TELEDYNE TECHNOLOGIES INCORPORATED AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

October 2, 2011

Note 1. General

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared by Teledyne Technologies Incorporated (Teledyne Technologies or the Company) pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and disclosures normally included in notes to consolidated financial statements have been condensed or omitted pursuant to such rules and regulations, but resultant disclosures are in accordance with accounting principles generally accepted in the United States as they apply to interim reporting. The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto in Teledyne Technologies' Annual Report on Form 10-K for the fiscal year ended January 2, 2011 (2010 Form 10-K).

In the opinion of Teledyne Technologies' management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly, in all material respects, Teledyne Technologies' consolidated financial position as of October 2, 2011 and the consolidated results of operations for the third quarter and nine months then ended and the consolidated cash flows for the nine months then ended. The results of operations and cash flows for the periods ended October 2, 2011 are not necessarily indicative of the results of operations or cash flows to be expected for any subsequent quarter or the full fiscal year.

Note 2. Business Combinations and Investments, Goodwill and Acquired Intangible Assets

The following briefly describes the Company's acquisition activity for the nine months ended October 2, 2011. For a description of the Company's acquisition and divestiture activity for the year ended January 2, 2011, please refer to Notes 3 and 16 of our 2010 Form 10-K.

On February 12, 2011, the Company acquired the stock of DALSA Corporation (DALSA). DALSA designs and manufactures digital image capture products, primarily consisting of high performance sensors, cameras and software for use in industrial, scientific, medical and professional applications products, as well as specialty semiconductors and micro electro mechanical systems (MEMS). The Company acquired DALSA for an aggregate purchase price of \$339.5 million in cash. Headquartered in Waterloo, Ontario, Canada, DALSA had annual revenues of CAD \$212.3 million for its fiscal year ended December 2010. DALSA operates within the Digital Imaging segment.

In addition to the acquisition of DALSA, during the first nine months of 2011, the Company completed the acquisition of a majority interest in Nova Sensors (Nova) for total consideration of \$5.1 million in cash and a minority interest in Optech Incorporated (Optech) for \$18.9 million. Nova produces compact short-wave and mid-wave infrared cameras and operates within the Digital Imaging segment. Optech is a laser-based survey and digital imaging company.

Teledyne Technologies funded the purchases primarily from borrowings under its credit facility and cash on hand.

In the third quarter of 2011, the Company recorded a \$4.5 million pretax charge to write off the Company's minority investment in a private company. The write off was necessary since the company's actual and expected financial performance has significantly deteriorated resulting in lower actual and projected future cash flow.

DALSA's results have been included since the date of the acquisition. The unaudited pro forma financial information below assumes that DALSA had been acquired at the beginning of the 2011 and 2010 fiscal years and includes the effect of estimated amortization of acquired identifiable intangible assets, increased interest expense on net acquisition debt, as well as the impact of purchase accounting adjustments for certain liabilities and inventory valuation adjustments. The unaudited pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations that actually would have resulted had the acquisition been in effect at the beginning of the periods presented. In addition, the unaudited pro forma financial results are not intended to be a projection of future results and do not reflect any operating efficiencies or cost savings that might be achievable.

(unaudited -in millions, except per share amounts)	Third Quarter		Nine Months	
	2011	2010	2011	2010
Net sales	\$ 496.4	\$ 463.5	\$ 1,491.5	\$ 1,375.6
Net income from continuing operations	\$ 34.1	\$ 28.3	\$ 96.7	\$ 77.6
Net income attributable to Teledyne Technologies	\$ 34.1	\$ 28.7	\$ 209.8	\$ 78.6
Basic earnings per common share continuing operations	\$ 0.93	\$ 0.78	\$ 2.64	\$ 2.14
Basic earnings per common share attributable to Teledyne Technologies	\$ 0.93	\$ 0.79	\$ 5.73	\$ 2.17
Diluted earnings per common share continuing operations	\$ 0.91	\$ 0.77	\$ 2.59	\$ 2.11
Diluted earnings per common share attributable to Teledyne Technologies	\$ 0.91	\$ 0.78	\$ 5.62	\$ 2.14

(a) The above unaudited proforma information is presented for the DALSA acquisition as it is considered a material acquisition. Teledyne Technologies' goodwill was \$717.9 million at October 2, 2011 and \$546.3 million at January 2, 2011. The increase in the balance of goodwill in 2011 primarily resulted from the acquisition of DALSA. Teledyne Technologies' net acquired intangible assets were \$187.3 million at October 2, 2011 and \$113.9 million at January 2, 2011. The increase in the balance of acquired intangible assets in 2011 primarily resulted from the acquisition of DALSA, partially offset by amortization. The Company's cost to acquire DALSA has been allocated to the assets acquired and liabilities assumed based upon their respective fair values as of the date of the completion of the acquisition. The differences between the fair value of the consideration paid and the estimated fair value of the assets and liabilities acquired has been recorded as goodwill. The Company has completed the process of specifically identifying the amount to be assigned to certain liabilities and the related impact on taxes and goodwill for the DALSA acquisition.

The following is a summary at the acquisition date of the estimated fair values allocated to the assets acquired and liabilities assumed for the acquisitions made during fiscal 2011 (in millions):

Current assets	\$ 98.7
Property, plant and equipment	53.3
Goodwill	175.2
Acquired intangible assets	93.5
Current liabilities	(37.7)
Long-term liabilities	(38.4)
Net assets acquired	\$ 344.6

Note 3. Comprehensive Income

Teledyne Technologies' comprehensive income is comprised of net income attributable to common stockholders, minimum pension liability adjustments, cash flow hedge position changes and foreign currency translation adjustments. Teledyne Technologies' total comprehensive income for the third quarter and first nine months of 2011 and 2010 consists of the following (in millions):

	Third Quarter		Nine Months	
	2011	2010	2011	2010
Net income including noncontrolling interest	\$ 34.1	\$ 30.4	\$ 218.5	\$ 84.0
Other comprehensive gain (loss), net of tax:				
Foreign currency translation gains (losses)	(18.3)	6.5	(11.3)	(1.0)
Cash flow hedge/Interest rate swap position	(2.8)		(3.3)	(0.6)
Minimum pension liability adjustment			14.4	0.3
Total other comprehensive gain (loss)	(21.1)	6.5	(0.2)	(1.3)
Total comprehensive income	13.0	36.9	218.3	82.7
Less: Amounts attributable to noncontrolling interests:				
Net income		(0.1)	(0.1)	(0.1)
Comprehensive income attributable to common stockholders	\$ 13.0	\$ 36.8	\$ 218.2	\$ 82.6

Note 4. Derivative Instruments

Teledyne Technologies transacts business in various foreign currencies and has international sales and expenses denominated in foreign currencies, subjecting the Company to foreign currency risk. The Company's primary objective is to protect the United States dollar value of future cash flows and minimize the volatility of reported earnings. Due to the February 2011 acquisition of DALSA, the Company began to utilize foreign currency forward contracts to reduce the volatility of cash flows primarily related to forecasted revenue and expenses denominated in Canadian dollars. In addition, from time to time, the Company may utilize foreign currency forward contracts to mitigate foreign exchange rate risk associated with foreign-currency-denominated monetary assets and liabilities, including intercompany receivables and payables and as of October 2, 2011, Teledyne had foreign currency contracts of this type to buy Canadian dollars and to sell U.S. dollars totaling \$18.3 million and these contracts had a fair value of \$0.7 million. The gains and losses on these derivatives which are not designated as hedging instruments under ASC 815, *Derivatives and Hedging* (ASC 815), are intended to, at a minimum, partially offset the transaction gains and losses recognized in earnings. Under ASC 815, all derivatives are recorded on the balance sheet at fair value. As discussed below, the accounting for gains and losses resulting from changes in fair value depends on the use of the derivative and whether it is designated and qualifies for hedge accounting. Teledyne Technologies does not use foreign currency forward contracts for speculative or trading purposes.

Cash Flow Hedging Activities

In February 2011, Teledyne Technologies began utilizing foreign currency forward contracts which were designated and qualify as cash flow hedges. The effectiveness of the cash flow hedge contracts, excluding time value, is assessed prospectively and retrospectively on a monthly basis using regression analysis, as well as using other timing and probability criteria. To receive hedge accounting treatment, all hedging relationships are formally documented at the inception of the hedges and must be highly effective in offsetting changes to future cash flows on hedged transactions. The effective portion of the cash flow hedge contracts' gains or losses resulting from changes in the fair value of these hedges is initially reported, net of tax, as a component of accumulated other comprehensive income in stockholders' equity until the underlying hedged item is reflected in our consolidated statements of income, at which time the effective amount in accumulated other comprehensive income is reclassified to cost of sales in our consolidated statements of income. The Company expects to reclassify a loss of approximately \$2.2 million over the next 12 months.

