NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies

A. Basis of Financial Statement Presentation

The accompanying unaudited consolidated financial statements include the accounts of Provident Financial Services, Inc. and its wholly owned subsidiary, The Provident Bank (the "Bank," together with Provident Financial Services, Inc., the "Company").

In preparing the interim unaudited consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statements of financial condition and the results of operations for the periods presented. Actual results could differ from these estimates. The allowance for loan losses and the valuation of securities available for sale are material estimates that are particularly susceptible to near-term change. The current unstable economic environment has resulted in a heightened degree of uncertainty inherent in these material estimates.

The interim unaudited consolidated financial statements reflect all normal and recurring adjustments, which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three and nine months ended September 30, 2013 are not necessarily indicative of the results of operations that may be expected for all of 2013.

Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles ("GAAP") have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission.

These unaudited consolidated financial statements should be read in conjunction with the December 31, 2012 Annual Report to Stockholders on Form 10-K.

B. Earnings Per Share

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share calculations for the three and nine months ended September 30, 2013 and 2012:

	Three months ended September 30, 2013			2012		
	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount
Net income	\$16,076			\$16,154		
Basic earnings per share:						
Income available to common stockholders	\$16,076	57,241,270	\$0.28	\$16,154	57,194,046	\$0.28
Dilutive shares		116,074			44,773	
Diluted earnings per share:						
Income available to common stockholders	\$16,076	57,357,344	\$0.28	\$16,154	57,238,819	\$0.28

Table of Contents

	Nine months ended September 30, 2013			2012		
	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount
Net income	\$53,132			\$50,585		
Basic earnings per share:						
Income available to common stockholders	\$53,132	57,205,175	\$0.93	\$50,585	57,133,164	\$0.89
Dilutive shares		74,760			36,680	
Diluted earnings per share:						
Income available to common stockholders	\$53,132	57,279,935	\$0.93	\$50,585	57,169,844	\$0.88

Anti-dilutive stock options and awards totaling 1,049,455 shares at September 30, 2013, were excluded from the earnings per share calculations.

Note 2. Investment Securities

At September 30, 2013, the Company had \$1.15 billion and \$358.6 million in available for sale and held to maturity investment securities, respectively. Many factors, including lack of liquidity in the secondary market for certain securities, variations in pricing information, regulatory actions, changes in the business environment or any changes in the competitive marketplace could have an adverse effect on the Company's investment portfolio which could result in other-than-temporary impairment on certain investment securities in future periods. Included in the Company's investment portfolio are private label mortgage-backed securities. These investments may pose a higher risk of future impairment charges as a result of the uncertain economic environment and the potential negative effect on future performance of these private label mortgage-backed securities. The total number of all held to maturity and available for sale securities in an unrealized loss position as of September 30, 2013 totaled 269, compared with 65 at December 31, 2012. All securities with unrealized losses at September 30, 2013 were analyzed for other-than-temporary impairment. Based upon this analysis, no other-than-temporary impairment existed at September 30, 2013.

Securities Available for Sale

The following table presents the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for securities available for sale at September 30, 2013 and December 31, 2012 (in thousands):

	September 30, 2013			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	\$86,327	414	(131)) 86,610
Mortgage-backed securities	1,045,042	17,395	(12,806)) 1,049,631
State and municipal obligations	9,429	211	(114)) 9,526
Equity securities	307	70	—) 377
	\$1,141,105	18,090	(13,051)) 1,146,144

The amortized cost and fair value of securities available for sale at September 30, 2013, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

Table of Contents

	September 30, 2013	
	Amortized cost	Fair value
Due in one year or less	\$23,090	23,201
Due after one year through five years	69,231	69,600
Due after five years through ten years	407	421
Due after ten years	3,028	2,914
Mortgage-backed securities	1,045,042	1,049,631
Equity securities	307	377
	\$1,141,105	1,146,144

No securities were sold from the available for sale portfolio during the three months ended September 30, 2013. For the same period last year, proceeds from the sale of securities available for sale were \$3,959,000 resulting in gross gains of \$266,000 and no gross losses.

For the nine months ended September 30, 2013, proceeds from the sale of securities available for sale were \$14,310,000, resulting in gross gains of \$888,000 and no gross losses. For the same period last year, proceeds from the sale of securities available for sale were \$51,090,000, resulting in gross gains of \$2,425,000 and no gross losses. Also, for the nine months ended September 30, 2013, proceeds from calls on securities available for sale totaled \$896,000, with no gains or losses recognized. There were no calls on securities available for sale for the nine months ended September 30, 2012.

The following table presents a roll-forward of the credit loss component of other-than-temporary impairment (“OTTI”) on debt securities for which a non-credit component of OTTI was recognized in other comprehensive income. OTTI recognized in earnings for credit-impaired debt securities is presented in two components based upon whether the current period is the first time a debt security was credit-impaired (initial credit impairment), or whether the current period is not the first time a debt security was credit impaired (subsequent credit impairment). Changes in the credit loss component of credit-impaired debt securities were as follows (in thousands):

	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Beginning credit loss amount	\$1,240	1,240	1,240	1,240
Add: Initial OTTI credit losses	—	—	—	—
Subsequent OTTI credit losses	—	—	—	—
Less: Realized losses for securities sold	—	—	—	—
Securities intended or required to be sold	—	—	—	—
Increases in expected cash flows on debt securities	—	—	—	—
Ending credit loss amount	\$1,240	1,240	1,240	1,240

The Company did not incur an OTTI charge on securities for the three and nine months ended September 30, 2013 or 2012, respectively.

The following table represents the Company’s disclosure regarding securities available for sale with temporary impairment at September 30, 2013 and December 31, 2012 (in thousands):

	September 30, 2013 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses

	\$461,512	(13,050)	344	(1)	461,856	(13,051)

Table of Contents

	December 31, 2012 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Mortgage-backed securities	\$59,521	(205)	11,012	(51)	70,533	(256)
State and municipal obligations	—	—	503	(1)	503	(1)
	\$59,521	(205)	11,515	(52)	71,036	(257)

The temporary loss position associated with securities available for sale was the result of changes in market interest rates relative to the coupon of the individual security and changes in credit spreads. In addition, there remains a lack of liquidity in certain sectors of the mortgage-backed securities market. Increases in delinquencies and foreclosures have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The Company does not have the intent to sell securities in a temporary loss position at September 30, 2013, nor is it more likely than not that the Company will be required to sell the securities before the anticipated recovery. The number of securities in an unrealized loss position at September 30, 2013 totaled 49, compared with 9 at December 31, 2012. The increase in the number of securities in an unrealized loss position at September 30, 2013, was a function of a steepened yield curve, as longer term market interest rates increased and spreads widened. At September 30, 2013, there were 4 private label mortgage-backed securities in an unrealized loss position, with an amortized cost of \$10,551,000 and unrealized losses totaling \$240,000. Two of these private label mortgage-backed securities were below investment grade at September 30, 2013.

The Company estimates the loss projections for each security by stressing the individual loans collateralizing the security and applying a range of expected default rates, loss severities, and prepayment speeds in conjunction with the underlying credit enhancement for each security. Based on specific assumptions about collateral and vintage, a range of possible cash flows was identified to determine whether other-than-temporary impairment existed during the three and nine months ended September 30, 2013. The Company concluded that no other-than-temporary impairment of the securities available for sale portfolio existed at September 30, 2013.

Investment Securities Held to Maturity

The following table presents the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for investment securities held to maturity at September 30, 2013 and December 31, 2012 (in thousands):

	September 30, 2013			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	\$6,380	22	(61)	6,341
Mortgage-backed securities	6,150	264	—	6,414
State and municipal obligations	335,793	6,527	(5,988)	336,332
Corporate obligations	10,318	80	(61)	10,337
	\$358,641	6,893	(6,110)	359,424

	December 31, 2012			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	\$4,705	34	—	4,739
Mortgage-backed securities	11,123	460	—	11,583
State and municipal obligations	336,078	15,332	(585)	350,825
Corporate obligations	7,558	211	—	7,769
	\$359,464	16,037	(585)	374,916

The Company generally purchases securities for long-term investment purposes, and differences between amortized cost and fair values may fluctuate during the investment period. For the three and nine months ended September 30, 2013, the Company recognized gross gains of \$40,000 and \$70,000, and gross losses of \$0 and \$2,000, respectively, related to calls on certain securities in the held to maturity portfolio, with proceeds from the calls totaling \$19,635,000 and \$42,113,000 for the three and nine months ended September 30, 2013, respectively. In addition, for the nine months ended September 30, 2013, the Company recognized gross gains of \$18,000, and no gross losses, related to the sales of certain securities, with the proceeds totaling \$524,000. The

Table of Contents

sales of these securities were in response to the credit deterioration of the issuers. There were no sales of securities from the held to maturity portfolio for the three months ended September 30, 2013.

