Forward-Looking Statements

Statements contained in this filing and certain other written or oral statements made from time to time by the company and its representatives that are not historical facts are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements relate to current expectations regarding our future financial condition and results of operations and are often identified by the use of words and phrases such as anticipate, believe, continue, could, estimate, expect, intend, may, plan, predict, project, should, to, is expected to or will continue, or the negative of these terms or other comparable terminology. These forward-looking statements are based upon assumptions we believe are reasonable.

Forward-looking statements are based on current information and are subject to risks and uncertainties that could cause our actual results to differ materially from those projected. Certain factors that may cause actual results, performance, liquidity, and achievements to differ materially from those projected are discussed in this report and may include, but are not limited to:

unexpected changes in any of the following: (i) general economic and business conditions; (ii) the competitive setting in which we operate, including advertising or promotional strategies by us or our competitors, as well as changes in consumer demand; (iii) interest rates and other terms available to us on our borrowings; (iv) energy and raw materials costs and availability and hedging counter-party risks; (v) relationships with or increased costs related to our employees and third party service providers; and (vi) laws and regulations (including environmental and health-related issues), accounting standards or tax rates in the markets in which we operate;

the loss or financial instability of any significant customer(s);

changes in consumer behavior, trends and preferences, including health and whole grain trends, and the movement toward more inexpensive store-branded products;

the level of success we achieve in developing and introducing new products and entering new markets;

our ability to implement new technology and customer requirements as required;

our ability to operate existing, and any new, manufacturing lines according to schedule;

our ability to execute our business strategy, which may involve integration of recent acquisitions or the acquisition or disposition of assets at presently targeted values;

consolidation within the baking industry and related industries;

changes in pricing, customer and consumer reaction to pricing actions, and the pricing environment among competitors within the industry;

disruptions in our direct-store-delivery distribution system, including litigation or an adverse ruling by a court or regulatory or governmental body that could affect the independent contractor classifications of our independent distributors;

increases in employee and employee-related costs, including funding of pension plans;

the credit and business risks associated with independent distributors and our customers, which operate in the highly competitive retail food and foodservice industries;

any business disruptions due to political instability, armed hostilities, incidents of terrorism, natural disasters, technological breakdowns, product contamination or the responses to or repercussions from any of these or similar events or conditions and our ability to insure against such events;

the failure of our information technology systems to perform adequately, including any interruptions, intrusions or security breaches of such systems; and

regulation and legislation related to climate change that could affect our ability to procure our commodity needs or that necessitate additional unplanned capital expenditures.

The foregoing list of important factors does not include all such factors, nor necessarily present them in order of importance. In addition, you should consult other disclosures made by the company (such as in our other filings with the Securities and Exchange Commission (SEC) or in company press releases) for other factors that may cause actual results to differ materially from those projected by the company. Refer to Part I, Item 1A., *Risk Factors*, of our Annual Report on Form 10-K for the year ended January 3, 2015 for additional information regarding factors that could affect the company's results of operations, financial condition and liquidity.

We caution you not to place undue reliance on forward-looking statements, as they speak only as of the date made and are inherently uncertain. The company undertakes no obligation to publicly revise or update such statements, except as required by law. You are advised, however, to consult any further public disclosures by the company (such as in our filings with the SEC or in company press releases) on related subjects.

We own or have rights to trademarks or trade names that we use in connection with the operation of our business, including our corporate names, logos and website names. In addition, we own or have the rights to copyrights, trade secrets and other proprietary rights that protect the content of our products and the formulations for such products. Solely for convenience, some of the trademarks, trade names and copyrights referred to in this Form 10-Q are listed without the ©, ® and symbols, but we will assert, to the fullest extent under applicable law, our rights to our trademarks, trade names and copyrights.

Table of Contents**FLOWERS FOODS, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****1. BASIS OF PRESENTATION**

INTERIM FINANCIAL STATEMENTS The accompanying unaudited Condensed Consolidated Financial Statements of Flowers Foods, Inc. (the company , Flowers Foods , Flowers , us , we , or our) have been prepared by company s management in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and applicable rules and regulations of the Securities Exchange Act of 1934, as amended. Accordingly, they do not include all of the information and footnotes required by GAAP for audited financial statements. In the opinion of management, the unaudited Condensed Consolidated Financial Statements included herein contain all adjustments (consisting of normal recurring adjustments) necessary to state fairly the company s financial position, the results of its operations and its cash flows. The results of operations for the sixteen week periods ended April 25, 2015 are not necessarily indicative of the results to be expected for a full year. The balance sheet at January 3, 2015 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the company s Annual Report on Form 10-K for the fiscal year ended January 3, 2015.

ESTIMATES The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The company believes the following critical accounting estimates affect its more significant judgments and estimates used in the preparation of its consolidated financial statements: revenue recognition, derivative instruments, valuation of long-lived assets, goodwill and other intangibles, self-insurance reserves, income tax expense and accruals and pension obligations. These estimates are summarized in the company s Annual Report on Form 10-K for the fiscal year ended January 3, 2015.

REPORTING PERIODS The company operates on a 52-53 week fiscal year ending the Saturday nearest December 31. Fiscal 2015 consists of 52 weeks, with the company s quarterly reporting periods as follows: first quarter ended April 25, 2015 (sixteen weeks), second quarter ending July 18, 2015 (twelve weeks), third quarter ending October 10, 2015 (twelve weeks) and fourth quarter ending January 2, 2016 (twelve weeks).

SEGMENTS Flowers Foods currently operates two business segments: a direct-store-delivery (DSD) segment (DSD Segment) and a warehouse delivery segment (Warehouse Segment). The DSD Segment (84% of total sales) currently operates 38 bakeries that market a wide variety of fresh bakery foods, including fresh breads, buns, rolls, tortillas, and snack cakes. These products are sold through a DSD route delivery system to retail and foodservice customers throughout the Northeast, South, Southern Midwest, Southwest, and California. The Warehouse Segment (16% of total sales) operates eight bakeries that produce snack cakes, breads and rolls for national retail, foodservice, vending, and co-pack customers, which are delivered through customers warehouse channels and one bakery mix plant.

SIGNIFICANT CUSTOMER Our largest customer s, Wal-Mart/Sam s Club, percent of sales for the sixteen weeks ended April 25, 2015 and April 19, 2014 were as follows.

For the Sixteen Weeks Ended

	April 25, 2015	April 19, 2014
	(Percent of Sales)	
DSD Segment	16.8%	16.7%
Warehouse Segment	2.6	2.9
Total	19.4%	19.6%

Wal-Mart/Sam's Club is our only customer with a balance greater than 10% of outstanding trade receivables. Their percentage of trade receivables were 16.1% and 17.2%, on a consolidated basis, as of April 25, 2015 and January 3, 2015, respectively. No other customer accounted for 10% or more of the company's outstanding trade receivables.

SIGNIFICANT ACCOUNTING POLICIES There were no significant changes to our critical accounting policies for the quarter ended April 25, 2015 from those disclosed in the company's Annual Report on Form 10-K for the fiscal year ended January 3, 2015.

Table of Contents**2. ACCOUNTING PRONOUNCEMENTS NOT YET ADOPTED**

In May 2014, the FASB issued guidance for recognizing revenue in contracts with customers. This guidance requires entities to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. There are five steps outlined in the guidance to achieve this core principle. The company is still analyzing the potential impact of this guidance on the company's Condensed Consolidated Financial Statements. This guidance will be effective for our fiscal 2017, which begins on January 1, 2017.

In June 2014, the FASB issued guidance that requires performance targets for a share-based payment award that affects vesting and that could be achieved after the requisite service period is treated as a performance condition. The performance condition should not be reflected in the grant date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period for which the requisite service has already been rendered. The company already applies the standards proscribed in this guidance therefore it will not have an impact on the Condensed Consolidated Financial Statements. This guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015, which is our fiscal 2016.

In August 2014, the FASB issued guidance related to management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards and to provide related footnote disclosures. This guidance is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. The requirements of this guidance are not expected to have a significant impact on the Condensed Consolidated Financial Statements.

In January 2015, the FASB issued guidance that eliminates the concept of extraordinary items from GAAP. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The requirements of this guidance are not expected to have a significant impact on the Condensed Consolidated Financial Statements.

In February 2015, the FASB issued guidance that focuses on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments using a modified retrospective approach by recording a cumulative-effect adjustment to equity as of the beginning of the fiscal year of adoption. A reporting entity also may apply the amendments retrospectively. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. The company is still analyzing the potential impact of this guidance on the company's Condensed Consolidated Financial Statements.

In April 2015, the FASB issued guidance to simplify the presentation of debt issuance costs. This guidance requires that debt issuance costs related to a recognized debt liability be present in the balance sheet as a direct reduction from the carrying amount of that debt liability, consistent with debt discount presentation. This guidance is effective for financial statements for fiscal years beginning after December 15, 2015, and interim periods within those years. This guidance is applied on a retrospective basis at adoption and the disclosures for a change in an accounting principle apply. Earlier application is permitted. The requirements for this guidance are not expected to have a significant

impact on the Condensed Consolidated Financial Statements.

In April 2015, the FASB issued guidance to provide a practical expedient permitting applicable entities to measure defined benefit plan assets and obligations using the month-end that is closest to the entity's fiscal year-end and apply that practical expedient consistently from year to year. This guidance is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Earlier application is permitted. The company is still analyzing the potential impact of this guidance on the company's Condensed Consolidated Financial Statements.

In April 2015, the FASB issued guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. This guidance is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Earlier application is permitted. The company is still analyzing the potential impact of this guidance on the company's Condensed Consolidated Financial Statements.

We have reviewed other recently issued accounting pronouncements and concluded that they are either not applicable to our business or that no material effect is expected as a result of future adoption.

Table of Contents**3. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)**

The company's total comprehensive income presently consists of net income, adjustments for our derivative financial instruments accounted for as cash flow hedges, and various pension and other postretirement benefit related items.

During the sixteen weeks ended April 25, 2015 and April 19, 2014, reclassifications out of accumulated other comprehensive loss were as follows (amounts in thousands):

Details about accumulated other comprehensive income components (Note 2)	For the Sixteen Weeks Ended		Affected Line Item in the Statement Where Net Income is Presented
	April 25, 2015	April 19, 2014	
	Amount reclassified from Accumulated Other Comprehensive Loss	Amount reclassified from Accumulated Other Comprehensive Loss	
Gains and losses on cash flow hedges:			
Interest rate contracts	\$ (77)	\$ (77)	Interest income (expense)
Commodity contracts	(2,504)	(4,917)	Cost of sales, Note 3, below
Total before tax	\$ (2,581)	\$ (4,994)	Total before tax
Tax (expense) or benefit	994	1,923	Tax (expense) or benefit
Total net of tax	\$ (1,587)	\$ (3,071)	Net of tax
Amortization of defined benefit pension items:			
Prior-service credits	\$ 144	\$ 144	Note 1, below
Actuarial losses	(1,352)	(414)	Note 1, below
Total before tax	\$ (1,208)	\$ (270)	Total before tax
Tax (expense) or benefit	465	104	Tax (expense) or benefit
Total net of tax	\$ (743)	\$ (166)	Net of tax
Total reclassifications	\$ (2,330)	\$ (3,237)	Net of tax

Note 1: These items are included in the computation of net periodic pension cost. See Note 13, *Postretirement Plans*, for additional information.

Note 2: Amounts in parentheses indicate debits to determine net income.

Note 3: Amounts are presented as an adjustment to reconcile net income to net cash provided by operating activities on the Condensed Consolidated Statements of Cash Flows.

During the sixteen weeks ended April 25, 2015, changes to accumulated other comprehensive loss, net of income tax, by component were as follows (amounts in thousands):

	Defined Benefit		
	Gains/Losses on Pension Plan		
	Cash Flow Hedges	Items	Total
Accumulated other comprehensive loss, January 3, 2015	\$ (11,408)	\$ (86,612)	\$ (98,020)
Other comprehensive income before reclassifications	(4,428)		(4,428)
Reclassified to earnings from accumulated other comprehensive income	1,587	743	2,330
Accumulated other comprehensive loss, April 25, 2015	\$ (14,249)	\$ (85,869)	\$ (100,118)

During the sixteen weeks ended April 19, 2014, changes to accumulated other comprehensive loss, net of income tax, by component were as follows (amounts in thousands):

	Defined Benefit		
	Gains/Losses on Pension Plan		
	Cash Flow Hedges	Items	Total
Accumulated other comprehensive (loss), December 28, 2013	\$ (11,416)	\$ (51,099)	\$ (62,515)
Other comprehensive income before reclassifications	15,302		15,302
Reclassified to earnings from accumulated other comprehensive income (loss)	3,071	166	3,237
Accumulated other comprehensive income (loss), April 19, 2014	\$ 6,957	\$ (50,933)	\$ (43,976)

Table of Contents

Amounts reclassified out of accumulated other comprehensive loss to net income that relate to commodity contracts are presented as an adjustment to reconcile net income to net cash provided by operating activities on the Condensed Consolidated Statements of Cash Flows. The following table presents the net of tax amount of the gain or loss reclassified from accumulated other comprehensive income (AOCI) for our commodity contracts (amounts in thousands):

	April 25, 2015	April 19, 2014
Gross (gain) loss reclassified from AOCI into income	\$ 2,504	\$ 4,917
Tax (benefit) expense	(964)	(1,893)
Net of tax	\$ 1,540	\$ 3,024

4. FINANCIAL STATEMENT REVISIONS

During the fourth quarter of fiscal 2014, we revised net sales. Historically, certain immaterial discounts had been recorded as an expense to selling, distribution and administrative costs. These discounts are now recorded as contra revenue. These revisions have been made for all periods presented in our Annual Report on Form 10-K for the fiscal year ended January 3, 2015. We concluded that these revisions were immaterial to our fiscal 2013 and 2012 financial statements and each of the quarterly periods in fiscal years 2014, 2013, and 2012. This revision impacted the DSD Segment.

Our financial statements have been revised to correctly report the discounts by decreasing sales and decreasing selling, distribution and administrative expenses by the amount of the discounts in the respective periods presented. There are no impacts to our Consolidated Balance Sheets, Consolidated Statements of Changes in Stockholders' Equity, or Consolidated Statements of Cash Flows for any prior periods. Additionally, the correction did not impact our previously reported income from operations, net income or earnings per share.

The table below presents the revisions to the applicable financial statement line items for the sixteen weeks ended April 19, 2014 (amounts in thousands):

Impacted Financial Statement line item	Consolidated		
	Sixteen Weeks Ended April 19, 2014		
	As Previously Reported	Revisions	As Revised
Sales	\$ 1,159,760	\$ (5,843)	\$ 1,153,917
Selling, distribution and administrative expense	\$ 426,390	\$ (5,843)	\$ 420,547

Impacted Financial Statement line item	DSD Segment		
	Sixteen Weeks Ended April 19, 2014		
	As Previously Reported	Revisions	As Revised
Sales	\$ 968,965	\$ (5,843)	\$ 963,122

Edgar Filing: FLOWERS FOODS INC - Form 10-Q

Selling, distribution and administrative expense	\$ 384,488	\$ (5,843)	\$ 378,645
--	------------	------------	------------

Table of Contents**5. GOODWILL AND OTHER INTANGIBLES**

The table below summarizes our goodwill and other intangible assets at April 25, 2015 and January 3, 2015, respectively, each of which is explained in additional detail below (amounts in thousands):

	April 25, 2015	January 3, 2015
Goodwill	\$ 282,960	\$ 282,960
Amortizable intangible assets, net of amortization	191,394	189,969
Indefinite-lived intangible assets	455,000	455,000
 Total goodwill and other intangible assets	 \$ 929,354	 \$ 927,929

On February 25, 2015, we announced that we acquired the *Roman Meal* trademark for breads and buns in the United States and its territories, and in Mexico, Canada, Bermuda, and the Bahamas from the Roman Meal Company in Tacoma, Washington for \$5.0 million. This trademark acquisition is being accounted for as an asset purchase and is being amortized over a twenty year estimated useful life.

As of April 25, 2015 and January 3, 2015, the company had the following amounts related to amortizable intangible assets (amounts in thousands):

Asset	April 25, 2015			January 3, 2015		
	Cost	Accumulated Amortization	Net Value	Cost	Accumulated Amortization	Net Value
Trademarks	\$ 76,727	\$ 14,947	\$ 61,780	\$ 71,727	\$ 14,152	\$ 57,575
Customer relationships	169,921	43,611	126,310	169,921	41,099	128,822
Non-compete agreements	4,274	3,535	739	4,274	3,351	923
Distributor relationships	4,123	1,558	2,565	4,123	1,474	2,649
Supplier agreements	1,050	1,050		1,050	1,050	
 Total	 \$ 256,095	 \$ 64,701	 \$ 191,394	 \$ 251,095	 \$ 61,126	 \$ 189,969

Aggregate amortization expense for the sixteen weeks ending April 25, 2015 and April 19, 2014 was \$3.6 million.

