KONA GRILL, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation and Significant Accounting Policies

Kona Grill, Inc. (referred to herein as the Company or we, us, and our) owns and operates upscale casual dining restaurants under the name Kona Grill. Our restaurants feature a diverse selection of mainstream American dishes and award-winning sushi that are prepared fresh daily. We currently own and operate 19 restaurants in 12 states throughout the United States.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the rules and regulations of the Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six month periods ended June 30, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

The consolidated balance sheet at December 31, 2007 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. Accordingly, these financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2007.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash, money market funds, and highly liquid short-term fixed income securities with a maturity of 90 days or less when acquired. Amounts receivable from credit card processors are also considered cash equivalents because they are both short-term and highly liquid in nature and are typically converted to cash within one business day of the sales transaction. Under the Company's asset classification practices, when there is no legal right of offset against cash balances in a specific financial institution, uncleared checks are classified as accounts payable. Uncleared checks totaling approximately \$1,683,000 and \$1,013,000 were included in accounts payable as of June 30, 2008 and December 31, 2007, respectively.

Recent Accounting Pronouncements

Effective January 1, 2008, we adopted Statement of Financial Accounting Standard No. 157, *Fair Value Measurements* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. See Note 3 for further discussion of fair value measurements. In February 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157* (SFAS 157-2), which provides a one year deferral of the effective date of SFAS 157 for non-financial assets and non-financial liabilities. We do not expect that the provisions of SFAS 157-2 will have a material impact on our consolidated financial statements.

Table of Contents

KONA GRILL, INC.
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

2. Investments

The following is a summary of available-for-sale securities (in thousands):

	Adjusted Cost	Gross Unrealized Losses	Fair Value
June 30, 2008			
Short-term investments:			
Certificates of deposit	\$ 366	\$	\$ 366
Long-term investments:			
Auction rate securities	6,600	(458)	6,142
Total investments	\$ 6,966	\$ (458)	\$ 6,508
December 31, 2007			
Short-term investments:			
Auction rate securities	\$ 8,650	\$	\$ 8,650
Corporate debt securities	5,538		5,538
Total investments	\$ 14,188	\$	\$ 14,188

As of June 30, 2008, our investment portfolio included auction rate securities with a par value of \$6.6 million. These securities are primarily AAA rated long term debt obligations secured by student loans, of which approximately \$6.0 million or 90% of the par value is guaranteed by the federal government under the Federal Family Education Loan Program. In addition, one of the securities not fully comprised of federal government guaranteed loans is AA rated, but has an insurance policy guaranteeing both the principal and accrued interest. While the maturity dates of our auction rate securities range from 2029 to 2046, the liquidity for these securities has historically been provided by an auction process that resets the applicable interest rate at pre-determined calendar intervals, generally every 28 days. The recent uncertainties in the credit markets have adversely affected the auction market for these types of securities and auctions for these securities have failed to settle on their respective settlement dates. Consequently, our investments in auction rate securities are not currently liquid and we will not be able to access these funds until a future auction of these investments is successful, the issuer refinances the underlying debt, or a buyer is found outside of the auction process. We currently have the intent to hold our auction rate securities until the recovery of the auction process. As of June 30, 2008, we classified our auction rate securities as long-term investments on our consolidated balance sheet because of the uncertainty in when the auction markets will recover and the timing of when these securities can be settled at par value.

Typically the fair value of auction rate securities approximated par value due to the frequent resets through the auction process. We continue to earn interest on our auction rate securities investments with current yields of approximately 2.5% and maximum contractual default rates of approximately 3.6% as of June 30, 2008. As a result of the liquidity issues experienced in the credit markets, all of our auction rate securities have experienced failed auctions since February 2008 and therefore do not currently have a readily determinable market value. We estimated the fair value of our auction rate securities using valuation models provided by third parties. The assumptions used in the models included assessments of the following: (i) collateralization underlying each security; (ii) the present value of future principal and interest payments discounted at rates considered to reflect current market conditions; (iii) consideration of the probabilities of default, passing a future auction, or repurchase at par for each period; and (iv) estimates of the

recovery rates in the event of default for each security. Based on these valuation models, we estimated the fair value of our auction rate securities to be \$6.1 million as of June 30, 2008. As a result, we recorded an unrealized loss of \$0.5 million for the six months ended June 30, 2008.

We review our investments in accordance with FASB Staff Position SFAS No. 115-1 and 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, to determine the classification of the impairment as temporary or other-than-temporary. A temporary impairment charge results in an unrealized loss being recorded in the other comprehensive loss component of stockholders' equity. Such an unrealized loss does not affect net loss for the applicable accounting period. An other-than-temporary impairment charge is recorded as a realized loss in the consolidated statement of operations and increases net loss for the applicable accounting period. The determination of whether the impairment is temporary or other-than-temporary requires significant judgment. The differentiating factors between temporary and other-than-temporary impairment are primarily the length of time and the extent to which the market value has been less than cost, the financial condition and near-term prospects of the issuer and our intent and ability to retain our investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value. We do not consider our investments in auction rate securities to be other-than-temporarily impaired at June 30, 2008.

Table of Contents**KONA GRILL, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****3. Fair Value Measurements**

Effective January 1, 2008, we adopted SFAS 157 for our financial instruments. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, SFAS 157 establishes a three-tier value hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value.

Level 1: Fair values determined by quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.

Level 2: Fair values utilize inputs other than quoted prices that are observable for the asset or liability, and may include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability.

Level 3: Fair values determined by unobservable inputs that are not corroborated by market data and may reflect the reporting entity's own assumptions market participants would use in pricing the asset or liability.

Our short-term investments represent fixed income securities that are valued primarily using quoted market prices or alternative pricing sources and models utilizing market observable inputs. Our investments in auction rate securities are classified within Level 3 because they are valued using a discounted cash flow model (see Note 2). The following table presents information about our assets measured at fair value on a recurring basis at June 30, 2008, and indicates the fair value hierarchy of the valuation techniques utilized by us to determine such fair value (in thousands).

