follows:

(In millions)	Pension		Postretirement Medical and Life Insurance	
	Third Quarter 2009	Third Quarter 2008	Third Quarter 2009	Third Quarter 2008
Service cost	\$ 16	\$ 23	\$ 2	\$ 2
Interest cost	61	67	4	4
Expected return on plan assets	(64)	(74)		
Amortization of:				
Prior service cost	2	2	(5)	(6)
Net actuarial loss	3	9	1	2
Net periodic benefit cost	\$ 18	\$ 27	\$ 2	\$ 2

Pension **Postretirement Medical and Life Insurance**

Edgar Filing: Sara Lee Corp - Form 10-Q

(In millions)	Nine Months 2009	Nine Months 2008	Nine Months 2009	Nine Months 2008
Service cost	\$ 50	\$ 67	\$ 5	\$ 6
Interest cost	194	199	11	12
Expected return on plan assets	(202)	(219)		
Amortization of:				
Transition (asset) obligation			(1)	(1)
Prior service cost	6	6	(16)	(17)
Net actuarial loss	8	26	2	5
Net periodic benefit cost	\$ 56	\$ 79	\$ 1	\$ 5
Curtailment gain	\$	\$	\$ 17	\$

Table of Contents

The net periodic benefit cost of the corporation's defined benefit pension plans in the third quarter and first nine months of 2009 was \$9 million and \$23 million lower, respectively, than in 2008 as a result of the following:

Service cost declined primarily as a result of an increase in the discount rate, which reflects the higher interest rates in various jurisdictions.

Interest costs declined in the quarter and on a year-to-date basis, despite an increase in interest rates, due to the impact of changes in foreign currency exchange rates, primarily the British pound sterling.

The amortization of net actuarial losses declined in 2009 as a result of actuarial gains in 2008 which reduced the amount of unamortized actuarial losses at the end of 2008. This in turn resulted in a lower level of loss amortization in 2009.

During the first nine months of 2009 and 2008, the corporation contributed \$235 million and \$148 million, respectively, to its defined benefit pension plans. At the present time, the corporation expects to contribute approximately \$265 million of cash to its defined benefit pension plans in 2009. The exact amount of cash contributions made to pension plans in any year is dependent upon a number of factors including minimum funding requirements in the jurisdictions in which the corporation operates and arrangements made with trustees of certain foreign plans. As a result, the actual funding in 2009 may differ from the current estimate.

During 2009, the corporation entered into a new collective labor agreement in the Netherlands which eliminated post retirement health care benefits for certain employee groups, while also reducing benefits provided to others. The elimination of benefits resulted in the recognition of a curtailment gain of \$17 million related to a portion of the unamortized prior service cost credit which was reported in accumulated other comprehensive income. The plan changes also resulted in a \$32 million reduction in the accumulated post retirement benefit obligation with an offset to accumulated other comprehensive income (AOCI).

During the third quarter of 2009, the corporation approved a change to its U.S. postretirement medical plan. Effective January 1, 2010 the corporation will no longer subsidize retiree medical coverage for U.S. salaried employees and retirees. After this date, retirees will have access to medical coverage but will have to pay 100% of the premium. The estimated impact of this plan change was recognized as a plan amendment. As a result of this change, the accumulated postretirement benefit obligation was reduced by approximately \$42 million with the offset recognized as a component of unamortized prior service cost in AOCI. This credit amount will be amortized into income over the remaining service life of the remaining plan participants, which is approximately 8 years.

The corporation recognized a partial withdrawal liability in the second quarter of 2009 as a result of the cessation of contributions to a multi-employer pension plan with respect to one collective bargaining unit. The existence of this partial withdrawal liability was previously disclosed in the corporation's 2009 first quarter Form 10-Q. The corporation has recognized a \$31 million charge to income in 2009 to establish the estimated partial withdrawal liability, with \$13 million recognized in Cost of sales and \$18 million recognized in Selling, general and administrative expenses in the Consolidated Statements of Income. The entire charge is recognized in the results of the North American Fresh Bakery segment.

10. Receipt of Contingent Sale Proceeds

The corporation sold its European cut tobacco business in 1999. Under the terms of that agreement, the corporation will receive an annual cash payment of 95 million euros if tobacco continues to be a legal product in the Netherlands, Germany and Belgium through July 15, 2009. The legal status of tobacco in each country accounts for a portion of the total contingency with the Netherlands accounting for 67%, Germany 22% and Belgium 11%. If tobacco ceases to be a legal product within any of these countries, the corporation forfeits the receipt of all future amounts related to that country. The contingencies associated with the 2009 and 2008 payments each passed in the first quarter of each fiscal year and the corporation received the annual payments. The 2009 annual

Table of Contents

payment was equivalent to \$150 million and the 2008 annual payment was equivalent to \$130 million based upon the respective exchange rates on the dates of receipt. These amounts were recognized in the corporation's earnings when received. The amount received in 2008 increased annual diluted earnings per share by \$0.18 and the amount received in 2009 is expected to increase annual diluted earnings per share by \$0.21.

11. Income Taxes

Effective Annual Tax Rate for Interim Reporting Generally accepted accounting principles require that the interim period tax provision be determined as follows:

At the end of each quarter, the corporation estimates the tax that will be provided for the fiscal year stated as a percent of estimated ordinary income for the fiscal year. The term ordinary income refers to income from continuing operations before income taxes, excluding significant unusual or infrequently occurring items. Discontinued operations are excluded in determining ordinary income.

The estimated annual effective tax rate is applied to the year-to-date ordinary income at the end of each quarter to compute the year-to-date tax applicable to ordinary income. The tax expense or benefit related to ordinary income in each quarter is the difference between the most recent year-to-date and the prior quarter year-to-date computations.

The tax effects of significant unusual or infrequently occurring items are recognized as discrete items in the interim period in which the events occur. The impact of changes in tax laws or rates on deferred tax amounts, the effects of changes in judgment about valuation allowances established in prior years and changes in tax reserves resulting from the finalization of tax audits or reviews are examples of significant unusual or infrequently occurring items which are recognized as discrete items in the interim period in which the event occurs.

The determination of the annual effective tax rate is based upon a number of significant estimates and judgments, including the estimated annual pretax income of the corporation in each tax jurisdiction in which it operates and the development of tax planning strategies during the year. In addition, as a global commercial enterprise, the corporation's tax expense can be impacted by changes in tax rates or laws, the finalization of tax audits and reviews, as well as other factors that cannot be predicted with certainty. As such, there can be significant volatility in interim tax provisions.

The following table sets out the tax expense (benefit) and the effective tax rate for the corporation:

(In millions)	Third Quarter		Nine months	
	2009	2008	2009	2008
Continuing operations				
Income (loss) before income taxes	\$ 228	\$ 220	\$ 554	\$ 689
Income tax expense (benefit)	63	(14)	176	73
Effective tax rate	27.6%	(6.2)%	31.8%	10.6%
<u>Third Quarter and First Nine months of 2009</u>				

In the third quarter of 2009, the corporation recognized tax expense of \$63 million on pretax income of \$228 million, or an effective tax rate of 27.6%. The tax rate in the third quarter was impacted by \$7 million of tax expense related to the following discrete tax items:

\$5 million benefit relates to adjustments of prior year tax provision estimates.

Edgar Filing: Sara Lee Corp - Form 10-Q

\$13 million expense relates to adjustments of taxes previously provided on the 2008 earnings of the corporation, consisting primarily of a net \$4 million understatement of tax related to foreign exchange gains, and a \$10 million write-off of state tax benefits on foreign exchange losses offset by \$1 million of other provision adjustments. Management believes these errors are immaterial to both the consolidated quarterly and annual financial statements.

Table of Contents

\$1 million benefit relates to various discrete items, none of which were material individually or in the aggregate. The annual effective tax rate includes a charge of \$56 million related to the expected repatriation of a portion of 2009 foreign earnings. The estimated charge increases the estimated annual effective tax rate by approximately 7%.

The tax expense and related effective tax rate on continuing operations, for the first nine months of 2009, was determined by applying a 30.1% estimated annual effective tax rate to pretax earnings and then recognizing the impact of \$9 million of tax expense related to the following discrete tax items:

\$5 million benefit relates to adjustments of prior year tax provision estimates.

\$13 million expense relates to adjustments of taxes previously provided on the 2008 earnings of the corporation, consisting primarily of a net \$4 million understatement of tax related to foreign exchange gains, and a \$10 million write-off of state tax benefits on foreign exchange losses offset by \$1 million of other provision adjustments. Management believes these errors are immaterial to both the consolidated quarterly and annual financial statements.

\$1 million expense relates to various discrete items, none of which were material individually or in the aggregate. The corporation's estimated annual effective tax rate decreased from 34.0% to 30.1% due to a \$29 million non-recurring tax benefit from current year foreign exchange gains. A significant portion of this non-recurring tax benefit should have been reflected in prior quarters of 2009. Management believes this error is immaterial to the quarterly financial statements.

Third Quarter and First Nine months of Fiscal 2008

In the third quarter of fiscal 2008, the corporation recognized a tax benefit of \$14 million on pretax income of \$220 million, or a negative effective rate of 6.2%. The tax rate in the quarter was impacted by \$86 million of tax benefits related to the following discrete tax items:

\$73 million resulted from the completion of tax audits and the expiration of statutes of limitations in France, Morocco, the Netherlands, the Philippines and various state and local jurisdictions. Of this amount, \$45 million related to the completion of tax audits and \$28 million related to the expiration of statutes of limitations.

\$13 million related to adjustments recorded on the taxes previously provided on the 2007 earnings of the corporation, consisting primarily of a \$14 million overstatement related to an intercompany transaction. Management believes this error is immaterial to both the consolidated quarterly and annual financial statements for 2008.

The tax expense and related effective tax rate on continuing operations, for the first nine months of fiscal 2008, was determined by applying a 30.4% estimated annual effective tax rate to pretax earnings and then recognizing the impact of \$136 million of tax benefits related to the following discrete tax items:

\$37 million reversal of valuation allowances on German net deferred tax assets. The corporation determined that a valuation allowance was no longer necessary due to the projected profitability of the German operations.

\$79 million resulting from the completion of tax audits and the expiration of the statutes of limitations. Of this amount, \$48 million related to the completion of tax audits and \$31 million related to the expiration of statutes of limitations.

Table of Contents

\$13 million related to adjustments recorded on taxes previously provided on the 2007 earnings of the corporation, as previously described above.

\$7 million related to the reduction of contingent tax obligations due to a change in estimated foreign earnings.

The resulting effective tax rate for the nine month period was 10.6%. The estimated annual effective tax rate related to ordinary income for fiscal 2008 of 30.4% includes an annual charge of \$97 million to repatriate a portion of fiscal 2008 foreign earnings. This estimated charge increased the estimated annual effective tax rate by approximately 10%.

FASB Interpretation No. 48

In June 2006, the FASB issued FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement 109 (FIN 48), which provides guidance on the financial statement recognition, measurement, reporting and disclosure of uncertain tax positions taken or expected to be taken in a tax return. FIN 48 addresses the determination of whether tax benefits, either permanent or temporary, should be recorded in the financial statements. For those tax benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by the taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

The year-to-date net decrease in unrecognized tax benefits was \$48 million, resulting in an ending balance of \$574 million as of March 28, 2009. There was a decrease in the gross liability for uncertain tax positions of \$83 million, of which \$54 million relates to favorable foreign currency exchange translation, \$21 million relates to prior period tax positions, \$5 million relates to audit settlements, and \$3 million relates to the expiration of statutes of limitations. This decrease was offset by \$35 million of increases to reserves for uncertain tax positions related to the current period.

