WABCO HOLDINGS INC. AND SUBSIDIARIES

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2011

(Unaudited)

NOTE 1. Basis of Financial Statement Presentation

WABCO Holdings Inc. and its subsidiaries (collectively "WABCO" or the "Company") develops, manufactures and sells advanced braking, stability, suspension and transmission control systems primarily for commercial vehicles. WABCO's largest selling products are pneumatic anti-lock braking systems ("ABS"), electronic braking systems ("EBS"), automated manual transmission systems, air disk brakes and a large variety of conventional mechanical products such as actuators, air compressors and air control valves for heavy and medium-sized trucks, trailers and buses. WABCO sells its products to four groups of customers around the world: truck and bus original equipment manufacturers ("OEMs"), trailer OEMs, aftermarket distributors of replacement parts and services, and automotive OEMs.

The accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments, including normal recurring items, considered necessary for a fair presentation of financial data have been included. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the entire year. The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and accompanying notes for the year ended December 31, 2010, included in the Company's Annual Report on Form 10-K.

Based on the organizational structure, as well as the nature of financial information available and reviewed by the Company's chief operating decision maker to assess performance and make decisions about resource allocations, the Company has concluded that its total WABCO operations represent one reportable segment and that WABCO's performance and future net cash flow perspectives are best understood and assessed as such. For purposes of cash flow presentation, the Company has presented both cash flow activities for the revolving credit facilities and short-term debt on a net presentation basis as these items represent cash flow activities where turnover is quick, the amounts are large, and the maturities are short. All majority owned subsidiaries of WABCO are included in the consolidated financial statements and intercompany transactions are eliminated upon consolidation. WABCO's investments in unconsolidated joint ventures are included at cost plus its equity in undistributed earnings in accordance with the equity method of accounting and reflected as investments in unconsolidated joint ventures in the consolidated balance sheet. Certain amounts in prior years' condensed consolidated financial statements have been reclassified to conform to the current year presentation.

Preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Management believes the most complex and sensitive judgments, because of their significance to the condensed consolidated financial statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management's Discussion and Analysis and Notes 2 and 13 to the Consolidated Financial Statements for the year ended December 31, 2010, in the Company's Annual Report on Form 10-K, describe the most significant accounting estimates and policies used in preparation of the Consolidated Financial Statements. Actual results in these areas could differ materially from management's estimates. There have been no significant changes in the Company's assumptions regarding critical accounting estimates during the first quarter of 2011.

NOTE 2. Recently Issued Accounting Standards

In July 2010, the FASB issued ASU 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses* ("ASU 2010-20"). ASU 2010-20 amends existing disclosure guidance for public entities. The Company adopted amendments to the Codification resulting from ASU 2010-20 on December 31, 2010. As ASU 2010-20 relates specifically to disclosures, the adoption of this standard had no impact on our consolidated financial condition, results of operations or cash flows. The financing receivables disclosures related to activity that occurs during a reporting period (e.g., the rollforward of the allowance for credit losses and the modification disclosures) are required to be adopted by public entities for interim or annual reporting periods beginning on or after December 15, 2011. The Company has adopted the financing receivable activity disclosures as

Table of Contents

of January 1, 2011. The adoption of these provisions had no impact on our consolidated financial condition, results of operations or cash flows.

In December 2010, the FASB issued ASU 2010-28, *When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts* (ASU 2010-28). ASU 2010-28 modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. This eliminates an entity's ability to assert that a reporting unit is not required to perform Step 2 because the carrying amount of the reporting unit is zero or negative despite the existence of qualitative factors that indicate the goodwill is more likely than not impaired. The Company has adopted ASU 2010-28 as of January 1, 2011. The adoption of ASU 2010-28 did not have an impact on the condensed consolidated financial statements.

In December 2010, the FASB issued ASU 2010-29, *Disclosure of Supplementary Pro Forma Information for Business Combinations* (ASU 2010-29). ASU 2010-29 specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The Company has adopted ASU 2010-29 as of January 1, 2011. The adoption of ASU 2010-29 did not have an impact on our condensed consolidated financial statements.

NOTE 3. Comprehensive Income

Total comprehensive income consisted of the following (amounts in millions):

	Three months ended March 31,	
	2011	2010
Net income including noncontrolling interests	\$ 118.3	\$ 33.7
Foreign currency translation effects	17.2	(33.5)
Unrealized losses on benefit plans, net	(2.2)	2.8
Comprehensive income including noncontrolling interests	133.3	3.0
Less: Comprehensive income attributable to noncontrolling interests	3.6	3.0
Comprehensive income	\$ 129.7	\$

NOTE 4. Accounts Receivable Securitization Program & Financing Receivables

On September 23, 2009, the Company established an accounts receivable securitization program (the Accounts Receivable Securitization Program) with Société Générale Bank Nederland N.V. The maximum funding from receivables that may be sold into the Accounts Receivable Securitization Program and outstanding at any point in time is 100 million; however, there can be no assurance that the Company will generate sufficient eligible receivables to access the maximum availability. The original term of the Accounts Receivable Securitization Program was for one year, with the possibility of four additional annual extensions, assuming the Company and the participating sellers are in compliance with the applicable covenants. The Company extended the Receivables Program in September 2010 for one year.

During the quarter ended March 31, 2011, the Company sold all of its eligible receivables into the Accounts Receivable Securitization Program. The receivables were removed from the balance sheet in accordance with the guidance under ASC topic 860, *Transfers and Servicing*. The total amount of receivables sold under the Accounts Receivable Securitization Program during the three months ended March 31, 2011 was

177.0 million (\$242.0 million at weighted average March 31, 2011 year-to-date exchange rates). The amount of eligible receivables sold and outstanding at March 31, 2011 amounted to 70.0 million (\$99.0 million at March 31, 2011 exchange rates). As a result of the sale, accounts receivable decreased by \$99.0 million and cash and cash equivalents increased by \$41.7 million. The remaining amount of proceeds of \$57.3 million is a subordinated deposit with Société Générale Bank Nederland N.V. at March 31, 2011.

