SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2011

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-14733

LITHIA MOTORS, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: LITHIA MOTORS INC - Form 10-Q

Oregon (State or other jurisdiction of incorporation or organization)	93-0572810 (I.R.S. Employer Identification No.)
360 E. Jackson Street, Medford, Oregon (Address of principal executive offices)	97501 (Zip Code)
Registrant's telephone number, including area code: 541-776-6401	

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class A common stock without par value	22,632,406
Class B common stock without par value	3,762,231
(Class)	(Outstanding at April 29, 2011)

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Interim Financial Statements

Basis of Presentation

These condensed consolidated financial statements contain unaudited information as of March 31, 2011 and for the three-month periods ended March 31, 2011 and 2010. The unaudited interim financial statements have been prepared pursuant to the rules and regulations for reporting on Form 10-Q. Accordingly, certain disclosures required by accounting principles generally accepted in the United States of America for annual financial statements are not included herein. In management's opinion, these unaudited financial statements reflect all adjustments (which include only normal recurring adjustments) necessary for a fair presentation of the information when read in conjunction with our 2010 audited consolidated financial statements and the related notes thereto. The financial information as of December 31, 2010 is derived from our 2010 Annual Report on Form 10-K. The interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in our 2010 Annual Report on Form 10-K. The results of operations for the interim periods presented are not necessarily indicative of the results to be expected for the full year.

Reclassifications

Certain reclassifications of amounts previously reported have been made to the accompanying consolidated financial statements to maintain consistency and comparability between periods presented.

Revenues and cost of sales associated with used vehicles, previously disclosed on a combined basis, have been reclassified and are disclosed separately as used vehicle retail and used vehicle wholesale in the accompanying consolidated statements of operations for all periods presented.

The results of operations of stores classified as discontinued operations have been presented on a comparable basis for all periods presented in the accompanying consolidated statements of operations. See also Note 12.

These reclassifications had no impact on previously reported net income.

Concentrations of Risk and Uncertainties Regarding Manufacturers

We purchase substantially all of our new vehicles and inventory from various manufacturers at the prevailing prices charged by auto makers to all franchised dealers. Our overall sales could be impacted by the auto manufacturers' inability or unwillingness to supply our dealerships with an adequate supply of popular models.

In March 2011, an earthquake, tsunami and subsequent nuclear crisis in Japan impacted automotive manufacturers and automotive suppliers. These events damaged facilities, reduced production of vehicles and parts and destroyed inventory in Japan. Many Japanese manufacturers and suppliers were forced to halt production as they reconfigured production logistics. Many plants in Japan continue to be inoperable and certain plants, which have restarted operations, are running at limited capacity. These events caused a global disruption to the supply of vehicles and automotive parts. We depend on our manufacturers to provide a supply of vehicles which supports expected sales levels. In the event that manufacturers are unable to supply the needed level of vehicles, our financial performance may be adversely impacted. We expect new vehicle supply to be constrained in the second and third quarters of 2011, although the impact of this constraint remains unknown. As of March 31, 2011, and December 31, 2010 we had \$338.2 million and \$305.7 million, respectively, in new vehicle inventory. We had \$22.3 million and \$22.2 million in parts and accessories inventory as of March 31, 2011 and December 31, 2010, respectively.

Table of Contents

A lack of new vehicle supply may increase demand for late-model used vehicles. In 2009 and 2010, production and sales in North America were reduced by the recessionary environment. As a result, used vehicle supply, especially late-model vehicles, may be constrained, resulting in increased supply pressures and limited availability. Our used vehicle sales volume could be adversely impacted if we are unable to maintain an adequate supply of vehicles or if we are unable to obtain the makes and models desired by our customers. As of March 31, 2011, and December 31, 2010, we had \$96.4 million and \$87.3 million, respectively, in used and program vehicle inventory.

In 2010, Toyota announced vehicle recalls for possible accelerator pedal sticking issues and also halted the sales of eight models of vehicles until potentially defective parts were replaced, both of which reduced sales at our Toyota stores and adversely affected the manufacturer's reputation for quality. The long-term effects that these recalls and safety issues will have on the Toyota brands are uncertain. We depend on our manufacturers to deliver high-quality, defect-free vehicles. In the event that manufacturers, including Toyota, experience future quality issues, our financial performance may be adversely impacted.

We are subject to a concentration of risk in the event of financial distress, including potential reorganization or bankruptcy, of a major vehicle manufacturer. We purchase substantially all of our new vehicles from various manufacturers or distributors at the prevailing prices available to all franchised dealers. Our sales volume could be materially adversely impacted by the manufacturers' or distributors' inability to supply the stores with an adequate supply of vehicles. Our Chrysler, General Motors (GM) and Ford (collectively, the Domestic Manufacturers) stores represented approximately 30%, 18% and 6% of our new vehicle sales for the three months ended March 31, 2011, respectively, and approximately 30%, 17% and 6% for all of 2010, respectively.

We receive incentives and rebates from our manufacturers, including cash allowances, financing programs, discounts, holdbacks and other incentives. These incentives are recorded as receivables on our Consolidated Balance Sheets until payment is received. Our financial condition could be materially adversely impacted by the manufacturers' or distributors' inability to continue to offer these incentives and rebates at substantially similar terms, or to pay our outstanding receivables. Total receivables from Domestic Manufacturers were \$10.0 million and \$8.4 million as of March 31, 2011 and December 31, 2010, respectively.

We currently have relationships with a number of manufacturers, their affiliated finance companies or other finance companies, including Ally Bank, Mercedes-Benz Financial Services USA, LLC, Toyota Financial Services, Ford Motor Credit Company, VW Credit, Inc., American Honda Finance Corporation, Nissan Motor Acceptance Corporation and BMW Financial Services NA, LLC. These companies provide new vehicle floorplan financing for their respective brands. Ally Bank serves as the primary lender for all other brands. Several of the companies also provide mortgage financing. At March 31, 2011, Ally Bank was the floorplan provider on approximately 67% of our total floorplan amount outstanding and the provider of approximately 32% of our outstanding mortgage financing. Certain of these companies have incurred significant losses and are operating under financial constraints. Other companies may incur losses in the future or undergo funding limitations. As a result, credit that has typically been extended to us by these companies may be modified with terms unacceptable to us or revoked entirely. If these events were to occur, we may not be able to pay our floorplan debts or borrow sufficient funds to refinance the vehicles. Even if new financing were available, it may not be on terms acceptable to us.

We enter into Franchise Agreements with manufacturers. The Franchise Agreements generally limit the location of the dealership and provide the auto manufacturer approval rights over changes in dealership management and ownership. The auto manufacturers are also entitled to terminate the Franchise Agreements if the dealership is in material breach of the terms. Our ability to expand operations depends, in part, on obtaining consents of the manufacturers for the acquisition of additional dealerships.