At this time, the corporation estimates that it is reasonably possible that the liability for unrecognized tax benefits will decrease between \$70 \$130 million in the next twelve months from a variety of uncertain tax positions as a result of the completion of various worldwide tax audits currently in process and the expiration of the statute of limitations in several jurisdictions. In addition, the company recognizes interest and penalties related to unrecognized tax benefits in tax expense. As of June 28, 2008, the corporation had accrued interest and accrued penalties of \$96 million. The change in accrued interest and accrued penalties during the nine months ended March 28, 2009 was an increase of approximately \$7 million.

The corporation's tax returns are routinely audited by federal, state, and foreign tax authorities and these audits are at various stages of completion at any given time. The Internal Revenue Service (IRS) has completed examinations of the company's U.S. income tax returns through July 3, 2004. Fiscal years remaining open to examination in the Netherlands include 2003 and forward. Other foreign jurisdictions remain open to audits after 1998. With few exceptions, the company is no longer subject to state and local income tax examinations by tax authorities for years before June 28, 2003.

12. Contingencies and Commitments

Aris Since 1995, three complaints have been filed on behalf of employees of a former subsidiary of the corporation known as Aris Philippines, Inc. (Aris) alleging unfair labor practices associated with Aris' termination of manufacturing operations in the Philippines. Each of these three complaints includes allegations with the same issues and facts. With regard to two of these complaints, Aris prevailed in the administrative hearings held in the Philippines. Although implicated in these complaints, the corporation was not a party. The third complaint is a consolidation of cases filed in the Republic of the Philippines, Department of Labor and Employment and the National Labor Relations Commission (NLRC) from 1998 through July 1999 by individual complainants. On December 11, 1998, the third complaint was amended to name the corporation as a party. The case is styled: Emelinda Macatland, et al. v. Aris Philippines, Inc., et al. In the underlying proceedings during 2006, the arbitrator ruled against the corporation and awarded the plaintiffs \$60 million in damages and fees. The corporation appealed this administrative ruling. On December 19, 2006, the NLRC issued a ruling setting aside the arbitrator's ruling, and remanded the case to the arbitrator for further

Table of Contents

proceedings. The complainants and the corporation have filed motions for reconsideration the corporation seeking a final judgment and outright dismissal of the case, instead of a remand to the arbitrator; and complaints seeking to reinstate the original arbitrator's judgment against the defendants, including the corporation. The respective motions for reconsideration have been fully briefed by the parties and we await the NLRC's rulings.

The corporation's request to the Court of Appeals to reconsider its decision to require that the bond related to the arbitrator's original ruling be set at approximately \$23 million has been denied. On December 10, 2007, the corporation petitioned the Supreme Court for review, arguing, among other things, that the appellate court's decision is now moot in light of the December 19, 2006 ruling by the NLRC setting aside the underlying judgment. No additional bond posting is required until all allowable appeals have been exhausted. The corporation continues to believe that the plaintiffs' claims are without merit; however, it is reasonably possible that this case will be ruled against the corporation and have a material adverse impact on the corporation's financial position, results of operations or cash flows.

American Bakers Association (ABA) Retirement Plan The corporation is a participating employer in the American Bakers Association Retirement Plan. In 1979, the Pension Benefit Guaranty Corporation (PBGC) determined that the ABA plan was an aggregate of single-employer pension plans, rather than a multi-employer plan. Under the express terms of the ABA plan's governing documents, the corporation's contributions can only be used to pay for the benefits of its own employee-participants. Based upon the PBGC determination and the advice of counsel, the corporation has recognized its obligations under the plan as if it participated in a single-employer defined benefit plan under the provisions of Statement of Financial Accounting Standards No. 87, *Employers Accounting for Pensions*.

In August 2006, the PBGC rescinded its 1979 determination and concluded that the ABA plan was a multi-employer plan in which the participating parties share in the plan underfunding. The other major participant in the ABA plan is a third party that is seeking an injunction to enforce the PBGC determination made in August 2006. If the ABA plan were declared to be a multi-employer pension plan, this third party would successfully reduce its under-funded liability under the ABA plan by roughly \$80 million. The corporation has initiated litigation seeking to overturn the August 2006 PBGC determination and intends to vigorously defend the position that it is responsible only for the obligations related to its current and former employees. The corporation continues to believe that the PBGC's August 2006 determination is without merit; however, no assurance can be given that this matter will not have a material adverse impact on the corporation's financial position, results of operations or cash flows.

Other Plans The corporation participates in various multi-employer pension plans that provide retirement benefits to certain employees covered by collective bargaining agreements (MEPP). MEPPs are managed by trustee boards comprised of participating employer and labor union representatives, and participating employers are jointly responsible for any plan underfunding. The corporation's MEPP contributions are established by the applicable collective bargaining agreements; however, our required contributions may increase based on the funded status of the plan and the provisions of the Pension Protection Act, which requires substantially underfunded MEPPs to implement rehabilitation plans to improve funded status. Factors that could impact funded status of a MEPP include investment performance, changes in the participant demographics, financial stability of contributing employers and changes in actuarial assumptions. In addition to regular scheduled contributions, the corporation could be obligated to make additional contributions (known as a complete or partial withdrawal liability) if a MEPP has unfunded vested benefits. These complete or partial withdrawal liabilities would be triggered if the corporation ceases to make contributions to that MEPP, either completely or with respect to only one or more collective bargaining units. The withdrawal liability would equal the corporation's proportionate share of the unfunded vested benefits, based on the year in which the withdrawal liability is triggered. The corporation believes that certain of the MEPPs in which we participate have unfunded vested benefits. Due to uncertainty regarding future factors that could trigger withdrawal liability, such as the corporation's decision to close a plant or the dissolution of a collective bargaining unit, we are unable to determine the amount and timing of the corporation's future withdrawal liability, if any, or whether the corporation's participation in these MEPPs could have any material adverse impact on its financial condition, results of operations or liquidity. The corporation's regular scheduled contributions to MEPPs totaled \$48 million in fiscal 2008, \$47 million in fiscal 2007 and \$45 million in fiscal 2006. The corporation has incurred withdrawal liabilities of approximately \$31 million in 2009, and immaterial amounts in 2008 and 2007.

Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

The following is management's discussion and analysis of the results of operations for the third quarter and first nine months of 2009 compared with the third quarter and first nine months of 2008 and a discussion of the changes in financial condition and liquidity during the first nine months of 2009. Below is an outline of the analyses included herein:

Business Overview

Our Business

Sara Lee is a global manufacturer and marketer of high-quality, brand name products for consumers throughout the world focused primarily in the meats, bakery, beverage, and household products categories. Our brands include *Ambi Pur*, *Ball Park*, *Douwe Egberts*, *Hillshire Farm*, *Jimmy Dean*, *Kiwi*, *Sanex*, *Senseo* and our namesake, *Sara Lee*.

In North America, the company sells a variety of packaged meat products that include hot dogs, corn dogs, breakfast sausages, dinner sausages and deli meats as well as a variety of fresh and frozen baked products and specialty items that include bread, buns, bagels, cakes and cheesecakes. These products are sold through the retail channel to supermarkets, warehouse clubs and national chains. The company also sells a variety of meat, bakery and beverage products to foodservice customers in North America. Internationally, the company sells coffee and tea products in Europe, Brazil, Australia and Asia through both the retail and foodservice channels as well as a variety of bakery and dough products to retail and foodservice customers in Europe and Australia. It also sells body care, air care, shoe care and insecticides to retail customers primarily in the U.S., Europe, India and the Asia Pacific region.

On March 30, 2009, Sara Lee announced that it is reviewing strategic options for its International Household and Body Care business after receiving expressions of interest. The company is currently considering all alternatives for the segment, including the option to divest the business.

Challenges and Risks

Edgar Filing: Sara Lee Corp - Form 10-Q

As an international consumer products company, we face certain risks and challenges that impact our business and financial performance. Commodity prices directly impact our business because of their effect on the cost of raw materials used to make our products and the cost of inputs to manufacture, package and ship our products. The commodities we use, including beef, pork, coffee, wheat, corn, corn syrup, soybean and corn oils, butter, sugar and fuel, may experience price volatility due to factors beyond our control. The company's objective is to be able to offset commodity price increases with pricing actions and to offset any operating costs increases with continuous improvement savings. During the first nine months of 2009, the corporation estimates that commodity cost increases of approximately \$450 million over the first nine months of the prior year were offset by favorable pricing actions of approximately \$465 million.

Table of Contents

The company's business results are also heavily influenced by changes in foreign currency exchange rates. For the most recently completed fiscal year, nearly 50% of net sales and significantly more than 50% of operating segment income were generated outside of the U.S. As a result, changes in foreign currency exchange rates, particularly the European euro, can have a significant impact on the reported results. Changes in foreign currency exchange rates decreased net sales by \$330 million and decreased operating income by \$34 million for the first nine months of 2009.

The company's international operations also provide a significant portion of the company's cash flow from operating activities, which is expected to require the company to continue to repatriate a greater portion of cash generated outside of the U.S. The repatriation of these funds has and is expected to continue to result in a higher effective income tax rate and cash tax payments.

The corporation believes that, based on its current cash balance and continued access to financing, the recent turmoil and decreased liquidity in the financial markets will not have a material adverse impact on our liquidity or cash flow. In light of the current credit market instability, however, the corporation has taken certain actions to maintain its liquidity and preserve operating flexibility. Although the corporation continues to regularly access the commercial paper market, it has shortened maturities on its commercial paper and reduced the total amount of its commercial paper that matures each day in response to reduced market liquidity.

The turmoil in the financial markets has led to general economic weakness, which has negatively impacted our business. Continued economic uncertainty may result in increased pressure to reduce the prices for some of our products, limit our ability to increase or maintain prices or lead to a continued shift toward private label products. In addition, certain reporting units of the corporation, especially those carrying significant goodwill balances, could experience reduced profitability which potentially could trigger a goodwill impairment.

Significant Items Affecting Comparability

The reported results for 2009 and 2008 reflect amounts recognized for actions associated with the corporation's ongoing business transformation program, Project Accelerate and other significant amounts that impact comparability. More information on these costs can be found in Note 6 to the Consolidated Financial Statements, Exit, Disposal and Transformation/Accelerate Activities. The nature of these items includes the following:

Exit Activities, Asset and Business Dispositions These costs are reported on a separate line of the Consolidated Statements of Income. Exit activities primarily relate to charges taken to recognize severance actions approved by the corporation's management and the exit of leased facilities or other contractual arrangements. Asset and business disposition activities include costs associated with separating businesses targeted for sale, as well as gains and losses associated with the disposition of asset groups that do not qualify for discontinued operations reporting.

Project Accelerate Costs These include costs associated with the transition of services to an outside third party vendor as part of a business process outsourcing initiative. The initiative includes the outsourcing of a portion of the North American and European finance processing functions, information systems application development and maintenance as well as indirect procurement activities. These costs are recognized in the Consolidated Statements of Income in Selling, General and Administrative Expenses or Cost of Sales. Employee termination costs, lease exit costs and gains or losses on the disposition of assets or asset groupings that do not qualify as discontinued operations associated with these initiatives are reported as part of exit activities, asset and business dispositions.

Business Transformation Costs These include costs to retain and relocate existing employees, recruit new employees, third-party consulting costs associated with transformation efforts, and amortization costs for new enterprise-wide software. In addition, these costs include incremental depreciation associated with decisions to close facilities at dates sooner than originally anticipated, pursuant to an exit plan. These costs are recognized in the Consolidated Statements of Income in Selling, General and Administrative Expenses or Cost of Sales. Employee termination costs, lease exit costs and gains or losses on the disposition of assets or asset groupings that do not qualify as discontinued operations associated with these initiatives are reported as part of exit activities, asset and business dispositions.

Table of Contents

Other Significant Items The reported results are also impacted by other items that affect comparability. These items may include impairment charges, pension partial withdrawal liability charges, curtailment gains and certain discrete tax matters, which include contingent tax obligation and valuation allowance adjustments and various other tax matters.

