### SECTION 19(B) DISCLOSURE

March 31, 2014 (Unaudited)

Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund (each a Fund and collectively, the Funds), acting pursuant to a Securities and Exchange Commission (SEC) exemptive order and with the approval of each Funds Board of Trustees (the Board), have adopted a plan, consistent with each Funds investment objectives and policies to support a level distribution of income, capital gains and/or return of capital (the Plan). In accordance with the Plan, Clough Global Allocation Fund and Clough Global Equity Fund currently distribute \$0.105 per share on a monthly basis and Clough Global Opportunities Fund distributes \$0.095 per share on a monthly basis.

The fixed amount distributed per share is subject to change at the discretion of each Fund s Board. Under the Plan, each Fund will distribute all available investment income to its shareholders, consistent with each Fund s primary investment objectives and as required by the Internal Revenue Code of 1986, as amended (the Code). If sufficient investment income is not available on a monthly basis, each Fund will distribute long-term capital gains and/or return of capital to shareholders in order to maintain a level distribution. Each monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions and potential distribution rate increases or decreases to enable each Fund to comply with the distribution requirements imposed by the Code.

Shareholders should not draw any conclusions about each Fund s investment performance from the amount of these distributions or from the terms of the Plan. Each Fund s total return performance on net asset value is presented in its financial highlights table.

The Board may amend, suspend or terminate each Fund s Plan without prior notice if it deems such action to be in the best interest of either the Fund or its shareholders. The suspension or termination of the Plan could have the effect of creating a trading discount (if a Fund s stock is trading at or above net asset value) or widening an existing trading discount. Each Fund is subject to risks that could have an adverse impact on its ability to maintain level distributions. Examples of potential risks include, but are not limited to, economic downturns impacting the markets, increased market volatility, companies suspending or decreasing corporate dividend distributions and changes in the Code. Please refer to each Fund s prospectus for a more complete description of its risks.

Please refer to Additional Information for a cumulative summary of the Section 19(a) notices for each Fund s current fiscal period. Section 19(a) notices for each Fund, as applicable, are available on the Clough Global Closed-End Funds website www.cloughglobal.com.

Clough Global Funds

March 31, 2014 (Unaudited)

To Our Shareholders:

#### Clough Global Allocation Fund (GLV)

During the twelve-months ended March 31, 2014, the Clough Global Allocation Fund s total return, assuming reinvestment of all distributions, was 11.14% based on the net asset value and 11.12% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 21.86% and 17.17% respectively over the same period. The Fund paid \$1.515 per share in distributions during the year. As of March 31st, the Fund had a dividend distribution rate on the market price of 9.98%.

#### Clough Global Equity Fund (GLQ)

During the twelve-months ended March 31, 2014, the Clough Global Equity Fund s total return, assuming reinvestment of all distributions, was 13.57% based on the net asset value and 15.52% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 21.86% and 17.17% respectively over the same period. The Fund paid \$1.475 per share in distributions during the year. As of March 31st, the Fund had a dividend distribution rate on the market price of 9.57%.

#### Clough Global Opportunities Fund (GLO)

During the twelve-months ended March 31, 2014, the Clough Global Opportunities Fund s total return, assuming reinvestment of all distributions, was 11.26% based on the net asset value and 9.99% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 21.86% and 17.17% respectively over the same period. The Fund paid \$1.365 per share in distributions during the year. As of March 31st, the Fund had a dividend distribution rate on the market price of 10.71%.

Source: Federal Reserve Bank of St. Louis

I want to first draw your attention to the time series plotted above. M1 represents cash balances in the economy. It measures the amount of currency and securities (e.g., deposits) that can immediately be turned into currency in the economy. As you can see it has exploded in recent years and virtually all of it just sits there as stranded cash. Moreover, liquidity has become stranded around the world. While \$14 trillion in cash type assets sit on US household sector balance sheets, over \$9 trillion (US) sit in Japanese savings. Almost \$2.5 trillion in cash and near cash sit on US corporate balance sheets. What does it mean?

It certainly indicates liquidity per se is not a problem for the securities markets. Central banks have pumped over \$11 trillion into banking system reserves over the past three years. Federal Reserve Credit in the United States has risen at a 31% annual rate over the past six months and free reserves in the banking system now total \$2.5 trillion, and they are still growing. Many fear that money printing has become excessive and inflation pressures are building. But in order for that to happen those latent reserves have to be turned into bank credit. Yet, very little of that has happened; just like money balances in M1, the vast bulk of those central bank reserves have become stranded. Although a lot of reserves have been stuffed into a lot of banking systems, the world is not anything like 2007. Today, unlike then, the credit cycle is not well advanced, it is just emerging. Total bank credit in the US grew only 5.5% over the past three months at an annual rate and just 2.2% over the past year. And since the European Central Bank is being run like the old Japanese Central Bank, there are concerns Europe may actually fall into deflation.

So, banking system liquidity and bank capital are ample, at least in the US. It would be equity bullish if those cash balances eventually were processed through the financial system, and credit finally began to grow. That is why the Funds still hold a package of financial companies.

