# 11. Mortgage Servicing Rights

The following summarizes the Corporation s activity related to mortgage servicing rights (MSRs) for the nine months ended September 30, 2010 and 2009:

(dollars in thousands)	2010	2009
Balance, January 1	\$ 4,059	\$ 2,205
Additions	951	2,264
Amortization	(615)	(637)
Recovery	4	333
Impairment	(390)	(371)
Balance, September 30	\$ 4,009	\$ 3,794
Fair value	\$ 4,082	\$4,338

At September 30, 2010, key economic assumptions and the sensitivity of the current fair value of MSRs to immediate 10 and 20 percent adverse changes in those assumptions are as follows:

	September 30,	
(dollars in thousands)	2010	
Fair value amount of MSRs	\$	4,082
Weighted average life (in years)		3.94
Prepayment speeds (constant prepayment rate) *:		19.4%
Impact on fair value:		
10% adverse change	\$	(263)
20% adverse change	\$	(501)
Discount rate:		10.26%
Impact on fair value:		
10% adverse change	\$	(119)
20% adverse change	\$	(231)

<sup>\*</sup> Represents the weighted average prepayment rate for the life of the MSR asset.

These assumptions and sensitivities are hypothetical and should be used with caution. Changes in fair value based on a 10% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumptions to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the MSRs is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which could magnify or counteract the sensitivities.

## 12. Goodwill and Other Intangibles

The goodwill and intangible balances presented below resulted from the acquisition of FKF on July 1, 2010, and the acquisition of Lau Associates LLC ( Lau ) in the third quarter of 2008. For further information regarding the goodwill and other intangible assets recorded in connection with the acquisition of FKF, please refer to Footnote 2, above. For further information on the goodwill and other intangible assets associated with the acquisition of Lau, please refer to Footnote 2 in the Corporation s 2009 Annual Report.

The changes in the carrying amount of goodwill and intangibles were as follows for the dates indicated:

Edgar Filing: ELEVON INC - Form 4

(dollars in thousands)	Goodwill	Int	angibles
Balance January 1, 2010	\$ 6,301	\$	5,421
Additions	10,370		2,127
Amortization			(320)
Impairment			
Balance September 30, 2010	\$ 16,671	\$	7,228

The Corporation performed the annual review of its goodwill and identifiable intangible assets as of December 31, 2009 in accordance with ASC 350, Intangibles, Goodwill and Other. As a result of this review, the Corporation determined there was no impairment of goodwill or other intangible assets.

### 13. Shareholder s Equity and Regulatory Capital

#### Dividend

The Corporation declared and paid a regular dividend of \$0.14 per share for each of the first, second and third quarters of 2010. These payments totaled \$4.2 million. On October 28, 2010, the Corporation s Board of Directors declared a regular quarterly dividend of \$0.14 per share payable December 1, 2010 to shareholders of record as of November 18, 2010.

#### **Dividend Reinvestment and Stock Purchase Plan**

On July 20, 2009, the Corporation filed with the Securities and Exchange Commission, a prospectus supplement ( Prospectus Supplement ) to its base prospectus in its Shelf Registration Statement (File No. 333-163874) (the Shelf Registration Statement ) pursuant to Section 424(b)(2) of the Securities Act of 1933, as amended ( Securities Act ) in order to register the issuance of up to 850,000 shares of common stock under its Shelf Registration Statement in connection with a Dividend Reinvestment and Stock Purchase Plan (the DRIP ). The DRIP is intended to allow both existing shareholders and new investors to increase their investment in the Corporation without incurring many of the fees and commissions normally associated with brokerage transactions. For the nine months ended September 30, 2010, the DRIP had total purchases of \$2.1 million, or 122,031 common shares.

## **Registered Direct Common Stock Offering**

On May 18, 2010, the Corporation completed the registration and sale of 1,548,167 shares of common stock, par value \$1.00, at a price of \$17.00 per share under the Shelf Registration Statement. The Corporation received net proceeds of \$24.6 million, after deducting placement agents fees and other offering expenses.

### Acquisition of First Keystone Financial, Inc.

On July 1, 2010, the Corporation completed its acquisition of First Keystone Financial, Inc., as discussed in Footnote 2, above. As a result of the acquisition, the Corporation issued 1,630,134 common shares valued at \$26.4 million. In addition, the Corporation recognized \$102 thousand in paid-in-capital for the fair value of FKF employee stock options that were converted to options to purchase shares of common stock of the Corporation.

### **Regulatory Capital**

Consolidated shareholders—equity of the Corporation was \$158.3 million, or 9.2 % of total assets as of September 30, 2010, compared to \$103.9 million, or 8.4% of total assets, as of December 31, 2009. This increase is primarily due to the acquisition of FKF and the registered direct offering discussed above. The following table presents the Corporation—s and Bank—s capital ratios and the minimum capital requirements to be considered—Well Capitalized—by regulators as of September 30, 2010 and December 31, 2009.

	Actua	Actual		um ipitalized
(dollars in thousands)	Amount	Amount Ratio		Ratio
September 30, 2010:				
Total (Tier II) Capital to Risk Weighted Assets				
Corporation	\$ 181,712	13.19%	\$ 137,716	10.00%
Bank	174,803	12.75%	137,099	10.00%
Tier I Capital to Risk Weighted Assets				
Corporation	\$ 148,844	10.81%	82,630	6.00%
Bank	141,958	10.35%	82,259	6.00%
Tier I Leverage Ratio (Tier I Capital to Total Quarterly Average Assets)				
Corporation	\$ 148,844	8.65%	86,001	5.00%
Bank	141,958	8.27%	85,807	5.00%

Tangible Common Equity to Tangible Assets	
Corporation	7.95%
Bank	8.20%

			Minim	um
	Actua	Actual		apitalized
	Amount	Amount Ratio		Ratio
December 31, 2009:				
Total (Tier II) Capital to Risk Weighted Assets				
Corporation	\$ 132,226	12.53%	\$ 105,533	10.00%
Bank	128,185	12.20%	105,092	10.00%
Tier I Capital to Risk Weighted Assets				
Corporation	99,277	9.41%	63,320	6.00%
Bank	95,236	9.06%	63,055	6.00%
Tier I Leverage Ratio (Tier I Capital to Total Quarterly Average Assets)				
Corporation	99,277	8.35%	59,478	5.00%
Bank	95,236	8.03%	59,327	5.00%
Tangible Common Equity to Tangible Assets				
Corporation		7.51%		
Bank		7.22%		

Both the Corporation and the Bank exceed the required capital levels to be considered Well Capitalized by their respective regulators at the end of each period presented. Neither the Corporation nor the Bank are under any agreement with regulatory authorities, nor is Management aware of any current recommendations by the regulatory authorities, which, if such recommendations were implemented, would have a material effect on liquidity, capital resources or operations of the Corporation.

### 14. Accounting for Uncertainty in Income Taxes

The Corporation recognizes the financial statement benefit of a tax position only after determining that the Corporation would be more likely than not to sustain the position following an examination. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being sustained upon examination with the relevant tax authority.

The Corporation is subject to income taxes both federally and in multiple state jurisdictions. The Corporation is no longer subject to U.S. federal income tax examination by taxing authorities for years before 2008.

The Corporation s policy is to record interest and penalties on uncertain tax positions as income tax expense. No interest or penalties were accrued in the third quarter of 2010. There were no significant liabilities accrued during the first nine months of 2010.

### 15. Fair Value Measurement

The following disclosures are made in conjunction with the application of fair value measurements.

FASB ASC 820, Fair Value Measurement , establishes a fair value hierarchy based on the nature of data inputs for fair value determinations, under which the Corporation is required to value each asset using assumptions that market participants would utilize to value that asset. When the Corporation uses its own assumptions, it is required to disclose additional information about the assumptions used and the effect of the measurement on earnings or the net change in assets for the period.

The value of the Corporation s investment securities which generally includes state and municipal securities, U.S. Treasury securities, U.S. government agencies and mortgage backed securities are reported at fair value. These securities are valued by an independent third party. The third party s evaluations are based on market data and utilize evaluated pricing models that vary by asset and incorporate available trade, bid and other market information. For securities that do not trade on a daily basis their pricing applications apply available information such as benchmarking and matrix pricing. The market inputs normally sought in the evaluation of securities include benchmark yields, reported trades, broker/dealer quotes (only obtained from market makers or broker/dealers recognized as market participants), issuer spreads, two-sided markets, benchmark securities, bid, offers and reference data. For certain securities, additional inputs may be used or some market inputs may not be applicable. Inputs are prioritized differently on any given day based on market conditions.

Trading securities are evaluated using quoted prices in active markets. U.S. Government agencies are evaluated and priced using multi-dimensional relational models and option adjusted spreads. State and municipal securities are evaluated on a series of matrices including

reported trades and material event notices. Mortgage backed securities are evaluated using matrix correlation to treasury or floating index benchmarks, prepayment speeds, monthly payment information and other benchmarks.

The investment securities classified as available for sale are shown below.

25

The value of the investment portfolio is determined using three broad levels of inputs:

Level 1 Quoted prices in active markets for identical securities;

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model derived valuations whose inputs are observable or whose significant value drivers are observable.

Level 3 Instruments whose significant value drivers are unobservable.

These levels are not necessarily an indication of the risks or liquidity associated with these investments. The following table summarizes the assets at September 30, 2010 that are recognized on the Corporation s balance sheet using fair value measurement determined based on the differing levels of input.

(dollars in millions)	Level 1	Level 2	Level 3	Total
Assets Measured at Fair Value on a Recurring Basis at September 30, 2010:				
Investment securities available for sale				
U.S. Treasury securities	\$ 5.2	\$	\$	\$ 5.2
Obligations of U.S. Government and agencies		187.6		187.6
State and political subdivisions		34.6		34.6
Federal agency mortgage backed securities		42.4		42.4
Government agency mortgage backed securities		19.4		19.4
Collateralized mortgage obligations		2.5		2.5
Bonds mutual funds	63.5			63.5
Other equity investments	0.3			0.3
Other debt securities		1.3		1.3
Total assets measured at fair value on a recurring basis	\$ 69.0	\$ 287.8	\$	\$ 356.8
Total assets incustred at fair value on a recarring stasts	Ψ 02.0	Ψ 207.0	Ψ	Ψ 550.0
Accests Macaumed at Eair Value on a Nannagarming Basis at Contember 20, 2010.				
Assets Measured at Fair Value on a Nonrecurring Basis at September 30, 2010:	¢	¢ 20	¢	¢ 20
Mortgage servicing rights	\$	\$ 2.0	\$	\$ 2.0
OREO and other repossessed property		1.2		1.2
Impaired loans and leases		9.9		9.9
Total assets measured at fair value on a nonrecurring basis	\$	\$ 13.1	\$	\$ 13.1

There have been no transfers between categories during the nine months ended September 30, 2010, as compared to the period ended December 31, 2009.

