**América Móvil's first quarter of
2018 financial and operating report**

Mexico City, April 24, 2018 - América Móvil, S.A.B. de C.V. (“América Móvil”) [BMV: AMX] [NYSE: AMX, AMOV], announced today its financial and operating results for the first quarter of 2018.

- We added 1.4 million postpaid wireless subscribers in the first quarter, twice as many as a year before—including 935 thousand in Brazil and 181 thousand in Mexico, bringing our subscriber base up 7.4% year-on-year.
- We also gained 427 thousand fixed-broadband clients to finish March with 28.6 million accesses, up 4.8%.
- Revenues of 254.4 billion pesos were down 3.7% year on year in Mexican peso terms on account of the appreciation of the Mexican peso vs. other currencies; at constant exchange rates they actually rose 2.8%, with service revenues increasing 2.1%, growing faster than in the prior quarter: 1.4%.
- The main drivers of service revenue growth were postpaid revenues, up 9.2%, prepaid-data revenues, 11.4%, and fixed-broadband revenues, 5.0%.
- Mexico was the top performer in the quarter with service revenue growth accelerating from 3.3% in the fourth quarter to 6.3% in the first one. Mobile revenues shot up 12.8% year-on-year.
- At 71.2 billion pesos EBITDA was practically flat in Mexican peso terms from a year before, but at constant exchange rates it was up 5.9%. The EBITDA margin, 28.0%, was 0.8 points higher. It was the highest margin in ten quarters.
- EBITDA margins were up more than two percentage points in Mexico, Brazil, Peru and Chile from the year-earlier quarter. In Puerto Rico, EBITDA margin improved sequentially from -3.5% to 9.5%, showing signs of normalization.
- We posted a comprehensive financing income of 913 million pesos as foreign exchange gains of 22.9 billion pesos driven mostly by the appreciation of the Mexican peso vs. the U.S. dollar more than offset our net interest and other financial expenses
- We obtained a net profit of 18 billion pesos, equivalent to 27 peso cents per share or 29 dollar cents per ADR.
- At the end of March our net debt stood at 614.1 billion pesos, practically flat relative to December. It would have been 13.6 billion lower in March had we not had to consider the payment of hybrid bonds in the amount of 600 million euros by Telekom Austria as incurring new debt. This is to do with accounting considerations, pertaining to which such bonds had been considered equity.
- Our capital expenditures came in at 24 billion pesos in the quarter.

Relevant Events

We recently launched 4.5G networks in Brazil, Mexico, Austria and Dominicana. With the new platform we can deliver speeds up to 10 times faster than on 4G and our subscribers can experiment voice and video in high definition. This new platform will enable us to connect millions of devices simultaneously using Narrowband-IOT and Cat-M technologies to expand the universe of the Internet of Things. Seeking to be the leaders in innovation and technology, we are today the only carrier to offer 4.5G in the aforementioned countries. We will continue to modernize our platforms introducing 4.5G in the rest of the countries in 2018. We have been, and continue to be, the innovation leaders in Latam.

On March 5th, we received notice of resolution by the Instituto Federal de Telecomunicaciones (IFT) where they set forth the terms under which we are required to separate—legally and functionally—the provision of wholesale regulated

fixed services by Telmex and Telnor and create a new entity (“the Separated Entity”) with corporate governance of its own, independent from that of América Móvil and from the retail division of Telmex. The Separated Entity will be a direct subsidiary of Telmex that will be transferred the necessary assets and personnel required to provide wholesale services.

We have up to two years to implement the separation mandated by IFT. The resolution establishes a calendar and obligation to provide information to IFT periodically. We have challenged the resolution in accordance to applicable laws. Still, its fulfillment is mandatory and Telmex has initiated the separation process.