There are \$455.0 million of indefinite-lived intangible assets at April 25, 2015 and January 3, 2015. These intangible assets are not being amortized and are separately identified from goodwill. These trademarks are classified as indefinite-lived because they are well established brands, many older than forty years old with a long history and well defined markets. In addition, we are continuing to use these brands both in their original markets and throughout our expansion territories. We believe these factors support an indefinite-life assignment with an annual impairment analysis to determine if the trademarks are realizing the expected economic benefits.

Estimated amortization of intangibles for each of the next five years is as follows (amounts in thousands):

	Amortization of Intangibles
Remainder of 2015	\$ 8,119
2016	\$ 11,302
2017	\$ 10,830
2018	\$ 10,682
2019	\$ 10,553

Table of Contents**6. FAIR VALUE OF FINANCIAL INSTRUMENTS**

The carrying value of cash and cash equivalents, accounts receivable and short-term debt approximates fair value because of the short-term maturity of the instruments. Notes receivable are entered into in connection with the purchase of distributors territories by independent distributors. These notes receivable are recorded in the consolidated balance sheet at carrying value, which represents the closest approximation of fair value. In accordance with GAAP, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As a result, the appropriate interest rate that should be used to estimate the fair value of the distributor notes is the prevailing market rate at which similar loans would be made to distributors with similar credit ratings and for the same maturities. However, the company finances approximately 3,720 independent distributors all with varied financial histories and credit risks. Considering the diversity of credit risks among the independent distributors, the company has no method to accurately determine a market interest rate to apply to the notes. The territories are generally financed for up to ten years and the distributor notes are collateralized by the independent distributors territories. The company maintains a wholly-owned subsidiary to assist in financing route purchase activities if requested by new independent sales distributors, using the route and certain associated assets as collateral. These notes receivable earn interest at a fixed rate.

At April 25, 2015 and January 3, 2015, respectively, the carrying value of the distributor notes was as follows (amounts in thousands):

	April 25, 2015	January 3, 2015
Distributor notes receivable	\$ 184,696	\$ 182,188
Current portion of distributor notes receivable recorded in accounts and notes receivable, net	20,416	20,283
Long-term portion of distributor notes receivable	\$ 164,280	\$ 161,905

At April 25, 2015 and January 3, 2015, the company has evaluated the collectability of the distributor notes and determined that a reserve is not necessary. Payments on these distributor notes are collected by the company weekly in conjunction with the distributor settlement process.

During the sixteen weeks ended April 25, 2015 and April 19, 2014, \$6.8 million and \$6.0 million, respectively, were recorded as interest income relating to the distributor notes.

The fair value of the company's variable rate debt at April 25, 2015 approximates the recorded value. The fair value of the company's ten-year 4.375% senior notes (the notes) issued on April 3, 2012 is approximately \$429.3 million while the carrying value is \$399.3 million, as discussed in Note 8, *Debt and Other Obligations*, on April 25, 2015. The fair value of the notes is estimated using yields obtained from independent pricing sources for similar types of borrowing arrangements and is considered a Level 2 valuation.

For fair value disclosure information about our derivative assets and liabilities see Note 7, *Derivative Financial Instruments*. For fair value disclosure information about our pension plan net assets see Note 13, *Postretirement Plans*.

Table of Contents**7. DERIVATIVE FINANCIAL INSTRUMENTS**

The company measures the fair value of its derivative portfolio using the fair value as the price that would be received to sell an asset or paid to transfer a liability in the principal market for that asset or liability. These measurements are classified into a hierarchy by the inputs used to perform the fair value calculation as follows:

Level 1: Fair value based on unadjusted quoted prices for identical assets or liabilities in active markets

Level 2: Modeled fair value with model inputs that are all observable market values

Level 3: Modeled fair value with at least one model input that is not an observable market value

Commodity Price Risk

The company enters into commodity derivatives, designated as cash-flow hedges of existing or future exposure to changes in commodity prices. The company's primary raw materials are flour, sweeteners, and shortening, along with pulp, paper, and petroleum-based packaging products. Natural gas, which is used as oven fuel, is also an important commodity used for production.

As of April 25, 2015, the company's hedge portfolio contained commodity derivatives with a net fair value of \$(20.9) million, which is recorded in the following accounts with fair values measured as indicated (amounts in millions):

	Level 1	Level 2	Level 3	Total
Liabilities:				
Other current	\$ (14.9)	\$ (2.3)	\$	\$ (17.2)
Other long-term	(2.0)	(1.7)		(3.7)
Total	(16.9)	(4.0)		(20.9)
Net Fair Value	\$ (16.9)	\$ (4.0)	\$	\$ (20.9)

The positions held in the portfolio are used to hedge economic exposure to changes in various raw material prices and effectively fix the price, or limit increases in prices, for a period of time extending primarily into fiscal 2016. These instruments are designated as cash-flow hedges. The effective portion of changes in fair value for these derivatives is recorded each period in other comprehensive income (loss), and any ineffective portion of the change in fair value is recorded to current period earnings in selling, distribution and administrative expenses. All of the company-held commodity derivatives at April 25, 2015 and January 3, 2015 qualified for hedge accounting.

Interest Rate Risk

The company entered into a treasury rate lock on March 28, 2012 to fix the interest rate for the company's notes issued on April 3, 2012. The derivative position was closed when the debt was priced on March 29, 2012 with a cash settlement that offset changes in the benchmark treasury rate between the execution of the treasury rate lock and the debt pricing date. This treasury rate lock was designated as a cash flow hedge and the cash settlement was \$3.1 million, of which \$0.6 million was recognized after debt issuance and \$2.5 million (\$1.5 million, net of tax) is being amortized to interest expense over the term of the notes.

Derivative Assets and Liabilities

The company had the following derivative instruments recorded on the Condensed Consolidated Balance Sheet, all of which are utilized for the risk management purposes detailed above (amounts in thousands):

Derivatives designated as hedging instruments	Derivative Assets				Derivative Liabilities			
	April 25, 2015		January 3, 2015		April 25, 2015		January 3, 2015	
	Balance Sheet location	Fair Value	Balance Sheet location	Fair Value	Balance Sheet location	Fair Value	Balance Sheet location	Fair Value
Commodity contracts	Other current assets		Other current assets		Other current liabilities	17,233	Other current liabilities	12,898
Commodity contracts	Other long term assets		Other long term assets		Other long term liabilities	3,714	Other long term liabilities	3,355
Total		\$		\$		\$ 20,947		\$ 16,253

Table of Contents***Derivative Accumulated Other Comprehensive Income (AOCI) Transactions***

The following tables show the effect of the company's derivative instruments designated as cash-flow hedges in other comprehensive income (loss) (OCI) and the Condensed consolidated income statement (amounts in thousands and net of tax):

Derivatives designated as hedging instruments	Amount of Gain or (Loss) Recognized in OCI on Derivative (Effective Portion)(Net of tax) For the sixteen weeks ended		Location of (Gain) or Loss Reclassified from AOCI into Income (Effective Portion)	Amount of (Gain) or Loss Reclassified from Accumulated OCI into Income (Effective Portion)(Net of tax) For the sixteen weeks ended	
	April 25, 2015	April 19, 2014		April 25, 2015	April 19, 2014
	Interest rate contracts	\$		\$	Interest expense
Commodity contracts	(4,428)	15,302	Production costs(1)	1,540	3,024
Total	\$ (4,428)	\$ 15,302		\$ 1,587	\$ 3,071

(1) Included in Materials, supplies, labor and other production costs (exclusive of depreciation and amortization shown separately).

The balance in accumulated other comprehensive loss (income) related to commodity price risk and interest rate risk derivative transactions that are closed or will expire in the next three years are as follows (amounts in millions and net of tax) at April 25, 2015:

	Commodity price risk derivatives	Interest rate risk derivatives	Totals
Closed contracts	\$ 0.3	\$ 1.1	\$ 1.4
Expiring in 2015	10.2		10.2
Expiring in 2016	2.7		2.7
Total	\$ 13.2	\$ 1.1	\$ 14.3

Derivative Transactions Notional Amounts

As of April 25, 2015, the company had the following outstanding financial contracts that were entered into to hedge commodity and interest rate risk:

Derivatives in Cash Flow Hedge Relationships	Notional amount (millions)	
Wheat contracts	\$	90.8
Soybean oil contracts		25.2
Natural gas contracts		13.5
Total	\$	129.5

The company's derivative instruments contain no credit-risk-related contingent features at April 25, 2015. As of April 25, 2015 and January 3, 2015, the company had \$19.8 million and \$16.1 million, respectively, in other current assets representing collateral for hedged positions.

Table of Contents**8. DEBT AND OTHER OBLIGATIONS**

Long-term debt and capital leases consisted of the following at April 25, 2015 and January 3, 2015 (amounts in thousands):

	April 25, 2015	January 3, 2015
Unsecured credit facility	\$ 3,800	\$ 53,000
Unsecured new term loan	262,500	270,000
4.375% senior notes due 2022	399,334	399,304
Accounts receivable securitization		
Capital lease obligations	21,453	22,526
Other notes payable	18,723	18,606
	705,810	763,436
Current maturities of long-term debt and capital lease obligations	34,471	34,496
Total long-term debt and capital lease obligations	\$ 671,339	\$ 728,940

Bank overdrafts occur when checks have been issued but have not been presented to the bank for payment. Certain of our banks allow us to delay funding of issued checks until the checks are presented for payment. The delay in funding results in a temporary source of financing from the bank. The activity related to bank overdrafts is shown as a financing activity in our Condensed Consolidated Statements of Cash Flows. Bank overdrafts are included in other current liabilities on our Condensed Consolidated Balance Sheets. As of April 25, 2015 and January 3, 2015, the bank overdraft balance was \$11.6 million and \$15.7 million, respectively.

The company also had standby letters of credit (LOCs) outstanding of \$16.2 million and \$16.4 million at April 25, 2015 and January 3, 2015, respectively, which reduce the availability of funds under the credit facility. The outstanding LOCs are for the benefit of certain insurance companies and lessors. None of the LOCs are recorded as a liability on the Condensed Consolidated Balance Sheet.

Accounts Receivable Securitization Facility, New Term Loan, Senior Notes, and Credit Facility

Accounts Receivable Securitization Facility. On July 17, 2013, the company entered into an accounts receivable securitization facility (the facility). On August 7, 2014, the company entered into the first amendment under the facility. The amendment (i) increased the revolving commitments under the facility to \$200.0 million from \$150.0 million, (ii) extended the term one year to July 17, 2016, and (iii) made certain other conforming changes. On December 17, 2014, the company executed the second amendment under the facility to add a bank to the lending group. The original commitment amount was split between the original lender and the new lender in the proportion of 62.5% for the original lender and 37.5% for the new lender. This modification, which was accounted for as an extinguishment of the debt, resulted in a charge of \$0.1 million, or 37.5%, of the unamortized financing costs. Under the facility, a wholly-owned, bankruptcy-remote subsidiary purchases, on an ongoing basis, substantially all trade receivables. As borrowings are made under the facility, the subsidiary pledges the receivables as collateral. In the event of liquidation of the subsidiary, its creditors would be entitled to satisfy their claims from the subsidiary's pledged receivables prior to distributions of collections to the company. We include the subsidiary in our Condensed

Consolidated Financial Statements. The facility contains certain customary representations and warranties, affirmative and negative covenants, and events of default. There were no amounts outstanding as of April 25, 2015 and January 3, 2015, respectively, under the facility. As of April 25, 2015, the company was in compliance with all restrictive covenants under the facility. On April 25, 2015, the company had \$200.0 million available under its facility for working capital and general corporate purposes.

Optional principal repayments may be made at any time without premium or penalty. Interest is due two days after our reporting periods end in arrears on the outstanding borrowings and is computed as the cost of funds rate plus an applicable margin of 70 basis points. An unused fee of 25 basis points is applicable on the unused commitment at each reporting period. The company paid financing costs of \$0.8 million in connection with the facility at the time we entered into the facility, which are being amortized over the life of the facility. During fiscal 2014, we incurred \$0.2 million in financing costs with the first and second amendments. An additional \$0.1 million in financing costs was paid during the first quarter of fiscal 2015 for the December 17, 2014 amendment.

New Term Loan. We entered into a senior unsecured delayed-draw term facility (the new term loan) on April 5, 2013 with a commitment of up to \$300.0 million. The company drew down the full amount of the new term loan on July 18, 2013 (the borrowing date). On February 14, 2014, we entered into the first amendment to the credit agreement for the new term loan.

Table of Contents

The new term loan amortizes in quarterly installments based on an increasing annual percentage. The first payment was due and payable on June 30, 2013 (the last business day of the first calendar quarter ending after the borrowing date), quarterly payments are due on the last business day of each successive calendar quarter and all remaining outstanding principal is due and payable on the fifth anniversary of the borrowing date. The table below presents the principal payment amounts remaining under the new term loan as of April 25, 2015 (amounts in thousands):

Fiscal Year	Payments
2015	\$ 22,500
2016	\$ 67,500
2017	\$ 112,500
2018	\$ 60,000

The February 14, 2014 amendment, which was accounted for as a modification of the debt, favorably reduced the interest rates described below from those entered into originally on April 5, 2013. Voluntary prepayments on the new term loan may be made without premium or penalty. Interest is due quarterly in arrears on any outstanding borrowings at a customary Eurodollar rate or the base rate plus applicable margin. The applicable margin ranges from 0.00% to 1.25% for base rate loans and from 1.00% to 2.25% for Eurodollar loans, and is based on the company's leverage ratio. Interest on base rate loans is payable quarterly in arrears on the last business day of each calendar quarter. Interest on Eurodollar loans is payable in arrears at the end of the interest period and every three months in the case of interest periods in excess of three months. The company paid financing costs of \$1.7 million in connection with the new term loan, which are being amortized over the life of the new term loan. A commitment fee of 20 basis points on the daily undrawn portion of the lenders' commitments commenced on May 1, 2013 and continued until the borrowing date, when the company borrowed the available \$300.0 million for the acquisition of certain Hostess Brands, Inc. bread assets. The new term loan is subject to customary restrictive covenants, including certain limitations on liens and significant acquisitions and financial covenants regarding minimum interest coverage ratio and maximum leverage ratio. The February 14, 2014 amendment cost \$0.3 million and is being amortized over the remaining term. As of April 25, 2015 and January 3, 2015, the company was in compliance with all restrictive covenants under the new term loan.

Senior Notes. On April 3, 2012, the company issued \$400.0 million of senior notes. The company pays semiannual interest on the notes on each April 1 and October 1, beginning on October 1, 2012, and the notes will mature on April 1, 2022. The notes bear interest at 4.375% per annum. On any date prior to January 1, 2022, the company may redeem some or all of the notes at a price equal to the greater of (1) 100% of the principal amount of the notes redeemed and (2) a make-whole amount plus, in each case, accrued and unpaid interest. The make-whole amount is equal to the sum of the present values of the remaining scheduled payments of principal thereof (not including any interest accrued thereon to, but not including, the date of redemption), discounted to the date of redemption on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the treasury rate (as defined in the agreement), plus 35 basis points, plus in each case, unpaid interest accrued thereon to, but not including, the date of redemption. At any time on or after January 1, 2022, the company may redeem some or all of the notes at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest. If the company experiences a change of control triggering event (which involves a change of control of the company and related rating of the notes below investment grade), it is required to offer to purchase the notes at a purchase price equal to 101% of the principal amount, plus accrued and unpaid interest thereon unless the company exercised its option to redeem the notes in whole. The notes are also subject to customary restrictive covenants, including certain limitations on liens and sale and leaseback transactions.

The face value of the notes is \$400.0 million and the current discount on the notes is \$0.7 million. The company paid issuance costs (including underwriting fees and legal fees) for issuing the notes of \$3.9 million. The issuance costs and the debt discount are being amortized to interest expense over the term of the notes. As of April 25, 2015 and January 3, 2015, the company was in compliance with all restrictive covenants under the notes.

Credit Facility. On April 21, 2015, the company amended its senior unsecured credit facility (the credit facility) to extend the term to April 21, 2020, reduce the applicable margin on base rate and Eurodollar loans and reduce the facility fees as described below. The amendment was accounted for as a modification of the debt. The credit facility is a five-year, \$500.0 million senior unsecured revolving loan facility. The credit facility contains a provision that permits Flowers to request up to \$200.0 million in additional revolving commitments, for a total of up to \$700.0 million, subject to the satisfaction of certain conditions. Proceeds from the credit facility may be used for working capital and general corporate purposes, including capital expenditures, acquisition financing, refinancing of indebtedness, dividends and share repurchases. The credit facility includes certain customary restrictions, which, among other things, require maintenance of financial covenants and limit encumbrance of assets and creation of indebtedness. Restrictive financial covenants include such ratios as a minimum interest coverage ratio and a maximum leverage ratio. The company believes that, given its current cash position, its cash flow from operating activities and its available credit capacity, it can comply with the current terms of the amended credit facility and can meet presently foreseeable financial requirements. As of April 25, 2015 and January 3, 2015, the company was in compliance with all restrictive covenants under the credit facility.