For the three and nine months ended September 30, 2012, the Company recognized gains of \$32,000 and \$57,000, respectively, related to calls on certain securities in the held to maturity portfolio, with proceeds from the calls totaling \$4,719,000 and \$7,071,000, respectively. There were no sales of securities from the held to maturity portfolio for the three and nine months ended September 30, 2012.

The amortized cost and fair value of investment securities in the held to maturity portfolio at September 30, 2013 by contractual maturity are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	September 30, 2013	
	Amortized cost	Fair value
Due in one year or less	\$35,518	35,687
Due after one year through five years	52,096	53,225
Due after five years through ten years	114,197	117,144
Due after ten years	150,680	146,954
Mortgage-backed securities	6,150	6,414
	\$358,641	359,424

The following table represents the Company's disclosure on investment securities held to maturity with temporary impairment at September 30, 2013 and December 31, 2012 (in thousands):

	September 30, 2013 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Agency obligations	\$4,144	(61)	—	—	4,144	(61)
State and municipal obligations	112,898	(5,833)	2,724	(155)	115,622	(5,988)
Corporate obligations	4,364	(61)	—	—	4,364	(61)
	\$121,406	(5,955)	2,724	(155)	124,130	(6,110)
	December 31, 2012 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
State and municipal obligations	\$30,992	(585)	—	—	30,992	(585)
	\$30,992	(585)	—	—	30,992	(585)

Based upon the review of the held to maturity securities portfolio, the Company believes that as of September 30, 2013, securities with unrealized loss positions shown above do not represent impairments that are other-than-temporary. The review of the portfolio for other-than-temporary impairment considers the percentage and length of time the fair value of an investment is below book value, as well as general market conditions, changes in interest rates, credit risks, whether the Company has the intent to sell the securities and whether it is more likely than not that the Company would be required to sell the securities before the anticipated recovery.

The number of securities in an unrealized loss position at September 30, 2013 totaled 220, compared with 56 at December 31, 2012. The increase in the number of securities in an unrealized loss position at September 30, 2013, was a function of a steepened yield curve, as longer term market interest rates increased and spreads widened on municipal securities, which represents the majority of the held to maturity portfolio. All temporarily impaired investment securities were investment grade at September 30, 2013.

Included in loans receivable are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The principal amounts of these non-accrual loans were \$81.6

million and \$99.0 million at September 30, 2013 and December 31, 2012, respectively. Included in non-accrual loans were \$30.3 million and \$33.0 million of loans which were less than 90 days past due at September 30, 2013 and December 31, 2012, respectively. There were no loans ninety days or greater past due and still accruing interest at September 30, 2013, or December 31, 2012.

Table of Contents

The Company defines an impaired loan as a non-homogenous loan greater than \$1.0 million for which it is probable, based on current information, all amounts due under the contractual terms of the loan agreement will not be collected. Impaired loans also include all loans modified as troubled debt restructurings (“TDRs”). A loan is deemed to be a TDR when a loan modification resulting in a concession is made in an effort to mitigate potential loss arising from a borrower’s financial difficulty. Smaller balance homogeneous loans, including residential mortgages and other consumer loans, are evaluated collectively for impairment and are excluded from the definition of impaired loans, unless modified as TDRs. The Company separately calculates the reserve for loan losses on impaired loans. The Company may recognize impairment of a loan based upon: (1) the present value of expected cash flows discounted at the effective interest rate; or (2) if a loan is collateral dependent, the fair value of collateral; or (3) the market price of the loan. Additionally, if impaired loans have risk characteristics in common, those loans may be aggregated and historical statistics may be used as a means of measuring those impaired loans.

The Company uses third-party appraisals to determine the fair value of the underlying collateral in its analyses of collateral dependent impaired loans. A third party appraisal is generally ordered as soon as a loan is designated as a collateral dependent impaired loan and is updated annually or more frequently, if required.

A specific allocation of the allowance for loan losses is established for each collateral dependent impaired loan with a carrying balance greater than the collateral’s fair value, less estimated costs to sell. Charge-offs are generally taken for the amount of the specific allocation when operations associated with the respective property cease and it is determined that collection of amounts due will be derived primarily from the disposition of the collateral. At each fiscal quarter end, if a loan is designated as a collateral dependent impaired loan and the third party appraisal has not yet been received, an evaluation of all available collateral is made using the best information available at the time, including rent rolls, borrower financial statements and tax returns, prior appraisals, management’s knowledge of the market and collateral, and internally prepared collateral valuations based upon market assumptions regarding vacancy and capitalization rates, each as and where applicable. Once the appraisal is received and reviewed, the specific reserves are adjusted to reflect the appraised value. The Company believes there have been no significant time lapses as a result of this process.

At September 30, 2013, there were 148 impaired loans totaling \$113.0 million. Included in this total were 116 TDRs related to 107 borrowers totaling \$60.3 million that were performing in accordance with their restructured terms and which continued to accrue interest at September 30, 2013. At December 31, 2012, there were 108 impaired loans totaling \$109.6 million. Included in this total were 80 TDRs to 70 borrowers totaling \$58.4 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2012. Loans receivable summarized by portfolio segment and impairment method are as follows (in thousands):

	September 30, 2013			
	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments
Individually evaluated for impairment	\$82,531	28,382	2,124	113,037
Collectively evaluated for impairment	3,536,037	863,128	572,554	4,971,719
Total	\$3,618,568	891,510	574,678	5,084,756
	December 31, 2012

	\$37,962	20,315	5,224	63,501	6,847	70,348

Loan modifications to borrowers experiencing financial difficulties that are considered TDRs primarily involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. These modifications generally do not result in the forgiveness of principal or accrued interest. In addition, the Company attempts to obtain additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.

The following tables present the number of loans modified as TDRs during the three and nine months ended September 30, 2013 and 2012 and their balances immediately prior to the modification date and post-modification as of September 30, 2013 and 2012.

Troubled Debt Restructuring	For the three months ended September 30, 2013			September 30, 2012

Consumer loans	1	344	344	4	566	563
Total restructured loans	8	\$ 2,616	\$ 2,559	21	\$ 6,475	\$ 5,700
	For the nine months ended September 30, 2013			September 30, 2012		
Troubled Debt Restructuring	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
	(\$ in thousands)					
Mortgage loans:						
Residential	37	\$ 7,284	7,383	28	\$ 9,092	\$ 7,977
Commercial	1	330	305	1	276	276
Total mortgage loans	38	7,614	7,688	29	9,368	8,253
Commercial loans	2	1,546	1,529	11	14,487	13,938
Consumer loans	6	812	798	7	1,064	991
Total restructured loans	46	\$ 9,972	\$ 10,015	47	\$ 24,919	\$ 23,182

All TDRs are impaired loans, which are individually evaluated for impairment, as previously discussed. Estimated collateral values of collateral dependent impaired loans modified during the three and nine months ended September 30, 2013 and 2012 exceeded the carrying amounts of such loans. As a result, there were no charge-offs recorded on collateral dependent impaired loans presented in the preceding tables for the three and nine months ended September 30, 2013 and 2012. The allowance for loan losses associated with the TDRs presented in the preceding tables totaled \$229,000 and \$428,000 for the three months ended

Table of Contents

September 30, 2013 and 2012, respectively, and were included in the allowance for loan losses for loans individually evaluated for impairment. For the nine months ended September 30, 2013 and 2012, the allowance for loan losses associated with the TDRs presented in the preceding tables totaled \$848,000 and \$1,911,000, respectively, and were included in the allowance for loan losses for loans individually evaluated for impairment.