Table of Contents**Note 2. Inventories**

Inventories are valued at the lower of market value or cost, using a pooled approach for vehicles and the specific identification method for parts. The cost of new and used vehicle inventories includes the cost of dealer installed accessories, reconditioning and transportation. Inventories consisted of the following (in thousands):

	March 31, 2011	December 31, 2010
New vehicles	\$ 338,238	\$ 305,721
Used and program vehicles	96,410	87,349
Parts and accessories	22,297	22,158
	\$ 456,945	\$ 415,228

Note 3. Comprehensive Income

Comprehensive income for the three-month periods ended March 31, 2011 and 2010 was as follows (in thousands):

	Three Months Ended March 31,	
	2011	2010
Net income	\$ 8,705	\$ 1,267
Cash flow hedges:		
Derivative gain (loss), net of tax effect of \$(320) and \$294, respectively	562	(478)
Total comprehensive income	\$ 9,267	\$ 789

Note 4. Earnings Per Share

We compute net income per share of Class A and Class B common stock using the two-class method. Under this method, basic net income per share is computed using the weighted average number of common shares outstanding during the period excluding unvested common shares subject to repurchase or cancellation. Diluted net income per share is computed using the weighted average number of common shares and, if dilutive, potential common shares outstanding during the period. Potential common shares consist of the incremental common shares issuable upon the exercise of stock options and unvested restricted shares subject to repurchase or cancellation. The dilutive effect of outstanding stock options and other grants is reflected in diluted earnings per share by application of the treasury stock method. The computation of the diluted net income per share of Class A common stock assumes the conversion of Class B common stock, while the diluted net income per share of Class B common stock does not assume the conversion of those shares.

Except with respect to voting rights, the rights of the holders of our Class A and Class B common stock are identical. Our Restated Articles of Incorporation require that the Class A and Class B common stock must share equally in any dividends, liquidation proceeds or other distribution with respect to our common stock and the Articles of Incorporation can only be amended by a vote of the shareholders. Additionally, Oregon law provides that amendments to our Articles of Incorporation, which would have the effect of adversely altering the rights, powers or preferences of a given class of stock, must be approved by the class of stock adversely affected by the proposed amendment. As a result, the undistributed earnings for each period are allocated based on the contractual participation rights of the Class A and Class B common shares as if the earnings for the period had been distributed. As the liquidation and dividend rights are identical, the undistributed earnings are allocated on a proportionate basis. Further, as we assume the conversion of Class B common stock in the computation of the diluted net income per share of Class A common stock, the undistributed earnings are equal to net income for that computation.

Table of Contents

Following is a reconciliation of the income from continuing operations and weighted average shares used for our basic earnings per share (EPS) and diluted EPS from continuing operations for the three-month periods ended March 31, 2011 and 2010 (in thousands, except per share amounts):

Three Months Ended March 31, Basic EPS from Continuing Operations	2011		2010	
	Class A	Class B	Class A	Class B
Numerator:				
Income from continuing operations applicable to common stockholders	\$ 7,462	\$ 1,243	\$ 1,233	\$ 210
Distributed income applicable to common stockholders	(1,128)	(188)		
Basic undistributed income from continuing operations applicable to common stockholders	\$ 6,334	\$ 1,055	\$ 1,233	\$ 210
Denominator:				
Weighted average number of shares outstanding used to calculate basic income per share	22,579	3,762	22,133	3,762
Basic income per share from continuing operations applicable to common stockholders	\$ 0.33	\$ 0.33	\$ 0.06	\$ 0.06

Diluted distributed income per share from continuing operations applicable to common stockholders	(0.05)	(0.05)		
Diluted undistributed income per share from continuing operations applicable to common stockholders	\$ 0.28	\$ 0.28	\$ 0.06	\$ 0.06
Three Months Ended March 31, Diluted EPS				
Antidilutive Securities				
Shares issuable pursuant to stock options not included since they were antidilutive	387		734	

Note 5. Asset Impairment Charges

Long-lived assets classified as held and used and definite-lived intangible assets are reviewed for impairment whenever events or circumstances indicate that the carrying amount of such assets may not be recoverable. An estimate of future undiscounted net cash flows associated with the long-lived assets is used to determine if the carrying value of the assets is recoverable. An impairment charge is recorded for the amount the carrying value of the asset exceeds its fair value.

Table of Contents

In the first quarter of 2011, a triggering event was determined to have occurred associated with a property due to changes in its expected future use. We evaluated the future undiscounted net cash flows for the property and determined the carrying value was not recoverable. As a result, we recorded an asset impairment charge of \$0.4 million on our Consolidated Statements of Operations.

In the first quarter of 2010, due to changes in specific facts and circumstances on three properties held for future development, we tested certain long-lived assets for recoverability. We recorded asset impairment charges of \$1.5 million on our Consolidated Statements of Operations primarily related to a property for which a preliminary agreement to sell was entered into in March 2010.

Note 6. Stock-Based Compensation

In the first quarter of 2011, we issued restricted stock units (RSUs) covering 181,000 shares of our Class A common stock to certain employees. The RSUs are not participating securities and fully vest on the fourth anniversary of the grant date. We estimated compensation expense, based on a fair value methodology, of \$2.0 million related to the RSUs, which will be recognized over the vesting period. Of this amount, approximately \$0.4 million will be recognized in 2011.

Note 7. Deferred Compensation and Long-term Incentive Plan

Beginning in March 2011, we offered a deferred compensation plan (the Plan) to provide certain employees the ability to accumulate assets for retirement on a tax deferred basis. Participants are allowed to defer a portion of their compensation and are 100% vested in their respective deferrals and earnings. We may also make discretionary contributions the Plan. The vesting terms of the discretionary contribution are determined at the time of contribution. Participants receive a guaranteed return on vested deferrals and earnings. We retain discretion to set the guaranteed rate each year. We also have existing deferred compensation plans for our Board of Directors and selected executives.

In March 2011, we made a discretionary contribution of \$1.3 million. The vesting term ranges between one and seven years, based on the employee s position. Participants will receive a guaranteed return of 6% in 2011. As of March 31, 2011, the balance due to participants was \$388,000 and was included as a component of other long-term liabilities in the Consolidated Balance Sheets.

Note 8. Fair Value Measurements

Factors used in determining the fair value of our financial assets and liabilities are summarized into three broad categories:

Level 1 quoted prices in active markets for identical securities;

Level 2 other significant observable inputs, including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.; and

Level 3 significant unobservable inputs, including our own assumptions in determining fair value.

The inputs or methodology used for valuing financial assets and liabilities are not necessarily an indication of the risk associated with investing in them.

We use the income approach to determine the fair value of our interest rate swaps using observable Level 2 market expectations at each measurement date and an income approach to convert estimated future cash flows to a single present value amount (discounted) assuming that participants are motivated, but not compelled to transact. Level 2 inputs for the swap valuations are limited to quoted prices for similar assets or liabilities in active markets (specifically futures contracts on LIBOR for the first two years) and inputs other than quoted prices that are observable for the asset or liability (specifically LIBOR cash and swap rates and credit risk at commonly quoted intervals). Mid-market

Table of Contents

pricing is used as a practical expedient for fair value measurements. Key inputs, including the cash rates for very short term, futures rates for up to two years and LIBOR swap rates beyond the derivative maturity are used to predict future reset rates to discount those future cash flows to present value at measurement date.

Inputs are collected from Bloomberg on the last market day of the period. The same methodology is used to determine the rate used to discount the future cash flows. The valuation of the interest rate swaps also takes into consideration our own, as well as the counterparty's, risk of non-performance under the contract.