The fair value of the receivables sold equaled the carrying cost at time of sale, and no gain or loss was recorded as a result of the sale. The Company estimated the fair value of sold receivables using Level 3 inputs and based the estimate on historical and anticipated performance of similar receivables, including historical and anticipated credit losses (if any). As part of the Accounts Receivable Securitization Program, the Company

Table of Contents

continues to service the receivables. The Company sells the receivables at face value, but receives actual funding net of the subordinated deposit account until collections are received from customers for the receivables sold. The Company is exposed to the credit losses of sold receivables up to the amount of its subordinated deposit account at each settlement date. Credit losses for receivables sold were immaterial, and past due amounts outstanding at March 31, 2011 were immaterial. Servicing fees for the program were \$0.2 million for the quarter ended March 31, 2011.

In addition to the above, the Company has the ability to access cash on a daily basis related to collections on sold receivables, which provided the Company with \$39.6 million of additional cash as of March 31, 2011. Of these cash receipts, \$23.3 million is classified on the consolidated balance sheet as loans payable to bank and \$16.3 million reduced the subordinated deposit to \$41.0 million which is classified as restricted cash on the consolidated balance sheet at March 31, 2011.

On April 15, 2009, the Company entered into a 35 million factoring program, which has a term of five years, in respect to accounts receivable from one of our customers. To date, we have not utilized this facility.

Other financing receivables include sales to reputable State Owned and Public Enterprises in China that are settled through notes receivable which are registered and endorsed to the Company. These notes receivable are fully secured and generally have contractual maturities of six months or less. These guaranteed notes are available to be discounted with banking institutions in China. The carrying amounts of these guaranteed notes receivable is \$31.4 million and \$22.4 million as of March 31, 2011 and December 31, 2010, respectively, and are included in other current assets on the condensed consolidated balance sheets. The Company monitors the credit quality of these notes through historical losses and current economic conditions with Chinese banks. As these receivables are guaranteed by banks and the Company has not experienced any historical losses nor is the Company expecting future credit losses, we have not established a loss provision against these receivables as of March 31, 2011 or December 31, 2010.

NOTE 5. Net Income Per Share

Basic net income per share has been computed using the weighted average number of WABCO common shares outstanding. The average number of outstanding shares of common stock used in computing diluted net income per share includes weighted average incremental shares when the impact is not anti-dilutive. The weighted average incremental shares represent the net amount of shares the Company would issue upon the assumed exercise of in-the-money stock options and vesting of restricted stock units (RSUs) after assuming that the Company would use the proceeds from the exercise of options to repurchase treasury stock. Anti-dilutive options are excluded and represent those options whose exercise price was greater than the average price of the Company's common stock.

	Three months ended March 31,	
	2011	2010
Weighted average incremental shares included	2,088,228	1,559,763
Shares excluded due to anti-dilutive effect		1,397,808

NOTE 6. Capital Stock

Following is a summary of net shares outstanding and shares issued or reacquired during the first three months of 2011.

	Number of Shares of Common Stock		
	Total Shares	Treasury Shares	Net Shares Outstanding
Balance, December 31, 2010	72,415,415	(5,956,806)	66,458,609
Shares issued upon exercise of stock options	787,974		787,974
Shares issued upon vesting of RSUs	182,919		182,919
Balance, March 31, 2011	73,386,308	(5,956,806)	67,429,502

Table of Contents

The Company accounts for purchases of treasury stock under the cost method with the costs of such share purchases reflected in treasury stock in the accompanying condensed consolidated balance sheets. When treasury shares are reissued they are recorded at the average cost of the treasury shares acquired since the inception of the share buy back programs, net of shares previously reissued and the Company reflects the difference between the average cost paid and the amount received for the reissued shares in capital surplus. As of March 31, 2011, no shares have been reissued and the Company has no further authorization by the Board of Directors to repurchase shares.

NOTE 7. Stock-Based Compensation

The Company records stock-based compensation based on the estimated fair value of the award at the grant date and is recognized as an expense in the condensed consolidated statements of income over the requisite service period. Total stock-based compensation cost recognized during the three month periods ended March 31 were as follows:

	Three months ended March 31,	
	2011	2010
Stock-based compensation	\$ 3.3	\$ 3.7

The total number and type of awards granted primarily in connection with the annual grant during the periods presented and the related weighted-average grant-date fair values were as follows:

	Three months ended March 31, 2011			Three months ended March 31, 2010		
	Underlying Shares	Weighted- Average Exercise Price	Weighted Average Grant Date Fair Value	Underlying Shares	Weighted- Average Exercise Price	Weighted Average Grant Date Fair Value
Options Granted	238,317	\$ 59.26	\$ 22.94	555,887	\$ 27.37	\$ 9.76
RSUs Granted	92,636	\$	\$ 59.26	220,886	\$	\$ 27.37
Total Awards	330,953			776,773		

In the three months ended March 31, 2011, a total of 238,317 options were granted of which all are exercisable in equal installments over a period of three years. In the three months ended March 31, 2010, a total of 555,887 options were granted of which all are exercisable in equal installments over a period of three years. In 2011, a total of 92,636 RSUs were granted of which 87,553 vest ratably over a period of three years. Of the remaining 5,083 RSUs granted in 2011, 3,389 vest after two years and 1,694 vest after three years. In 2010, a total of 220,886 RSUs were granted of which 210,933 vest ratably over a period of three years. Of the remaining 9,953 RSUs granted in 2010, 6,653 vest after two years and 3,318 vest after three years.

The weighted average grant date fair value was calculated under the Black-Scholes option-pricing model. The following table summarizes the significant assumptions used for the grants during the three month periods ended March 31, 2011 and 2010.

