Item 1.01 Entry into a Material Definitive Agreement

The Offering of Notes

On August 2, 2011, MF Global Holdings Ltd. (the *Company*) completed an offering of \$325 million principal amount of its 3.375% Convertible Senior Notes due 2018 (the *Notes*). The Notes were sold pursuant to the Company's shelf registration statement on Form S-3ASR (Registration No. 333-162119), as supplemented by the final prospectus supplement filed with the SEC on August 1, 2011 (the *final prospectus supplement*). The closing of the offering of the Notes occurred on August 2, 2011. The Company also granted the underwriters a 30-day option to purchase up to an additional \$45 million aggregate principal amount of the Notes.

The Notes were issued pursuant to an Indenture (the *Base Indenture*), dated as of February 11, 2011, as supplemented by the Third Supplemental Indenture (the *Supplemental Indenture* and together, the *Indenture*), dated as of August 2, 2011, between the Company and Deutsche Bank Trust Company Americas, as trustee. The Notes are initially convertible into approximately 32,835,758 shares of the Company's common stock, par value \$1.00 per share (the *Common Stock*), subject to anti-dilution adjustments and certain make-whole adjustments upon specified corporate events.

The Indenture, the Notes and the offering are described in the final prospectus supplement. Copies of the Base Indenture, the Supplemental Indenture (including the Form of Note included therein) and the underwriting agreement relating to the Notes are filed as exhibits to this Current Report.

Convertible Bond Hedge Transactions and Warrant Transactions

On July 28, 2011, the Company entered into privately negotiated convertible bond hedge transactions (together, the *Convertible Bond Hedge Transactions*) with each of The Royal Bank of Scotland, plc, JPMorgan Chase Bank, National Association, Bank of America, N.A. and Deutsche Bank AG, London Branch (the *Counterparties*), respectively. The Convertible Bond Hedge Transactions cover, subject to anti-dilution adjustments, approximately 32,835,758 shares of the Company's common stock (the *Common Stock*), which is the same number of shares initially issuable upon conversion of the Notes, and the Convertible Bond Hedge Transactions are expected to reduce the potential dilution with respect to the Common Stock and/or reduce the Company's exposure to potential cash payments that may be required to be made by the Company upon conversion of the Notes.

The Company also entered into privately negotiated warrant transactions (together, the *Warrant Transactions*) generally relating to the same initial number of shares of Common Stock (subject to anti-dilution adjustments) with each of the Counterparties. The warrants have an initial strike price equal to \$13.0725, or 75% above the closing price of the Common Stock on the New York Stock Exchange on July 28, 2011. The Company may, subject to certain conditions, settle the warrants in cash or on a net-share basis. The Warrant Transactions could have a dilutive effect with respect to the Common Stock or, if the Company so elects, obligate the Company to make cash payments to the extent that the market price per share of Common Stock exceeds the applicable strike price of the Warrant Transactions on any expiration date of the warrants.

The notional size of each of the Convertible Bond Hedge Transactions and Warrant Transactions will be automatically increased if the underwriters exercise their option to purchase additional Notes to correspond in the aggregate to the number of shares of Common Stock initially issuable upon conversion of all the Notes, including the additional Notes. The share amount indicated above does not reflect this increase.

The Company used \$25.2 million of the net proceeds from the offering of the Notes to pay the cost of the Convertible Bond Hedge Transactions (after such cost was partially offset by the aggregate proceeds of \$60.6 million to the Company from the Warrant Transactions). Of the remaining net proceeds of the offering approximately \$130.6 million was used to repurchase approximately \$109.1 million aggregate principal amount of our outstanding 2038 Convertible Senior Notes from a limited number of holders of such notes in privately-negotiated transactions, with the remainder to be used for general corporate purposes and to repay amounts outstanding under the Company's \$1.2 billion unsecured, committed revolving credit facility.

The Convertible Bond Hedge Transactions and the Warrant Transactions are separate transactions, each entered into by the Company with the Counterparties, are not part of the terms of the Notes and will not change any holders' rights under the Notes. Holders of the Notes will not have any rights with respect to the Convertible Bond Hedge Transactions or Warrant Transactions.

The Convertible Bond Hedge Transactions and Warrant Transactions are described in the final prospectus supplement. Copies of the confirmations relating to the Convertible Bond Hedge Transactions and the Warrant Transactions are attached as exhibits to this Current Report.

Item 2.03 Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of a Registrant

The information set forth in Item 1.01 is incorporated by reference into this Item 2.03.

Item 3.02 Unregistered Sales of Equity Securities

The information about the Warrant Transactions referenced in Item 1.01 under the heading "Convertible Bond Hedge Transactions and Warrant Transactions" is incorporated by reference into this Item 3.02. The Warrant Transactions were conducted in reliance on the exemption from registration provided by Section 4(2) of the Securities Act of 1933 (the "Securities Act"). Neither the warrants nor the underlying Common Stock issuable upon conversion of the warrants have been registered under the Securities Act and may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements.