Impact of Significant Items on Net Income and Diluted Earnings per Share

Balance sheet corrections	8		8	
Acquisitions/dispositions	(5)	1	(6)	
Total	\$ (25)	\$ 21	\$ (46)	

Net Sales

Net sales decreased by \$215 million or 6.6%. The weakening of foreign currencies, particularly the European euro, Brazilian real, British pound sterling and Australian dollar decreased reported net sales by \$258 million, or 8.2%. Sales were favorably impacted by pricing actions, taken across all business segments to offset increased commodity costs, which increased reported net sales by approximately 4% and a favorable shift in sales mix. These favorable impacts were partially offset by an overall decline in unit volumes of 3.7%. The following table summarizes the components of the percentage change in net sales as compared to the prior year:

Third Quarter 2009

Net Sales Changes	Unit Volumes	+	Price/Mix/Other	+	Acquisitions/Divestitures	+	Foreign Exchange	=	Net Sales Change
Total Corporation	(3.7)%		5.8%		(0.5)%		(8.2)%		(6.6)%

Operating Income

Operating income increased by \$20 million, or 8.3%. The change in operating income was negatively impacted by \$46 million related to the items summarized in the previous table of operating income results, the most significant of which were \$27 million of unfavorable impacts related to changes in foreign currency exchange rates; and a \$19 million increase in exit activities, asset and business disposition charges. The remaining increase in operating income of \$66 million, or 30.1%, was primarily due to improved operating results for the North American Retail and International Beverage segments; and a \$37 million reduction in general corporate expenses, which included a \$9 million increase in

Edgar Filing: Sara Lee Corp - Form 10-Q

mark-to-market gains on derivative contracts related to commodities in the third quarter of 2009 as compared to the third quarter of 2008. The individual components that impacted operating income are discussed in more detail below.

Table of Contents*Gross Margin*

Gross margin dollars in the third quarter of 2009 decreased \$117 million over the prior year due to higher commodity, labor and energy costs, changes in foreign currency exchange rates and lower unit volumes, partially offset by the favorable impact of pricing actions and savings from continuous improvement programs. The corporation estimates that commodity cost increases of approximately \$80 million in the third quarter of 2009 versus the third quarter of 2008, including the impact of commodity derivatives, were offset by favorable pricing actions of approximately \$120 million. The gross margin percent in the third quarter of 2009 declined 1.1%, from 38.8% in the third quarter of 2008 to 37.7% in the third quarter of 2009 due to the negative impact of higher commodity costs.

Selling, General and Administrative Expenses

(In millions)	Quarter ended			Percent Change
	March 28, 2009	March 29, 2008	Change	
SG&A expenses in the business segment results:				
Media advertising and promotion	\$ 102	\$ 146	\$ (44)	(29.7)%
Other	728	797	(69)	(8.7)
Total business segments	830	943	(113)	(12.0)
Amortization of identifiable intangibles	16	17	(1)	(4.8)
General corporate expenses:				
Other	32	65	(33)	(49.6)
Mark-to-market derivative (gains) / losses	(14)	(5)	(9)	NM
Total SG&A Expenses	\$ 864	\$ 1,020	\$ (156)	(15.2)%

Selling, general and administrative (SG&A) expenses decreased by \$156 million, or 15.2%. Measured as a percent of sales, SG&A expenses decreased from 31.4% in 2008 to 28.5% in 2009. Changes in foreign currency exchange rates decreased SG&A costs by \$78 million, or 6.9%. The remaining decrease in SG&A expenses is \$78 million, or 8.3%. SG&A expenses in the business segments decreased by \$113 million, or 12.0%, due to the change in foreign currencies, a reduction in media advertising and promotion (MAP) spending, and the impact of cost containment actions. Other general corporate expenses decreased \$33 million versus the prior year due to a lower employee benefit and casualty insurance costs and favorable foreign currency transactions. General corporate expenses were also favorably impacted by approximately \$20 million related to certain nonrecurring items primarily a non-income related foreign tax refund and a reduction in contingent lease accruals. Derivative gains were \$14 million in 2009 versus \$5 million in 2008, due to mark-to-market gains in the quarter related to commodity derivative contracts primarily related to energy.

Transformation/Accelerate Actions, Impairment Charges, Exit Activities and Other Significant Items

The reported results for the third quarter of 2009 and 2008 reflect amounts recognized for actions associated with the corporation's ongoing business transformation and Project Accelerate programs and other exit and disposal actions. The expense related to exit activities, asset and business dispositions was \$16 million in the third quarter of 2009 versus \$3 million of income in the third quarter of 2008. As discussed in Note 6 to the financial statements, Exit, Disposal and Transformation/Accelerate Activities, \$18 million of the charge in 2009 relates to the planned termination of employees related to both European and North American operations as part of Project Accelerate.

Transformation costs related to information technology were down \$3 million primarily due to a reduction in costs related to the implementation of new information technology systems. The transformation IT costs in the third quarter of 2009 include \$5 million of computer software amortization expense related to systems that were put into use in 2008. The total amortization expense for the year is expected to be \$22 million.

These actions are more fully described in the Exit, Disposal and Transformation/Accelerate Activities Note to the Consolidated Financial Statements.

Table of Contents*Net Interest Expense*

Net interest expense in the third quarter of 2009 was \$34 million, an increase of \$12 million over the third quarter of the prior year. Interest expense increased by \$3 million, related primarily to a recent acquisition, while interest income declined by \$9 million, due to lower cash and cash equivalents.

Income Tax Expense

Note 11 to the Consolidated Financial Statements provides a detailed explanation of the determination of the interim tax provision.

The following table sets out the tax expense (benefit) and effective tax rate for the corporation's continuing operations:

(In millions)	Third Quarter	
	2009	2008
Continuing operations		
Income before income taxes	\$ 228	\$ 220
Income tax expense (benefit)	63	(14)
Effective tax rate	27.6%	(6.2)%

In the third quarter of 2009, the corporation recognized tax expense of \$63 million on pretax income from continuing operations of \$228 million, or an effective tax rate of 27.6%. The tax rate in the third quarter was impacted by \$7 million of tax expense related to the following discrete tax items:

\$5 million benefit relates to adjustments of prior year tax provision estimates.

\$13 million expense relates to adjustments of taxes previously provided on the 2008 earnings of the corporation, consisting primarily of a net \$4 million understatement of tax related to foreign exchange gains, and a \$10 million write-off of state tax benefits on foreign exchange losses offset by \$1 million of other provision adjustments.

\$1 million benefit relates to various discrete items, none of which were material individually or in the aggregate.

In the third quarter of 2008, the corporation recognized a tax benefit on continuing operations of \$14 million on pretax income of \$220 million, or a negative effective tax rate of 6.2%. The tax rate in the quarter was impacted by \$86 million of tax benefits related to the following discrete items:

\$73 million resulted from the completion of tax audits and the expiration of statutes of limitations in France, Morocco, the Netherlands, the Philippines and various state and local jurisdictions. Of this amount, \$45 million related to the completion of tax audits and \$28 million related to the expiration of statutes of limitations.

\$13 million related to adjustments recorded on the taxes previously provided on the 2007 earnings of the corporation, consisting primarily of a \$14 million overstatement related to an intercompany transaction.

Income from Continuing Operations and Diluted Earnings per Share (EPS)

Income from continuing operations in the third quarter of 2009 was \$165 million versus \$234 million in the comparable period of the prior year, a decrease of \$69 million, which is due to the following factors: a \$77 million increase in income tax expense; a \$12 million increase in net interest expense, partially offset by a \$20 million increase in operating income.

Edgar Filing: Sara Lee Corp - Form 10-Q

Diluted EPS from continuing operations decreased from \$0.33 in the third quarter of 2008 to \$0.24 in the third quarter of 2009, a decrease of \$0.09. Diluted EPS was favorably impacted by lower average shares outstanding during the third quarter of 2009 than during the third quarter of 2008. The lower average shares are due to the corporation's ongoing share repurchase program.

Table of Contents*Discontinued Operations*

There are no results associated with discontinued operations in the third quarter of 2009. In the third quarter of 2008, the results of discontinued operations are related to the Mexican meats business and represent a full quarter of results. The net income from discontinued operations for the third quarter of 2008 was \$1 million. The effective tax rate for this discontinued operation was 26.0%. The loss on disposition of discontinued operations in the third quarter of 2008 was \$23 million before tax and \$24 million after tax, which was related to the sale of the Mexican meats business.

Net Income and Diluted Earnings per Share (EPS)

In the third quarter of 2009, the corporation reported net income of \$165 million versus \$211 million of net income in the comparable period of the prior year. The \$46 million decline was due to the \$77 million increase in income tax expense and the \$12 million increase in net interest expense partially offset by a \$20 million increase in operating income on a year-over-year basis and the favorable impact of a \$24 million non-recurring loss on the sale of a discontinued operation in the prior year. Diluted EPS decreased from \$0.30 per share in the third quarter of 2008 to \$0.24 per share in the third quarter of 2009. Diluted EPS were impacted by lower average shares outstanding during the third quarter of 2009 than during the third quarter of 2008. The lower average shares are due to the corporation's ongoing share repurchase program.

Consolidated Results First Nine Months of 2009 Compared with First Nine Months of 2008

The following table summarizes net sales and operating income for the first nine months of 2009 and 2008 and certain items that affected the comparability of these amounts:

	March 28, 2009	Nine months ended March 29, 2008	Change	Percent Change
Total Corporation Performance (In millions)				
Net sales	\$ 9,717	\$ 9,705	\$ 12	0.1%
Increase / (Decrease) in net sales from:				
Changes in foreign currency exchange rates	\$ 20	\$ 330	\$ (330)	
Acquisitions/Dispositions	20	59	(39)	
Total	\$ 20	\$ 389	\$ (369)	
Operating income	\$ 648	\$ 766	\$ (118)	(15.4)%

Acquisitions/dispositions		1	(1)	
Total	\$ (43)	\$ 116	\$ (159)	

Net Sales

Edgar Filing: Sara Lee Corp - Form 10-Q

Net sales increased by \$12 million or 0.1%. Changes in foreign currency exchange rates, particularly the European euro, British pound, Brazilian real, and Australian dollar, decreased reported net sales by \$330 million, or 3.6%. Sales were favorably impacted by pricing actions, taken across all business segments to offset higher commodity costs, which increased reported net sales by approximately \$465 million or 5% and an improved sales mix. These favorable impacts were partially offset by an overall decline in unit volumes of 2.3%. The following table summarizes the components of the percentage change in net sales as compared to the prior year:

First Nine months 2009

Net Sales Changes	Unit Volumes	+	Price/ Mix/Other	+	Acquisitions/ Divestitures	+	Foreign Exchange	=	Net Sales Change
Total Corporation	(2.3)%		6.4%		(0.4)%		(3.6)%		0.1%

Table of Contents*Operating Income*

Operating income decreased by \$118 million, or 15.4%. Of the decrease, \$159 million was due to the items summarized in the previous table of operating income results, the most significant of which were a \$107 million impairment charge; a \$31 million charge for a pension partial withdrawal liability; a \$44 million increase in charges related to exit activities, asset and business dispositions and a \$34 million unfavorable impact related to changes in foreign currency exchange rates; partially offset by a \$20 million increase in the contingent sale proceeds related to the disposition of the tobacco operations, resulting from a change in foreign currency exchange rates, and a \$17 million gain related to the curtailment of a postretirement health care benefit plan. The remaining increase in operating income of \$41 million, or 6.3%, was primarily due to improved operating segment results and lower other general corporate expenses partially offset by a \$59 million decline in income related to the mark-to-market adjustment on derivative contracts related to commodities as compared to the first nine months of 2008. The individual components that impacted operating income are discussed in more detail below.