For the three and nine months ended September 30, 2013, the TDRs presented in the preceding tables had a weighted average modified interest rate of approximately 3.51% and 4.12%, respectively, compared to a rate of 6.77% and 6.04% prior to modification, respectively. For the three and nine months ended September 30, 2012, the TDRs had weighted average modified interest rate of approximately 4.28% and 4.91%, respectively, compared to a rate of 5.93% and 5.92% prior to modification, respectively.

The following table presents loans modified as TDRs within the previous 12 months from September 30, 2013 and 2012, and for which there was a payment default (90 days or more past due) at the quarter ended September 30, 2013 and 2012.

Troubled Debt Restructurings Subsequently Defaulted	September 30, 2013		September 30, 2012	
	Number of Loans	Outstanding Recorded Investment (\$ in thousands)	Number of Loans	Outstanding Recorded Investment (\$ in thousands)
Mortgage loans:				
Residential	1	\$ 130	—	\$—
Total mortgage loans	1	130	—	—
Consumer loans	—	\$—	1	\$53
Total restructured loans	1	\$ 130	1	\$53

TDRs that subsequently default are considered collateral dependent impaired loans and are evaluated for impairment based on the estimated fair value of the underlying collateral less expected selling costs.

The activity in the allowance for loan losses by portfolio segment for the three and nine months ended September 30, 2013 and 2012 was as follows (in thousands):

Three months ended September 30,	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments	Unallocated	Total
2013						
Balance at beginning of period	\$ 30,670	23,810	4,473	58,953	8,052	67,005

The decrease in the unallocated portion of the allowance for loan losses for the three and nine months ended September 30, 2013 was primarily attributable to a reduced need for reserves in connection with the impact of Superstorm Sandy, as the degree of precision in estimating potential losses improved with the approach of the one-year anniversary of the storm. In addition, certain amounts previously considered in the unallocated portion of the allowance for loan losses were specifically allocated to individual credits as precision regarding estimates of collateral valuation increased.

Table of Contents

Impaired loans receivable by class are summarized as follows (in thousands):

	September 30, 2013					December 31, 2012				
	Unpaid Principal Balance	Recorded Investment	Related Allowance	Average Recorded Investment	Interest Income Recognized	Unpaid Principal Balance	Recorded Investment	Related Allowance	Average Recorded Investment	Interest Income Recognized

Specific allocations of the allowance for loan losses attributable to impaired loans totaled \$10,734,000 and \$7,211,000 at September 30, 2013 and December 31, 2012, respectively. At September 30, 2013 and December 31, 2012, impaired loans for which there was no related allowance for loan losses totaled \$30,269,000 and \$34,484,000, respectively. The average balance of impaired loans during the nine months ended September 30, 2013 was \$116,487,000.

The Company utilizes an internal nine-point risk rating system to summarize its loan portfolio into categories with similar characteristics. Loans deemed to be “acceptable quality” (pass) are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans that are deemed to be of “questionable quality” are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial, multi-family and construction loans are rated individually, and each lending officer is responsible for risk rating loans in their portfolio. These

Table of Contents

risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and by Credit Administration. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party. Reports concerning periodic loan review examinations by the independent third party are presented directly to both the Audit and Risk Committees of the Board of Directors.

Loans receivable by credit quality risk rating indicator are as follows (in thousands):

	At September 30, 2013							
	Residential	Commercial mortgage	Multi-family	Construction	Total mortgages	Commercial	Consumer	Total loans
Special mention	\$5,248	13,083	—	—	18,331	30,401	1,627	50,359

Certificates of deposit	845,922	957,473
	\$5,255,673	5,428,271

Note 5. Components of Net Periodic Benefit Cost

The Bank has a noncontributory defined benefit pension plan (the "Plan") covering its full-time employees who had attained age 21 with at least one year of service as of April 1, 2003. The Plan was frozen on April 1, 2003. All

participants in the Plan are 100% vested. The Plan's assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial.

In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank's retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee became fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen to new entrants and benefits were eliminated for employees with less than ten years of service as of December 31, 2002. Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen as to new entrants, and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006.

Table of Contents

Net periodic benefit cost (increase) for pension benefits and other post-retirement benefits for the three and nine months ended September 30, 2013 and 2012 includes the following components (in thousands):

	Three months ended September 30,				Nine months ended September 30,			
	Pension benefits		Other post-retirement benefits		Pension benefits		Other post-retirement benefits	
	2013	2012	2013	2012	2013	2012	2013	2012
Service cost	\$—	—	60	63	\$—	—	180	189
Interest cost	318	322	245	261	954	966	735	783
Expected return on plan assets	(792)	(645)	—	—	(2,376)	(1,935)	—	—
Amortization of prior service cost	—	—	(1)	(1)	—	—	(3)	(3)
Amortization of the net loss	338	357	4	3	1,014	1,071	12	9
Net periodic benefit (increase) cost	\$(136)	34	308	326	\$(408)	102	924	978

In its consolidated financial statements for the year ended December 31, 2012, the Company previously disclosed that it does not expect to contribute to the Plan in 2013. As of September 30, 2013, no contributions to the Plan have been made.

The net periodic benefit cost (increase) for pension benefits and other post-retirement benefits for the three and nine months ended September 30, 2013 were calculated using the actual January 1, 2013 pension valuation and the estimated results of the other post-retirement benefits January 1, 2013 valuations.

Note 6. Impact of Recent Accounting Pronouncements

The Financial Accounting Standards Board (“FASB”) in July 2013 issued Accounting Standards Update (“ASU”) No. 2013-11, “Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists”, which provides guidance on the presentation of unrecognized tax benefits and the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. This ASU is effective for fiscal years, and interim reporting periods within those years, beginning after December 31, 2013. This guidance is not expected to have a significant impact on the Company’s consolidated financial statements.

The FASB in January 2013 issued ASU No. 2013-01, “Scope of Disclosures about Offsetting Assets and Liabilities”, which clarifies the scope of the new offsetting disclosures required under ASU 2011-11. It is limited to (1) derivatives, (2) repurchase and reverse repurchase agreements, and (3) securities borrowing and lending transactions, that are either: offset in the statement of financial positions in accordance with ASC 210, “Balance Sheet Presentation”, or ASC 815, “Derivatives and Hedging”, or subject to an enforceable master netting arrangement or similar agreement regardless of whether they are presented net in the financial statements. This ASU is effective for annual and interim reporting periods beginning on or after January 1, 2013. This guidance did not have a significant impact on the Company’s consolidated financial statements.

In February 2013, the FASB issued ASU No. 2013-02, “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income”, which requires disclosure of the effects of reclassifications out of accumulated other comprehensive income (“AOCI”) on net income line items only for those items that are reported in their entirety in net income in the period of reclassification. For AOCI reclassification items that are not reclassified in their entirety into net income, a cross reference to other required U.S. GAAP disclosures. This guidance was effective for fiscal years,

and interim periods within those years, beginning on or after December 15, 2012. The Company adopted this guidance, as required, for the quarter ended March 31, 2013.

Note 7. Fair Value Measurements

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. Where quoted market values in an active market are not readily available, the Company utilizes various valuation techniques to estimate fair value.

Table of Contents

Fair value is an estimate of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, in many instances fair value estimates may not be substantiated by comparison to independent markets and may not be realized in an immediate sale of the financial instrument.

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows:

- Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability; and
- Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium.

Assets Measured at Fair Value on a Recurring Basis

The valuation techniques described below were used to measure fair value of financial instruments in the table below on a recurring basis as of September 30, 2013 and December 31, 2012.

Securities Available for Sale

For securities available for sale, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark to comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also may hold equity securities and debt instruments issued by the U.S. government and U.S. government-sponsored agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 inputs.

Assets Measured at Fair Value on a Non-Recurring Basis

The valuation techniques described below were used to estimate fair value of financial instruments measured on a non-recurring basis as of September 30, 2013 and December 31, 2012.

For loans measured for impairment based on the fair value of the underlying collateral, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case-by-case basis, to comparable assets based on the appraisers'

market knowledge and experience, as well as adjustments for estimated costs to sell of up to 6%. The Company classifies these loans as Level 3 within the fair value hierarchy.

Assets acquired through foreclosure or deed in lieu of foreclosure are carried at fair value, less estimated selling costs of up to 6%. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, and are classified as Level 3. When an asset is acquired, the excess of the loan balance over fair value, less

Table of Contents

estimated selling costs, is charged to the allowance for loan losses. A reserve for foreclosed assets may be established to provide for possible write-downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred.