We estimate the fair value of long-lived assets that are recorded at fair value based on a market valuation approach. We use prices and other relevant information generated primarily by recent market transactions involving similar or comparable assets or liabilities, as well as our historical experience in divestitures, acquisitions and real estate transactions. Additionally, we may use a cost valuation approach to value long-lived assets when a market valuation approach is unavailable. Under this approach, we determine the cost to replace the service capacity of an asset, adjusted for physical and economic obsolescence. When available, we use valuation inputs from independent valuation experts, such as real estate appraisers and brokers, to corroborate our estimates of fair value. Real estate appraisers' and brokers' valuations are typically developed using one or more valuation techniques including market, income and replacement cost approaches. As these valuations contain unobservable inputs, we classified the measurement of fair value of long-lived assets as Level 3.

There were no changes to our valuation techniques during the three-month period ended March 31, 2011.

Assets and Liabilities Measured at Fair Value

Following are the disclosures related to our assets and (liabilities) that are measured at fair value (in thousands):

Fair Value at March 31, 2011	Level 1	Level 2	Level 3
Measured on a recurring basis:			
Derivative contracts, net	\$	\$ (7,714)	\$
Measured on a non-recurring basis:			
Long-lived assets held and used:			
Certain buildings and improvements	\$	\$	\$ 1,500
	Level	Level 2	Level 3
Fair Value at December 31, 2010	1		
Measured on a recurring basis:			
Derivative contracts, net	\$	\$ (8,692)	\$
Measured on a non-recurring basis:			
Long-lived assets held and used:			
Certain buildings and improvements	\$	\$	\$ 23,400
Certain parcels of land			13,511
Total	\$	\$	\$ 36,911

See Note 9 for more details regarding our derivative contracts.

Financial Assets and Liabilities Not Recorded at Fair Value

We had \$108.1 million and \$118.5 million of fixed interest rate debt outstanding as of March 31, 2011 and December 31, 2010, respectively. As of March 31, 2011, this debt had maturity dates between November 2011 and October 2029. We calculate the estimated fair value of our fixed rate debt using a discounted cash flow methodology. Using estimated current interest rates based on a similar risk profile and duration, the fixed cash flows are discounted and summed to compute the fair value of the debt. Based on this analysis, we have determined that the fair value of this long-term fixed interest rate debt was approximately \$116.2 million and \$127.4 million at March 31, 2011 and December 31, 2010, respectively.

Table of Contents

We believe the carrying value of our variable rate debt approximates fair value.

Note 9. Derivative Instruments

We enter into interest rate swaps to manage the variability of our interest rate exposure, thus fixing a portion of our interest expense in a rising or falling rate environment. We do not enter into derivative instruments for any purpose other than to manage interest rate exposure of the one-month LIBOR benchmark. That is, we do not engage in interest rate speculation using derivative instruments.

Typically, we designate all interest rate swaps as cash flow hedges and, accordingly, we record the change in fair value of these interest rate swaps in other comprehensive income rather than net income until the underlying hedged transaction affects net income. If a swap is no longer accounted for as a cash flow hedge and the forecasted transaction remains probable or reasonably possible of occurring, the gain or loss recorded in accumulated other comprehensive income is recognized in income as the forecasted transaction occurs. If the forecasted transaction is probable of not occurring, the gain or loss recorded in accumulated other comprehensive income (loss) is recognized in income immediately.

At March 31, 2011 and December 31, 2010, the net fair value of all of our agreements totaled a loss of \$7.7 million and \$8.7 million, respectively, which was recorded on our Consolidated Balance Sheets as a component of accrued liabilities and other long-term liabilities. The estimated amount expected to be reclassified into earnings within the next twelve months was \$3.2 million at March 31, 2011.

As of March 31, 2011, we had outstanding the following interest rate swaps with U.S. Bank Dealer Commercial Services:

effective June 16, 2006 a ten year, \$25 million interest rate swap at a fixed rate of 5.587% per annum, variable rate adjusted on the 1st and 16th of each month;

effective January 26, 2008 a five year, \$25 million interest rate swap at a fixed rate of 4.495% per annum, variable rate adjusted on the 26th of each month;

effective May 1, 2008 a five year, \$25 million interest rate swap at a fixed rate of 3.495% per annum, variable rate adjusted on the 1st and 16th of each month; and

effective May 1, 2008 a five year, \$25 million interest rate swap at a fixed rate of 3.495% per annum, variable rate adjusted on the 1st and 16th of each month.

We receive interest on all of the interest rate swaps at the one-month LIBOR rate. The one-month LIBOR rate at March 31, 2011 was 0.2% per annum, as reported in the Wall Street Journal.

The fair value of our derivative instruments was included in our Consolidated Balance Sheets as follows:

Note 10. Purchase Option

Edgar Filing: LITHIA MOTORS INC - Form 10-Q

On December 31, 2009, we entered into an option agreement with our Vice Chairman, Dick Heimann, who is a related party. Under the terms of the option agreement, Mr. Heimann may purchase our Volkswagen and Nissan franchises in Medford, Oregon, and acquire their operations, including inventories and equipment, at valuations set forth in our standard form of agreement, which we believe will approximate fair value at the time of exercise. Any purchased real estate will be priced at the then fair market value. Existing leases, if any, will be assumed at the time of exercise of the option. The purchase price for the intangible assets (manufacturers' franchise rights) is set at \$10 in the agreement. The option may be exercised by Mr. Heimann at any time prior to December 31, 2012. No consideration was received in exchange for this option.

We estimate the fair value of the option at the end of each period using a discounted cash flow analysis, valuation inputs from independent third parties and the use of a Black-Scholes option valuation model. As of March 31, 2011 and December 31, 2010, we had \$0.6 million recorded as a liability in other long-term liabilities in our Consolidated Balance Sheets associated with this option.

Any changes in the fair value of the option are recorded each period as a component of selling, general and administrative expenses in our Consolidated Statements of Operations. No expense was recorded in the three-month periods ended March 31, 2011 or 2010 associated with this option.

Table of Contents**Note 11. Share Repurchase Program**

In June 2000, our Board of Directors authorized the repurchase of up to 1,000,000 shares of our Class A common stock. Through March 31, 2011, we have purchased a total of 583,224 shares under this program, of which 2,600 were purchased in 2011 at an average price of \$13.52 per share. As of March 31, 2011, 416,776 shares remained available for purchase pursuant to this program. We may continue to purchase shares from time to time in the future as conditions warrant.

Note 12. Discontinued Operations

We classify a store as discontinued operations if the location has been sold, operations have been ceased at that location or if management has committed to a plan to dispose of the store. Additionally, the store must meet the criteria as required by U.S. generally accepted accounting standards:

our management team, possessing the necessary authority, commits to a plan to sell the store;

the store is available for immediate sale in its present condition;

an active program to locate buyers and other actions that are required to sell the store are initiated;

a market for the store exists and we believe its sale is likely. We also expect to record the transfer of the store as a completed sale within one year;

active marketing of the store commences at a price that is reasonable in relation to the estimated fair market value; and

our management team believes it is unlikely changes will be made to the plan or withdrawal of the plan to dispose of the store will occur.

We reclassify the store's operations to discontinued operations in our Consolidated Statement of Operations, on a comparable basis for all periods presented, provided we do not expect to have any significant continuing involvement in the store's operations after its disposal.