Gross Margin

Gross margin dollars for the first nine months of 2009 decreased \$129 million over the prior year due to higher commodity, labor and energy costs, changes in foreign currency exchange rates and lower unit volumes, partially offset by the favorable impact of pricing actions and savings from continuous improvement programs. The corporation estimates that commodity cost increases of approximately \$405 million in the first nine months of 2009 versus the first nine months of 2008, including the impact of commodity derivatives, were offset by favorable pricing actions of approximately \$465 million. The gross margin percent in the first nine months of 2009 declined 1.4%, from 38.2% in the first nine months of 2008 to 36.8% in the first nine months of 2009 due to the negative impact of higher commodity costs.

Selling, General and Administrative Expenses

(In millions)	Nine months ended			
	March 28, 2009	March 29, 2008	Change	Percent Change
SG&A expenses in the business segment results:				
Media advertising and promotion	\$ 392	\$ 469	\$ (77)	(16.4)%
Other	2,288	2,366	(78)	(3.3)
Total business segments	2,680	2,835	(155)	(5.5)
Amortization of identifiable intangibles	48	49	(1)	(2.0)
General corporate expenses:				
Other	169	188	(19)	(9.9)
Mark-to-market derivative (gains) / losses	25	(8)	33	NM
Total SG&A Expenses	\$ 2,922	\$ 3,064	\$ (142)	(4.6)%

Selling, general and administrative (SG&A) expenses decreased by \$142 million, or 4.6%. Measured as a percent of sales, SG&A expenses decreased from 31.6% in 2008 to 30.1% in 2009. Changes in foreign currency exchange rates decreased SG&A costs by \$101 million, or 3.2%. The remaining decrease in SG&A expenses is \$41 million, or 1.4%. SG&A expenses in the business segments decreased by \$155 million, or 5.5%, due to a \$77 million reduction in media advertising and promotion expenses, changes in foreign currency exchange rates and the favorable impact of cost containment efforts. Other general corporate expenses decreased \$19 million versus the prior year due to lower employee benefit costs and favorable foreign currency transactions partially offset by increased professional fees for consulting and special project work. General corporate expenses were also favorably impacted by approximately \$20 million related to certain nonrecurring items primarily a non-income related foreign tax refund and a reduction in contingent lease accruals. Derivative losses were \$25 million in 2009 versus gains of \$8 million in 2008, due to mark-to-market losses incurred on commodity related derivative contracts primarily related to energy.

Table of Contents

Transformation/Accelerate Actions, Impairment Charges, Exit Activities and Other Significant Items

The reported results for the first nine months of 2009 and 2008 reflect amounts recognized for actions associated with the corporation's ongoing business transformation and Project Accelerate programs and other exit and disposal actions. The expense related to exit activities, asset and business dispositions was \$52 million in the first nine months of 2009 versus \$8 million in the first nine months of 2008. As discussed in Note 6 to the financial statements, Exit, Disposal and Transformation/Accelerate Activities, \$58 million of the charge in 2009 relates to the planned termination of 570 employees related to both European and North American operations as part of Project Accelerate. The charge is partially offset by a gain on the sale of a sauces and dressings business.

Transformation costs related to information technology were down \$16 million primarily due to a reduction in costs related to the implementation of new information technology systems. The transformation IT costs in the first nine months of 2009 include \$16 million of computer software amortization expense related to systems that were put into use in 2008. The total amortization expense for the year is expected to be \$22 million.

The corporation recognized a \$107 million impairment charge in the second quarter of 2009 related to goodwill associated with the foodservice beverage reporting unit. The corporation determined that the carrying amount of its foodservice beverage reporting unit, which is reported in the North American Foodservice segment, exceeded its fair value. Management compared the implied fair value of the goodwill in the reporting unit with the carrying value and concluded that an impairment charge needed to be recognized. No tax benefit was recognized on the goodwill impairment loss.

These actions are more fully described in the Exit, Disposal and Transformation/Accelerate Activities and Impairment and Goodwill Notes to the Consolidated Financial Statements.

Receipt of Contingent Sale Proceeds

The corporation sold its European cut tobacco business in 1999. Under the terms of that agreement, the corporation will receive an annual cash payment of 95 million euros. The 2009 annual payment was equivalent to \$150 million and the 2008 annual payment was equivalent to \$130 million based upon the respective exchange rates on the dates of receipt. The amount received in 2008 increased diluted earnings per share by \$0.18 and the amount received in 2009 is expected to increase diluted earnings per share by \$0.21.

Net Interest Expense

Net interest expense in the first nine months of 2009 was \$94 million, an increase of \$17 million over the first nine months of the prior year. Interest expense declined by \$11 million due to the repayment of debt using proceeds from prior business dispositions and cash on hand, while interest income declined by \$28 million due to lower cash and cash equivalents.

Income Tax Expense

Note 11 to the Consolidated Financial Statements provides a detailed explanation of the determination of the interim tax provision.

Table of Contents

The following table sets out the tax expense and effective tax rate for the corporation's continuing operations:

(In millions)	First Nine Months	
	2009	2008
Continuing operations		
Income before income taxes	\$ 554	\$ 689
Income tax expense	176	73
Effective tax rate	31.8%	10.6%

For the first nine months of 2009, the corporation recognized tax expense on continuing operations of \$176 million or an effective tax rate of 31.8%. The tax expense and related effective tax rate on continuing operations was determined by applying a 30.1% estimated annual effective tax rate to pretax earnings and then recognizing the impact of \$9 million of tax expense related to the following discrete tax items:

\$5 million benefit relates to adjustments of prior year tax provision estimates.

\$13 million expense relates to adjustments of taxes previously provided on the 2008 earnings of the corporation, consisting primarily of a net \$4 million understatement of tax related to foreign exchange gains, and a \$10 million write-off of state tax benefits on foreign exchange losses offset by \$1 million of other provision adjustments.

\$1 million expense relates to various discrete items, none of which were material individually or in the aggregate. The annual effective tax rate of 30.1% includes an estimated charge of \$56 million to repatriate a portion of 2009 foreign earnings. This estimated annual charge increases the estimated annual effective tax rate by approximately 7%. However, the corporation's estimated annual effective tax rate decreased compared to the prior quarter from 34.0% to 30.1% due to a \$29 million non-recurring tax benefit from foreign exchange gains.

For the first nine months of 2008, the corporation recognized a tax expense on continuing operations of \$73 million or an effective tax rate of 10.6%. The estimated annual effective tax rate on ordinary income for the first nine months of 2008 was 30.4%, which includes an annual charge of \$97 million to repatriate a portion of 2008 foreign earnings. The tax expense and related effective tax rate on continuing operations was determined by applying the 30.4% estimated annual tax rate to pretax earnings and then recognizing the impact of \$136 million of tax benefits related to the following discrete items:

\$37 million reversal of valuation allowances on German net deferred tax assets. The corporation determined that a valuation allowance was no longer necessary due to the recent projected profitability of the German operations.

\$79 million resulting from the completion of tax audits and the expiration of the statutes of limitations. Of this amount, \$48 million related to the completion of tax audits and \$31 million related to the expiration of statutes of limitations.

\$13 million related to adjustments recorded on taxes previously provided on the 2007 earnings of the corporation, consisting primarily of a \$14 million overstatement related to an intercompany transaction.

\$7 million related to the reduction of contingent tax obligations due to a change in estimated foreign earnings.

Income from Continuing Operations and Diluted Earnings per Share (EPS)

Edgar Filing: Sara Lee Corp - Form 10-Q

Income from continuing operations in the first nine months of 2009 was \$378 million versus \$616 million in the comparable period of the prior year, a decrease of \$238 million, which is due to the following factors: a \$118 million decrease in operating income primarily due to a \$107 million impairment charge; a \$103 million increase in income tax expense; and a \$17 million increase in net interest expense.

Diluted EPS from continuing operations decreased \$0.32, from \$0.86 in the first nine months of 2008 to \$0.54 in the first nine months of 2009. Diluted EPS was favorably impacted by lower average shares outstanding during the first nine months of 2009 than the first nine months of 2008. The lower average shares are due to the corporation's ongoing share repurchase program.

Table of Contents*Discontinued Operations*

There are no results associated with discontinued operations in the first nine months of 2009. In the first nine months of 2008, the results of discontinued operations are related to the Mexican meats business and represent a full nine months of results. The net income from discontinued operations for the first nine months of 2008 was \$1 million. The effective tax rate for this discontinued operation was 46.8%. The loss on disposition of discontinued operations in the first nine months of 2008 was \$23 million before income taxes and \$24 million after tax, which was related to the sale of the Mexican meats business.

Net Income and Diluted Earnings per Share (EPS)

Net income in the first nine months of 2009 was \$378 million versus \$593 million in the comparable period of the prior year. The \$215 million decrease was due to a \$118 million decline in operating income year over year, a \$17 million increase in net interest expense as well as a \$103 million increase in income taxes partially offset by the favorable impact of a \$24 million non-recurring loss on the sale of a discontinued operation in the prior year. Diluted EPS decreased from \$0.82 per share in the first nine months of 2008 to \$0.54 per share in the first nine months of 2009. Diluted EPS were favorably impacted by lower average shares outstanding during the first nine months of 2009 than during the first nine months of 2008. The lower average shares are due to the corporation's ongoing share repurchase program.

Operating Results by Business Segment

Beginning in fiscal 2009, the corporation implemented certain changes to its North American organizational structure that primarily involved the transfers of (i) the frozen bakery and beverage (Senseo) operations from the North American Retail Bakery segment into the North American Retail Meats segment, and (ii) a small component of the Foodservice meats operation into the North American Retail Meats segment. As a result of this reorganization, the three North American segments have been renamed as follows: North American Retail (previously named North American Retail Meats), North American Fresh Bakery (previously North American Retail Bakery) and North American Foodservice (previously Foodservice). The changes did not impact the international segments and did not have a material impact on the segment assets of the North American operations. The corporation has revised the name of the Household and Body Care segment to International Household and Body Care. Segment information has been revised to be consistent with the new basis of presentation.

The corporation uses derivative financial instruments to manage its exposure to commodity prices. A commodity derivative not declared a hedge in accordance with SFAS 133, Accounting for Derivative Instruments and Hedging Activities, is accounted for under mark-to-market accounting with changes in fair value recorded in the Consolidated Statements of Income. Prior to 2009, gains and losses on unrealized commodity derivatives accounted for under mark-to-market accounting were included in segment operating income. In 2009, the corporation now includes these mark-to-market gains and losses in general corporate expenses until such time that the exposure being hedged affects the earnings of the business segment. At that time, the cumulative gain or loss previously recorded in general corporate expenses for the derivative instrument will be reclassified into the business segment's results. Segment information has been revised to be consistent with the new basis of presentation.