In the event that the gains or losses in accumulated other comprehensive income (OCI) are deemed to be ineffective, the ineffective portion of gains or losses resulting from changes in fair value, if any, is reclassified to interest and other income and expense. In the event that the underlying forecasted transactions do not occur, or it becomes remote that they will occur, within the defined hedge period, the gains or losses on the related cash flow hedges will be reclassified from accumulated other comprehensive income to interest and other income and expense. During the current reporting period, all forecasted transactions occurred and, therefore, there were no such gains or losses reclassified into interest and other income and expense. As of October 2, 2011, Teledyne Technologies had foreign currency forward contracts designated as cash flow hedges to buy Canadian dollars and to sell U.S. dollars totaling \$78.1 million and these contracts had a fair value of \$3.0 million. These foreign currency forward contracts have maturities ranging from October 2011 to February 2013. As of January 2, 2011, we had no foreign currency forward contracts outstanding.

The effect of derivative instruments designated as cash flow hedges in our Condensed Consolidated Financial Statements for three and nine months ended October 2, 2011 was as follows (in millions):

	Third Quarter 2011	Nine Months 2011
Net loss recognized in OCI (a)	\$ 2.7	\$ 2.9
Net gain reclassified from OCI into cost of sales (a)	\$ 0.2	\$ 0.5
Net foreign exchange gain recognized in income (b)	\$ 0.4	\$ 0.6

(a) Effective portion

(b) Amount excluded from effectiveness testing

The effect of derivative instruments not designated as cash flow hedges recognized in other expense for the three and nine months ended October 2, 2011 was \$0.7 million and \$0.9 million, respectively.

The fair values of the Company's derivative financial instruments are presented below. All fair values for these derivatives were measured using Level 2 information as defined by the accounting standard hierarchy (in millions):

Liability derivatives	Balance sheet location	October 2, 2011
Derivatives designated as hedging instruments:		
Cash flow forward contracts	Other current liabilities	\$ 3.0
Total derivatives designated as hedging instruments		3.0
Derivatives not designated as hedging instruments:		
Non-designated forward contracts	Other current liabilities	0.7
Total derivatives not designated as hedging instruments		0.7
Total liability derivatives		\$ 3.7

Note 5. Earnings Per Share

Basic and diluted earnings per share were computed based on net earnings. The weighted average number of common shares outstanding during the period was used in the calculation of basic earnings per share. This number of shares was increased by contingent shares that could be issued under various compensation plans as well as by the dilutive effect of stock options based on the treasury stock method in the calculation of diluted earnings per share.

Edgar Filing: TELEDYNE TECHNOLOGIES INC - Form 10-Q

The following table sets forth the computations of basic and diluted earnings per share (amounts in millions, except per share data):

	Third Quarter		Nine Months	
	2011	2010	2011	2010
Net income from continuing operations	\$ 34.1	\$ 29.9	\$ 105.3	\$ 82.9
Gain from discontinued operations, net of income taxes		0.4	113.1	1.0
Net income attributable to Teledyne Technologies	\$ 34.1	\$ 30.3	\$ 218.4	\$ 83.9
Basic earnings per common share:				
Weighted average common shares outstanding	36.7	36.2	36.6	36.2
Basic earnings per common share				
Continuing operations	\$ 0.93	\$ 0.83	\$ 2.88	\$ 2.29
Discontinued operations		0.01	3.09	0.03
Basic earnings per common share	\$ 0.93	\$ 0.84	\$ 5.97	\$ 2.32
Diluted earnings per share:				
Weighted average common shares outstanding	36.7	36.2	36.6	36.2
Dilutive effect of exercise of options outstanding	0.7	0.6	0.7	0.6
Weighted average diluted common shares outstanding	37.4	36.8	37.3	36.8
Diluted earnings per common share				
Continuing operations	\$ 0.91	\$ 0.81	\$ 2.82	\$ 2.25
Discontinued operations		0.01	3.03	0.03
Diluted earnings per common share	\$ 0.91	\$ 0.82	\$ 5.85	\$ 2.28

Note 6. Stock-Based Compensation Plans

Teledyne Technologies has long-term incentive plans pursuant to which it has granted non-qualified stock options, restricted stock and performance shares to certain employees. The Company also has non-employee director stock compensation plans, pursuant to which non-qualified stock options and common stock have been issued to its directors.

Stock Incentive Plan

The following disclosures are based on stock options granted to Teledyne Technologies employees and directors. The Company recorded a total of \$1.5 million and \$4.3 million in stock option compensation expense for the third quarter and first nine months of 2011, respectively. For the third quarter and first nine months of 2010, the Company recorded a total of \$1.2 million and \$3.6 million, respectively in stock option expense. Employee stock option grants are expensed evenly over the three year vesting period. In 2011, the Company currently expects approximately \$5.9 million in stock option compensation expense based on stock options already granted and current assumptions regarding the estimated fair value of stock option grants expected to be issued during the remainder of the year. However, our assessment of the estimated compensation expense will be affected by our stock price and actual stock option grants during the remainder of the year as well as assumptions regarding a number of complex and subjective variables and the related tax impact. These variables include, but are not limited to, the volatility of our stock price and employee stock option exercise behaviors. The Company issues shares of common stock upon the exercise of stock options.

Edgar Filing: TELEDYNE TECHNOLOGIES INC - Form 10-Q

The Company uses a combination of its historical stock price volatility and the volatility of exchange traded options, if any, on the Company stock to compute the expected volatility for purposes of valuing stock options issued. The period used for the historical stock price corresponded to the expected term of the options and was six years. The period used for the exchange traded options, if any, included the longest-dated options publicly available, generally three months. The expected dividend yield is based on Teledyne's practice of not paying dividends. The risk-free rate of return is based on the yield of U. S. Treasury Strips with terms equal to the expected life of the options as of the grant date. The expected life in years is based on historical actual stock option exercise experience. The following assumptions were used in the valuation of stock options granted in 2011 and 2010:

	2011	2010
Expected dividend yield		
Expected volatility	36.8%	35.3%
Risk-free interest rate	2.1%	2.4%
Expected life in years	6.2	6.0

Based on the assumptions in the table above, the grant date fair value of stock options granted in 2011 and 2010 was \$18.81 and \$16.44, respectively.

Stock option transactions for Teledyne's employee stock option plans for the third quarter and nine months ended October 2, 2011 are summarized as follows:

	2011			
	Third Quarter		Nine Months	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price

Options exercisable at end of period	362,258	\$ 31.37	362,258	\$ 31.37

Performance Share Plan and Restricted Stock Award Program

In February 2011, Teledyne issued 47,589 shares of common stock in connection with the third and final installment of the 2006 to 2008 Performance Share Plan. Also in February 2011, the restriction was removed for 22,633 shares of Teledyne common stock and 5,280 shares were forfeited related to the 2008 to 2010 Restricted Stock Program.

Note 7. Cash Equivalents

Cash equivalents consist of highly liquid money-market mutual funds and bank deposits with maturities of three months or less when purchased. Cash equivalents totaled \$1.7 million at October 2, 2011 and \$61.8 million at January 2, 2011.

Note 8. Inventories

Inventories are stated at the lower of cost or market, less progress payments. Inventories are valued under the LIFO method, FIFO method and average cost method. Interim LIFO calculations are based on the Company's estimates of expected year-end inventory levels and costs since an actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Because these are subject to many factors beyond the Company's control, interim results are subject to the final year-end LIFO inventory valuation. Inventories consist of the following (in millions):

Balance at	October 2, 2011	January 2, 2011
Raw materials and supplies	\$ 109.9	\$ 90.6
Work in process	117.5	97.8
Finished goods	23.1	18.3
	250.5	206.7
Progress payments	(3.6)	(17.9)
LIFO reserve	(17.1)	(16.5)
Total inventories, net	\$ 229.8	\$ 172.3

Inventories at cost determined on the LIFO method were \$101.6 million at October 2, 2011 and \$98.9 million at January 2, 2011. The remainder of the inventories using average cost or the FIFO methods, were \$148.9 million at October 2, 2011 and \$107.8 million at January 2, 2011.