Certain financial information related to discontinued operations was as follows (in thousands):

Three Months Ended March 31,	2010
Revenue	\$ 4,158
Loss from discontinued operations	\$ (274)
Net loss on disposal activities	(17)
	(291)
Income tax benefit	115
Loss from discontinued operations, net of income taxes	\$ (176)
Cash generated from disposal activities	\$ 421

Edgar Filing: LITHIA MOTORS INC - Form 10-Q

The loss on disposal activities included the following impairment charges (in thousands):

Three Months Ended March 31,	2010
Property, plant and equipment	\$ (11)
Other	(6)
	\$ (17)

Note 13. Subsequent Events

Acquisition

On April 18, 2011, we acquired the inventory, equipment, real estate and intangible assets of, and assumed certain liabilities related to, Mercedes-Benz of Portland, Oregon, Mercedes Benz of Wilsonville, Oregon and Rasmussen BMW/MINI in Portland, Oregon from the Don Rasmussen Group. These stores generated approximately \$160 million in revenues for the full year of 2010. We paid a purchase price of \$69.2 million, of which \$53.3 million was paid in cash and \$15.9 million was financed through a floorplan credit facility. As of April 29, 2011, the initial accounting for determining the acquisition-date fair value for each major class of assets acquired, including goodwill, and liabilities assumed was not yet complete.

Table of Contents

Common Stock Dividend

On April 27, 2011, we announced that our Board of Directors approved a dividend of \$0.07 per share on our Class A and Class B common stock related to our first quarter 2011 financial results. The dividend will total approximately \$1.8 million and will be paid on May 25, 2011 to shareholders of record on May 11, 2011.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements and Risk Factors

Some of the statements under the sections entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Risk Factors" and elsewhere in this Form 10-Q constitute forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Generally, you can identify forward-looking statements by terms such as may, will, should, expect, plan, intend, anticipate, believe, estimate, predict, potential, and continue or the negative of these terms or other comparable terminology. The forward-looking statements contained in this Form 10-Q involve known and unknown risks, uncertainties and situations that may cause our actual results, level of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these statements. Some of the important factors that could cause actual results to differ from our expectations are discussed in Part II - Other Information, Item 1A. in this Form 10-Q and in the Risk Factors section of our Annual Report on Form 10-K, as supplemented and amended from time to time in Quarterly Reports on Form 10-Q and the Company's other filings with the SEC.

While we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. You should not place undue reliance on these forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made. We assume no obligation to update or revise any forward-looking statements.

Overview

We are a leading operator of automotive franchises and a retailer of new and used vehicles and services. As of April 29, 2011, we offered 26 brands of new vehicles and all brands of used vehicles in 86 stores in the United States and online at Lithia.com. We sell new and used cars and light trucks, replacement parts; provide vehicle maintenance, warranty, paint and repair services and arrange related financing, service contracts, protection products and credit insurance.

We continue to believe that the fragmented nature of the automotive dealership sector provides us with the opportunity to achieve growth through consolidation. We seek exclusive franchises for acquisition, where we are the only representative of the brand within a market. We have completed over 100 acquisitions since our initial public offering in 1996. Our acquisition strategy has been to acquire underperforming dealerships and, through the application of our centralized operating structure, leverage costs and improve store profitability. We believe the current economic environment provides us with attractive acquisition opportunities.

We also believe that we can continue to improve operations at our existing stores. By promoting entrepreneurial leadership in our general manager position, we anticipate continuing improvement in the percentage of new vehicle sales we capture in our local markets. While we retail approximately one used vehicle for every new vehicle sold, we believe we can make additional improvements in our used vehicle sales performance by offering lower-priced value vehicles and selling brands other than the new vehicle franchise at each location. Our service, body and parts operations provide important repeat business for our stores. We have increased our marketing efforts, lowered prices on routine maintenance items and focused on offering more commodity products to offset the impact of fewer units in operations. Overall, organic growth through improved operations is a goal in 2011.

Table of Contents

We believe our cost structure is aligned with current industry sales levels. Through initiatives started in the second quarter of 2008, we have successfully established a cost structure which can be leveraged as vehicle sales levels improve. As we focus on maintaining discipline in controlling costs, we target retaining, on a pre-tax basis, 50% to 55% of each incremental gross profit dollar after subtracting SG&A expense.

Results of Continuing Operations

For the three months ended March 31, 2011 and 2010, we reported income from continuing operations, net of tax of \$8.7 million, or \$0.33 per diluted share, and \$1.4 million, or \$0.06 per diluted share, respectively.

Discontinued Operations

Results for sold or closed stores qualifying for reclassification under the applicable accounting guidance are presented as discontinued operations in our Consolidated Statements of Operations. As a result, our results from continuing operations are presented on a comparable basis for all periods. We did not have any stores classified as discontinued operations during the quarter ended March 31, 2011. The loss from discontinued operations for the quarter ended March 31, 2010 totaled \$0.2 million.

Key Performance Metrics

Certain key performance metrics for revenue and gross profit were as follows for the three months ended March 31, 2011 and 2010 (dollars in thousands):

		Percent of Total Revenues	Gross Profit	Gross Profit Margin	Percent of Total Gross Profit
Three months ended March 31, 2011					
New vehicle	\$ 312,234	51.8%	\$ 23,330	7.5%	22.2%
Used vehicle retail	160,723	26.7	23,592	14.7	22.5
Used vehicle wholesale	30,386	5.0	420	1.4	0.4
Finance and insurance ⁽¹⁾	19,923	3.3	19,923	100.0	19.0
Service, body and parts	76,585	12.7	37,118	48.5	35.4
Fleet and other	3,146	0.5	551	17.5	0.5
	\$ 602,997	100.0%	\$ 104,934	17.4%	100.0%

		Percent of Total Revenues	Gross Profit	Gross Profit Margin	Percent of Total Gross Profit
Three months ended March 31, 2010					
New vehicle	\$ 215,617	47.0%	\$ 18,404	8.5%	21.4%
Used vehicle retail	135,899	29.6	18,594	13.7	21.6
Used vehicle wholesale	23,465	5.0	371	1.6	0.5
Finance and insurance ⁽¹⁾	14,638	3.2	14,638	100.0	17.0
Service, body and parts	68,797	15.0	33,546	48.8	39.1
Fleet and other	803	0.2	352	43.8	0.4
	\$ 459,219	100.0%	\$ 85,905	18.7%	100.0%

(1) Commissions reported net of anticipated cancellations.

Same Store Operating Data

We believe that same store comparisons are a key indicator of our financial performance. Same store metrics demonstrate our ability to grow our revenue and profitability in our existing locations. As a result, same store comparisons have been integrated into the discussion below.

Table of Contents

A same store basis represents stores that were operating as of March 31, 2011, and only includes the months of operations for both comparable periods. For example, a store acquired in February 2010 would be included in same store operating data beginning in March 2011, after its first full complete comparable month of operation. Thus, operating results for same store comparisons would include only the period of March for both comparable periods.