(dollars in millions)	Level 1	Level 2	Level 3	Total
Assets Measured at Fair Value on a Recurring Basis at December 31, 2009:				
Investment securities available for sale				
Obligations of U.S. Government and agencies	\$	\$ 85.1	\$	\$ 85.1
State and political subdivisions		25.0		25.0
Federal agency mortgage backed securities		50.9		50.9
Government agency mortgage backed securities		8.7		8.7
Bonds mutual funds	37.0			37.0
Other debt securities		1.5		1.5
Total assets measured at fair value on a recurring basis	\$ 37.0	\$ 171.2	\$	\$ 208.2

Assets Measured at Fair Value on a Nonrecurring Basis at December 31, 2009:

Mortgage servicing rights	\$ \$ 4.1 \$	\$ 4.1
OREO and other repossessed property	1.0	1.0
Impaired loans and leases	6.2	6.2
Total assets measured at fair value on a nonrecurring basis	\$ \$ 11.3 \$	\$ 11.3

## Other Real Estate Owned and Other Repossessed Property:

Other real estate owned (OREO) consists of properties acquired as a result of deed in-lieu-of foreclosure and foreclosures. Properties or other assets are classified as OREO and are reported at the lower of carrying value or fair value, less estimated costs to sell. Costs relating to the development or improvement of assets are capitalized, and costs relating to holding the property are charged to expense. The Corporation had \$1.2 million in OREO assets at September 30, 2010, consisting of one commercial real estate property and a residential home. As of December 31, 2009, OREO assets totaled \$1.0 million consisting of several newly constructed residential properties, all of which were sold during the nine months ended September 30, 2010.

#### 16. Fair Value of Financial Instruments

Disclosure about fair value of financial instruments requires disclosure of the fair value information about financial instruments, whether or not recognized in the balance sheet, for which it is practicable to estimate such value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other market value techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instrument. The aggregate fair value amounts presented do not represent the underlying value of the Corporation.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate fair value:

#### **Cash and Cash Equivalents**

The carrying amounts reported in the balance sheet for cash and cash equivalents approximate their fair values.

#### **Investment Securities**

Estimated fair values for investment securities are valued by an independent third party based on market data utilizing pricing models that vary by asset and incorporate available trade, bid and other market information.

#### **Loans and Leases**

For variable rate loans that reprice frequently and which have no significant change in credit risk, estimated fair values are based on carrying values. Fair values of certain mortgage loans and consumer loans are estimated using discounted cash flow analyses, and are indicative of an exit price. The estimated fair value of nonperforming loans is based on discounted estimated cash flows as determined by the internal loan review of the Bank. The resulting estimate of the fair value of loans does not represent an exit price.

### MSRs

The fair value of the MSRs for these periods was determined using a third-party valuation model that calculates the present value of estimated future servicing income. The model incorporates assumptions that market participants use in estimating future net servicing income, including estimates of prepayment speeds and discount rates.

### **Deposits**

The estimated fair values disclosed for non-interest-bearing demand deposits, savings, NOW accounts, and Market Rate accounts are, by definition, equal to the amounts payable on demand at the reporting date (i.e., their carrying amounts). Fair values for certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of expected monthly maturities on the certificate of deposit.

### **Borrowed Funds**

The fair value of borrowed funds is established using a discounted cash flow calculation that applies interest rates currently being offered on borrowings with an equivalent maturity.

### **Subordinated Debentures**

The fair value of subordinated debentures is established using a discounted cash flow calculation that applies interest rates currently being offered on comparable borrowings.

### **Junior Subordinated Debentures**

The carrying amounts reported in the balance sheet for junior subordinated debentures approximate their fair values, and is based on the call price of the instruments.

# **Repurchase Agreements**

The carrying amounts reported in the balance sheet for repurchase agreements approximate their fair values.

## Mortgage Payable

The fair value of the mortgage payable is established using a discounted cash flow calculation that applies interest rates currently being offered on comparable borrowings.

### **Off-Balance Sheet Instruments**

Estimated fair values of the Corporation s off-balance sheet instruments (standby letters of credit and loan commitments) are based on fees and rates currently charged to enter into similar loan agreements, taking into account the remaining terms of the agreements and the counterparties credit standing. Since fees and rates charged for off-balance sheet items are at market levels when set, there is no material difference between the stated amount and estimated fair values of off-balance sheet instruments.

27

The carrying amount and estimated fair value of the Corporation s financial instruments as of the dates indicated are as follows:

	Septembe	er 30, 2010	December	r 31, 2009
(1) (1)	Carrying	Estimated	Carrying	Estimated
(dollars in thousands)	Amount	Fair Value	Amount	Fair Value
Financial assets:				
Cash and due from banks	\$ 11,090	\$ 11,090	\$ 11,670	\$ 11,670
Interest-bearing deposits with banks	42,089	42,089	58,472	58,472
Money market funds	223	223	9,175	9,175
Cash and cash equivalents	53,402	53,402	79,317	79,317
Investment securities	356,838	356,838	208,224	208,224
Mortgage servicing rights	4,009	4,082	4,059	4,807
Loans held for sale	4,686	4,890	3,007	3,051
Net loans and leases	1,176,438	1,228,517	875,315	888,242
Total financial assets	\$ 1,595,373	\$ 1,647,729	\$ 1,169,922	\$ 1,183,641
Financial liabilities:				
Deposits	\$ 1,259,648	\$ 1,261,846	\$ 937,887	\$ 938,523
Borrowed funds	221,793	226,834	144,826	147,446
Subordinated debentures	22,500	22,733	22,500	22,580
Junior subordinated debentures	12,041	12,041		
Repurchase agreements	11,883	11,883		
Mortgage payable	2,016	2,277	2,062	2,232
Total financial liabilities	\$ 1,529,881	\$ 1,537,614	\$ 1,107,275	\$ 1,110,781

Off-balance sheet instruments do not have a carrying amount, but have a notional amount of \$393 thousand and \$349 thousand as of September 30, 2010 and December 31, 2009, respectively.

### 17. New Accounting Pronouncements

# FASB ASC 860 Transfers and Servicing

In June 2009, the FASB issued ASC 860 related to accounting for transfers of financial assets. The standard amends the derecognition guidance in previous regulatory guidance and eliminates the concept of a qualifying special-purpose entities ( QSPEs ). The standard is effective for fiscal years and interim periods beginning after November 15, 2009. Early adoption of the standard is prohibited. The Corporation adopted the standard on January 1, 2010 and the adoption of this statement did not have an impact on the Corporation s financial statements.

## FASB ASC 810 Consolidation Variable Interest Entities

In June 2009, the FASB issued ASC 810 related to amendments to FASB interpretation No. 46(R) ( ASC 810 ) which amends the consolidation guidance applicable to variable interest entities ( VIE s). An entity would consolidate a VIE, as the primary beneficiary, when the entity has both of the following characteristics: (a) the power to direct the activities of a VIE that most significantly impact the entity s economic performance and (b) the obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE. Ongoing reassessment of whether an enterprise is the primary beneficiary of a VIE is required. ASC 810 amends Interpretation 46(R) to eliminate the quantitative approach previously required for determining the primary beneficiary of a VIE. ASC 810 is effective for fiscal years and interim periods beginning after November 15, 2009. The Corporation adopted the standard on January 1, 2010 and the adoption of this statement did not have an impact on the Corporation s financial statements.

#### FASB ASC 820 Fair Value Measurements and Disclosures

Accounting Standards Update No. 2010-6 Improving Disclosures about Fair Value Measurements ( ASU 2010-06 ) was issued in January 2010 to update ASC 820 Fair Value Measurements and Disclosures . ASU 2010-06 requires new disclosures (1) for significant transfers in and out of Level 1 and Level 2 including a description of the reason for the transfers and (2) in the reconciliation of Level 3 presenting sales, issuances and settlements gross rather than one net number. ASU 2010-06 also requires clarification of existing disclosures requiring (1) measurement disclosures for each class of assets and liabilities (a class being a subset of assets and liabilities within one line item in the statement of financial position) using judgment in determining the appropriate classes and (2) disclosures about inputs and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements for Level 2 and Level 3. The new disclosures and clarifications of existing disclosures were effective for interim and reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of Level 3 activity which are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The Corporation made these required disclosures in this Form 10-Q.

### FASB ASU Update 2010-18

Accounting Standards Update No. 2010-18 Effect of a Loan Modification When the Loan is Part of a Pool that is Accounted for as a single Asset, a consensus of the FASB Emerging Issues Task Force (Issue No. 09-1) amends FASB ASC Subtopic 310-30, Receivables Loans and Debt Securities acquired with Deteriorated Credit Quality, so that modifications of loans that are accounted for within a pool under that Subtopic do not result in the removal of the loans from the pool even if the modifications of the loans would otherwise be considering a troubled debt restructuring. A one-time election to terminate accounting for loans in a pool, which may be made on a pool-by-pool basis, is provided upon adoption of the new guidance. An entity will continue to be required to consider whether the pool of assets in which the loan is included is impaired if expected cash flows for the pool change. The amendments are effective prospectively for modifications of loans accounted for within pools under subtopic 310-30 occurring in the first interim or annual period ending on or after July 15, 2010. Early adoption is permitted. This ASU has no effect on the Corporation s balance sheet or results of operations as the Corporation did not modify any acquired loans accounted for under ASC 310-30 that were pooled for accounting purposes as of September 30, 2010.

### FASB ASU Update 2010-20

Accounting Standards Update No. 2010-20 Disclosures about Credit Quality of Financial Receivables and the Allowance for Credit Losses ( ASU 2010-20 ) was issued July 2010. The ASU requires disclosure related to period-end information (i.e. credit quality information and the ending financing receivable balance segregated by impairment method) in all interim and annual reporting periods ending on or after December 15, 2010. Disclosures of activity that occur during a reporting period are required in interim or annual periods beginning on or after December 15, 2010. The Corporation will adopt ASU 2010-20 effective for periods on or after December 15, 2010 and will provide disclosures required by ASU 2010-20.

### ITEM 2 Management s Discussion and Analysis of Results of Operation and Financial Condition

# **Brief History of the Corporation**

The Bryn Mawr Trust Company (the Bank) received its Pennsylvania banking charter in 1889 and is a member of the Federal Reserve System. In 1986, Bryn Mawr Bank Corporation (the Corporation) was formed and on January 2, 1987, the Bank became a wholly-owned subsidiary of the Corporation. The Bank and Corporation are headquartered in Bryn Mawr, PA, a western suburb of Philadelphia, PA. The Corporation and its subsidiaries provide wealth management, community banking, residential mortgage lending, insurance and business banking services to its customers through seventeen full service branches and seven limited-hour retirement community offices throughout Montgomery, Delaware and Chester counties. The Corporation trades on the NASDAQ Stock Market (NASDAQ) under the symbol BMTC.

The goal of the Corporation is to become the preeminent community bank and wealth management organization in the Philadelphia area.

The Corporation competes in a highly competitive market area and includes local, national and regional banks as competitors along with savings banks, credit unions, insurance companies, trust companies, registered investment advisors and mutual fund families. The Corporation and its subsidiaries are regulated by many regulatory agencies including the Securities and Exchange Committee (SEC), NASDAQ, the Federal Deposit Insurance Corporation (FDIC), the Federal Reserve Board (FRB) and the Pennsylvania Department of Banking.