Description	Fair Value Measurements at Reporting Date Using			June 30, 2008
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Certificates of deposit	\$ 366	\$	\$	\$ 366
Auction rate securities			6,142	6,142
	\$ 366	\$	\$ 6,142	\$ 6,508

The following table summarizes the changes in fair value of our Level 3 assets (in thousands):

	Fair Value Measurements of Assets Using Level 3 Inputs Long-term Investments
Balance at December 31, 2007	\$
Transfer to Level 3	8,650
Total gains or losses (realized and unrealized) Included in earnings	
Included in other comprehensive loss	(458)
Net settlements	(2,050)

Balance at June 30, 2008

\$

6,142

Table of Contents**KONA GRILL, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****4. Net (Loss) Income Per Share**

Basic net (loss) income is computed by dividing net (loss) income by the weighted average number of common shares outstanding during the period. Diluted net loss per share excludes the dilutive effect of potential stock option and warrant exercises, which are calculated using the treasury stock method.

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2008	2007	2008	2007
	(In thousands, except per share data)			
Numerator:				
Net (loss) income	\$ (535)	\$ 313	\$ (1,208)	\$ (230)
Denominator:				
Weighted average shares Basic	6,565	5,866	6,587	5,860
Effect of dilutive stock options and warrants		367		
Weighted average shares Diluted	6,565	6,233	6,587	5,860
Net (loss) income per share:				
Basic	\$ (0.08)	\$ 0.05	\$ (0.18)	\$ (0.04)
Diluted	\$ (0.08)	\$ 0.05	\$ (0.18)	\$ (0.04)

For the three and six months ended June 30, 2008, there were approximately 1,020,000 stock options and warrants outstanding that were not included in the dilutive earnings per share calculation because the effect would have been anti-dilutive. For the three and six months ended June 30, 2007, there were approximately 117,000 and 918,000 stock options and warrants outstanding, respectively, that were excluded from the dilutive earnings per share calculation for the same reason.

5. Accrued Expenses

Accrued expenses consisted of the following (in thousands):

	June 30,	December 31,
	2008	2007
Accrued payroll	\$ 1,542	\$ 1,358
Business and income taxes	593	629
Sales taxes	605	517
Gift cards	393	533
Accrued occupancy	223	227
Other	859	761
	\$ 4,215	\$ 4,025

6. Stock Repurchase Plan

During April 2008, our Board of Directors approved a stock repurchase program under which we are authorized to repurchase up to 600,000 shares of our common stock. We repurchased 116,200 shares at a total cost of \$1,000,000 during the three months ended June 30, 2008 under a section 10b5-1 purchase program. The authorization does not

have an expiration date and it does not require us to purchase a specific number of shares. This authorization may be modified, suspended or terminated at any time. The timing and number of shares repurchased pursuant to the share repurchase authorization are subject to a number of factors, including current market conditions, legal constraints and available cash or other sources of funding.

Table of Contents**KONA GRILL, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****7. Stock-Based Compensation**

We maintain stock award plans which provide for discretionary grants of incentive and nonstatutory stock options, restricted stock, and other types of awards to our employees, consultants, and non-employee directors. A total of 1,075,000 shares of common stock have been reserved for issuance under our plans of which 26,071 shares were available for grant as of June 30, 2008. Stock options issued under these plans are granted with an exercise price at or above the fair market value of the underlying common stock on the date of grant and generally expire five or ten years from the date of grant. Employee stock options generally vest 25 percent each year over a four-year period, while annual recurring awards for non-employee director options vest 25 percent each quarter over a one-year period. There were no stock options granted during the three months ended June 30, 2008 and 2007. The fair value of stock options granted during the six month periods ended June 30, 2008 and 2007 were estimated at the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	Six Months Ended June 30,	
	2008	2007
Expected volatility	35.7%	34.4%
Risk-free interest rate	2.5%	4.9%
Expected life (in years)	3.7	3.8
Dividend yield	0.0%	0.0%
Weighted average fair value per option granted	\$ 3.53	\$ 6.45

The following table summarizes activity under our stock award plans for the six months ended June 30, 2008:

	Shares Under Option	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding options at December 31, 2007	655,439	\$ 12.59		
Granted	170,417	11.66		
Forfeited	(7,250)	12.29		
Exercised	(2,000)	6.00		
Outstanding options at June 30, 2008	816,606	\$ 12.41	4.1 years	\$ 511,000
Exercisable at June 30, 2008	479,439	\$ 10.78	4.1 years	\$ 510,000

We recognized stock-based compensation expense of \$137,000 and \$139,000 during the three months ended June 30, 2008 and 2007, respectively, and \$265,000 and \$341,000 during the six months ended June 30, 2008 and 2007, respectively. The intrinsic value of options exercised during the six months ended June 30, 2008 and 2007 was approximately \$6,000 and \$121,000, respectively. As of June 30, 2008, there was approximately \$1,079,000 of total unrecognized stock-based compensation expense related to unvested share-based compensation arrangements, which is expected to be recognized over a weighted average period of 2.6 years.

Table of Contents**KONA GRILL, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****8. Comprehensive (Loss) Income**

Comprehensive (loss) income is defined as the aggregate change in stockholders' equity, excluding changes in ownership interests. It is the sum of net (loss) income and changes in unrealized gains or losses on available-for-sale securities. The components of comprehensive (loss) income for the three and six months ended June 30, 2008 and 2007 were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Net (loss) income	\$ (535)	\$ 313	\$ (1,208)	\$ (230)
Net unrealized (losses) gains on available-for-sale securities	(105)	1	(458)	1
Total comprehensive (loss) income	\$ (640)	\$ 314	\$ (1,666)	\$ (229)

9. Commitments and Contingencies

We are engaged in various legal actions, which arise in the ordinary course of our business. Although there can be no assurance as to the ultimate disposition of these matters, it is the opinion of our management, based upon the information available at this time, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on our results of operations or financial condition.

