- **Other operating income (expenses)** was a negative R\$1.8 million in 3Q16, versus a negative R\$171 million negative in 2Q16.
- **The proportional net financial result** was negative by R\$770 million, due to: i) financial expenses (excluding the exchange variation) of R\$847 million; ii) the negative exchange variation result of R\$74 million; and (iii) the result was partially offset by the financial revenue of R\$151 million.

Foreign Exchange Exposure

The FX exposure of our consolidated balance sheet on September 30, 2016 was US\$1,826 million, as shown in the table below. It is important to mention that the net FX exposure includes a liability totaling US\$1.0 billion in the Loans and Financing line related to the Perpetual Bonds, which, due to its nature, will not require disbursements for the settlement of the principal amount in the foreseeable future.

The hedge accounting adopted by CSN correlates projected export inflows in dollars with part of the scheduled debt payments in the same currency. Therefore, the exchange variation of the dollar-denominated debt is temporarily booked under shareholders' equity, being recorded in P&L when revenues in USD from exports are received.

Mining

In 3Q16, the seaborne iron ore market continued to be influenced by the healthy fundamentals of the Chinese steel segment. The policies to stimulate the economy introduced at the beginning of the year continued to fuel the real estate market and investments in infrastructure, which are the main drivers of the country's steel consumption. At the same time, the decommissioning of obsolete blast furnaces reduced the supply base, increasing the pricing power of the remaining plants. As a result, prices and margins remained healthy, encouraging steel production and the use of iron ore. Given this scenario, the commodity's price averaged US\$58.60/dmt (Platts, Fe62%, N. China) in 3Q16, 5.4% up on the previous quarter.

Maritime freight costs on Route CI-C3 (Tubarão-Qingdao) averaged US\$10.02/t in 3Q16, 18.9% up on 2Q16. The combination of scrapped ships and increased seaborne volume of iron ore resulted in higher fleet utilization and more chartering of capsized vessels. The route price was also influenced by the upturn in oil prices.

Results from CSN's Mining Operations

- In 3Q16, **iron ore production** totaled 8.6 million tonnes, in line with 2Q16.
- Third-quarter **iron ore purchases** came to 797,000 tonnes, 42% down on 2Q16.
- **Iron ore sales** came to 10.2 million tonnes in 3Q16, 10% up on 2Q16. Shipped iron ore volume totaled 8.7 million tonnes, 5% down on 2Q16. During 3Q16, 1.1 million tonnes from Congonhas Minérios were sold to CSN's Presidente Vargas Plant.

- **Net revenue** from mining operations totaled R\$1.3 billion, 29% up on 2Q16. The upturns were due to a combination of increased total iron ore sales volume, which came to 10.2 million tonnes this quarter, and higher average prices.
- Mining segment **COGS** came to R\$811 million in 3Q16, 9% up to 2Q16. Congonhas Minérios recorded a Chinese delivery cost excluding depreciation of US\$32.4/wmt, 15% increase on the previous quarter, mainly due to higher seaborne freight charges, which register an average of US\$12.88/t during 3Q16, against US\$10.86 during 2Q16.
- **Adjusted EBITDA** stood at R\$599 million in 3Q16, 64% up on 2Q16, with an adjusted EBITDA margin of 46%, 10p.p. more than in 2Q16, chiefly due to the increase in FOB export prices and higher total sales volume.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, State of Minas Gerais.

Iron ore is sold basically in the international market, especially in Europe and Asia. The prices charged in these markets are historically cyclical and subject to significant fluctuations over short periods of time, driven by several factors related to global demand, strategies adopted by the major steel producers, and the foreign exchange rate. All these factors are beyond the Company's control. The ore transportation is accomplished by Terminal de Carvão e Minérios do Porto de Itaguaí - TECAR, a solid bulk terminal, one of the four terminals that compose the Port of Itaguaí, located in Rio de Janeiro. Imports of coal and coke are held through this terminal and directed to the steel industry of CSN.

From November 30, 2015 the Company has transferred its mining assets, together with its logistical infrastructure, which includes the mine Casa de Pedra and the right to operate the terminal TECAR, to its subsidiary CSN Mineração S.A ("CSN Mineração") (former Congonhas Minérios S.A). On the same date, the Company acquired from the Asian Consortium 40% stake in Namisa. In other hand, the Asian Consortium taken a 12.48% stake in CSN Mineração S.A.

The Company's mining activities also comprises tin exploitation, which is based in the State of Rondônia, this facility is engaged to supply the needs of UPV, with the excess of raw materials being sold to subsidiaries and third parties.