New Vehicle Revenues

(Dollars in thousands)	Three Months Ended		Increase	% Increase
	March 31,			
	2011	2010		
Reported				
Revenue	\$ 312,234	\$ 215,617	\$ 96,617	44.8%
Retail units sold	9,929	6,884	3,045	44.2
Average selling price per retail unit	\$ 31,447	\$ 31,321	\$ 126	0.4
Same store				
Revenue	\$ 305,345	\$ 215,981	\$ 89,364	41.4%
Retail units sold	9,708	6,897	2,811	40.8
Average selling price per retail unit	\$ 31,453	\$ 31,315	\$ 138	0.4

New vehicle sales in the first quarter of 2011 improved compared to the first quarter of 2010 as volume increased and average selling prices remained consistent. We remain focused on increasing our share of overall new vehicle sales within our markets, and have targeted increased market share as an operational objective in 2011. As a result of this initiative, as well as increased consumer perception, domestic brand new vehicle same store sales increased 53.3% in the three months ended March 31, 2011 compared to the same period of 2010. Import and luxury brands had a same store sales improvement of 29.2% for the three months ended March 31, 2011 compared to the same period of 2010.

Overall, sales in the first quarter of 2011 were not impacted by the effects of the events in Japan and the subsequent disruption to new vehicle supply as we had adequate inventory on hand. However, it is likely sales will be impacted by the shortages anticipated to begin in the second quarter of 2011, although the extent of the impact is unknown.

Used Vehicle Retail Revenues

(Dollars in thousands)	Three Months Ended		Increase (Decrease)	% Increase (Decrease)
	March 31,			
	2011	2010		
Reported				
Retail revenue	\$ 160,723	\$ 135,899	\$ 24,824	18.3%
Retail units sold	9,812	8,211	1,601	19.5
Average selling price per retail unit	\$ 16,380	\$ 16,551	\$ (171)	(1.0)
Same store				
Retail revenue	\$ 157,130	\$ 134,402	\$ 22,728	16.9%
Retail units sold	9,598	8,109	1,489	18.4
Average selling price per retail unit	\$ 16,371	\$ 16,574	\$ (203)	(1.2)

We continue to emphasize used vehicle retail sales. The initiatives started in 2010 focused on increasing the number of lower-price, higher-margin, older used vehicles we sell. We have expanded sales of these vehicles to comprise a larger part of our used vehicle retail business. As a result, we have seen a decrease in the average selling price per unit of our used vehicles retailed. We continue to maintain a retail used to new vehicle sales ratio of 1.0:1.

We anticipate potential supply constraints in late-model used vehicles, as a result of the lower new vehicle sales in 2009 and 2010. To counteract this trend, we will continue to focus on growing our sales of older used vehicles and increase the conversion of vehicles acquired via trade-in to retail used vehicle sales.

Table of Contents**Used Vehicle Wholesale Revenues**

(Dollars in thousands)	Three Months Ended			% Increase
	2011	2010	Increase	
Reported				
Wholesale revenue	\$ 30,386	\$ 23,465	\$ 6,921	29.5%
Wholesale units sold	3,883	3,286	597	18.2
Average selling price per wholesale unit	\$ 7,825	\$ 7,141	\$ 684	9.6
Same store				
Wholesale revenue	\$ 29,929	\$ 22,880	\$ 7,049	30.8%
Wholesale units sold	3,814	3,228	586	18.2
Average selling price per wholesale unit	\$ 7,847	\$ 7,088	\$ 759	10.7

Wholesale transactions are a result of vehicles we have purchased from customers, or from vehicles we have attempted to sell via retail that we elect to dispose of due to time in inventory or other factors. We have concentrated on directing more lower-priced, older vehicles to retail sale rather than wholesale disposal. As a result, we have seen an increase in the average selling price per wholesale unit, and have increased wholesale revenues by a larger percentage than wholesale units.

Finance and Insurance

(Dollars in thousands)	Three Months Ended			% Increase
	2011	2010	Increase	
Reported				
Revenue	\$ 19,923	\$ 14,638	\$ 5,285	36.1%
Revenue per retail unit	\$ 1,009	\$ 970	\$ 39	4.0
Same store				
Revenue	\$ 19,045	\$ 13,778	\$ 5,267	38.2%
Revenue per retail unit	\$ 986	\$ 918	\$ 68	7.4

The increase in finance and insurance sales was primarily due to more vehicles sold in the first three months of 2011 compared to the same period of 2010. The availability of consumer credit has improved and lenders have increased the loan-to-value amount available to most customers. These shifts afford us the opportunity to sell additional or more comprehensive products, while remaining within a framework acceptable to our lenders.

Penetration rates for certain products were as follows:

	Three Months Ended	
	2011	2010
Finance and insurance	73%	70%
Service contracts	40	42
Lifetime oil change and filter	37	35

Table of Contents**Service, Body and Parts Revenue**

(Dollars in thousands)	Three Months Ended		Increase	% Increase
	2011	March 31, 2010		
Reported				
Customer pay	\$ 41,368	\$ 37,494	\$ 3,874	10.3%
Warranty	13,491	12,776	715	5.6
Wholesale parts	13,782	11,845	1,937	16.4
Body shop	7,944	6,682	1,262	18.9
Total service, body and parts	\$ 76,585	\$ 68,797	\$ 7,788	11.3%
Same store				
Customer pay	\$ 40,137	\$ 37,432	\$ 2,705	7.2%
Warranty	13,077	12,771	306	2.4
Wholesale parts	13,536	11,843	1,693	14.3
Body shop	7,717	6,682	1,035	15.5
Total service, body and parts	\$ 74,467	\$ 68,728	\$ 5,739	8.3%

Our service, body and parts business has continued to improve in the first quarter of 2011. We saw a steady increase in our customer pay business as we continued to focus on retaining customers through competitively-priced routine maintenance offerings and increased marketing efforts.

The improvement in same store warranty sales was primarily driven by import and luxury brand work, which increased 6.6% on a same store basis in the three months ended March 31, 2011 compared to the same period in 2010. As Toyota had significant recall warranty work in 2010, this increase is partially offset by a decrease in Toyota warranty claims. Domestic brand warranty work continues to be negatively impacted by the decline in units in operation associated with the lower Seasonally Adjusted Annual Rate (SAAR) levels in 2008 and 2009 and increased vehicle reliability. Domestic brand warranty work declined 1.7% in the three-month period ended March 31, 2011 compared to the same period in 2010.

We continue to grow our wholesale parts and body shop sales in 2011. These businesses represent 28.5% of our service, body and parts business and have grown 14.7% on a same store basis in the three months ended March 31, 2011 compared to the same period in 2010. We have implemented initiatives in our wholesale parts business to aggressively pursue revenue increases. As both wholesale parts and body shop margins are lower than service work, we expect gross margins may continue to decline as these areas of the business comprise a larger portion of the total.

Gross Profit

Gross profit increased \$19.0 million in the three-month period ended March 31, 2011 compared to the same period in 2010 due to increases in total revenues, offset by a decrease in our overall gross profit margin. Our gross profit margin by business line was as follows:

	Three Months Ended March 31,		Basis Point Change*
	2011	2010	
New vehicle	7.5%	8.5%	(100) bp
Used vehicle retail	14.7	13.7	100
Used vehicle wholesale	1.4	1.6	(20)
Finance and insurance	100.0	100.0	0
Service, body and parts	48.5	48.8	(30)

Edgar Filing: LITHIA MOTORS INC - Form 10-Q

Overall	17.4%	18.7%	(130)
----------------	--------------	--------------	--------------

* One basis point is equal to 1/100th of one percent.