10. Stockholder Rights Plan

On May 27, 2008, our Board of Directors adopted a Stockholder Rights Plan (the "Rights Plan") and a dividend distribution of one preferred share purchase right (a "Right") for each outstanding share of common stock. Each Right entitles the registered holder to purchase from the Company one one-thousandth of a share of Series A Junior Participating Preferred Stock, par value \$.01 per share, of the Company (the "Preferred Stock") at a price of \$55.00 per one one-thousandth of a share of Preferred Stock (the "Purchase Price"), subject to adjustment and subject to the terms and conditions set forth in the Rights Plan. The Rights will be exercisable only if a person or group acquires 20% or more of the Company's common stock (subject to certain exceptions), and thus becomes an "Acquiring Person" under the Rights Plan, or announces or commences a tender or exchange offer the consummation of which would result in ownership by a person or group of 20% or more of the common stock. Upon any such occurrence, each Right will entitle its holder (other than such Acquiring Person or group of affiliated or associated persons and certain transferees) to purchase, at the Right's then-current exercise price, a number of shares of the Company's common stock having a market value of twice the exercise price. Prior to the time that any person becomes an Acquiring Person, the Rights are redeemable for \$0.001 per Right at the option of the Board of Directors.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

This information should be read in conjunction with the unaudited consolidated financial statements and notes thereto included in Item 1 of Part I of this Quarterly Report and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2007 contained in our 2007 Annual Report on Form 10-K. The following discussion contains certain forward-looking statements that involve known and unknown risks and uncertainties, such as statements relating to our future economic performance, plans and objectives for future operations, and projections of restaurant sales and other financial items that are based on our beliefs as well as assumptions made by and information currently available to us. Factors that might cause actual events or results to differ materially from those indicated by these forward-looking statements may include the matters under Item 1A, Risk Factors in this report, our Annual Report on Form 10-K for the year ended December 31, 2007 and other reports filed from time to time with the Securities and Exchange Commission.

Overview

We currently own and operate 19 restaurants located in 12 states. We offer freshly prepared food, personalized service, and a contemporary ambiance that create a satisfying yet affordable dining experience that we believe exceeds many traditional casual dining restaurants with whom we compete. Our high-volume upscale casual restaurants feature a diverse selection of mainstream American dishes as well as a variety of appetizers and entrees with an international influence, including an extensive selection of sushi items. Our menu items are freshly prepared and incorporate over 40 signature sauces and dressings that we make from scratch, creating broad-based appeal for the lifestyle and taste trends of a diverse group of guests. Our menu is standardized for all of our restaurants allowing us to deliver consistent quality meals. We believe that our vast menu and generous portions offers our guests an attractive price-value proposition.

We continue to follow a disciplined growth plan focused on expanding our presence in both new and existing markets. Over the last three years, we have funded our development of new restaurants primarily from the proceeds of our initial public offering, our private offering of common stock completed during November 2007, and cash flows from operations. We opened our restaurant in Gilbert, Arizona during June 2008 and plan to open an additional three new restaurants during 2008, which will expand our presence in both new and existing markets. We target our restaurants to achieve an average annual unit volume of \$4.5 million following 24 months of operations. We believe our typical new restaurants experience gradually increasing unit volumes as guests begin to discover our concept and we begin to generate market awareness. Our restaurants are also subject to seasonal fluctuations. Sales in most of our restaurants typically are higher during the spring and summer months and winter holiday season.

We experience various trends in our operating cost structure. Cost of sales, labor, occupancy, and other operating expenses for our restaurants open at least 12 months generally trend consistent with restaurant sales, and we analyze those costs as a percentage of restaurant sales. We anticipate that our new restaurants will take approximately six months to achieve operating efficiencies as a result of challenges typically associated with new restaurants, including lack of market recognition and the need to hire and sufficiently train employees, as well as other factors. We expect cost of sales and labor expenses as a percentage of restaurant sales to be higher when we open a new restaurant, but decrease as a percentage of restaurant sales as the restaurant matures and as restaurant management and employees become more efficient operating that unit. As a result, the volume and timing of newly opened restaurants has had, and is expected to continue to have, an impact on costs of sales, labor, occupancy, restaurant operating expenses, and preopening expenses. The majority of our general and administrative costs are fixed costs. We expect our general and administrative spending to increase as we add corporate personnel and infrastructure to support our growth. However, we expect our general and administrative costs to decrease as a percentage of restaurant sales as we leverage these investments and realize the benefits of higher sales volumes.

Table of Contents

Key Measures We Use to Evaluate Our Company

Key measures we use to evaluate and assess our business include the following:

Number of Restaurant Openings. Number of restaurant openings reflects the number of restaurants opened during a particular reporting period.

Same-Store Sales Percentage Change. Same-store sales percentage change reflects the periodic change in restaurant sales for the comparable restaurant base. In calculating the percentage change in same-store sales, we include a restaurant in the comparable restaurant base after it has been in operation for more than 18 months. Changes in same-store sales can be generated by an increase or decrease in guest traffic counts or by increases or decreases in the per person average check amount. Menu price changes and the mix of menu items sold can affect the per person average check amount.

Average Weekly Sales. Average weekly sales represents the average of restaurant sales measured over consecutive Monday through Sunday time periods.

Average Unit Volume. Average unit volume represents the average restaurant sales for all of our restaurants open for at least 12 months before the beginning of the period measured.

Sales Per Square Foot. Sales per square foot represents the restaurant sales for our restaurants open for at least 12 months, divided by the total square feet for such restaurants.

Restaurant Operating Profit. Restaurant operating profit is defined as restaurant sales minus cost of sales, labor, occupancy, and restaurant operating expenses. Restaurant operating profit does not include general and administrative expenses, depreciation and amortization, and preopening expenses. We believe restaurant operating profit is an important component of financial results because it is a widely used metric within the restaurant industry to evaluate restaurant-level productivity, efficiency, and performance. We use restaurant operating profit as a percentage of restaurant sales as a key metric to evaluate our restaurants' financial performance compared with our competitors.

Key Financial Definitions

Restaurant Sales. Restaurant sales include gross food and beverage sales, net of promotions and discounts.