Note 9. Supplemental Balance Sheet Information

Other long-term assets included amounts related to a deferred compensation plan of \$30.1 million and \$31.9 million at October 2, 2011 and January 2, 2011, respectively. Accrued liabilities included salaries and wages and other related compensation liabilities of \$84.1 million and \$87.2 million at October 2, 2011 and January 2, 2011, respectively. Accrued liabilities also included customer related deposits and credits of \$49.9 million and \$28.6 million at October 2, 2011 and January 2, 2011, respectively. Other long-term liabilities included amounts related to a deferred compensation plan of \$30.3 million and \$31.9 million at October 2, 2011 and January 2, 2011, respectively. Other long-term liabilities also included reserves for workers' compensation, environmental liabilities and the long-term portion of compensation liabilities.

Some of the Company's products are subject to specified warranties and the Company provides for the estimated cost of product warranties. The adequacy of the pre-existing warranty liabilities is assessed regularly and the reserve is adjusted as necessary based on a review of historic warranty experience with respect to the applicable business or products, as well as the length and actual terms of the warranties, which are typically one year. The product warranty reserve is included in current and long term accrued liabilities on the balance sheet. Changes in the Company's product warranty reserve during the first nine months of 2011 and 2010 are as follows (in millions):

	Nine Months	
	2011	2010
Balance at beginning of year	\$ 13.0	\$ 13.6
Accruals for product warranties charged to expense	5.5	3.1
Cost of product warranty claims	(4.8)	(3.4)
Acquisitions	1.1	0.3
Balance at end of period	\$ 14.8	\$ 13.6

Note 10. Income Taxes

The Company's effective income tax rate for the third quarter and first nine months of 2011 was 30.9% and 33.5%, respectively. The Company's effective income tax rate for the third quarter and first nine months of 2010 was 31.8% and 34.8%, respectively. The third quarter and first nine months of 2011 included the re-measurement of unrecognized tax benefits for prior years of \$2.6 million and \$2.4 million, respectively. Included in these amounts are credits related to a research and development income tax credit of \$2.4 million, recorded in the third quarter. Excluding these amounts, the effective income tax rate for the third quarter and first nine months of 2011 would have been 35.3% and 35.0%, respectively. The third quarter and first nine months of 2010 included the re-measurement of unrecognized tax benefits for prior years of \$2.9 million and \$3.5 million, respectively. Included in these amounts are credits related to a research and development income tax credit of \$2.9 million, recorded in the third quarter. Excluding these amounts, the effective income tax rate for the third quarter and first nine months of 2010 would have been 38.4% and 37.5%, respectively.

Except for claims for refunds related to credits for research and development activities, the Company has concluded all U.S. federal income tax matters for all years through 2007 and for all California income tax matters for all years through 2006. Substantially all other material state, local and foreign income tax matters have been concluded for DALSA and its subsidiaries for years through 2002, and for other Teledyne Technologies companies for years through 2006. Years 2003 through 2005 remain open for subsidiaries in Canada, while years 2006 through 2009 are currently under audit. The Company believes appropriate provisions for all uncertain tax positions have been made for all jurisdictions and all open years.

Unrecognized tax benefits increased in the first nine months of 2011 by \$6.4 million in connection with the DALSA acquisition. Interest on those uncertain benefits in the amount of \$4.2 million was recognized in the statement of financial position. During the next twelve months, it is reasonably possible that unrecognized tax benefits could be reduced by \$4.4 million, either because our tax positions are sustained on audit, because the Company agrees to their disallowance, or the expiration of the statute of limitations.

The Company's intention is to permanently reinvest the earnings of its subsidiaries in Canada, the United Kingdom and The Netherlands, thereby indefinitely postponing their remittance of any earnings to the United States.

Note 11. Long-Term Debt and Capital Leases

On February 25, 2011, Teledyne refinanced the then existing \$590.0 million credit facility by terminating the facility and entering into a new facility that has lender commitments totaling \$550.0 million. The new facility has a termination date of February 25, 2016. The new facility requires the Company to comply with various financial and operating covenants, including maintaining certain consolidated leverage and interest coverage ratios. Excluding interest and fees, no payments are due under the \$550.0 million facility until it matures. Borrowings under our credit facility are at variable rates which are, at our option, tied to a Eurocurrency rate equal to LIBOR (London Interbank Offered Rate) plus an applicable rate or a base rate as defined in our credit agreement. Eurocurrency rate loans may be denominated in U.S. dollars or an alternative currency as defined in the agreement. Eurocurrency or LIBOR based loans under the facility typically have terms of one, two, three or six months and the interest rate for each such loan is subject to change if the loan is continued or converted following the applicable maturity date. Base rate loans have interest rates that primarily fluctuate

with changes in the prime rate. Interest rates are also subject to change based on our consolidated leverage ratio as defined in the credit agreement. The credit agreement also provides for facility fees that vary between 0.20% and 0.45% of the credit line, depending on our consolidated leverage ratio as calculated from time to time.

Available borrowing capacity under the \$550.0 million credit facility, which is reduced by borrowings and outstanding letters of credit, was \$512.8 million at October 2, 2011. The credit agreement requires the Company to comply with various financial and operating covenants and at October 2, 2011, the Company was in compliance with these covenants. Teledyne also has a \$5.0 million uncommitted credit line which permits credit extensions up to \$5.0 million plus an incremental \$2.0 million solely for standby letters of credit. This credit line is utilized, as needed, for periodic cash needs.

Long-term debt consisted of the following (in millions):

Balance at	October 2, 2011	January 2, 2011
4.04% Senior Notes due September 2015	\$ 75.0	\$ 75.0
4.74% Senior Notes due September 2017	100.0	100.0
5.30% Senior Notes due September 2020	75.0	75.0
\$550.0 million revolving credit facility, weighted average rate of 3.30% at October 2, 2011	24.0	
Total long-term debt	\$ 274.0	\$ 250.0

The Company also has \$15.3 million in capital leases, of which \$1.4 million is current. At October 2, 2011, Teledyne Technologies had \$13.2 million in outstanding letters of credit.

Note 12. Lawsuits, Claims, Commitments, Contingencies and Related Matters

For a further description of the Company's commitments and contingencies, reference is made to Note 15 of the Company financial statements as of and for the fiscal year ended January 2, 2011, included in our 2010 Form 10-K.

At October 2, 2011, the Company's reserves for environmental remediation obligations totaled \$5.6 million, of which \$2.7 million is included in current accrued liabilities. The Company periodically evaluates whether it may be able to recover a portion of future costs for environmental liabilities from its insurance carriers and from third parties. The timing of expenditures depends on a number of factors that vary by site, including the nature and extent of contamination, the number of potentially responsible parties, the timing of regulatory approvals, the complexity of the investigation and remediation, and the standards for remediation. The Company expects that it will expend present accruals over many years, and will complete remediation of all sites with which it has been identified in up to 30 years.

A number of other lawsuits, claims and proceedings have been or may be asserted against the Company, including those pertaining to product liability, patent infringement, commercial contracts, employment and employee benefits. While the outcome of litigation cannot be predicted with certainty, and some of these lawsuits, claims or proceedings may be determined adversely to the Company, management does not believe that the disposition of any such pending matters is likely to have a material adverse effect on the Company's financial condition. The resolution in any reporting period of one or more of these matters could have a material adverse effect on the Company's results of operations for that period.

In March 2009, Cold Creek Enterprises, Inc. and Bob DaSilva commenced a lawsuit against DALSA Corporation and certain related entities in the Ontario Superior Court of Justice. The claims originate from the interest of Mr. DaSilva's company in DALSA Digital Camera Inc., a joint venture entered into in November 2004 and a discontinued business of DALSA since the third quarter of 2008. The lawsuit seeks various forms of relief, including damages in excess of CAD \$20.0 million. The lawsuit is being vigorously defended, and a counterclaim has been filed against the plaintiff.

Note 13. Pension Plans and Postretirement Benefits

Teledyne Technologies has a defined benefit pension plan covering substantially all U.S. employees hired before January 1, 2004. As a result of the sale of the piston engines businesses, plan liabilities and assets were re-measured as of the April 19, 2011 sale date. Plan liabilities and expense for the remainder of the year after the sale date were measured using a discount rate of 6.15%, updated from 5.90% that was used from the beginning of the year through the sale date. The Company assumed discount rate on plan liabilities was 6.25% for 2010. The Company's assumed long-term rate of return on plan assets is 8.25% for both 2011 and 2010.

