Item 8.01 Other Events.

On December 10, 2009, the New Mexico Public Regulation Commission (the **NMPRC**) issued a final order (the **Order**) approving a proposed settlement with El Paso Electric Company (the **Company**) in the **Company**'s pending New Mexico rate case (Case No. 09-00171-UT).

The **Order** provides for an increase in New Mexico jurisdictional non-fuel and purchased power base rate revenues of \$5.5 million. Under the **Order**, depreciation rates for the Palo Verde nuclear generating plant will be revised to reflect a 20-year life extension. Certain other depreciation rates for other plant in service will also be revised. The **Order** also provides for the continuation of the **Company**'s Fuel and Purchased Power Cost Adjustment Clause (the **FPPCAC**) without conditions or variance and establishes the base fuel factor at \$0.04362 per kWh. In addition, the **Order** modifies the market pricing of capacity and energy provided by Palo Verde Unit 3 due to the termination of the SPS contract in September 2009. Palo Verde Unit 3 capacity and energy will be included in the **FPPCAC** based upon an existing purchased power contract with Credit Suisse Energy, LLC.

The **Order** also provides that the **Company** will pay the cost for a third party to conduct reviews of the prudence and reasonableness of the **Company**'s fuel and purchased power costs. The **NMPRC** imposed a similar condition on Public Service Company of New Mexico and Southwestern Public Service Company in recent rate cases. The **Company** expects to recover the cost of such reviews in future rate cases.

The **NMPRC** also announced that it will conduct an investigation into certain franchise fees paid by the **Company** to Dona Ana and Otero Counties in New Mexico.
