LETTER FROM THE CEO

Dear Shareholders:

After an extended rebound in the financial markets, uncertainty returned in early 2010 as investors began to question the durability of the recovery for global economies and markets. That uncertainty led to increased risk aversion, especially as investors saw the eurozone struggle with the debt woes of many of its members. In September, the U.S. Federal Reserve Board s promises to further loosen monetary policy helped assuage market fears and drive asset prices off their recent lows. A combination of solid earnings and improving economic data gave an additional boost to investor sentiment. As we begin 2011, we are cautiously optimistic that economic growth will continue to improve and that the global economies will recover from the shocks of the past few years. We expect the pace of recovery worldwide will be uneven and volatile.

As always, we continue to be mindful of the many challenges faced at the individual, national, and international levels. It is in times such as these that we want to remind investors of the merits of maintaining a long-term view, adhering to basic investing principles such as asset allocation and diversification, and working closely with their advisors to research and identify investment opportunities.

Respectfully,

Robert J. Manning

Chairman and Chief Executive Officer

MFS Investment Management®

Table of Contents

Port	folio	Com	position	continued

- (a) The rating categories include debt securities and fixed-income structured products where these have long-term public ratings. All ratings are assigned in accordance with the following hierarchy: If a security is rated by Moody s, then that rating is used; if not rated by Moody s, then a Standard & Poor s rating is used; if not rated by S&P, then a Fitch rating is used. Ratings from Moody s are shown in the S&P and Fitch scale (e.g., AAA). All ratings are subject to change. U.S. Agency (NR) includes unrated U.S. Agency fixed income securities and collateralized mortgage obligations of U.S. Agency mortgage-backed securities. Other Fixed Income (NR) includes unrated long-term fixed income securities, interest rate swaps and fixed income futures. Non-Fixed Income (NR) includes equity securities (including convertible bonds and equity derivatives) and commodities. Cash & Other includes cash, other assets less liabilities, offsets to derivative positions, and short-term securities. The fund may not hold all of these instruments.
- (d) Duration is a measure of how much a bond s price is likely to fluctuate with general changes in interest rates, e.g., if rates rise 1.00%, a bond with a 5-year duration is likely to lose about 5.00% of its value due to the interest rate move.
- (i) For purposes of this presentation, the components include the market value of securities, and reflect the impact of the equivalent exposure of derivative positions, if applicable. These amounts may be negative from time to time. The bond component will include any accrued interest amounts. Equivalent exposure is a calculated amount that translates the derivative position into a reasonable approximation of the amount of the underlying asset that the portfolio would have to hold at a given point in time to have the same price sensitivity that results from the portfolio s ownership of the derivative contract. When dealing with derivatives, equivalent exposure is a more representative measure of the potential impact of a position on portfolio performance than market value. Where the fund holds convertible bonds, these are treated as part of the equity portion of the portfolio.
- (m) In determining an instrument s effective maturity for purposes of calculating the fund s dollar-weighted average effective maturity, MFS uses the instrument s stated maturity or, if applicable, an earlier date on which MFS believes it is probable that a maturity-shortening device (such as a put, pre-refunding or prepayment) will cause the instrument to be repaid. Such an earlier date can be substantially shorter than the instrument s stated maturity.
- (o) Less than 0.1%.

From time to time Cash & Other Net Assets may be negative due to borrowings for leverage transactions, timing of cash receipts, and/or equivalent exposure from any derivative holdings.

Percentages are based on net assets as of 11/30/10.

The portfolio is actively managed and current holdings may be different.

3

MANAGEMENT REVIEW

Summary of Results

The MFS Charter Income Trust (the fund) is a closed-end fund and maintains a portfolio that includes investments in high-yield and investment-grade corporate bonds, emerging markets debt securities, U.S. government securities, and international investment-grade debt securities.

For the twelve months ended November 30, 2010, shares of the fund provided a total return of 13.30%, at net asset value. This compares with a return of 16.78% for the fund s benchmark, the Barclays Capital U.S. High-Yield Corporate Bond Index. Over the same period, the fund s other benchmark, the Charter Income Trust Blended Index (the Blended Index), generated a return of 10.63%. The Blended Index reflects the blended returns of various fixed income market indices, with percentage allocations to each index designed to resemble the fixed income allocations of the fund. The market indices and related percentage allocations used to compile the Blended Index are set forth in the Performance Summary.