- **Cement:**

CSN entered in the cement market boosted by the synergy between this new activity and its existing businesses. Next to the Presidente Vargas Steelworks (UPV) in Volta Redonda (RJ) is installed the new business unit CSN Cimentos, which produces CP-III type of cement by using slag produced by the UPV blast furnaces in Volta Redonda. It also explores limestone and dolomite at the Arcos unit, located in the State of Minas Gerais, to satisfy the needs of UPV as of the cement plant.

2.e) Restatement of the quarterly financial information for the nine-month period ended September 30, 2016, previously restated on November 14, 2016.

In addition to the detailed review of the business combination transaction explained in item (a) below, the Company's management performed a thorough review of various components and transactions, including the studies that support the recognition and maintenance of the amounts of long-lived assets, such as investments in subsidiaries and associates, goodwill, property, plant and equipment and tax credits. As a result of this review, a long-lived asset whose realization depends on projections with observable assumptions was revalued and its expected realization was adjusted. Accordingly, the financial statements for the year ended December 31, 2015, originally dated March 28, 2016 and restated on November 14, 2016 due to adjustments in non-controlling interests, were restated for the second time as a result of the detailed review mentioned above, which resulted in material adjustments to the following items:

- (a) Business combination between CSN Mineração and NAMISA; and
- (b) Expected realization of income tax and social contribution tax credits.

We present below further details on the adjustments that led management to opt for the second restatement of the financial statements for the year ended December 31, 2015.

a. Business Combination

The Company is restating the balances of the financial statements for the year ended December 31, 2015, as a result of a detailed review of all aspects of the business combination occurred on November 30, 2015, by which the Company's mining activities were restructured and concentrated on a primary entity, CSN Mineração S.A. This review occurred after the first restatement, on November 14, 2016, of those financial statements resulting from a change in the interpretation of the gains attributed to owners and to non-controlling, as disclosed in note 2.a.b, of those financial statements.

Within this context, the Company identified errors in certain assumptions used in the fair value determination of the entities involved in the transaction, Nacional Minérios S.A. (NAMISA) and CSN Mineração, as well as in the accounting for the clause of the Investment Agreement signed in December 2014 that approached the treatment to be given to NAMISA's assets excluded from the transaction, Fernandinho, Cayman and Pedras Pretas ("excluded assets"). As per that clause, Fernandinho, Cayman and Pedras Pretas assets included in the fair value determination of NAMISA shall be transferred directly to any entity other than CSN Mineração. By mistake, those assets were included within the net assets of NAMISA contributed to CSN Mineração and, in a subsequent act, were transferred from CSN Mineração to another entity, Minérios Nacional S.A (current corporate name of Mineração Nacional S.A.). And finally, the review appointed to a change in the interpretation of the determination of the gain or loss in the pre-existing relationship between the acquirer and the acquiree entities as established in the accounting pronouncement CPC15/IFRS3.

The Company opted to restate the year ended December 31, 2015 as comparative information in the financial statements for the year ended December 31, 2016. Thus, the reasons that led the Company to restate the business combination performed in 2015 are described in detail in Note 2 (ab) to the financial statements for the year ended December 31, 2016, which are being approved on the same date.

b. Estimated losses of deferred income tax and social contribution credits

The Company is restating the balances of deferred income tax and social contribution credits of its financial statements for the year ended December 31, 2015 after the technical review, during 2016, of the negative and positive aspects that supported their maintenance. The main change in the decision for this restatement is the exclusion of the sale of certain non-core assets from the studies of recovery of credits, reducing the future taxable base of projections, and the higher weight attributed to the observable evidence of tax losses existing in the last years, according to the interpretation given by accounting standard IAS 12 / CPC 32. As established in the standard, in the case of existence of recent history of successive losses or losses alternated in several years, this becomes the primary evidence for assessing the maintenance or

recording of tax credits to offset against future taxable profits, with the study of projections of these profits remaining as a source of secondary evidences and with lower weight in the assessment.

CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL PREVIOUSLY ISSUED IN PORTUGUESE

ITR — Quarterly Financial Information - September 30, 2016 – CIA SIDERURGICA NACIONAL **Version: 1**

Thus, the Company elected to maintain in assets an amount of tax losses and negative basis of social contribution equivalent to 30% of the deferred income tax liability balance, an amount that will be used as the deferred tax liability becomes current income tax payable. With this, the total credits arising from temporary differences were accrued and maintained in inventory of credits in the Company's tax books for future utilization. This system of maintenance of tax credits equivalent to 30% of the deferred income tax liability will remain until a new history of taxable profits is formed and the studies of projections of future profits become again primary evidences for the recording of tax credits, when the Company will recognize the temporary differences and higher amounts of tax losses and negative basis of social contribution losses that will be utilized to offset income tax payable arising from future taxable profits.