Cost of Sales. Cost of sales consists of food and beverage costs.

Labor. Labor includes all direct and indirect labor costs incurred in operations.

Occupancy. Occupancy includes all rent payments associated with the leasing of real estate, including base, percentage and straight-line rent, property taxes, and common area maintenance expense. We record tenant improvement allowances as a reduction of occupancy expense over the initial term of the lease.

Restaurant Operating Expenses. Restaurant operating expenses consist of all other restaurant-level operating costs, the major components of which are utilities, credit card fees, advertising, supplies, marketing, repair and maintenance, and other expenses. Other operating expenses contain both variable and fixed components.

General and Administrative. General and administrative includes all corporate and administrative functions that support operations and provide infrastructure to facilitate our future growth. Components of this category include management and staff salaries, bonuses, stock-based compensation and related employee benefits, travel, information systems, human resources, corporate rent, professional and consulting fees, and corporate insurance costs.

Table of Contents

Preopening Expense. Preopening expense consists of costs incurred prior to opening a new restaurant and is comprised principally of manager salaries and relocation, payroll and related training costs for new employees, including practice and rehearsal of service activities, and rent expense incurred from the date we obtain possession of the property until opening. We expense restaurant preopening expenses as incurred, and we expect preopening expenses to be similar for each new restaurant opening, which typically commence six months prior to a restaurant opening.

Depreciation and Amortization. Depreciation and amortization expense consists of the depreciation of property and equipment and gains and losses on disposal of assets.

Interest Income. Interest income consists of interest earned on our cash and investments.

Interest Expense. Interest expense includes the cost of servicing our debt obligations, net of capitalized interest.

Financial Performance Overview

The following table sets forth certain information regarding our financial performance for the three and six months ended June 30, 2008 and 2007.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Restaurant sales growth	4.5%	62.7%	11.4%	58.5%
Same-store sales percentage change (1)	(5.6)%	5.0%	(4.1)%	3.4%
Average weekly sales comparable restaurant base (2)	\$ 89,955	\$ 95,256	\$ 86,638	\$ 90,371
Average weekly sales non-comparable restaurant base (3)	\$ 76,659	\$ 82,815	\$ 76,456	\$ 77,555
Average unit volume (in thousands) (4)	\$ 1,088	\$ 1,288	\$ 2,123	\$ 2,450
Sales per square foot (4)	\$ 155	\$ 183	\$ 301	\$ 348
Restaurant operating profit (in thousands) (5)	\$ 3,669	\$ 3,918	\$ 6,564	\$ 6,771
Restaurant operating profit as a percentage of sales (5)	18.2%	20.3%	16.8%	19.4%

(1) Same-store sales percentage change reflects the periodic change in restaurant sales for the comparable restaurant base. In calculating the percentage change for same-store sales, we include a restaurant in the comparable restaurant base after it has been in operation for more than 18 months.

- (2) Includes only those restaurants in the comparable restaurant base.
- (3) Includes only those restaurants that are not in the comparable restaurant base that were open for the entire period.
- (4) Includes only those restaurants open for at least 12 months before the beginning of the period measured.
- (5) Restaurant operating profit is not a financial measurement determined in accordance with generally accepted accounting principles and should not be considered in isolation or as an alternative to (loss) income from operations. Restaurant operating profit may not be comparable to the same or similarly titled measures computed by other companies. The

table below sets forth our calculation of restaurant operating profit and reconciliation to (loss) income from operations, the most comparable GAAP measure.

Three Months Ended June 30, 2008 Compared with Three Months Ended June 30, 2007

Restaurant Sales. Restaurant sales increased by \$0.9 million, or 4.5% to \$20.2 million during the second quarter of 2008 from \$19.3 million during the prior year period. The sales increase was primarily the result of restaurant sales associated with the opening of three new restaurants since November 2007, partially offset by an overall reduction in guest traffic at our existing restaurants attributed to the challenging macroeconomic factors affecting consumer spending in general. In particular, lower levels of guest traffic were experienced by our restaurants located in areas greatly affected by the housing crisis, including Arizona, Florida, and Nevada. Higher menu pricing of approximately 5.1% was more than offset by reduced guest traffic at our comparable restaurants as same-store sales declined 5.6% during the second quarter of 2008.

Cost of Sales. Cost of sales were essentially flat at \$5.5 million during both the second quarter of 2008 and 2007. Cost of sales as a percentage of restaurant sales decreased 1.1% to 27.3% during the second quarter of 2008 from 28.4% during the prior year period. Cost of sales during the second quarter of 2008 benefitted from increased purchasing efficiency and reduced waste resulting from our newly implemented automated food cost and inventory management

system.

Labor. Labor costs for our restaurants increased \$0.7 million, or 11.5% to \$6.7 million during the second quarter of 2008 from \$6.0 million during the prior year period. This increase was primarily due to the opening of three new restaurants since November 2007. Labor expenses as a percentage of restaurant sales increased 2.1% to 33.0% during the second quarter of 2008 from 30.9% during the second quarter of 2007. This increase was primarily the result of reduced leverage of fixed labor costs resulting from lower average sales volume. In addition, higher average salaries to attract and retain qualified restaurant managers and federal and state minimum wage increases, implemented during the second half of 2007 and at the beginning of 2008, contributed to increased labor costs as a percentage of sales.

Table of Contents

Occupancy. Occupancy expense increased by \$0.1 million, or 7.6% to \$1.3 million during the second quarter of 2008 from \$1.2 million during the prior year period. Occupancy expenses as a percentage of restaurant sales increased 0.2% to 6.4% during the second quarter of 2008 from 6.2% during the second quarter of 2007. Occupancy expense was favorably impacted by reduced percentage rent offset by decreased leverage of fixed costs from lower average sales volume.

