1.50% Convertible Senior Notes due 2017

The information in this pricing term sheet relates to Bottomline Technologies (de), Inc.'s offering (the Offering) of its 1.50% Convertible Senior Notes due 2017 and should be read together with the preliminary prospectus supplement dated December 5, 2012 relating to the Offering (the Preliminary Prospectus Supplement), including the documents incorporated by reference therein, and the base prospectus dated July 15, 2011, each filed pursuant to Rule 424(b) under the Securities Act of 1933, as amended, Registration Statement No. 333-175582. The Issuer has increased the size of the Offering to \$165.00 million (or \$189.75 million if the underwriters exercise their over-allotment option in full). The final prospectus supplement relating to the Offering will reflect conforming changes relating to such increase in the size of the Offering.

Securities Offered: 1.50% Convertible Senior Notes due 2017 (the Notes).

Maturity Date: December 1, 2017, unless earlier converted or repurchased.

Interest Payment Dates: June 1 and December 1 of each year, beginning on June 1, 2013.

Public Offering Price: 100% of the principal amount of the Notes.

NASDAQ Last Reported Sale Price on December 6, 2012: \$23.55 per share of the Issuer's common stock.

Conversion Premium: Approximately 27.50% above the NASDAQ Last Reported Sale Price on December 6, 2012.

Initial Conversion Rate: 33.3042 shares of the Issuer's common stock per \$1,000 principal amount of Notes.

Ranking: The Notes will be the Issuer's senior unsecured obligations and will rank:

senior in right of payment to any of the Issuer's future indebtedness that is expressly subordinated in right of payment to the Notes;

equal in right of payment with all of the Issuer's existing and future unsecured indebtedness that is not so subordinated;

effectively junior in right of payment to any of the Issuer's secured indebtedness to the extent of the value of the assets securing such indebtedness; and

structurally junior to all existing and future indebtedness and other liabilities (including trade payables) of the Issuer's subsidiaries.

Use of Proceeds:

The Issuer estimates that the proceeds from the Offering will be approximately \$159.8 million (or \$183.9 million if the underwriters exercise their option to purchase additional Notes in full to cover over-allotments), after deducting fees and estimated offering expenses payable by the Issuer.

The Issuer expects to enter into convertible note hedge transactions with one or more counterparties, one or more of which may be one of the underwriters or its respective affiliates (the option counterparties). The Issuer also intends to enter into warrant transactions with the option counterparties. The Issuer intends to use approximately \$14.3 million of the net proceeds from the Offering to pay the cost of the convertible note hedge transactions (after such cost is partially offset by the proceeds to the Issuer from the sale of the warrant transactions). The Issuer intends to use the remainder of the net proceeds from the Offering for general corporate purposes, which may include the acquisition of companies, businesses or assets, or working capital.

If the underwriters exercise their over-allotment option, the Issuer may sell additional warrants and use a portion of the net proceeds from the sale of the additional Notes, together with the proceeds from the additional warrants, to enter into additional convertible note hedge transactions and for general corporate purposes as described above.