The adjustments in items (a) and (b) that generated the restatement of the financial statements for the year ended December 31, 2015, which consequently impacted the six-month period ended September 30, 2016 are detailed in the table below:

3. BUSINESS COMBINATION – CONTROL AQUISITION OF CGPAR CONSTRUÇÃO PESADA S.A. (“CGPAR”)

On September 30, 2016, CSN acquired 50% shares of CGPAR previously held by GPA Construção Pesada e Mineração Ltda., increasing its participation to 100% of the shares representative of the company's capital stock. The total amount paid was R\$ 1.00 (One Real).

The consideration paid reflects an agreement to solve a legal dispute involving contractual and commercial issues, as well as to release dividends declared in the previous fiscal years.

In this operation, the amounts were preliminary recognized in the financial statements as of September 30, 2016 and reviewed according the final report issued by independent appraisers as of December 31, 2016. The final impacts resulting from the preliminary valuation were evaluated by Management as immaterial, being recognized only in the financial statement as of December 31, 2016, which resulted in a gain from a bargain purchase of R\$ 25,379, compared to a preliminary goodwill of R\$ 1,784, according note (b), below:

(i) Fair value of 50% stake in CGPAR held immediately before the acquisition.

(ii) Amount related to the consideration paid for the acquiring company was R\$ 1.00 (One real).

CSN held 50% of CGPAR' shares immediately before the conclusion of the control acquisition. These shares were accounted for using the equity method.

According to the item 41 of the CPC15/IFRS 3, these shares became part of the consideration paid and must be measured by their fair value on the acquisition date. A gain or loss resulting from the difference between the fair value and the book value, immediately before the acquisition, must be recognized in profit or loss. Thus, the CGPAR's fair value evaluation was prepared using the discounted cash flow method, considering a current business plan before the transaction.

The results are presented in the following table:

Premises	09/30/2016	Updated Report

b) Gain from a bargain purchase generated from the control acquisition of CGPAR

According to the item 32 of the IFRS 3, the acquirer must recognize the goodwill resulted from the future economic benefits or a gain from a bargain purchase at the acquisition date. The fair value of assets acquired and liabilities assumed (Purchase Price Allocation – PPA) was calculated as follows:

Item	09/30/2016	R\$ (Million) Updated Report Shareholders' Equity Acquired

II – Investments in financial instruments classified as available-for-sale and measured at fair value through OCI

The Company has investments in common (USIM3) and preferred (USIM5) shares of Usiminas (“Usiminas Shares”), designated as available-for-sale financial assets. The Company adopts this designation because the nature of the investment is not comprised in any other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss). The asset is classified as a non-current asset in line item “investments” and is carried at fair value based on the quoted price on the stock exchange (BM&FBOVESPA). According to the Company's policy, the gains and losses arising from changes in the price of shares are recorded directly in equity, as other comprehensive income.

During March 2016, the Usiminas’ Board of Directors authorized a capital increase amounting to R\$64,882, through the issuance of up to 50,689,310 preferred shares. On April 22, 2016, CSN fully exercised its right of subscription, paying R\$11,603 by 9,064,856 preferred shares. The capital increase has been approved by the Usiminas’ Board of Directors on July 19, 2016.

As of September 30, 2016, there was no impairment recorded and the gain from the change in share price in the period was recorded in other comprehensive income (the impairment recorded as of 30 September, 2015 amounted to R\$ 81,016):

- Hedge accounting – cash flow**

Beginning November 1, 2014, the Company formally designated cash flow hedging relationships to protect highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on its profit, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising on translating the designated liabilities shall be temporarily recognized in shareholders' equity and

Therefore, the hedge relationship was discontinued from August 2015. The exchange rate of the effective period remains recorded in Stockholders' Equity until the time of debt settlement.

In the hedging relationships described above, the amounts of the debt instruments were fully designated for equivalent iron ore export portions.

- Net investment hedge in foreign subsidiaries**

CSN has foreign exchange exposure in Euros arising from a loan made by a foreign subsidiary with functional currency in Reais, for the acquisition of investments abroad whose functional currency is Euro. Such exposure arises from converting the balance sheets of these subsidiaries for consolidation in CSN, and the exchange rate of the loans affected the income statement in the financial result item and the exchange variation of the net assets of the foreign operation directly affected the equity in other comprehensive income.