Our overall gross profit margin decreased primarily due to a mix shift as we sold a greater number of new vehicles, which have lower margins than our other businesses. New vehicle margins were negatively impacted during the first quarter of 2011 by changes in manufacturer incentive programs, which resulted in higher cost of sales. Offsetting this effect was an increase in used vehicle retail sales gross profit margins, which resulted from the increased sales of lower-price, higher-margin older vehicles. We believe our single-point strategy of maintaining franchise exclusivity within the market we serve protects profitability and allows us to minimize impacts and strive to maintain margin levels.

Table of Contents**Asset Impairment Charges**

Long-lived assets classified as held and used and definite-lived intangible assets are reviewed for impairment whenever events or circumstances indicate that the carrying amount of assets may not be recoverable. An estimate of future undiscounted net cash flows associated with the long-lived assets is used to determine if the carrying value of the assets is recoverable. An impairment charge is recorded for the amount the carrying value of the asset exceeds its fair value.

Asset impairments recorded as a component of continuing operations consisted of the following (in thousands):

	Three Months Ended	
	March 31,	
	2011	2010
Long-lived assets	\$ 382	\$ 1,491

In the first quarter of 2011, we recorded an impairment charge associated with one of our operating locations. As the expected future use of this facility had changed, the long-lived assets were tested for recoverability. As a result, we determined the carrying value exceeded the fair value of the property and an asset impairment charge of \$0.4 million was recorded.

In the first quarter of 2010, due to changes in specific facts and circumstances on three properties held for future development, we tested these long-lived assets for recoverability and determined the carrying values exceeded the fair values of the properties. As a result, an asset impairment charge of \$1.5 million was recorded.

As additional market information becomes available and negotiations with prospective buyers continue, estimated fair market values of our properties may change. These changes may result in the recognition of additional asset impairment charges in future periods.

Selling, General and Administrative Expense

Selling, general and administrative expense (SG&A) includes salaries and related personnel expenses, advertising (net of manufacturer cooperative advertising credits), rent, facility costs, and other general corporate expenses.

(Dollars in thousands)	Three Months Ended		Increase (Decrease)	Increase (Decrease)
	March 31,			
	2011	2010		%
Personnel	\$ 50,891	\$ 43,781	\$ 7,110	16.2%
Advertising	5,897	5,841	56	1.0
Rent	3,573	3,899	(326)	(8.4)
Facility costs	6,821	6,175	646	10.5
Other	12,559	11,343	1,216	10.7
Total SG&A	\$ 79,741	\$ 71,039	\$ 8,702	12.2%

SG&A expense increased \$8.7 million in the three months ended March 31, 2011 compared to the same period in 2010, primarily due to increased sales volumes resulting in increased variable costs, offset by a continued focus to reduce or maintain fixed costs. Reflecting the leverage gained in our cost structure as volumes grow, SG&A as a percentage of gross profit was 76.0% compared to 82.7%, respectively, for the three months ended March 31, 2011 and 2010.

We also measure the leverage of our cost structure by evaluating throughput, which is calculated as the incremental percentage of gross profit retained after subtracting SG&A expense. For the three months ended March 31, 2011 and 2010, our incremental throughput was 54.3% and 64.0%, respectively.

Table of Contents

As sales volume increases and we gain leverage in our cost structure, we anticipate achieving metrics of SG&A as a percentage of gross profit in the low 70% range and incremental throughput between 50% and 55%.

Depreciation and Amortization

Depreciation is comprised of depreciation expense related to buildings, significant remodels or betterments, furniture, tools, equipment and signage and amortization of certain intangible assets, including customer lists and non-compete agreements.

(Dollars in thousands)	Three Months Ended		Decrease	% Decrease
	March 31,			
	2011	2010		
Depreciation and amortization	\$ 4,193	\$ 4,749	\$ (556)	(11.7)%

Depreciation and amortization decreased \$0.6 million in the three-month period ended March 31, 2011 compared to the same period of 2010 due primarily to the sale of vacant facilities in the last half of 2010 and first quarter of 2011.

Operating Income

Operating income in the three-month period ended March 31, 2011 was 3.4% of revenue compared to 1.9% in the comparable period of 2010. This improvement was primarily due to improved sales and continued cost control.

Floorplan Interest Expense and Floorplan Assistance

Floorplan interest expense decreased \$0.2 million in the three-month period ended March 31, 2011 compared to the same period of 2010. An increase of \$0.3 million resulted from changes in the average outstanding balances of our floorplan facilities. Changes in the average interest rates on our floorplan facilities decreased the expense \$0.3 million and changes related to our interest rate swaps resulted in a decrease of \$0.2 million.

Floorplan assistance is provided by manufacturers to support store financing of new vehicle inventory. Under accounting standards, floorplan assistance is recorded as a component of new vehicle gross profit when the specific vehicle is sold. However, as manufacturers provide this assistance to offset inventory carrying costs, we believe a comparison of floorplan interest expense to floorplan assistance may be used to evaluate the efficiency of our new vehicle sales relative to stocking levels. The following tables detail the carrying costs for new vehicles and include new and program vehicle floorplan interest net of floorplan assistance earned.

(Dollars in thousands)	Three Months Ended		Increase (Decrease)	% Increase (Decrease)
	March 31,			
	2011	2010		
Floorplan interest expense (new vehicles)	\$ 2,563	\$ 2,751	\$ (188)	(6.8)%
Floorplan assistance (included as an offset to cost of sales)	(2,920)	(2,127)	793	37.3
Net new vehicle carrying costs	\$ (357)	\$ 624	\$ (981)	(157.2)%

Table of Contents**Other Interest Expense**

Other interest expense includes interest on debt incurred related to acquisitions, real estate mortgages and our working capital, acquisition and used vehicle credit facility.

(Dollars in thousands)	Three Months Ended		Increase (Decrease)	%
	March 31,			
	2011	2010		
Mortgage interest	\$ 2,925	\$ 3,432	\$ (507)	(14.8)%
Other interest	395	156	239	153.2
Capitalized interest	(16)		16	
Total other interest expense	\$ 3,304	\$ 3,588	\$ (284)	(7.9)%

For the three months ended March 31, 2011, other interest expense decreased \$0.3 million, primarily due to a decrease in outstanding real estate mortgages offset by an increase in interest on our working capital, acquisition and used vehicle credit facility due to a higher volume of borrowing compared to the same period in 2010.

Income Tax Expense

Our effective income tax rate was 41.3% for the three-month period ended March 31, 2011, compared to 38.7% in the comparable period of 2010. This increase in the effective income tax rate was related to a tax shortfall associated with our stock-based compensation. A tax shortfall occurs when the tax benefit recorded for stock-based compensation expense determined at the time of issuance is larger than the actual benefit received upon exercise of the option. Additional tax expense of \$0.2 million was recorded related to the tax shortfall for the three-month period ended March 31, 2011. For the full year 2011, we anticipate our income tax rate to be approximately 40.3%.