Assumption	Three Months Ended March 31, 2011	Three Months Ended March 31, 2010
	Risk-free interest rate	2.30%
Expected volatility	42.82%	40.96%
Expected holding period	5 Years	5 Years
Expected forfeiture rate	2.3%	2.0%
Expected dividend yield	0.47%	1.02%

Edgar Filing: WABCO Holdings Inc. - Form 10-Q

The risk free interest rate is based on the yield of U.S. Treasury securities that correspond to the expected holding period of the options. WABCO reviewed the historic volatility of its common stock over a 3 year period, the common stock of its peer group over a five year period, and the implied volatility for at the money options to purchase shares of its common stock. The five year historical volatility period was selected since that period corresponds with the expected holding period. Based on this data, the Company chose to use a weighted average of the implied volatility of WABCO, the most recent three year historical volatility of WABCO and the median most recent two year historical volatility of WABCO's peer group prior to the spin-off date. The expected holding period

Table of Contents

was calculated by reviewing the historical exercise pattern of all holders that were granted options and the exercise behavior of officers versus non-officers. The results of the analysis support one expected holding period for all groups of employees. The expected forfeiture rate was determined based on the historical stock option forfeiture data of the Company. The dividend yield was based on an expected future dividend amount for the period at the time of grant.

NOTE 8. Debt

On May 31, 2007, WABCO entered into an unsecured, five-year \$800 million, multi-currency revolving credit facility that will expire on July 31, 2012. This is our principal bank credit facility, and it became available to us on August 1, 2007. The proceeds of the borrowings under the principal credit facility have historically been used to fund repurchases of our shares, pay quarterly dividends to our shareholders and to meet short-term cash requirements. In September 2010, the Company also used this facility to partially fund the European Commission fine indemnification of 326.1 million. At March 31, 2011, the carrying amount of this facility approximated fair value. Up to \$100 million under this facility may be used for issuing letters of credit, of which \$98.1 million was unused as of March 31, 2011, and up to \$75 million for same-day borrowings of which \$75 million was unused as of March 31, 2011. The balance outstanding on this facility as of March 31, 2011, was \$44.0 million in addition to \$1.9 million of letters of credit. The Company pays a facility fee of 0.10% per annum. Borrowings thereunder bear interest generally at the London Interbank Offered Rate (LIBOR) plus either 0.35% if borrowings are less than or equal to 50% of the total available balance, or 0.40% if borrowings are greater than 50% of the total available balance. The Company also pays 0.35% per annum plus issuance fees for letters of credit. The interest rate spreads above the U.S. dollar and Euro LIBOR (0.24345% and 0.91625%, respectively at March 31, 2011 for the 1month rates) are subject to adjustments should the Company's leverage ratio change. The Company intends to replace all or some portion of the existing five-year \$800 million credit facility by the time of its expiration.

Our principal credit facility contains various covenants that limit, among other things, liens, transactions, subsidiary indebtedness, and certain mergers and sales of assets. The covenants also require the Company to meet certain financial tests: a rolling four quarters 3 to 1 ratio of consolidated net indebtedness to consolidated trailing four quarters adjusted EBITDA (earnings before interest, taxes, depreciation and amortization adjusted for certain items), a 3 to 1 ratio of consolidated trailing four quarters adjusted EBITDA to consolidated net interest expense for the same period, and a liquidity test. The liquidity covenant requires us to have at least \$100 million of liquidity (which includes unused commitments under the agreement and certain other committed facilities that may be entered into, as well as unrestricted cash and cash equivalents). As of March 31, 2011, our trailing four quarters adjusted EBITDA is \$355.1 million, which consists of \$111.9 million for the first quarter of 2011, \$94.9 million for the fourth quarter of 2010, \$78.5 million for the third quarter of 2010 and \$69.8 million for the second quarter of 2010. As defined in our principal credit facility, our net indebtedness was \$99.8 million at March 31, 2011 (comprised of \$67.9 million of debt and \$31.9 million of uncollateralized guarantees), resulting in an EBITDA covenant ratio of 0.3 to 1. Given our net indebtedness of \$99.8 million (including guarantees) at March 31, 2011 we had the ability to borrow approximately an incremental \$747 million (after considering the \$100 million liquidity requirement) under our principal credit facility and in compliance with the covenants.

Also, various subsidiaries had borrowings from banks totaling \$23.9 million, of which \$23.3 relates to our Accounts Receivable Securitization Program referred to in Note 4 above. The remaining \$0.6 million supports local working capital requirements.

Note 9. Warranties, Guarantees, Commitments and Contingencies**Warranties**

Products sold by WABCO are covered by a basic limited warranty with terms and conditions that vary depending upon the product and country in which it was sold. The limited warranty covers the equipment, parts and labor (in certain cases) necessary to satisfy the warranty obligation generally for a period of two years. Estimated product warranty expenses are accrued in cost of goods sold at the time the related sale is recognized. Estimates of warranty expenses are based primarily on warranty claims experience and specific customer contracts. Warranty expenses include accruals for basic warranties for product sold, as well as accruals for product recalls, service campaigns and other related events when they are known and estimable. To the extent WABCO experiences changes in warranty claim activity or costs associated with servicing those claims, its warranty accrual is adjusted accordingly. Warranty accrual estimates are updated based upon the most current warranty claims information available.

Following is a summary of changes in the Company's product warranty liability for the three months ended March 31, 2011 and 2010 (amounts in millions).

Table of Contents

	Three months ended March 31,	
	2011	2010
Balance of warranty costs accrued, beginning of period	\$ 44.9	\$ 45.8
Warranty costs accrued	10.2	7.3
Warranty claims settled	(7.3)	(8.6)
Foreign exchange translation effects	2.2	(2.4)
Balance of warranty costs accrued, end of period	\$ 50.0	\$ 42.1
Current liability, included in current portion of warranties	\$ 46.5	\$ 39.4
Long-term liability, included in other liabilities	\$ 3.5	\$ 2.7

Guarantees and Commitments

The Company has bank guarantees for \$37.2 million of which \$5.3 million is cash collateralized. The remaining \$31.9 million is comprised of uncollateralized bank guarantees of which \$25.2 million is related to tax litigation, \$1.9 million is related to letters of credit and \$4.8 million is related to other items.