As from September 1st, 2015 CSN began to adopt hedge of net investment to eliminate exposure in order to cover future fluctuations of the Euro on such loans. Non-derivative financial liabilities have been designated represented by loan agreements with financial institutions in the amount of € 120 million. The carrying amounts on September 30, 2016 are:

Designation Date	Hedging Instrument	Hedged item	Type of hedged risk	Exchange rate on designation	Designated amounts (EUR'000)	09/30/2016 Impact on shareholders' equity
9/1/2015	Non-derivative financial liabilities in EUR Debt contract	Investments in subsidiaries which EUR is the functional currency	Foreign exchange - R\$ vs. EUR spot rate	4.0825	120,000	37,644

(**) Deferred taxes over control acquisition – CGPAR as described in note 3.

The Company has foreign subsidiaries in its corporate structure, for which profits are taxed at income tax in the countries where they are domiciled by lower rates than those prevailing in Brazil. From 2012 up to the 3rd quarter of 2016 such foreign subsidiaries generated profits amounting to R\$ 2,036,438. If for some reason tax authorities understand that these profits are subject to additional taxation in Brazil in respect of income tax and social contribution, which if due, would total R\$ 571,680.

The Company, based on its legal counsel's opinion, assessed the likelihood of loss in a potential claiming by tax authorities which resulted in a possible risk of loss and, therefore, no provision was recognized in the financial statements.

- **Environmental lawsuits**

The environmental processes present high complexity for estimating the amount at risk, should be taken into consideration, among various aspects, procedural development, the extent of damage and the projection of repairing costs.

There are other environmental processes for which it is not yet possible to assess the risk and contingency value due to the aforementioned complexity estimation, the peculiarities of the matters involving them and also their procedural steps.

- Adjusted EBITDA**

Adjusted EBITDA is the measurement based on which the chief operating decision maker assesses the segment performance and the capacity to generate recurring operating cash, consisting of profit for the year less net finance income (costs), income tax and social contribution, depreciation and amortization, equity in results of affiliated companies, results of discontinued operations and other operating income (expenses), plus the proportionate EBITDA of joint ventures.

Even though it is an indicator used in segment performance measurement, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, it does not have a standard definition, and may not be comparable with measurements using similar names provided by other entities.

As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices:

28. INSURANCE

Aiming to properly mitigate risk and in view of the nature of its operations, the Company and its subsidiaries have taken out several different types of insurance policies. Such policies are contracted in line with the CSN Risk Management policy and are similar to the insurance taken out by other companies operating in the same lines of business as CSN and its subsidiaries. The risks covered under such policies include the following: Domestic Transportation, International Transportation, Life and Casualty, Health Coverage, Fleet Vehicles, D&O (Civil Liability Insurance for Directors and Officers), General Civil Liability, Engineering Risks, naming Risks, Export Credit, warranty and Port Operator's Civil Liability.

In 2015, after negotiation with insurers and reinsurers in Brazil and abroad, an insurance policy was issued for the contracting of a policy of Operational Risk of Property Damages and Loss of Profits, with effect from September 30, 2015 to October 30, 2016. Under the insurance policy, the LMI (Maximum Limit of Indemnity) is US\$600 million and covers the following units and subsidiaries of the Company: Presidente Vargas steelworks, CSN Mineração, Sepetiba Tecon, and CSN Mining. CSN takes responsibility for a range of retention of US\$375 million in excess of the deductibles for property damages and loss of profits.

In view of their nature, the risk assumptions adopted are not part of the scope of an audit of the financial statements and, accordingly, were not audited by our independent auditors.

31. SUBSEQUENT EVENTS

• Possible Proceedings

• Significant development of Proceeding No. 19515.723039/2012-79

In February 2017, the Company was notified of the judgment of the Amendment of Judgment filed due the CARF's decision on case 19515.723039 / 2012-79, in which the Federal Revenue Service of Brazil challenges the capital gain on the alleged sale of 40% of NAMISA (currently CSN Mineração S.A.). The CARF, in short, agreed with the infringement notice. The Company, however, is taking of the lawfulness of the operation and, therefore, is evaluating the appropriate legal and procedural measures to reverse the decision. It is important to emphasize, finally, that this decision does not alter the assessment of loss on the case, which remains as possible, see note 17.