Teledyne's net periodic pension expense was \$1.5 million and \$5.2 million for third quarter and first nine months of 2011, respectively, compared with net periodic pension expense of \$1.2 million and \$3.6 million for the third quarter and first nine months of 2010, respectively. Pension expense allocated to contracts pursuant to U.S. Government Cost Accounting Standards (CAS) was \$2.9 million and \$8.9 million for the third quarter and first nine months of 2011, respectively, compared with \$2.4 million and \$7.2 million for the third quarter and first nine months of 2010, respectively. Pension expense determined under CAS can generally be recovered through the pricing of products and services sold to the U.S. Government. Teledyne made voluntary cash pension contributions totaling \$69.0 million to its qualified pension plan in the first nine months of 2011, compared with pension contributions totaling \$37.0 million to its qualified pension plan in the first nine months of 2010.

As a result of the re-measurement of plan assets and liabilities noted above, the Company recorded an increase of \$14.4 million to the accumulated other comprehensive income component of stockholders equity. This amount was net of \$8.6 million in deferred taxes.

The Company sponsors several postretirement defined benefit plans that provide health care and life insurance benefits for certain eligible retirees.

The following tables set forth the components of net periodic pension benefit expense for Teledyne's defined benefit pension plans and postretirement benefit plans for the third quarter and first nine months of 2011 and 2010 (in millions):

Pension Benefits - U.S. Plans	Third Quarter		Nine Months	
	2011	2010	2011	2010
Service cost - benefits earned during the period	\$ 3.7	\$ 3.5	\$ 9.4	\$ 10.3
Interest cost on benefit obligation	12.5	10.2	30.0	30.5
Expected return on plan assets	(18.6)	(14.4)	(44.2)	(43.0)
Amortization of prior service cost	0.1	0.1	0.2	0.3
Recognized actuarial loss	3.8	1.9	9.8	5.8
Net periodic benefit expense	1.5	1.3	5.2	3.9
Less: expense attributable to discontinued operations included above		(0.1)		(0.3)
Net periodic benefit expense - continuing operations	\$ 1.5	\$ 1.2	\$ 5.2	\$ 3.6

Pension Benefits - Non U.S. Plans	Third Quarter		Nine Months	
	2011	2010	2011	2010
Interest cost on benefit obligation	\$ 0.4	\$ 0.3	\$ 1.2	\$ 0.3
Expected return on plan assets	(0.4)	(0.2)	(1.2)	(0.2)
Net periodic benefit expense	\$	\$ 0.1	\$	\$ 0.1

Postretirement Benefits	Third Quarter		Nine Months	
	2011	2010	2011	2010
Service cost - benefits earned during the period	\$	\$	\$	\$
Interest cost on benefit obligation	0.2	0.3	0.7	0.8
Amortization of prior service cost	(0.1)	(0.1)	(0.3)	(0.3)
Recognized actuarial gain	(0.2)	(0.3)	(0.7)	(0.8)
Net periodic benefit expense	(0.1)	(0.1)	(0.3)	(0.3)
Less: amounts attributable to discontinued operations included above	0.1	0.1	0.3	0.3
Net periodic benefit expense	\$	\$	\$	\$

Note 14. Industry Segments

Teledyne is a leading provider of sophisticated instrumentation, digital imaging products and software, aerospace and defense electronics, and engineered systems. Our customers include government agencies, aerospace prime contractors, energy exploration and production companies, major industrial companies and airlines.

In the fourth quarter of 2010, the Company realigned and changed the reporting structure of some of its reportable business units. The former Electronics and Communications segment is now reporting as three segments: Instrumentation; Digital Imaging; and Aerospace and Defense Electronics. The businesses that comprised the Energy and Power Systems segment are now reported as part of the Aerospace and Defense Electronics and the Engineered Systems segments. Previously reported segment data has been restated to reflect the realignment and structure and the classification of the former Aerospace Engines and Components segment as a discontinued operation (see also Note 15).

The Company has four reportable segments: Instrumentation; Digital Imaging; Aerospace and Defense Electronics; and Engineered Systems. The Company manages, evaluates and aggregates its operating segments for segment reporting purposes primarily on the basis of product and service type, production process, distribution methods, type of customer, management organization, sales growth potential and long-term profitability. The Instrumentation segment provides monitoring and control instruments for marine, environmental, scientific, industrial and defense applications and harsh environment interconnect products. The Digital Imaging segment includes our sponsored and centralized research laboratories benefiting government programs and businesses, as well as major development efforts for innovative digital imaging products for government and space applications. It also includes digital image capture products, primarily consisting of high performance sensors, cameras and software for use in industrial, scientific, medical and professional applications products, specialty semiconductors and micro electro mechanical systems (MEMS), and infrared detectors, cameras and optomechanical assemblies. The Aerospace and Defense Electronics segment provides sophisticated electronic components and subsystems and communications products, including defense electronics, data acquisition and communications equipment for air transport and business aircraft and components and subsystems for wireless and satellite communications, as well as general aviation batteries. The Engineered Systems segment provides innovative systems engineering and integration, advanced technology application, software development and manufacturing solutions to space, military, environmental, energy, chemical, biological and nuclear systems and missile defense requirements. The Engineered Systems segment also designs and manufactures electrochemical energy systems and small turbine engines.

Segment operating profit includes other income and expense directly related to the segment, but excludes minority interest, interest income and expense, gains and losses on the disposition of assets, sublease rental income and non-revenue licensing and royalty income, domestic and foreign income taxes and corporate office expenses.

Edgar Filing: TELEDYNE TECHNOLOGIES INC - Form 10-Q

The following table presents Teledyne Technologies' interim industry segment disclosures for net sales and operating profit including other segment income. The table also provides a reconciliation of segment operating profit and other segment income to total net income attributable to common stockholders (amounts in millions):

	Third Quarter 2011	Third Quarter 2010	% Change	Nine Months 2011	Nine Months 2010	% Change
Net sales:						
Instrumentation	\$ 157.1	\$ 142.5	10.2%	\$ 467.7	\$ 425.1	10.0%
Digital Imaging	95.0	30.9	207.4%	257.4	90.3	185.0%
Aerospace and Defense Electronics	171.2	155.5	10.1%	507.7	455.8	11.4%
Engineered Systems	73.1	80.9	(9.6)%	234.6	251.5	(6.7)%
Total net sales	\$ 496.4	\$ 409.8	21.1%	\$ 1,467.4	\$ 1,222.7	20.0%
Operating profit and other segment income:						
Instrumentation	\$ 32.2	\$ 28.8	11.8%	\$ 94.6	\$ 83.0	14.0%

Net income attributable to Teledyne Technologies	\$ 34.1	\$ 30.3	12.5%	\$ 218.4	\$ 83.9	160.3%

* percentage change not meaningful

Product Lines

This Instrumentation segment includes two product lines: Environmental Instrumentation; and Marine Instrumentation. The Digital Imaging segment contains one product line as does the Aerospace and Defense Electronics segment. This Engineered Systems segment includes three product lines: Engineered Products and Services; Turbine Engines; and Energy Systems.

Edgar Filing: TELEDYNE TECHNOLOGIES INC - Form 10-Q

The tables below provide a summary of the sales by product line for the Instrumentation segment and the Engineered Systems segment (in millions):

	Third Quarter		Nine Months	
	2011	2010	2011	2010
Instrumentation				
Environmental Instrumentation	\$ 61.9	\$ 52.5	\$ 183.2	\$ 161.4
Marine Instrumentation	95.2	90.0	284.5	263.7
Total	\$ 157.1	\$ 142.5	\$ 467.7	\$ 425.1

	Third Quarter		Nine Months	
	2011	2010	2011	2010
Engineered Systems				
Engineered Products and Services	\$ 58.9	\$ 66.9	\$ 190.9	\$ 212.6
Turbine Engines	6.6	4.0	18.5	9.1
Energy Systems	7.6	10.0	25.2	29.8
Total	\$ 73.1	\$ 80.9	\$ 234.6	\$ 251.5

Note 15. Discontinued Operation

On April 19, 2011 we completed the sale of our general aviation piston engines businesses for net cash proceeds of \$187.9 million. This amount included an estimated working capital adjustment of \$3.8 million and was net of transaction costs of \$1.9 million. In the third quarter of 2011, Teledyne paid \$3.8 million related to the final working capital adjustment and also paid \$4.4 million in income taxes related to the sale. Teledyne expects to pay up to an additional \$46.9 million in income taxes related to the sale in the fourth quarter of 2011. The first nine months of 2011, includes income from discontinued operations of \$113.1 million which includes the gain on the sale of \$113.8 million and a net loss of \$0.7 million related to the operating results of discontinued operations for the first nine months of 2011.