Restaurant Operating Expenses. Restaurant operating expenses increased by \$0.3 million, or 11.1% to \$3.0 million from \$2.7 million during the second quarter of 2007. Restaurant operating expenses as a percentage of restaurant sales increased 0.9% to 15.1% during the second quarter of 2008 from 14.2% during the prior year period. During the second quarter of 2008, higher repair and maintenance costs, primarily driven by restaurant remodeling and increased utilities and training costs, combined with reduced leverage from lower average sales volume contributed to the increase in restaurant operating expenses as a percentage of sales. We expect restaurant operating expenses as a percentage of sales to remain higher than prior periods throughout 2008 as we continue to incur higher repair and maintenance costs from remodeling our older restaurants.

General and Administrative. General and administrative expenses increased by \$0.2 million or 10.6% to \$2.0 million during the second quarter of 2008 from \$1.8 million during the second quarter of 2007. The \$0.2 million increase is primarily attributable to costs associated with our stockholder rights plan adopted in May 2008. General and administrative expenses as a percentage of restaurant sales increased 0.5% to 10.0% of restaurant sales during the second quarter of 2008 compared to 9.5% of restaurant sales during the prior year period.

Preopening Expense. Preopening expense increased \$0.2 million to \$0.5 million during the second quarter of 2008 compared to \$0.3 million during the second quarter of 2007. The increase in preopening expense is attributable to the timing of new restaurant openings as our Gilbert restaurant opened during June 2008 as compared to our Troy restaurant which opened early in the second quarter during 2007. Preopening expense for the second quarter of 2008 also includes expenses associated with the planned opening of three additional restaurants during the second half of 2008.

Depreciation and Amortization. Depreciation and amortization expense increased \$0.2 million, or 13.4% to \$1.7 million during the second quarter of 2008 from \$1.5 million during the prior year period. The increase was primarily the result of additional depreciation and amortization from three restaurants opened since November 2007. Depreciation and amortization expense as a percentage of restaurant sales increased 0.7% to 8.3% during the second quarter of 2008 from 7.6% during the second quarter of 2007 reflecting reduced leverage of these fixed costs from lower average sales volume.

Interest Income. Interest income remained flat at \$0.1 million during both the second quarter of 2008 and 2007. We continue to earn interest income on the investment of excess cash in available-for-sale securities. Please refer to Note 2 to the unaudited consolidated financial statements for discussion of our investment in auction rate securities.

Interest Expense. Interest expense did not change materially from the second quarter of 2007 to the second quarter of 2008.

Provision for Income Taxes. During the second quarter of 2008, we recorded income taxes of \$50,000 primarily for states in which income taxes are not calculated based upon net income compared to \$35,000 during the second quarter of 2007.

Table of Contents***Six Months Ended June 30, 2008 Compared with Six Months Ended June 30, 2007***

Restaurant Sales. Restaurant sales increased by \$4.0 million, or 11.4% to \$39.0 million during the first half of 2008 from \$35.0 million during the prior year period primarily attributed to restaurant sales generated from the opening of five new restaurants since March 2007, partially offset by overall traffic declines at our existing restaurants resulting from the challenging macroeconomic factors affecting the restaurant industry. Higher menu pricing of approximately 4.0% was more than offset by reduced guest traffic, primarily at our Arizona and Nevada restaurants, as comparable restaurant sales declined 4.1% during the first half of 2008.

Cost of Sales. Cost of sales increased by \$0.9 million, or 8.9% to \$10.9 million during the first half of 2008 from \$10.0 million during the first half of 2007. Cost of sales as a percentage of restaurant sales decreased 0.7% to 28.0% during the first half of 2008 from 28.7% during the prior year period. Cost of sales during the first half of 2008 were positively affected by increased purchasing efficiency and reduced waste attributed to the rollout of an automated food cost and inventory management system. In addition, an 8.4% reduction in the number of operating weeks for restaurants open less than six months contributed to the decline in cost of sales as a percentage of restaurant sales. Cost of sales are typically higher during the first six months of operations for our new restaurants versus our mature restaurants as management teams become accustomed to predicting, managing, and servicing the sales volumes we expect at our restaurants.

Labor. Labor costs for our restaurants increased \$2.1 million, or 18.7% to \$13.1 million during the first half of 2008 from \$11.0 million during the prior year period. The increase was primarily due to the opening of five new restaurants since March 2007. As a percentage of restaurant sales, labor costs increased 2.0% to 33.6% during the first half of 2008 from 31.6% during the first half of 2007. The increase in labor costs as a percentage of restaurant sales was primarily due to reduced leverage of fixed labor costs resulting from lower average sales volume. In addition, higher average salaries to attract and retain qualified restaurant managers and federal and state minimum wage increases, implemented during the second half of 2007 and at the beginning of 2008, contributed to increased labor costs as a percentage of sales.

Occupancy. Occupancy expense increased by \$0.3 million, or 15.1% to \$2.6 million during the first half of 2008 from \$2.3 million during the prior year period. Occupancy expenses as a percentage of restaurant sales increased 0.2% to 6.7% during the first half of 2008 from 6.5% during the first half of 2007. The increase reflects decreased leverage of these costs from lower average sales volume, partially offset by reduced percentage rent.

Restaurant Operating Expenses. Restaurant operating expenses increased by \$0.9 million, or 18.4% to \$5.8 million from \$4.9 million during the first half of 2007. Restaurant operating expenses as a percentage of restaurant sales increased 0.9% to 14.8% during the first half of 2008 from 13.9% during the prior year period. During the first half of 2008, higher repair and maintenance, utilities, and training costs combined with reduced leverage of fixed operating costs resulting from lower average sales volume contributed to the increase in restaurant operating expenses as a percentage of sales.

General and Administrative. General and administrative expenses increased by \$0.3 million, or 7.7% to \$3.9 million during the first half of 2008 from \$3.6 million during the first half of 2007. The increase is primarily attributable to planned investments in corporate personnel to support our growth, costs associated with our stockholder rights plan adopted in May 2008 and higher professional fees, partially offset by a reduction in incentive-based compensation. General and administrative expenses as a percentage of restaurant sales decreased 0.4% to 9.9% of restaurant sales during the first half of 2008 compared to 10.3% of restaurant sales during the prior year period. This decrease is primarily due to leverage of the fixed component of these expenses over a higher revenue base.