The Company has inventory and receivables that are pledged against a local bank facility in India to support local working capital requirements of approximately \$10 million. Also, the Company has pledged unsold receivables under the Accounts Receivable Financing Facility of 26.1 million (\$36.9 million at March 31, 2011 exchange rates).

Contingencies*General*

We are subject to proceedings, lawsuits and other claims related to products and other matters. We are required to assess the likelihood of any adverse judgments or outcomes to these matters as well as potential ranges of probable losses. A determination of the amount of liability to be recorded, if any, for these contingencies is made after careful analysis of each individual issue. The liabilities recorded may change in the future, possibly by significant amounts, due to new developments in any of the matters.

Litigation

On June 23, 2010, the European Commission (the Commission) issued a decision imposing a total of 326.1 million in fines, or approximately \$400 million on the date of assessment (the EC fine), on the former American Standard Companies Inc. (now Trane Inc. hereinafter referred to as American Standard or Trane), and certain of its European subsidiaries engaged in the Bath and Kitchen business and successor entities for infringements of European Union competition rules relating to the distribution of bathroom fixtures and fittings in a number of European countries. Pursuant to our Indemnification and Cooperation Agreement with Trane, WABCO Europe BVBA (an indirect wholly-owned subsidiary of WABCO) is responsible for, and is liable to indemnify Trane Inc. and Ideal Standard International (representing the successor to the Bath and Kitchen business, and owner of certain of the former American Standard subsidiaries) and their owners against the EC fine.

As required by the Indemnification and Cooperation Agreement, WABCO paid the fine amount into escrow on August 30, 2010, using 230 million of cash on hand and 96.1 million of additional borrowings under our \$800 million five-year revolving credit facility. The funds were subsequently released from escrow and paid to the Commission. After reviewing all of the elements of the case, WABCO decided to appeal the decision in order to try to have the fine reduced. On September 8, 2010, WABCO filed its appeal in the General Court of the European Union, located in Luxembourg. The Company believes that a decision on the appeal will take at least five years.

Other

In conjunction with the Tax Sharing Agreement, as further discussed in Note 11, Tax and Indemnification Liabilities Transferred from Trane to WABCO, WABCO is responsible for certain tax and indemnification liabilities. These liabilities include indemnification liabilities to Trane of \$16.8 million as of March 31, 2011.

Table of Contents

Note 10. Income Taxes

Unrecognized tax benefits at March 31, 2011 amounted to \$46.4 million related to the WABCO business and \$13.3 million related to WABCO obligations directly to tax authorities for Trane's Bath & Kitchen business as further discussed in Note 11 Tax and Indemnification Liabilities Transferred from Trane to WABCO. The Company believes that it is reasonably possible that certain unrecognized tax benefits will be recognized within the next 12 months. As a result, \$47.8 million of the unrecognized tax benefits are classified as long-term liabilities and \$11.9 million are classified as short term liabilities. Approximately \$1.4 million of these long term unrecognized tax benefits and \$11.9 million of the short term unrecognized tax benefits relate to WABCO's obligations to tax authorities for Trane's Bath & Kitchen business. The Company recognizes interest and penalties accrued related to unrecognized tax benefits in income tax expense. No penalties have been accrued related to these unrecognized tax benefits.

The income tax benefit for the first quarter of 2011 was \$3.2 million on pre-tax income of \$115.1 million before adjusting for noncontrolling interest. This benefit is the net result of the release of tax accruals of approximately \$19.1 million as a consequence of the settlement of foreign tax audits, taxes on earnings in profitable jurisdictions, income offset by fully valued net operating losses, the accrual of interest on uncertain tax positions, and benefits from certain foreign tax planning.

The accompanying March 31, 2011 condensed consolidated balance sheet continues to reflect a full valuation allowance for certain foreign tax losses as it has been determined as of March 31, 2011 that it is more likely than not that the losses will not be utilized in the foreseeable future.

The Company is subject to taxation in the US and various states and foreign jurisdictions. With no material exceptions, the Company is no longer subject to US federal, state, local or foreign examinations by tax authorities for years before 2007.

Note 11. Tax and Indemnification Liabilities Transferred from Trane to WABCO

Pursuant to the Tax Sharing Agreement between Trane and WABCO, entered into on July 16, 2007, and other agreements with Trane as filed in WABCO's Form 10 prior to its spin-off from Trane, WABCO is responsible for certain tax contingencies and indemnification liabilities. As noted in Note 10 Income Taxes, the liabilities as of March 31, 2011 include \$13.3 million related to non-US entities of Trane's Bath & Kitchen business but for which WABCO entities have obligations directly to non-US tax authorities. In addition, as of March 31, 2011, the Company had indemnification liabilities of \$16.8 million, of which \$4.4 million is classified within long-term liabilities on the balance sheet and \$12.4 million is classified within short-term liabilities.

During the first quarter of 2011, approximately \$23.1 million of indemnification liabilities was reversed in the statement of income due to the expiration of a statute of limitations.

Under an indemnification agreement, WABCO Brazil is responsible for certain claims related to its business for periods prior to the spin-off of WABCO from American Standard. In particular, there are tax claims pending in various stages of the Brazilian legal process related to income, social contribution and/or value added taxes for which a contingency exists and which may or may not ultimately be incurred by the Company. The estimated total amount of the contingency as of March 31, 2011 is \$27.2 million including interest. However, based on management's assessment and advice of our external legal counsel, the Company believes that it has valid arguments in all of these cases and thus no accrual is required at this time.

Note 12. Streamlining Expenses

The Company accounts for employee related streamlining charges as either a one-time benefit arrangement or an ongoing benefit arrangement as appropriate. From time to time the Company also has streamlining charges that are not related to employees, such as facility exit costs.