The operating assets and liabilities of Aerospace Engines and Components segment have been reclassified as assets and liabilities of discontinued operations and are included in current assets and current liabilities on the balance sheet at January 2, 2011. The following is a summary of the assets and liabilities for the discontinued operation (in millions):

	January 2, 2011
Current assets	38.5
Property, plant and equipment,	18.6
Goodwill, net	0.9
Other long-term assets	17.1
Total Assets	\$ 75.1
Current liabilities	13.1
Long-term liabilities, including aircraft product liabilities	48.2
Total Liabilities	\$ 61.3

Sales for this discontinued segment were \$34.1 million for the third quarter of 2010, and were \$39.5 million and \$102.9 million for 2011 to the April 19th date of the sale and first nine months of 2010, respectively. Net income was \$0.4 million for the third quarter of 2010. The net loss was \$0.7 million for 2011 to the April 19th date of the sale and net income was \$1.0 million for the first nine months of 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Strategy/Overview

Our strategy continues to emphasize growth in our core markets of instrumentation, digital imaging, aerospace and defense electronics and engineered systems. Our core markets are characterized by high barriers to entry and include specialized products and services not likely to be commoditized. We intend to strengthen and expand our core businesses with targeted acquisitions. We aggressively pursue operational excellence to continually improve our margins and earnings. At Teledyne, operational excellence includes the rapid integration of the businesses we acquire. Using complementary technology across our businesses and internal research and development, we seek to create new products to grow our company and expand our addressable markets.

Consistent with this strategy, we made two acquisitions and acquired a minority interest investment in the first quarter of 2011. We also continue to evaluate our businesses to ensure that they are aligned with our strategy. On April 19, 2011, we completed the sale of our general aviation piston engines businesses, which comprised the former Aerospace Engines and Components segment. Accordingly, our consolidated financial statements have been restated to classify the Aerospace Engines and Components segment as a discontinued operation.

In addition, in the fourth quarter of 2010, we realigned and changed the reporting structure of some of our businesses. Our former Electronics and Communications segment is now reported as three separate segments, Instrumentation, Digital Imaging and Aerospace and Defense Electronics. The businesses that comprised the Energy and Power Systems segment are now reported as part of the Aerospace and Defense Electronics and the Engineered Systems segments. We have restated our previously reported segment data to reflect this revised segment reporting structure.

Our Recent Acquisitions

The following briefly describes the Company's acquisition activity for the nine months ended October 2, 2011. For a description of the Company's acquisition and divestiture activity for the year ended January 2, 2011, please refer to Notes 3 and 16 of our Annual Report on Form 10-K for the fiscal year ended January 2, 2011 (2010 Form 10-K).

On February 12, 2011, the Company acquired the stock of DALSA Corporation (DALSA). DALSA designs and manufactures digital image capture products, primarily consisting of high performance sensors, cameras and software for use in industrial, scientific, medical and professional applications products, as well as specialty semiconductors and micro electro mechanical systems (MEMS). The Company acquired DALSA for an aggregate purchase price of \$339.5 million in cash. Headquartered in Waterloo, Ontario, Canada, DALSA had annual revenues of CAD \$212.3 million for its fiscal year ended December 2010. DALSA operates within the Digital Imaging segment.

In addition to the acquisition of DALSA, during the first nine months of 2011, the Company completed the acquisition of a majority interest in Nova Sensors (Nova) for total consideration of \$5.1 million in cash and a minority interest in Optech Incorporated (Optech) for \$18.9 million. Nova produces compact short-wave and mid-wave infrared cameras and operates within the Digital Imaging segment. Optech is a laser-based survey and digital imaging company. Teledyne Technologies funded the purchases primarily from borrowings under its credit facility and cash on hand.

Results of Operations

Third quarter of 2011 compared with the third quarter of 2010

Teledyne's third quarter 2011 sales were \$496.4 million, compared with sales of \$409.8 million for the same period of 2010, an increase of 21.1%. Net income from continuing operations was \$34.1 million (\$0.91 per diluted share) for the third quarter of 2011, compared with \$29.9 million (\$0.81 per diluted share) for the third quarter of 2010, an increase of 14.0%. Net income including discontinued operations was \$34.1 million (\$0.91 per diluted share) for the third quarter of 2011, compared with \$30.3 million (\$0.82 per diluted share) for the third quarter of 2010.

The third quarter of 2011, compared with the same period in 2010, reflected higher sales in each business segment except the Engineered Systems segment. Incremental revenue in the third quarter of 2011 from recent acquisitions was \$65.5 million.

The increase in earnings for the third quarter of 2011, compared with the same period of 2010, reflected improved results in each operating segment except the Engineered Systems segment. The increase in earnings reflected the impact of acquisitions as well as improved margins in the Instrumentation and Aerospace and Defense segments. The incremental operating profit included in the results for the third quarter of 2011 from recent acquisitions was \$5.6 million and included \$2.5 million in acquired intangible asset amortization from the recent acquisitions.

The third quarter of 2011 included pension expense of \$1.5 million, compared with \$1.2 million in the third quarter of 2010. Pension expense allocated to contracts pursuant to U.S. Government Cost Accounting Standards (CAS) was \$2.9 million in the third quarter of 2011, compared with \$2.4 million in the third quarter of 2010.

In the third quarter of 2011 and 2010, we recorded a total of \$1.5 million and \$1.2 million, respectively, in stock option compensation expense. Employee stock option grants are expensed evenly over the three year vesting period.

Cost of sales in total dollars was higher in the third quarter of 2011, compared with the third quarter of 2010, which reflected the impact of higher sales. Cost of sales as a percentage of sales for the third quarter of 2011 decreased to 66.7% from 69.5% for the third quarter of 2010 and reflected the impact of the DALSA cost structure which has a lower cost of sales percentage than the overall Teledyne cost of sales percentage. In addition, the lower cost of sales percentage reflects the benefit of the increase in sales while certain fixed costs remained flat.

Selling, general and administrative expenses, including research and development and bid and proposal expense, in total dollars were higher in the third quarter of 2011, compared with the third quarter of 2010, and reflected the impact of higher sales, higher acquired intangible asset amortization and higher research and development costs. Selling, general and administrative expenses for the third quarter of 2011, as a percentage of sales, increased to 21.8%, compared with 19.3% in the third quarter of 2010 and reflected the impact of higher research and development costs and the DALSA cost structure which has a higher selling, general and administrative expense percentage than the overall Teledyne selling, general and administrative expense percentage.

Other income and expense, included a \$4.5 million pretax charge to write off the company's minority investment in a private company. The write off was necessary since the company's actual and expected financial performance has significantly deteriorated resulting in lower actual and projected future cash flow. Corporate expense was higher in the third quarter of 2011 compared with the third quarter of 2010, and primarily reflected higher compensation expenses.

Interest expense, net of interest income, was \$3.7 million in the third quarter of 2011, compared with \$1.6 million for the third quarter of 2010. The increase in interest expense primarily reflected the impact of higher outstanding debt levels and higher overall average interest rates from our new credit facility and our senior notes.

The Company's effective income tax rate for the third quarter of 2011 was 30.9% compared with 31.8% for the third quarter of 2010. The third quarters of 2011 and 2010 included the re-measurement of unrecognized tax benefits for prior years, primarily research and development tax credits, of \$2.4 million and \$2.9 million, respectively. Excluding these amounts, the effective tax rates for the third quarters of 2011 and 2010, would have been 35.3% and 38.4%, respectively. The decrease primarily reflected a change in the proportion of domestic and international income.

First nine months of 2011 compared with the first nine months of 2010

Teledyne's first nine months 2011 sales were \$1,467.4 million, compared with sales of \$1,222.7 million for the same period of 2010, an increase of 20.0%. Net income from continuing operations was \$105.3 million (\$2.82 per diluted share) for the first nine months of 2011, compared with \$82.9 million (\$2.25 per diluted share) for the first nine months of 2010, an increase of 27.0%. Net income including discontinued operations, was \$218.4 million (\$5.85 per diluted share) for the first nine months of 2011, compared with \$83.9 million (\$2.28 per diluted share) for the first nine months of 2010. The first nine months of 2011 includes income from discontinued operations of \$113.1 million.

The first nine months of 2011, compared with the same period in 2010, reflected higher sales in each business segment except for the Engineered Systems segment. Incremental revenue in the first nine months of 2011 from recent acquisitions was \$190.4 million.