Net sales by business segment for the third quarter and first nine months of 2009 and 2008 are as follows:

(In millions)	Net Sales			
	Quarter ended		Nine months ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
North American Retail	\$ 646	\$ 627	\$ 2,072	\$ 1,930
North American Fresh Bakery	530	499	1,640	1,474
North American Foodservice	487	522	1,638	1,649
International Beverage	736	807	2,280	2,334
International Bakery	178	231	603	686
International Household and Body Care	459	571	1,511	1,674
Total business segments	3,036	3,257	9,744	9,747
Intersegment sales	(8)	(14)	(27)	(42)
Net sales	\$ 3,028	\$ 3,243	\$ 9,717	\$ 9,705

Table of Contents

Income (loss) before income taxes for the third quarter and first nine months of 2009 and 2008 are as follows:

(In millions)	Income (Loss) Before Income Taxes			
	Quarter ended		Nine months ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008

Table of Contents

The following tables summarize the operating segment net sales and operating income for 2009 and 2008 and certain items that affected the comparability of these amounts:

North American Retail

(In millions)	Quarter Ended				Nine months Ended			
	Mar. 28, 2009	Mar. 29, 2008	Change	Percent Change	Mar. 28, 2009	Mar. 29, 2008	Change	Percent Change
Net Sales	\$ 646	\$ 627	\$ 19	3.1%	\$ 2,072	\$ 1,930	\$ 142	7.4%
Operating segment income	\$ 66	\$ 46	\$ 20	42.6%	\$ 197	\$ 111	\$ 86	77.1%
Increase/(decrease) in operating segment income from Exit activities, asset and business dispositions	\$	\$ 1	\$ (1)		\$ 1	\$ 1	\$	
Transformation/Accelerate charges						(2)	2	
Total	\$	\$ 1	\$ (1)		\$ 1	\$ (1)	\$ 2	
Gross margin %	30.3%	30.4%		(0.1)%	28.7%	28.3%		0.4%

Third Quarter

Net sales increased by \$19 million, or 3.1%. Sales increased as a result of positive pricing actions to offset higher commodity and other raw material costs, which increased net sales by approximately 7%, and an improved sales mix driven by innovation and SKU rationalization. The improved sales mix related to a shift to higher priced branded lunchmeats and hot dogs. These favorable impacts on sales were partially offset by a decline in unit volumes. Unit volumes decreased 6.1% as strong unit volume growth for hot dogs, breakfast entrees and breakfast bowls, corn dogs and sliced meats were more than offset by the impact of the exit of the kosher meats business and the continuing exit of the commodity hog business, as well as the volume impact of the SKU rationalization and pricing actions executed to improve margins.

Operating segment income increased by \$20 million, or 42.6%. The increase in operating segment income was due to the favorable impact of pricing actions; a reduction in MAP spending; an improved product mix; and savings from continuous improvement programs; which were partially offset by higher commodity, labor, and fuel costs; and lower unit volumes.

First Nine months

Net sales increased by \$142 million, or 7.4%. Positive pricing actions to offset higher commodity and other raw material costs increased net sales by approximately 7%. The increase in net sales was also driven by an improved sales mix. The improved sales mix related to a shift to higher priced branded lunchmeats. These improvements were partially offset by a decline in unit volumes. Unit volumes declined 2.0%, as volume growth in breakfast sausage, sliced meats, hot dogs, corn dogs, and smoked sausage were offset by declines in commodity and retail deli meat products, and frozen bakery products, as well as the volume impact of the SKU rationalization and pricing actions.

Operating segment income increased by \$86 million, or 77.1%. The net impact of the change in exit activities, asset and business dispositions and transformation/Accelerate charges increased operating segment income by \$2 million. The remaining operating segment income increase of \$84 million, or 75.3%, was due to the favorable impact of pricing actions; a reduction in MAP spending; savings from continuous improvement programs; and an improved product mix; which were partially offset by higher commodity, labor and fuel costs and lower unit volumes.

Table of Contents**North American Fresh Bakery**

(In millions)	Quarter Ended				Nine months Ended			
	Mar. 28, 2009	Mar. 29, 2008	Change	Percent Change	Mar. 28, 2009	Mar. 29, 2008	Change	Percent Change
Net Sales	\$ 530	\$ 499	\$ 31	6.4%	\$ 1,640	\$ 1,474	\$ 166	11.3%
Operating segment income (loss)	\$ 4	\$ 14	\$ (10)	(74.2)%	\$ 9	\$ 31	\$ (22)	(72.6)%
Increase/(decrease) in operating segment income from:								
Pension partial withdrawal liability charge	\$ (1)	\$	\$ (1)		\$ (31)	\$	\$ (31)	
Gross margin %	45.6%	47.3%		(1.7)%	44.9%	47.0%		(2.1)%

Third Quarter

Net sales increased by \$31 million, or 6.4%. The increase in net sales was primarily attributable to positive pricing actions to cover higher wheat and other input costs, which increased net sales by approximately 5%, and an increase in unit volumes. Unit volumes increased 2.5% due to higher unit volumes for non-branded fresh bakery products offsetting flat branded retail volumes and a decline in the restaurant and institutional channel. The increase in non-branded unit volumes was due to some existing customers emphasizing private label and a net gain in new private label customers versus the prior year. The flat branded unit volume was due to an increased shift to unbranded private label products as a result of the weak economic conditions.

Operating segment income decreased by \$10 million, or 74.2%. Operating segment income comparison was negatively impacted by nonrecurring gains from the early termination of certain commodity contracts in the prior year, higher costs for key ingredients and wages, an unfavorable sales mix shift to lower margin products, and higher SG&A costs driven by higher sales commissions and higher labor and other employee benefit costs. These declines were only partially offset by the benefit of price increases, unit volume gains, and savings from continuous improvement programs.

First Nine months

Net sales increased by \$166 million, or 11.3%. The increase in net sales was primarily attributable to positive pricing actions to cover higher wheat and other input costs, which increased net sales by approximately 8%, and an increase in unit volumes. Unit volumes increased 4.1% due to higher unit volumes for both branded and non-branded fresh bakery products. The increase in branded products was due in part to increased promotional activity. The increase in non-branded unit volumes was due to some existing customers emphasizing private label as a result of an increasing shift to private label due to the weak economic conditions and a net gain in new private label customers versus the prior year.

Operating segment income decreased by \$22 million, or 72.6%. Operating segment income was negatively impacted by a \$31 million charge to recognize a partial withdrawal liability related to a multi-employer pension plan. The remaining operating segment income increase of \$9 million, or 27.2%, was attributable to the benefit of price increases, unit volume gains, and savings from continuous improvement programs. These increases were partially offset by higher costs for key ingredients and wages; an unfavorable sales mix shift to lower margin private label products; higher SG&A costs driven by higher sales commissions and higher labor, other employee benefits and fuel costs; and the negative impact of nonrecurring gains from the early termination of certain commodity contracts in the prior year.

Third Quarter

Net sales decreased by \$35 million, or 6.7%. Changes in foreign currency, primarily the Canadian dollar, decreased net sales by \$2 million. Dispositions, which include the DSD beverage business and a sauces and dressings business, after the start of the third quarter of 2008 reduced net sales by \$24 million. The remaining net sales decrease of \$9 million, or 1.8%, was due to unit volume declines for meat, bakery and beverage products partially offset by higher product pricing to cover the increase in key raw material costs across all categories. The positive pricing actions increased sales by approximately 4%. Overall net unit volumes decreased 6.3%. A decline in volumes for foodservice pizza dough was partially offset by growth in refrigerated dough and frozen bakery products. The decline in beverage volumes was driven by softness in traditional roast and ground and other coffee products due to competitive and economic pressures, while the decline in meat volumes was driven in part by the planned exit of certain lower margin business and demand softness.

Operating segment income decreased by \$3 million, or 7.7%. The negative impact of the change in exit activities, asset and business dispositions decreased operating segment income by \$3 million. Dispositions after the start of the third quarter of 2008 reduced operating segment income by \$1 million. The remaining operating segment income increase of \$1 million, or 5.4% was due to the favorable impact of pricing actions, continuous improvement savings, and lower selling, general and administrative costs, which were only partially offset by higher commodity and labor costs and lower unit volumes.

First Nine months

Net sales decreased by \$11 million, or 0.7%. Changes in foreign currency, primarily the Canadian dollar, decreased net sales by \$4 million. Dispositions after the start of 2008 reduced net sales by \$41 million. The remaining net sales increase of \$34 million, or 2.1% was due to higher product pricing to cover the increase in key raw material costs across all categories and an improved product sales mix. The positive pricing actions increased sales by approximately 6%. These increases were partially offset by unit volume declines

Table of Contents

for beverage, meat and bakery products. Overall net unit volumes decreased 3.9%. The decline in beverage volumes was driven by softness in traditional roast and ground and other coffee products due to competitive and economic pressures, while the decline in meat volumes was driven in part by the planned exit of certain lower margin business as well as demand softness. A slight decline in volumes for bakery products was driven by volume softness in foodservice pizza dough offset by growth in refrigerated dough and frozen bakery products.

Operating segment income decreased by \$90 million due to the impact of a \$107 million impairment charge related to goodwill associated with the beverage business. The net impact of the change in exit activities, asset and business dispositions increased operating segment income by \$1 million. Dispositions after the start of 2008 reduced operating segment income by \$2 million. The remaining operating segment income increase of \$18 million, or 18.3% was due to the favorable impact of pricing actions, continuous improvement savings and lower selling, general and administrative costs, which were only partially offset by higher commodity and labor costs and lower unit volumes.

Third Quarter

Net sales decreased by \$71 million, or 8.8%. The impact of foreign currency changes, particularly in the European euro and Brazilian real, decreased reported net sales by \$131 million, or 17.5%. The acquisition of a beverage business in Brazil, net of dispositions after the start of the third quarter of 2008, increased sales by \$9 million, or 1.0%. The remaining increase in net sales of \$51 million, or 7.7%, resulted from increased green coffee export sales in Brazil, price increases to offset higher commodity costs, and a favorable sales mix shift. Pricing actions represented approximately 2% of the increase in net sales. Unit volumes were virtually flat with a decline of 0.1% as volume growth in single serve coffee, instant and coffee concentrates were offset by declines in roast and ground. Retail volumes in Europe decreased due to volume declines in traditional roast and ground due in part to competitive pressures from private label and hard discounters as well as weak economic conditions throughout Europe, which was partially offset by increases in single serve coffee volumes due to improvements in France and Germany. The volume declines in Europe were partially offset by improved volumes in Brazil during the quarter. Unit volumes in the foodservice channel decreased despite the growth in concentrates in Europe.

Table of Contents

Operating segment income increased by \$1 million, or 0.3%. Changes in foreign currency exchange rates decreased operating segment income by \$18 million, or 17.3%. The net impact of the change in exit activities, asset and business dispositions and transformation/Accelerate charges decreased operating segment income by \$5 million. Acquisitions net of dispositions after the start of the third quarter of 2008 decreased operating segment income by \$5 million. The remaining operating segment income increase of \$29 million, or 25.7% was due to positive pricing actions, a favorable shift in sales mix and the benefits of continuous improvement programs, and lower MAP expenses as well as other selling, general and administrative costs which were partially offset by higher green coffee costs and higher costs for packaging and energy, and losses associated with foreign exchange derivative contracts.

First Nine months

Net sales decreased by \$54 million, or 2.3%. The impact of foreign currency changes, particularly in the European euro, Brazilian real, Australian dollar, and British pound, decreased reported net sales by \$150 million, or 6.7%. Acquisitions net of dispositions after the start of 2008 increased sales by \$13 million, or 0.6%. The remaining increase in net sales of \$83 million, or 3.8% resulted from price increases to offset higher commodity costs, a favorable sales mix shift, and increased green coffee export sales in Brazil, which were partially offset by lower unit volumes. Pricing actions represented approximately 3% of the overall increase in net sales. Unit volumes decreased 3.2% due to declines in the retail channel in both Europe and Brazil. Retail volumes in Europe decreased due to volume declines in traditional roast and ground due in part to competitive pressures from private label and hard discounters as well as the weak economic conditions throughout Europe, partially offset by growth in single serve coffee in France and Germany. Unit volumes declined in Brazil due in part to prior price increases. Unit volumes in the foodservice channel increased slightly due in part to the growth in concentrates in Europe.

Operating segment income increased by \$3 million, or 0.8%. Changes in foreign currency exchange rates decreased operating segment income by \$19 million, or 5.0%. The net impact of the change in exit activities, asset and business dispositions, transformation/Accelerate charges and accelerated depreciation decreased operating segment income by \$4 million. Operating results were favorably impacted by a \$12 million curtailment gain related to postretirement benefit plan changes. The remaining operating segment income increase of \$14 million, or 3.6% was due to pricing actions, a favorable shift in sales mix, and the benefits of continuous improvement programs, which were partially offset by the impact of higher green coffee costs and the decline in unit volumes.