Pro Forma Reconciliations

We believe each of the non-GAAP financial measures below improves the transparency of our disclosures, provides a meaningful presentation of our results from the core business operations excluding adjustments for items not related to our ongoing core business operations or other non-cash adjustments, and improves the period-to-period comparability of our results from the core business operations. These presentations are not intended to provide selling, general and administrative expense, income from operations, income from continuing operations before income taxes, income from continuing operations or diluted income per share from continuing operations in accordance with GAAP and should not be considered an alternative to GAAP measures.

Table of Contents

The following table reconciles certain reported GAAP amounts per the Consolidated Statements of Operations to the comparable non-GAAP amounts (dollars in thousands, except per share amounts):

	Three Months Ended March 31,	
	2011	2010

Liquidity and Capital Resources

We manage our liquidity and capital resources to be able to fund future capital expenditures, working capital requirements and contractual obligations. Additionally, we use capital resources to fund cash dividend payments, share repurchases and acquisitions.

Available Sources

We have relied primarily upon internally generated cash flows from operations, borrowings under our credit agreements, financing of real estate and the proceeds from equity and debt offerings to finance operations and expansion. Based on these factors and our normal operational cash flow, we believe we have sufficient availability to accommodate both our short- and long-term capital needs.

Table of Contents

Below is a summary and discussion of our available funds:

	As of	As of	Increase	Increase
	March 31, 2011	December 31, 2010	(Decrease)	(Decrease)
Cash and cash equivalents	\$ 13,118	\$ 9,306	\$ 3,812	41.0%
Available credit on the Credit Facility	37,549	23,332	14,217	60.9
Unfinanced new vehicles	52,228	65,601	(13,373)	(20.4)
 Total available funds	 \$ 102,895	 \$ 98,239	 \$ 4,656	 4.7%

Historically, we have raised capital through the sale of assets, sale of stores, issuance of stock and the issuance of debt. We may strategically use excess cash to reduce the amount of debt outstanding when appropriate. During the three months ended March 31, 2011, we used proceeds from the sale of assets to repay outstanding debt, resulting in a net cash usage of \$8.8 million. During the three months ended March 31, 2010, we generated \$14.0 million through the sale of assets and stores and the issuance of long-term debt, net of debt repayment.

In addition to the above sources of liquidity, potential sources include the placement of subordinated debentures or loans, additional store sales or additional other asset sales. We will evaluate all of these options and may select one or more of them depending on overall capital needs and the availability and cost of capital, although no assurances can be provided that these capital sources will be available in sufficient amounts or with terms acceptable to us.

Summary of Outstanding Balances on Credit Facilities and Long-Term Debt

Below is a summary of our outstanding balances on credit facilities and long-term debt:

	Outstanding as of March 31, 2011	Remaining Available as of March 31, 2011
New and program floorplan notes payable	\$ 300,166	\$ (1)(2)
Credit facility	31,000	37,549 (3)(4)
Real estate mortgages	220,856	
Other debt	8,245	
 Total debt	 \$ 560,267	 \$ 37,549

- (1) Certain new and program floorplan lines have maximum availability limits. Depending on the provider, these limits are applied in the aggregate, individually or on a unit basis.
- (2) We had approximately \$52.2 million in unfloored new vehicles at March 31, 2011.
- (3) Reduced by \$2.2 million for outstanding letters of credit.
- (4) The amount available on the credit facility is limited based on a borrowing base calculation and fluctuates monthly.

New and Program Vehicle Floorplan Lines

Ally Bank, Mercedes-Benz Financial Services USA, LLC, Toyota Financial Services, Ford Motor Credit Company, VW Credit, Inc., American Honda Finance Corporation, Nissan Motor Acceptance Corporation and BMW Financial Services NA, LLC provide new vehicle floorplan financing for their respective brands. Ally Bank serves as the primary lenders for all other brands. The new and program vehicle lines are secured by new and program vehicle inventory of the stores financed by that lender. The weighted average interest rate associated with our new and program vehicle lines, excluding the effects of our interest rate swaps, was 3.2% at March 31, 2011.

Edgar Filing: LITHIA MOTORS INC - Form 10-Q

Vehicles financed by lenders not directly associated with the manufacturer are classified as floorplan notes payable: non-trade and are included as a financing activity in our Consolidated Statements of Cash Flows. Vehicles financed by lenders directly associated with the manufacturer are classified as floorplan notes payable and are included as an operating activity in our Consolidated Statements of Cash Flows.

Table of Contents

To improve the visibility of cash flows related to vehicle financing, which is a core part of our business, the non-GAAP financial measures below demonstrate cash flows assuming all floorplan notes payable are included as an operating activity. We believe that this non-GAAP financial measure improves the transparency of our disclosure by considering all cash flows to finance our inventory.

(In thousands)	For the three months ended March 31,	
	2011	2010
Cash flow from (used in) operations		
As Reported	\$ (11,240)	\$ (10,409)
Change in floorplan notes payable: non-trade	39,262	20,615
Adjusted	\$ 28,022	\$ 10,206
Cash flow from (used in) financing		
As Reported	\$ 15,313	\$ 7,278
Change in floorplan notes payable: non-trade	(39,262)	(20,615)
Adjusted	\$ (23,949)	\$ (13,337)

Working Capital, Acquisition and Used Vehicle Credit Facility

We have a \$75 million Credit Facility with U.S. Bank National Association, which expires June 30, 2013. As of March 31, 2011, approximately \$37.5 million was available on the Credit Facility. We believe the Credit Facility continues to be an attractive source of financing given the current cost and availability of credit alternatives. The interest rate on the Credit Facility is the one-month LIBOR plus 2.35%, which totaled 2.59% at March 31, 2011.

Real Estate Mortgages and Other Debt

We have mortgages associated with our owned real estate and leasehold improvements. Interest rates related to this debt ranged from 2.06% to 7.55% at March 31, 2011. The mortgages are payable in various installments through October 2029 with no significant maturities until 2013.

Our other debt includes various notes, capital leases and obligations assumed as a result of acquisitions and other agreements and have interest rates that ranged from 3.5% to 10.0% at March 31, 2011.

Debt Covenants

We are subject to certain financial and restrictive covenants for all of our debt agreements. The covenants restrict us from incurring additional indebtedness, making investments, selling or acquiring assets and granting security interests in our assets.

Debt Covenant Ratio	Requirement	As of March 31, 2011
Minimum tangible net worth	Not less than \$200 million	\$275.7 million
Vehicle equity	Not less than \$65 million	\$185.7 million
Fixed charge coverage ratio	Not less than 1.20 to 1	1.83 to 1
Liabilities to tangible net worth ratio	Not more than 4.00 to 1	2.51 to 1

Accordingly, we were in compliance with the financial covenants in our Credit Facility and other debt agreements as of March 31, 2011.

We expect to remain in compliance with the financial and restrictive covenants in our Credit Facility and other debt agreements. However, no assurances can be provided that we will continue to remain in compliance with the financial and restrictive covenants.

Table of Contents

In the event that we are unable to meet the financial and restrictive covenants, we would enter into a discussion with the lender to remediate the condition. If we were unable to remediate or cure the condition, a breach would give rise to certain remedies under the agreement, the most severe of which is the termination of the agreement and acceleration of the amounts owed, including the triggering of cross-default provisions to other debt agreements.