Interest is due quarterly in arrears on any outstanding borrowings at a customary Eurodollar rate or the base rate plus applicable margin. The underlying rate is defined as rates offered in the interbank Eurodollar market, or the higher of the prime lending rate or the federal funds rate plus 0.50%, with a floor rate defined by the one-month interbank Eurodollar market rate plus 1.00%. The applicable margin ranges from 0.0% to 0.50% for base rate loans and from 0.70% to 1.50% for Eurodollar loans. In addition, a facility

Table of Contents

fee ranging from 0.05% to 0.25% is due quarterly on all commitments under the credit facility. Both the interest margin and the facility fee are based on the company's leverage ratio. The company paid additional financing costs of \$0.4 million in connection with the April 21, 2015 amendment of the credit facility, which, in addition to the remaining balance of the original \$1.3 million in financing costs, is being amortized over the life of the credit facility. The company recognized \$0.1 million in financing costs for the modification at the time of the April 21, 2015 amendment.

There were \$3.8 million and \$53.0 million in outstanding borrowings under the credit facility at April 25, 2015 and January 3, 2015, respectively. The highest outstanding daily balance during the sixteen weeks ended April 25, 2015 was \$59.5 million and the lowest outstanding balance was zero. Amounts outstanding under the credit facility vary daily. Changes in the gross borrowings and repayments can be caused by cash flow activity from operations, capital expenditures, acquisitions, dividends, share repurchases, and tax payments, as well as derivative transactions which are part of the company's overall risk management strategy as discussed in Note 7, *Derivative Financial Instruments*. During the sixteen weeks ended April 25, 2015, the company borrowed \$309.2 million in revolving borrowings under the credit facility and repaid \$358.4 million in revolving borrowings. The amount available under the credit facility is reduced by \$16.2 million for letters of credit. On April 25, 2015, the company had \$480.0 million available under its credit facility for working capital and general corporate purposes.

Credit Ratings. Currently, the company's credit ratings by Fitch Ratings, Moody's Investors Service, and Standard & Poor's are BBB, Baa2, and BBB-, respectively. Changes in the company's credit ratings do not trigger a change in the company's available borrowings or costs under the facility, new term loan, senior notes, and credit facility, but could affect future credit availability and cost.

Assets recorded under capital lease agreements included in property, plant and equipment consist of machinery and equipment and transportation equipment.

Aggregate maturities of debt outstanding, including capital leases and the associated interest, as of April 25, 2015, are as follows (excluding unamortized debt discount and issuance costs) (amounts in thousands):

2015	\$ 25,922
2016	71,937
2017	116,935
2018	64,690
2019	6,776
2020 and thereafter	421,493
Total	\$ 707,753

Table of Contents

9. VARIABLE INTEREST ENTITY

The company maintains a transportation agreement with an entity that transports a significant portion of the company's fresh bakery products from the company's production facilities to outlying distribution centers. The company represents a significant portion of the entity's revenue. This entity qualifies as a variable interest entity (VIE), but the company has determined it is not the primary beneficiary of the VIE.

The company has concluded that certain of the trucks and trailers the VIE uses for distributing our products from the manufacturing facilities to the distribution centers qualify as right to use leases. As of April 25, 2015 and January 3, 2015, there was \$21.5 million and \$22.5 million, respectively, in net property, plant and equipment and capital lease obligations associated with the right to use leases.

The incorporated independent distributors (IDs) who deliver our products qualify as VIEs. The company typically finances the IDs' route acquisition and also enters into a contract with the ID to sell product at a fixed discount for distribution in the ID's territory. The combination of the company's loans to the IDs and the ongoing supply arrangements with the IDs provide a level of protection and funding to the equity owners of the various IDs that would not otherwise be available.

However, the company is not considered to be the primary beneficiary of the VIEs because the company does not (i) have the ability to direct the significant activities of the VIEs that would affect their ability to operate their respective distributor territories and (ii) provide any implicit or explicit guarantees or other financial support to the VIEs, other than the financing described above, for specific return or performance benchmarks. The activities controlled by the IDs that are deemed to most significantly impact the ultimate success of the ID entities relate to those decisions inherent in operating the distribution business in the territory, including acquiring trucks and trailers, managing fuel costs, employee matters and other strategic decisions. In addition, we do not provide, nor do we intend to provide, financial or other support to the IDs. The IDs are responsible for the operations of their respective territories.

The company's maximum exposure to loss for the IDs relates to the distributor route note receivable for the portion of the territory the IDs financed at the time they acquired the route. The IDs remit payment on their route note receivable each week during the settlement process of their weekly activity. If the IDs discontinued making payment on the note receivable we are permitted under the agreement to withhold settlement funds to cover the IDs' note balance. In the event the IDs abandon their territory and have a remaining balance outstanding on the route note receivable, we will take the territory back from the IDs (recording the territory as held for sale) and subsequently sell the territory to another ID. The company's collateral from the route insures that any potential losses are mitigated. The independent distributors who deliver our products that are formed as sole proprietorships are excluded from this analysis.

10. LITIGATION

The company and its subsidiaries from time to time are parties to, or targets of, lawsuits, claims, investigations and proceedings, which are being handled and defended in the ordinary course of business. While the company is unable to predict the outcome of these matters, it believes, based upon currently available facts, that it is remote that the ultimate resolution of any such pending matters will have a material adverse effect on its overall financial condition, results of operations or cash flows in the future. However, adverse developments could negatively impact earnings in a particular future fiscal period.

The company's facilities are subject to various federal, state and local laws and regulations regarding the discharge of material into the environment and the protection of the environment in other ways. The company is not a party to any

material proceedings arising under these regulations. The company believes that compliance with existing environmental laws and regulations will not materially affect the consolidated financial condition, results of operations, cash flows or the competitive position of the company. The company believes it is currently in substantial compliance with all material environmental regulations affecting the company and its properties.

On September 12, 2012, a complaint was filed in the U.S. District Court for the Western District of North Carolina (Charlotte Division) by Scott Rehberg, Willard Allen Riley and Mario Ronchetti against the company and its subsidiary, Flowers Baking Company of Jamestown, LLC. Plaintiffs are or were distributors of our Jamestown subsidiary who contend they were misclassified as independent contractors. The action sought class certification on behalf of a class comprised of independent distributors of our Jamestown subsidiary who are classified as independent contractors. In March 2013, the court conditionally certified the class action for claims under the Fair Labor Standards Act (FLSA). On March 23, 2015, the court re-affirmed its FLSA certification decision and also certified claims under state law.

At this time, the company is also aware of four other complaints alleging misclassification claims that have been filed in four other jurisdictions. The company and/or its respective subsidiaries are vigorously defending these lawsuits. Given the stage of the complaints and the claims and issues presented, the company cannot reasonably estimate at this time the possible loss or range of loss, if any, that may arise from the unresolved lawsuits.

Table of Contents**11. EARNINGS PER SHARE**

The following is a reconciliation of net income and weighted average shares for calculating basic and diluted earnings per common share for the sixteen weeks ended April 25, 2015 and April 19, 2014 (amounts in thousands, except per share data):

	For the Sixteen Weeks Ended	
	April 25, 2015	April 19, 2014
Net income	\$ 61,389	\$ 61,066
Basic Earnings Per Common Share:		
Basic weighted average shares outstanding for common stock	209,913	209,131
Basic earnings per common share	\$ 0.29	\$ 0.29
Diluted Earnings Per Common Share:		
Basic weighted average shares outstanding for common stock	209,913	209,131
Add: Shares of common stock assumed issued upon exercise of stock options, vesting of performance-contingent restricted stock, and deferred stock	2,805	3,675
Diluted weighted average shares outstanding for common stock	212,718	212,806
Diluted earnings per common share	\$ 0.29	\$ 0.29

There were no anti-dilutive shares outstanding at April 25, 2015 or April 19, 2014.

12. STOCK-BASED COMPENSATION

On March 5, 2014, our Board of Directors approved and adopted the 2014 Omnibus Equity and Incentive Compensation Plan (Omnibus Plan). The Omnibus Plan was approved by our shareholders on May 21, 2014. The Omnibus Plan authorizes the compensation committee of the Board of Directors to provide equity-based compensation in the form of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance units, dividend equivalents and other awards for the purpose of providing our officers, key employees, and non-employee directors incentives and rewards for performance. The Omnibus Plan replaced the Flowers Foods 2001 Equity and Performance Incentive Plan, as amended and restated as of April 1, 2009 (EPIP), the stock appreciation right plan, and the bonus plan. All outstanding equity awards that were made under the EPIP will continue to be governed by the EPIP; however, all equity awards granted after May 21, 2014 are governed by the Omnibus Plan. No additional awards will be issued under the EPIP. Awards granted under the Omnibus Plan are limited to the authorized amount of 8,000,000 shares.

The EPIP authorized the compensation committee of the Board of Directors to make awards of options to purchase our common stock, restricted stock, performance stock and units and deferred stock. The company's officers, key employees and non-employee directors (whose grants are generally approved by the full Board of Directors) were eligible to receive awards under the EPIP. Over the life of the EPIP, the company issued options, restricted stock and deferred stock.

The following is a summary of stock options, restricted stock, and deferred stock outstanding under the plans described above. Information relating to the company's stock appreciation rights, which were issued under a separate stock appreciation right plan, is also described below.

Table of Contents***Stock Options***

The company issued non-qualified stock options (NQSOs) during fiscal years 2011 and prior that have no additional service period remaining. All outstanding NQSOs have vested and are exercisable on April 25, 2015.

The stock option activity for the sixteen weeks ended April 25, 2015 pursuant to the EPIP is set forth below (amounts in thousands, except price data):

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at January 3, 2015	6,191	\$ 10.88		
Exercised	(192)	\$ 10.82		
Outstanding at April 25, 2015	5,999	\$ 10.88	1.80	\$ 68,547
Exercisable at April 25, 2015	5,999	\$ 10.88	1.80	\$ 68,547

As of April 25, 2015, compensation expense related to vested stock options was fully amortized. The cash received, the windfall tax benefit, and intrinsic value from stock option exercises for the sixteen weeks ended April 25, 2015 and April 19, 2014 were as follows (amounts in thousands):

	April 25, 2015	April 19, 2014
Cash received from option exercises	\$ 2,082	\$ 5,083
Cash tax windfall, net	\$ 610	\$ 1,333
Intrinsic value of stock options exercised	\$ 2,054	\$ 4,627

Performance-Contingent Restricted Stock Awards***Performance-Contingent Total Shareholder Return Shares (TSR Shares)***

Since 2012, certain key employees have been granted performance-contingent restricted stock under the EPIP in the form of TSR Shares. The awards generally vest approximately two years from the date of grant (after the filing of the company's Annual Report on Form 10-K), and the shares become non-forfeitable if, and to the extent that, on that date the vesting conditions are satisfied. As a result of the delay (July as opposed to January) in the grant of the 2012 awards, the 2012 awards vested during the first quarter of 2014, 18 months from the grant date. The 2013, 2014 and 2015 awards (granted during the first quarters of their respective years) vest two years from the date of grant. The total shareholder return (TSR) is the percent change in the company's stock price over the measurement period plus the dividends paid to shareholders. The performance payout is calculated at the end of each of the last four quarters (averaged) in the measurement period. Once the TSR is determined for the company (Company TSR), it is compared to the TSR of our food company peers (Peer Group TSR). The Company TSR compared to the Peer Group TSR will determine the payout as set forth below:

Percentile	Payout as % of Target
90th	200%
70th	150%
50th	100%
30th	50%
Below 30th	0%

For performance between the levels described above, the degree of vesting is interpolated on a linear basis. The 2012 award actual attainment was 195% of target. The 2013 award actual attainment was 88% of target.

The TSR shares vest immediately if the grantee dies or becomes disabled. However, if the grantee retires at age 65 (or age 55 with at least 10 years of service with the company) or later, on the normal vesting date the grantee will receive a pro-rated number of shares based upon the retirement date and measured at the actual performance for the entire performance period. In addition, if the company undergoes a change in control, the TSR shares will immediately vest at the target level, provided that if 12 months of the performance period have been completed, vesting will be determined based on Company TSR as of the date of the change in control without application of four-quarter averaging. During the vesting period, the grantee has none of the rights of a shareholder. Dividends

Table of Contents

declared during the vesting period will accrue and will be paid at vesting on the shares that ultimately vest. The fair value estimate was determined using a *Monte Carlo* simulation model, which utilizes multiple input variables to estimate the probability of the company achieving the market condition discussed above. Inputs into the model included the following for the company and comparator companies: (i) TSR from the beginning of the performance cycle through the measurement date; (ii) volatility; (iii) risk-free interest rates; and (iv) the correlation of the comparator companies' TSR. The inputs are based on historical capital market data.

The following performance-contingent TSR Shares have been granted under the EPIP and have service period remaining (amounts in thousands, except price data):

Grant date	January 4, 2015	January 1, 2014
Shares granted	414	366
Vesting date	3/1/2017	3/1/2016
Fair value per share	\$ 21.21	\$ 23.97

Performance-Contingent Return on Invested Capital Shares (ROIC Shares)

Since 2012, certain key employees have been granted performance-contingent restricted stock under the EPIP in the form of ROIC Shares. The awards generally vest approximately two years from the date of grant (after the filing of the company's Annual Report on Form 10-K), and the shares become non-forfeitable if, and to the extent that, on that date, the vesting conditions are satisfied. As a result of the delay (July as opposed to January) in the grant of the 2012 awards, the 2012 awards vested during the first quarter of 2014, 18 months from the grant date. The 2013, 2014 and 2015 awards (granted during the first quarters of their respective years) vest two years from the date of grant. Return on Invested Capital is calculated by dividing our profit, as defined under the EPIP or Omnibus Plan, by the invested capital (ROIC). Generally, the performance condition requires the company's average ROIC to exceed its average weighted cost of capital (WACC) by between 1.75 to 4.75 percentage points (the ROI Target) over the two fiscal year performance period. If the lowest ROI Target is not met the awards are forfeited. The shares can be earned based on a range from 0% to 125% of target as defined below:

0% payout if ROIC exceeds WACC by less than 1.75 percentage points;

ROIC above WACC by 1.75 percentage points pays 50% of ROI Target; or

ROIC above WACC by 3.75 percentage points pays 100% of ROI Target; or

ROIC above WACC by 4.75 percentage points pays 125% of ROI Target.

For performance between the levels described above, the degree of vesting is interpolated on a linear basis. The 2012 and 2013 awards actual attainment was 125% of ROI Target.

The ROIC Shares vest immediately if the grantee dies or becomes disabled. However, if the grantee retires at age 65 (or age 55 with at least 10 years of service with the company) or later, on the normal vesting date the grantee will receive a pro-rated number of shares based upon the retirement date and actual performance for the entire performance

period. In addition, if the company undergoes a change in control, the ROIC Shares will immediately vest at the target level. During the vesting period, the grantee has none of the rights of a shareholder. Dividends declared during the vesting period will accrue and will be paid at vesting on the shares that ultimately vest. The fair value of this type of award is equal to the stock price on the grant date. Since these awards have a performance condition feature the expense associated with these awards may change depending on the expected ROI Target attained at each reporting period. The following performance-contingent ROIC Shares have been granted under the EPIP and have service period remaining (amounts in thousands, except price data):

Grant date	January 4, 2015	January 1, 2014
Shares granted	414	366
Vesting date	3/1/2017	3/1/2016
Fair value per share	\$ 19.14	\$ 21.47

Performance-Contingent Restricted Stock

In connection with the vesting of the performance-contingent restricted stock granted in January 2013, during the sixteen weeks ended April 25, 2015, 48,069 common shares were forfeited for this grant because the company attained 88% of the S&P TSR target of the grant (TSR modifier). An additional 100,090 common shares were issued in the aggregate for this grant because the company exceeded the ROIC by the maximum at 125% (ROIC modifier). At vesting the company paid accumulated dividends of \$0.8 million. The tax windfall at vesting of these awards was \$1.4 million.

Table of Contents

The company's performance-contingent restricted stock activity during the quarter ended April 25, 2015, is presented below (amounts in thousands, except price data):

	Shares	Weighted Average Grant Date Fair Value
Nonvested at January 3, 2015	1,404	\$ 19.09
Initial grant at target	828	\$ 20.18
Supplemental grant for exceeding the ROIC modifier	100	\$ 15.51
Grant reduction for not achieving the TSR modifier	(48)	\$ 17.22
Vested	(853)	\$ 16.22
Forfeited	(53)	\$ 19.23
Nonvested at April 25, 2015	1,378	\$ 21.25

As of April 25, 2015, there was \$19.2 million of total unrecognized compensation cost related to nonvested restricted stock granted under the EPIP. That cost is expected to be recognized over a weighted-average period of 1.57 years. The total intrinsic value of shares vested during the period ended April 25, 2015 was \$18.4 million.