Based on market declines occurring in the fourth quarter of 2008, we commenced a streamlining program on October 28, 2008 (the 2008/2009 Program), which began with a consultative process with works councils and employee representatives globally. The 2008/2009 Program reduced our global workforce by approximately 1,800 employees. This level of reduction in workforce brought our capacity in line with market demand, while still allowing us to continue our focus on core strategies, including technology, new products, globalization, and quality and productivity initiatives. We believe the completion of these actions created sufficient flexibility in production and helped us to cope with anticipated demand volatility. The Company does not expect to incur any further charges on the 2008/2009 Program.

Table of Contents

Based on the Company's efforts to maintain our global footprint, the Company will periodically enter into other streamlining programs as deemed necessary (Other Programs). No ongoing individual program is assessed as material, and the Company does not expect to incur significant additional charges for ongoing programs as of March 31, 2011.

The following is a summary of changes in the Company's streamlining program liabilities for the three months ended March 31, 2011 (amounts in millions) Activity for the period consisted of termination payments and employee-related charges. Non-employee related charges, such as facility exit costs, were not incurred during the period.

2008 / 2009 Program	
Balance as of December 31, 2010	\$ 30.0
Charges during the first three months of 2011	
Payments during the first three months of 2011	(3.3)
 Balance as of March 31, 2011	 \$ 26.7
 Other Programs	
Balance as of December 31, 2010	\$ 1.4
Charges during the first three months of 2011	1.1
Payments during the first three months of 2011	(0.2)
 Balance as of March 31, 2011	 \$ 2.3
 Foreign exchange translation effects	 \$ 1.8
 Total streamlining liability as of March 31, 2011	 \$ 30.8

A balance of \$20.9 million is included in other liabilities and \$9.9 million is included in streamlining liabilities as of March 31, 2011.

The following is a summary of current and cumulative streamlining costs (including employee related costs shown above as well as asset write-offs and other charges).

	Charges for Quarter Ended March 31, 2011		Cumulative Charges as of March 31, 2011	
	2008/2009 Program	Other Programs	2008/2009 Program	Other Programs
Employee related charges cost of sales	\$	\$ 1.1	\$ 45.7	\$ 3.8
Employee related charges selling and administrative			45.8	1.4
Asset write-offs cost of sales				1.3
 Total program costs	 \$	 \$ 1.1	 \$ 91.5	 \$ 6.5

Note 13. Post-retirement Benefits

Post-retirement pension, health and life insurance costs had the following components for the three months ended March 31, 2011 and 2010 (amounts in millions):

	Three Months Ended March 31,			
	2011	2011	2010	2010

Edgar Filing: WABCO Holdings Inc. - Form 10-Q

	Pension Benefits	Health & Life Ins. Benefits	Pension Benefits	Health & Life Ins. Benefits
Service cost-benefits earned during period	\$ 2.1	\$	\$ 2.0	\$
Interest cost on the projected benefit obligation	6.1	0.2	6.3	0.2
Less assumed return on plan assets	(2.1)		(2.0)	
Amortization of net loss	0.5	0.3	0.5	0.1
Defined benefit plan cost / (income)	\$ 6.6	\$ 0.5	\$ 6.8	\$ 0.3

Table of Contents

	Three Months Ended March 31,			
	2011	2011	2010	2010
	Pension	Health	Pension	Health
	Benefits	& Life	Benefits	& Life
		Ins.		Ins.
	Benefits	Benefits	Benefits	Benefits
Accretion expense as reflected in selling and administrative expenses and cost of sales	\$ 4.0	\$ 0.2	\$ 4.3	\$ 0.2

The Company makes contributions to funded pension plans that at a minimum, meet all statutory funding requirements. Contributions in 2011, as well as payments of benefits incurred by unfunded plans were in line with the expectations for 2011 and also in line with the contributions made during 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations***Executive Overview***

In the first quarter of 2011, the commercial vehicle industry's recovery continued globally, with particularly strong growth in the developed countries. The Company's worldwide sales in the first quarter of 2011 increased by 38% (36% excluding foreign currency translation effects) compared with the same period a year ago. WABCO's sales growth continued to outperform the global market for truck and bus production during the first quarter of 2011.

Continuing to demonstrate the importance of emerging markets, China, India and Brazil again accounted for two thirds of the world's truck and bus production in the first quarter of 2011. In addition to major sales growth from Europe, the Company further benefited from WABCO's well anchored position in emerging economies such as China, India and Brazil, where we successfully continue to penetrate applicable markets for new technologies and systems. As a result, we continue to achieve higher value of WABCO content per vehicle.

In the first quarter of 2011, WABCO celebrated the grand opening of its fourth production facility in China. The new Jinan based factory features the Company's Six Sigma Lean program, which uses world-class methods to combine quality management with process efficiency, starting with suppliers and connecting through to customers. WABCO's new Jinan factory provides advanced commercial vehicle control systems such as air compressors, air processing units, and automated manual transmission (AMT) systems to Chinese and global customers.

WABCO reviewed its activities in Japan in the aftermath of the tragic natural disasters that occurred during the first quarter of 2011, and has concluded that they did not have a material impact on the Company's financial results.

In the first quarter of 2011, WABCO's aftermarket sales reached \$159 million, excluding foreign currency translation effects, resulting in an all-time record quarter of aftermarket revenues. This performance indicates fleet utilization back to normal levels, market growth and our continued execution of the Company's aftermarket growth strategies initiated several years ago.

During the first quarter of 2011, WABCO continued to transform major sales growth into strong profitability, driving robust incremental margins. Also during this three-month period, WABCO's Operating System continued to enable our flexible and rapid response to the industry's growth. It delivered \$15.2 million of materials and conversion productivity. Gross materials productivity represented 5.7% of total materials cost but, as expected, the impact of commodity inflation reduced net materials productivity to 3.2%. Conversion productivity represented 5.5%.

