Fourth quarter 2018 net interest income of \$1.2 billion increased \$24 million, or 2%, from third quarter 2018, given a 2% increase in average loans and loans held for sale and a three basis point improvement in net interest margin to 3.22%. The improvement in net interest margin reflects higher loan yields tied to higher rates, partially offset by increased deposit and funding costs.

Edgar Filing: CITIZENS FINANCIAL GROUP INC/RI - Form 8-K

Compared with fourth quarter 2017, net interest income increased \$92 million, or 9%, driven by 5% average loan growth and a 14 basis point improvement in net interest margin. The improvement in net interest margin reflects higher interest-earning asset yields given higher rates and continued mix shift towards higher-yielding assets, partially offset by higher deposit and funding costs. Net interest margin, excluding the impact of FAMC,* improved 15 basis points to 3.23%.

1) Other income includes bank-owned life insurance and other income.

Noninterest income of \$421 million increased \$5 million, or 1%, from third quarter 2018, driven by the \$9 million impact of the FAMC acquisition largely in mortgage banking fees. Underlying noninterest income, excluding the impact of FAMC,* remained relatively stable as strength in foreign exchange and interest rate products and letter of credit and loan fees was largely offset

by a reduction in mortgage banking and capital markets fees tied to overall market conditions. Securities gains of \$6 million were partially offset by a \$2 million net loss in foreign exchange and interest rate products tied to credit valuation adjustments, related to interest rate moves during fourth quarter 2018.

Compared to fourth quarter 2017, noninterest income increased \$17 million, or 4%, including a \$33 million impact of the FAMC acquisition. Underlying noninterest income, excluding the impact of FAMC,* increased \$6 million, or 2%, driven by strength in card fees, letter of credit and loan fees, capital markets fees and foreign exchange and interest rate products. These increases were partially offset by lower mortgage banking fees and other income, reflecting a reduction in leasing income.

Noninterest expense of \$951 million increased \$41 million, or 5%, from third quarter 2018, driven by the \$46 million increase tied to the FAMC acquisition and notable items, largely in salaries and employee benefits. Underlying noninterest expense, excluding the impact of FAMC,* of \$871 million decreased by \$5 million, as a reduction in other

operating expense, tied largely to a reduction in FDIC insurance expense, and lower occupancy expense were partially offset by seasonally higher outside services and an increase in salaries and employee benefits tied to growth initiatives. Results reflect continued focus on expense discipline and the benefit of TOP efficiency initiatives.

Compared with fourth quarter 2017, noninterest expense increased \$53 million, or 6%, driven by the impact of the FAMC acquisition and notable items. Underlying noninterest expense, excluding the impact of FAMC,* increased \$13 million, or 2%, largely reflecting a \$24 million increase in salaries and employee benefits tied to the impact of our strategic growth initiatives, as well as an increase in amortization of software and equipment and outside services expense. These increases were partially offset by lower other expense, largely tied to a reduction in FDIC insurance and pension costs, as well as lower occupancy expense.

The fourth quarter 2018 effective tax rate of 16.5%, including the impact of notable items tied to the true-up of December 2017 Tax Legislation, decreased from 23.2% for third quarter 2018 and increased from (32.4)% for fourth quarter 2017. On an Underlying basis, excluding notable items,* the effective tax rate was 21.9% for fourth quarter 2018 and 33.7% for fourth quarter 2017.

Allowance for loan and lease losses as a % of nonperforming loans and leases	156.0 %	149.3 %	142.0 %	670 bps		NM	

Overall credit quality remains strong, reflecting growth in high quality retail loans and a broadly stable risk profile in commercial portfolios. Nonperforming loans and leases of \$797 million decreased \$35 million, or 4%, from September 30, 2018, reflecting a \$57 million decrease in commercial, given payoffs and returns to accruing status, partially offset by a \$22 million increase in retail, driven by seasonal increases in home equity, credit card and auto, as well as the expected seasoning of the retail unsecured portfolio. Compared to December 31, 2017, nonperforming loans and leases decreased \$74 million, or 8%, reflecting a \$64 million decrease in commercial, given a reduction in nonperforming commodities-related credits, and a \$10 million decrease in retail, largely in home equity. The nonperforming loans and leases to total loans and leases ratio of 0.68% at December 31, 2018 improved five basis points from 0.73% at September 30, 2018 and improved 11 basis points from 0.79% at December 31, 2017.

Net charge-offs of \$85 million were relatively stable compared with third quarter 2018, reflecting an \$8 million decrease in commercial, reflecting higher recoveries, partially offset by a \$7 million increase in retail largely driven by expected seasoning in the retail unsecured portfolio. Compared with fourth quarter 2017, net charge-offs increased

\$7 million, reflecting a \$6 million increase in commercial net charge-offs, and relatively stable results in retail as the impact of expected seasoning in unsecured portfolios was offset by improvement in auto. Fourth quarter 2018 net charge-offs of 29 basis points of average loans and leases compares with 30 basis points in third quarter 2018 and 28 basis points in fourth quarter 2017.

Allowance for loan and lease losses of \$1.2 billion is stable compared with third quarter 2018 and fourth quarter 2017 levels, reflecting strong overall credit quality that helped offset reserves to fund year-over-year loan growth.

The ratio of the allowance for loan and lease losses to total loans and leases was 1.06% as of December 31, 2018, which was stable compared with 1.08% as of September 30, 2018 and down modestly from 1.12% as of December 31, 2017. The allowance for loan and lease losses to nonperforming loans and leases ratio of 156% as of December 31, 2018 compares to 149% as of September 30, 2018, and 142% as of December 31, 2017, reflecting the decrease in nonperforming loans.