It would be far less positive for equities and the economy if balance sheet leverage is still too large, borrowing does not pick up, and those bank reserves remain just that. That would suggest it is difficult if not impossible to provide the credit for growth until a lot more debt is worked off.

In our view it is too early to make that judgment.

Excess liquidity has certainly had a dramatic effect on securities markets. The scramble for a shrinking yield supply has driven yield curves lower all over the world. In the US, the high yield market has become anything but and covenant light loans by both banks and the supposedly sophisticated capital markets have made their reappearance. We have seen an unseemly scramble to bid up the value of peripheral sovereign debt in Europe. Peripheral yields have not only fallen below the competitively rated securities of the core countries in Europe, but in a few instances actually have challenged US Treasury yields.

As you know, we try to position the Funds within specific strategies and cash flow has been the primary driver of our investment strategies for several years. The portfolios are about as diversified among industries as ever. We seek out companies which possess the competitive advantages, industry leadership and investment discipline that allow them to generate high free cash flow yields. We believe our managements are all good stewards of capital. We have coined the term—compounders—to capture the dynamic of the investment opportunities we see in owning these companies. We expect the values of our portfolios to grow and even with the overall market at higher levels, we can find numerous examples of such investments.

## Clough Global Funds

## Shareholder Letter

March 31, 2014 (Unaudited)

We are particularly interested in investing where cash flow generation combines with an industry tailwind which allows profit margins to expand. Here are a few examples of our industry focus.

(1) Homebuilding is one industry we have written about previously. New home inventories are the lowest in decades. New construction has fallen well behind underlying demand which is finally recovering as higher employment spurs household formations. To meet that demand new home construction would have to be 30 -50% higher in a few years. The major builders will likely capture a large portion of that as the collapse of 2008 has reduced the ability of independent builders to compete cost wise or in financing ability. We suspect the homebuilders will add to Fund performance as spring moves on.

More importantly the healing process in housing is likely to be a long drawn out affair, lasting years, and we suspect we will hold the stocks with that timing in mind. Home prices are rising (usually a sign of shortages), the industry has restored profitability and is generating cash, the larger builders are very competitive and are gaining share. Meanwhile bond yields seem to have hit a wall, at least for now and purchase mortgage applications are rising.

- (2) We think auto dealers will generate the highest profit margins along the auto manufacturing and distribution chain. More automobile manufacturing capacity exists in North America than in 2007 and that will limit profits from new auto sales. The dealer chains however capture higher margins as the new autos delivered since the cycle low in 2009 reach the five year point where they require parts and service. In addition the industry has become more professionally managed and benefits from the competitive moat established by state franchise laws.
- (3) The Funds are positioned for a coming decline in the spread between the price of oil and natural gas by investing in both gas producers and oil refiners. The ratio of standard oil to standard gas prices spiked from a normal 6:1 to as high as 45:1 at one point<sup>1</sup>. That may now be normalizing. Shale oil production in the US is rising at a rate of 10% per year while demand is flat to declining and oil inventories are building. Meanwhile an abnormally cold winter brought gas storage nearly 900 billion cubic feet below normal, far too low to allow replacement of normal shortage before winter. Meanwhile demand for gas will rise simply due to mandated coal to gas utility switching. Natural gas producers have to be price incentivized to hold storage ahead of winter 2015 and those able to increase production should also see higher prices. As US oil production creates surpluses in more geographies, US oil refiners should continue to benefit from the spread between US oil prices and Brent, the international oil price benchmark. By 2015 when US production is more than 2 million barrels higher, that spread could rise to \$30 40 from something closer to \$10 today.

A major strategy in the Funds is based on the improvement in the quality of the economy s credit structure. We also hold a handful of US bank equities, particularly those with capital market operations. Commercial and industrial loans rose 15.3% annualized over the past three months, indicating a corporate credit cycle is emerging.

While most of our financial holdings have done well, the largest holding in the Fund, Citigroup, has been a recent disappointment. Concerns have risen over the company s emerging market exposure and weakness in fixed income trading. A write down in its Mexican bank brought forth questions about the bank s controls, which are critical in such a far flung global enterprise. And then of course the bank failed the recent Fed exam which put off distributions to shareholders to at least 2015.

Citigroup has become one of the attractively priced bank stocks in the US. UBS just released an analysis which pointed out that Citi is being valued as if the investment banking division is worth one times 2015 earnings were market multiples to be assigned to its other operations. The company has \$42 billion of deferred tax assets (DTA). We can see \$6.00 of earning power in 2015 with any recovery in capital markets activity.

Source: Bloomberg, L.P. WTI Cushing Crude Oil Historical Price Chart compared to Henry Hub Gas Historical Price Chart May 2014. Bloomberg Database

What is the upside? Once capital requirements are met, banks like Citi could dividend out 45% or more of earnings or buy in the equivalent value in stock. As it is the stock sells at 75% of tangible book value and buying back stock below book adds shareholder value at a rapid rate. Now that Citi Holdings (the bad bank) has run off, the company is beginning to use the DTA. At one time Citi Holdings lost \$4 billion annually. It now is nearing profitability. Further runoff would lead to a \$2.8 billion reserves release. The bank already has the highest capital ratios among the big banks with \$18 - 19 billion of excess capital. And that excess capital is growing.