On April 16th, we announced that our shareholders approved the payment of a dividend of MXP\$0.32 (thirty two peso cents) per share, payable in cash in two installments in July and November. Shareholders also approved the allocation of an amount equal to three billion pesos to its share buyback reserve for the April 2018 –April 2019 period; and to cancel AMX’s treasury shares acquired by AMX as part of its buyback program, except for five billion series “L” treasury shares.

Access Lines

At 362 million access lines at the end of March, our access base remained mostly unchanged from a year before.

Net postpaid wireless additions for the period came in at 1.4 million subs, more than doubling those of the prior year. This figure includes 935 thousand in Brazil (more than four times as many as last year) and 181 thousand in Mexico. Our postpaid subscriber base was up 7.4%, with Chile’s increasing 16.7% and Brazil’s 14.9%.

We disconnected 1.3 million prepaid subscribers—most of them in Brazil—following a cleanup of the client base.

On the fixed-line platform, broadband accesses rose 4.8% year-on-year after 427 thousand new accesses in the quarter, most of them in Brazil, México and Central America. Our PayTV subscriber base was down 2.4% annually, after 49 thousand disconnections in the quarter.

América Móvil Consolidated Results

In the first quarter of 2018, with world economic growth improving steadily and most regions posting solid growth, volatility returned to U.S. financial markets as inflation fears resurfaced in the face of tight labor markets and what appeared to be an acceleration of wage increases.

U.S. long-term interest rates rose to levels not seen in over four years as the market focused once again on inflation risks. In Latin America, exchange rates were not affected by the increase in U.S. interest rates, and in fact the Mexican peso became one of the best performing currencies following its depreciation in the fourth quarter of 2017.

Our revenues totaled 254.4 billion pesos. In Mexican peso terms, they were down 3.7% from the year-earlier quarter on account of the appreciation of the peso vs. other currencies. Correcting for this currency effect, revenues actually rose 2.8%, with service revenues increasing 2.1% at constant exchange rates.

As has been the case in prior quarters, postpaid revenues and prepaid-data revenues, together with fixed-broadband revenues, were the main drivers of revenue growth. The main drags came from fixed-line voice revenues, reflecting major reductions in long distance revenues in Brazil and Mexico.

Mexico was the top performer in the quarter, with service revenue growth accelerating from 3.3% in the fourth quarter to 6.3% in the first one. Central America followed, going from 1.8% to 3.5% in the period.

Mobile ARPUs increased sharply in Mexico, 11.6%, and Brazil, 10.7%, with Tracfone in the U.S. posting a 7.3% rise. They declined in Peru by 5.6%, and in Colombia, by 3.4%.

Our EBITDA came in at 71.2 billion pesos and was practically flat year-on-year in Mexican peso terms because of the appreciation of the peso; at constant exchange rates it was up 5.9%. At 28.0%, the EBITDA margin was 0.8 points higher than a year before and was the highest consolidated EBITDA margin in ten quarters.

EBITDA margins were up more than two percentage points in Mexico, Brazil, Peru and Chile from the year-earlier quarter, and more than eight percentage points in smaller operations (Panama and Costa Rica). Although still down compared to a year before, the EBITDA margin in Puerto Rico exhibited a strong recovery from the prior quarter, increasing from -3.5% to 9.5%, which reflects the gradual normalization of our operations in the island, partly linked to the resumption of electrical power in most of the territory.

Operating profits totaled almost 30 billion pesos in the first quarter and were up 7.5% at constant exchange rates.

Total Assets	1,407,964	1,486,212	-5.3%	Total Liabilities and Equity	1,407,964	1,486,212	-5.3%

At the end of March our net debt stood at 614.1 billion pesos. It was nearly flat relative to December, but would have been 13.6 billion lower in March had we not had to consider the payment of hybrid bonds in the amount of 600 million euros by Telekom Austria as incurring new debt.