Deferred and Restricted Stock

Pursuant to the EPIP, previously the company allowed non-employee directors to convert their annual board retainers into deferred stock equal in value to 130% of the cash payments these directors would have otherwise received. The deferred stock had a minimum two year vesting period and will be distributed to the individual (along with accumulated dividends) at a time designated by the individual at the date of conversion. On January 2, 2015 (our fiscal 2014), cash pay was converted into an aggregate of 19,852 shares. The company recorded compensation expense for this deferred stock over the two-year minimum vesting period. There were no shares distributed under the EPIP during the sixteen weeks ended April 25, 2015. Following the May 2014 Board of Directors meeting and the adoption of the Omnibus Plan, annual board retainers converted into deferred stock and issued under the Omnibus Plan are equal in value to 100% of the cash payments directors would otherwise receive and the vesting period is a one-year period to match the period of time that cash would have been received if no conversion existed. Going forward, under the Omnibus Plan, non-employee directors may elect to convert their annual board retainers into deferred stock equal to 100% of the cash payments they otherwise would have received. The deferred stock so converted will have a one-year pro-rated vesting period. Accumulated dividends are paid upon delivery of the shares.

Pursuant to the Omnibus Plan and the EPIP, non-employee directors also receive annual grants of deferred stock. This deferred stock vests over one year from the grant date. During the second quarter of fiscal 2014, non-employee directors were granted an aggregate of 60,300 shares of deferred stock pursuant to the Omnibus Plan. The deferred stock will be distributed to the grantee at a time designated by the grantee at the date of grant. Compensation expense is recorded on this deferred stock over the one year minimum vesting period.

On May 31, 2013, the company's Chief Executive Officer (CEO) received a time-based restricted stock award of approximately \$1.3 million of restricted stock pursuant to the EPIP. This award will vest 100% on the fourth anniversary of the date of grant provided the CEO remains employed by the company during this period and the award

value does not exceed 0.5% of our cumulative EBITDA over the vesting period. Vesting will also occur in the event of the CEO's death or disability, but not his retirement. Dividends will accrue on the award and will be paid to the CEO on the vesting date for all shares that vest. There were 58,500 shares issued for this award at a fair value of \$22.25 per share.

The deferred stock activity for the sixteen weeks ended April 25, 2015 is set forth below (amounts in thousands, except price data):

	Shares	Weighted Average Fair Value	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Nonvested shares at January 3, 2015	151	\$ 21.06		
Deferred stock granted	5	\$ 22.08		
Nonvested at April 25, 2015	156	\$ 21.04	1.45	\$ 3,499

As of April 25, 2015, there was \$1.2 million of total unrecognized compensation cost related to deferred stock awards granted under the EPIP that will be recognized over a weighted-average period of 1.45 years. There were no shares vested or issued during the sixteen weeks ended April 25, 2015.

Table of Contents**Stock Appreciation Rights**

Prior to 2007, the company allowed non-employee directors to convert their retainers and committee chair fees into rights. These rights vest after one year and can be exercised over nine years. The company records compensation expense for these rights at a measurement date based on changes between the grant price and an estimated fair value of the rights using the *Black-Scholes* option-pricing model. The liability for these rights at April 25, 2015 and January 3, 2015 was \$0.4 million and \$0.3 million, respectively, and is recorded in other long-term liabilities.

The fair value of the rights at April 25, 2015 ranged from \$13.76 to \$14.12. The following assumptions were used to determine the fair value of the rights discussed above using the *Black-Scholes* option-pricing model at April 25, 2015: dividend yield 2.5%; expected volatility 23.0%; risk-free interest rate 0.10% and expected life of 0.35 years to 0.55 years.

The rights activity for the sixteen weeks ended April 25, 2015 is set forth below (amounts in thousands except price data):

	Rights	Weighted Average Fair Value	Aggregate Liability
Outstanding at January 3, 2015	29	\$ 8.47	
Rights exercised			
Outstanding at April 25, 2015	29	\$ 8.47	\$ 405

Share-Based Payments Compensation Expense Summary

The following table summarizes the company's stock based compensation expense for the sixteen weeks ended April 25, 2015 and April 19, 2014 (amounts in thousands):

	For the Sixteen Weeks Ended	
	April 25, 2015	April 19, 2014
Stock options	\$	\$ 197
Performance-contingent restricted stock awards	6,556	4,757
Deferred and restricted stock	642	662
Stock appreciation rights	91	(133)
Total stock based compensation	\$ 7,289	\$ 5,483

13. POSTRETIREMENT PLANS

The following summarizes the company's balance sheet related pension and other postretirement benefit plan accounts at April 25, 2015 as compared to accounts at January 3, 2015 (amounts in thousands):

	April 25, 2015	January 3, 2015
Current benefit liability	\$ 1,089	\$ 1,089
Noncurrent benefit liability	\$ 87,685	\$ 93,589
Accumulated other comprehensive loss, net of tax	\$ 85,869	\$ 86,612

Defined Benefit Plans and Nonqualified Plan

In September 2014, the company announced a one-time voluntary lump sum offer to approximately 2,500 former employees in Plan No. 1 and 2 who had not yet started monthly payment of their vested benefits. The offer supports the company's pension risk management strategy and reduced plan obligations by 10%. Distributions of \$48.4 million in lump sums from existing plan assets in December 2014 resulted in a settlement charge of \$15.4 million for Plan No. 1 only in the fourth quarter of our fiscal 2014. No settlement charge was required for Plan No. 2 as distributions of \$2.0 million were not in excess of service costs and interest costs for 2014.

The company used a measurement date of December 31, 2014 for the defined benefit and postretirement benefit plans described below. We believe that the difference in the fair value of plan assets between the measurement date of December 31, 2014 and our fiscal year end date of January 3, 2015 was not material and that for practical purposes the measurement date of December 31, 2014 was used throughout for preparation of our financial statements.

Table of Contents

During the sixteen weeks ended April 25, 2015 the company contributed \$2.5 million to our qualified pension plans. We expect to contribute an additional \$7.5 million during the remainder of fiscal 2015 to our qualified pension plans.

The net periodic pension (benefit) cost, recognized in selling, distribution and administrative expenses, for the company's plans include the following components (amounts in thousands):

	For the Sixteen Weeks Ended	
	April 25, 2015	April 19, 2014
Service cost	\$ 269	\$ 197
Interest cost	5,539	6,593
Expected return on plan assets	(9,121)	(10,405)
Amortization of net loss	1,532	592
Total net periodic benefit	\$ (1,781)	\$ (3,023)

Post-Retirement Benefit Plan

The company provides certain medical and life insurance benefits for eligible retired employees. The plans incorporate an up-front deductible, coinsurance payments and retiree contributions at various premium levels. Eligibility and maximum period of coverage is based on age and length of service.

The net periodic postretirement benefit (income) cost, recognized in selling, distribution and administrative expenses, for the company includes the following components (amounts in thousands):

	For the Sixteen Weeks Ended	
	April 25, 2015	April 19, 2014
Service cost	\$ 122	\$ 116
Interest cost	112	137
Amortization of net gain	(180)	(178)
Amortization of prior service credit	(144)	(144)
Total net periodic benefit	\$ (90)	\$ (69)

401(k) Retirement Savings Plan

The Flowers Foods 401(k) Retirement Savings Plan covers substantially all of the company's employees who have completed certain service requirements. During the sixteen weeks ended April 25, 2015 and April 19, 2014, the total cost and employer contributions were \$8.5 million and \$8.4 million, respectively.

14. INCOME TAXES

The company's effective tax rate for the first quarter of fiscal 2015 was 35.4%, compared to the rate of 35.7% for the first quarter of 2014. The decrease in the rate from the prior year is primarily due to benefits recognized for state tax incentives. For the current quarter, the primary differences in the effective rate and the statutory rate are state income taxes and the Section 199 qualifying production activities deduction.

During the first quarter of 2015, the company's activity with respect to its uncertain tax positions and related interest expense accrual was immaterial. At this time, we do not anticipate significant changes to the amount of gross unrecognized tax benefits over the next twelve months.

Table of Contents**15. SEGMENT REPORTING**

The company's DSD Segment primarily produces fresh packaged bread, rolls, tortillas, and snack products and the Warehouse Segment produces fresh and frozen bread and rolls and snack products.

During the fourth quarter of fiscal 2014, we revised net sales. Historically, certain immaterial discounts had been recorded as an expense to selling, distribution and administrative costs. These discounts are now recorded as contra revenue. All prior period information has been revised to reflect this change.

The company evaluates each segment's performance based on income or loss before interest and income taxes, excluding unallocated expenses and charges which the company's management deems to be an overall corporate cost or a cost not reflective of the segment's core operating businesses. Information regarding the operations in these reportable segments (including recasting 2014 for a reclassified bakery from the Warehouse Segment to the DSD Segment) is as follows (amounts in thousands):

	For the Sixteen Weeks Ended	
	April 25, 2015	April 19, 2014
Sales:		
DSD Segment	\$ 986,570	\$ 990,035
Warehouse Segment	224,734	230,297
Eliminations: Sales from Warehouse Segment to DSD Segment	(44,852)	(39,502)
Sales from DSD Segment to Warehouse Segment	(20,407)	(26,913)
	\$ 1,146,045	\$ 1,153,917
Depreciation and amortization:		
DSD Segment	\$ 35,180	\$ 34,784
Warehouse Segment	4,780	4,656
Other(1)	(143)	(148)
	\$ 39,817	\$ 39,292
Income (loss) from operations:		
DSD Segment	\$ 99,194	\$ 96,782
Warehouse Segment	16,298	14,109
Other(1)	(18,954)	(12,690)
	\$ 96,538	\$ 98,201
Interest expense	\$ (8,359)	\$ (9,124)
Interest income	\$ 6,777	\$ 5,952
Income before income taxes	\$ 94,956	\$ 95,029

(1) Represents the company's corporate head office amounts.

Sales by product category in each reportable segment are as follows (amounts in thousands):

	For the Sixteen Weeks Ended April 25, 2015			For the Sixteen Weeks Ended April 19, 2014		
	DSD Segment	Warehouse Segment	Total	DSD Segment	Warehouse Segment	Total
Branded Retail	\$ 610,867	\$ 39,649	\$ 650,516	\$ 604,678	\$ 40,358	\$ 645,036
Store Branded Retail	133,102	37,793	170,895	147,235	42,070	189,305
Non-retail and Other	222,194	102,440	324,634	211,209	108,367	319,576
Total	\$ 966,163	\$ 179,882	\$ 1,146,045	\$ 963,122	\$ 190,795	\$ 1,153,917

Table of Contents**16. ASSETS HELD FOR SALE**

The company purchases territories from and sells territories to independent distributors from time to time. The company repurchases territories from independent distributors in circumstances when the company decides to exit a territory or when the distributor elects to terminate their relationship with the company. In the event the company decides to exit a territory or ceases to utilize the independent distribution form of doing business, the company is contractually required to purchase the territory from the independent distributor. In the event an independent distributor terminates their relationship with the company, the company, although not legally obligated, normally repurchases and operates that territory as a company-owned territory. The independent distributors may also sell their territories to another person or entity. Territories purchased from independent distributors and operated as company-owned territories are recorded on the company's Condensed Consolidated Balance Sheet in the line item "Assets Held for Sale" while the company actively seeks another distributor to purchase the territory.

Territories held for sale and operated by the company are sold to independent distributors at the fair market value of the territory. Subsequent to the purchase of a territory by the distributor, in accordance with the terms of the distributor arrangement, the independent distributor has the right to require the company to repurchase the territory and truck, if applicable, at the original purchase price paid by the distributor within the six-month period following the date of sale. The company is not required to repay interest paid by the distributor during such six-month period. If the truck is leased, the company will assume the lease payment if the territory is repurchased during the six-month period. Should the independent distributor wish to sell the territory after the six-month period has expired, the company has the right of first refusal.

The company is also selling certain manufacturing facilities and depots from the acquisition of certain assets of Hostess Brands, Inc. which included several brands, 20 closed bakeries, and 36 depots (the "Acquired Hostess Bread Assets") purchased in July 2013. These assets were originally recorded as held and used. Subsequent to the acquisition, we determined that some of the acquired manufacturing facilities and depots do not meet our long-term strategy. As a result, we are in the process of selling them. During the sixteen weeks ended April 25, 2015, the company received \$0.7 million related to the sale of these assets.

There are certain other properties not associated with the Acquired Hostess Bread Assets that are also in the process of being sold. These assets are recorded on the Condensed Consolidated Balance Sheet in the line item "Assets Held for Sale" and are included in the "Other" line item in the summary table below.

The carrying values of assets held for sale are not amortized and are evaluated for impairment as required. The table below presents the assets held for sale as of April 25, 2015 and January 3, 2015, respectively (amounts in thousands):

	April 25, 2015	January 3, 2015
Distributor territories	\$ 20,024	\$ 20,491
Acquired Hostess Bread Assets plants and depots	12,689	13,406
Other	5,217	5,211
Total assets held for sale	\$ 37,930	\$ 39,108

17. SUBSEQUENT EVENTS

The company has evaluated subsequent events since April 25, 2015, the date of these financial statements. We believe there were no events or transactions discovered during this evaluation period that requires recognition or disclosure in the financial statements.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of the financial condition and results of operations of the company as of and for the sixteen week period ended April 25, 2015 should be read in conjunction with the company's Annual Report on Form 10-K for the fiscal year ended January 3, 2015 (the "Form 10-K").

OVERVIEW:

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is segregated into four sections, including:

Business – discussion of our long-term strategic objectives, acquisitions, and the competitive environment.

Critical accounting estimates – describes the accounting areas where management makes critical estimates to report our financial condition and results of operations. There have been no changes to this section from our Annual Report on Form 10-K for the fiscal year ended January 3, 2015.

Results of operations – an analysis of the company's consolidated results of operations for the two comparative quarters presented in our consolidated financial statements.

Liquidity and capital resources – an analysis of cash flow, contractual obligations, and certain other matters affecting the company's financial position.

There were several significant events that will provide additional context while reading this discussion. These events include:

Revision of prior period sales – During the fourth quarter of fiscal 2014, we revised net sales. Historically, certain immaterial discounts had been recorded as an expense to selling, distribution and administrative costs. These discounts are now recorded as contra revenue. These revisions have been made for the fiscal 2014 information presented in this Form 10-Q.

Amendment to the credit facility – On April 21, 2015, we amended our existing senior unsecured revolving loan facility (the "credit facility") previously amended and restated on May 20, 2011. The amendment to the credit facility reduced the applicable interest rate and extended the maturity date to April 21, 2020.

Opening of Lenexa, Kansas bakery – On April 9, 2015, we announced that beginning in the summer of 2015 our Lenexa bakery will produce breads sold in Kansas, eastern Oklahoma, and Missouri under the *Nature's Own*, *Wonder*, and *Home Pride* brands.

Roman Meal trademark acquisition On February 25, 2015, we announced that we acquired from the Roman Meal Company in Tacoma, Washington the *Roman Meal* trademark. This trademark acquisition for breads and buns in the United States and its territories, and in Mexico, Canada, Bermuda, and the Bahamas is being accounted for as an asset purchase and is being amortized over 20 years.

Hostess asset purchases On July 19, 2013, we completed the acquisition of certain assets of Hostess Brands, Inc. (Hostess), which included the *Wonder, Nature's Pride, Merita, Home Pride* and *Butternut* bread brands, 20 closed bakeries and 36 depots (the Acquired Hostess Bread Assets). We began the re-introduction of certain of the Acquired Hostess Bread brands in our third quarter of fiscal 2013. We have determined that we intend to sell certain plants and depots that do not fit into our long-term operating strategy. Several of these plants and depots have already been sold but the remainder are classified as held for sale in our Condensed Consolidated Balance Sheet included in this Form 10-Q. We expect these sales to continue throughout fiscal 2015 and potentially into fiscal 2016. We received a total of \$0.7 million during the sixteen weeks ended April 25, 2015 from the sale of assets classified as held for sale. Also, we recorded carrying costs, including depreciation, associated with all of the acquired plants and depots of approximately \$5.3 million and \$6.8 million during the sixteen weeks ended April 25, 2015 and April 19, 2014, respectively, in our Condensed Consolidated Statements of Income.

Business

Flowers is focused on opportunities for growth within the baked foods category and seeks to have its products available wherever baked foods are consumed whether in homes, restaurants, fast food outlets, institutions, or vending machines. The company currently has 46 operating bakery subsidiaries in 16 states that produce a wide range of breads, buns, rolls, snack cakes, and tortillas.