# Acquisition of First Keystone Financial, Inc.

On July 1, 2010, the merger of First Keystone Financial, Inc. (FKF) with and into the Corporation (the Merger), and the two step merger of FKFs wholly-owned subsidiary, First Keystone Bank (FKB) with and into the Bank, were completed. In accordance with the terms of the Agreement and Plan of Merger, dated November 3, 2009, by and between the Corporation and FKF (the Merger Agreement), shareholders of FKF received 0.6973 shares of the Corporation s common stock plus \$2.06 per share cash consideration for each share of FKF common stock they owned as of the effective date of the Merger. The 85% stock and 15% cash transaction is valued at \$31.3 million, based on FKF s June 30, 2010, closing share price as listed on the NASDAQ stock market of \$13.35. The aggregate consideration paid to FKF shareholders consisted of approximately 1.6 million shares of the Corporation s common stock, valued at approximately \$26.4 million, and approximately \$4.8 million in cash. FKF employee stock options, valued at approximately \$102 thousand, which were fully vested and converted to options to purchase the Corporation s common stock upon the closing of the Merger, were also included in the total consideration paid. The results of combined entity s operations are included in the Corporation s unaudited Consolidated Statements of Income for the period beginning July 1, 2010, the date of the acquisition.

The acquisition of FKF, a federally chartered thrift institution with assets of approximately \$483 million, enabled the Corporation to increase its regional footprint with the addition of eight full service branch locations, primarily in Delaware County, Pennsylvania. The geographic locations of the acquired branches were such that it was not necessary to close any of the former FKF branches. By expanding into these new areas within Delaware County, the Corporation will be able to extend its successful sales culture as well as offer its reputable wealth management products and other value-added services to a wider segment of the county s population. In addition, a large majority of the FKF employees were retained, which will allow the Corporation to maintain the valuable customer relationships that FKF was able to build over the past century. The Corporation anticipates that the merger will be accretive to earnings starting in the fourth quarter of 2010 or first quarter of 2011.

29

#### **Results of Operations**

The following is Management s discussion and analysis of the significant changes in the results of operations, capital resources and liquidity presented in its accompanying consolidated financial statements for the Corporation. The Corporation s consolidated balance sheets and consolidated statements of income consist almost entirely of the Bank s financial condition and results of operations. Current performance does not guarantee, and may not be indicative of similar performance in the future. These interim financial statements are unaudited.

### **Critical Accounting Policies, Judgments and Estimates**

The accounting and reporting policies of the Corporation and its subsidiaries conform with accounting principles generally accepted in the United States of America (GAAP) applicable to the financial services industry. All significant inter-company transactions are eliminated in consolidation and certain reclassifications are made when necessary to conform with the previous year s financial statements to the current year s presentation. In preparing the consolidated financial statements, Management is required to make estimates and assumptions that affect the reported amount of assets and liabilities as of the dates of the balance sheets and revenues and expenditures for the periods presented. Therefore, actual results could differ from these estimates.

The allowance for loan and lease losses involves a higher degree of judgment and complexity than other significant accounting policies. The allowance for loan and lease losses is calculated with the objective of maintaining a reserve level believed by Management to be sufficient to absorb estimated probable credit losses. Management s determination of the adequacy of the allowance is based on periodic evaluations of the loan and lease portfolio and other relevant factors. However, this evaluation is inherently subjective as it requires material estimates, including, among others, expected default probabilities, expected loan commitment usage, the amounts and timing of expected future cash flows on impaired loans and leases, value of collateral, estimated losses on consumer loans and residential mortgages and general amounts for historical loss experience. The process also considers economic conditions, international events, and inherent risks in the loan and lease portfolio. All of these factors may be susceptible to significant change. To the extent actual outcomes differ from Management s estimates, additional provisions for loan and lease losses may be required that would adversely impact earnings in future periods. See the section of this document titled Asset Quality and Analysis of Credit Risk for additional information.

Acquired loans with specific credit-related deterioration are accounted for by the Corporation in accordance with FASB ASC 310-30. Certain acquired loans, those for which specific credit-related deterioration, since origination, is identified, are recorded at fair value reflecting the present value of the amounts expected to be collected. Income recognition on these loans is based on a reasonable expectation about the timing and amount of cash flows to be collected. Acquired loans deemed impaired and considered collateral dependent, with the timing of the sale of loan collateral indeterminate, remain on non-accrual status and have no accretable yield. The Corporation uses the cash basis method of interest income recognition for these impaired loans.

Other significant accounting policies are presented in Note 1 to the Corporation s audited consolidated financial statements filed as part of the Corporation s 2009 Annual Report on Form 10-K ( 2009 Annual Report ) and in the footnotes to the Corporation s unaudited financial statements filed as part of this Form 10-Q. There have been no material changes in assumptions or estimation techniques utilized as compared to prior periods, except as described in Note 2 in the accompanying financial statements.

### **Executive Overview**

### **Three Months Results**

The Corporation reported a net loss of \$1.0 million, or a diluted loss per share of (\$0.08), for the three months ended September 30, 2010, which includes \$4.3 million of pre-tax merger-related expenses, compared to net income of \$2.6 million, or diluted earnings per share of \$0.30, for the same period last year. Return on average equity ( ROE ) and return on average assets ( ROA ) for the three months ended September 30, 2010 were (3.16)% and (0.29)%, respectively, as compared to ROE and ROA of 10.39% and 0.89%, respectively, for the same period last year. The decline from the same period in the prior year is due primarily to the additional expenses associated with the Merger and an increase in the provision for loan and lease losses (the Provision ).

On August 25, 2010, the Corporation announced it had successfully completed the conversion of FKF customer accounts to the Corporation s computer systems. With the Merger complete, the Corporation now has \$1.7 billion in total banking assets and \$3.3 billion in wealth assets under management, administration, supervision and brokerage as of September 30, 2010, as well as 17 full-service branches.

The tax equivalent net interest income increased \$4.5 million, or 43.0%, to \$14.9 million for the three months ended September 30, 2010, as compared to \$10.4 million for the same period in 2009, largely due to the Merger. The net interest margin for the three months ended September 30, 2010, was 3.66%, a 6 basis point decrease, as compared to the same period in 2009.

Total portfolio loans and leases, as of September 30, 2010, were \$1.2 billion, an increase of \$290.7 million, or 32.8%, from the December 31, 2009 balance of \$885.7 million, largely due to the Merger. Total non-performing loans and leases represented \$10.8 million, or 92 basis points of portfolio loans and leases as of September 30, 2010, as compared to \$6.9 million, or 78 basis points, as of December 31, 2009. As of September 30, 2010, the allowance for loan and lease losses (the Allowance) of \$10.3 million represents 0.88% of portfolio loans and leases, as compared to \$10.4 million, or 1.18%, as of December 31, 2009. The decrease in the Allowance, as a percentage of loans and leases, is primarily due to the acquisition of the FKF loan portfolio which, in accordance with GAAP, was recorded at its fair value without its previously recorded Allowance.

The Provision for the quarter ended September 30, 2010 was \$4.2 million, an increase of approximately \$1.9 million, or 83.8%, from \$2.3 million at September 30, 2009. \$3.7 million of the \$4.2 million Provision in the third quarter of 2010 is related to two commercial loan relationships that were included in nonperforming assets in prior periods and have been written down to their fair value based on an updated analysis of the collateral underlying such loans and certain new valuation information.

For the three months ended September 30, 2010, non-interest income was \$7.1 million, an increase of \$410 thousand, as compared to \$6.6 million for the same period last year, primarily due to the increase in the net gain on the sale of residential mortgages, wealth revenue and service charges on deposits, which were partially offset by a decline in gains on sales of investment securities.

The \$232 thousand increase in Wealth Management fees for the three months ended September 30, 2010, as compared to the same period last year, was attributable to the \$600 million increase in Wealth Management assets under management, administration, supervision and brokerage, as of September 30, 2010, which were \$3.3 billion, as compared to \$2.7 billion, as of September 30, 2009. The growth in the Wealth Management Division assets under management, administration, supervision and brokerage is partially attributable to the success of new initiatives within the division, which include growth of BMT Asset Management, along with improvements in the financial markets.

#### **Nine Months Results**

The Corporation reported net income of \$3.6 million or \$0.35 diluted earnings per share for the nine months ended September 30, 2010, as compared to \$7.7 million, or \$0.88 diluted earnings per share, for the same period last year. ROE and ROA for the nine months ended September 30, 2010, were 3.77% and 0.34%, respectively, as compared to 10.66% and 0.88%, respectively, for the same period last year. Net income, ROE and ROA for the nine months ended September 30, 2010, as compared to the same period last year, were primarily reduced by the impact of \$5.3 million of additional expenses associated with the Merger and an increase in the Provision.

Tax equivalent net interest income increased \$7.3 million, or 24.2%, to \$37.4 million for the nine months ended September 30, 2010, as compared to \$30.1 million for the same period last year, primarily due to the Merger and a decrease in interest expense due to the lower rates being paid on interest-bearing liabilities.

The tax equivalent net interest margin was 3.82% for the nine months ended September 30, 2010, an increase of 18 basis points, from 3.64%, for the same period in 2009. The earning-asset yield declined 43 basis points, to 4.76% for the nine months ended September 30, 2010, from 5.19% for the same period last year. At the same time, offsetting this decrease, was a 76 basis point decline in total funding costs from 1.94%, for the nine months ended September 30, 2010, to 1.18%, for the same period in 2010.

For the nine months ended September 30, 2010, the Provision increased to \$8.3 million, an increase of \$2.8 million, or 49.5%, from the \$5.6 million for the same period in 2009. This increase is related to \$6 million in write-downs during the nine months ended September 30, 2010, of two commercial loan relationships to their fair value based on an updated analysis of the collateral underlying the loans and certain new valuation information. Partially offsetting this increase is a \$2.1 million decrease in charge-offs in the lease portfolio, over the same time period.

Non-interest income for the nine months ended September 30, 2010, was \$20.1 million, a decrease of \$1.8 million, as compared to the same period last year, largely due to a \$2.8 million decline in gains on sale of mortgage loans for the nine months ended September 30, 2010, as compared to the same period in 2009. This decline was partially offset by a \$837 thousand, or 7.9%, increase in fees for wealth management services, a \$182 thousand, or 18.2%, increase in loan servicing and late fees, and a \$215 thousand, or 14.9%, increase in service charges, as compared to the same period in 2009.

The increase in loan servicing and late fees, along with service charges on deposits, was largely attributable to the addition of the FKF branches during the third quarter of 2010.

Non-interest expense for the nine months ended September 30, 2010, was \$43.2 million, an increase of \$8.8 million, or 25.5%, as compared to the same period in 2009, partially due to the \$5.3 million merger-related expenses.

31

### **Key Performance Ratios**

Key financial performance ratios for the three and nine months ended September 30, 2010 and 2009 are shown in the table below. Ratios for the three and nine months ended September 30, 2010 include expenses associated with the Merger.