The increase in earnings for the first nine months of 2011, compared with the same period of 2010, reflected improved results in each operating segment except for the Engineered Systems segment. The increase in earnings reflected the impact of acquisitions as well as improved margins in each operating segment except for the Digital Imaging segment. The incremental operating profit included in the results for the first nine months of 2011 from recent acquisitions was \$12.2 million and included charges of \$2.0 million, related to acquisition activity, as well as, \$7.8 million in acquired intangible asset amortization from recent acquisitions.

The first nine months of 2011 included pension expense of \$5.2 million, compared with \$3.6 million in the first nine months of 2010. Pension expense allocated to contracts pursuant to U.S. Government Cost Accounting Standards (CAS) was \$8.9 million in the first nine months of 2011, compared with \$7.2 million in the first nine months of 2010. The increase in 2011 pension expense reflects the impact of a reduction in the discount rate used to calculate pension liabilities from 6.25% for 2010 to 5.90% through April 19, 2011 and 6.15% for the remainder of 2011, partially offset by favorable returns on pension assets in 2010.

In the first nine months of 2011 and 2010, we recorded a total of \$4.3 million and \$3.6 million, respectively, in stock option compensation expense. Employee stock option grants are expensed evenly over the three year vesting period.

Cost of sales in total dollars was higher in the first nine months of 2011, compared with the first nine months of 2010, which reflected the impact of higher sales. Cost of sales as a percentage of sales for the first nine months of 2011 decreased to 66.4% from 70.3% for the first nine months of 2010 and reflected the impact of the DALSA cost structure which has a lower cost of sales percentage than the overall Teledyne cost of sales percentage. In addition, the lower cost of sales percentage reflects the benefit of the increase in sales while certain fixed costs remained flat.

Selling, general and administrative expenses, including research and development and bid and proposal expense, in total dollars were higher in the first nine months of 2011, compared with the first nine months of 2010, and reflected the impact of higher sales, higher acquired intangible asset amortization and higher research and development costs. Selling, general and administrative expenses for the first nine months of 2011, as a percentage of sales, increased to 21.7%, compared with 19.1% in the first nine months of 2010 and reflected the impact of higher research and development costs and the DALSA cost structure which has a higher selling, general and administrative expense percentage than the overall Teledyne selling, general and administrative expense percentage.

Other income and expense, included a \$4.5 million pretax charge to write off the company's minority investment in a private company. Corporate expense was higher in the first nine months of 2011, compared with the first nine months of 2010, and primarily reflected higher compensation and professional fees expenses.

Interest expense, net of interest income, was \$12.4 million in the first nine months of 2011, compared with \$3.2 million for the first nine months of 2010. The increase in interest expense primarily reflected the impact of higher outstanding debt levels and higher overall average interest rates from our new credit facility and our senior notes.

The Company's effective income tax rate for the first nine months of 2011 was 33.5% compared with 34.8% for the first nine months of 2010. The first nine months of 2011 and 2010 included the re-measurement of unrecognized tax benefits for prior years, primarily research and development tax credits, of \$2.4 million and \$3.5 million, respectively. Excluding these amounts, the effective tax rates for the first nine months of 2011 and 2010, would have been 35.0% and 37.5%, respectively. The decrease primarily reflected a change in the proportion of domestic and international income.

Review of Operations:

The following table sets forth the sales and operating profit for each segment (amounts in millions):

	Third Quarter 2011	Third Quarter 2010	% Change	Nine Months 2011	Nine Months 2010	% Change
Net sales:						
Instrumentation	\$ 157.1	\$ 142.5	10.2%	\$ 467.7	\$ 425.1	10.0%
Digital Imaging	95.0	30.9	207.4%	257.4	90.3	185.0%
Aerospace and Defense Electronics	171.2	155.5	10.1%	507.7	455.8	11.4%
Engineered Systems	73.1	80.9	(9.6)%	234.6	251.5	(6.7)%
Total net sales	\$ 496.4	\$ 409.8	21.1%	\$ 1,467.4	\$ 1,222.7	20.0%
Operating profit and other segment income:						
Instrumentation	\$ 32.2	\$ 28.8	11.8%	\$ 94.6	\$ 83.0	14.0%
Digital Imaging	2.3	1.9	21.1%	13.8	5.6	146.4%
Aerospace and Defense Electronics	24.8	13.5	83.7%	70.8	39.0	81.5%
Engineered Systems	6.4	8.2	(22.0)%	21.6	22.3	(3.1)%
Segment operating profit and other segment income	65.7	52.4	25.4%	200.8	149.9	34.0%
Corporate expense	(8.9)	(6.5)	36.9%	(27.4)	(20.3)	35.0%
Other income/(expense), net	(3.8)	(0.3)	*	(2.5)	0.9	*
Interest expense, net	(3.7)	(1.6)	131.3%	(12.4)	(3.2)	287.5%
Income from continuing operations before income taxes	49.3	44.0	12.0%	158.5	127.3	24.5%
Provision for income taxes	15.2	14.0	8.6%	53.1	44.3	19.9%
Net income from continuing operations before noncontrolling interest	34.1	30.0	13.7%	105.4	83.0	27.0%

* percentage change not meaningful

InstrumentationThird quarter of 2011 compared with the third quarter of 2010

The Instrumentation segment's third quarter 2011 sales were \$157.1 million, compared with \$142.5 million for the third quarter of 2010, an increase of 10.2%. Third quarter 2011 operating profit was \$32.2 million, compared with operating profit of \$28.8 million the third quarter of 2010, an increase of 11.8%.

The third quarter 2011 sales change resulted primarily from \$9.4 million in higher sales of environmental instrumentation products and \$5.2 million in higher sales of marine instrumentation products. The higher sales for environmental instrumentation reflected improvement for substantially all product offerings. The higher sales for marine instrumentation reflected increased sales of marine interconnect systems, partially offset by reduced sales of geophysical sensors for the energy exploration market. The higher sales for marine instrumentation also included \$2.6 million from a recent acquisition. The increase in operating profit reflected the impact of higher sales.

First nine months of 2011 compared with the first nine months of 2010

The Instrumentation segment's first nine months 2011 sales were \$467.7 million, compared with \$425.1 million, an increase of 10.0%. First nine months 2011 operating profit was \$94.6 million, compared with operating profit of \$83.0 million for the first nine months of 2011, an increase of 14.0%.

The first nine months 2011 sales change resulted primarily from \$21.8 million in higher sales of environmental instrumentation products and \$20.8 million in higher sales of marine instrumentation products. The higher sales for environmental instrumentation reflected improved sales for all product offerings. The higher sales for marine instrumentation reflected improvement for substantially all product offerings. The higher sales for marine instrumentation also included \$3.4 million from a recent acquisition. The increase in operating profit reflected the impact of higher sales and improved margins for environmental instrumentation products.

Digital Imaging

Third quarter of 2011 compared with the third quarter of 2010

The Digital Imaging segment's third quarter 2011 sales were \$95.0 million, compared with \$30.9 million the third quarter of 2010, an increase of 207.4%. Operating profit increased to \$2.3 million for the third quarter of 2011, compared with operating profit of \$1.9 million for the third quarter of 2010, an increase of 21.1%.

The third quarter 2011 sales increase included \$59.1 million in revenue from recent acquisitions, primarily the February 2011, acquisition of DALSA, as well as higher organic sales. The increase in operating profit reflected the impact of higher sales, partially offset by increased intangible asset amortization of \$2.8 million and \$7.7 million in higher research and development and bid and proposal spending, primarily from recent acquisitions. The incremental operating profit from recent acquisitions was \$1.1 million. Increased research and development and bid and proposal spending is expected to continue in the fourth quarter. In the remainder of 2011, lower sales of cameras for semiconductor and electronics inspection is expected to be partially offset by increased sales of custom imaging sensors.

First nine months of 2011 compared with the first nine months of 2010

The Digital Imaging segment's first nine months 2011 sales were \$257.4 million, compared with \$90.3 million for the first nine months of 2011, an increase of 185.0%. Operating profit increased to \$13.8 million for the first nine months of 2011, compared with operating profit of \$5.6 million for the first nine months of 2011, an increase of 146.4%.

The first nine months 2011 sales increase included \$156.5 million in revenue from recent acquisitions, primarily the February 2011, acquisition of DALSA, as well as higher organic sales. The increase in operating profit reflected the impact of higher sales, partially offset by increased intangible asset amortization of \$7.2 million and \$17.5 million in higher research and development and bid and proposal spending, primarily from recent acquisitions. The incremental operating profit from recent acquisitions was \$8.9 million.