The Telekom Austria hybrid bonds had been considered equity given that they were perpetual bonds, notwithstanding that they could be called in certain dates. Paying down those bonds therefore led to both a decrease in equity and a corresponding increase in net debt on the balance sheet. From the perspective of rating agencies, the hybrid bonds were considered to be 50% equity and 50% debt.

Our capital expenditures came in at 24 billion pesos in the quarter.

Financial Debt of América Móvil*

Total Debt (MxP)	682,075	697,885
Cash, Marketable Securities and Short Term Financial Investments (MxP)	68,003	83,391
Net Debt (MxP)	614,072	614,494

**This table does not include the effect of forwards and derivatives used to hedge the foreign exchange exposure. The debt figures include the face value amount of the outstanding América Móvil hybrid bonds (1,450M euros and 550M sterling). On February 2018, TKA called its 600 million euro hybrid bond. The aforementioned bond was not accounted for as debt, as it was a perpetual bond. Accountingwise, its liquidation resulted in an increase in net debt of the same amount. Without this effect net debt would have been 13.6 billion pesos lower in March.*

Mexico

Our Mexican operation added 181 thousand wireless postpaid subscribers in the first quarter, to finish March with 74.0 million wireless subscribers, 12.9 million of them postpaid. Year-over-year, our postpaid subscriber base increased 6.2%. On the fixed line platform we added 110 thousand broadband clients, ending the quarter with 22 million fixed-RGUs, practically flat relative to the prior year.

Revenues increased 4.8% from the year-earlier quarter to 66.5 billion pesos, with service revenues expanding 6.3%—the fastest rate in over a year. Mobile service revenues soared 12.8%, the highest in several quarters. Mobile ARPU shot

up 11.6% year-on-year in the first quarter, up from 7.2% in the preceding quarter.

Fixed-line revenues declined 5.1% year-on-year, nearly as much as they had the prior quarter, on account of continued reductions in international long distance and interconnection revenues, down 24.8%, and 23.4% respectively. Fixed broadband revenues declined slightly, 1.8%, as revenues from corporate networks fell in the quarter.

First quarter EBITDA jumped 12.8% to 22.8 billion pesos reflecting the greater operating leverage brought about by the revenue momentum. The EBITDA margin, 34.3%, was the highest one in eight quarters.

In March we launched our 4.5G network, the Gigared. Initially it is available in all the areas where we have 4G-coverage, at much higher speeds, offering video and voice in high definition and enabling us to connect millions of devices simultaneously. We are able to offer 4.5G thanks to the investments we have made to fully modernize our networks in Mexico. We have always been the first adopter of the new technologies in Mexico.

Argentina, Paraguay and Uruguay

We finished March with 24.1 million mobile clients, 1.3% more than a year before, and 680 thousand fixed-RGUs, up 7.5% year-on-year as PayTV accesses expanded 10.3% in Paraguay.

Our revenues in the amount of 14.4 billion Argentinean pesos were up 30.7% year-on-year. Service revenues grew 27.2% as mobile data revenues—that account for nearly 77% of our wireless service revenues —soared 47.3%, driving mobile ARPU up by 25.1% to 145 Argentinean pesos. On the fixed-line platform revenues increased 25.6% driven by PayTV revenues that grew 50.7%, although from a small base mostly in Paraguay.

EBITDA of 5.2 billion Argentinean pesos was 31.5% greater than a year before, with the EBITDA margin rising slightly to 35.9%.

Having obtained the license to sell PayTV in Argentina, we made a soft launch of our IP-TV product in Buenos Aires. We are fine-tuning our offer and will continue with the rollout of fiber to the home to strengthen our fixed business in the country.

Brazil

We added 935 thousand postpaid subscribers in Brazil during the first quarter and disconnected 1.1 million prepaid subscribers, ending March with 58.8 million mobile clients. Our postpaid subscriber base reached 21.3 million, a 14.9% year-on-year increase, as we doubled our share of net adds in the market. The major investments we've made on our mobile network, together with our innovative plans and better customer experience have given us an edge that is allowing us to increase our share in the postpaid segment of the market.

