If No to (b) or (c) above, describe the method of distributions to shareholders. For Mergers, provide the exchange ratio(s) used and explain how it was calculated:					
	(d)						
		In the Merger, the Surviving Fund acquired all of the assets and assumed all of the liabilities of the Fund and the Fund's outstanding common shares were exchanged for newly-issued common shares of the Surviving Fund. The aggregate net asset value of the Surviving Fund's common shares received by the Fund's common shareholders in the Merger was equal to the aggregate net asset value of their holdings of the Fund's common shares as determined at the close of business on November 15, 2013, less the applicable cost of the Merger (although the Fund's common shareholders may have received cash for their fractional common shares).  The Fund's net asset value ("NAV") per common share as of November 15, 2013 was \$7.9112. The Surviving Fund's NAV per common share as of November 15, 2013 was \$12.9229. The conversion ratio was 0.61218457, which is the quotient of the Fund's NAV per common share divided by the Surviving Fund's NAV per common share.