Aerospace and Defense Electronics

Third quarter of 2011 compared with the third quarter of 2010

The Aerospace and Defense Electronics segment's third quarter 2011 sales were \$171.2 million, compared with \$155.5 million for the third quarter of 2010, an increase of 10.1%. Operating profit was \$24.8 million for the third quarter of 2011, compared with operating profit of \$13.5 million for the third quarter of 2010, an increase of 83.7%.

The third quarter 2011 sales increase resulted from \$7.3 million of higher sales of microwave devices and interconnects, increased sales of \$6.9 million from avionics products and electronic relays and higher sales of \$1.5 million from electronic manufacturing services. The increased sales of microwave devices and interconnects included sales of \$3.4 million from acquisitions as well as higher organic sales. The increase in operating profit reflected the impact of higher sales and product mix differences.

First nine months of 2011 compared with the first nine months of 2010

The Aerospace and Defense Electronics segment's first nine months 2011 sales were \$507.7 million, compared with \$455.8 million for the first nine months of 2010, an increase of 11.4%. Operating profit increased to \$70.8 million for the first nine months of 2011, compared with operating profit of \$39.0 million for the first nine months of 2010, an increase of 81.5%.

The first nine months 2011 sales increase resulted from \$39.6 million of higher sales of microwave devices and interconnects, as well as increased sales of \$20.1 million from avionics products and electronic relays, partially offset by a reduction of \$7.8 million in sales of electronic manufacturing services. The increased sales of microwave devices and interconnects included sales of \$23.7 million from acquisitions as well as higher organic sales. The increase in operating profit reflected the impact of higher sales and product mix differences. The first nine months of 2010 included charges of \$8.2 million, primarily to correct inventory valuations incorrectly recorded in previous periods at a business unit.

Engineered Systems

Third quarter of 2011 compared with the third quarter of 2010

The Engineered Systems segment's third quarter 2011 sales were \$73.1 million, compared with \$80.9 million for the third quarter of 2010, a decrease of 9.6%. Operating profit was \$6.4 million for the third quarter 2011, compared with operating profit of \$8.2 million for the third quarter of 2010, a decrease of 22.0%.

The third quarter 2011 sales decrease reflected lower sales of \$8.0 million from engineered products and services and lower energy systems sales of \$2.4 million, partially offset by higher sales of \$2.6 million from turbine engines resulting from increased sales for the Joint Air-to-Surface Standoff Missile (JASSM) program. The lower third quarter 2011 sales for engineered products and services primarily reflected higher sales for nuclear and other manufacturing programs, more than offset by lower sales for space and defense programs. Operating profit in the third quarter of 2011 reflected the impact of lower sales and lower margins for engineered products and services, partially offset by higher margins for turbine engines. Operating profit included pension expense of \$0.4 million in the third quarter of 2011, compared with \$0.4 million. Pension expense allocated to contracts pursuant to CAS was \$2.2 million in the third quarter of 2011, compared with \$1.7 million. Pension expense determined allowable under CAS can generally be recovered through the pricing of products and services sold to the U.S. Government.

First nine months of 2011 compared with the first nine months of 2010

The Engineered Systems segment's first nine months 2011 sales were \$234.6 million, compared with \$251.5 million for the first nine months of 2010, a decrease of 6.7%. Operating profit was \$21.6 million for the first nine months 2011, compared with operating profit of \$22.3 million for the first nine months of 2010, a decrease of 3.1%.

The first nine months 2011 sales decrease reflected lower sales of \$21.7 million from engineered products and services and lower energy systems sales of \$4.6 million, partially offset by higher sales of \$9.4 million of turbine engines resulting from increased sales for the JASSM program. The sales decrease from engineered products and services, primarily reflected lower sales of space and defense programs, partially offset by \$6.8 million in sales from acquisitions. The lower operating profit in the first nine months of 2011 primarily reflected the impact of lower sales, partially offset by the impact of higher margins for turbine engines. Operating profit included pension expense of \$2.1 million in the first nine months of 2011, compared with \$1.2 million in the first nine months of 2010. Pension expense allocated to contracts pursuant to CAS was \$6.6 million in the first nine months of 2011, compared with \$5.3 million in the first nine months of 2010.

Financial Condition, Liquidity and Capital Resources

Our net cash provided by operating activities from continuing operations was \$139.7 million for the first nine months of 2011, compared with net cash provided by operating activities from continuing operations of \$66.9 million for the same period of 2010. The higher cash provided by operating activities from continuing operations in the first nine months of 2011 reflected the impact of higher net income, the timing of accounts receivable receipts and lower income tax payments of \$26.6 million, partially offset by \$69.0 million in contributions to the domestic qualified pension plan in the first nine months of 2011, compared with a \$37.0 million contribution to the domestic qualified pension plan for the first nine months of 2010.

Our net cash used in investing activities from continuing operations was \$207.4 million for the first nine months of 2011, compared with net cash used by investing activities from continuing operations of \$78.8 million for the first nine months of 2010. The 2011 amount includes the acquisitions of DALSA and Nova and also the 19% investment in Optech accounted for under the cost basis method. The 2011 amount also includes net cash proceeds of \$183.6 million from the sale of the piston engines businesses. This amount included an estimated working capital adjustment of \$3.8 million and is net of transaction costs of \$1.9 million and \$4.4 million in income tax payments related to the sale. Teledyne paid \$3.8 million related to the final working capital adjustment in the third quarter of 2011. Teledyne also expects to pay up to \$46.9 million in income taxes related to the sale of discontinued operations prior to year end 2011. The 2010 cash used by investing activities from continuing operations includes the purchase of Inteltek plc, Optimum Optical, Gavia and a minority investment in a private company.

We funded the purchases primarily from borrowings under our credit facility and cash on hand.

Capital expenditures for the first nine months of 2011 and 2010 were \$27.6 million and \$15.6 million, respectively.

Our goodwill was \$717.9 million at October 2, 2011 and \$546.3 million at January 2, 2011. The increase in the balance of goodwill in 2011 primarily resulted from the acquisition of DALSA. Teledyne Technologies' net acquired intangible assets were \$187.3 million at October 2, 2011 and \$113.9 million at January 2, 2011. The increase in the balance of acquired intangible assets in 2011 primarily resulted from the acquisition of DALSA, partially offset by amortization.

Financing activities provided cash of \$33.9 million for the first nine months of 2011, compared with cash provided by financing activities of \$7.7 million for the first nine months of 2010. Cash provided by financing activities for the first nine months of 2011 and 2010, included net borrowings of \$23.0 million and \$5.1 million, respectively. Proceeds from the exercise of stock options were \$10.9 million and \$2.3 million for the first nine months of 2011 and 2010, respectively. The first nine months of 2011 and 2010, included \$5.2 million and \$0.9 million, respectively, in excess tax benefits related to stock option exercises.

Working capital was \$199.6 million at October 2, 2011, compared with \$306.8 million at January 2, 2011. The decrease reflected the use of cash on hand at January 2, 2011 to pay down long-term debt and the change from an income tax receivable position at January 2, 2011 to an income tax payable position at October 2, 2011.

We made voluntary cash contributions of \$69.0 million in the first nine months of 2011 to the domestic qualified pension plan. Pension contributions of \$37.0 million were made in the first nine months of 2010. No additional cash contributions are planned for 2011.

Our principal cash and capital requirements are to fund working capital needs, capital expenditures, income tax payments, pension contributions, debt service requirements and the recently announced stock repurchase program, as well as acquisitions. It is anticipated that operating cash flow, together with available borrowings under the credit facility described below, will be sufficient to meet these requirements over the next twelve months. To support acquisitions, we may need to raise additional capital. We currently expect capital expenditures to be in the range of \$45.0 million to \$50.0 million in 2011, of which \$27.6 million has been spent in the first nine months of 2011.

On February 25, 2011, Teledyne refinanced the then existing \$590.0 million credit facility by terminating the facility and entering into a new facility that has lender commitments totaling \$550.0 million. The new facility has a termination date of February 25, 2016. Excluding interest and fees, no payments are due under the \$550.0 million facility until it matures. Borrowings under our credit facility are at variable rates which are, at our option, tied to a Eurocurrency rate equal to LIBOR (London Interbank Offered Rate) plus an applicable rate or a base rate as defined in our credit agreement. Eurocurrency rate loans may be denominated in U.S. dollars or an alternative currency as defined in the agreement. Eurocurrency or LIBOR based loans under the facility typically have terms

of one, two, three or six months and the interest rate for each such loan is subject to change if the loan is continued or converted following the applicable maturity date. Base rate loans have interest rates that primarily fluctuate with changes in the prime rate. Interest rates are also subject to change based on our consolidated leverage ratio as defined in the credit agreement. The credit agreement also provides for facility fees that vary between 0.20% and 0.45% of the credit line, depending on our consolidated leverage ratio as calculated from time to time.

