Item 7.01 Regulation FD Disclosure.

On October 10, 2008, The Williams Companies, Inc. ("Williams") announced that its preliminary estimates indicate the effect of hurricanes Gustav and Ike will reduce its third-quarter 2008 consolidated segment profit by \$50 million to \$70 million, primarily in the company's Midstream business segment.

Williams estimates Midstream's third-quarter 2008 segment profit will be reduced by \$45 million to \$65 million. The reduction is because of repairs and property insurance deductibles, as well as the downtime and reduced volumes at its facilities associated with hurricanes Gustav and Ike.

For fourth-quarter 2008, the company estimates a reduction in Midstream's segment profit of \$10 million to \$20 million, also due to property insurance deductibles and downtime and reduced volumes associated with the hurricanes. Any effect on future periods will depend on producers' ability to restore operations in certain areas and the resolution of any associated business interruption insurance claims.

Because of hurricane-related repairs, as well as an unrelated rupture on the Transco system near Appomattox, Va., Williams estimates Gas Pipeline's third-quarter 2008 segment profit will be reduced by approximately \$5 million. The company does not expect any material financial impact on Gas Pipeline's fourth-quarter 2008 results due to these factors.

A copy of the press release announcing the estimated financial effect of the recent hurricanes is furnished herewith as Exhibit 99.1. The information furnished is not deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, is not subject to the liabilities of that section and is not deemed incorporated by reference in any filing under the Securities Act of 1933, as amended.

Item 9.01 Financial Statements and Exhibits.