Segments and Delivery Methods

The company has two business segments that reflect its two distinct methods of delivering products to market. DSD Segment products are delivered fresh to customers through a network of independent distributors who are incentivized to grow sales and to

Table of Contents

build equity in their distributorships. The DSD Segment has access to approximately 81% of the U.S. population for fresh bakery foods. The Warehouse Segment ships fresh and frozen products to customers' warehouses nationwide. Customers then distribute these products to their depots, stores, or restaurants. Flowers' bakeries fall into either the DSD Segment or Warehouse Segment depending on the primary method of delivery used to sell their products.

The DSD Segment operates a highly involved system of reciprocal baking whereby each bakery has an assigned production mission to produce certain items for its own market as well as for other DSD Segment bakeries' markets and the Warehouse Segment. This system allows for long and efficient production runs that help the company maintain its position as a low-cost producer. Bakeries within regional networks exchange products overnight through a third-party transportation system so that at the beginning of each sales day every DSD Segment bakery has a full complement of fresh products for its independent distributors to provide to their retail and foodservice customers.

The company has invested significant capital in its bakeries for several decades to ensure its production is as efficient as possible, uses technology effectively, provides consistent excellent product quality, and offers a good working environment for team members. In the first quarter of fiscal 2015, we had capital expenditures of \$20.0 million. We also paid \$5.0 million on the acquisition of the *Roman Meal* trademark and recorded it as an asset purchase.

Consumers and our product portfolio

The company recognizes the need to stay in touch with changing consumer trends regarding baked foods. As a result, ongoing research on consumer preferences is conducted and outside resources are engaged to stay current on changing taste, flavor, texture, and shape trends in bakery products and food in general. Our marketing, quality assurance, and research and development teams collaborate regularly as new products are considered, developed, tested, and introduced.

Brands are important in the bakery category and the company has invested over several decades in its brand portfolio through advertising, promotion, and packaging. *Nature's Own*, introduced in 1977, was developed to address the developing trend of consumers demanding baked foods with a healthier profile. *Nature's Own*, from inception has offered baked foods with no artificial flavors, colors, or preservatives.

On February 23, 2013, the company completed its acquisition of certain assets and trademark licenses from BBU, Inc., a subsidiary of Grupo Bimbo, S.A.B. de C.V. (BBU). The company acquired from BBU in the acquisition (1) perpetual, exclusive, and royalty-free licenses to the *Sara Lee* and *Earthgrains* brands for sliced breads, buns, and rolls in the state of California and (2) a closed bakery in Stockton, California. In addition, we received a perpetual, exclusive, and royalty-free license to the *Earthgrains* brand for a broad range of fresh bakery products in the Oklahoma City, Oklahoma market area.

On July 19, 2013, the company completed the acquisition of the Acquired Hostess Bread Assets. In September 2013, the company began to reintroduce the *Wonder*, *Merita*, *Home Pride*, and *Butternut* brands, which had been off the market since Hostess ceased operations in November 2012, into certain markets. The brands were returned to DSD Segment markets where they were available before the company acquired the brands. The acquired *Nature's Pride* brand has not been re-introduced to the market and we are still considering the future of this brand.

Snack cakes have been part of the company's product offerings since at least the early 1920s. In more recent years, snack cakes have been developed and introduced under several brands, such as *Blue Bird* and *Mrs. Freshley's*. On May 20, 2011, the company acquired Tasty Baking Co. (Tasty) and its extensive line of *Tastykake* branded snack cakes. The *Tastykake* brand added an iconic snack cake brand to our brand portfolio. Since the acquisition of Tasty, we have expanded the distribution of the *Tastykake* products throughout our territories. We expect to continue to

expand the *Tastykake* brand into any additional markets we enter over the next several years.

In 2014, we re-branded the Cobblestone Mill brand to the Cobblestone Bread Company brand. There were twelve core products and other regional favorites at introduction. This brand includes restaurant and sandwich shop inspired breads and rolls. We completed the roll-out to the full market in July 2014.

Strengths and core competencies

We aim to achieve consistent and sustainable growth in sales and earnings by focusing on improvements in the operating results of our existing bakeries and, after detailed analysis, acquiring companies and properties that add value to the company. We believe this strategy has resulted in consistent and sustainable growth that will continue to build value for our shareholders.

The company also is committed to maintaining a collaborative, in-house information technology team, as well as certain outsourced services, that meets all of our bakeries' needs and maximizes efficiencies. The consumer packaged goods industry has used scan-based trading technology (referred to as pay by scan or PBS) over several years to share information between the supplier and retailer. An extension of this technology allows the retailer to pay the supplier when the consumer purchases the goods rather than at the time they are delivered to the retailer. In addition, PBS permits the manufacturer to more accurately track trends in product sales and manage inventory.

Table of Contents

We regularly articulate our core business strategies to the investment community and internally to our team members, including long-term (five-year) goals. Compensation and bonus programs are linked to the company's long-term goals. The majority of our employees participate in an annual formula-driven, performance-based cash bonus program. In addition, certain employees participate in a long-term incentive program that provides performance-contingent common stock awards that generally vest over a two-year period. We believe these incentive programs provide both a short and long-term goal for our most senior management team and aligns their interests with those of our shareholders.

We believe our highly automated bakeries, with teams that focus on quality, bake products that meet consumers needs. We strive to maintain and exceed service levels for our customers, consumers, and suppliers. The design of our delivery systems and segments permits us to allocate management time and resources to meet marketplace expectations.

Competition and risks

Hostess liquidation in late November 2012 impacted the industry as Hostess sales shifted to other providers to meet marketplace needs. These providers included Flowers, Grupo Bimbo (with *Sara Lee*, *Arnolds*, *Thomas*, and *Entenmann's* brands), Campbell Soup Company (with the *Pepperidge Farm* brand), McKee Foods Corporation (*Little Debbie*) and smaller regional bakeries, retailer-owned bakeries, and store brands. Certain *Hostess* cake products were re-introduced into the market in July 2013 by a new and separate company Hostess Brands, LLC (Hostess LLC) formed by the outside investment group of Apollo Global Management and C. Dean Metropoulos & Co. that purchased the *Hostess* cake brands.

Sales are principally affected by pricing, quality, brand recognition, new product introductions, product line extensions, marketing, and service. Sales for the first quarter of fiscal 2015 decreased 0.7% from the first quarter of fiscal 2014. This change was primarily due to lower volume partially offset by positive pricing/mix.

The economic environment and competitive landscape in the baking industry is currently experiencing competitive pressures, changing consumer tastes, and shifting product mix. In addition to these challenges, our Warehouse Segment continues to compete for market position after the *Hostess* cake brands were reintroduced by Hostess LLC beginning in July 2013.

Commodities, such as our baking ingredients, periodically experience price fluctuations. The cost of these inputs may fluctuate widely due to government policy and regulation, weather conditions, domestic and international demand, or other unforeseen circumstances. We enter into forward purchase agreements and other derivative financial instruments in an effort to manage the impact of such volatility in raw material prices. Any decrease in the availability of these agreements and instruments could increase the effective price of these raw materials to us and significantly affect our earnings.

Valuation of Long-Lived Intangible Assets

There are certain inherent risks included in our expectations about the performance of acquired trademarks and brands. If we are unable to implement our growth strategies for these acquired intangible assets as expected, it could adversely impact the carrying value of the brands. The fair value of the trademarks could be less than our carrying value if any of our four material assumptions in our fair value analysis: (a) weighted average cost of capital; (b) long-term sales growth rates; (c) forecasted operating margins; and (d) market multiples, do not meet our expectations, thereby requiring us to record an asset impairment. Based on management's evaluation, no impairment charges relating to intangible assets not subject to amortization were recorded during our first quarter of fiscal 2015.

The impairment analysis on the indefinite-lived intangible asset trademarks not subject to amortization is very sensitive to the long-term growth rates of the trademarks. The trademarks have been valued based on our expectations of timing in reintroducing the trademarks in the market. The company also continually analyzes our trademarks to determine the expansion markets in which they will be introduced. If the timing of our expansion does not proceed as we currently anticipate or if the anticipated revenues do not meet our expectations, these trademarks could become impaired in future periods.

CRITICAL ACCOUNTING POLICIES:

Our financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP). These principles are numerous and complex. Our significant accounting policies are summarized in the company s Annual Report on Form 10-K for the fiscal year ended January 3, 2015. In many instances, the application of GAAP requires management to make estimates or to apply subjective principles to particular facts and circumstances. A variance in the estimates used or a variance in the application or interpretation of GAAP could yield a materially different accounting result. Please see our Annual Report on Form 10-K for the fiscal year ended January 3, 2015, for a discussion of the areas where we believe that the estimates, judgments or interpretations that we have made, if different, could yield the most significant differences in our financial statements. There have been no significant changes to our critical accounting policies from those disclosed in our Annual Report on Form 10-K filed for the year ended January 3, 2015.

Table of Contents**RESULTS OF OPERATIONS:**

Results of operations, expressed as a percentage of sales and the dollar and percentage change from period to period, for the sixteen week periods ended April 25, 2015 and April 19, 2014, are set forth below (dollars in thousands):

	For the sixteen weeks ended				Increase (Decrease)	
	April 25, 2015	April 19, 2014	April 25, 2015	April 19, 2014	Dollars	%

Table of Contents**CONSOLIDATED AND SEGMENT RESULTS**

SIXTEEN WEEKS ENDED APRIL 25, 2015 COMPARED TO SIXTEEN WEEKS ENDED APRIL 19, 2014

Consolidated Sales.

	For the Sixteen Weeks Ended April 25, 2015		For the Sixteen Weeks Ended April 19, 2014		% Increase (Decrease)
	\$ (Amounts in thousands)	%	\$ (Amounts in thousands)	%	
Branded Retail	\$ 650,516	56.8%	\$ 645,036	55.9%	0.8%
Store Branded Retail	170,895	14.9	189,305	16.4	(9.7)%
Non-retail and Other	324,634	28.3	319,576	27.7	1.6%
Total	\$ 1,146,045	100.0%	\$ 1,153,917	100.0%	(0.7)%

The 0.7% decrease in sales was attributable to the following:

Percentage Point Change in Sales Attributed to:	Favorable (Unfavorable)
Pricing/Mix	0.2%
Volume	(0.9)%
Total percentage change in sales	(0.7)%

Sales category discussion

Overall, sales declined for the first sixteen weeks of 2015 as compared to the first sixteen weeks of 2014 due to decreased volume, mainly in the store branded retail category, partially offset by positive pricing/mix. Price/mix improved due to a favorable mix shift from lower margin to higher margin products, partially offset by a competitive pricing environment. Volume declines were driven by decreases in our store branded products, partially offset by growth in the branded and non-retail categories. The increase in branded retail sales was due primarily to volume increases and growth in our expansion markets, partially offset by decreases in price/mix. Store branded retail sales decreased significantly due to volume decreases related to exiting certain store branded business in the second half of fiscal 2014 and declines in store branded cake due to the reintroduction of *Hostess* cake products by Hostess LLC. The increase in non-retail and other sales, which include contract manufacturing, vending and foodservice, was primarily due to volume increases in food service, partially offset by decreases in contract manufacturing from exiting certain lower margin business.

Direct-Store-Delivery Segment Sales.

	For the Sixteen Weeks Ended April 25, 2015		For the Sixteen Weeks Ended April 19, 2014		% Increase (Decrease)
	\$	%	\$	%	
	(Amounts in thousands)		(Amounts in thousands)		
Branded Retail	\$ 610,867	63.2%	\$ 604,678	62.8%	1.0%
Store Branded Retail	133,102	13.8	147,235	15.3	(9.6)%
Non-retail and Other	222,194	23.0	211,209	21.9	5.2%
Total	\$ 966,163	100.0%	\$ 963,122	100.0%	0.3%

The 0.3% increase in sales was attributable to the following:

Percentage Point Change in Sales Attributed to:	Favorable
Pricing/Mix	0.1%
Volume	0.2%
Total percentage change in sales	0.3%

Table of Contents**Sales category discussion**

Sales increased for the first sixteen weeks of 2015 compared to the first sixteen weeks of 2014 due to volume increases in the branded retail and non-retail categories, mostly offset by volume declines in the store branded retail category and increased promotional activity in the industry. The increase in branded retail sales was due primarily to volume increases, partially offset by price/mix declines due to competition in the marketplace. Volume increases in branded white bread and branded soft variety contributed the most growth. The significant decrease in store branded retail was due to exiting certain store branded business in the second half of fiscal 2014. The increase in non-retail and other sales was due to volume increases in food service and institutional sales.

Warehouse Segment Sales.

	For the Sixteen Weeks Ended		For the Sixteen Weeks Ended		% Decrease
	April 25, 2015		April 19, 2014		
	\$	%	\$	%	
	(Amounts in thousands)		(Amounts in thousands)		
Branded Retail	\$ 39,649	22.0%	\$ 40,358	21.2%	(1.8)%
Store Branded Retail	37,793	21.0	42,070	22.0	(10.2)%
Non-retail and Other	102,440	57.0	108,367	56.8	(5.5)%
Total	\$ 179,882	100.0%	\$ 190,795	100.0%	(5.7)%

The 5.7% decrease in sales was attributable to the following:

Percentage Point Change in Sales Attributed to:	Favorable (Unfavorable)
Pricing/Mix	(1.2)%
Volume	(4.5)
Total percentage change in sales	(5.7)%

Sales category discussion

Volume declines in all categories and, to a lesser extent, increased promotional activity in the industry drove the overall decrease. Both branded retail and store branded retail sales decreased due to lower cake volume associated with increased competition in the marketplace due to the reintroduction of *Hostess* cake products by Hostess LLC. The decrease in non-retail and other sales, which include contract manufacturing, vending and foodservice, was due primarily to exiting the tortilla business and, to a lesser extent, price/mix decreases in foodservice.

Materials, Supplies, Labor and Other Production Costs (exclusive of depreciation and amortization shown separately). The table below presents the significant components of materials, supplies, labor and other production costs (exclusive of depreciation and amortization shown separately) as a percent of sales:

Line item component	For the Sixteen Weeks Ended		Increase (Decrease) as a % of sales
	April 25, 2015 % of sales	April 19, 2014 % of sales	
Ingredients	25.1%	25.9%	(0.8)%
Workforce-related costs	13.8	13.4	0.4
Packaging	4.7	4.6	0.1
Utilities	1.6	1.7	(0.1)
Other	5.9	6.0	(0.1)
Total	51.1%	51.6%	(0.5)%

Table of Contents

Overall, the decrease as a percent of sales was attributable to significantly lower ingredient costs as a percent of sales and efficiency gains, partially offset by higher workforce-related costs as a percent of sales due to lower production volumes. Ingredient costs decreased as a percent of sales largely due to lower prices for flour, sweeteners and oils. Increases in workforce-related costs as a percent of sales primarily resulted from increased headcount and lower sales for the Warehouse Segment, partially offset by higher costs in fiscal 2014 related to the sold tortilla facility.

The table below presents the significant components of materials, supplies, labor and other production costs for the DSD Segment (exclusive of depreciation and amortization shown separately) as a percent of sales:

Line item component	For the Sixteen Weeks Ended		Increase (Decrease) as a % of sales
	April 25, 2015 % of sales	April 19, 2014 % of sales	
Ingredients	22.4%	23.6%	(1.2)%
Workforce-related costs	11.9	11.8	0.1
Packaging	3.4	3.4	
Utilities	1.6	1.6	
Other	7.9	6.6	1.3
Total	47.2%	47.0%	0.2%

The DSD Segment's decrease in ingredient costs as a percent of sales was attributable to lower pricing on flour, sweeteners and oils and increased product purchases from the Warehouse Segment (sales with no associated ingredient costs) and decreased sales to the Warehouse Segment (ingredient costs with no associated sales). The increase in the other line item was due to increased product purchases from the Warehouse Segment, mainly lower margin cake items, and decreased sales of product to the Warehouse Segment, mainly the tortilla products from the tortilla business we exited in fiscal 2014, partially offset by improved efficiency.

The table below presents the significant components of materials, supplies, labor and other production costs for the Warehouse Segment (exclusive of depreciation and amortization shown separately) as a percent of sales:

Line item component	For the Sixteen Weeks Ended		Increase (Decrease) as a % of sales
	April 25, 2015 % of sales	April 19, 2014 % of sales	
Ingredients	39.5%	37.9%	1.6%
Workforce-related costs	23.8	21.7	2.1
Packaging	12.2	10.7	1.5
Utilities	1.8	1.8	
Other	(5.3)	2.8	(8.1)
Total	72.0%	74.9%	(2.9)%

The Warehouse Segment's decrease was largely due to exiting the lower margin non-retail tortilla business in the second half of fiscal 2014 and a shift in mix from lower margin store branded cake to higher margin foodservice products. Ingredients increased as a percent of sales primarily due to increases in sales of products to the DSD Segment (ingredient costs with no associated sales), partially offset by lower ingredient prices. The decreases in overall volume and increased sales of product to the DSD Segment (workforce-related costs with no associated sales) increased workforce-related costs as a percent of sales. The increase in packaging was due primarily to price increases and increased sales to the DSD Segment (packaging costs with no associated sales). The other line item reflects the increase in sales of product to the DSD Segment and decreases in purchases of product from the DSD Segment, mainly the tortilla products from the tortilla business we exited in fiscal 2014.