Market Environment

The first half of the reporting period witnessed a continuation of the financial market and macroeconomic rebounds that had begun in early 2009. These recoveries in global activity and asset valuations were generally synchronized around the world, led importantly by emerging Asian economies, but broadening to include most of the global economy to varying degrees. Primary drivers of the recoveries included an unwinding of the inventory destocking that took place earlier, the production of manufacturing and capital goods, as well as massive fiscal and monetary stimulus.

During the second half of the period, heightened risk surrounding the public-debt profiles of several of the peripheral European countries impaired market sentiment. At the same time, the improving trend in global macroeconomic data began to weaken somewhat. These two dynamics caused many asset prices to retrench significantly, as many questioned the durability of the global recovery.

Towards the end of the period, the U.S. Federal Reserve led markets to believe that further monetary loosening would be forthcoming if macroeconomic activity did not show signs of improvement. The prospects for more easing by the Fed improved market sentiment and drove risk-asset prices markedly higher. However, in a text-book case of buy the rumor, sell the fact, the weeks following the early November announcement of further quantitative easing saw a sell-off in U.S. Treasury bonds. This rise in Treasury yields occurred despite risk-off behavior in equities and credit markets (which would normally result in Treasury yield compression), and appears to have been the result of a few

4

Edgar Filing: MFS CHARTER INCOME TRUST - Form N-CSR

Table of Contents

Management Review continued

factors: signs of improved U.S. economic activity; opposition to quantitative easing from some quarters; and crowded long positions in U.S. Treasuries.

Detractors from Performance

Relative to the Blended Index, the fund s greater exposure to CCC rated (r) securities, which underperformed higher-rated securities during the months of May and August 2010, detracted from performance.

The fund s lesser exposure to mortgage-backed securities, particularly to General National Mortgage Association (Ginnie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac) securities, also held back results as this market segment turned in strong performance over the reporting period.

Contributors to Performance

The fund s return from yield, which was greater than that of the Blended Index, was a key contributor to performance. Yield curve (y) positioning, particularly our greater exposure to shifts in the middle portion of the yield curve (centered around maturities of 7 years), was another positive factor for the fund s results.

A greater exposure to corporate bonds in the *industrial* and *financial* sectors also boosted relative performance as holdings within these sectors exhibited strong returns for the reporting period. Greater exposures to B and BB rated securities were additional positive factors.

The fund employs leverage which has been created through the use of loan agreements. To the extent that investments are purchased through leverage, the fund s net asset value will increase or decrease at a greater rate than a comparable unleveraged fund. During the reporting period, the fund s leverage enhanced its absolute positive returns.

⁽r) Bonds rated BBB, Baa, or higher are considered investment grade; bonds rated BB, Ba, or below are considered non-investment grade. The primary source for bond quality ratings is Moody is Investors Service. If not available, ratings by Standard & Poor is are used, else ratings by Fitch, Inc. For securities which are not rated by any of the three agencies, the security is considered Not Rated.

⁽y) A yield curve graphically depicts the yields of different maturity bonds of the same credit quality and type; a normal yield curve is upward sloping, with short-term rates lower than long-term rates.

PERFORMANCE SUMMARY THROUGH 11/30/10

The following chart represents the fund s historical performance in comparison to its benchmark(s). Investment return and principal value will fluctuate, and shares, when sold, may be worth more or less than their original cost; current performance may be lower or higher than quoted. The performance shown does not reflect the deduction of taxes, if any, that a shareholder would pay on fund distributions or the sale of fund shares. Performance data shown represents past performance and is no guarantee of future results.

Performance Summary continued

Benchmark Definitions

Barclays Capital U.S. Credit Bond Index a market capitalization-weighted index that measures the performance of publicly issued, SEC-registered, U.S. corporate and specified foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements. This index generated a total return of 8.48% for the year ended November 30, 2010.

Barclays Capital U.S. Government/Mortgage Bond Index measures debt issued by the U.S. Government, and its agencies, as well as mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). This index generated a total return of 4.68% for the year ended November 30, 2010.

Barclays Capital U.S. High-Yield Corporate Bond Index a market capitalization-weighted index that measures the performance of non-investment grade, fixed rate debt. Eurobonds and debt issues from countries designated as emerging markets (e.g., Argentina, Brazil, Venezuela, etc.) are excluded.

Citigroup World Government Bond Non-Dollar Hedged Index a market capitalization-weighted index that is designed to represent the currency-hedged performance of the international developed government bond markets, excluding the United States. This index generated a total return of 1.83% for the year ended November 30, 2010.

JPMorgan Emerging Markets Bond Index Global measures the performance of U.S.-dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds. This index generated a total return of 12.77% for the year ended November 30, 2010.

It is not possible to invest directly in an index.