Total debt at October 2, 2011, includes \$24.0 million outstanding under the \$550.0 million credit facility and \$250.0 million in senior notes. The Company also has \$15.3 million in capital leases and other debt, of which \$1.4 million is current. At October 2, 2011, Teledyne Technologies had \$13.2 million in outstanding letters of credit. Available borrowing capacity under the \$550.0 million credit facility, which is reduced by borrowings and outstanding letters of credit, was \$512.8 million at October 2, 2011. The credit agreement requires the Company to comply with various financial and operating covenants and at October 2, 2011 the Company was in compliance with these covenants. As of October 2, 2011 the Company had a significant amount of margin between required financial covenant ratios and our actual ratios. At October 2, 2011 the required financial covenant ratios and the actual ratios were as follows:

\$550.0 million Credit Facility expires February 2016		
Financial Covenant	Required Covenant	Actual Covenant
Consolidated Leverage Ratio (Net Debt/EBITDA) (1)	No more than 3.25 to 1	0.8 to 1
Consolidated Interest Coverage Ratio (EBITDA/Interest) (2)	No less than 3.0 to 1	22.5 to 1
\$250.0 million Private Placement Notes due 2015, 2017 and 2020		
Financial Covenant	Required Covenant	Actual Covenant
Consolidated Leverage Ratio (Net Debt/EBITDA) (1)	No more than 3.25 to 1	0.8 to 1
Consolidated Interest Coverage Ratio (EBITDA/Interest) (2)	No less than 3.0 to 1	22.5 to 1

- 1) The Consolidated Leverage Ratio is equal to Net Debt/EBITDA as defined in our private placement note purchase agreement and our \$550.0 million credit agreement
- 2) The Consolidated Interest Coverage Ratio is equal to EBITDA/Interest as defined in our private placement note purchase agreement and our \$550.0 million credit agreement.

Teledyne also has a \$5.0 million uncommitted credit line which permits credit extensions up to \$5.0 million plus an incremental \$2.0 million solely for standby letters of credit. There were no amounts outstanding under this credit line at October 2, 2011. This credit line is utilized, as needed, for periodic cash needs.

Our liquidity is not dependent upon the use of off-balance sheet financial arrangements. We have no off-balance sheet financing arrangements that incorporate the use of special purpose entities or unconsolidated entities.

Critical Accounting Policies

Our critical accounting policies are those that are reflective of significant judgments and uncertainties, and may potentially result in materially different results under different assumptions and conditions. Our critical accounting policies are the following: revenue recognition; accounting for pension plans; accounting for business combinations, goodwill and other long-lived assets; and accounting for income taxes. For additional discussion of the application of these and other accounting policies, see Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Note 2 of the Notes to Consolidated Financial Statements included in Teledyne Technologies' 2010 Form 10-K.

Safe Harbor Cautionary Statement Regarding Forward-Looking Information

From time to time we make, and this report contains, forward looking statements, as defined in the Private Securities Litigation Reform Act of 1995, relating to earnings, growth opportunities, product sales, capital expenditures, research and development expenses, pension matters, stock option compensation expense, interest expense, taxes, and strategic plans. Forward-looking statements are generally accompanied by words such as estimate, project, predict, believes or expect, that convey the uncertainty of future events or outcomes. All statements made in this Management's Discussion and Analysis of Financial Condition and Results of Operations that are not historical in nature should be considered forward-looking.

Actual results could differ materially from these forward-looking statements. Many factors could change the anticipated results, including: disruptions in the global economy; changes in demand for products sold to the defense electronics, instrumentation, digital imaging, energy exploration and production, commercial aviation, semiconductor and communications markets; funding, continuation and award of government programs and cuts to defense spending resulting from future deficit reduction measures, including potential automatic cuts to defense spending that may be triggered by the Budget Control Act of 2011; risks associated with acquisitions, including our acquisition of DALSA; uncertainties associated with global responses to terrorism and other perceived threats; fluctuations in the price of oil and natural gas; financial market fluctuations that could negatively impact the value of the Company's pension assets and exchange rate risks and other risks associated with the Company's international operations.

We continue to take action to assure compliance with the internal controls, disclosure controls and other requirements of the Sarbanes-Oxley Act of 2002. While we believe our control systems are effective, there are inherent limitations in all control systems, and misstatements due to error or fraud may occur and not be detected.

Readers are urged to read our periodic reports filed with the Securities and Exchange Commission (SEC) for a more complete description of our Company, its businesses, its strategies and the various risks that we face. Various risks are identified in Teledyne's 2010 Form 10-K and this Form 10-Q. Readers, particularly those interested in investing in Teledyne Technologies, should read these risk factors.

We assume no duty to publicly update or revise any forward-looking statements, whether as a result of new information or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Except as set forth below, there were no material changes to the information provided under Item 7A, Quantitative and Qualitative Disclosure About Market Risk included in our 2010 Annual Report on Form 10-K.

Market Risk

We are exposed to various market risks, including changes in foreign currency exchange rates, and interest rates. Foreign currency forward contracts are used primarily to hedge anticipated exposures. We do not enter into derivatives or other financial instruments for trading or speculative purposes.

Foreign Currency Exchange Rate Risk

Notwithstanding our efforts to mitigate portions of our foreign currency exchange rate risks, there can be no assurance that our hedging activities will adequately protect us against the risks associated with foreign currency fluctuations. A hypothetical 10 percent appreciation of the U.S. dollar from its value at October 2, 2011 would decrease the fair value of our foreign currency forward contracts associated with our cash flow hedging activities by \$7.8 million. A hypothetical 10 percent depreciation of the U.S. dollar from its value at October 2, 2011 would increase the fair value of our foreign currency forward contracts associated with our cash flow hedging activities by \$7.8 million. For additional information please see Risk Management discussed in Note 4 to these condensed consolidated financial statements.

Interest Rate Exposure

We are exposed to market risk through the interest rate on our borrowings under our \$550.0 million credit facility. Borrowings under our credit facility are at variable rates which are, at our option, tied to a Eurocurrency rate equal to LIBOR (London Interbank Offered Rate) plus an applicable rate or a base rate as defined in our credit agreement. Eurocurrency rate loans may be denominated in U.S. dollars or an alternative currency as defined in the agreement. Eurocurrency or LIBOR based loans under the facility typically have terms of one, two, three or six months and the interest rate for each such loan is subject to change if the loan is continued or converted following the applicable maturity date. Base rate loans have interest rates that primarily fluctuate with changes in the prime rate. Interest rates are also subject to change based on our consolidated leverage ratio as defined in the credit agreement. As of October 2, 2011, we had \$24.0 million in outstanding indebtedness under our credit facility. A 100 basis point increase in interest rates would result in an increase in annual interest expense of approximately \$0.2 million, assuming the \$24.0 million in debt was outstanding for the full year.

Item 4. Controls and Procedures

Our disclosure controls and procedures are designed to ensure that information required to be disclosed in reports that we file or submit under the Securities Exchange Act of 1934, are recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission and to provide reasonable assurance that information required to be disclosed by us in such reports is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. Our Chairman, President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer, with the participation and assistance of other members of management, have reviewed the effectiveness of our disclosure controls and procedures and have concluded that the disclosure controls and procedures, as of October 2, 2011, are effective.

In connection with our evaluation during the quarterly period ended October 2, 2011, we have made no change in our internal controls over financial reporting that have materially affected or are reasonably likely to materially affect our internal controls over financial reporting. There also were no significant deficiencies or material weaknesses identified for which corrective action needed to be taken.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

See Item 1 of Part I, Financial Statements Note 12 Lawsuits, Claims, Commitments and Related Matters.

Item 1A. Risk Factors

There are no material changes to the risk factors previously disclosed in our 2010 Annual Report on Form 10-K in response to Item 1A to Part 1 of Form 10-K or in our First Quarter 2011 Form 10-Q Item 1A, except as disclosed in Item 3 Quantitative and Qualitative Disclosures About Market Risk under Interest Rate Exposure.

Also, as anticipated in the 2010 Form 10-K, with the completed acquisition of DALSA and the divestiture of our piston engine businesses, the Company's risk profile has changed, and may differ materially from prior years.

Item 5. Other Information

On October 25, 2011, the Company's Board of Directors authorized a stock repurchase program to repurchase up to 2,500,000 shares of the Company's common stock.