Key Performance Metrics and Non-GAAP Financial Measures and Reconciliations

(in millions, except share, per-share and ratio data)

Key Performance Metrics:

Our Management uses certain key performance metrics (KPMs) to gauge our progress against strategic and operational goals, as well as to compare our performance against peers. The KPMs are referred to in our Registration Statements on Form S-1 and our external financial reports filed with the Securities and Exchange Commission. The KPMs include:

- Return on average tangible common equity (ROTCE);
- Return on average total tangible assets (ROTA);
- Efficiency ratio;
- Operating leverage; and
- Common equity tier 1 capital ratio.

Established targets for the KPMs are based on Management-reporting results which are currently referred to by the Company as Underlying results. In historical periods, these results may have been referred to as Adjusted or Adjusted/Underlying results. We believe that Underlying results, which exclude notable items, provide the best representation of our underlying financial progress toward the KPMs as the results exclude items that our Management does not consider indicative of our on-going financial performance. We have consistently shown investors our KPMs on a Management-reporting basis since our initial public offering in September of 2014. KPMs that reflect Underlying results are considered non-GAAP financial measures.

Non-GAAP Financial Measures:

This document contains non-GAAP financial measures denoted as Underlying results. In historical periods, these results may have been referred to as Adjusted or Adjusted/Underlying results. Underlying results for any given reporting period exclude certain items that may occur in that period which Management does not consider indicative of the Company's on-going financial performance. We believe these non-GAAP financial measures provide useful information to investors because they are used by our Management to evaluate our operating performance and make day-to-day operating decisions. In addition, we believe our Underlying results in any given reporting period reflect our on-going financial performance in that period and, accordingly, are useful to consider in addition to our GAAP financial results. We further believe the presentation of Underlying results increases comparability of period-to-period results. The following tables present reconciliations of our non-GAAP measures to the most directly comparable GAAP financial measures.

Other companies may use similarly titled non-GAAP financial measures that are calculated differently from the way we calculate such measures. Accordingly, our non-GAAP financial measures may not be comparable to similar measures used by such companies. We caution investors not to place undue reliance on such non-GAAP financial measures, but to consider them with the most directly comparable GAAP measures. Non-GAAP financial measures have limitations as analytical tools and should not be considered in isolation or as a substitute for our results reported under GAAP.

¹As of January 1, 2018, we retrospectively adopted ASU 2017-07, *Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost*, which requires the service cost component of net periodic pension and postretirement benefit cost to be reported separately in the Consolidated Statements of Operations from the other components. Prior periods have been adjusted to conform with the current period presentation.

Forward-Looking Statements

This document contains forward-looking statements within the Private Securities Litigation Reform Act of 1995. Any statement that does not describe historical or current facts is a forward-looking statement. These statements often include the words believes, expects, anticipates, estimates, intends, plans, goals, targets, initiatives, probably, projects, outlook or similar expressions or future conditional verbs such as may, will, should, would, could.

Forward-looking statements are based upon the current beliefs and expectations of management, and on information currently available to management. Our statements speak as of the date hereof, and we do not assume any obligation to update these statements or to update the reasons why actual results could differ from those contained in such statements in light of new information or future events. We caution you, therefore, against relying on any of these forward-looking statements. They are neither statements of historical fact nor guarantees or assurances of future performance. While there is no assurance that any list of risks and uncertainties or risk factors is complete, important factors that could cause actual results to differ, materially, from those in the forward-looking statements include the following, without limitation:

negative economic conditions that adversely affect the general economy, housing prices, the job market, consumer confidence and spending habits which may affect, among other things, the level of nonperforming assets, charge-offs and provision expense;

the rate of growth in the economy and employment levels, as well as general business and economic conditions;

our ability to implement our strategic plan, including the cost savings and efficiency components, and achieve our indicative performance targets;

our ability to remedy regulatory deficiencies and meet supervisory requirements and expectations;

liabilities and business restrictions resulting from litigation and regulatory investigations;

our capital and liquidity requirements (including under regulatory capital standards, such as the Basel III capital standards) and our ability to generate capital internally or raise capital on favorable terms;

the effect of changes in interest rates on our net interest income, net interest margin and our mortgage originations, mortgage servicing rights and mortgages held for sale;

changes in interest rates and market liquidity, as well as the magnitude of such changes, which may reduce interest margins, impact funding sources and affect the ability to originate and distribute financial products in the primary and secondary markets;

the effect of changes in the level of checking or savings account deposits on our funding costs and net interest margin;

financial services reform and other current, pending or future legislation or regulation that could have a negative effect on our revenue and businesses, including the Dodd-Frank Act and other legislation and regulation relating to bank products and services;

a failure in or breach of our operational or security systems or infrastructure, or those of our third party vendors or other service providers, including as a result of cyber-attacks; and management's ability to identify and manage these and other risks.

In addition to the above factors, we also caution that the amount and timing of any future common stock dividends or share repurchases will depend on our financial condition, earnings, cash needs, regulatory constraints, capital requirements (including requirements of our subsidiaries), and any other factors that our board of directors deems relevant in making such a determination. Therefore, there can be no assurance that we will pay any dividends to holders of our common stock, or as to the amount of any such dividends.

More information about factors that could cause actual results to differ materially from those described in the forward-looking statements can be found under **Risk Factors** in Part I, Item 1A in our Annual Report on Form 10-K for the year ended December 31, 2017, filed with the United States Securities and Exchange Commission on February 24, 2018.