	Three Mont Septemb		onths ed ber 30,	
	2010	2009	2010	2009
Return on average equity	(3.16)%	10.39%	3.77%	10.66%
Return on average assets	(0.29)%	0.89%	0.34%	0.88%
Efficiency ratio *	88.7%	63.0%	75.8%	66.5%
Tax equivalent net interest margin	3.66%	3.72%	3.82%	3.64%

## **Components of Net Income**

Net income is affected by five major elements: **Net Interest Income** or the difference between interest income earned on loans, leases and investments and interest expense paid on deposits and borrowed funds; the **Provision for Loan and Lease Losses** or the amount added to the allowance for loan and lease losses to provide reserves for inherent losses on loans and leases; **Non-Interest Income** which is made up primarily of certain wealth management and banking fees, trust income, residential mortgage activities and gains and losses from the sale of securities; **Non-Interest Expenses** which consist primarily of salaries, employee benefits, occupancy and other operating expenses; and **Income Taxes**. Each of these major elements is discussed in more detail below.

## NET INTEREST INCOME ON A TAX EQUIVALENT BASIS

We present information on a tax equivalent basis for net interest income. Refer to Analyses of Interest Rates and Interest Differential below for further information.

Three Months Ended September 30, 2010 Compared to the Same Period Ended September 30, 2009

The tax equivalent net interest margin decreased 6 basis points to 3.66%, for the three months ended September 30, 2010, as compared to 3.72%, for the same period last year.

The tax equivalent net interest income for the three months ended September 30, 2010, of \$14.9 million, was \$4.5 million, or 43.0%, higher than the tax equivalent net interest income of \$10.4 million for the same period in 2009. This increase was primarily related to loans and investment securities acquired in the Merger. The decline in funding costs from 1.73% to 1.09%, during the period, is due to a general market decline in interest rates, as well as the prudent management of deposit pricing.

32

### Nine Months Ended September 30, 2010 Compared to the Same Period Ended September 30, 2009

The tax equivalent net interest margin increased 18 basis points to 3.82% for the nine months ended September 30, 2010, as compared to 3.64% for the same period last year.

The tax equivalent net interest income for the nine months ended September 30, 2010, of \$37.4 million, was \$7.3 million, or 24.2%, higher than the tax equivalent net interest income of \$30.1 million for the same period in 2009. This increase was primarily driven by lower deposit pricing. Also, contributing to the increase in the tax equivalent net interest income, was the \$96.2 million, or 10.8%, increase in average loans and leases for the nine month period ended September 30, 2010, as compared to the same period in 2009, primarily due to the Merger. Additionally, the average balance of the investment portfolio grew \$122.3 million, or 90.4%, during the same period, primarily due to the Merger, and, to a lesser extent, the investment of acquired cash balances.

Average interest bearing liabilities increased \$161.0 million, or 18.2%, to \$1.0 billion during the nine months ended September 30, 2010, as compared to \$885.0 million for the same period in 2009. The 76 basis point decrease in the rate paid on interest-bearing liabilities, of 1.18%, for the nine months ended September 30, 2010, from 1.94%, for the same period in 2009, was primarily due to higher-rate wholesale deposits maturing, the increase in lower-costing money market and savings account balances and Management s efforts to reduce deposit rates.

## Rate Volume Analysis on a Tax Equivalent Basis \*

The rate volume analysis in the table below analyzes dollar changes in the components of interest income and interest expense as it relates to the change in balances (volume) and the change in interest rates (rate) of tax equivalent net interest income for the three and nine months ended September 30, 2010 as compared to the three and nine months ended September 30, 2009, broken out by rate and volume.

(dollars in thousands)	S	ee Months En September 30, Compared to	,	Nine Months Ended September 30, 2010 Compared to 2009

### **Tax Equivalent Net Interest Margin**

The Corporation s net interest margin decreased 6 basis points to 3.66% for the third quarter of 2010, from 3.72% for the same period in 2009, due to declining market interest rates and the addition of lower interest-earning assets from the Merger. The earning asset yield fell 52 basis points in the third quarter of 2010, as compared to the same period last year ago, due to the continued low interest rate environment. The decrease in the cost of interest-bearing liabilities is specifically attributable to a decrease in the use of higher-rate certificates of deposit and an active focus on reducing deposit pricing.

The tax equivalent net interest margin and related components for the past five consecutive quarters are shown in the table below.

	Year	Tax Equivalent Earning Asset Yield	Interest Bearing Liability Cost	Tax Equivalent Net Interest Spread	Effect of Non-Interest Bearing Sources	Tax Equivalent Net Interest Margin
Net Interest Margin Last Five Quarters						
3 <sup>rd</sup> Quarter	2010	4.57%	1.09%	3.48%	0.18%	3.66%
2 <sup>nd</sup> Quarter	2010	4.74%	1.22%	3.52%	0.28%	3.80%
1 st Quarter	2010	5.06%	1.28%	3.78%	0.28%	4.06%
4 <sup>th</sup> Quarter	2009	4.99%	1.45%	3.54%	0.31%	3.85%
3 <sup>rd</sup> Quarter	2009	5.09%	1.73%	3.36%	0.36%	3.72%

# **Interest Rate Sensitivity**

The Corporation actively manages its interest rate sensitivity position. The objectives of interest rate risk management are to control exposure of net interest income to risks associated with interest rate movements and to achieve sustainable growth in net interest income. The Corporation's Asset and Liability Committee ( ALCO ), using policies and procedures approved by the Corporation's Board of Directors, is responsible for managing the interest rate sensitivity position. Interest rate sensitivity is managed by changing the mix, pricing and re-pricing characteristics of its assets and liabilities, through the management of its investment portfolio, its offering of loan and selected deposit terms and through wholesale funding. Wholesale funding consists of several sources including borrowings from the Federal Home Loan Bank (FHLB), the Federal Reserve Bank of Philadelphia's discount window, certificates of deposit from institutional brokers, Certificate of Deposit Account Registry Service (CDARS), Insured Network Deposits (IND) and Pennsylvania Local Government Investment Trust (PLGIT).

The Corporation uses several tools to manage its interest rate risk including interest rate sensitivity analysis (a/k/a GAP Analysis), market value of portfolio equity analysis, interest rate simulations under various rate scenarios and tax equivalent net interest margin reports. The results of these reports are compared to limits established by the Corporation s ALCO Policies and appropriate adjustments are made if the results are outside of established limits.

The following table demonstrates the annualized result of an interest rate simulation and the estimated effect that a parallel interest rate shift in the yield curve and subjective adjustments in deposit pricing might have on the Corporation s projected net interest income over the next 12 months.

This simulation assumes that there is no growth in the balance sheet over the next twelve months. The changes to net interest income shown below are in compliance with the Corporation spolicy guidelines. Actual results may differ significantly from the interest rate simulation due to numerous factors including assumptions, the competitive environment, market reactions and customer behavior.

### **Summary of Interest Rate Simulation**

(dollars in thousands)	Three Months E September 30 Change in Net Interest I Next 12 Mont	), ncome Over
Change in Interest Rates		
+300 basis points	\$ 1,137	1.96%
+200 basis points	\$ 257	0.44%
+100 basis points	\$ (636)	(1.10)%
-100 basis points	\$ (1.371)	(2.37)%

The interest rate simulation above indicates that the Corporation s balance sheet, as of September 30, 2010, is asset sensitive, meaning that an increase in interest rates will have a positive impact on net interest income over the next 12 months and a decrease in interest rates will have the reverse impact. In the above simulation, net interest income will increase in the 200 and 300 basis point scenarios. However, the 100 basis point increase scenario indicates a decrease in net interest income over the next twelve months as the Corporation has interest rate floors on many of its portfolio loans and the Corporation s internal prime loan rate is set 74 basis points above the current Wall Street Journal Prime Rate of 3.25%. The 100 basis point decrease scenario shows a \$1,371 thousand, or (2.37)%, decrease in net interest income over the next twelve months as many of the Corporation s liabilities are priced less than 1.00% and therefore would not be able to go below zero. The four scenarios are directionally consistent with the December 31, 2009 simulation, but show a lower increase and percentage in net interest income.

The interest rate simulation is an estimate based on assumptions, which are based on past behavior of customers, along with expectations of future behavior relative to interest rate changes. In today s uncertain economic times and this extended period of very low interest rates, the reliability of the Corporation s interest rate simulation model is more uncertain. Actual customer behavior may be significantly different than expected behavior, which could cause an unexpected outcome which might translate into lower net interest income.

## **GAP Report**

The interest sensitivity or GAP report identifies interest rate risk by showing repricing gaps in the bank s balance sheet. All assets and liabilities are reflected based on behavioral sensitivity, which is usually the earliest of either: repricing, maturity, contractual amortization, prepayments or likely call dates. Non-maturity deposits such as NOW, Savings and money market accounts are spread over various time periods based on the expected sensitivity of these rates considering liquidity and investment preferences for the bank. Non-rate sensitive assets and liabilities are spread over time periods to reflect how the Corporation views the maturity of these funds.

Non-maturity deposits, demand deposits in particular, are recognized by the regulatory agencies to have different sensitivities to interest rate environments. Consequently, it is an accepted practice to spread non-maturity deposits over defined time periods in order to capture that sensitivity. Commercial demand deposits are often in the form of compensating balances, and fluctuate inversely to the level of interest rates; the maturity of those deposits is reported as having a shorter life than typical retail demand deposits. Additionally, the regulatory capital agencies have inferred what the appropriate distribution limits are for non-maturity deposits. The Corporation has taken a more conservative approach than these limits would imply by reporting them as having a shorter maturity.

37

The following table presents the Corporation s interest rate sensitivity position or GAP Analysis as of September 30, 2010:

(dollars in millions)	0 to 90 Days	90 to 365 Days	1-5 Years	Over 5 Years	Non-Rate Sensitive	Total
Assets:	Days	Days	1 cars	3 Tears	Sensitive	Total
Interest-bearing deposits with banks	\$ 42.1	\$	\$	\$	\$	\$ 42.1
Money market funds	0.2	Ψ	Ψ	Ψ	Ψ	0.2
Available for sale securities	135.0	83.2	116.1	22.5		356.8
Loans and leases (1)	443.9	163.6	473.5	100.1		1,181.1
Allowance for loan and lease losses	443.9	103.0	4/3.3	100.1	(10.3)	(10.3)
Cash and due from banks					11.1	11.1
Other assets					133.2	133.2
Other assets					133.2	133.2
Total assets	\$ 621.2	\$ 246.8	\$ 589.6	\$ 122.6	\$ 134.0	\$ 1,714.2
Liabilities and shareholders equity:						
Non-interest-bearing demand	\$ 43.7	\$ 29.0	\$ 154.4	\$	\$	\$ 227.1
Savings, NOW and market rate	117.4	102.3	362.0	89.1	T	670.8
Time deposits	89.6	114.5	57.7			261.8
Other wholesale deposits	65.1					65.1
Wholesale time deposits	19.0	10.9	4.9			34.8
FHLB advances	65.3	59.4	76.0	21.0		221.7
Subordinated debt	22.5					22.5
Junior subordinated debt				12.0		12.0
Repurchase agreements	11.9					11.9
Mortgage payable		0.2	1.8			2.0
Other liabilities					26.2	26.2
Shareholders equity	5.6	16.9	90.3	45.5		158.3
Total liabilities and shareholders equity	\$ 440.1	\$ 333.2	\$ 747.1	\$ 167.6	\$ 26.2	\$ 1,714.2
	A < 2.4.2	<b>.</b>	<b>* *</b> 00 <	<b>* 100</b> <		<b></b>
Interest earning assets	\$ 621.2	\$ 246.8	\$ 589.6	\$ 122.6	\$	\$ 1,580.2
Interest bearing liabilities	390.8	287.3	502.4	122.1		1,302.6
Difference between interest earning assets and interest bearing						
liabilities	\$ 230.4	\$ (40.5)	\$ 87.2	\$ 0.5	\$	\$ 277.6
Cumulative difference between interest earning assets and interest	¢ 220.4	¢ 1000	¢ 277 1	¢ 277 6	¢	¢ 277.6
bearing liabilities	\$ 230.4	\$ 189.9	\$ 277.1	\$ 277.6	\$	\$ 277.6
Cumulative earning assets as a % of cumulative interest bearing liabilities	159%	128%	123%	121%		

<sup>(1)</sup> Loans include portfolio loans and leases and loans held for sale.