Preopening Expense. Preopening expense decreased \$0.1 million, or 14.2% to \$0.7 million during the first half of 2008 compared to \$0.8 million during the first half of 2007. The decrease in preopening expense is attributable to one restaurant opening in the first half of 2008 as compared to two restaurant openings during the first half of 2007. Preopening expense for the first half of 2008 primarily relates to expenses associated with our Gilbert, Arizona restaurant and the planned opening of three additional restaurants during the second half of 2008. During the first half of 2007, preopening expense reflected costs associated with opening our Austin, Texas and Troy, Michigan restaurants which opened during the first half of 2007.

Table of Contents

Depreciation and Amortization. Depreciation and amortization expense increased \$0.5 million, or 20.5% to \$3.3 million during the first half of 2008 from \$2.8 million during the prior year period. The increase was primarily the result of additional depreciation and amortization from five restaurants opened since March 2007. Depreciation and amortization expense as a percentage of restaurant sales increased 0.7% to 8.6% during the first half of 2008 from 7.9% during the first half of 2007 reflecting decreased leverage from lower average sales volume.

Interest Income. Interest income remained flat at \$0.3 million during both the first half of 2008 and 2007. Please refer to Note 2 to the unaudited consolidated financial statements for discussion of our investment in auction rate securities.

Interest Expense. Interest expense increased slightly from \$42,000 during the first six months of 2007 to \$51,000 during the first six months of 2008 due to a lower amount of capitalized interest during the first half of 2008, partially offset by lower average debt balances.

Provision for Income Taxes. During the first half of 2008, we recorded income taxes of \$100,000 primarily for states in which income taxes are not calculated based upon net income compared to \$45,000 during the first half of 2007.

Potential Fluctuations in Quarterly Results and Seasonality

Our quarterly operating results may fluctuate significantly as a result of a variety of factors, including the following:

- timing of new restaurant openings and related expenses;
- restaurant operating costs and preopening costs for our newly-opened restaurants, which are often materially greater during the first several months of operation than thereafter;
- labor availability and costs for hourly and management personnel;
- profitability of our restaurants, especially in new markets;
- increases and decreases in comparable restaurant sales;
- impairment of long-lived assets and any loss on restaurant closures;
- changes in borrowings and interest rates;
- general economic conditions, including changes in consumer spending patterns;
- weather conditions or natural disasters;
- timing of certain holidays;
- new or revised regulatory requirements and accounting pronouncements;
- changes in consumer preferences and competitive conditions;
- fluctuations in commodity prices; and
- fluctuations in energy prices, especially fuel and utilities.

Table of Contents

Our business is also subject to seasonal fluctuations. Historically, sales in most of our restaurants have been higher during the spring and summer months and winter holiday season. Consequently, our quarterly and annual operating results and comparable restaurant sales may fluctuate significantly as a result of seasonality and the factors discussed above. Accordingly, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year and comparable restaurant sales for any particular future period may decrease. In the future, operating results may fall below the expectations of our investors. In that event, the price of our common stock would likely decrease.

Liquidity and Capital Resources

Our primary capital requirements are for new restaurant development. During the last three years, we have funded our development of new restaurants primarily from the proceeds of our initial public offering, cash flows from operations, and the sale of equity securities in a private placement transaction. We intend to continue developing new restaurants in markets where we believe our concept will have broad appeal and attractive restaurant-level economics. Similar to many restaurant chains, we utilize operating lease arrangements for all of our restaurant locations. We believe that our operating lease arrangements provide appropriate leverage for our capital structure in a financially efficient manner. We are typically required to expend cash to perform site-related work and to construct and equip our restaurants. The average investment cost for our restaurants depends upon the type of lease entered into, the amount of tenant improvement allowance we receive from landlords, and whether we assume responsibility for the construction of the building. We expect the cash investment cost of our prototype restaurant to be approximately \$2.5 million, net of landlord tenant improvement allowances between \$0.7 million and \$1.2 million, and excluding preopening expenses of approximately \$0.4 million. We expect these costs will vary from one market to another based on real estate values, zoning regulations, labor markets and other variables. We also require capital resources to maintain our existing base of restaurants and to further expand and strengthen the capabilities of our corporate and information technology infrastructures.

Our future cash requirements and the adequacy of available funds will depend on many factors, including the pace of expansion, real estate market conditions, site locations, and the type of leases entered into. Based upon our current growth plan, we believe that our current cash flow and our cash and investment balances coupled with our anticipated cash flow generated from operations and the proceeds from equipment leases will provide sufficient funds to satisfy our working capital and capital expenditure requirements into 2009. We believe that the current illiquidity of our auction rate securities holdings will not have a material impact on our ability to fund our operations or continue our expansion. However, if current conditions in the auction rate securities or credit markets continue for a prolonged period, our longer-term financial flexibility could be impacted until other sources of capital are obtained.

Changes in our operating plans, lower than anticipated sales, increased expenses, prolonged illiquidity of our auction rate securities, or other events, including those described in Item 1A, Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2007 and in other documents filed from time to time with the SEC may require us to seek additional debt or equity financing on an accelerated basis. In the event that additional capital is required, we may seek to raise such capital through public or private equity or debt financing. Financing may not be available on acceptable terms, or at all, and our failure to raise capital when needed could impact our growth plans, financial condition, and results of operations. Additional equity financing may result in dilution to current shareholders and debt financing, if available, may involve significant cash payment obligations or financial covenants and ratios that may restrict our ability to operate our business.

Stock Repurchase Program

During April 2008, our Board of Directors approved a stock repurchase program under which we are authorized to repurchase up to 600,000 shares of our common stock. We repurchased 116,200 shares at a total cost of \$1,000,000 during the three months ended June 30, 2008 under a section 10b5-1 purchase program. Share repurchases were made in the open market under the terms of the program. The timing and number of shares repurchased pursuant to the share repurchase authorization are made in compliance with applicable securities laws and other legal requirements and are subject to market conditions, share price, available cash and other factors. The share repurchase authorization does not have an expiration date and it does not obligate us to purchase any particular amount of shares. This authorization may be suspended or discontinued at any time.