Third Quarter

Net sales decreased by \$53 million, or 23.2%. The impact of foreign currency changes in the European euro and Australian dollar decreased reported net sales by \$32 million, or 12.8%. A disposition subsequent to the start of the third quarter of 2008 reduced net sales by \$4 million, or 1.3%. The remaining net sales decrease of \$17 million, or 9.1%, was the result of unit volume declines. The negative impact of the volume declines was partially offset by price increases in response to higher commodity costs, which increased net sales by approximately 3%. Net unit volumes decreased 12.5% due to a decline in fresh bread volumes in Spain, as a result of the loss of some private label business as well as a reduction in branded sales due in part to economic and competitive pressures; and a decrease in refrigerated dough volumes in Europe. These volume declines were partially offset by increased volumes in Australia.

Operating segment income decreased by \$6 million, or 29.5%. Changes in foreign currency rates decreased operating segment income by \$2 million, or 9.0%. The net change in exit activities, asset and business dispositions and transformation/Accelerate charges decreased operating segment income by \$1 million. The remaining decrease in operating segment income was \$3 million, or 17.0%, as the impact of lower unit volumes, and higher costs associated with key raw materials were partially offset by price increases, continuous improvement savings and lower SG&A costs due to cost control efforts.

First Nine months

Net sales decreased by \$83 million, or 12.1%. The impact of foreign currency changes, particularly in the European euro and the Australian dollar, decreased reported net sales by \$36 million, or 5.0%. A disposition subsequent to the start of 2008 reduced net sales by \$11 million, or 1.4%. The remaining net sales decrease of \$36 million, or 5.7%, was the result of unit volume declines and an unfavorable sales mix shift. These negative factors were partially offset by price increases in response to higher commodity costs, which increased net sales by approximately 7%. Net unit volumes decreased 11.7% due to a decline in fresh bread volumes in Spain as a result of the loss of some private label business as well as a reduction in branded sales due in part to economic and competitive pressures; a decrease in refrigerated dough volumes in Europe due to soft peak season sales; and a volume decline in Australia due in part to the planned exit of certain lower margin business.

Operating segment income decreased by \$32 million, or 81.7%. The net change in exit activities, asset and business dispositions and transformation/Accelerate charges decreased operating segment income by \$22 million, while a disposition subsequent to the start of 2008 increased operating segment income by \$1 million. Changes in foreign currency rates decreased operating segment income by \$2 million, or 3.1%. The remaining decrease in operating segment income was \$9 million, or 19.2%, as the impact of lower unit volumes, higher costs associated with key raw materials, and an unfavorable sales mix shift were partially offset by price increases, continuous improvement savings and lower SG&A costs due to cost control efforts.

Third Quarter

Net sales decreased by \$112 million, or 19.7%. The impact of changes in foreign currency exchange rates, particularly the European euro, British pound and Indian rupee, decreased reported net sales by \$93 million, or 15.6%. The remaining net sales decrease of \$19 million, or 4.1%, was due to the impact of lower unit volumes. Unit volumes decreased 6.7% for the four core categories – shoe care, body care, air care and insecticides – declines in air care products were due to weakness in Western Europe and the U.K. as a result of competitive pressures and a deteriorating economic environment; declines in shoe care products were due to weakness in the U.S. and Russia; and declines in unit volumes of insecticides were due to shortfalls in Russia and Western Europe partially offset by growth in India. These volumes declines were partially offset by increases in body care products, driven by higher volumes for bath and shower products.

Operating segment income decreased \$20 million, or 26.2%. Changes in foreign currency exchange rates decreased operating segment income by \$12 million, or 14.4%. The net change in exit activities, asset and business dispositions and transformation/Accelerate charges decreased operating segment income by \$3 million. The remaining operating segment income decrease of \$5 million, or 7.2%, was due to lower unit volumes and higher raw material and manufacturing costs, which were partially offset by lower media advertising and promotion expense and savings from continuous improvement initiatives.

First Nine months -

Net sales decreased by \$163 million, or 9.8%. The impact of changes in foreign currency exchange rates, particularly the British pound, European euro and Indian rupee, decreased reported net sales by \$140 million, or 8.3%. The remaining net sales decrease of \$23 million, or 1.5%, was primarily due to a decline in unit volumes partially offset by the favorable impact of price increases. Pricing actions increased net sales by approximately 1%. Unit volumes decreased 2.4% for the four core categories – shoe care, body care, air care and insecticides – increases in unit volumes of insecticides, driven by growth in Western Europe, due in part to improved weather conditions, and India; and increases in body care products, driven by growth in both deodorant and bath and shower products; were offset by declines in shoe care products, due to weakness in the U.S. and Russia; and declines in air care products due to weakness in Western Europe and the U.K. as a result of competitive pressures and a deteriorating economic environment.

Table of Contents

Operating segment income decreased \$38 million, or 18.9%. Changes in foreign currency exchange rates decreased operating segment income by \$21 million, or 9.6%. The net change in exit activities, asset and business dispositions and transformation/Accelerate charges decreased operating segment income by \$8 million. Operating results were favorably impacted by a \$5 million curtailment gain related to postretirement benefit plan changes. The remaining operating segment income decrease of \$14 million, or 7.7%, was due to lower unit volumes, higher raw material and manufacturing costs and an unfavorable sales mix, which were partially offset by lower media advertising and promotion expense and savings from continuous improvement initiatives.

Financial Condition

Cash from Operating Activities

In the first nine months of 2009, \$303 million of cash was generated by operating activities as compared to \$238 million in the first nine months of 2008. The increase in cash generated by operating activities on a year-over-year basis is due to a decrease in the cash used to fund working capital needs. This decrease in working capital was due in part to lower levels of inventory and accounts receivables, as well as a reduction in cash paid for interest and income taxes. These reductions were partially offset by a \$133 million increase in the cash used to fund a reduction in accounts payable. The benefits generated from lower working capital levels were partially offset by an \$87 million increase in cash contributions to pension plans as compared to the prior year.

Cash from Investment Activities

Cash used by investment activities was \$173 million in the first nine months of 2009 as compared to \$120 million in the comparable period of 2008. The increase in cash used by investment activities was due to a \$214 million increase in cash used for derivative transactions in 2009, due in part to an increase in the number of mark-to-market derivative transactions and an increase in cash paid on the settlement of foreign exchange contracts, the majority of which were related to hedges of foreign currency balance sheet exposures. This increased use of cash was partially offset by a \$114 million reduction in expenditures for the purchases of property, equipment, software and other intangibles, from \$350 million in 2008 to \$236 million in 2009. In addition, the cash received from contingent sale proceeds in the first nine months of 2009 was \$20 million higher, solely due to changes in foreign currency exchange rates. The corporation also received \$55 million related to the disposition of a portion of the foodservice beverage business and a sauces and dressings business, which was partially offset by \$10 million of cash paid for the acquisition of a coffee business in Brazil in 2009.

Cash from Financing Activities

Net cash used in financing activities was \$529 million during the first nine months of 2009 as compared to \$1,540 million in the prior year period. The year-over-year decline in cash used was due to a \$663 million reduction in cash used to repay long-term debt and a \$212 million reduction in cash used to repurchase common stock. In 2008, the corporation repaid \$1,003 million of long-term debt that matured during the first nine months using cash on hand, while in the first nine months of 2009, \$340 million of cash was used to repay long-term debt using the proceeds from additional borrowings of long-term debt. During the first nine months of 2008, the corporation repurchased \$315 million of common stock, while in the first nine months of 2009 the corporation repurchased \$103 million of common stock. The cash dividends paid were virtually the same in both years, \$226 million in 2009 and \$222 million in 2008.

Liquidity

Notes Payable/Cash and Equivalents

Notes payable consists primarily of commercial paper obligations. The balance of notes payable at March 28, 2009 of \$24 million was \$256 million lower than the amount reported at June 28, 2008. The corporation had cash and cash equivalents on the balance

Table of Contents

sheet at March 28, 2009 of \$665 million, which was \$619 million lower than the balance at June 28, 2008, due in part to the use of cash to repay debt, repurchase stock and pay dividends as well as the \$220 million negative impact of changes in foreign currency exchange rates, as a large portion of the cash is denominated in euros. Despite the recent reduced liquidity in the credit markets, the corporation has been able to continue using the commercial paper market to fund short-term borrowing needs.

Credit Facility and Credit Ratings

The corporation has a \$1.85 billion five-year revolving credit facility available that management considers sufficient to satisfy its operating requirements. This facility expires in December 2011 and the pricing under this facility is based upon the corporation's current credit rating. At March 28, 2009, the corporation did not have any borrowings outstanding under the credit facility and the facility does not mature or terminate upon a credit rating downgrade.

The corporation's credit ratings by Standard & Poor's, Moody's Investors Service and FitchRatings, as of March 28, 2009, were as follows:

	Senior		
	Unsecured	Short-term	
	Obligations	Borrowings	Outlook
Standard & Poor's	BBB+	A-2	Negative
Moody's Investors Service	Baa1	P-2	Stable
FitchRatings	BBB	F-2	Positive

Changes in the corporation's credit ratings result in changes in the corporation's borrowing costs. The corporation's current short-term credit rating allows it to participate in a commercial paper market that has a number of potential investors and a higher degree of liquidity. A downgrade of the corporation's short-term credit rating would place the corporation in a commercial paper market that would contain significantly less market liquidity than it currently operates in with a rating of A-2, P-2 or F-2. This would reduce the amount of commercial paper the corporation could issue and raise its commercial paper borrowing cost. To the extent that the corporation's operating requirements were to exceed its ability to issue commercial paper following a downgrade of its short-term credit rating, the corporation has the ability to use available credit facilities to satisfy operating requirements, if necessary.

Debt

The corporation's total long-term debt increased \$27 million in the first nine months of 2009, from \$2,908 million at June 28, 2008, to \$2,935 million at March 28, 2009, as a result of a new 2-year financing arrangement for 285 million euros at EURIBOR plus 1.75% that was entered into in January 2009 partially offset by the repayment of \$340 million of maturing long-term debt during the first nine months and the impact of changes in foreign currency exchange rates.

The corporation's total long-term debt of \$2,935 million is due to be repaid as follows: \$164 million in the remainder of 2009; \$51 million in 2010; \$403 million in 2011; \$1,159 million in 2012; \$529 million in 2013; \$21 million in 2014; and \$608 million thereafter. These maturing debt obligations are expected to be satisfied with a combination of new long-term debt issuances, short-term borrowings, cash on hand, and operating cash flows. Approximately 265 million euros of debt matured in December 2008 was repaid during the second quarter. In January 2009, the corporation entered into a new 2-year financing arrangement for 285 million euros at EURIBOR plus 1.75%.

Including the impact of swaps that are effective hedges and convert the economic characteristics of the debt, the corporation's long-term debt and notes payable consist of approximately 70% fixed-rate debt as of March 28, 2009, as compared with 66% as of June 28, 2008. The increase in fixed-rate debt at March 28, 2009 versus June 28, 2008 is due to the repayment of the variable rate euro debt noted above. The corporation monitors the interest rate environments in the geographic regions in which it operates and modifies the components of its debt portfolio as necessary to manage interest rate and foreign currency risks.

Table of Contents

Covenants

The corporation's debt agreements and credit facility contain customary representations, warranties and events of default, as well as, affirmative, negative and financial covenants with which the corporation is in compliance. One financial covenant includes a requirement to maintain an interest coverage ratio of not less than 2.0 to 1.0. The interest coverage ratio is based on the ratio of EBIT to consolidated net interest expense with consolidated EBIT equal to net income adjusted for interest expense, income tax expense, and extraordinary or non-recurring non-cash charges and gains. For the 12 months ended March 28, 2009, the corporation's interest coverage ratio was 9.5 to 1.0.