Table of Contents

Selling, Distribution and Administrative Expenses. The table below presents the significant components of selling, distribution and administrative expenses as a percent of sales:

Line item component	For the Sixteen Weeks Ended		Increase (Decrease) as a % of sales
	April 25, 2015 % of sales	April 19, 2014 % of sales	
Workforce-related costs	17.5%	17.8%	(0.3)%
Distributor distribution fees	13.7	13.0	0.7
Other	5.8	5.6	0.2
Total	37.0%	36.4%	0.6%

The workforce-related costs decreased as a percent of sales primarily due to the conversion to independent distributors in newer markets and higher costs in the prior comparable period related to the tortilla facility sold in the third quarter of fiscal 2014. These decreases were partially offset by lower sales and higher stock-based compensation costs. Distributor distribution fees increased as a percent of sales due to the conversions discussed above as well as the DSD Segment comprising a larger portion of overall sales.

The table below presents the significant components of our DSD Segment selling, distribution and administrative expenses as a percent of sales:

Line item component	For the Sixteen Weeks Ended		Increase (Decrease) as a % of sales
	April 25, 2015 % of sales	April 19, 2014 % of sales	
Workforce-related costs	17.1%	18.2%	(1.1)%
Distributor distribution fees	16.2	15.6	0.6
Other	5.6	5.5	0.1
Total	38.9%	39.3%	(0.4)%

The decrease in workforce-related costs as a percent of sales was attributable to the conversion to independent distributors in newer markets, improvements at Lepage and higher costs in the prior year associated with the tortilla facility sold in the third quarter of fiscal 2014. The distributor distribution fees as a percent of sales increased due to the conversion to independent distributors.

The table below presents the significant components of our Warehouse Segment selling, distribution and administrative expenses as a percent of sales:

For the Sixteen Weeks Ended	Increase
------------------------------------	-----------------

Line item component	April 25, 2015	April 19, 2014	as a
	% of sales	% of sales	% of sales
Workforce-related costs	9.3%	8.9%	0.4%
Freezer storage/rent	2.1	1.8	0.3
Distribution costs	0.8	0.8	
Other	4.1	3.7	0.4
Total	16.3%	15.2%	1.1%

Lower sales that spread fixed costs over a smaller sales base drove the overall increase in selling, distribution and administrative expenses as a percent of sales.

Depreciation and Amortization. Depreciation and amortization increased due primarily to the bread line added at our Modesto, California bakery at the end of the first quarter in fiscal 2014, our Knoxville, Tennessee facility opening in the second quarter of fiscal 2014 and other assets being placed in service subsequent to the first quarter of fiscal 2014, partially offset by lower costs due to the sale of our tortilla facility in the third quarter of fiscal 2014 and decreased depreciation for the property sales related to the Acquired Hostess Assets.

Table of Contents

The DSD Segment's depreciation and amortization expense increased due to the factors discussed above.

The Warehouse Segment's depreciation and amortization expense increased primarily due to assets being placed in service subsequent to the first quarter of fiscal 2014.

Income From Operations. The table below summarizes the change in operating income by segment as a percent of sales:

Operating income (loss)	Favorable (Unfavorable) Percentage
DSD Segment	2.5%
Warehouse Segment	15.5%
Unallocated corporate	(49.4)%
Consolidated	(1.7)%

The increase in the DSD Segment income from operations was primarily attributable to lower ingredient costs and decreases in selling, distribution and administrative costs, partially offset by increased purchases from the Warehouse Segment. The increase in the Warehouse Segment income from operations was primarily due to higher costs in fiscal 2014 associated with the tortilla business we exited in fiscal 2014, partially offset by higher selling, distribution and administrative expenses due to lower sales. The increase in unallocated corporate expenses was primarily due to higher workforce-related and legal costs and lower pension income during the first quarter of fiscal 2015 compared to the first quarter of fiscal 2014.

Net Interest Expense. The change was related to higher interest income related to the increase in distributor notes receivable outstanding and lower amounts outstanding under the company's debt arrangements which decreased interest expense.

Income Taxes. The company's effective tax rate for the first quarter of fiscal 2015 was 35.4%, compared to the rate of 35.7% for the first quarter of 2014. The decrease in the rate from the prior year is primarily due to benefits recognized for state tax incentives. For the current quarter, the primary differences in the effective rate and the statutory rate are state income taxes and the Section 199 qualifying production activities deduction.

During the first quarter of fiscal 2015, the company's activity with respect to its uncertain tax positions and related interest expense accrual was immaterial. At this time, we do not anticipate significant changes to the amount of gross unrecognized tax benefits over the next twelve months.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES:**

Liquidity represents our ability to generate sufficient cash flows from operating activities to meet our obligations and commitments as well as our ability to obtain appropriate financing and convert into cash those assets that are no longer required to meet existing strategic and financing objectives. Therefore, liquidity cannot be considered separately from capital resources that consist primarily of current and potentially available funds for use in achieving long-range business objectives. Currently, the company's liquidity needs arise primarily from working capital requirements, capital expenditures, pension contributions and stock repurchases. The company's strategy for use of its cash flow includes paying dividends to shareholders, making acquisitions, growing internally and repurchasing shares of its common stock, when appropriate. We believe we have access to available funds to meet our short and long-term capital requirements.

The company leases certain property and equipment under various operating and capital lease arrangements. Most of the operating leases provide the company with the option, after the initial lease term, either to purchase the property at the then fair value or renew its lease at the then fair value. The capital leases provide the company with the option to purchase the property at a fixed price at the end of the lease term. The company believes the use of leases as a financing alternative places the company in a more favorable position to fulfill its long-term strategy for the use of its cash flow. See Note 11, *Debt, Lease and Other Commitments*, of Notes to Consolidated Financial Statements of our Annual Report on Form 10-K for fiscal year ended January 3, 2015 for detailed financial information regarding the company's lease arrangements.

Liquidity discussion for the sixteen week periods ended April 25, 2015 and April 19, 2014

Flowers' cash and cash equivalents were \$8.0 million at April 25, 2015 as compared to \$7.5 million at January 3, 2015. The cash and cash equivalents were derived from the activities presented in the table below (amounts in thousands):

Cash flow component	For the Sixteen Weeks Ended		Change
	April 25, 2015	April 19, 2014	
Cash flows provided by operating activities	\$ 118,423	\$ 121,821	\$ (3,398)
Cash disbursed for investing activities	(25,332)	(13,899)	(11,433)
Cash disbursed for financing activities	(92,648)	(107,651)	15,003
Total change in cash	\$ 443	\$ 271	\$ 172

Cash Flows Provided by Operating Activities. Net cash provided by operating activities consisted of the following items for non-cash adjustments to net income (amounts in thousands):

	For the Sixteen Weeks Ended		Change
	April 25, 2015	April 19, 2014	
Depreciation and amortization	\$ 39,817	\$ 39,292	\$ 525
Stock-based compensation	7,289	5,483	1,806
Loss reclassified from accumulated other comprehensive income to net income	2,504	4,917	(2,413)

Edgar Filing: FLOWERS FOODS INC - Form 10-Q

Deferred income taxes	3,888	4,434	(546)
Provision for inventory obsolescence	377	656	(279)
Bad debt expense (allowance for accounts receivable)	481	1,020	(539)
Pension and postretirement plans (income) expense	(1,871)	(3,092)	1,221
Other non-cash	(226)	(761)	535
Net non-cash adjustment to net income	\$ 52,259	\$ 51,949	\$ 310

Table of Contents

Net cash used for working capital requirements and pension contributions consisted of the following items (amounts in thousands):

	For the Sixteen Weeks Ended		
	April 25, 2015	April 19, 2014	Change
Changes in accounts receivable, net	\$ (22,686)	\$ (22,801)	\$ 115
Changes in inventories, net	(6,101)	3,374	(9,475)
Changes in hedging activities, net	(6,205)	23,673	(29,878)
Changes in other assets, net	4,936	8,933	(3,997)
Changes in accounts payable, net	30,523	5,784	24,739
Changes in other accrued liabilities, net	6,808	(5,128)	11,936
Qualified pension plan contributions	(2,500)	(5,029)	2,529
 Net changes in working capital and pension contributions	 \$ 4,775	 \$ 8,806	 \$ (4,031)

The change in stock-based compensation was primarily due to a change in the performance estimate of our return on invested capital shares (ROIC shares) during the first quarter of fiscal 2015. The pension and postretirement plan income decreased from the first quarter of fiscal 2014 to the first quarter of fiscal 2015 due to the performance of the plan's assets during fiscal 2014 and the new mortality table which increased our pension benefit obligations at the end of our fiscal 2014. Other non-cash items include non-cash interest expense for the amortization of debt discounts and deferred financing costs and gains or losses on the sale of assets.

The changes in accounts receivable and inventories are described above and are due to sales increases and the timing of receipts. Hedging activities change from market movements that affect the fair value and required collateral of positions and the timing and recognition of deferred gains or losses. The other assets and accrued liabilities changes are from changes in income tax receivable balances, deferred tax liabilities, accrued interest and accrued employee costs (including accrued compensation for our formula driven, performance-based cash bonus program).

The company's derivative instruments contained no credit-risk-related contingent features at April 25, 2015. As of April 25, 2015 and January 3, 2015, the company had \$19.8 million and \$16.1 million, respectively, recorded in other current assets representing collateral from or with counterparties for hedged positions.

During 2015, in addition to the \$2.5 million contributed in the first quarter, the company expects to contribute an additional \$7.5 million to our qualified pension plans and to pay an additional \$0.3 million in nonqualified pension benefits from corporate assets during the remainder of fiscal 2015. The expected contributions to qualified pension plans are discretionary. The company believes its cash flow and balance sheet will allow it to fund future pension needs without adversely affecting the business strategy of the company.

During the first quarter of fiscal 2015, the company paid \$16.4 million, including our share of employment taxes and deferred compensation contributions, relating to its formula-driven, performance-based cash bonus program earned during 2014. An additional \$1.5 million for our share of employment taxes on the vesting of the performance-contingent restricted stock award was also paid during the quarter. We paid \$24.7 million during the first quarter of 2014 for the performance-based cash bonus program earned during fiscal 2013.

Cash Flows Disbursed for Investing Activities. The table below presents net cash disbursed for investing activities for the sixteen weeks ended April 25, 2015 and April 19, 2014 (amounts in thousands):

	For the Sixteen Weeks Ended		
	April 25, 2015	April 19, 2014	Change
Purchase of property, plant, and equipment	\$ (19,983)	\$ (23,580)	\$ 3,597
Repurchase of distributor territories	(9,120)	(8,472)	(648)
Principal payments from notes receivable	7,847	6,725	1,122
Contingently refundable consideration		7,500	(7,500)
Acquisition of intangible assets	(5,000)		(5,000)
Proceeds from sale of property, plant and equipment	924	3,928	(3,004)
Net cash disbursed for investing activities	\$ (25,332)	\$ (13,899)	\$ (11,433)

Table of Contents

Net cash disbursed for investing activities included the *Roman Meal* trademark acquisition of \$5.0 million in the first quarter of fiscal 2015. In contrast, there were no acquisitions or acquisition-related costs during the first quarter of fiscal 2014. Capital expenditures for the DSD and Warehouse Segments were \$16.1 million and \$2.3 million, respectively. The company currently estimates capital expenditures of approximately \$85.0 million to \$95.0 million on a consolidated basis during fiscal 2015. There were fewer asset sales from assets currently classified as held for sale during the first quarter of fiscal 2015 compared to the first quarter of fiscal 2014. We continue to actively market \$37.9 million in assets held for sale.

Cash Flows Disbursed for Financing Activities. The table below presents net cash changes from financing activities for the sixteen weeks ended April 25, 2015 and April 19, 2014, respectively (amounts in thousands):

	For the Sixteen Weeks Ended		
	April 25, 2015	April 19, 2014	Change
Dividends paid	\$ (28,685)	\$ (23,956)	\$ (4,729)
Exercise of stock options, including windfall tax benefit	4,122	9,261	(5,139)
Payment of debt issuance costs and financing fees	(483)	(564)	81
Stock repurchases	(6,858)	(9,459)	2,601
Change in bank overdrafts	(4,044)	(1,770)	(2,274)
Net debt and capital lease obligations changes	(56,700)	(81,163)	24,463
Net cash (disbursed for) provided by financing activities	\$ (92,648)	\$ (107,651)	\$ 15,003

Our annual dividend payout rate increased 9.2% from fiscal 2014 to fiscal 2015. While there are no requirements to increase the dividend payout we have shown a recent historical trend to do so. Should this continue in the future we will have additional working capital needs to meet these expected payouts. Stock option exercises and the associated tax benefit decreased due to fewer exercises in the comparable first quarter in fiscal 2014. As of April 25, 2015 there were nonqualified stock option grants of 5,998,086 shares that were exercisable. These have a remaining contractual life of approximately 1.80 years and a weighted average exercise price of \$10.88 per share. At this time, it is expected that these shares will be exercised before the contractual term expires and they may provide an increase to the cash provided by financing activities.

Stock repurchase decisions are made based on our stock price, our belief of relative value, and our cash projections at any given time. Payments for financing fees of \$0.5 million for amending the unsecured credit facility on April 21, 2015 were incurred during the first quarter of fiscal 2015. The change in bank overdraft was a function of our cash receipts at the end of our fiscal 2014. Our cash objective is to minimize cash on hand by using the credit facility described below. The net debt obligations changed primarily because we made payments on our new term loan and unsecured credit facility during the first quarter of fiscal 2015 that were less than the comparable quarter in fiscal 2014.

The credit facility is variable rate debt, as described below. In periods of rising interest rates the cost of using the credit facility will become more expensive and increase our interest expense. The stated interest rate of the senior notes will not change. Therefore, draw downs on the credit facility provide us the greatest direct exposure to rising rates. In addition, if interest rates do increase it will make the cost of raising funds more expensive. Considering our

current debt obligations, an environment of rising rates could materially affect our Condensed Consolidated Statements of Income.

Additional liquidity items are discussed below for context.

Accounts Receivable Securitization Facility, New Term Loan, Senior Notes, and Credit Facility

Accounts Receivable Securitization Facility. On July 17, 2013, the company entered into an accounts receivable securitization facility (the facility). On August 7, 2014, the company entered into the first amendment under the facility. The amendment (i) increased the revolving commitments under the facility to \$200.0 million from \$150.0 million, (ii) extended the term one year to July 17, 2016, and (iii) made certain other conforming changes. On December 17, 2014, the company executed the second amendment under the facility to add a bank to the lending group. The original commitment amount was split between the original lender and the new lender in the proportion of 62.5% for the original lender and 37.5% for the new lender. This modification, which was accounted for as an extinguishment of the debt, resulted in a charge of \$0.1 million, or 37.5%, of the unamortized financing costs. Under the facility, a wholly-owned, bankruptcy-remote subsidiary purchases, on an ongoing basis, substantially all trade receivables. As borrowings are made under the facility, the subsidiary pledges the receivables as collateral. In the event of liquidation of the subsidiary, its creditors would be entitled to satisfy their claims from the subsidiary's pledged receivables prior to distributions of collections to the company. We include the subsidiary in our Condensed Consolidated Financial Statements. The facility contains certain

Table of Contents

customary representations and warranties, affirmative and negative covenants, and events of default. There were no amounts outstanding as of April 25, 2015 and January 3, 2015, respectively, under the facility. As of April 25, 2015, the company was in compliance with all restrictive covenants under the facility. On April 25, 2015, the company had \$200.0 million available under its facility for working capital and general corporate purposes.

Optional principal repayments may be made at any time without premium or penalty. Interest is due two days after our reporting periods end in arrears on the outstanding borrowings and is computed as the cost of funds rate plus an applicable margin of 70 basis points. An unused fee of 25 basis points is applicable on the unused commitment at each reporting period. The company paid financing costs of \$0.8 million in connection with the facility at the time we entered into the facility, which are being amortized over the life of the facility. During fiscal 2014, we incurred \$0.2 million in financing costs with the first and second amendments. An additional \$0.1 million in financing costs was paid during the first quarter of fiscal 2015 for the December 17, 2014 amendment.

New Term Loan. We entered into a senior unsecured delayed-draw term facility (the new term loan) on April 5, 2013 with a commitment of up to \$300.0 million. The company drew down the full amount of the new term loan on July 18, 2013 (the borrowing date). On February 14, 2014, we entered into the first amendment to the credit agreement for the new term loan.