Table of Contents**Results of Operations**

Approximately 92% of our sales are outside the U.S. and therefore, changes in exchange rates can have a significant impact on the reported results of our operations, which are presented in U.S. dollars. Quarter-over-quarter changes in sales, gross profit, expenses, pre-tax income and net income for 2011 compared with 2010 are presented both with and without the effects of foreign currency translation. Changes in sales, gross profit, expenses, pre-tax income and net income excluding foreign exchange effects are calculated using current year sales, gross profit, expenses, pre-tax income and net income translated at prior year exchange rates. Presenting changes in sales, gross profit, expenses, pre-tax income and net income excluding the effects of foreign currency translation is not in conformity with U.S. Generally Accepted Accounting Principles (U.S. GAAP), but management analyzes the data in this manner because it is useful to us in understanding the operating performance of our business. We believe this data is also useful to shareholders for the same reason. The changes in sales, gross profit, expenses, pre-tax income and net income excluding the effects of foreign exchange translation are not meant to be a substitute for measurements prepared in conformity with U.S. GAAP, nor to be considered in isolation. Management believes that presenting these non-U.S. GAAP financial measures is useful to shareholders because it enhances their understanding of how management assesses the operating performance of the Company's business.

First Quarter Results of Operations for 2011 Compared with 2010

(amounts in millions)

	Three months ended March 31,			Excluding foreign exchange translation (a)	
	2011	2010	% change reported	2011 adjusted Amount	% change adjusted

* Percentage change not meaningful

(a) The 2011 amounts adjusted for foreign currency translation were calculated using the average exchange rate for the three month period ending March 31, 2011.

Sales

Our sales for the first quarter of 2011 were \$678.2 million, an increase of 38.1% (35.7% excluding foreign currency translation effects) from \$491.1 million in 2010. The increase was attributable to the higher levels of commercial vehicle production that was evident in all regions across the world, expansion of our aftermarket business, as well as increased WABCO content per vehicle. Total sales in Europe, our largest market,

Edgar Filing: WABCO Holdings Inc. - Form 10-Q

increased approximately 45.5% (44.0% excluding foreign currency translation effects) for the first quarter of 2011. Total sales increased 43.5% in North America. Total sales in Asia increased 21.9% (17.6% excluding foreign currency translation effects). The sales growth in Asia included an increase in total sales in China of 29.2%, (24.6% excluding foreign currency translation effects), as well as an increase in total sales in India of 22.3% (20.5% excluding foreign currency translation effects). Total sales in South America increased 30.7% (21.0% excluding foreign currency translation effects). Based on our analysis, we estimate that WABCO's sales growth for the first quarter of 2011 has outperformed the market growth in each region. The global aftermarket sales increase, included in the geographic numbers provided above, was 13.2% (11.7% excluding foreign currency translation effects). The aftermarket business benefited from the continued execution of our aftermarket growth strategies initiated several years ago.

Table of Contents**Gross Profit**

Gross profit increased by \$56.1 million (\$55.6 million excluding foreign currency translation effects). The main drivers of the increase in gross profit were volume and mix, materials and conversion productivity, and overhead absorption. Volume and mix contributed \$39.0 million of the increase while our continued focus on materials and conversion productivity as well as the benefits realized from overhead absorption generated \$32.4 million in improvements. The achievement of this level of improvement was driven by our ability to maintain strict control over indirect costs and was accomplished in an environment where commodity inflation increased our materials cost by approximately 2.5% during the quarter compared to last year. Partially offsetting these improvements were sales price declines that had a negative impact of \$10.8 million, or 1.6% of sales, higher streamlining expenses resulting in a decrease in gross profit by \$1.1 million and labor and other cost escalations of approximately \$2.6 million. Foreign currency transactional impacts negatively effected gross profit in the amount of \$1.3 million.

Operating Expenses

Operating expenses, which include selling and administrative expenses, product engineering expenses and other operating expenses, increased by \$11.1 million. The increase was mainly driven by new research and development investments of \$4.2 million, investments in global expansion of \$3.2 million, incentive compensation of \$2.2 million, and labor and other cost inflation of \$1.8 million offset by a reduction of separation and other costs of \$0.3 million.

Equity Income of Unconsolidated Joint Ventures

Equity in net income of unconsolidated joint ventures increased \$2.9 million to \$4.7 million in 2011 as compared to \$1.8 million in 2010. The increase was primarily driven by income from the Meritor WABCO joint venture which increased by \$2.8 million. This increase is due to the fact that Meritor WABCO was able to benefit from more favorable market conditions in North America in the first quarter of 2011.

Other Non-Operating Income / (Expense), Net

Other non-operating income / (expense), net improved by \$26.0 million to \$22.8 million of income in 2011 as compared to \$3.2 million of expense in 2010. This improvement is primarily driven by a reversal of approximately \$23.1 million of separation related indemnification liabilities in the statement of income due to the expiration of a statute of limitations.

Income Taxes

The income tax benefit for the first quarter of 2011 was \$3.2 million on pre-tax income of \$115.1 million before adjusting for noncontrolling interest, compared with a provision of \$7.6 million on pre-tax income of \$41.3 million before adjusting for noncontrolling interest in the first quarter of 2010. The benefit for 2011 is the net result of the release of tax accruals of approximately \$19.1 million as a consequence of the settlement of foreign tax audits, taxes on earnings in profitable jurisdictions, income offset by fully valued net operating losses, the accrual of interest on uncertain tax positions, and benefits from certain foreign tax planning.

Net Income Attributable to Noncontrolling Interests

Net income attributable to noncontrolling interests increased by \$0.6 million to \$3.6 million in 2011. The increase is due to the improved results of our WABCO-TVS business in India as well as our U.S. partnership, WABCO Compressor Manufacturing.

Liquidity and Capital Resources

We employ several means to manage our liquidity, and we are not dependent upon any one source of funding. Our sources of financing include cash flows from operations, cash and cash equivalents, our five-year \$800 million multi-currency revolving credit facility, our Accounts Receivable Securitization Program and the use of operating leases.

Cash Flows for the three months ended March 31, 2011

Net cash provided by operating activities was \$71.0 million for the first three months of 2011. This compared with net cash provided by operating activities of \$28.0 million for the first three months of 2010.