There were no changes to the valuation techniques for fair value measurements as of September 30, 2013 and December 31, 2012.

The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair values as of September 30, 2013 and December 31, 2012, by level within the fair value hierarchy.

Fair Value Measurements at Reporting Date Using:

(Dollars in thousands)	September 30, 2013	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:				
Securities available for sale:				
Agency obligations	\$86,610	86,610	—	—
Mortgage-backed securities	1,049,631	—	1,049,631	—
State and municipal obligations	9,526	—	9,526	—
Equity securities	377	377	—	—
	\$1,146,144	86,987	1,059,157	—

Measured on a non-recurring basis:

Loans measured for impairment based on the fair value of the underlying collateral	\$36,366	—	—	36,366
Foreclosed assets	7,282	—	—	7,282
	\$43,648	—	—	43,648

Fair Value Measurements at Reporting Date Using:

(Dollars in thousands)	December 31, 2012	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:				
Securities available for sale:				
Agency obligations	\$91,017	91,017	—	—
Mortgage-backed securities	1,162,325	—	1,162,325	—
State and municipal obligations	10,316	—	10,316	—
Equity securities	344	344	—	—
	\$1,264,002	91,361	1,172,641	—

Measured on a non-recurring basis:

Loans measured for impairment based on the fair value of the underlying collateral	\$43,251	—	—	43,251
Foreclosed assets	12,473	—	—	12,473
	\$55,724	—	—	55,724

There were no transfers between Level 1 and Level 2 during the three and nine months ended September 30, 2013.

Other Fair Value Disclosures

The Company is required to disclose estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value. The following is a description of valuation methodologies used for those assets and liabilities.

Cash and Cash Equivalents

For cash and due from banks, federal funds sold and short-term investments, the carrying amount approximates fair value.

Investment Securities Held to Maturity

24

Table of Contents

For investment securities held to maturity, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also holds debt instruments issued by the U.S. government and U.S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 within the fair value hierarchy.

FHLB-NY Stock

The carrying value of FHLB-NY stock was its cost. The fair value of FHLB-NY stock is based on redemption at par value. The Company classifies the estimated fair value as Level 1 within the fair value hierarchy.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial mortgage, residential mortgage, commercial, construction and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and into performing and non-performing categories. The fair value of performing loans was estimated using a combination of techniques, including a discounted cash flow model that utilizes a discount rate that reflects the Company's current pricing for loans with similar characteristics and remaining maturity, adjusted by an amount for estimated credit losses inherent in the portfolio at the balance sheet date. The rates take into account the expected yield curve, as well as an adjustment for prepayment risk, when applicable. The Company classifies the estimated fair value of its loan portfolio as Level 3.

The fair value for significant non-performing loans was based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows and estimated selling costs. The Company classifies the estimated fair value of its non-performing loan portfolio as Level 3.

Deposits

The fair value of deposits with no stated maturity, such as non-interest bearing demand deposits and savings deposits, was equal to the amount payable on demand and classified as Level 1. The estimated fair value of certificates of deposit was based on the discounted value of contractual cash flows. The discount rate was estimated using the Company's current rates offered for deposits with similar remaining maturities. The Company classifies the estimated fair value of its certificates of deposit portfolio as Level 2.

Borrowed Funds

The fair value of borrowed funds was estimated by discounting future cash flows using rates available for debt with similar terms and maturities and is classified by the Company as Level 2 within the fair value hierarchy.

Commitments to Extend Credit and Letters of Credit

The fair value of commitments to extend credit and letters of credit was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value estimates of commitments to extend credit and letters of credit are deemed immaterial.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Fair value estimates are based on existing on- and off-balance sheet financial

Table of Contents

instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.

Significant assets and liabilities that are not considered financial assets or liabilities include goodwill and other intangibles, deferred tax assets and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

The following tables present the Company's financial instruments at their carrying and fair values as of September 30, 2013 and December 31, 2012. Fair values are presented by level within the fair value hierarchy.

(Dollars in thousands)	Carrying value	Fair value	Fair Value Measurements at September 30, 2013 Using:

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Forward Looking Statements

Certain statements contained herein are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods, or by the use of forward-looking terminology, such as "may," "will," "believe," "expect," "estimate," "anticipate," "continue," or similar terms or variations on those terms, or the negative of those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those related to the economic environment, particularly in the market areas in which the Company operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations affecting financial institutions, including regulatory fees and capital requirements, changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity. The Company cautions readers not to place undue reliance on any such forward-looking statements which speak only as of the date made. The Company also advises readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not have an obligation to update any such statements to reflect any subsequent events or circumstances after the date of this statement.

Critical Accounting Policies

The Company considers certain accounting policies to be critically important to the fair presentation of its financial condition and results of operations. These policies require management to make complex judgments on matters which by their nature have elements of uncertainty. The sensitivity of the Company's consolidated financial statements to these critical accounting policies, and the assumptions and estimates applied, could have a significant impact on its financial condition and results of operations. These assumptions, estimates and judgments made by management can be influenced by a number of factors, including the general economic environment. The Company has identified the following as critical accounting policies:

- Adequacy of the allowance for loan losses
- Goodwill valuation and analysis for impairment
- Valuation of securities available for sale and impairment analysis
- Valuation of deferred tax assets

The calculation of the allowance for loan losses is a critical accounting policy of the Company. The allowance for loan losses is a valuation account that reflects management's evaluation of the probable losses in the loan portfolio. The Company maintains the allowance for loan losses through provisions for loan losses that are charged to income. Charge-offs against the allowance for loan losses are taken on loans where management determines that the collection of loan principal is unlikely. Recoveries made on loans that have been charged-off are credited to the allowance for loan losses.

The Company's evaluation of the adequacy of the allowance for loan losses includes a review of all loans on which the collectibility of principal may not be reasonably assured. For residential mortgage and consumer loans, this is determined primarily by delinquency and collateral values. For commercial real estate and commercial loans, an extensive review of financial performance, payment history and collateral values is conducted on a quarterly basis. As part of the evaluation of the adequacy of the allowance for loan losses, each quarter management prepares an analysis that categorizes the entire loan portfolio by certain risk characteristics such as loan type (residential mortgage, commercial mortgage, construction, commercial, etc.) and loan risk rating.

When assigning a risk rating to a loan, management utilizes a nine point internal risk rating system. Loans deemed to be "acceptable quality" are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans deemed to be of "questionable quality" are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial and construction

loans are rated individually and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and the Credit Administration Department. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party and periodically, by the Credit Committee in the credit renewal or approval process.

30

Table of Contents

Management assigns general valuation allowance (“GVA”) percentages to each risk rating category for use in allocating the allowance for loan losses, giving consideration to historical loss experience by loan type and other qualitative or environmental factors such as trends and levels of delinquencies, impaired loans, charge-offs, recoveries, loan volume, as well as, the national and local economic trends and conditions. The appropriateness of these percentages is evaluated by management at least once each calendar year and monitored on a quarterly basis, with changes made when they are required. In the second quarter of 2013, management completed its most recent evaluation of the GVA percentages. As a result of that evaluation, GVA percentages for the multi-family loan portfolio were disaggregated from the commercial real estate portfolio, as the portfolio has increased significantly over the last several years and its risk profile has become more differentiated. Other GVA percentages were updated, where appropriate, based upon the current analysis of historical loss experience.

Management believes the primary risks inherent in the portfolio are a continued decline in the economy, generally a decline in real estate market values, rising unemployment or a protracted period of unemployment at current elevated levels, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers’ ability to repay the loans, resulting in increased delinquencies, loan losses and future levels of provisions. Accordingly, the Company has provided for loan losses at the current level to address the current risk in its loan portfolio. Management considers it important to maintain the ratio of the allowance for loan losses to total loans at an acceptable level given current economic conditions, interest rates and the composition of the portfolio.