Notes to Performance Summary

The fund s shares may trade at a discount or premium to net asset value. Shareholders do not have the right to cause the fund to repurchase their shares at net asset value. When fund shares trade at a premium, buyers pay more than the net asset value underlying fund shares, and shares purchased at a premium would receive less than the amount paid for them in the event of the fund s liquidation. As a result, the total return that is calculated based on the net asset value and New York Stock Exchange price can be different.

The fund s monthly distributions may include a return of capital to shareholders to the extent that distributions are in excess of the fund s net investment income and net capital gains, determined in accordance with federal income tax regulations. Distributions that are treated for federal income tax purposes as a return of capital will reduce each shareholder s basis in his or

7

Edgar Filing: MFS CHARTER INCOME TRUST - Form N-CSR

Table of Contents

Performance Summary continued

her shares and, to the extent the return of capital exceeds such basis, will be treated as gain to the shareholder from a sale of shares. Returns of shareholder capital have the effect of reducing the fund s assets and increasing the fund s expense ratio.

From time to time the fund may receive proceeds from litigation settlements, without which performance would be lower.

8

INVESTMENT OBJECTIVE, PRINCIPAL

INVESTMENT STRATEGIES AND RISKS

OF THE FUND

Investment Objective

The fund s investment objective is to seek high current income, but may also consider capital appreciation. The fund s objective may be changed without shareholder approval.

Principal Investment Strategies

MFS (Massachusetts Financial Services Company, the fund s investment adviser) normally invests the Fund s assets primarily in debt instruments.

MFS normally invests the fund s assets in U.S. Government securities, foreign government securities, mortgage-backed and other asset-backed securities of U.S. and/or foreign issuers, corporate bonds of U.S. and/or foreign issuers, and/or debt instruments of issuers located in emerging market countries. MFS allocates the fund s assets across these categories with a view toward broad diversification across and within these categories.

MFS may invest up to 100% of the fund s assets in lower quality debt instruments.

MFS may invest a relatively large percentage of the fund s assets in instruments of issuers in a single country, a small number of countries, or a particular geographic region.

MFS may use derivatives for any investment purpose, including to earn income and enhance returns, to increase or decrease exposure to a particular market, to manage or adjust the risk profile of the fund, or as alternatives to direct investments.

MFS uses a bottom-up investment approach to buying and selling investments for the fund. Investments are selected primarily based on fundamental analysis of individual instruments and their issuers in light of issuers—current financial condition and current market, economic, political, and regulatory conditions. Factors considered may include the instrument—s credit quality, collateral characteristics, and indenture provisions, and the issuer—s management ability, capital structure, leverage, and ability to meet its current obligations. Quantitative models that systematically evaluate the structure of the debt instrument and its features may also be considered.

The fund may use leverage by borrowing up to $33^{1}/3\%$ of the fund s assets, including borrowings for investment purposes, and investing the proceeds pursuant to its investment strategies. If approved by the fund s Board of Trustees, the fund may use leverage by other methods.

9

Edgar Filing: MFS CHARTER INCOME TRUST - Form N-CSR

Table of Contents

Investment Objective, Principal Investment Strategies and Risks of the Fund continued

MFS may engage in active and frequent trading in pursuing the fund s principal investment strategies.

In response to market, economic, political, or other conditions, MFS may depart from the Fund s principal investment strategies by temporarily investing for defensive purposes.

Principal Risks

The fund may not achieve its objective and/or you could lose money on your investment in the fund. Investments in debt instruments may decline in value as the result of increases in interest rates, declines in the credit quality of the issuer, borrower, counterparty or underlying collateral, or changes in economic, political, issuer-specific, or other conditions. Certain types of debt instruments can be more sensitive to these factors and therefore more volatile. Investments in foreign markets through issuers or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, or other conditions. Emerging markets can have less market structure, depth, and regulatory oversight and greater political, social, and economic instability than developed markets. Investments in derivatives can be used to take both long and short positions, be highly volatile, result in leverage (which can magnify losses), and involve risks in addition to the risks of the underlying indicator(s) on which the derivative is based, such as counterparty and liquidity risk. Investments in lower-quality debt instruments can be more volatile and have greater risk of default than higher-quality debt instruments. The fund s performance could be more volatile than the performance of more diversified funds. The market price of common shares of the fund will be based on factors such as the supply and demand for common shares in the market and general market, economic, political or regulatory conditions. Whether shareholders will realize gains or losses upon the sale of common shares of the fund will depend on the market price of common shares at the time of the sale, not on the fund s net asset value. The market price may be lower or higher than the fund s net asset value. Shares of closed-end funds frequently trade at a discount to their net asset value. Leverage involves investment exposure in an amount exceeding the initial investment. Leverage can cause increased volatility by magnifying gains or losses. Please see the fund s registration statement for further information regarding these and other risk considerations. A copy of the fund s registration statement on Form N-2 is available on the EDGAR database on the Securities and Exchange Commission s Internet Web site at http://sec.gov.