The table above indicates that the Corporation is asset sensitive in the immediate to 90 day and cumulative subsequent time frames and should theoretically experience an increase in net interest income during these time periods if interest rates rise. The above analysis indicates that \$621.2 million of interest earning assets will reprice in the first 90 day period after September 30, 2010 compared with \$390.8 million of interest bearing liabilities, resulting in a net change of \$230.4 million of interest earning assets repricing. It should be noted that the GAP analysis is one tool used to measure interest rate sensitivity and must be used in conjunction with other measures such as the interest rate simulation discussed above. The GAP report measures the timing of changes in rate, but not the true weighting of any specific line item. Accordingly, if rates decline,

theoretically net interest income will also decline.

38

### Fair Value Adjustments Impacting the Statement of Income

The following table details the actual effect for the three months ended September 30, 2010, and the projected effect for the three months ending December 31, 2010, and each of the five years ending December 31, 2015, of the accretable fair value adjustments attributable to the Merger, on net interest income, non-interest expense and pre-tax income.

		Accretable	For the Months		For the Twelve Months Ending					
	Income Statement Effect	Balance July 1, 2010	Sep 30, 2010 (actual)	Dec 31, 2010	Dec 31, 2011	Dec 31, 2012	Dec 31, 2013	Dec 31, 2014	Dec 31, 2015	Thereafter

### PROVISION FOR LOAN AND LEASE LOSSES

### General Discussion of the Allowance for Loan and Lease Losses

The Corporation uses the allowance method of accounting for credit losses. The balance in the Allowance is determined based on the Corporation s review and evaluation of the loan and lease portfolio in relation to past loss experience, the size and composition of the portfolio, current economic events and conditions, and other pertinent factors, including the Corporation s assumptions as to future delinquencies, recoveries and losses.

Increases to the Allowance are implemented through a corresponding Provision (expense) in the Corporation s statement of income. Loans and leases deemed uncollectible are charged against the allowance. Recoveries of previously charged-off amounts are credited to the allowance.

While the Corporation considers the Allowance to be adequate based on information currently available, future additions to the Allowance may be necessary due to changes in economic conditions or the Corporation s assumptions as to future delinquencies, recoveries and losses and the Corporation s intent with regard to the disposition of loans. In addition, the Pennsylvania Department of Banking and the Federal Reserve Bank of Philadelphia, as an integral part of their examination process, periodically review the Corporation s allowance.

The Corporation s Allowance is the accumulation of four components that are calculated based on various independent methodologies. All components of the Allowance are estimations. The Corporation discusses these estimates earlier in this document under the heading of Critical Accounting Policies, Judgments and Estimates . The four components are as follows:

Specific Loan Evaluation Component Includes the specific evaluation of larger classified loans. The Corporation evaluates larger, classified loans with greater scrutiny to calculate an appropriate Allowance for the identified loan.

Historical Charge-Off Component Applies a three year rolling historical charge-off rate to pools of non-classified loans excluding leases.

Additional Factors Component The loan and lease portfolios are broken down into multiple homogeneous sub-classifications upon which multiple factors (such as delinquency trends, economic conditions, loan terms, credit grade, state of origination, industry, other relevant information and regulatory environment) are evaluated resulting in an Allowance amount for each of the sub-classifications. The sum of these amounts equals the Additional Factors Component. These additional factors are reviewed by the Corporation on a quarterly basis to reflect changes in each homogeneous sub-classification identified.

39

Unallocated Component This amount represents a reserve against all loans and leases for factors not included in the components above. The unallocated component of the Allowance is available for use against any portion of the loan and lease portfolio. The Corporation believes its Allowance methodology adequately provides the appropriate weighting to current charge-off history in the aggregate, primarily through the specific loan and additional factor components of the Allowance methodology. The Corporation will continue to evaluate its Allowance methodology on a quarterly basis and will make appropriate adjustments as needed.

## Asset Quality and Analysis of Credit Risk

At September 30, 2010, total non-performing loans and leases were \$10.8 million, or 92 basis points of total loans and leases compared to \$6.9 million, or 78 basis points at December 31, 2009. The net level of non-performing loans and leases increased from December 31, 2009 mainly due to the addition of \$3.2 million of non-performing loans in connection with the Merger. During the nine month period ended September 30, 2010, the Corporation charged off \$3.7 million related to two commercial relationships that were included in non-performing assets in prior periods.

As of September 30, 2010, the Corporation had other real estate owned (OREO) valued at their fair value of \$1.2 million. As of September 30, 2010, OREO consisted of one commercial real estate property and a residential home. During the third quarter of 2010, the Corporation sold \$460 thousand of OREO property, which consisted of two newly constructed homes that the Corporation held in OREO as of June 30, 2010. Non-performing assets as of September 30, 2010, totaled \$12.0 million, or 70 basis points of total assets, an increase of \$4.1 million from \$7.9 million in non-performing assets as of December 31, 2009.

The Allowance as a percentage of total loans and leases was 0.88% or \$10.3 million, at September 30, 2010, compared with 1.18%, or \$10.4 million, as of December 31, 2009 and 1.16%, or \$10.3 million, as of September 30, 2009. The decrease in the Allowance, as a percentage of total loans and leases, is primarily due to the acquisition of the FKF loan portfolio. On July 1, 2010, the Corporation acquired loans with a fair value \$274.8 million, net of a fair value adjustment of \$17.9 million. Amortization of the accretable portion of the fair value adjustment through the income statement for the quarter ended September 30, 2010, was \$304 thousand.

The Provision for the three months ended September 30, 2010, was \$4.2 million, an increase of \$1.9 million over the \$2.3 million in the same period last year. The Provision for the nine months ended September 30, 2010, was \$8.3 million, an increase of \$2.8 million over the \$5.6 million in the same period last year. The increase in the Provision for the three and nine months ended September 30, 2010, is primarily related to Provisions of \$3.7 and \$6.0 million, respectively related to two commercial loan relationships that were written down to their fair value, based on updated analyses of the collateral underlying such loans and certain new valuation information.

Beginning in 2008 and continuing into 2010, the Corporation made changes to its lease underwriting policy to mitigate further potential losses. These policy changes have improved overall lease portfolio performance over the past twenty-four months. In the third quarter of 2010, net lease charge-offs totaled \$467 thousand, as compared to \$1.1 million in the third quarter of 2009. For the nine months ending September 30, 2010, net lease charge-offs totaled \$1.5 million as compared to \$3.6 million for the same period in 2009.

#### NON-INTEREST INCOME

## Three months ended September 30, 2010 Compared to the Same Period Ended September 30, 2009

Non-interest income for the three months ended September 30, 2010, was \$7.1 million, an increase of \$410 thousand, or 6.2%, from \$6.6 million for the same period in 2009. This increase was due primarily to an increase of \$429 thousand, or 56.4%, in the net gain on sale of residential mortgage loans and a \$232 thousand, or 6.7%, increase in fees from wealth management services. Also contributing to the increase was a \$179 thousand, or 36.3%, increase in service charges on deposits and a \$55 thousand, or 15.0%, increase in loan fees, for the three months ended September 30, 2010, as compared to the same period last year, which were largely the result of the Merger. These increases were partially offset by a decrease of \$589 thousand, or 69.5%, on the net gain on the sale of investments for the three months ended September 30, 2010, as compared to the same period in 2009.

The \$232 thousand increase in Wealth Management Division revenue for the three months ended September 30, 2010, as compared to the same period last year, includes fees from trust administration, investment management, brokerage and custody and estates. Wealth Management Division assets under management, administration, supervision and brokerage increased 21.4%, to \$3.3 billion, as of September 30, 2010, from \$2.7 billion, as of September 30, 2009. Wealth Management Division revenues and assets under management, administration, supervision and brokerage have improved largely due to the success of new initiatives within the division and financial market improvements.

## Nine months ended September 30, 2010 Compared to the Same Period Ended September 30, 2009

Non-interest income for the nine months ended September 30, 2010 was \$20.1 million, a decrease of \$1.8 million, or 8.3%, from \$21.9 million for the same period in 2009. This decrease was primarily attributable to a decrease of \$2.8 million, or 55.0%, in the net gain on sale of residential mortgage loans, to \$2.3 million, for the nine months ended September 30, 2010, from \$5.2 million for same period in 2009. The Corporation experienced significant mortgage refinancing volume in 2009 due to the low interest rate environment and the Home Buyer Tax Credit under the American Recovery and Reinvestment Act of 2009 which ended April 30, 2010. The decrease was partially offset by an \$837 thousand, or 7.9%, increase in wealth management fees for the nine months ended September 30, 2010, as compared to the same period last year, due primarily to the success of new Wealth Management Division initiatives such as BMT Asset Management, a brokerage based platform, along with improvements in the financial markets. Also, the gain on sale of investments for the nine months ended September 30, 2010 increased \$483 thousand, or 36.6%, from the same period in 2009, as the Corporation adjusted its investment portfolio mix.

Components of other operating income for the three and nine months ended September 30, 2010 and 2009 are as follows:

(dollars in thousands)	Three Mor Septem 2010		Nine Months Endo September 30, 2010 200		
Title insurance income	\$ 71	\$ (8)	\$ 96	\$ 355

Rent	48	57	135	171	
Other investment income	35	11	69	56	
Other operating income	\$ 653	\$ 552	\$ 1,699	\$ 2,181	

## NON-INTEREST EXPENSE

Three months ended September 30, 2010 Compared to the Same Period Ended September 30, 2009

Non-interest expense for the three months ended September 30, 2010, was \$19.4 million, an increase of \$8.7 million, or 81.2%, from \$10.7 million for the same period in 2009. The largest factor contributing to the increase was a \$4.3 million increase in merger-related expenses, as compared to the same period in 2009. Merger-related expenses consisted primarily of investment banking, legal, employee severance, conversion costs and vendor termination fees. In addition, salaries and wages increased \$1.7 million, or 32.4%, due to the FKF employees who came under the Bank s employ in the Merger.