Although management believes that the Company has established and maintained the allowance for loan losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Illiquid credit markets, volatile securities markets, and declines in the housing and commercial real estate markets and the economy generally have combined to increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies periodically review the adequacy of the Company’s allowance for loan losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write-downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

The Company evaluates goodwill for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates. The Company qualitatively determines whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before performing Step 1 of the goodwill impairment test. If an entity concludes that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the entity would be required to perform Step 1 of the assessment and then, if needed, Step 2 to determine whether goodwill is impaired. However, if it is more likely than not that the fair value of the reporting unit is more than its carrying amount, the entity does not need to apply the two-step impairment test. For this analysis, the Reporting Unit is defined as the Bank, which includes all core and retail banking operations of the Company but excludes the assets, liabilities, equity, earnings and operations held exclusively at the Company level. The guidance provides certain factors an entity should consider in its qualitative assessment in determining whether it is more likely than not that a reporting unit’s fair value is less than its carrying amount. The factors include:

- Macroeconomic conditions, such as deterioration in economic condition and limited access to capital.
- Industry and market considerations, such as increased competition, regulatory developments and decline in market-dependent multiples.
- Cost factors, such as increased labor costs, cost of materials and other operating costs.

Overall financial performance, such as declining cash flows and decline in revenue or earnings.

Other relevant entity-specific events, such as changes in management, strategy or customers, litigation and contemplation of bankruptcy.

Reporting unit events, such as selling or disposing a portion of a reporting unit and a change in composition of assets. The Company may, based upon its qualitative assessment, or at its option, perform the two-step process to evaluate the potential impairment of goodwill. If, based upon Step 1, the fair value of the Reporting Unit exceeds its carrying amount, goodwill of the

Table of Contents

Reporting Unit is considered not impaired. However, if the carrying amount of the Reporting Unit exceeds its fair value, an additional test must be performed. The second step test compares the implied fair value of the Reporting Unit's goodwill with the carrying amount of that goodwill. An impairment loss would be recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.

At September 30, 2013, the carrying value of goodwill was \$352.6 million. The Company completed its annual goodwill impairment test as of September 30, 2013. Based upon its qualitative assessment of goodwill, the Company concluded it was more likely than not that the fair value of the reporting unit exceeded its carrying amount, goodwill was not impaired and no further quantitative analysis (Step 1) was warranted.

The Company's available for sale securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are based on market quotations or matrix pricing as discussed in Note 7 to the consolidated financial statements. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity and carried at amortized cost. The Company conducts a periodic review and evaluation of the securities portfolio to determine if any declines in the fair values of securities are other-than-temporary. In this evaluation, if such a decline were deemed other-than-temporary, the Company would measure the total credit-related component of the unrealized loss, and recognize that portion of the loss as a charge to current period earnings. The remaining portion of the unrealized loss would be recognized as an adjustment to accumulated other comprehensive income. The fair value of the securities portfolio is significantly affected by changes in interest rates. In general, as interest rates rise, the fair value of fixed-rate securities decreases and as interest rates fall, the fair value of fixed-rate securities increases. Turmoil in the credit markets resulted in a lack of liquidity in certain sectors of the mortgage-backed securities market. Increases in delinquencies and foreclosures have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The Company determines if it has the intent to sell these securities or if it is more likely than not that the Company would be required to sell the securities before the anticipated recovery. If either exists, the decline in value is considered other-than-temporary. In this evaluation, the Company did not recognize an other-than-temporary impairment charge on securities for the three and nine months ended September 30, 2013 or 2012, respectively.

The determination of whether deferred tax assets will be realizable is predicated on the reversal of existing deferred tax liabilities, utilization against carryback years and estimates of future taxable income. Such estimates are subject to management's judgment. A valuation allowance is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. At September 30, 2013, the Company maintained a valuation allowance of \$242,000, related to unused capital loss carryforwards.

COMPARISON OF FINANCIAL CONDITION AT SEPTEMBER 30, 2013 AND DECEMBER 31, 2012

Total assets increased \$57.3 million to \$7.34 billion at September 30, 2013, from \$7.28 billion at December 31, 2012, primarily due to increases in total loans, partially offset by a decrease in total investments.

Total loans increased \$178.4 million, or 3.6%, to \$5.08 billion at September 30, 2013, from \$4.90 billion at December 31, 2012. Loan originations totaled \$1.3 billion and loan purchases totaled \$22.0 million for the nine months ended September 30, 2013. The loan portfolio had net increases of \$136.0 million in multi-family mortgage loans, \$70.4 million in construction loans, predominately multi-family apartment projects, \$25.4 million in commercial mortgage loans, and \$25.1 million in commercial loans, which were partially offset by net decreases of \$72.3 million and \$4.5 million in residential mortgage and consumer loans, respectively. Loan growth was tempered somewhat by the repayment of \$17.3 million on two shared national credits during the nine months ended September 30, 2013.

Commercial real estate, commercial and construction loans represented 65.2% of the loan portfolio at September 30, 2013, compared to 62.4% at December 31, 2012.

The Company does not originate or purchase sub-prime or option ARM loans. Prior to September 30, 2008, the Company originated "Alt-A" mortgages in the form of stated income loans with a maximum loan-to-value ratio of 50% on a limited basis. The balance of these "Alt-A" loans at September 30, 2013 was \$7.6 million. Of this total, 4 loans totaling \$387,129 were 90 days or more delinquent. General valuation reserves of 6.5%, or \$25,163, were allocated to such loans which were 90 days or more delinquent at September 30, 2013.

The Company participates in loans originated by other banks, including participations designated as Shared National Credits (“SNCs”). The Company’s gross commitments and outstanding balances as a participant in SNCs were \$60.1 million and \$40.4 million, respectively, at September 30, 2013. No SNCs were 90 days or more delinquent at September 30, 2013.

The Company had outstanding junior lien mortgages totaling \$229.4 million at September 30, 2013. Of this total, 31 loans totaling \$2.2 million were 90 days or more delinquent. General valuation reserves of 10%, or \$223,000, were allocated to such loans which were 90 days or more delinquent at September 30, 2013.

Table of Contents

At September 30, 2013, the Company had outstanding indirect marine loans totaling \$34.9 million. No indirect marine loans were 90 days or more delinquent at September 30, 2013. Marine loans are currently made only on a direct, limited accommodation basis to existing customers.

The following table sets forth information regarding the Company's non-performing assets as of September 30, 2013 and December 31, 2012 (in thousands):

	September 30, 2013	December 31, 2012
Mortgage loans:		
Residential	\$22,729	29,293
Commercial	26,921	29,072
Multi-family	412	412
Construction	8,561	8,896
Total mortgage loans	58,623	67,673
Commercial loans	19,573	25,467
Consumer loans	3,388	5,850
Total non-performing loans	81,584	98,990
Foreclosed assets	7,282	12,473
Total non-performing assets	\$88,866	111,463

The following table sets forth information regarding the Company's 60-89 day delinquent loans as of September 30, 2013 and December 31, 2012 (in thousands):

	September 30, 2013	December 31, 2012
Mortgage loans:		
Residential	\$5,248	11,986
Commercial	318	12,194
Total mortgage loans	5,566	24,180
Commercial loans	36	70
Consumer loans	1,628	1,808
Total 60-89 day delinquent loans	\$7,230	26,058

At September 30, 2013, the allowance for loan losses totaled \$66.0 million, or 1.30% of total loans, compared with \$70.3 million, or 1.43% of total loans at December 31, 2012. Total non-performing loans were \$81.6 million, or 1.60% of total loans at September 30, 2013, compared to \$99.0 million, or 2.02% of total loans at December 31, 2012. The \$17.4 million decrease in non-performing loans consisted of a \$6.6 million decrease in non-performing residential loans, a \$5.9 million decrease in non-performing commercial loans, a \$2.5 million decrease in non-performing consumer loans, a \$2.2 million decrease in non-performing commercial mortgage loans and a \$336,000 decrease in non-performing construction loans.

At September 30, 2013, the Company held \$7.3 million of foreclosed assets, compared with \$12.5 million at December 31, 2012. The decrease was largely attributable to the completed sale of a \$5.5 million improved land parcel during the quarter ended September 30, 2013. Foreclosed assets at September 30, 2013, consisted of \$5.2 million of residential real estate, \$2.0 million of commercial real estate and \$65,000 of marine vessels.

Non-performing assets totaled \$88.9 million, or 1.21% of total assets at September 30, 2013, compared to \$111.5 million, or 1.53% of total assets at December 31, 2012.