In accordance with Section 23(c) of the Investment Company Act of 1940, the fund hereby gives notice that it may from time to time repurchase shares of the fund in the open market at the option of the Board of Trustees and on such terms as the Trustees shall determine.

11

DIVIDEND REINVESTMENT AND

CASH PURCHASE PLAN

The fund offers a Dividend Reinvestment and Cash Purchase Plan (the Plan) that allows common shareholders to reinvest either all of the distributions paid by the fund or only the long-term capital gains. Generally, purchases are made at the market price unless that price exceeds the net asset value (the shares are trading at a premium). If the shares are trading at a premium, purchases will be made at a price of either the net asset value or 95% of the market price, whichever is greater. You can also buy shares on a quarterly basis in any amount \$100 and over. The Plan Agent will purchase shares under the Cash Purchase Plan on the 15th of January, April, July, and October or shortly thereafter.

If shares are registered in your own name, new shareholders will automatically participate in the Plan, unless you have indicated that you do not wish to participate. If your shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the Plan on your behalf. If the nominee does not offer the Plan, you may wish to request that your shares be re-registered in your own name so that you can participate. There is no service charge to reinvest distributions, nor are there brokerage charges for shares issued directly by the fund. However, when shares are bought on the New York Stock Exchange or otherwise on the open market, each participant pays a pro rata share of the transaction expenses, including commissions. Dividends and capital gains distributions are taxable whether received in cash or reinvested in additional shares the automatic reinvestment of distributions does not relieve you of any income tax that may be payable (or required to be withheld) on the distributions.

You may withdraw from the Plan at any time by going to the Plan Agent s website at www.computershare.com, by calling 1-800-637-2304 any business day from 9 a.m. to 5 p.m. Eastern time or by writing to the Plan Agent at P.O. Box 43078, Providence, RI 02940-3078. Please have available the name of the fund and your account number. For certain types of registrations, such as corporate accounts, instructions must be submitted in writing. Please call for additional details. When you withdraw from the Plan, you can receive the value of the reinvested shares in one of three ways: your full shares will be held in your account, the Plan Agent will sell your shares and send the proceeds to you, or you may transfer your full shares to your investment professional who can hold or sell them. Additionally, the Plan Agent will sell your fractional shares and send the proceeds to you.

If you have any questions or for further information or a copy of the Plan, contact the Plan Agent Computershare Trust Company, N.A. (the Transfer Agent for the fund) at 1-800-637-2304, at the Plan Agent s website at www.computershare.com, or by writing to the Plan Agent at P.O. Box 43078, Providence, RI 02940-3078.

Table of Contents

Portfolio of Investments continued
(a) Non-income producing security.
(d) Non-income producing security in default.
(e) Guaranteed by Minister for Finance of Ireland.
(f) All or a portion of the security has been segregated as collateral for open futures contracts.
(g) The rate shown represents a weighted average coupon rate on settled positions at period end, unless otherwise indicated.
(i) Interest only security for which the fund receives interest on notional principal (Par amount). Par amount shown is the notional principal and does not reflect the cost of the security.
(n) Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in the ordinary course of business in transactions exempt from registration, normally to qualified institutional buyers. At period end, the aggregate value of these securities was \$145,477,191, representing 26.5% of net assets.
(o) All or a portion of this position has not settled. Upon settlement date, interest rates for unsettled amounts will be determined. The rate shown represents the weighted average coupon rate for settled amounts.
(p) Payment-in-kind security.
(r) Remaining maturities of floating rate loans may be less than stated maturities shown as a result of contractual or optional prepayments by the borrower. Such prepayments cannot be predicted with certainty. These loans may be subject to restrictions on resale. Floating rate loans generally have rates of interest which are determined periodically by reference to a base lending rate plus a premium.
(v) Underlying fund that is available only to investment companies managed by MFS. The rate quoted is the annualized seven-day yield of the fund at period end
(z) Restricted securities are not registered under the Securities Act of 1933 and are subject to legal restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are subsequently registered. Disposal of these securities may involve time-consuming negotiations and prompt sale at an acceptable price may be difficult. The fund holds the following restricted securities:

			Current