Leases

The corporation has numerous operating leases for manufacturing facilities, warehouses, office space, vehicles, machinery and equipment. Operating lease obligations are scheduled to be paid as follows: \$31 million in the remainder of 2009; \$87 million in 2010; \$69 million in 2011; \$46 million in 2012; \$32 million in 2013; \$23 million in 2014; and \$85 million, thereafter. The corporation is contingently liable for certain long-term leases on property operated by others. These leased properties relate to certain businesses that have been sold. The corporation continues to be liable for the remaining terms of the leases on these properties in the event that the owners of the businesses are unable to satisfy the lease liability. The minimum annual rentals under these leases are as follows: \$7 million in the remainder of 2009; \$27 million in 2010; \$21 million in 2011; \$16 million in 2012; \$14 million in 2013; \$12 million in 2014; and \$39 million, thereafter.

Future Contractual Obligations and Commitments

During 2007, the corporation exited a U.S. meat production plant that included a hog slaughtering operation. Certain purchase contracts for the purchase of live hogs at this facility were not exited or transferred after the closure of the facility. Currently, these contracts represent a remaining purchase commitment of approximately 700 thousand hogs through June 2012, approximately 50% of which will expire by December 2009. Under the terms of these contracts, the corporation will continue to purchase these live hogs and therefore, the corporation has entered into a hog sales contract under which these hogs will be sold to another slaughter operator. The corporation's purchase price of these hogs is generally based on the price of corn products, and the corporation's selling price for these hogs is generally based on USDA posted hog prices. Divergent movements in these indices will result in either gains or losses on these hog transactions. Expected losses from these hog purchase commitments are recognized when we determine the loss is probable of occurring.

The corporation has various funding obligations and certain contingent guaranty obligations that are outlined below.

Pension Plans

As shown in the Pension footnote to the Consolidated Financial Statements that was included in the corporation's 2008 Annual Report on Form 10-K, the funded status of the corporation's defined benefit pension plans is defined as the amount by which the projected benefit obligation exceeds the plan assets. The underfunded status of the plans was \$321 million at the end of 2008 as compared to \$580 million at the end of 2007. Further information on the corporation's pension plans is contained in Note 9 to these Consolidated Financial Statements.

In the first nine months of 2009, the corporation contributed \$235 million to these defined benefit pension plans and the corporation anticipates that approximately \$265 million of cash contributions will be made for the entire fiscal year. It is anticipated that the pension contributions expected to be made in 2010 will be approximately the same as the amount expected to be contributed in 2009. The exact amount of cash contributions made to pension plans in any year is dependent upon a number of factors including minimum funding requirements in the jurisdictions in which the company operates and arrangements made with the trustees of certain foreign plans. As a result, actual funding in 2009 and 2010 may be materially different from the current estimate. The Significant Accounting Policies section and Note 19 Defined Benefit Pension Plans to the Consolidated Financial Statements, that are incorporated into the corporation's 2008 Annual Report on Form 10-K, provide a more complete description of the measurement date, assumptions, funded status, expected benefit payments and funding policies related to these defined benefit plans.

Table of Contents

The corporation participates in various multi-employer pension plans that provide retirement benefits to certain employees covered by collective bargaining agreements (MEPP). MEPPs are managed by trustee boards comprised of participating employer and labor union representatives, and participating employers are jointly responsible for any plan underfunding. The corporation's MEPP contributions are established by the applicable collective bargaining agreements; however, our required contributions may increase based on the funded status of the plan and the provisions of the Pension Protection Act, which requires substantially underfunded MEPPs to implement rehabilitation plans to improve funded status. Factors that could impact the funded status of a MEPP include investment performance, changes in the participant demographics, financial stability of contributing employers and changes in actuarial assumptions. In addition to regular scheduled contributions, the corporation could be obligated to make additional contributions (known as a complete or partial withdrawal liability) if a MEPP has unfunded vested benefits. These complete or partial withdrawal liabilities would be triggered if the corporation ceases to make contributions to that MEPP, either completely or with respect to only one or more collective bargaining units. The withdrawal liability would equal the corporation's proportionate share of the unfunded vested benefits, based on the year in which the withdrawal liability is triggered. The corporation believes that certain of the MEPPs in which we participate have unfunded vested benefits. Due to uncertainty regarding future factors that could trigger withdrawal liability, such as the corporation's decision to close a plant or the dissolution of a collective bargaining unit, we are unable to determine the amount and timing of the corporation's future withdrawal liability, if any, or whether the corporation's participation in these MEPPs could have any material adverse impact on its financial condition, results of operations or liquidity. The corporation's regular scheduled contributions to MEPPs totaled \$48 million in 2008, \$47 million in 2007 and \$45 million in 2006. The corporation incurred withdrawal liabilities of approximately \$31 million in 2009, and immaterial amounts in 2008 and 2007.

Repatriation of Foreign Earnings and Income Taxes

The corporation anticipates that it will continue to repatriate a portion of the earnings of its foreign subsidiaries. The projected tax cost associated with the anticipated return of the earnings of foreign subsidiaries will be recognized as the amounts are earned. However, the corporation pays the tax liability upon completing the repatriation action.

At the end of 2008, the corporation had a deferred tax liability of approximately \$125 million for future repatriation actions that had not yet been completed at the end of 2008 but will be completed in 2009. However, due to favorable foreign currency fluctuations, the corporation currently estimates that the cost of such repatriation actions associated with 2008 earnings will be approximately \$109 million. The corporation estimates that the tax cost for the repatriation of a portion of 2009 foreign earnings to the U.S. is approximately \$56 million, with the majority of these taxes expected to be paid in 2010.

Other income or losses generated by the business, as well as the impact of changes in foreign currency exchange rates, will impact the total amount of cash taxes paid in any period. If further repatriation actions are completed in 2009, the amount of cash taxes that are paid in 2009 could increase. Additional repatriation actions may occur in future periods and these actions will require additional cash tax payments. The funding of these tax payments will be made with cash generated from operations, dispositions and short term borrowings.

Transformation/Accelerate Liabilities

The corporation has recognized amounts for transformation, Project Accelerate and other restructuring charges. At March 28, 2009, the corporation had recognized cumulative liabilities of approximately \$107 million that relate primarily to future severance and other lease and contractual payments. These amounts will be paid when the obligation becomes due, and the corporation expects a significant portion of these amounts will be paid over the next twelve months.

Guarantees

The corporation is a party to a variety of agreements under which it may be obligated to indemnify a third party with respect to certain matters. Typically, these obligations arise as a result of contracts entered into by the corporation, under which the corporation agrees

Table of Contents

to indemnify a third party against losses arising from a breach of representations and covenants related to such matters as title to assets sold, the collectibility of receivables, specified environmental matters, lease obligations assumed and certain tax matters. In each of these circumstances, payment by the corporation is conditioned on the other party making a claim pursuant to the procedures specified in the contract. These procedures allow the corporation to challenge the other party's claims. In addition, the corporation's obligations under these agreements may be limited in terms of time and/or amount, and in some cases the corporation may have recourse against third parties for certain payments made by the corporation. It is not possible to predict the maximum potential amount of future payments under certain of these agreements, due to the conditional nature of the corporation's obligations and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the corporation under these agreements have not had a material effect on the corporation's business, financial condition or results of operations. The corporation believes that if it were to incur a loss in any of these matters, such loss would not have a material effect on the corporation's business, financial condition or results of operations.

The material guarantees, within the scope of FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others* (FIN 45), for which the maximum potential amount of future payments can be determined include the corporation's contingent liability on leases on property operated by others which is described above, and the corporation's guarantees of certain third-party debt. These debt guarantees require the corporation to make payments under specific debt arrangements in the event that the third parties default on their debt obligations. The maximum potential amount of future payments that the corporation could be required to make in the event that these third parties default on their debt obligations is approximately \$16 million. At the present time, the corporation does not believe it is probable that any of these third parties will default on the amount subject to guarantee.

Risk Management

The corporation maintains risk management control systems to monitor the foreign exchange, interest rate and commodity risks, and the corporation's offsetting hedge positions. The corporation utilizes derivative instruments to create offsetting hedge positions and accounts for these instruments under either the hedge accounting model or the mark-to-market accounting model. The corporation utilizes the mark-to-market accounting model for certain of these derivative instruments and the change in fair value of derivatives that are accounted for under the mark-to-market accounting model are reported in earnings each period, which can lead to increased volatility in reported earnings.

As outlined in the corporation's 2008 Annual Report filed on Form 10-K with the Securities and Exchange Commission, the corporation's control systems use analytical techniques including market value, sensitivity analysis and value at risk estimations. The value at risk estimations shown in the table below are intended to measure the maximum amount the corporation could lose from adverse market movements in interest rates and foreign exchange rates for a one-day period at a 95% confidence level.

(In millions)	Amounts	Average	Time Interval	Confidence Level
Value at Risk Amounts				
Third quarter 2009				
Interest rates	\$ 30	\$ 30	1 day	95%
Foreign exchange	48	47	1 day	95
Fiscal Year End 2008				
Interest rates	\$ 16	\$ 18	1 day	95%
Foreign exchange	35	27	1 day	95

Sensitivity Analysis For commodity derivative instruments held, the corporation utilizes a sensitivity analysis technique to evaluate the effect that changes in the market value of commodities will have on the corporation's commodity derivative instruments. This analysis includes the commodity derivative instruments and, thereby, does not consider the fair value change in the underlying exposure. At the end of the third quarter of 2009 and the end of 2008, the potential change in fair value of commodity derivative instruments, assuming a 10% change in the underlying commodity price, was \$24.6 million and \$16.0 million, respectively.

Table of Contents

Significant Accounting Policies and Critical Estimates

The corporation's significant accounting policies are discussed in the Notes to the Consolidated Financial Statements that are incorporated in the 2008 Annual Report on Form 10-K that is filed with the Securities and Exchange Commission. The accounting policies and estimates that can have a significant impact upon the operating results, financial position and footnote disclosures of the corporation are described in the Financial Review in the corporation's 2008 Annual Report on Form 10-K.

Issued but not yet Effective Accounting Standards

Accounting for Defined Benefit Pension and Other Postretirement Plans In September 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standard (SFAS) No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, an amendment of FASB Statements No. 87, 88, 106 and 132(R). In accordance with the provisions of SFAS 158, a portion of the requirements have been adopted in 2007 and the remainder will be adopted in 2009, as described below. SFAS 158 requires an employer to recognize the funded status of defined benefit pension and other postretirement benefit plans as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through other comprehensive income in shareholders' equity. The company has recognized the funded status of its defined benefit pension and other postretirement benefit plans at the end of 2007.

SFAS 158 also requires consistent measurement of plan assets and benefit obligations as of the date of the fiscal year end statement of financial position. This provision is effective for the corporation in 2009. As the corporation currently measures the assets and obligations of its defined benefit pension plans and postretirement medical plans as of March 31st of each year, the adoption of this portion of the standard will require a change in the plan measurement date to the fiscal year end. The impact of adopting the measurement date provisions of SFAS 158 will be recorded in the fourth quarter of 2009 as an adjustment to beginning of year retained earnings. The corporation does not believe the impact will be material to the consolidated financial statements.

Fair Value Measurements Effective the beginning of fiscal 2009, the corporation implemented SFAS 157, *Fair Value Measurements* (SFAS 157), for its financial assets and liabilities. SFAS 157 defines fair value, establishes a framework for its measurement, and expands disclosures about fair value measurements. The adoption of SFAS 157 did not have an impact on the measurement of the corporation's financial assets and liabilities, but did result in additional disclosures.

In 2007, the Financial Accounting Standards Board (FASB) issued FASB Staff Position FAS 157-2 (FSP 157-2), which provided a one year deferral for the implementation of SFAS 157 for non-financial assets and liabilities measured at fair value that are recorded or disclosed on a non-recurring basis. The corporation elected to apply the FSP 157-2 deferral, and accordingly, will not apply SFAS 157 to its non-financial assets and liabilities until fiscal 2010. The corporation does not believe the implementation of SFAS 157 for our non-financial assets and liabilities will have a material impact on the consolidated financial statements.

