Item 2.05. Costs Associated with Exit or Disposal Activities.

On October 27, 2004, the Executive Committee of the Board of Directors of Cabot Corporation (the "Company") authorized the Company to implement a plan to shut down its Altona, Australia carbon black production plant, subject to any legally required consultation and notification processes. The decision to close the facility was driven by a number of factors including, in particular, the Company's raw materials supplier's indication that it would cease supply in September 2005, as well as the decline of the carbon black market in Australia. The closure is planned to occur in early October 2005. The Company is working to debottleneck certain of its Asia Pacific carbon black manufacturing plants in order to replace the 45,000 metric tons of production capacity in Altona.

The Company expects the closure plan will result in an estimated pre-tax charge to earnings of approximately \$18 million over the next two years. Estimates of the total cost the Company expects to incur for each major type of cost associated with the plan are: (i) severance and employee benefits of \$6 million, (ii) accelerated depreciation of facilities assets of \$5 million, (iii) asset retirement obligations (consisting mainly of demolition and site clearing costs) of \$5 million, and (iv) recognition of foreign currency translation adjustments of \$8 million, (v) offset by the potential gain on sale of assets of \$6 million. The total after-tax charge is estimated at \$12 million.

Net cash outlays related to the closure over the two years are expected to be approximately \$5 million, which includes the anticipated proceeds from the sale of certain assets.

On October 27, 2004, the Company issued a press release announcing its intention to close the Altona plant, a copy of which is attached hereto as Exhibit 99.1.

Item 9.01. Financial Statements and Exhibits.

(c) Exhibits.

99.1 Press release issued by Cabot Corporation on October 27, 2004 announcing the Company's intention to close its Altona, Australia carbon black manufacturing facility.