We are the only carrier offering 4.5G services in Brazil; we have rolled out this technology in 150 cities enhancing the experience of our subscribers. Our mobile service obtained the highest satisfaction rate in the last research report conducted by Anatel. Claro is leading number portability vs. all national operators in both the prepaid and the postpaid segments.

On the fixed-line platform we gained 162 thousand fixed-broadband clients, but disconnected 124 thousand fixed telephony accesses and 81 thousand PayTV clients. In the "ultrabroadband" segment (connections faster than 34 Mbps) we reached 2.5 million accesses, which represents a 51% market share. At the end of the quarter we had 35.9 million fixed-RGUs in Brazil.

Revenues were practically flat year-on-year at 8.8 billion reais, with service revenues increasing 8.3% on the mobile platform and declining 4.5% on the fixed one. Mobile postpaid revenues led the way rising 22.2% from the year-earlier quarter, followed by prepaid data revenues, up 9.3%, and by fixed-broadband revenues, up 4.2%. Mobile ARPU was up 10.7% year-on-year, the fastest rate recorded in years, as our plans with unlimited voice, high quality mobile internet and digital services such as Claro Musica and Claro Video are perceived as great value.

The main drag on revenue growth came from fixed long distance revenues that fell 22.3% and by PayTV, which posted a 5.2% revenue decline, mostly on the DTH platform.

EBITDA for the quarter totaled 2.6 billion reais, 6.9% more than a year before, with the EBITDA margin just shy of 30%, up 2.1 percentage points relative to the year-earlier quarter. We've launched a number of transformational projects that will allow us to attain greater cost efficiencies.

We are continually investing and innovating, developing new cloud-based digital services and aggregating the best available content, to deliver great communication, entertainment and productivity solutions for our clients.

Chile

Our wireless subscriber base topped seven million by the end of March having risen 5.0% over the year. Net additions came in at 63 thousand for the period; 54 thousand of those were postpaid. Fixed RGUs were up 1.1% to 1.4 million, as broadband accesses expanded 8.3%.

Service revenues increased 4.9%, led by postpaid revenues and fixed-broadband revenues, up 18.9% and 10.9% respectively. Fixed-line service revenues represent 41% of the total.

We have made important commercial efforts that have resulted in a greater revenue base that, along with the cost improvements linked to a comprehensive efficiency program, brought EBITDA up 34.2% over the prior year to 36.1 billion Chilean pesos. The EBITDA margin, 18.2%, rose 4.8 percentage points from the year-earlier quarter.

Colombia

We had 29.4 million wireless subscribers by the end of March, 0.9% more than a year before. Net additions came in at 48 thousand; they were all prepaid since the first quarter was marked by very aggressive competition in the postpaid segment. On the fixed-line side, we reached 6.8 million fixed RGUs, up 5.7%, with landlines growing 9.9% and broadband accesses 6.4%.

Total revenues of 2.8 trillion Colombian pesos rose 1.7% annually with service revenues increasing 1.3%. On the fixed-line platform, service revenues—that represent 38% of the total—expanded 9.3% with fixed-broadband and PayTV revenues increasing 8.7% and 10.2%, respectively.

In a very competitive mobile market, our service revenues were down 2.3%, with postpaid revenues flat and prepaid revenues falling. Mobile ARPU fell 3.4% year-on-year.

In spite of the competitive pressure, cost controls and operating efficiencies

allowed EBITDA to grow 3.6% to 1.1 trillion Colombian pesos. The EBITDA margin stood at 40.4%, up from 39.7% a year before.

Ecuador

Our wireless subscriber base finished March with eight million clients after net additions of 40 thousand in the quarter. On the postpaid segment, the client base was up 4.2% over the year to 2.6 million. Additionally, we had 370

thousand fixed RGUs, 3.4% more than a year before.