Table of Contents***Equipment Loans***

As of June 30, 2008 we had five equipment term loans with lenders, each collateralized by restaurant equipment. The outstanding principal balance under these loans aggregated \$2.4 million. The loans bear interest at rates ranging from 7.0% to 8.5% and require monthly principal and interest payments aggregating approximately \$71,000. The loans mature between June 2010 and June 2012. The loans also require us to maintain certain financial covenants calculated at the end of each calendar year, and we were in compliance with all such financial covenants as of December 31, 2007.

Cash Flows

The following table summarizes our primary sources and uses of cash during the periods presented (in thousands).

	Six Months Ended June 30,	
	2008	2007
Net cash provided by (used in):		
Operating activities	\$ 3,609	\$ 2,149
Investing activities	636	(730)
Financing activities	(1,280)	(144)
Net increase in cash and cash equivalents	\$ 2,965	\$ 1,275

Operating Activities. During the first six months of 2008, net cash provided by operating activities was \$3.6 million and exceeded our net loss by \$4.8 million due principally to the effect of depreciation and amortization and the timing of payment of accounts payable and receipt of tenant improvement allowances. During the first six months of 2007, net cash provided by operating activities was \$2.1 million principally as a result of depreciation and amortization, the receipt of tenant improvement allowances, and non-cash stock-based compensation, partially offset by the payment of accounts payable and an increase in other current assets.

Investing activities. We fund the development and construction of our new restaurants primarily with cash and short-term investments. Net cash provided by investing activities was \$0.6 million during the first six months of 2008 reflecting proceeds from the sale of \$7.2 million in short-term investments of which \$6.5 million was used to fund construction at our Gilbert, Arizona and West Palm Beach, Florida restaurants in addition to capital expenditures for existing restaurants and restaurants scheduled to open in the next 12 months. Net cash used for investing activities was \$0.7 million during the first half of 2007, reflecting \$6.5 million for the funding of construction in progress and the purchase of property and equipment, the majority of which related to the opening of our Austin, Texas and Troy, Michigan restaurants. Investing activities also includes proceeds of \$5.8 million from the sale of investments to fund this construction.

Financing Activities. Net cash used in financing activities was \$1.3 million for the first six months of 2008 principally consisting of the purchase of 116,200 shares of our common stock at a cost of \$1.0 million and \$0.3 million in principal payments on equipment loans. Net cash used in financing activities was \$0.1 million for the first six months of 2007 principally consisting of \$0.3 million of principal payments on equipment loans, partially offset by \$0.2 million in proceeds from the issuance of common stock from the exercise of stock options and warrants and stock issued under our employee stock purchase plan.

Table of Contents**Critical Accounting Policies**

Critical accounting policies are those that we believe are most important to the portrayal of our financial condition and results of operations and also require our most difficult, subjective, or complex judgments. Judgments or uncertainties regarding the application of these policies may result in materially different amounts being reported under various conditions or using different assumptions. There have been no material changes to the critical accounting policies previously reported in our Annual Report on Form 10-K for the year ended December 31, 2007, except as described below.

Investments

As of June 30, 2008, we had a total of \$6.5 million in investments of which \$6.1 million consisted of investments in auction rate securities. We account for our investments in accordance with the provisions of SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (SFAS 115). SFAS 115 addresses the accounting and reporting for investments in fixed maturity securities and for equity securities with readily determinable fair values. Management determines the appropriate classification of debt securities at the time of purchase and reevaluates such designation as of each balance sheet date. Currently, all securities held by the Company are classified as available-for-sale and auction rate securities are classified as long-term investments. Our investments in auction rate securities are carried at fair value with impairment charges classified as temporary and reported as a separate component of stockholders' equity in the period the determination is made. The cost basis of securities sold is determined using the specific identification method. Interest and dividends on securities are included in interest income.

Estimating the fair value of auction rate securities requires numerous assumptions such as assessments of the underlying structure of each security, expected cash flows, credit ratings, liquidity, and other relevant factors. These assumptions, assessments and the interpretations of relevant market data are subject to uncertainties, are difficult to predict and require significant judgment. The use of different assumptions, applying different judgment to inherently subjective matters and changes in future market conditions could result in significantly different estimates of fair value. There is no assurance as to when the market for auction rate securities will stabilize. The fair value of our auction rate securities could change significantly based on market conditions and continued uncertainties in the credit markets. If these uncertainties continue or if these securities experience credit rating downgrades or changes in the rates of default on the underlying assets, we may incur additional impairment on our auction rate securities. We continue to monitor our auction rate securities and relevant market conditions and will record additional impairment if future circumstances warrant such charges.

Item 3. *Quantitative and Qualitative Disclosures about Market Risk*

The following discussion of market risks contains forward-looking statements. Actual results may differ materially from the following discussion based on general conditions in the financial and commodity markets.

Investments

We are exposed to market risk primarily from fluctuations in interest rates on our investments and liquidity risk associated with the current financial market conditions. We held auction rate securities with a par value of \$6.6 million as of June 30, 2008. These investments are classified as available-for-sale securities and are not held for trading or other speculative purposes. Changes in interest rates affect the investment income we earn on these investments and, therefore, impact our cash flows and results of operations. During the second quarter of 2008, the average interest rate earned on our investments was approximately 2.5%. A hypothetical 100 basis point decline in the interest rate earned on our investments would not have a significant impact on our results of operations. For a discussion on market risks for auction rate securities, including the Company's methodology for estimating fair value, see Note 2 to the unaudited consolidated financial statements.

Table of Contents***Primary Market Risk Exposures***

Our primary market risk exposures are in the areas of commodity costs, labor costs, and construction costs. Many of the food products purchased by us are affected by changes in weather, production, availability, seasonality, and other factors outside our control. We believe that almost all of our food and supplies are available from several sources, which helps to control food commodity risks. Our labor costs are impacted by state and federal legislation to increase the minimum wage rate as many of our employees are paid labor rates related to federal and state minimum wage laws. We have exposure to rising construction costs, which may impact our actual cost to develop new restaurants. Although the cost of restaurant construction will not impact significantly the operating results of the restaurant, it would impact the return on investment for such restaurant.