Edgar Filing: WABCO Holdings Inc. - Form 10-Q

The Company recorded net income including noncontrolling interests of \$118.3 million for the first three months of 2011 compared with net income including noncontrolling interests of \$33.7 million for the first three

Table of Contents

months of 2010. Net income for the first three months of 2011 included noncash elements such as depreciation and amortization of \$20.1 million, as well as a release of an indemnification liability of \$23.1 million. Our working capital increased as a result of an increase in business activity which was primarily driven by increased levels of accounts receivable and inventory, partially offset by accounts payable.

The change in other accrued liabilities and taxes was an increase of \$28.4 million for the first three months of 2011 compared to an increase of \$31.2 million for the first three months of 2010. The major drivers of this change were an increase in payroll and net tax related items partially offset by payment of bonuses under our annual incentive plan. The change in other current and long-term assets for the first three months of 2011 was a decrease of \$8.1 million compared to an increase of \$7.4 million for the first three months of 2010. The main drivers of this change were a decrease of restricted cash related to the Accounts Receivable Securitization Program, offset by increases in value added tax items and guaranteed notes.

The net cash used in investing activities amounted to \$14.4 million in the first three months of 2011 compared to net cash used in investing activities of \$12.4 million in the first three months of 2010. The net cash usage for 2011 includes capital expenditures of \$6.5 million of investments in tooling, \$6.1 million on plant and equipment and \$1.8 million in computer software. This compared with \$6.2 million of investments in tooling, \$5.0 million on plant and equipment and \$1.2 million in computer software during the first three months of 2010.

The net cash used by financing activities during the first three months of 2011 amounted to \$33.8 million compared to net cash provided by financing activities of \$1.0 million during the first three months of 2010.

As of March 31, 2011, our total third party debt was \$67.9 million consisting primarily of \$44.0 million of long term debt borrowed under our \$800 million five-year credit facility. Also, subsidiaries in other countries had borrowings from banks totaling \$23.9 million, of which \$23.7 million is classified as short term debt and \$0.2 million as long term debt. The increase from the prior year is driven by a \$23.3 million loan under a short term borrowing with Société Générale Bank Nederland N.V related to the Accounts Receivable Securitization Program. The remaining \$0.6 million supports local working capital requirements.

We received \$16.7 million of stock option proceeds during 2011 compared with \$1.6 million in 2010. The number of stock options exercised in the first three months of 2011 and 2010 were 787,974 and 121,843, respectively.

Credit Facility

On May 31, 2007, WABCO entered into an unsecured, five-year \$800 million, multi-currency revolving credit facility that will expire on July 31, 2012. This is our principal bank credit facility, and it became available to us on August 1, 2007. The proceeds of the borrowings under the principal credit facility have historically been used to fund repurchases of our shares, pay quarterly dividends to our shareholders and to meet short-term cash requirements. In September 2010, the Company also used this facility to partially fund the European Commission fine indemnification of \$326.1 million. At March 31, 2011, the carrying amounts of this facility approximated fair value. Up to \$100 million under this facility may be used for issuing letters of credit, of which \$98.1 million was unused as of March 31, 2011, and up to \$75 million for same-day borrowings of which \$75 million was unused as of March 31, 2011. The balance outstanding on this facility as of March 31, 2011, was \$44.0 million in addition to \$1.9 million of letters of credit. The Company pays a facility fee of 0.10% per annum. Borrowings thereunder bear interest generally at the London Interbank Offered Rate (LIBOR) plus either 0.35% if borrowings are less than or equal to 50% of the total available balance, or 0.40% if borrowings are greater than 50% of the total available balance. The Company also pays 0.35% per annum plus issuance fees for letters of credit. The interest rate spreads above the U.S. dollar and Euro LIBOR (0.24345% and 0.91625%, respectively at March 31, 2011 for the 1month rates) are subject to adjustments should the Company's leverage ratio change. The Company intends to replace all or some portion of the existing five-year \$800 million credit facility by the time of its expiration.

Our principal credit facility contains various covenants that limit, among other things, liens, transactions, subsidiary indebtedness, and certain mergers and sales of assets. The covenants also require the Company to meet certain financial tests: a rolling four quarters 3 to 1 ratio of consolidated net indebtedness to consolidated trailing four quarters adjusted EBITDA (earnings before interest, taxes, depreciation and amortization adjusted for certain items), a 3 to 1 ratio of consolidated trailing four quarters adjusted EBITDA to consolidated net interest expense for the same period, and a liquidity test. The liquidity covenant requires us to have at least \$100 million of liquidity (which includes unused commitments under the agreement and certain other committed facilities that may be entered into, as well as unrestricted cash and cash equivalents). As of March 31, 2011, our trailing four quarters adjusted EBITDA is \$355.1 million, which consists of \$111.9 million for the first quarter of 2011, \$94.9 million for the fourth quarter of 2010, \$78.5 million for the third quarter of 2010 and \$69.8 million for the second quarter of 2010. As defined in our

Table of Contents

principal credit facility, our net indebtedness was \$99.8 million at March 31, 2011 (comprised of \$67.9 million of debt and \$31.9 million of uncollateralized guarantees), resulting in an EBITDA covenant ratio of 0.3 to 1. Given our net indebtedness of \$99.8 million (including guarantees) at March 31, 2011 we had the ability to borrow approximately an incremental \$747 million (after considering the \$100 million liquidity requirement) under our principal credit facility and in compliance with the covenants.

Accounts Receivable Securitization Program

As discussed above, we have the ability to use our Accounts Receivable Securitization Program as one of several means to manage our liquidity. Under the terms of the Accounts Receivable Securitization Program that we entered into with Société Générale on September 23, 2009, we have the ability to sell our accounts receivable directly to Société Générale. The maximum funding from receivables that may be sold into the Accounts Receivable Securitization Program and outstanding at any point in time is 100 million; however, there can be no assurance that the Company will generate sufficient eligible receivables to access the maximum availability. The original term of the Accounts Receivable Securitization Program was for one year, with the possibility of four additional annual extensions, assuming the Company and the participating sellers are in compliance with the applicable covenants. The Company extended the Receivables Program in September 2010 for one year.