Revenues totaled 315 million dollars, down 5.5% over the year with service revenues falling 4.3% driven by prepaid voice revenues. Mobile postpaid revenues increased 3.2% and fixed-broadband revenues 5.8%.

The quarter's EBITDA of 124 million dollars fell 1.9% from the prior year. However, the EBITDA margin improved 1.4 percentage points, to 39.3%, as we have been modernizing our platforms and carried on with a broad program that has generated important operating efficiencies.

We were the first carrier to introduce 4.5G technologies in Ecuador; it is available in the main cities: Guayaquil, Quito and five other cities. Claro reaffirms its commitment to invest in the country.

Peru

After net additions of 116 thousand in the first quarter we ended the period with 12.5 million wireless subscribers, 4.3% more than a year before, and 1.4 million fixed RGUs. Fixed-broadband accesses increased 4.7%, but we had disconnections of voice and PayTV accesses.

First quarter revenues of 1.3 million soles were 0.8% lower than a year before. Wireless service revenues declined 2.4% due to a 62.5% reduction in interconnection rates beginning in January 2018.

In spite of the reduction in revenues, EBITDA rose 12.6% year-on-year to 313 million soles, as the decline in interconnection revenues was almost fully compensated by a corresponding reduction in interconnections costs. The EBITDA margin stood at 23.5%, up from 20.7% a year before.

Central America

Our Central American operations added 174 thousand mobile subs to finish the first quarter with 16.1 million clients. On the fixed-line platform we had 5.9 million accesses, 8.0% more than a year before, on the back of new broadband accesses: we connected 102 thousand new accesses. At the end of March they had increased 15.9% compared to the prior year.

Revenues increased 4.7% to reach 595 million dollars. On the wireless platform service revenues were up 3.3%, the highest rate observed in 6 quarters on the back of data usage. On the fixed platform, service revenues rose 1.2% as a result of a 9.6% increase in PayTV and 7.3% in data revenues.

EBITDA rose 6.0% to 207 million dollars. It was equivalent to 34.7% of revenues.

Caribbean

Our operations in the islands ended the quarter with 5.7 million wireless subscribers, 3.5% more than a year before, after net additions of 63 thousand.

In Dominicana we added 50 thousand new clients bringing our subscriber base up 3.3% year-on-year; our postpaid base grew 3.6%. On the fixed segment, our base increased 4.5%. Revenues were up 4.4% year-on-year on the back of data revenues that expanded 23.2% on the mobile platform and 9.9% on the fixed. We obtained EBITDA of 106 million dollars that rose 4.8% as compared to the prior year. The EBITDA margin stood at 44.7% having risen 1.9 percentage points in twelve months.

In Puerto Rico we gained 14 thousand new subs in the quarter, 58.2% more than a year before, taking our wireless subscriber base up to 892 thousand subs, 4.8% above last year's. Service revenues totaled 206 million including 27.4 million obtained from the payment of insurance claims. Netting out these payments, service revenues, while still down 9% from the year-earlier quarter, were 17.7% greater than in the prior quarter. We generated EBITDA of 23 million, compared to a loss of seven million dollars in the prior quarter. It is still below that of the year-earlier quarter, 54 million, but is clearly on its way to full recovery. The revenues from insurance claims were offset by the charges associated with phasing out the equipment damaged by the hurricane.

By the end of the quarter our mobile network was fully restored, but 25% of our base-stations were still being powered by diesel instead of electrical power. Our fixed-line service is 80% operational. We expect to be able to operate under normal conditions shortly.

United States

Our subscriber base ended March with 22.8 million subscribers, 8.0% below the prior year. Net disconnections in the quarter were 371 thousand. We registered disconnections of 522 thousand from SafeLink, our brand tied to the Lifeline program. Altogether, other brands reported positive additions of 151 thousand subs, compared to 100 thousand disconnections in the first quarter of last year. StraightTalk showed the best performance.