Item 4. Controls and Procedures***Evaluation of Disclosure Controls and Procedures***

We have evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have each concluded that our disclosure controls and procedures are effective to ensure that we record, process, summarize, and report information required to be disclosed by us in our quarterly reports filed under the Securities Exchange Act within the time periods specified by the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

During the quarterly period covered by this report, there have not been any changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION**Item 1. Legal Proceedings**

None

Item 1A. Risk Factors

A description of the risk factors associated with our business is contained in Part I, Item 1A, Risk Factors, of our Annual Report on Form 10-K for the year ended December 31, 2007. These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the Securities and Exchange Commission. The following risk factors are the only material changes to the risk factors included in our most recent Form 10-K.

New Risk Factors**We may be required to record impairment charges in future quarters as a result of the decline in value of our investments in auction rate securities.**

We hold investments in auction rate securities which are secured by student loans. While the maturity dates of our auction rate securities range from 2029 to 2046, the liquidity for these securities has historically been provided by an auction process that resets the applicable interest rate at pre-determined calendar intervals, generally every 28 days. The recent uncertainties in the credit markets have adversely affected the auction market for these types of securities and auctions for these securities have failed to settle on their respective settlement dates. Consequently, our investments in auction rate securities are not currently liquid and we will not be able to access these funds until a future auction of these investments is successful, the issuer refinances the underlying debt, or a buyer is found outside of the auction process.

Table of Contents

Estimating the fair value of auction rate securities requires numerous assumptions such as assessments of the underlying structure of each security, expected cash flows, credit ratings, and other relevant factors. These assumptions, assessments and the interpretations of relevant market data are subject to uncertainties, are difficult to predict and require significant judgment. The use of different assumptions, applying different judgment to inherently subjective matters and changes in future market conditions could result in significantly different estimates of fair value. There is no assurance as to when the market for auction rate securities will stabilize. The fair value of our auction rate securities could change significantly based on market conditions and continued uncertainties in the credit markets. If these uncertainties continue or if our securities experience credit rating downgrades or changes in the rates of default on the underlying assets, we may incur additional impairment on our auction rate securities portfolio. Although we currently have the intent to hold these investments until a recovery of the auction process, if the current market conditions deteriorate further, or the anticipated recovery in market values does not occur, we may be required to record additional unrealized losses in other comprehensive income (loss) or impairment charges in future quarters.

Our stockholders rights plan may adversely affect existing stockholders.

On May 27, 2008, we adopted a stockholder rights plan that may have the effect of deterring, delaying, or preventing a change in control that might otherwise be in the best interests of our stockholders. Under the rights plan, we issued a dividend of one preferred share purchase right for each share of our common stock held by stockholders of record on May 28, 2008. Each right entitles stockholders to purchase one one-thousandth of a share of our newly created Series A Junior Participating Preferred Stock at a price of \$55 per one one-thousandth of a share. The rights expire on the earlier of May 28, 2011 or May 31, 2009 if our stockholders have not approved the adoption of the corresponding rights agreement by that date, unless the rights are earlier redeemed or exchanged by us.

In general, subject to certain limited exceptions, the stock purchase rights become exercisable when a person or group acquires 20% or more of our common stock or a tender offer or exchange offer for 20% or more of our common stock is announced or commenced. After any such event, each right will entitle its holder to purchase, at the right's then-current exercise price, a number of shares of our common stock having a market value of twice the exercise price. The rights will cause substantial dilution to a person or group that attempts to acquire us on terms not approved by our Board of Directors.

Updated and Revised Risk Factors**A decline in visitors to any of the retail centers, shopping malls, or entertainment centers where our restaurants are located could negatively affect our restaurant sales and may require us to record an impairment charge for restaurants performing below expectations.**

Our restaurants are primarily located in high-activity areas such as retail centers, shopping malls, lifestyle centers, and entertainment centers. We depend on high visitor rates at these centers to attract guests to our restaurants. If visitor rates to these centers decline due to economic or political conditions, anchor tenants closing in retail centers or shopping malls in which we operate, changes in consumer preferences or shopping patterns, higher frequency of online shopping, changes in discretionary consumer spending, increasing gasoline prices, or otherwise, our unit volumes could decline and adversely affect our results of operations, including recording an impairment charge for restaurants that are performing below expectations.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table sets forth our share repurchases of common stock during each month in the three months ended June 30, 2008.

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (2)
April 1 - April 30, 2008		\$		600,000
May 1 - May 31, 2008	76,435	8.73	76,435	523,565
June 1 - June 30, 2008	39,765	8.35	39,765	483,800
Total	116,200		116,200	

(1) During April 2008, our Board of Directors approved a stock repurchase program under which we are authorized to repurchase up to 600,000 shares of our common stock in the open market at prevailing market prices. The authorization does not have an expiration date and it does not require us to purchase a specific number of shares. No shares were repurchased

other than through our publicly announced repurchase program during the three months ended June 30, 2008.

- (2) Repurchases are subject to prevailing market prices and may be made in open market transactions. There can be no assurance that we will repurchase all of the shares authorized under the stock repurchase program.

Item 3. Defaults Upon Senior Securities

None

Item 4. Submission of Matters to a Vote of Security Holders

We held our annual meeting of stockholders on May 1, 2008. The following items were voted on by our stockholders:

	For	Withheld/ Against	
1. Election of Class III members of our Board of Directors for a term expiring in 2011:			
Kent D. Carlson	4,571,746	177,901	
Richard J. Hauser	4,427,161	322,486	
W. Kirk Patterson	4,571,243	178,404	
	For	Against	Abstain
2. Proposal to approve the ratification of the appointment of Ernst & Young LLP as the Company's independent auditors for the fiscal year ending December 31, 2008	4,734,639	8,011	6,997

Item 5. Other Information

None