During the quarter ended March 31, 2011, the Company sold all of its eligible receivables into the Accounts Receivable Securitization Program. The receivables were removed from the balance sheet in accordance with the guidance under ASC topic 860, *Transfers and Servicing*. The total amount of receivables sold under the Accounts Receivable Securitization Program during the three months ended March 31, 2011 was 177.0 million (\$242.0 million at weighted average March 31, 2011 year-to-date exchange rates). The amount of eligible receivables sold and outstanding at March 31, 2011 amounted to 70.0 million (\$99.0 million at March 31, 2011 exchange rates). As a result of the sale, accounts receivable decreased by \$99.0 million and cash and cash equivalents increased by \$41.7 million. The remaining amount of proceeds of \$57.3 million is a subordinated deposit with Société Générale Bank Nederland N.V. at March 31, 2011.

The fair value of the receivables sold equaled the carrying cost at time of sale, and no gain or loss was recorded as a result of the sale. The Company estimated the fair value of sold receivables using Level 3 inputs and based the estimate on historical and anticipated performance of similar receivables, including historical and anticipated credit losses (if any). As part of the Accounts Receivable Securitization Program, the Company continues to service the receivables. The Company sells the receivables at face value, but receives actual funding net of the subordinated deposit account until collections are received from customers for the receivables sold. The Company is exposed to the credit losses of sold receivables up to the amount of its subordinated deposit account at each settlement date. Credit losses for receivables sold were immaterial and past due amounts outstanding at March 31, 2011 were immaterial. Servicing fees for the program were \$0.2 million for the quarter ended March 31, 2011.

Factoring Program

On April 15, 2009, we entered into a 35 million factoring program, which has a term of five years, in respect to accounts receivable from one of our customers. To date, we have not utilized this program.

Off-Balance Sheet Arrangements

Please see the disclosure above in Accounts Receivable Securitization Program.

Aggregate Contractual Obligations

The Company has contractual obligations for debt, operating leases, tax indemnifications, purchase obligations, unfunded pension and post-retirement benefit plans and tax liabilities that were summarized in a table of aggregate contractual obligations for the year ended December 31, 2010 disclosed in the Annual Report on Form 10-K. There have been no material changes to those obligations since December 31, 2010.

Information Concerning Forward Looking Statements

Certain of the statements contained in this report (other than the historical financial data and other statements of historical fact), including, without limitation, statements as to management's expectations and beliefs, are forward-looking statements. These forward-looking statements were based on various facts and were derived utilizing numerous important assumptions and other important factors, and changes in such facts, assumptions or factors could cause actual results to differ materially from those in the forward-looking statements. Forward-looking

Table of Contents

statements include the information concerning our future financial performance, financial condition, liquidity, business strategy, projected plans and objectives. Statements preceded by, followed by or that otherwise include the words believes, expects, anticipates, strategies, prospects, intends, projects, estimates, plans, may increase, may fluctuate, and similar expression or future or conditional verbs such as will, shall, may and could are generally forward looking in nature and not historical facts. This report includes important information as to risk factors in Item 1A. Risk Factors, and Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. Many important factors could cause actual results to differ materially from management's expectations, including:

the actual level of commercial vehicle production in our end-markets;

adverse developments in the business of our key customers;

periodic changes to contingent liabilities, including those associated with litigation matters and government investigations;

our ability to access credit markets or capital markets on a favorable basis or at all;

adverse developments in general business, economic and political conditions or any outbreak or escalation of hostilities on a national, regional or international basis;

changes in international or U.S. economic conditions, such as inflation, interest rate fluctuations, foreign exchange rate fluctuations or recessions in our markets;

unpredictable difficulties or delays in the development of new product technology;

pricing changes to our supplies or products or those of our competitors, and other competitive pressures on pricing and sales;

our ability to receive component parts from our suppliers;

changes in the environmental regulations that affect our current and future products;

competition in our existing and future lines of business and the financial resources of competitors;

our failure to comply with regulations and any changes in regulations;

our failure to complete potential future acquisitions or to realize benefits from completed acquisitions;

our inability to implement our growth plan;

the loss of any of our senior management;

difficulties in obtaining or retaining the management and other human resource competencies that we need to achieve our business objectives;

labor relations; and

risks inherent in operating in foreign countries, including exposure to local economic conditions, government regulation, currency restrictions and other restraints, changes in tax laws, expropriation, political instability and diminished ability to legally enforce our contractual rights.

We undertake no obligation to release publicly any revisions to any forward-looking statements, to report events or to report the occurrence of unanticipated events unless we are required to do so by law.

Critical Accounting Policies and Estimates

Preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Management believes the most complex and sensitive judgments, because of their significance to the consolidated financial statements, result

Table of Contents

primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management's Discussion and Analysis and Notes 2 and 13 to the Consolidated Financial Statements for the year ended December 31, 2010 in the Company's Annual Report on Form 10-K, describe the most significant accounting estimates and policies used in preparation of the Consolidated Financial Statements. Actual results in these areas could differ materially from management's estimates. There have been no significant changes in the Company's assumptions regarding critical accounting estimates during the first quarter of 2011.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There were no material changes to the disclosure on this matter for the year ended December 31, 2010 made in the Company's Annual Report on Form 10-K.

Item 4. Controls and Procedures

The Company has established a Disclosure Controls Committee that assists the Chief Executive Officer and Chief Financial Officer in their evaluation of the Company's disclosure controls and procedures. Our Chief Executive Officer and Chief Financial Officer have concluded, based on their evaluation as of the end of the period covered by this report, that our disclosure controls and procedures, as defined in the Securities Exchange Act of 1934, as amended (the Exchange Act), Rule 13a-15(e), are effective to ensure that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act (i) is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (ii) is accumulated and communicated to the Company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There have been no changes in the Company's internal control over financial reporting during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