Total revenues grew 1.0% and topped two billion dollars. Service revenues declined 4.2% improving from -8.8% in the fourth quarter of 2017. Excluding Safelink, we posted a sequential increase in revenues from the fourth quarter to the first one.

ARPU rose 7.3% year-on-year and churn came down to 4.1% from 5.4% a year before.

EBITDA came down 27.9% relative to last year to 152 million dollars and the EBITDA margin stood at 7.6% of revenues, down three percentage points due to the revenue loss, as well as growth of our main brands.

Telekom Austria Group

We finished March with 20.6 million wireless subscribers, unchanged from a year before. On the postpaid segment however, we added 122 thousand new subscribers taking our contract base up 4.2% year-on-year. Fixed RGUs topped six million, slightly less than a year before following disconnections of voice lines and broadband accesses that were partly offset by RGU increases in Belarus and Macedonia.

Group revenues increased 1.2% to 1.1 billion euros. Excluding one off effects booked in Austria in the year-earlier quarter, service revenues would have risen 0.6% reflecting growth in all segments except for Slovenia. Wireless service revenues declined 0.7% mostly as a result of the abolition of roaming charges within the EU, which affected mostly Austria and Slovenia.

EBITDA of 341 million euros was stable as compared to the prior year. After adjusting for extraordinary items and restructuring charges in Austria, EBITDA rose 6.7% at constant exchange rates. All of our operations reported positive EBITDA growth with one exception, Slovenia.

Glossary of Terms

ARPU Average Revenue per User. The ratio of service revenues in a given period to the average number of wireless subscribers in the same period. It is presented on a monthly basis.

ARPM Average Revenue per Minute. The ratio of service revenues to airtime traffic.

Capex Capital Expenditure. Accrued capital expenditures related to the expansion of the telecommunications infrastructure.

Churn Disconnection Rate. The ratio of wireless subscribers disconnected during a given period to the number of wireless subscribers at the beginning of that period.

EBIT Earnings Before Interest and Taxes, also known as Operating Profit.

EBIT

margin The ratio of EBIT to total operating revenue.

EBITDA Earnings Before Interest, Taxes, Depreciation, and Amortization.

EBITDA

margin The ratio of EBITDA to total operating revenue.

EPS

(Mexican

pesos)

Earnings per share. Total earnings in Mexican pesos divided by total shares.

Earnings

per ADR

(US\$)

Total earnings in U.S. dollars divided by total ADRs equivalent.

Equity

subscribers

Subscribers weighted by the economic interest held in each company.

Gross

additions

Total number of subscribers acquired during the period.

Licensed

pops Licensed population. Population covered by the licenses that each of the companies manage.

LTE Long-term evolution is a 4th generation standard for wireless communication of high-speed data for mobile phones and data terminals.

Market

share A company's subscriber base divided by the total number of subscribers in that country.

MBOU Megabytes of Use per subscriber. The ratio of wireless data in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.

MOU Minutes of Use per subscriber. The ratio of wireless traffic in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.

Net

subscriber

additions The difference in the subscriber base from one period to another. It is the different between gross additions and disconnections.

Net debt Total short and long term debt minus cash and marketable securities.

Net debt

/ EBITDA The ratio of total short and long term debt minus cash and securities to trailing 12-month income before interest, taxes, depreciation and amortization.

Prepaid Subscriber that may purchase airtime to recharge a cellular phone. The client does not hold a contract with the company for voice and data services.

Postpaid Subscriber that has a contract for the use of airtime. The client has no need of activating airtime, it is done so immediately.

SMS Short Message Service.

SAC Subscriber Acquisition Cost. The sum of handset subsidies, marketing expenses and commissions to distributors for handset activation. Handset subsidy is calculated as the difference between equipment cost and equipment revenues.

Wireless

penetration The ratio of total wireless subscribers in any given country divided by the total population in that country.