## Nine months ended September 30, 2010 Compared to the Same Period Ended September 30, 2009

Non-interest expense for the nine months ended September 30, 2010, was \$43.2 million, an increase of \$8.8 million, or 25.5%, as compared to \$34.4 million for the same period in 2009. The largest factor contributing to this increase was merger-related expenses of approximately \$5.3 million for the nine months ended September 30, 2010, as compared to \$0 for the same period in 2009. In addition, salaries and wages increased \$1.3 million, or 7.6%, for the nine months ended September 30, 2010, as compared to the same period in 2009, primarily due to the FKF employees who came under the Bank s employ in the Merger.

As detailed in the table below, increases in computer processing, loan processing and telephone expenses for the three and nine months ended September 30, 2010, were the result of the Corporation s maintenance of simultaneous systems while the conversion of the FKF systems was underway. Also, a contract termination charge involving a non-merger-related computer processing contract, as well as several newly-established advisory boards, contributed to the increases in computer processing expense and director fees, respectively, for the two periods.

Components of other operating expenses for the three and nine months ended September 30, 2010 and 2009 were as follows:

	Three Months Ended N September 30,			ths Ended iber 30,
(dollars in thousands)	2010	2009	2010	2009

Other operating		384		472
Merger-related expenses	\$	4,292	\$	5,277

### **INCOME TAXES**

Income tax benefit for the three months ended September 30, 2010, was \$746 thousand, as compared to \$1.4 million income tax expense for the same period in 2009. This represents an effective tax rate of (42.2)% for the three months ended September 30, 2010, as compared to an effective tax rate of 34.2% for the same period in 2009. The change in the effective tax rate is due primarily to the loss in the third quarter of 2010 compared with income in the third quarter of 2009, the increase in tax-exempt revenue from securities and bank owned life insurance (BOLI) that was acquired in the Merger, partially offset by other items, including non-deductible merger-related expenses.

Income tax expense for the nine months ended September 30, 2010, was \$1.9 million, as compared to \$4.1 million, for the same period in 2009. This represents an effective tax rate for the nine months ended September 30, 2010, of 34.2%, as compared to an effective tax rate of 34.6% for the same period in 2009. The decrease in the tax rate is primarily due to an increase in tax-exempt income from securities and BOLI, partially offset by other items including non-deductible merger-related expenses.

43

#### **BALANCE SHEET ANALYSIS**

Total assets were \$1.7 billion, as of September 30, 2010, an increase of \$475.4 million, or 38.4%, from \$1.2 billion, as of December 31, 2009, as loans and leases increased \$290.7 million, or 32.8%, and total deposits increased \$321.8 million, or 34.3%, over the same time period. These increases are primarily a result of the Merger.

The table below compares period end portfolio loans and leases outstanding at September 30, 2010 and December 31, 2009.

	Sep	tember 30,	Dece	ember 31,	Ch	ange
(dollars in millions)		2010		2009	Dollars	Percentage
Consumer loans	\$	13.2	\$	12.7	\$ 0.5	3.9%
Commercial and industrial loans		239.8		233.3	6.5	2.8
Commercial mortgage loans		358.5		265.0	93.5	35.3
Construction loans		48.7		38.4	10.3	26.8
Residential mortgage loans		251.8		110.6	141.2	127.7
Home equity lines and loans		226.8		177.9	48.9	27.5
Leases		37.6		47.8	(10.2)	(21.3)
Total portfolio loans and leases	\$	1,176.4	\$	885.7	\$ 290.7	32.8
Loans held for sale		4.7		3.0	1.7	56.7
Total loans and leases	\$	1,181.1	\$	888.7	\$ 292.4	32.9%
	•	-,			+ -> ->	
Quarterly average total loans and leases	\$	1,175.3	\$	887.4	\$ 287.9	32.4%

Quarterly average loans and leases as of September 30, 2010, increased \$287.9 million, or 32.4%, to \$1.18 billion, as compared to \$887.4 million, as of December 31, 2009, due primarily to the Merger, as loans with a fair value of \$274.8 million were added to the balance sheet on July 1, 2010. Additional discussion of the Corporation s major loan and lease portfolio components follows.

Commercial and industrial loans comprised 20.3% of total loans and leases as of September 30, 2010, as compared to 26.3% as of December 31, 2009. This change in loan mix is due to FKF s higher concentration of residential mortgages, relative to commercial and industrial loans, as compared to the Corporation s pre-Merger loan mix.

Commercial mortgage loans comprised 30.5% of the total loan and lease portfolio as of September 30, 2010, as compared to 29.8% as of December 31, 2009.

Home equity loans and lines of credit comprised 19.3% of the total loan and lease portfolio as of September 30, 2010, as compared to 20.0% as of December 31, 2009. Home equity loan balances are being refinanced into residential mortgage loans given the low-fixed rate environment which has hindered organic growth and offset new originations. The increase in home equity loan balances at September 30, 2010 compared to December 31, 2009 is primarily due to the Merger.

Construction loans comprised 4.1% of the total loan and lease portfolio as of September 30, 2010, as compared to 4.3% at December 31, 2009. The increase in balances of \$10.3 million as of September 30, 2010, as compared to December 31, 2009, is primarily due to the Merger.

Residential mortgage loans comprised 21.4% of the total loan and lease portfolio as of September 30, 2010, as compared to 12.4% as of December 31, 2009. During the third quarter of 2010, Management made a decision to retain more of its residential mortgage loan production over the next few months in order to improve its net interest income and increase loan balances. The impact of this decision had a nominal impact on residential mortgage loan totals as of September 30, 2010. The primary reason for the change in the mix and the increase in residential mortgage balances of \$141.2, as of September 30, 2010, was the acquisition of FKF and its residential mortgage portfolio.

Leases comprised 3.2% of the total loan and lease portfolio as of September 30, 2010, as compared to 5.4%, as of December 31, 2009. The Corporation decreased its lease portfolio by \$10.2 million through a combination of credit tightening, scheduled payments and net charge-offs, which exceeded new lease production during the nine month period ended September 30, 2010. This trend is expected to continue for the next two to three quarters until new production matches scheduled payments and charge-offs.

The Corporation continues to focus its business development efforts on building banking relationships with local businesses, not-for-profit companies and strong credit quality individuals. The Corporation believes there are opportunities for new business with credit-worthy borrowers who are not satisfied with their current lender in the commercial real estate market within our primary trading area.

<sup>\*</sup> period end balance

The Corporation s investment portfolio had a fair value of \$356.8 million as of September 30, 2010, an increase of \$148.6 million or 71.4%, from \$208.2 million, as of December 31, 2009. The increase was primarily attributable to the addition of the FKF investment portfolio of \$100.9 million, on July 1, 2010, and the continued strong cash inflows during the first nine months of 2010. See the Liquidity section of this document for more detailed information on the Corporation s investment portfolio.

BOLI with a carrying value of \$18.8 million, as of September 30, 2010, was acquired in the Merger. Additionally, the Bank s holdings of FHLB stock, as of September 30, 2010, increased \$7.1 million, to \$15.0 million, as a result of the Merger. Goodwill increased by \$10.4 million, to \$16.7 million, as of September 30, 2010, from \$6.3 million, as of December 31, 2009, as a result of the Merger, and is discussed in more detail in Note 2 in the accompanying financial statements.

Details of total deposits and borrowings as of September 30, 2010, and December 31, 2009, are as follows:

	Septeml	ber 30,	Dece	mber 31,		Change
(dollars in millions)	201	10	2	2009	Dolla	rs Percentage

Junior subordinated debentures	12.0		12.0	
Repurchase agreements	11.9		11.9	
Borrowed funds	270.2	169.4	100.8	59.5
Total deposits and borrowings	\$ 1,529.8	\$ 1,107.3	\$ 422.5	38.2%
•				
Quarterly average deposits	\$ 1,276.5	\$ 909.4	\$ 367.1	40.4
Quarterly average borrowed funds	289.1	170.6	118.5	69.5
Quarterly average deposits and borrowed funds	\$ 1,565.6	\$ 1,080.0	\$ 485.6	45.0%

As of September 30, 2010, total deposits were \$1.26 billion, an increase of \$321.7 million, or 34.3%, from \$937.9 million as of December 31, 2009. Deposits with a fair value of approximately \$320.8 million were acquired on July 1, 2010, as part of the Merger.

Borrowed funds, as of September 30, 2010, of \$270.2 million, were \$100.8 million, or 59.5%, higher than the December 31, 2009 balance of \$169.4 million. This increase was primarily due to the \$130.9 million (fair value) in borrowed funds acquired in the Merger on July 1, 2010, partially offset by FHLB advances and other borrowings that matured and were not renewed. The Corporation has approximately \$116 million of FHLB advances that mature within the next twelve months. Included in the \$130.9 million of acquired borrowed funds discussed above, is \$12.0 million of junior subordinated debentures and \$11.9 million of overnight commercial and non-profit customer repurchase agreements under the Repo Program. For more information regarding these borrowed funds, see Note 7 to the accompanying financial statements.

## Capital

Consolidated shareholders equity of the Corporation was \$158.3 million, or 9.2% of total assets, as of September 30, 2010, as compared to \$103.9 million, or 8.4% of total assets, as of December 31, 2009. This increase was due, in part, to equity raised in the registered direct offering discussed below and the equity issued as part of the Merger. The following table presents the Corporation s and Bank s capital ratios and the minimum capital requirements to be considered Well Capitalized by regulators as of September 30, 2010, and December 31, 2009:

			Minim	um
(dollars in thousands)	Actua	to be Well Ca	pitalized	
	Amount	Ratio	Amount	Ratio
September 30, 2010:				
Total (Tier II) Capital to Risk Weighted Assets				
Corporation	\$ 181,712	13.19%	\$ 137,716	10.00%
Bank	174,803	12.75%	137,099	10.00%
Tier I Capital to Risk Weighted Assets				
Corporation	\$ 148,844	10.81%	\$ 82,630	6.00%

Bank	141,958	8.27%	85,807	5.00%
Tangible Common Equity to Tangible Assets				
Corporation		7.95%		
Bank		8.20%		
December 31, 2009:				
Total (Tier II) Capital to Risk Weighted Assets				
Corporation	\$ 132,226	12.53%	\$ 105,533	10.00%
Bank	128,185	12.20%	105,092	10.00%
Tier I Capital to Risk Weighted Assets				
Corporation	\$ 99,277	9.41%	\$ 63,320	6.00%
Bank	95,236	9.06%	63,055	6.00%
Tier I Leverage Ratio (Tier I Capital to Total Quarterly Average Assets)				
Corporation	\$ 99,277	8.35%	\$ 59,478	5.00%
Bank	95,236	8.03%	59,327	5.00%
Tangible Common Equity to Tangible Assets				
Corporation		7.51%		
Bank		7.22%		

Both the Corporation and the Bank exceed the required capital levels to be considered Well Capitalized by their respective regulators at the end of each period presented. Neither the Corporation nor the Bank is under any agreement with regulatory authorities, nor is Management aware of any current recommendations by the regulatory authorities, which, if such recommendations were implemented, would have a material effect on liquidity, capital resources or operations of the Corporation.