The new term loan amortizes in quarterly installments based on an increasing annual percentage. The first payment was due and payable on June 30, 2013 (the last business day of the first calendar quarter ending after the borrowing date), quarterly payments are due on the last business day of each successive calendar quarter and all remaining outstanding principal is due and payable on the fifth anniversary of the borrowing date. The table below presents the principal payment amounts remaining under the new term loan as of April 25, 2015 (amounts in thousands):

Fiscal Year	Payments
2015	\$ 22,500
2016	\$ 67,500
2017	\$ 112,500
2018	\$ 60,000

The February 14, 2014 amendment, which was accounted for as a modification of the debt, favorably reduced the interest rates described below from those entered into originally on April 5, 2013. Voluntary prepayments on the new term loan may be made without premium or penalty. Interest is due quarterly in arrears on any outstanding borrowings at a customary Eurodollar rate or the base rate plus applicable margin. The applicable margin ranges from 0.00% to 1.25% for base rate loans and from 1.00% to 2.25% for Eurodollar loans, and is based on the company's leverage ratio. Interest on base rate loans is payable quarterly in arrears on the last business day of each calendar quarter. Interest on Eurodollar loans is payable in arrears at the end of the interest period and every three months in the case of interest periods in excess of three months. The company paid financing costs of \$1.7 million in connection with the new term loan, which are being amortized over the life of the new term loan. A commitment fee of 20 basis points on the daily undrawn portion of the lenders' commitments commenced on May 1, 2013 and continued until the borrowing date, when the company borrowed the available \$300.0 million for the acquisition of certain Hostess Brands, Inc. bread assets. The new term loan is subject to customary restrictive covenants, including certain limitations on liens and significant acquisitions and financial covenants regarding minimum interest coverage ratio and maximum leverage ratio. The February 14, 2014 amendment cost \$0.3 million and is being amortized over the remaining term. As of April 25, 2015 and January 3, 2015, the company was in compliance with all restrictive covenants under the new term loan.

Senior Notes. On April 3, 2012, the company issued \$400.0 million of senior notes. The company pays semiannual interest on the notes on each April 1 and October 1, beginning on October 1, 2012, and the notes will mature on April 1, 2022. The notes bear interest at 4.375% per annum. On any date prior to January 1, 2022, the company may redeem some or all of the notes at a price equal to the greater of (1) 100% of the principal amount of the notes redeemed and (2) a make-whole amount plus, in each case, accrued and unpaid interest. The make-whole amount is equal to the sum of the present values of the remaining scheduled payments of principal thereof (not including any interest accrued thereon to, but not including, the date of redemption), discounted to the date of redemption on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the treasury rate (as defined in the agreement), plus 35 basis points, plus in each case, unpaid interest accrued thereon to, but not including, the date of redemption. At any time on or after January 1, 2022, the company may redeem some or all of the notes at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest. If the company experiences a change of control triggering event (which involves a change of control of the company and related rating of the notes below investment grade), it is required to offer to purchase the notes at a purchase price equal to 101% of the principal amount, plus accrued and unpaid interest thereon unless the company exercised its option to redeem the notes in whole. The notes are also subject to customary restrictive covenants, including certain limitations on liens and sale and leaseback transactions.

Edgar Filing: FLOWERS FOODS INC - Form 10-Q

The face value of the notes is \$400.0 million and the current discount on the notes is \$0.7 million. The company paid issuance costs (including underwriting fees and legal fees) for issuing the notes of \$3.9 million. The issuance costs and the debt discount are being amortized to interest expense over the term of the notes. As of April 25, 2015 and January 3, 2015, the company was in compliance with all restrictive covenants under the notes.

Table of Contents

Credit Facility. On April 21, 2015, the company amended its senior unsecured credit facility (the credit facility) to extend the term to April 21, 2020, reduce the applicable margin on base rate and Eurodollar loans and reduce the facility fees as described below. The amendment was accounted for as a modification of the debt. The credit facility is a five-year, \$500.0 million senior unsecured revolving loan facility. The credit facility contains a provision that permits Flowers to request up to \$200.0 million in additional revolving commitments, for a total of up to \$700.0 million, subject to the satisfaction of certain conditions. Proceeds from the credit facility may be used for working capital and general corporate purposes, including capital expenditures, acquisition financing, refinancing of indebtedness, dividends and share repurchases. The credit facility includes certain customary restrictions, which, among other things, require maintenance of financial covenants and limit encumbrance of assets and creation of indebtedness. Restrictive financial covenants include such ratios as a minimum interest coverage ratio and a maximum leverage ratio. The company believes that, given its current cash position, its cash flow from operating activities and its available credit capacity, it can comply with the current terms of the amended credit facility and can meet presently foreseeable financial requirements. As of April 25, 2015 and January 3, 2015, the company was in compliance with all restrictive covenants under the credit facility.

Interest is due quarterly in arrears on any outstanding borrowings at a customary Eurodollar rate or the base rate plus applicable margin. The underlying rate is defined as rates offered in the interbank Eurodollar market, or the higher of the prime lending rate or the federal funds rate plus 0.50%, with a floor rate defined by the one-month interbank Eurodollar market rate plus 1.00%. The applicable margin ranges from 0.0% to 0.50% for base rate loans and from 0.70% to 1.50% for Eurodollar loans. In addition, a facility fee ranging from 0.05% to 0.25% is due quarterly on all commitments under the credit facility. Both the interest margin and the facility fee are based on the company's leverage ratio. The company paid additional financing costs of \$0.4 million in connection with the April 21, 2015 amendment of the credit facility, which, in addition to the remaining balance of the original \$1.3 million in financing costs, is being amortized over the life of the credit facility. The company recognized \$0.1 million in financing costs for the modification at the time of the April 21, 2015 amendment.

There were \$3.8 million and \$53.0 million in outstanding borrowings under the credit facility at April 25, 2015 and January 3, 2015, respectively. The highest outstanding daily balance during the sixteen weeks ended April 25, 2015 was \$59.5 million and the lowest outstanding balance was zero. Amounts outstanding under the credit facility vary daily. Changes in the gross borrowings and repayments can be caused by cash flow activity from operations, capital expenditures, acquisitions, dividends, share repurchases, and tax payments, as well as derivative transactions which are part of the company's overall risk management strategy as discussed in Note 7, *Derivative Financial Instruments*. During the sixteen weeks ended April 25, 2015, the company borrowed \$309.2 million in revolving borrowings under the credit facility and repaid \$358.4 million in revolving borrowings. The amount available under the credit facility is reduced by \$16.2 million for letters of credit. On April 25, 2015, the company had \$480.0 million available under its credit facility for working capital and general corporate purposes.

Credit Ratings. Currently, the company's credit ratings by Fitch Ratings, Moody's Investors Service, and Standard & Poor's are BBB, Baa2, and BBB-, respectively. Changes in the company's credit ratings do not trigger a change in the company's available borrowings or costs under the facility, new term loan, senior notes, and credit facility, but could affect future credit availability and cost.

Uses of Cash

On February 20, 2015, the Board of Directors declared a dividend of \$0.1325 per share on the company's common stock that was paid on March 20, 2015 to shareholders of record on March 6, 2015. This dividend payment was \$27.8 million. Dividends of \$0.9 million were paid at the time of vesting of our performance-contingent restricted stock award and at issuance of deferred compensation shares.

Our Board of Directors has approved a plan that authorizes share repurchases of up to 67,500,000 shares of the company's common stock. Under the plan, the company may repurchase its common stock in open market or privately negotiated transactions at such times and at such prices as determined to be in the company's best interest. These purchases may be commenced or suspended without prior notice depending on then-existing business or market conditions and other factors. During the first quarter of fiscal 2015, 318,399 shares, at a cost of \$6.9 million, of the company's common stock were purchased under the plan. From the inception of the plan through April 25, 2015, 60,874,113 shares, at a cost of \$504.1 million, have been purchased.

During the first quarter of fiscal 2015, the company paid \$16.4 million, including our share of employment taxes and deferred compensation contributions, relating to its formula-driven, performance-based cash bonus program earned during 2014. An additional \$1.5 million for our share of employment taxes on the vesting of the performance-contingent restricted stock award was also paid during the quarter.

During the first quarter of fiscal 2015, the company contributed \$2.5 million to our qualified pension plans. We expect to contribute an additional \$7.5 million to these plans during the remainder of fiscal 2015.

Table of Contents**Accounting Pronouncements Not Yet Adopted**

In May 2014, the FASB issued guidance for recognizing revenue in contracts with customers. This guidance requires entities to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. There are five steps outlined in the guidance to achieve this core principle. The company is still analyzing the potential impact of this guidance on the company's Condensed Consolidated Financial Statements. This guidance will be effective for our fiscal 2017, which begins on January 1, 2017.

In June 2014, the FASB issued guidance that requires performance targets for a share-based payment award that affects vesting and that could be achieved after the requisite service period is treated as a performance condition. The performance condition should not be reflected in the grant date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period for which the requisite service has already been rendered. The company already applies the standards proscribed in this guidance therefore it will not have an impact on the Condensed Consolidated Financial Statements. This guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015, which is our fiscal 2016.

In August 2014, the FASB issued guidance related to management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards and to provide related footnote disclosures. This guidance is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. The requirements of this guidance are not expected to have a significant impact on the Condensed Consolidated Financial Statements.

In January 2015, the FASB issued guidance that eliminates the concept of extraordinary items from GAAP. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The requirements of this guidance are not expected to have a significant impact on the Condensed Consolidated Financial Statements.

In February 2015, the FASB issued guidance that focuses on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments using a modified retrospective approach by recording a cumulative-effect adjustment to equity as of the beginning of the fiscal year of adoption. A reporting entity also may apply the amendments retrospectively. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. The company is still analyzing the potential impact of this guidance on the company's Condensed Consolidated Financial Statements.

In April 2015, the FASB issued guidance to simplify the presentation of debt issuance costs. This guidance requires that debt issuance costs related to a recognized debt liability be present in the balance sheet as a direct reduction from the carrying amount of that debt liability, consistent with debt discount presentation. This guidance is effective for financial statements for fiscal years beginning after December 15, 2015, and interim periods within those years. This guidance is applied on a retrospective basis at adoption and the disclosures for a change in an accounting principle apply. Earlier application is permitted. The requirements for this guidance are not expected to have a significant

impact on the Condensed Consolidated Financial Statements.

In April 2015, the FASB issued guidance to provide a practical expedient permitting applicable entities to measure defined benefit plan assets and obligations using the month-end that is closest to the entity's fiscal year-end and apply that practical expedient consistently from year to year. This guidance is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Earlier application is permitted. The company is still analyzing the potential impact of this guidance on the company's Condensed Consolidated Financial Statements.

In April 2015, the FASB issued guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. This guidance is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Earlier application is permitted. The company is still analyzing the potential impact of this guidance on the company's Condensed Consolidated Financial Statements.

We have reviewed other recently issued accounting pronouncements and concluded that they are either not applicable to our business or that no material effect is expected as a result of future adoption.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

The company uses derivative financial instruments as part of an overall strategy to manage market risk. The company uses forward, futures, swap and option contracts to hedge existing or future exposure to changes in interest rates and commodity prices. The company does not enter into these derivative financial instruments for trading or speculative purposes. If actual market conditions are less favorable than those anticipated, raw material prices could increase significantly, adversely affecting the margins from the sale of our products.

COMMODITY PRICE RISK

The company enters into commodity forward, futures and option contracts and swap agreements for wheat and, to a lesser extent, other commodities in an effort to provide a predictable and consistent commodity price and thereby reduce the impact of market volatility in its raw material and packaging prices. As of April 25, 2015, the company's hedge portfolio contained commodity derivatives with a fair value of \$(20.9) million. Of this fair value, \$(16.9) million is based on quoted market prices and \$(4.0) million is based on models and other valuation methods. Approximately \$(16.6) million of this fair value relates to instruments that will be utilized in fiscal 2015 and \$(4.3) million will be utilized in fiscal 2016.

A sensitivity analysis has been prepared to quantify the company's potential exposure to commodity price risk with respect to the derivative portfolio. Based on the company's derivative portfolio as of April 25, 2015, a hypothetical ten percent increase (decrease) in commodity prices would increase (decrease) the fair value of the derivative portfolio by \$10.9 million. The analysis disregards changes in the exposures inherent in the underlying hedged items; however, the company expects that any increase (decrease) in fair value of the portfolio would be substantially offset by increases (decreases) in raw material and packaging prices.

ITEM 4. CONTROLS AND PROCEDURES

Management's Evaluation of Disclosure Controls and Procedures

We have established and maintain a system of disclosure controls and procedures that are designed to ensure that material information relating to the company, which is required to be timely disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934, as amended (the Exchange Act), is accumulated and communicated to management in a timely fashion and is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our CEO, CFO, and CAO, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation our management concluded that our internal control over financial reporting was effective as of April 25, 2015.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter ended April 25, 2015 that have materially affected or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The company and its subsidiaries from time to time are parties to, or targets of, lawsuits, claims, investigations and proceedings, which are being handled and defended in the ordinary course of business. While the company is unable to predict the outcome of these matters, it believes, based upon currently available facts, that it is remote that the ultimate resolution of any such pending matters will have a material adverse effect on its overall financial condition, results of operations or cash flows in the future. However, adverse developments could negatively impact earnings in a particular future fiscal period.

The company's facilities are subject to various federal, state and local laws and regulations regarding the discharge of material into the environment and the protection of the environment in other ways. The company is not a party to any material proceedings arising under these regulations. The company believes that compliance with existing environmental laws and regulations will not materially affect the consolidated financial condition, results of operations, cash flows or the competitive position of the company. The company is currently in substantial compliance with all material environmental regulations affecting the company and its properties.

On September 12, 2012, a complaint was filed in the U.S. District Court for the Western District of North Carolina (Charlotte Division) by Scott Rehberg, Willard Allen Riley and Mario Ronchetti against the company and its subsidiary, Flowers Baking Company of Jamestown, LLC. Plaintiffs are or were distributors of our Jamestown subsidiary who contend they were misclassified as independent contractors. The action sought class certification on behalf of a class comprised of independent distributors of our Jamestown subsidiary who are classified as independent contractors. In March 2013, the court conditionally certified the class action for claims under the Fair Labor Standards Act (FLSA). On March 23, 2015, the court re-affirmed its FLSA certification decision and also certified claims under state law.

At this time, the company is also aware of four other complaints alleging misclassification claims that have been filed in four other jurisdictions. The company and/or its respective subsidiaries are vigorously defending these lawsuits. Given the stage of the complaints and the claims and issues presented, the company cannot reasonably estimate at this time the possible loss or range of loss, if any, that may arise from the unresolved lawsuits.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described below, together with all of the other information included in this report, in considering our business and prospects. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties not presently known to us, or that we currently deem insignificant, may also impair our business operations. The occurrence of any of the following risks could harm our business, financial condition, liquidity or results of operations. The following risk factors amend and restate, in their entirety, the risk factors set forth in Part I, Item 1A. *Risk Factors*, of our Annual Report on Form 10-K for the year ended January 3, 2015.

Economic conditions may negatively impact demand for our products, which could adversely impact our sales and operating profit.

The willingness of our customers and consumers to purchase our products depends in part on economic conditions. In recent years, economic conditions were significantly strained in the United States. Continuing or worsening economic challenges could have a negative impact on our business. Economic uncertainty may result in increased pressure to reduce the prices of some of our products, limit our ability to increase or maintain prices, and reduce sales of higher margin products or shift our product mix to low-margin products. In addition, changes in tax or interest rates, whether due to recession, financial and credit market disruptions or other reasons, could negatively impact us. If any of these events occurs, or if unfavorable economic conditions continue or worsen, our sales and profitability could be adversely affected.

Increases in costs and/or shortages of raw materials, fuels and utilities could adversely impact our profitability.

Commodities, such as flour, sweeteners, and shortening, which are used in our bakery products, are subject to price fluctuations. The cost of these inputs may fluctuate widely due to government policies and regulations, weather conditions, domestic and international demand, or other unforeseen circumstances. Any substantial change in the prices of raw materials may have an adverse impact on our profitability. We enter into forward purchase agreements and other derivative financial instruments from time to time to manage the impact of such volatility in raw materials prices; however, these strategies may not be adequate to overcome increases in market prices. Our failure to enter into effective hedging arrangements or any decrease in the availability or increase in the cost of these agreements and instruments could increase the price of these raw materials and significantly affect our earnings.

In addition, we are dependent upon natural gas or propane for firing ovens. Our independent distributors and third-party shipping companies are dependent upon gasoline and diesel for their vehicles. The cost of fuel may fluctuate widely due to economic and political conditions, government policy and regulation, war, or other unforeseen circumstances. Substantial future increases in prices for, or shortages of, these fuels could have a material adverse effect on our profitability, financial condition or results of operations. There can be no assurance that we can cover these cost increases through future pricing actions. Also, as a result of these pricing actions, consumers could purchase less or move from purchasing high-margin products to lower-margin products.