Total investments decreased \$106.6 million, or 6.4%, to \$1.55 billion at September 30, 2013, from \$1.66 billion at December 31, 2012, largely due to principal repayments on mortgage-backed securities, maturities of municipal and agency bonds, and the sale of certain mortgage-backed securities which had a heightened risk of prepayment, partially offset by purchases of mortgage-backed and municipal securities.

Cash and cash equivalents decreased \$8.5 million to \$95.3 million at September 30, 2013, from \$103.8 million at December 31, 2012. The decline in cash was attributable to a decrease in total deposits and an increase in total loans, partially offset by an increase in total borrowings and a decrease in total investments.

Total deposits decreased \$172.6 million, or 3.2%, during the nine months ended September 30, 2013 to \$5.26 billion. Core deposits, which consist of savings and demand deposit accounts, decreased \$61.0 million, or 1.4%, to \$4.41

billion at September 30, 2013.

33

Table of Contents

Much of the core deposit decrease was in government money market deposits, largely related to the cyclical outflow of municipal deposits. It also included certain anticipated outflows resulting from customer tax planning considerations earlier in the year. Time deposits decreased \$111.6 million, or 11.7%, to \$845.9 million at September 30, 2013, with the majority of the decrease occurring in the 9-, 12- and 60-month maturity categories. Core deposits represented 83.9% of total deposits at September 30, 2013, compared to 82.4% at December 31, 2012. Borrowed funds increased \$213.2 million, or 26.5% during the nine months ended September 30, 2013, to \$1.02 billion, as longer-term wholesale funding was added to mitigate interest rate risk, and shorter-term wholesale funding was used to manage the cyclical outflow of municipal deposits. Borrowed funds represented 13.8% of total assets at September 30, 2013, an increase from 11.0% at December 31, 2012.

Stockholders' equity increased \$15.4 million, or 1.6% during the nine months ended September 30, 2013, to \$996.7 million, due to net income earned for the period, partially offset by dividends paid to stockholders, common stock repurchases and a decline in unrealized gains on securities available for sale. Common stock repurchases for the nine months ended September 30, 2013 totaled 397,483 shares at an average cost of \$14.80 per share. At September 30, 2013, 3.7 million shares remained eligible for repurchase under the current stock repurchase program authorized by the Company's Board of Directors. At September 30, 2013, book value per share and tangible book value per share were \$16.64 and \$10.69, respectively, compared with \$16.37 and \$10.40, respectively, at December 31, 2012.

Liquidity and Capital Resources. Liquidity refers to the Company's ability to generate adequate amounts of cash to meet financial obligations to its depositors, to fund loans and securities purchases, deposit outflows and operating expenses. Sources of funds include scheduled amortization of loans, loan prepayments, scheduled maturities of investments, cash flows from mortgage-backed securities and the ability to borrow funds from the FHLB-NY and approved broker-dealers.

Cash flows from loan payments and maturing investment securities are fairly predictable sources of funds. Changes in interest rates, local economic conditions and the competitive marketplace can influence loan prepayments, prepayments on mortgage-backed securities and deposit flows.

As of September 30, 2013, the Bank and the Company exceeded all current minimum regulatory capital requirements as follows:

	September 30, 2013				
	Required Amount (Dollars in thousands)	Ratio	Actual Amount	Ratio	
Bank:					
Regulatory Tier 1 leverage capital	\$275,767	4.00	% \$571,452	8.29	%
Tier 1 risk-based capital	198,871	4.00	571,452	11.49	
Total risk-based capital	397,741	8.00	633,647	12.74	
Company:					
Regulatory Tier 1 leverage capital	275,767	4.00	646,988	9.38	
Tier 1 risk-based capital	198,849	4.00	646,988	13.01	
Total risk-based capital	397,697	8.00	709,176	14.27	

In July 2013, the Federal Deposit Insurance Corporation and the other federal bank regulatory agencies issued a final rule that will revise their leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. Among other things, the rule establishes a new common equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), increases the minimum Tier 1 capital to risk-based assets requirement (from 4% to 6% of risk-weighted assets) and assigns a higher risk weight (150%) to exposures that are more than 90 days past due or are on nonaccrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The final rule also requires unrealized gains and losses on certain "available-for-sale" securities holdings to be included for purposes of calculating regulatory capital unless a

one-time opt-out is exercised. Additional constraints will also be imposed on the inclusion in regulatory capital of mortgage-servicing assets, defined tax assets and minority interests. The rule limits a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a "capital conservation buffer" consisting of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements. The final rule becomes effective for the Bank on January 1, 2015. The capital conservation buffer

Table of Contents

requirement will be phased in beginning January 1, 2016 and ending January 1, 2019, when the full capital conservation buffer requirement will be effective.

COMPARISON OF OPERATING RESULTS FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2013 AND 2012

General. The Company reported net income of \$16.1 million, or \$0.28 per basic and diluted share for the three months ended September 30, 2013, compared to net income of \$16.2 million, or \$0.28 per basic and diluted share for the three months ended September 30, 2012. For the nine months ended September 30, 2013, the Company reported net income of \$53.1 million, or \$0.93 per basic and diluted share, compared to net income of \$50.6 million, or \$0.89 per basic and diluted share for the same period last year.

Earnings for the three and nine months ended September 30, 2013 were adversely impacted by the write-off of a deferred tax asset related to non-qualified stock options issued shortly after the Company's 2003 initial public offering. Those options expired unused in July 2013 and the related \$3.9 million deferred tax asset was written-off via a \$3.2 million charge to income tax expense and a \$735,000 charge to equity. Conversely, earnings for the three and nine months ended September 30, 2013 were aided by a continued improvement in asset quality and a related reduction in the provision for loan losses compared with the same periods last year. Year-over-year growth in both average loans outstanding and average non-interest bearing demand deposits has mitigated compression in the net interest margin and the related adverse impact on net interest income.

Net Interest Income. Total net interest income increased \$282,000 to \$54.0 million for the quarter ended September 30, 2013, from \$53.7 million for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, total net interest income decreased \$1.8 million, or 1.1%, to \$161.3 million, from \$163.1 million for the same period in 2012. Interest income for the third quarter of 2013 decreased \$1.8 million to \$63.0 million, from \$64.8 million for the same period in 2012. For the nine months ended September 30, 2013, interest income decreased \$9.0 million to \$188.7 million, from \$197.7 million for the nine months ended September 30, 2012. Interest expense decreased \$2.1 million, or 18.6%, to \$9.0 million for the quarter ended September 30, 2013, from \$11.0 million for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, interest expense decreased \$7.1 million, or 20.6%, to \$27.4 million, from \$34.5 million for the nine months ended September 30, 2012. The improvement in net interest income for the three months ended September 30, 2013, compared to the same period in 2012, was principally due to an increase in average interest earning assets outstanding and average non-interest bearing deposits, which more than offset the compression in the net interest margin. For the nine months ended September 30, 2013, versus the comparable 2012 period, the decline in net interest income resulted from the compression in the net interest margin resulting from the prolonged low interest rate environment, which was mitigated by an increase in average interest earning assets, primarily average loans outstanding, partially funded with growth in non-interest bearing demand deposits.

The net interest margin for the quarter ended September 30, 2013, decreased 3 basis points to 3.28%, compared with 3.31% for the quarter ended September 30, 2012. The decrease in the net interest margin for the quarter ended September 30, 2013, compared with the same period last year, was primarily attributable to reductions in the weighted average yield on interest-earning assets, which declined 16 basis points to 3.83% for the quarter ended September 30, 2013, compared with 3.99% for the quarter ended September 30, 2012. The weighted average cost of interest bearing liabilities declined 15 basis points to 0.67% for the quarter ended September 30, 2013, compared with 0.82% for the third quarter of 2012. The average cost of interest bearing deposits for the quarter ended September 30, 2013 was 0.39%, compared with 0.54% for the same period last year. Average non-interest bearing demand deposits totaled \$844.2 million for the quarter ended September 30, 2013, compared with \$771.4 million for the quarter ended September 30, 2012. The average cost of borrowed funds for the quarter ended September 30, 2013 was 2.00%, compared with 2.32% for the same period last year.

For the nine months ended September 30, 2013, the net interest margin decreased 8 basis points to 3.30%, compared with 3.38% for the nine months ended September 30, 2012. The weighted average yield on interest-earning assets declined 24 basis points to 3.86% for the nine months ended September 30, 2013, compared with 4.10% for the nine months ended September 30, 2012, while the weighted average cost of interest bearing liabilities declined 18 basis points to 0.68% for the nine months ended September 30, 2013, compared with 0.86% for the same period in 2012.