• Significant development of Proceeding No. 19515.723053/2012-72

The Superior Board of Tax Appeals of CARF ruled on 03/14/2017 a special appeal by the National Treasury against a previous decision favorable to Namisa, (currently CSN Mineração S.A.) filed in case No. 19515.723053 / 2012-72, in which the Federal Revenue Service of Brazil challenges the deductibility of goodwill amortization expenses arising from the operation carried out with the Asian Consortium in 2008. The CARF, in summary, agreed with the infringement notice. The Company, however, has absolute conviction of the lawfulness of the operation and, therefore, is taking legal measures. It is important to emphasize, finally, that this decision does not alter the assessment of loss of the case, which remains as possible, see note 17.

ITR — Quarterly Financial Information - September 30, 2016 – CIA SIDERURGICA NACIONAL **Version: 1**

The Brazilian Court of Auditors (“TCU”) issued a cautionary decision in May 2016 referred to the action TC 012.179/2016 by which it prohibited new transfers of Government funds to TLSA to be made by Valec Engenharia, Construções e Ferrovias S.A., Fundo de Investimento do Nordeste – FINOR, Fundo Constitucional de Financiamento do Nordeste – FNE, Fundo de Desenvolvimento do Nordeste – FDNE, Banco Nacional de Desenvolvimento Econômico e Social – BNDES and BNDES Participações S.A. – BNDESPar. After TLSA appeal against the cautionary decision and further details to have been provided, in June 2016 the preliminary injunction given by TCU was unanimously revoked by the Court and the continuity of the transfer of funds was re-established.

By means of another protective order issued in January 2017, relating to the case TC 012.179/2016, the Court of Auditors of the Union forbade new transfers of public resources to TLSA by Valec Engenharia, Construções e Ferrovias S.A., Fundo de Investimento do Nordeste – FINOR, Fundo Constitucional de Financiamento do Nordeste – FNE, Fundo de Desenvolvimento do Nordeste – FDNE, Banco Nacional de Desenvolvimento Econômico e Social – BNDES and BNDES Participações S.A. – BNDESPar. The Company has provided the required clarifications to the TCU and has acted firmly in order that the decision can be repealed soon and the flow of investments planned can be restored.

There is an administrative procedure before the Transportation National Agency (“ANTT”), that assesses the regular fulfilling by the grantee FTL of the obligations contained in the Concession Agreement. By an unilateral assessment, ANTT considered that FTL was not compliant with the Term of Conduct Adjustment (“TAC”) signed in 2013 alleging that FTL had not fulfilled the 2013 production plan. ANTT decided to set up an administrative proceedings to investigate the supposed unfulfillment of the concession agreement and, in the case of confirming irregularities, may apply several penalties, including the early termination of the concession agreement. The grantee filed its defense against the administrative proceedings and currently no new decisions have been taken.

- **Independent investigation – Construction of the Long Steel Plant**

Considering the mentioning of a Company's officer in an article disclosed by the press, based on testimonials made before the Court, the Audit Committee decided to hire a specialized forensic service to conduct an external and independent investigation of the contractual relationship related to the construction of CSN's Long Steel Plant (contract in which there would have been alleged improper payments, as bonus, as reimbursement of payments made to political parties supposedly requested by such officer) and to analyze the extent of the commercial relationship between contractor . The conclusion of the investigation is that nothing in the testimonials referred to above was confirmed, there being no contingencies arising from the matters investigated. Consequently, understands the Company that at this moment there is no basis to justify the setting up of a provision for losses or the disclosure of a contingency.

Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with CPC 21 (R1) and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards on auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the ITR referred to above is not prepared, in all material

respects, in accordance with CPC 21 (R1) and IAS 34 applicable to the preparation of Interim Financial Information (ITR) and presented in accordance with the standards issued by the Brazilian Securities Commission (CVM).

above has been adjusted and is being restated to reflect the impacts arising from the restatement of the financial statements for the year ended December 31, 2015, relating to: (i) the accounting and fair value measurement adjustments upon the application of technical pronouncement CPC 15 (R1) - Business Combination and international standard IFRS 3 - Business Combination, issued by the IASB, concerning the business combination conducted by subsidiary Congonhas Minérios S.A. and (ii) the review of the recoverability analysis and adjustments to deferred income tax and social contribution balances.

Continuity as a going concern of the joint venture Transnordestina Logística S.A.

We draw attention to note 10 to the interim financial information, which describes the completion stage of the new railway network of the joint venture Transnordestina Logística S.A. (“TLSA”), currently under construction, the completion period of which was initially expected for January 2017 and is currently being reviewed and discussed with the relevant governmental agencies. The completion of the construction and consequent startup of operations depend on the continuing contribution of funds by its shareholders and third parties. Those events or conditions, along with other matters described in said note, indicate that a material uncertainty exists, which may cast significant doubt on TLSA's ability to continue as a going concern.