46

#### Acquisition of First Keystone Financial, Inc.

On July 1, 2010, in connection with the acquisition of First Keystone Financial, Inc, which is discussed in Note 2 above, the Corporation issued 1,630,134 shares of common stock valued at approximately \$26.4 million. In addition, the Corporation recorded a \$102 thousand increase in additional paid in capital related to fully vested FKF employee stock options which were converted to options to purchase 21,133 shares of the Corporation s common stock.

## **Registered Direct Common Stock Offering**

On May 18, 2010, the Corporation announced it had completed the registration and sale of 1,548,167 shares of common stock, par value \$1.00, at a price of \$17.00 per share under the Corporation s Shelf Registration Statement. The Corporation received net proceeds of \$24.6 million after deducting placement agents fees and other offering expenses, which the Corporation expects to use for regulatory capital purposes, funding asset growth and financing possible mergers or acquisitions. See the Corporation s Forms 8-K filed with the SEC on May 14, 2010 and May 18, 2010 for additional information.

## Liquidity

The Corporation has sufficient liquidity as of September 30, 2010 as discussed below:

The Corporation s liquidity position is managed on a daily basis as part of the daily settlement function and continuously as part of the formal asset liability management process. The Corporation s liquidity is maintained by managing its core deposits as the primary source. Secondary sources include purchasing federal funds, selling residential mortgage loans in the secondary market, borrowing from the FHLB and Federal Reserve, and purchasing and issuing wholesale certificates of deposit.

Unused availability is detailed on the following table:

	As of		As of			
(dollars in millions)	9/30/10	% Unused	12/31/09	% Unused	\$ Change	% Change
Federal Home Loan Bank of Pittsburgh	\$ 393.4	64.2%	\$ 302.7	67.6%	\$ 90.7	(30.0)%
Federal Reserve Bank of Philadelphia	67.5	96.4%	55.3	98.0%	12.2	(22.1)%
Fed Funds Lines (7 banks)	75.0	100.0%	75.0	100.0%		0.0%
Total	\$ 535.9	70.7%	\$ 433.0	74.8%	\$ 102.9	(23.8)%

Quarterly, the ALCO reviews the Corporation s liquidity needs and reports its findings to the Risk Management Committee of the Corporation s Board of Directors.

As of September 30, 2010, the Corporation held \$15.0 million of FHLB stock, an increase of \$7.1 million, as compared to December 31, 2010. The FHLB continues to suspend dividends and repurchases of excess capital stock until further notice. The \$7.1 million of FHLB stock was acquired as part of the Merger.

The Corporation has an agreement with Promontory Interfinancial Network, LLC to provide deposits of \$60 million with a maximum of \$75 million of IND deposits from broker dealers priced at the effective Federal Funds rate plus 20 basis points. The Corporation had \$55.1 million of such deposits as of September 30, 2010 under this program, which is classified on the balance sheet as other wholesale deposits.

The Corporation has an agreement with Institution Deposit Corporation ( IDC ) to provide up to \$10 million of money market deposits at an agreed upon rate, currently at 1.00%. The Corporation had \$10.0 million of such deposits as of September 30, 2010, under this program, which is classified, on the balance sheet, as other wholesale deposits.

Wholesale funding, as a percentage of total funding, was 22.7%, as of September 30, 2010, as compared to 21.6%, as of December 31, 2009. Wholesale funding, which is defined as wholesale deposits (primarily certificates of deposit and funds from IND and IDC) and borrowed funds (FHLB advances, mortgage payable, subordinated debentures, junior subordinated debentures and repurchase agreements) of \$370.2 million as of September 30, 2010, was \$112.5 million, or 43.7%, higher than the December 31, 2009 balances of \$257.7. The primary reason for the increase in balances, as of September 30, 2010, as compared to December 31, 2009, is the wholesale funding acquired in the Merger, partially offset by FHLB and other borrowings that matured and were not renewed during the nine months ended September 30, 2010.

As mentioned in the balance sheet analysis above, the Corporation has approximately \$116 million of FHLB advances that mature within the next 12 months. The Corporation has sufficient liquidity in its cash balances, cash flows from its investment portfolio, and other borrowing sources to meet the cash requirements related to the FHLB advances that mature within the next twelve months.

47

Alternatively, the Corporation may choose to re-borrow these funds, dependent upon its ALCO strategy and position at the time the advances mature. The Corporation periodically evaluates its funding sources and reviews different options for increasing core deposits.

As of September 30, 2010, the investment portfolio was \$356.8 million, or 20.8%, of total assets, as compared to \$208.2 million, or 16.8%, as of December 31, 2009. The increase of \$148.6 million, or 71.3%, over the 9 month period ended September 30, 2010, was due, in large part, to the addition of the FKF investment portfolio of \$100.9 million, on July 1, 2010, as part of the Merger, along with the investment of acquired cash balances. As of September 30, 2010, the fair value of the Corporation s investment securities portfolio of \$356.8 million was \$4.4 million, or 1.2%, above its carrying value. The investment portfolio has a target minimum of 10% of total assets. As interest rates remain low, the Corporation continues to look for higher yielding investments while placing a strong emphasis on liquidity and credit quality.

As of September 30, 2010, the Corporation had \$20.4 million of cash balances at the Federal Reserve and \$21.7 million in other interest-bearing accounts.

#### **Off Balance Sheet Risk**

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the loan agreement. Total commitments to extend credit as of September 30, 2010, were \$373.7 million, as compared to \$334.0 million, as of December 31, 2009.

Standby letters of credit are conditional commitments issued by the Bank to a customer for the benefit of a third party. Such standby letters of credit are issued to support private borrowing arrangements. The credit risk involved in issuing standby letters of credit is similar to that involved in granting loan facilities to customers. The Corporation s obligation under standby letters of credit as of September 30, 2010 amounted to \$23.4 million as compared to \$18.4 million as of December 31, 2009.

Estimated fair values of the Corporation s off-balance sheet instruments are based on fees and rates currently charged to enter into similar loan agreements, taking into account the remaining terms of the agreements and the counterparties credit standing. Since fees and rates charged for off-balance sheet items are at market levels when set, there is no material difference between the stated amount and the estimated fair value of off-balance sheet instruments.

## Contractual Cash Obligations of the Corporation as of September 30, 2010:

(dollars in millions)	Total	Within 1 Year	2-3 Years	4-5 Years	After 5 Years
Deposits without a stated maturity	\$ 897.9	\$ 897.9	\$	\$	\$
Wholesale and time deposits	360.4	297.7	50.0	10.9	1.8
Operating leases	24.4	1.7	3.1	2.7	16.9
Subordinated debentures	22.5				22.5
Junior subordinated debentures	11.7				11.7
Repurchase agreements	11.9	11.9			
FHLB advances	219.6	115.0	76.7	6.8	21.1
Mortgage payable	2.0	0.1	0.1	0.1	1.7
Purchase obligations	4.1	1.7	1.6	0.8	
Non-discretionary pension contributions	2.0	0.1	0.3	0.3	1.3
Total	\$ 1,556.5	\$ 1,326.1	\$ 131.8	\$ 21.6	\$ 77.0

The contractual cash obligations at September 30, 2010, include operating leases for branch locations acquired as part of the FKF Merger.

48

#### Other Information

## **Regulatory Matters and Newly Enacted Legislation**

Regulatory Initiatives Related to Our Industry

The federal government is considering a variety of reforms related to banking and the financial industry including. Among those reforms is the Dodd-Frank Wall Street Reform and Consumer Protection Act, or Dodd-Frank Act, that was enacted by Congress on July 15, 2010, and was signed into law by President Obama on July 21, 2010. The Dodd-Frank Act is intended to promote financial stability in the U.S., reduce the risk of bailouts and protect against abusive financial services practices by improving accountability and transparency in the financial system and ending the concept of too big to fail institutions by giving regulators the ability to liquidate large financial institutions. It is the broadest overhaul of the U.S. financial system since the Great Depression and the overall impact on the Corporation and its subsidiaries is unknown at this time.

The Dodd-Frank Act delegates to various federal agencies the task of implementing its many provisions through regulation. Hundreds of new federal regulations, studies and reports addressing all of the major areas of the new law, including the regulation of banks and their holding companies, will be required, ensuring that federal rules and policies in this area will be further developing for months and years to come. Based on the provisions of the Dodd-Frank Act and anticipated implementing regulations, it is highly likely that banks and thrifts as well as their holding companies will be subject to significantly increased regulation and compliance obligations. The Dodd-Frank Act could require us to make material expenditures, in particular personnel training costs and additional compliance expenses, or otherwise adversely affect our business or financial results. It could also require us to change certain of our business practices, adversely affect our ability to pursue business opportunities we might otherwise consider engaging in, cause business disruptions and/or have other impacts that are as-of-yet unknown to the Corporation and the Bank. Failure to comply with these laws or regulations, even if inadvertent, could result in negative publicity, fines or additional licensing expenses, any of which could have an adverse effect on our cash flow and results of operations. For example, a provision of the Dodd-Frank Act is intended to preclude bank holding companies from treating future trust preferred securities issuances as Tier 1 capital for regulatory capital adequacy purposes. This provision may narrow the number of possible capital raising opportunities the Corporation, and other bank holding companies, might have in the future. As another example, the new law established the Bureau of Consumer Financial Protection, which has been given substantive rule-making authority under most of the consumer protection regulations affecting the Bank in connection with future consumer-related transactions.

The legislation also calls for regulations to be promulgated jointly by the federal banking regulators and the SEC which will require each bank and its holding company with consolidated assets of \$1 billion or more (which includes the Bank and the Corporation) to disclose to its federal regulator the structure of its incentive-based compensation arrangements and prohibiting it from entering into any incentive-based compensation arrangement that encourages (as determined by the federal banking regulators) the institution to take inappropriate risk. Such rule is required by the legislation to be adopted on or before April 21, 2011, but at this time it is difficult to predict the extent to which the new rule, and other rules promulgated pursuant to the legislation, will impact the Corporation s business.

Regulatory Initiatives Related to Capital and Liquidity

The Basel Committee on Banking Supervision (the Basel Committee ) released a comprehensive list of proposals for changes to capital, leverage, and liquidity requirements for banks in December 2009 (commonly referred to as Basel III ). In July 2010, the Basel Committee announced the design for its capital and liquidity reform proposals.

In September 2010, the oversight body of the Basel Committee announced minimum capital ratios and transition periods providing: (i) the minimum requirement for the Tier 1 common equity ratio will be increased from the current 2.0% level to 4.5% (to be phased in by January 1, 2015); (ii) the minimum requirement for the Tier 1 capital ratio will be increased from the current 4.0% to 6.0% (to be phased in by January 1, 2015); (iii) an additional 2.5% of Tier 1 common equity to total risk-weighted assets (to be phased in between January 1, 2016 and January 1, 2019; and (iv) a minimum leverage ratio of 3.0% (to be tested starting January 1, 2013). The proposals also narrow the definition of capital, excluding instruments that no longer qualify as Tier 1 common equity as of January 1, 2013, and phasing out other instruments over several years. It is unclear how U.S. banking regulators will define well-capitalized in their implementation of Basel III.