Competition could adversely impact revenues and profitability.

The United States bakery industry is highly competitive. Our principal competitors in these categories all have substantial financial, marketing, and other resources. In most product categories, we compete not only with other widely advertised branded products, but also with store branded products that are generally sold at lower prices. Competition is based on product availability, product quality, price, effective promotions, and the ability to target changing consumer preferences. We experience price pressure from time to time due to competitors' promotional activity and other pricing efforts. This pricing pressure is particularly strong during adverse economic periods. Increased competition could result in reduced sales, margins, profits and market share.

Table of Contents

The costs of maintaining and enhancing the value and awareness of our brands are increasing, which could have an adverse impact on our revenues and profitability.

We rely on the success of our well-recognized brand names and we intend to maintain our strong brand recognition by continuing to devote resources to advertising, marketing and other brand building efforts. Brand value could diminish significantly due to a number of factors, including consumer perception that we have acted in an irresponsible manner, adverse publicity about our products (whether or not valid), our failure to maintain the quality of our products, the failure of our products to deliver consistently positive consumer experiences, or the products becoming unavailable to consumers. Our marketing investments may not prove successful in maintaining or increasing our market share. If we are not able to successfully maintain our brand recognition, our revenues and profitability could be adversely affected.

We rely on several large customers for a significant portion of our sales and the loss of one of our large customers could adversely affect our financial condition and results of operations.

We have several large customers that account for a significant portion of our sales, and the loss of one of our large customers could adversely affect our results of operations. Our top ten customers accounted for 43.9% of our sales during fiscal 2014. Our largest customer, Walmart/Sam's Club, accounted for 19.5% of our sales during this period. These customers do not typically enter into long-term sales contracts, and instead make purchase decisions based on a combination of price, product quality, consumer demand, and customer service performance. At any time, they may use more of their shelf space, including space currently used for our products, for store branded products or for products from other suppliers. Additionally, our customers may face financial or other difficulties that may impact their operations and their purchases from us. Disputes with significant suppliers could also adversely affect our ability to supply products to our customers. If our sales to one or more of these customers are reduced, this reduction may adversely affect our business, financial condition or results of operations.

Inability to anticipate or respond to changes in consumer preferences may result in decreased demand for our products, which could have an adverse impact on our future growth and operating results.

Our success depends, in part, on our ability to respond to current market trends and to anticipate the tastes and dietary habits of consumers, including concerns of consumers regarding health and wellness, obesity, product attributes, and ingredients. Introduction of new products and product extensions requires significant development and marketing investment. If our products fail to meet consumer preferences, or we fail to introduce new and improved products on a timely basis, then the return on that investment will be less than anticipated and our strategy to grow sales and profits with investments in marketing and innovation will be less successful. If we fail to anticipate, identify, or react to changes in consumer preferences, or we fail to introduce new or improved products on a timely basis we could experience reduced demand for our products, which could in turn cause our operating results to suffer.

We may be adversely impacted by the failure to successfully execute acquisitions and divestitures and integrate acquired operations.

From time to time, the company undertakes acquisitions or divestitures. In fiscal 2013, we acquired the Acquired Hostess Bread Assets, certain assets and the *Sara Lee* trademark licenses from BBU in California, and certain assets related to a bun line in Modesto, California. The success of these acquisitions, or any other acquisition or divestiture depends on the company's ability to identify opportunities that help us meet our strategic objectives, consummate a transaction on favorable contractual terms, and achieve expected returns and other financial benefits.

Acquisitions, including our recent acquisitions, require us to efficiently integrate the acquired business or businesses, which involves a significant degree of difficulty, including the following:

integrating the operations of the acquired businesses while carrying on the ongoing operations of the businesses we operated prior to the acquisitions;

managing a significantly larger company than before consummation of the acquisitions;

the possibility of faulty assumptions underlying our expectations regarding the integration process;

coordinating a greater number of diverse businesses and businesses located in a greater number of geographic locations;

integrating different business cultures;

attracting and retaining the necessary personnel associated with the acquisitions;

creating uniform standards, controls, procedures, policies and information systems and controlling the costs associated with such matters; and

integrating information, purchasing, accounting, finance, sales, billing, payroll and regulatory compliance systems.

Table of Contents

Divestitures have operational risks that may include impairment charges. Divestitures also present unique financial and operational risks, including diversion of management attention from the existing core business, separating personnel and financial data and other systems, and adverse effects on existing business relationships with suppliers and customers.

In situations where acquisitions or divestitures are not successfully implemented or completed, the company's business or financial results could be negatively impacted.

This risk includes our expectations about the performance of acquired trademarks and brands. If we are unable to implement our growth strategies for these acquired intangible assets as expected, it could adversely impact the carrying value of the acquired brands. The fair value of the trademarks could be less than our carrying value if any of our four material assumptions in our fair value analysis: (a) weighted average cost of capital; (b) long-term sales growth rates; (c) forecasted operating margins; and (d) market multiples do not meet our expectations, thereby requiring us to record an asset impairment.

Consolidation in the retail and foodservice industries could affect our sales and profitability.

If our retail and foodservice customers continue to grow larger due to consolidation in their respective industries, they may demand lower pricing and increased promotional programs. Meeting these demands could adversely affect our sales and profitability.

Our large customers may impose requirements on us that may adversely affect our results of operations.

From time to time, our large customers may re-evaluate or refine their business practices and impose new or revised requirements on us and their other suppliers. The growth of large mass merchandisers, supercenters and dollar stores, together with changes in consumer shopping patterns, have produced large, sophisticated customers with increased buying power and negotiating strength. Current trends among retailers and foodservice customers include fostering high levels of competition among suppliers, demanding new products or increased promotional programs, requiring suppliers to maintain or reduce product prices, and requiring product delivery with shorter lead times. These business changes may involve inventory practices, logistics, or other aspects of the customer-supplier relationship. Compliance with requirements imposed by major customers may be costly and may have an adverse effect on our margins and profitability. However, if we fail to meet a significant customer's demands, we could lose that customer's business, which also could adversely affect our results of operations.

Our inability to execute our business strategy could adversely affect our business.

We employ various operating strategies to maintain our position as one of the nation's leading producers and marketers of bakery products available to customers through multiple channels of distribution. If we are unsuccessful in implementing or executing one or more of these strategies, our business could be adversely affected.

Increases in employee and employee-related costs could have adverse effects on our profitability.

Pension, health care, and workers' compensation costs are increasing and will likely continue to do so. Any substantial increase in pension, health care or workers' compensation costs may have an adverse impact on our profitability. The company records pension costs and the liabilities related to its benefit plans based on actuarial valuations, which include key assumptions determined by management. Material changes in pension costs may occur in the future due to changes in these assumptions. Future annual amounts could be impacted by various factors, such as changes in the number of plan participants, changes in the discount rate, changes in the expected long-term rate of return, changes in

the level of contributions to the plan, and other factors. In addition, legislation or regulations involving labor and employment and employee benefit plans (including employee health care benefits and costs) may impact our operational results.

We have risks related to our pension plans, which could impact the company's liquidity.

The company has trustee, noncontributory defined benefit pension plans covering certain employees maintained under the U.S. Employee Retirement Income Security Act of 1974 (ERISA). The funding obligations for our pension plans are impacted by the performance of the financial markets, including the performance of our common stock, which comprised approximately 10.3% of all the pension plan assets as of January 3, 2015.

If the financial markets do not provide the long-term returns that are expected, the likelihood of the company being required to make larger contributions will increase which could impact our liquidity. The equity markets can be, and recently have been, very volatile, and therefore our estimate of future contribution requirements can change dramatically in relatively short periods of time. Similarly, changes in interest rates can impact our contribution requirements. In a low interest rate environment, the likelihood of larger required contributions increases. Adverse developments in any of these areas could adversely affect our financial condition, liquidity or results of operations.

Table of Contents

A disruption in the operation of our DSD distribution system could negatively affect our results of operations, financial condition and cash flows.

We believe that our DSD distribution system is a significant competitive advantage. A material negative change in our relationship with the independent distributors, litigation or one or more adverse rulings by courts or regulatory or governmental bodies in various jurisdictions regarding our independent distributorship system, including actions or decisions that could affect the independent contractor classifications of our independent distributors, or an adverse judgment against the company for actions taken by the independent distributors could materially affect our financial condition, results of operations, and cash flows.

Disruption in our supply chain or distribution capabilities from political instability, armed hostilities, incidents of terrorism, natural disasters, weather or labor strikes could have an adverse effect on our business, financial condition and results of operations.

Our ability to make, move and sell products is critical to our success. Damage or disruption to our manufacturing or distribution capabilities, or the manufacturing or distribution capabilities of our suppliers due to weather, natural disaster, fire or explosion, terrorism, pandemics or labor strikes, could impair our ability to manufacture or sell our products. Moreover, terrorist activity, armed conflict, political instability or natural disasters that may occur within or outside the U.S. may disrupt manufacturing, labor, and other business operations. Failure to take adequate steps to mitigate the likelihood or potential impact of such events, or to effectively manage such events if they occur, could adversely affect our business, financial conditions and results of operations.

Future product recalls or safety concerns could adversely impact our results of operations.

We may be required to recall certain of our products should they be mislabeled, contaminated, spoiled, tampered with or damaged. We also may become involved in lawsuits and legal proceedings if it is alleged that the consumption of any of our products causes injury, illness or death. A product recall or an adverse result in any such litigation could have a material adverse effect on our operating and financial results, depending on the costs of the recall, the destruction of product inventory, competitive reaction and consumer attitudes. Even if a product liability or consumer fraud claim is unsuccessful or without merit, the negative publicity surrounding such assertions regarding our products could adversely affect our reputation and brand image. We also could be adversely affected if consumers in our principal markets lose confidence in the safety and quality of our products.

We are subject to increasing legal complexity and could be party to litigation that may adversely affect our business.

Increasing legal complexity may continue to affect our operations and results in material ways. We could be subject to legal proceedings that may adversely affect our business, including class actions, administrative proceedings, government investigations, employment and personal injury claims, disputes with current or former suppliers, claims by current or former distributors, and intellectual property claims (including claims that we infringed another party's trademarks, copyrights, or patents). Inconsistent standards imposed by governmental authorities can adversely affect our business and increase our exposure to litigation. Litigation involving our independent distributor system and the independent contractor classification of our independent distributors, if determined adversely, could increase costs, negatively impact the business prospects of our distributors and subject us to incremental liability for their actions. We are also subject to the legal and compliance risks associated with privacy, data collection, protection and management, in particular as it relates to information we collect when we provide products to customers.

We may be adversely impacted if our information technology systems fail to perform adequately, including with respect to cybersecurity issues.

The efficient operation of our business depends on our information technology systems. We rely on our information technology systems to effectively manage our business data, communications, supply chain, order entry and fulfillment, and other business processes. The failure of our information technology systems (including those provided to us by third parties) to perform as we anticipate could disrupt our business and could result in billing, collecting, and ordering errors, processing inefficiencies, and the loss of sales and customers, causing our business and results of operations to suffer.

In addition, our information technology systems may be vulnerable to damage or interruption from circumstances beyond our control, including fire, natural disasters, systems failures, security breaches or intrusions (including theft of customer, consumer or other confidential data), and viruses. If we are unable to prevent physical and electronic break-ins, cyber-attacks and other information security breaches, we may suffer financial and reputational damage, be subject to litigation or incur remediation costs or penalties because of the unauthorized disclosure of confidential information belonging to us or to our partners, customers, suppliers or employees.

Government regulation could adversely impact our results of operations and financial condition.

As a producer and marketer of food items, our production processes, product quality, packaging, labeling, storage, and distribution are subject to regulation by various federal, state and local government entities and agencies. In addition, the marketing and labeling of food products has come under increased scrutiny in recent years, and the food industry has been subject to an increasing number of legal proceedings and claims relating to alleged false or deceptive marketing and labeling under federal, state or local laws or regulations. Uncertainty regarding labeling standards has led to customer confusions and legal challenges.

Compliance with federal, state and local regulations is costly and time consuming. Failure to comply with, or violations of, applicable laws and the regulatory requirements of one or more of these agencies could subject us to civil remedies, including fines, injunctions, recalls or seizures, as well as potential criminal sanctions, any of which could result in increased operating costs and adversely affect our results of operations and financial condition. Legal proceedings or claims related to our marketing could damage our reputation and/or adversely affect our business or financial results.

Table of Contents

Climate change or changes in or new interpretations of applicable laws or regulations involving government regulations to limit carbon dioxide and other greenhouse gas emissions may result in increased compliance costs, capital expenditures, and other financial obligations that could affect our profitability or impede the production or distribution of our products and have an adverse effect on our results of operations, liquidity and financial condition.

There is growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather patterns, and the frequency and severity of extreme weather and natural disasters. In the event that such climate change has a negative effect on agricultural productivity, we may be subject to decreased availability or less favorable pricing for certain commodities that are necessary for our products, such as corn, wheat, and soybeans. We may also be subjected to decreased availability or less favorable pricing for water as a result of such change, which could impact our manufacturing and distribution operations. In addition, natural disasters and extreme weather conditions may disrupt the productivity of our facilities or the operation of our supply chain.

The increasing concern over climate change also may result in more regional, federal, and/or global legal and regulatory requirements to reduce or mitigate the effects of greenhouse gases. We use natural gas, diesel fuel, and electricity in the manufacturing and distribution of our products. Legislation or regulation affecting these inputs could materially affect our results of operations, liquidity and financial condition since they could affect our ability to procure our commodity needs at costs we currently experience and may require additional unplanned capital expenditures. In the event that such regulation is enacted and is more aggressive than the sustainability measures that we are currently undertaking to monitor our emissions and improve our energy efficiency, we may experience significant increases in our costs of operation and delivery.

Failure to maximize or to successfully assert our intellectual property rights could impact our competitiveness.

We rely on trademark, trade secret, patent and copyright laws to protect our intellectual property rights. We cannot be sure that these intellectual property rights will be maximized or that they can be successfully asserted. There is a risk that we will not be able to obtain and perfect our own or, where appropriate, license intellectual property rights necessary to support new product introductions. We cannot be sure that these rights, if obtained, will not be invalidated, circumvented or challenged in the future. Our failure to perfect or successfully assert our intellectual property rights could make us less competitive and could have an adverse effect on our business, operating results and financial condition.

Our articles of incorporation and bylaws, and Georgia law may inhibit a change in control that you may favor.

Our articles of incorporation and bylaws, and Georgia law contain provisions that may delay, deter or inhibit any possible future acquisition of our company if not approved by our Board of Directors. This could occur even if our shareholders are offered an attractive value for their shares or if a substantial number or even a majority of our shareholders believe the takeover is in their best interest. These provisions are intended to encourage any person interested in acquiring us to negotiate with and obtain the approval of our Board of Directors in connection with the transaction. Provisions in our organizational documents that could delay, deter or inhibit a future acquisition include the following:

A classified Board of Directors, subject to the Board of Directors' determination on November 21, 2014 to seek shareholder approval of a proposal to declassify the Board of Directors at the 2015 Annual Meeting of Shareholders;

The requirement that our shareholders may only remove directors for cause;

Specified requirements for calling special meetings of shareholders;

The ability to issue preferred stock, which would be issued with voting, liquidation, dividend and other rights superior to our common stock; and

The ability of the Board of Directors to consider the interests of various constituencies, including our employees, customers, creditors, and the local community.

Our articles of incorporation also permit the Board of Directors to issue shares of preferred stock with such designations, powers, preferences and rights as it determines, without any further vote or action by our shareholders.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

Our Board of Directors has approved a plan that authorizes share repurchases of up to 67.5 million shares of the company's common stock. At the Board of Directors meeting in November 2014, the Board increased the company's share repurchase authorization by 7.1 million shares to a total of 74.6 million shares. Under the plan, the company may repurchase its common stock in open market or privately negotiated transactions at such times and at such prices as determined to be in the company's best interest. These purchases may be commenced or suspended without prior notice depending on then-existing business or market conditions and other factors.

The following chart sets forth the amounts of our common stock purchased by the company during the first quarter of fiscal 2015.

Period	Total Number of Shares Purchased	Average Price Per Share	Total Number of Shares that May Yet Be Purchased Under the Plan or Programs	
			as Part of Publicly Announced Plans or Programs	May Yet Be Purchased Under the Plan or Programs
January 5, 2015 – January 31, 2015				14,000
February 1, 2015 – February 28, 2015	318	\$ 21.54	318	13,682
March 1, 2015 – March 28, 2015				13,682
March 29, 2015 – April 25, 2015				13,682
Total	318	\$ 21.54	318	

(Amounts in thousands, except price data)