The average cost of interest bearing deposits for the nine months ended September 30, 2013 was 0.41%, compared with 0.58% for the same period last year. Average non-interest bearing demand deposits totaled \$823.7 million for the nine months ended September 30, 2013, compared with \$710.5 million for the nine months ended September 30, 2012. The average cost of borrowings for the nine months ended September 30, 2013 was 2.08%, compared with 2.26% for the same period last year.

Interest income on loans secured by real estate decreased \$306,000 to \$38.2 million for the three months ended September 30, 2013, from \$38.5 million for the three months ended September 30, 2012. Consumer loan interest income decreased \$425,000, or 6.7%, to \$5.9 million for the three months ended September 30, 2013, from \$6.3 million for the three months ended September 30, 2012. Commercial loan interest income decreased \$150,000, or 1.5%, to \$10.1 million for the three months ended September 30, 2013, from \$10.2 million for the three months ended September 30, 2012. For the three months ended September 30, 2013,

Table of Contents

the average balance of net loans increased \$296.0 million to \$4.95 billion, from \$4.66 billion for the same period in 2012. The average loan yield for the three months ended September 30, 2013, decreased 35 basis points to 4.33%, from 4.68% for the same period in 2012.

Interest income on loans secured by real estate decreased \$2.0 million, or 1.7%, to \$114.2 million for the nine months ended September 30, 2013, from \$116.2 million for the nine months ended September 30, 2012. Consumer loan interest income decreased \$1.2 million, or 6.4%, to \$17.8 million for the nine months ended September 30, 2013, from \$19.0 million for the nine months ended September 30, 2012. Interest income on commercial loans decreased \$699,000, or 2.3%, to \$30.1 million for the nine months ended September 30, 2013, from \$30.8 million for the nine months ended September 30, 2012. The average loan yield for the nine months ended September 30, 2013, decreased 35 basis points to 4.41%, from 4.76% for the same period in 2012. For the nine months ended September 30, 2013, the average balance of net loans increased \$260.9 million, or 5.6%, to \$4.88 billion, from \$4.62 billion for the same period in 2012.

The average yield on total securities increased to 2.25% for the three months ended September 30, 2013, compared with 2.17% for the same period in 2012. The increase in securities yields for the quarter was primarily attributable to increases in long-term interest rates and the resulting reduction in prepayments on mortgage-backed securities and related premium amortization. For the nine months ended September 30, 2013, the average yield on all securities was 2.22%, compared with 2.37% for the same period in 2012. The decrease in securities yields for the nine months was attributable to the prolonged low interest rate environment and resulting declines in yields on new securities purchases and reinvested cash flows.

Interest income on investment securities held to maturity decreased \$293,000, or 9.8%, to \$2.7 million for the quarter ended September 30, 2013, compared to the same period last year. Average investment securities held to maturity decreased \$3.4 million, to \$352.6 million for the quarter ended September 30, 2013, from \$356.1 million for the same period last year. For the nine months ended September 30, 2013, interest income on investment securities held to maturity decreased \$596,000, or 6.7%, to \$8.3 million, from \$8.9 million for the same period in 2012. The balance of average investment securities held to maturity decreased \$787,000, to \$351.6 million for the nine months ended September 30, 2013, from \$352.3 million for the same period last year.

Interest income on securities available for sale and FHLB-NY stock decreased \$566,000, or 8.6%, to \$6.0 million for the quarter ended September 30, 2013, from \$6.6 million for the quarter ended September 30, 2012. The average balance of securities available for sale and FHLB-NY stock decreased \$166.5 million, or 12.3%, to \$1.19 billion for the three months ended September 30, 2013, from \$1.35 billion for the same period in 2012. For the nine months ended September 30, 2013, interest income on securities available for sale and FHLB-NY stock decreased \$4.4 million, or 19.3%, to \$18.3 million, from \$22.7 million for the nine months ended September 30, 2012. The average balance of securities available for sale and FHLB-NY stock decreased \$156.4 million, or 11.2%, to \$1.24 billion for the nine months ended September 30, 2013, from \$1.40 billion for the same period in 2012.

Interest paid on deposit accounts decreased \$1.8 million, or 29.3%, to \$4.4 million for the quarter ended September 30, 2013, from \$6.2 million for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, interest paid on deposit accounts declined \$5.7 million, or 29.2%, to \$13.9 million, from \$19.7 million for the nine months ended September 30, 2012. The average cost of interest-bearing deposits decreased to 0.39% and 0.41% for the three and nine months ended September 30, 2013, respectively, from 0.54% and 0.58% for the three and nine months ended September 30, 2012, respectively. The average balance of interest-bearing core deposit accounts increased \$62.2 million, or 1.8%, to \$3.57 billion for the quarter ended September 30, 2013, from \$3.50 billion for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, average interest-bearing core deposits increased \$138.6 million, or 4.0%, to \$3.59 billion, from \$3.45 billion for the same period in 2012. Average time deposit account balances decreased \$154.5 million, or 15.2%, to \$864.0 million for the quarter ended September 30, 2013, from \$1.02 billion for the same period in 2012. For the nine months ended September 30, 2013, average time deposits decreased \$164.9 million, or 15.5%, to \$897.0 million, from \$1.06 billion for the same period in 2012. Interest paid on borrowed funds decreased \$254,000, or 5.2%, to \$4.6 million for the quarter ended September 30, 2013, from \$4.9 million for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, interest paid on borrowed funds decreased \$1.4 million, or 9.3%, to \$13.5 million, from \$14.9 million for the nine

months ended September 30, 2012. The average cost of borrowings decreased to 2.00% and 2.08% for the three and nine months ended September 30, 2013, respectively, from 2.32% and 2.26% for the three and nine months ended September 30, 2012, respectively. Average borrowings increased \$81.1 million, or 9.7%, to \$918.8 million for the quarter ended September 30, 2013, from \$837.7 million for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, average borrowings decreased \$15.2 million, or 1.7%, to \$865.1 million, from \$880.4 million for the nine months ended September 30, 2012. The Company has recently increased longer-term borrowings as part of its interest rate risk management process.

Provision for Loan Losses. Provisions for loan losses are charged to operations in order to maintain the allowance for loan losses at a level management considers necessary to absorb probable credit losses inherent in the loan portfolio. In determining the level of the allowance for loan losses, management considers past and current loss experience, evaluations of real estate collateral,

Table of Contents

current economic conditions, volume and type of lending, adverse situations that may affect a borrower's ability to repay the loan and the levels of non-performing and other classified loans. The amount of the allowance is based on estimates, and the ultimate losses may vary from such estimates as more information becomes available or later events change. Management assesses the adequacy of the allowance for loan losses on a quarterly basis and makes provisions for loan losses, if necessary, in order to maintain the adequacy of the allowance.

The Company recorded provisions for loan losses of \$1.2 million and \$3.7 million for the three and nine months ended September 30, 2013, respectively. This compared with provisions for loan losses of \$3.5 million and \$12.0 million recorded for the three and nine months ended September 30, 2012, respectively. For the three and nine months ended September 30, 2013, the Company had net charge-offs of \$2.2 million and \$8.0 million, respectively, compared with net charge-offs of \$5.6 million and \$16.1 million, respectively, for the same periods in 2012. At September 30, 2013, the Company's allowance for loan losses was \$66.0 million, or 1.30% of total loans, compared with \$70.3 million, or 1.43% of total loans at December 31, 2012.

Non-Interest Income. Non-interest income totaled \$11.7 million for the quarter ended September 30, 2013, an increase of \$1.9 million, or 19.8%, compared to the same period in 2012. For the quarter ended September 30, 2013, fee income increased \$2.3 million to \$9.8 million, from \$7.5 million for the three months ended September 30, 2012, due to increases in commercial loan prepayment fee income, wealth management income and deposit fees. This was partially offset by a \$258,000 decrease in net gains on securities transactions for the three months ended September 30, 2013, compared to the same period in 2012.