The liquidity proposals under Basel III include: (i) a liquidity coverage ratio (to become effective January 1, 2015); (ii) a net stable funding ratio (to become effective January 1, 2018); and (iii) a set of monitoring tools for banks to report minimum types of information to their regulatory supervisors.

Many of the details of the new framework related to minimum capital levels and minimum liquidity requirements in the Basel Committee s proposals will remain uncertain until the final release is issued later this year. Implementation of the final provisions of Basel III will require implementing regulations and guidelines by U.S. banking regulators. Implementation of these new capital and liquidity requirements has created significant uncertainty with respect to the future liquidity and capital requirements for financial institutions. Therefore, we are not able to predict at this time the content of liquidity and capital guidelines or regulations that may be adopted by regulatory agencies or the impact that any changes in regulation may have on the Corporation and the Bank.

#### **Effects of Inflation**

Inflation has some impact on the Corporation s operating costs. Unlike many industrial companies, however, substantially all of the Corporation s assets and liabilities are monetary in nature. As a result, interest rates have a more significant impact on the Corporation s performance than the general level of inflation. Over short periods of time, interest rates may not necessarily move in the same direction or in the same magnitude as prices of goods and services.

#### **Effect of Government Monetary Policies**

The earnings of the Corporation are and will be affected by domestic economic conditions and the monetary and fiscal policies of the United States government and its agencies. An important function of the FRB is to regulate the money supply and interest rates. Among the instruments used to implement those objectives are open market operations in United States government securities and changes in reserve requirements against member bank deposits. These instruments are used in varying combinations to influence overall growth and distribution of bank loans, investments, and deposits, and their use may also affect rates charged on loans or paid for deposits.

The Corporation is a member of the Federal Reserve System and, therefore, the policies and regulations of the FRB have a significant effect on its deposits, loans and investment growth, as well as the rate of interest earned and paid, and are expected to affect the Corporation s operations in the future. The effect of such policies and regulations upon the future business and earnings of the Corporation cannot be predicted.

## **Special Cautionary Notice Regarding Forward Looking Statements**

Certain of the statements contained in this Report and the documents incorporated by reference herein, may constitute forward-looking statements for the purposes of the Securities Act and the Securities Exchange Act of 1934, as amended (Exchange Act), and may involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements of the Corporation to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. These forward-looking statements include statements with respect to the Corporation's financial goals, performance, revenues, growth, profits, operating expenses, business plans, business prospects, credit quality, credit risk, reserve adequacy, liquidity, origination and sale of residential mortgage loans, impairment of goodwill, the effect of changes in accounting standards, and market and pricing trends. The words may , would , should , could , will , likely , expect, anticipate, intend , estimate , target , potentially , probably , outlook , predict , content forecast , project and believe or other similar words and phrases may identify forward-looking statements. Such statements are only predictions, and the Corporation's actual results may differ materially from the results anticipated by the forward-looking statement due to a variety of factors, including without limitation:

material differences in the actual financial results of merger and acquisition activities compared with expectations, such as with respect to the full realization of anticipated cost savings and revenue enhancements within the expected time frame, including as to the Merger;

revenues following the Merger being lower than expected;

deposit attrition, operating costs, customer loss and business disruption following the Merger, including, without limitation, difficulties in maintaining relationships with employees, being greater than expected;

the effect of future economic conditions on the Corporation and its customers, including economic factors which affect consumer confidence in the securities markets, wealth creation, investment and savings patterns, and the Corporation s interest rate risk exposure and credit risk;

changes in the securities markets with respect to the market values of financial assets and the stability of particular securities markets;

governmental monetary and fiscal policies, as well as legislation and regulatory changes;

results of examinations by the Federal Reserve Board, including the possibility that the Federal Reserve Board may, among other things, require us to increase our allowance for loan losses or to write-down assets;

changes in accounting requirements or interpretations;

changes in existing statutes, regulatory guidance, legislation or judicial decisions that adversely affect our business, including changes in income and non-income taxes;

the risks of changes in interest rates on the level and composition of deposits, loan demand, and the value of loan collateral and securities, as well as interest rate risk;

50

the effects of competition from other commercial banks, thrifts, mortgage companies, finance companies, credit unions, securities brokerage firms, insurance companies, money-market and mutual funds and other institutions operating in the Corporation s trade market area and elsewhere including institutions operating locally, regionally, nationally and internationally together with such competitors offering banking products and services by mail, telephone, computer and the internet;

any extraordinary event (such as the September 11, 2001 events, the war on terrorism and the U.S. Government s response to those events including the war in Iraq);

the Corporation s success in continuing to generate new business in its existing markets, as well as its success in identifying and penetrating targeted markets and generating a profit in those markets in a reasonable time;

the Corporation s ability to continue to generate investment results for customers and the ability to continue to develop investment products in a manner that meets customers needs;

changes in consumer and business spending, borrowing and savings habits and demand for financial services in our market area;

the Corporation s timely development of competitive new products and services in a changing environment and the acceptance of such products and services by customers;

the Corporation s ability to originate and sell residential mortgage loans;

the accuracy of assumptions underlying the establishment of reserves for loan and lease losses and estimates in the value of collateral, and various financial assets and liabilities;

the Corporation s ability to retain key members of senior management team;

the ability of key third-party providers to perform their obligations to the Corporation and the Bank;

technological changes being more difficult or expensive than anticipated; and

the Corporation s success in managing the risks involved in the foregoing.

All written or oral forward-looking statements attributed to the Corporation are expressly qualified in their entirety by use of the foregoing cautionary statements. All forward-looking statements included in this quarterly report are based upon management s beliefs and assumptions as of the date of this quarterly report. The Corporation assumes no obligation to update any forward-looking statement. In light of these risks, uncertainties and assumptions, the forward-looking statements discussed in this quarterly report or the incorporated documents might not occur, and you should not put undue reliance on any forward-looking statements.

## **ITEM 3.** Quantitative and Qualitative Disclosures About Market Risks

There has been no material change to the Corporation s and Bank s exposure to market risk since December 31, 2009. For further discussion of quantitative and qualitative disclosures about market risks, please refer to the Corporation s 2009 Annual Report and Form 10-K of which it forms a part.

## **ITEM 4.** Controls and Procedures

As of the end of the period covered by this report, the Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's Chief Executive Officer, Frederick C. Peters II, and Chief Financial Officer, J. Duncan Smith, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon the evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Corporation's disclosure controls and procedures are effective in timely alerting them to material information relating to the Corporation (including its consolidated subsidiaries) required to be included in the Corporation's periodic SEC filings.

There have not been any changes in the Corporation s internal controls over financial reporting during the quarter ended September 30, 2010 that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

## PART II OTHER INFORMATION.

ITEM 1. Legal Proceedings.

None.

51

## ITEM 1A. Risk Factors.

In addition to the other information set forth in this report, you should carefully consider the risk factors discussed under Part I Item 1A Risk Factors in our Form 10-K for the year ended December 31, 2009, as supplemented and updated by the discussion below.

Previously enacted and potential future legislation, including legislation to reform the U.S. financial regulatory system, could adversely affect our business.

Market conditions have resulted in creation of various programs by the United States Congress, the Treasury, the Federal Reserve and the FDIC that were designed to enhance market liquidity and bank capital. As these programs expire, are withdrawn or reduced, the impact on the financial markets, banks in general and their customers is unknown. This could have the effect of, among other things, reducing liquidity, raising interest rates, reducing fee revenue, limiting the ability to raise capital, all of which could have an adverse impact on the financial condition of the Bank and the Corporation.

Additionally, the federal government is considering a variety of other reforms related to banking and the financial industry including, without limitation, the newly adopted Dodd-Frank Wall Street Reform and Consumer Protection Act, or Dodd-Frank Act, that was enacted by Congress on July 15, 2010, and was signed into law by President Obama on July 21, 2010. This legislation could require us to make material expenditures, in particular personnel training costs and additional compliance expenses, or otherwise adversely affect our business or financial results. It could also require us to change certain of our business practices, adversely affect our ability to pursue business opportunities we might otherwise consider engaging in, cause business disruptions and/or have other impacts that are as-of-yet unknown to the Corporation and the Bank. Failure to comply with these laws or regulations, even if inadvertent, could result in negative publicity, fines or additional licensing expenses, any of which could have an adverse effect on our cash flow and results of operations. For example, a provision of the Dodd-Frank Act is intended to preclude bank holding companies from treating future trust preferred securities issuances as Tier 1 capital for regulatory capital adequacy purposes. This provision may narrow the number of possible capital raising opportunities the Corporation, and other bank holding companies, might have in the future.

The new Bureau of Consumer Financial Protection (BCFP) may reshape the consumer financial laws through rulemaking and enforcement of unfair, deceptive or abusive practices, which may directly impact the business operations of depository institutions offering consumer financial products or services including the Bank.

The BCFP has broad rulemaking authority to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof, with respect to all financial institutions that offer financial products and services to consumers. The BCFP is also authorized to prescribe rules applicable to any covered person or service provider identifying and prohibiting acts or practices that are unfair, deceptive, or abusive in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service (UDAP authority). The potential reach of the BCFP s broad new rulemaking powers and UDAP authority on the operations of financial institutions offering consumer financial products or services including the Bank is currently unknown.

Potential losses incurred in connection with possible repurchases and indemnification payments related to mortgages that we have sold into the secondary market may require us to increase our financial statement reserves in the future.

We engage in the origination and sale of residential mortgages into the secondary market. In connection with such sales, we make certain representations and warranties, which, if breached, may require us to repurchase such loans or indemnify the purchasers of such loans for actual losses incurred in respect of such loans. These representations and warranties vary based on the nature of the transaction and the purchaser's or insurer's requirements but generally pertain to the ownership of the mortgage loan, the real property securing the loan and compliance with applicable laws and applicable lender and government-sponsored entity underwriting guidelines in connection with the origination of the loan. While we believe our mortgage lending practices and standards to be adequate, we may receive requests in the future, which could be material in volume. If that were to happen, we could incur losses in connection with loan repurchases and indemnification claims, and any such losses might exceed our financial statement reserves, requiring us to increase such reserves. In that event, any losses we might have to recognize and any increases we might have to make to our reserves could have a material adverse effect on our business, financial position, results of operations or cash flows.

## ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

## **Share Repurchase**

On February 24, 2006, the Board of Directors of the Corporation announced its adoption of a stock repurchase program (the 2006 Program ) under which the Corporation may repurchase up to 450,000 shares of the Corporation s common stock, not to exceed \$10 million and terminated the 2003 Program. The 2006 Program was publicly announced in a Press Release dated February 24, 2006. There is no expiration date on the 2006 Program and the Corporation has no plans for an early termination of the 2006 Program. All shares purchased through the 2006 Program are accomplished in open market transactions.

There were no share repurchases made by the Corporation during the third quarter of 2010. As of September 30, 2010 the maximum number of shares that may yet be purchased under the 2006 Program was 195,705.