In recent weeks our financial holdings have declined in price but as the distribution rate curve steepens we think value in the sector will rise again.

Investing in Japan has been a Fund strategy for the better part of 18 months and while price deflation was the subject of a recent *Wall Street Journal* front page article, Japan is one economy winning that war. Its central bank has pledged to increase the size of its balance sheet until a 2% inflation rate is achieved. The economy s growth is outpacing capacity expansion so the output gap is closing and it is one of the few economies seeing upward price pressures. Since pricing and profitability historically are highly correlated we still think Japan s profit cycle could be stronger than anticipated. One emerging positive is the likelihood that Japan restarts some of its nuclear plants. That would reduce energy costs and improve real incomes. Just 8% of Japanese savings are in stocks versus one third in the US. In addition, Japan s Government Pension Investment Fund, the largest investment pension pool in the world, is being encouraged to shift from bonds to stocks at the margin. Specifically it is being advised to invest in a new index, the JPX-Nikkei 400, which is designed to measure the performance of Japan s high return on equity companies. Despite all this, Japan s broader Tokyo Stock Exchange Tokyo Price Index (TOPIX Index) is off 11% so far in 2014 and until Japanese equities begin to perform better we have reduced exposure.

## Clough Global Funds

So where does all this leave us?

Overall we think 2014 will deliver a different opportunity set than did 2013. Investment and merger and acquisition activity could make a dent in the large cash hoard on corporate balance sheets. The US capital stock is nearing 22 years of age and in many sectors is in need of upgrading. This is the reason we expect to see capital spending rise in the months ahead. This is also why we suspect profit margins are likely to remain high. At the same time industry restructuring is likely to continue to offer investment opportunity as the current merger battle in the US cable industry exemplifies.

Over time, our policy is to increase the annualized distribution rate based on the market price in line with the growth of retained net asset value.

If you have any questions about your investment, please call 1-877-256-8445.

Sincerely,

Charles I. Clough, Jr.

Past performance is no guarantee of future results.

The information in this letter represents the opinions of the individual Portfolio Managers and is not intended to be a forecast of future events, a guarantee of future results, or investment advice.

The Funds distribution policy will, under certain circumstances, have certain adverse consequences to the Fund and its shareholders because it may result in a return of capital resulting in less of a shareholder s assets being invested in the Fund and, over time, increase the Fund s expense ratio.

MSCI World Index A free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The index includes reinvestment of dividends, net of foreign withholding taxes.

S&P 500® Index Standard & Poor s composite index of 500 stocks, a widely recognized, unmanaged index of common stock prices.

JPX-Nikkei Index 400 Index is composed of 400 companies with a high appeal to investors, which meet specific requirements of the efficient use of capital and investor-focused management perspectives. The new index will promote the appeal of Japanese corporations domestically and abroad, while encouraging continued improvement of corporate value, thereby aiming to revitalize the Japanese stock market.

Tokyo Stock Exchange Tokyo Price Index Commonly known as TOPIX is an important stock market index for the Tokyo Stock Exchange (TSE) in Japan, tracking all domestic companies of the exchange s First Section. It is calculated and published by the TSE. There are approximately 1,700 companies listed on the First Section of the TSE.

It is not possible to invest directly in an index.

# Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Trustees of

Clough Global Allocation Fund,

Clough Global Equity Fund, and

Clough Global Opportunities Fund

We have audited the accompanying statements of assets and liabilities, including the statements of investments, of Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund (each a Fund, collectively the Funds), as of March 31, 2014, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the three years in the period then ended. These financial statements and financial highlights are the responsibility of the Funds management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights for the periods indicated prior to March 31, 2012, were audited by another independent registered public accounting firm whose report dated May 18, 2011, expressed unqualified opinions on those financial highlights.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of March 31, 2014, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers or counterparties were not received. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund as of March 31, 2014, the results of their operations and their cash flows for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the three years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

#### TOTAL SECURITIES SOLD SHORT

(Proceeds \$58,995,346) \$ (63,959,810)

- (a) Non-income producing security.
- (b) Pledged security; a portion or all of the security is pledged as collateral for written options, securities sold short or borrowings as of March 31, 2014. (See Note 1 and Note 6)
- (c) Loaned security; a portion or all of the security is on loan as of March 31, 2014.
- (d) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. As of March 31, 2014, these securities had a total value of \$8,615,259 or 4.71% of net assets.
- (e) Floating or variable rate security rate disclosed as of March 31, 2014.
- (f) This security has no contractual maturity date, is not redeemable and contractually pays an indefinite stream of interest.
- (g) Rate shown represents the bond equivalent yield to maturity at date of purchase.
- (h) Includes cash which is being held as collateral for total return swap contracts.