Inventories

We calculate days supply based on current inventory levels, excluding in-transit vehicles, and a 30-day historical cost of sales level. As of March 31, 2011, our new vehicle days supply was 61 days, or eight days lower than our days supply level as of March 31, 2010. This decrease compared to 2010 was a result of increased new vehicle sales levels. Our days supply of used vehicles was 47 days as of March 31, 2011. This is the same level as March 31, 2010. We have continued to focus on managing and maintaining an appropriate level of used vehicle inventory.

Capital Expenditures

Capital expenditures were \$2.3 million and \$0.8 million for the three months ended March 31, 2011 and 2010, respectively. The increase in capital expenditures in the first quarter of 2011 compared to the same period of 2010 was related to improvements at certain of our store facilities, replacement of equipment and construction of a new headquarters building.

We anticipate approximately \$28.0 million in capital expenditures for all of 2011. Of those amount \$26.0 million is associated with improvements to certain store facilities, replacement of equipment and construction of a new headquarters building. The remaining anticipated amount of \$2.0 million is for the remodel of facilities acquired from the Don Rasmussen Group in April 2011.

Many manufacturers provide assistance in the form of additional vehicle incentives if facilities meet image standards and requirements. Accordingly, we believe it is an attractive time to invest in certain facility upgrades and remodels that will generate additional manufacturer incentive payments. Also, recently enacted tax law changes that accelerate deductions for capital expenditures have accelerated project timelines to ensure completion before the law expires.

In the event we undertake a significant capital commitment in the future, we expect to pay for the construction out of existing cash balances, construction financing and borrowings on our Credit Facility. Upon completion of the projects, we would anticipate securing long-term financing and general borrowings from third party lenders for 70% to 90% of the amounts expended, although no assurances can be provided that these financings will be available to us in sufficient amounts or on terms acceptable to us.

Dividends

Our Board of Directors approved a dividend of \$0.07 per share on our Class A and Class B common stock related to our first quarter 2011 financial results. The dividend will total approximately \$1.8 million and will be paid on May 25, 2011 to shareholders of record on May 11, 2011.

Share Repurchase Program

In June 2000, our Board of Directors authorized the repurchase of up to 1,000,000 shares of our Class A common stock. Through March 31, 2011, we have purchased a total of 583,224 shares under this program, 2,600 of which were purchased during 2011 at an average price of \$13.52 per share. At March 31, 2011, 416,776 shares remained available for purchase pursuant to this program. We may continue to purchase shares from time to time in the future as conditions warrant.

Critical Accounting Policies and Use of Estimates

Beginning in March 2011, we offer a deferred compensation plan (the Plan) to provide certain employees the ability to accumulate assets for retirement on a tax deferred basis. Participants are allowed to defer a portion of their compensation and are 100% vested in their respective deferrals

Table of Contents

and earnings. We may also make discretionary contributions the Plan. The vesting terms of the discretionary contribution are determined at the time of contribution. Participants receive a guaranteed return on vested deferrals and earnings. We retain discretion to set the guaranteed rate each year. We also have existing deferred compensation plans for our Board of Directors and selected executives.

In March 2011, we made a discretionary contribution of \$1.3 million. The vesting term ranges between one and seven years, based on the employee's position. Participants will receive a guaranteed return of 6% in 2011. As of March 31, 2011, the balance due to participants was \$388,000 and was included as a component of other long-term liabilities in the Consolidated Balance Sheets.

With the addition of the above, we reaffirm our critical accounting policies and use of estimates as described in our 2010 Annual Report on Form 10-K as filed with the Securities and Exchange Commission on March 7, 2011.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in our reported market risks or risk management policies since the filing of our 2010 Annual Report on Form 10-K, which was filed with the Securities and Exchange Commission on March 7, 2011.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management evaluated, with the participation and under the supervision of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure and that such information is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during our last fiscal quarter that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1A. Risk Factors

Adverse conditions resulting from the natural disaster in Japan may negatively impact our business, results of operations, financial condition and cash flows.

In March 2011, an earthquake, tsunami and subsequent nuclear crisis in Japan impacted automotive manufacturers and automotive suppliers. These events damaged facilities, reduced production of vehicles and parts and destroyed inventory in Japan. Many Japanese manufacturers and suppliers were forced to halt production as they reconfigured production logistics. Many plants in Japan continue to be inoperable and certain plants, which have restarted operations, are running at limited capacity. These events caused a global disruption to the supply of vehicles and automotive parts.

Table of Contents

We depend on our manufacturers to provide a supply of vehicles which supports expected sales levels. In the event that manufacturers are unable to supply the needed level of vehicles, our financial performance may be adversely impacted. We expect new vehicle supply to be constrained in the second and third quarters of 2011, although the impact of this constraint remains unknown. As of March 31, 2011, and December 31, 2010 we had \$338.2 million and \$305.7 million, respectively, in a new vehicle inventory. We had \$22.3 million and \$22.2 million in parts and accessories inventory as of March 31, 2011 and December 31, 2010, respectively.

A lack of new vehicle supply may increase demand for late model used vehicles. In 2009 and 2010, production and sales in North America were reduced by the recessionary environment. As a result, used vehicle supply may be constrained resulting in increased supply pressures and limited availability. Our used vehicle sales volume could be adversely impacted if we are unable to maintain a supply of vehicles or if we are unable to obtain makes and models desired by our customers. As of March 31, 2011, and December 31, 2010, we had \$96.4 million and \$87.3 million, respectively, in used and program vehicle inventory.

With the addition of the above, there have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2010. Accordingly, the information in this Form 10-Q should be read in conjunction with the risk factors and information disclosed in our Annual Report on Form 10-K for the year ended December 31, 2010, which was filed with the Securities and Exchange Commission on March 7, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

We repurchased the following shares of our Class A common stock during the first quarter of 2011:

	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plan	Maximum number of shares that may yet be purchased under the plan
January 1 to January 31		\$	580,624	419,376
February 1 to February 28			580,624	419,376
March 1 to March 31	2,600	13.52	583,224	416,776
Total	2,600	13.52	583,224	416,776

The plan to repurchase up to a total of 1.0 million shares of our Class A common stock was approved by our Board of Directors in June 2000 and renewed in August 2005 and does not have an expiration date.

Item 6. Exhibits

The following exhibits are filed herewith and this list is intended to constitute the exhibit index:

- 3.1 Restated Articles of Incorporation of Lithia Motors, Inc., as amended May 13, 1999 (filed as Exhibit 3.1 to Form 10-K filed March 30, 2000 and incorporated herein by reference).
- 3.2 Amended and Restated Bylaws of Lithia Motors, Inc. - Corrected (filed as Exhibit 3.2 to Form 10-K filed March 16, 2009 and incorporated herein by reference).
- 10.1 Lithia Motors, Inc. Amended and Restated 2003 Stock Incentive Plan.
- 31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934.
- 31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934.
- 32.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(b) or Rule 15d-14(b) of the Securities Exchange Act of 1934 and 18 U.S.C. Section 1350.

Edgar Filing: LITHIA MOTORS INC - Form 10-Q

32.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(b) or Rule 15d-14(b) of the Securities Exchange Act of 1934 and 18 U.S.C. Section 1350.