Business Combinations In December 2007, the FASB issued SFAS 141(R), *Business Combinations*, which requires changes in the accounting and reporting of business acquisitions. The statement requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in purchased entities, measured at their fair values at the date of acquisition based upon the definition of fair value outlined in SFAS No. 157. SFAS 141(R) is effective for the corporation for acquisitions that occur beginning in 2010. The corporation is currently evaluating the provisions of this new standard and has not determined the impact of adopting it at this time.

Table of Contents

Minority Interests In December 2007, the FASB issued SFAS 160, Noncontrolling Interests in Consolidated Financial Statements an Amendment of ARB No. 51, which requires changes in the accounting and reporting of noncontrolling interests in a subsidiary, also known as minority interest. The statement clarifies that a minority interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. SFAS 160 is effective for the corporation at the beginning of 2010. The corporation is evaluating the provision of this new standard; however, we currently believe the adoption of SFAS 160 will not have a material impact on the consolidated financial statements.

Employers Disclosures about Postretirement Benefit Plan Assets In December 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 132(R)-1 (FSP FAS 132(R)-1), Employers Disclosures about Postretirement Benefit Plan Assets, which expands the disclosure requirements about plan assets for pension plans, postretirement medical plans, and other funded postretirement plans. Specifically, the rules require disclosure of: i) how investment allocation decisions are made by management; ii) major categories of plan assets; iii) significant concentrations of credit risk within plan assets; iv) the level of the fair value hierarchy in which the fair value measurements of plan assets fall (i.e. level 1, level 2 or level 3); v) Information about the inputs and valuation techniques used to measure the fair value of plan assets; and vi) a reconciliation of the beginning and ending balances of plan assets valued with significant unobservable inputs (i.e. level 3 assets). The reconciliation of level 3 assets shall be broken out by realized gains/losses, unrealized gains/losses, purchases, sales, accounting settlements, and transfers of assets in and out of the level 3 category. FSP FAS 132(R)-1 is required to be adopted by the corporation in fiscal 2010. The corporation is currently evaluating the provisions of this new standard and has not determined the impact of adoption on the consolidated financial statements at this time.

Forward-Looking Information

This document contains certain forward-looking statements, including the anticipated costs and benefits of restructuring and transformation actions, access to credit markets and the corporation's credit ratings, the planned extinguishment of debt, the funding of pension plans, potential payments under guarantees and amounts due under future contractual obligations and commitments, projected capital expenditures, cash tax payments, pension settlement amounts and effective tax rates. In addition, from time to time, in oral statements and written reports, the corporation discusses its expectations regarding the corporation's future performance by making forward-looking statements preceded by terms such as expects, projects, anticipates or believes. These forward-looking statements are based on currently available competitive, financial and economic data, as well as management's views and assumptions regarding future events. Such forward-looking statements are inherently uncertain, and investors must recognize that actual results may differ from those expressed or implied in the forward-looking statements. Consequently, the corporation wishes to caution readers not to place undue reliance on any forward-looking statements. Among the factors that could cause Sara Lee's actual results to differ from such forward-looking statements are factors relating to:

Sara Lee's relationship with its customers, such as (i) a significant change in Sara Lee's business with any of its major customers, such as Wal-Mart, its largest customer, including changes in the level of inventory these customers maintain; and (ii) credit and other business risks associated with customers operating in a highly competitive retail environment;

The consumer marketplace, such as (iii) significant competition, including advertising, promotional and price competition, and changes in consumer demand for Sara Lee's products; (iv) fluctuations in the availability and cost of raw materials, Sara Lee's ability to increase or maintain product prices in response and the impact on Sara Lee's profitability; (v) the impact of various food safety issues and regulations on sales and profitability of Sara Lee products; and (vi) inherent risks in the marketplace associated with new product introductions, including uncertainties about trade and consumer acceptance;

Sara Lee's international operations, such as (vii) impacts on reported earnings from fluctuations in foreign currency exchange rates, particularly the European euro, given Sara Lee's significant concentration of business in Western Europe; (viii) Sara Lee's

Table of Contents

generation of a high percentage of its earnings from businesses outside the U.S. and costs to remit these foreign earnings into the U.S. to fund Sara Lee's domestic operations; (ix) the impact on Sara Lee's business of its announcement that it is reviewing strategic options for its international household and body care business and any decision made as a result of such review; and (x) Sara Lee's ability to continue to source production and conduct manufacturing and selling operations in various countries due to changing business conditions, political environments, import quotas and the financial condition of suppliers;

Previous business decisions, such as (xi) Sara Lee's ability to generate margin improvement through continuous improvement initiatives and transitioning the entire organization to a common information technology system and the risk that the transition to a common information technology system will be disruptive to the business; (xii) Sara Lee's ability to achieve planned cash flows from capital expenditures and acquisitions, particularly its worldwide bakery business, and the impact of changing interest rates and the cost of capital on the discounted value of those planned cash flows, which could impact future impairment analyses; (xiii) credit ratings issued by the three major credit rating agencies and the impact these ratings have on Sara Lee's cost to borrow funds and access to capital/debt markets; (xiv) the settlement of a number of ongoing reviews of Sara Lee's income tax filing positions in various jurisdictions and inherent uncertainties related to the interpretation of tax regulations in the jurisdictions in which Sara Lee transacts business; and (xv) changes in the expense for and contingent liabilities relating to multi-employer pension plans in which Sara Lee participates.

In addition, the corporation's results may also be affected by general factors, such as economic conditions, political developments, interest and inflation rates, accounting standards, taxes and laws and regulations in markets where the corporation competes. Sara Lee undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. We have provided additional information in our Form 10-K for 2008, that readers are encouraged to review, concerning factors that could cause actual results to differ materially from those in the forward-looking statements. Sara Lee undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

ITEM 4 CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The corporation maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports the corporation files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the corporation's management, including its Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding required disclosure based on management's interpretation of the definition of disclosure controls and procedures, in Rules 13a-15(e) and 15d-15(e). In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, rather than absolute, assurance of achieving the desired control objectives, and management necessarily is required to apply its judgment in evaluating the cost/benefit relationship of possible controls and procedures.

Sara Lee's Chief Executive Officer and Chief Financial Officer, with assistance from other members of management, evaluated the effectiveness of Sara Lee's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Quarterly Report on Form 10-Q (the Evaluation Date) and, based upon such evaluation, have concluded that as of the Evaluation Date, the corporation's disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

During the last fiscal quarter there have been no changes in the corporation's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the corporation's internal control over financial reporting.

Table of Contents

PART II

ITEM 1 LEGAL PROCEEDINGS

As described in Sara Lee's annual report on Form 10-K for the fiscal year ended June 28, 2008, Sara Lee is a defendant in a putative class action lawsuit in the United States District Court for the Northern District of Illinois, Eastern Division, captioned In re Sara Lee Securities Litigation (the Federal Suit). The Federal Suit also names as defendants a former chairman, president and chief executive officer and the chief financial officer of Sara Lee. The complaint asserts that the defendants misstated or omitted material adverse facts regarding Sara Lee's business, operations, management, and financial statements, and the value of Sara Lee's common stock, which allegedly enabled Sara Lee to complete securities offerings, enabled the individual defendants to increase their bonus compensation, and caused the class to purchase the stock at artificially inflated prices.

On October 19, 2005, defendants filed a motion for judgment on the pleadings based on the plaintiffs' failure to adequately plead loss causation. On July 10, 2006, the defendants' motion was granted and the Federal Suit was dismissed. On July 24, 2006, plaintiffs moved for relief from final judgment and for leave to amend their complaint. Although plaintiffs' motion is still pending, Sara Lee believes that the allegations in the Federal Suit are without merit. No future court date has been scheduled.

Also as described in Sara Lee's annual report on Form 10-K for the fiscal year ended June 28, 2008, two purported Sara Lee stockholders filed separate individual and derivative actions in the Circuit Court of Cook County, Illinois against Sara Lee, its Board of Directors and certain of its officers for purported breaches of fiduciary duty relating to the allegations that the defendants misstated or omitted material adverse facts regarding Sara Lee's business, operations, management, and financial statements, and the value of Sara Lee's common stock (the Derivative Suit). One complaint also contained a count against Sara Lee's former chairman, president and chief executive officer and former chief financial officer for breach of fiduciary duty related to their alleged insider trading. The now consolidated action was amended on November 13, 2006 to add three new causes of action for alleged abuse of control, waste of corporate assets and unjust enrichment. The amended complaint seeks damages in an unspecified amount, and attorneys' fees and expenses, punitive damages and interest.

On May 10, 2007, the Court granted the defendants' motion to dismiss the Derivative Suit based on ground that plaintiffs failed to make a pre-suit demand upon the company's Board of Directors; however, instead of an outright dismissal, the Court stayed entry of its order to allow plaintiffs the opportunity to make a demand on the company's current Board of Directors. On November 15, 2007, the current Board of Directors received the plaintiffs' demand. The demand letter attached the November 13, 2006 amended complaint but substituted a new plaintiff. In December 2007, the Board of Directors formed a special committee of disinterested directors to investigate plaintiffs' demand. The special litigation committee's report was issued on January 29, 2009, recommending that no claims be asserted against anyone related to the matters raised in plaintiffs' demand. The case is set for status on June 4, 2009.

Before the special litigation committee issued its report, Sara Lee received a settlement demand from the class plaintiffs (class plaintiffs) in the Federal Suit. By agreement with class plaintiffs' counsel, we deferred responding to the demand until after the special litigation committee issued its report and counsel in the Derivative Suit determined whether they are interested in participating in a global mediation of both the Federal Suit and the Derivative Suit together.

Table of Contents

Recently, we received a settlement demand from the plaintiffs in the Derivative Suit. Counsel for the class plaintiffs and Sara Lee have mutually selected a mediator. We have reported to the court the parties' intent to mediate. We anticipate engaging in a one-day mediation in an effort to achieve a global resolution of both the Federal Suit and the Derivative Suit. The mediation has been scheduled for June 10, 2009.

ITEM 1A RISK FACTORS

There have been no material changes from the risk factors disclosed in Part I, Item 1A of our annual report on Form 10-K for the fiscal year ended June 28, 2008, except as follows:

Current economic conditions may negatively impact demand for our products, which could adversely impact our sales and operating profit.

Economic and market conditions have deteriorated significantly in many locations in which the company operates, including the United States and Europe, and these difficult conditions may continue to exist for the foreseeable future. This deterioration has had and may continue to have a negative impact on our business. Economic uncertainty has created a shift in consumer preference toward private label products, and may result in increased pressure to reduce the prices for some of our products and/or limit our ability to increase or maintain prices. Purchases of discretionary items by consumers, including some of our products, could decline during times of economic uncertainty. In addition, certain of the corporation's reporting units, especially those carrying significant goodwill balances, could experience reduced profitability, which potentially could require us to recognize impairment charges. If any of these events occur, or if the unfavorable economic conditions continue, our sales and profitability could be adversely affected.

ITEM 2(c) REPURCHASES OF EQUITY SECURITIES BY THE ISSUER

The following table outlines purchases of shares of Sara Lee's common stock by Sara Lee that were completed during the third quarter of fiscal 2009.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that may yet be Purchased Under the Plans or Programs (1)
December 28, 2008 to January 31, 2009		\$		13,459,121
February 1, 2009 to February 28, 2009				13,459,121
March 1, 2009 to March 28, 2009				13,459,121
Total				13,459,121

- (1) The corporation has a continuing share repurchase program under which the corporation may repurchase shares of common stock in either open market or private transactions. As announced on August 4, 2005, the Board of Directors increased the number of shares authorized under this program by an additional 100 million shares. At March 28, 2009, 13.5 million shares remain authorized for repurchase under this program. There is no expiration date for the program.