For the nine months ended September 30, 2013, non-interest income totaled \$34.3 million, an increase of \$2.5 million, or 7.7%, compared to the same period in 2012. Fee income increased \$3.1 million, to \$26.1 million for the nine months ended September 30, 2013, compared with the same period in 2012, largely due to increases in prepayment fees on commercial loans and wealth management income. BOLI income increased \$1.5 million for the nine months ended September 30, 2013, compared to the same period in the prior year, principally due to the recognition of a policy claim. These increases were partially offset by a \$1.5 million decrease in net gains on securities transactions for the nine months ended September 30, 2013, compared to the same period in 2012. In addition, other income decreased \$553,000 for the nine months ended September 30, 2013, compared with the same period in 2012, primarily due to a decrease in gains on loan sales.

Non-Interest Expense. For the three months ended September 30, 2013, non-interest expense decreased \$432,000, to \$36.5 million, compared to the three months ended September 30, 2012. Other operating expenses decreased \$847,000, largely as a result of reduced non-performing asset-related expenses. In addition, advertising expense decreased \$318,000, to \$718,000. FDIC insurance costs declined \$204,000 as a result of a lower assessment rate, and the amortization of intangibles decreased \$193,000 for the three months ended September 30, 2013, compared with the same period in 2012, as a result of scheduled reductions in core deposit intangible amortization. Partially offsetting these reductions, compensation and benefits expense increased \$1.3 million for the quarter ended September 30, 2013, compared to the quarter ended September 30, 2012, due to increases in salaries and related payroll taxes, increased severance expense, and an increase in incentive compensation accruals.

The Company's annualized non-interest expense as a percentage of average assets was 2.00% for the quarter ended September 30, 2013, compared with 2.04% for the same period in 2012. The efficiency ratio (non-interest expense divided by the sum of net interest income and non-interest income) was 55.48% for the quarter ended September 30, 2013, compared with 58.10% for the same period in 2012.

Non-interest expense for the nine months ended September 30, 2013 was \$111.2 million, a decrease of \$220,000 from the nine months ended September 30, 2012. Other operating expenses decreased \$1.1 million, largely as a result of reduced non-performing asset-related expenses. In addition, the amortization of intangibles decreased \$623,000 for the nine months ended September 30, 2013, compared with the same period in 2012, as a result of scheduled reductions in core deposit intangible amortization. FDIC insurance costs declined \$350,000 as a result of a lower assessment rate, and advertising expense decreased \$108,000 to \$2.7 million. Partially offsetting these reductions, compensation and benefits expense increased \$1.8 million for the nine months ended September 30, 2013, compared to the same period last year, due to increases in salaries and related payroll taxes, increased severance expense, and an increase in incentive compensation accruals.

Income Tax Expense. For the three and nine months ended September 30, 2013, the Company's income tax expense was \$12.0 million and \$27.6 million, respectively, compared with \$7.0 million and \$21.0 million, for the three and nine months ended September 30, 2012, respectively. The increase in income tax expense was primarily attributable to the \$3.2 million charge associated with the write-off of a deferred tax asset related to expired non-qualified stock options and growth in pre-tax income from taxable sources. The Company's effective tax rate was 42.7% and 34.2% for the three and nine months ended September 30, 2013, respectively, compared with 30.1% and 29.3% for the three and nine months ended September 30, 2012, respectively. Excluding the discrete item related to the write-off of the deferred tax asset, the Company's effective tax rate was 31.3% and 30.2% for the three and nine months ended September 30, 2013, respectively.

Table of Contents

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Qualitative Analysis. Interest rate risk is the exposure of a bank's current and future earnings and capital arising from adverse movements in interest rates. The guidelines of the Company's interest rate risk policy seek to limit the exposure to changes in interest rates that affect the underlying economic value of assets and liabilities, earnings and capital. To minimize interest rate risk, the Company generally sells all 20- and 30-year fixed-rate mortgage loans at origination. Commercial real estate loans generally have interest rates that reset in five years, and other commercial loans such as construction loans and commercial lines of credit reset with changes in the Prime rate, the Federal Funds rate or LIBOR. Investment securities purchases generally have maturities of five years or less, and mortgage-backed securities have weighted average lives between three and five years.

The Asset/Liability Committee meets on at least a monthly basis to review the impact of interest rate changes on net interest income, net interest margin, net income and the economic value of equity. The Asset/Liability Committee reviews a variety of strategies that project changes in asset or liability mix and the impact of those changes on projected net interest income and net income.

The Company's strategy for liabilities has been to maintain a stable core-funding base by focusing on core deposit account acquisition and increasing products and services per household. The Company's ability to retain maturing time deposit accounts is the result of its strategy to remain competitively priced within its marketplace. The Company's pricing strategy may vary depending upon current funding needs and the ability of the Company to fund operations through alternative sources, primarily by accessing short-term lines of credit with the FHLB of New York during periods of pricing dislocation.

Quantitative Analysis. Current and future sensitivity to changes in interest rates are measured through the use of balance sheet and income simulation models. The analysis captures changes in net interest income using flat rates as a base, a most likely rate forecast and rising and declining interest rate forecasts. Changes in net interest income and net income for the forecast period, generally twelve to twenty-four months, are measured and compared to policy limits for acceptable change. The Company periodically reviews historical deposit re-pricing activity and makes modifications to certain assumptions used in its income simulation model regarding the interest rate sensitivity of deposits without maturity dates. These modifications are made to more closely reflect the most likely results under the various interest rate change scenarios. Since it is inherently difficult to predict the sensitivity of interest bearing deposits to changes in interest rates, the changes in net interest income due to changes in interest rates cannot be precisely predicted. There are a variety of reasons that may cause actual results to vary considerably from the predictions presented below which include, but are not limited to, the timing, magnitude, and frequency of changes in interest rates, interest rate spreads, prepayments, and actions taken in response to such changes.

Specific assumptions used in the simulation model include:

Parallel yield curve shifts for market rates;

Current asset and liability spreads to market interest rates are fixed;

Traditional savings and interest-bearing demand accounts move at 10% of the rate ramp in either direction;

Retail Money Market and Business Money Market accounts move at 25% and 75% of the rate ramp in either direction; respectively; and

Higher-balance demand deposit tiers and promotional demand accounts move at up to 75% of the rate ramp in either direction.

The following table sets forth the results of a twelve-month net interest income projection model as of September 30, 2013 (dollars in thousands):

Change in Interest Rates in Basis Points (Rate Ramp)	Net Interest Income		
	Dollar Amount	Dollar Change	Percent Change
-100 Static	214,651	(107) —
+100	214,758	—	—
+200	210,270	(4,488) (2.1
	205,009	(9,749) (5

+300 199,524 (15,234) (7.1)

The preceding table indicates that, as of September 30, 2013, in the event of a 300 basis point increase in interest rates, whereby rates ramp up evenly over a twelve-month period, net interest income would decrease 7.1%, or \$15.2 million. In the event of a 100 basis point decrease in interest rates, net interest income is projected to decrease \$107,000.

38

Table of Contents

Another measure of interest rate sensitivity is to model changes in economic value of equity through the use of immediate and sustained interest rate shocks. The following table illustrates the result of the economic value of equity model as of September 30, 2013 (dollars in thousands):

Change in Interest Rates (Basis Points)	Present Value of Equity			Present Value of Equity as Percent of Present Value of Assets	
	Dollar Amount	Dollar Change	Percent Change	Present Value Ratio	Percent Change
-100	1,277,794	57,728	4.7	16.7	3.6
Flat	1,220,066	—	—	16.1	—
+100	1,162,813	(57,253)	(4.7)	15.5	(3.6)
+200	1,103,994	(116,072)	(9.5)	14.9	(7.3)
+300	1,034,401	(185,665)	(15.2)	14.1	(12.0)

The preceding table indicates that as of September 30, 2013, in the event of an immediate and sustained 300 basis point increase in interest rates, the present value of equity is projected to decrease 15.2%, or \$185.7 million. If rates were to decrease 100 basis points, the model forecasts a 4.7%, or \$57.7 million increase in the present value of equity. Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the use of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on the Company's net interest income and will differ from actual results.

Item 4. CONTROLS AND PROCEDURES.

Under the supervision and with the participation of management, including the Principal Executive Officer and the Principal Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) were evaluated at the end of the period covered by this report. Based upon that evaluation, the Principal Executive Officer and the Principal Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective. There has been no change in the Company's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
