SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One)

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the fiscal year ended December 31, 2018

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission file number 000-23423

C&F FINANCIAL CORPORATION

(Exact name of registrant as specified in its charter)

Edgar Filing: C & F FINANCIAL CORP - Form 10-K

Virginia 54-1680165
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

802 Main Street

West Point, VA 23181

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (804) 843-2360

Securities registered pursuant to Section 12(b) of the Act:

| | |
|------------------------------------------|-------------------------------------------|
| Common Stock, \$1.00 par value per share | The NASDAQ Stock Market LLC |
| Title of each class | Name of each exchange on which registered |

Securities registered pursuant to Section 12(g) of the Act:

NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

| | |
|-------------------------|---------------------------|
| Large accelerated filer | Accelerated Filer |
| Non-accelerated filer | Smaller reporting company |
| | Emerging growth company |

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of common stock held by non-affiliates of the registrant as of June 30, 2018 was \$205,720,132.

There were 3,486,861 shares of common stock, \$1.00 par value per share, outstanding as of February 22, 2019.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the definitive Proxy Statement to be delivered to shareholders in connection with the Annual Meeting of Shareholders to be held April 16, 2019 are incorporated by reference in Part III of this report.

PART I

ITEM 1. BUSINESS

General

C&F Financial Corporation (the Corporation) is a bank holding company that was incorporated in March 1994 under the laws of the Commonwealth of Virginia. The Corporation owns all of the stock of Citizens and Farmers Bank (the Bank or C&F Bank), which is an independent commercial bank chartered under the laws of the Commonwealth of Virginia. C&F Bank originally opened for business under the name Farmers and Mechanics Bank on January 22, 1927. C&F Bank has the following five wholly-owned subsidiaries, all incorporated under the laws of the Commonwealth of Virginia:

- C&F Mortgage Corporation

- C&F Finance Company

- C&F Wealth Management Corporation

- C&F Insurance Services, Inc.

- CVB Title Services, Inc.

The Corporation operates in a decentralized manner in three principal business segments: (1) retail banking through C&F Bank, (2) mortgage banking through C&F Mortgage Corporation (C&F Mortgage) and (3) consumer finance through C&F Finance Company (C&F Finance). For detailed information about the financial condition and results of operations of these segments, see “Note 18: Business Segments” in Item 8. “Financial Statements and Supplementary Data” in this report. C&F Wealth Management Corporation, organized in April 1995, is a full-service brokerage firm offering a comprehensive range of wealth management services and insurance products through third-party service providers. C&F Insurance Services, Inc. was organized in July 1999 for the primary purpose of owning an equity interest in an independent insurance agency that operates in Virginia and North Carolina. CVB Title Services, Inc. was organized for the primary purpose of owning an equity interest in a full service title and settlement agency. The financial position and operating results of C&F Wealth Management Corporation, C&F Insurance Services, Inc. and CVB Title Services, Inc. are not significant to the Corporation as a whole.

The Corporation also owns three non-operating subsidiaries, C&F Financial Statutory Trust II (Trust II) formed in December 2007, C&F Financial Statutory Trust I (Trust I) formed in July 2005, and Central Virginia Bankshares Statutory Trust I (CVBK Trust I) formed in December 2003. These trusts were formed for the purpose of issuing \$10.0 million each for Trust II and Trust I of the Corporation's junior subordinated debt securities and \$5.0 million for CVBK Trust I of junior subordinated debt securities originally issued by Central Virginia Bankshares, Inc. (CVBK), and assumed by the Corporation when CVBK was merged into the Corporation on March 22, 2014, with all such issuances occurring in private placements to institutional investors. All three trusts are unconsolidated subsidiaries of the Corporation. The principal assets of these trusts are \$10.3 million each for Trust II and Trust I and \$5.2 million for CVBK Trust I of the Corporation's junior subordinated debt securities (such securities of the Corporation referred to herein as "trust preferred capital notes") that are reported as liabilities of the consolidated Corporation.

Retail Banking

We provide retail banking services through C&F Bank. C&F Bank provides retail banking services at its main office in West Point, Virginia, and 25 Virginia branches located one each in Cartersville, Charlottesville, Chester, Cumberland, Hampton, Mechanicsville, Newport News, Norge, Powhatan, Providence Forge, Quinton, Saluda, Sandston, West Point and Yorktown, two in Williamsburg, four in Richmond and four in Midlothian. These branches provide a wide range of banking services to individuals and businesses. These services include various types of checking and savings deposit accounts, as well as business, real estate, development, mortgage, home equity and installment loans. The Bank also offers ATMs, internet and mobile banking and debit and credit cards, as well as safe deposit box rentals, notary public,

Table of Contents

electronic transfer and other customary bank services to its customers. Revenues from retail banking operations consist primarily of interest earned on loans and investment securities and fees related to deposit services. Retail banking revenues and operations are not materially affected by seasonal factors; however, public deposits tend to increase with tax collections primarily in the fourth quarter of each year and decline with spending thereafter. At December 31, 2018, assets of the retail banking segment totaled \$1.4 billion. For the year ended December 31, 2018, net income for this segment totaled \$10.6 million.

Mortgage Banking

We conduct mortgage banking activities through C&F Mortgage, which was organized in September 1995. C&F Mortgage provides mortgage loan origination services through 11 locations in Virginia, two in Maryland, two in North Carolina, one in South Carolina, and one in West Virginia. The Virginia offices are located one each in Charlottesville, Chesapeake, Fishersville, Fredericksburg, Glen Allen, Harrisonburg, Lynchburg, Newport News and Williamsburg and two in Midlothian. The Maryland offices are located in Annapolis and Waldorf. The North Carolina offices are located in Gastonia and Moyock. The South Carolina office is located in Fort Mill. The West Virginia office is located in Keyser. C&F Mortgage offers a wide variety of residential mortgage loans, which are originated for sale generally to the following investors: Penny Mac Corporation; Wells Fargo Home Mortgage; AmeriHome Mortgage Company, LLC; the Virginia Housing Development Authority (VHDA); and Freedom Mortgage Corporation. C&F Mortgage does not securitize loans. C&F Bank may also purchase mortgage loans from C&F Mortgage. C&F Mortgage originates conventional mortgage loans, mortgage loans insured by the Federal Housing Administration (the FHA), and mortgage loans guaranteed by the United States Department of Agriculture (the USDA) and the Veterans Administration (the VA). A majority of the conventional loans are conforming loans that qualify for purchase by the Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac). The remainder of the conventional loans are non-conforming in that they do not meet Fannie Mae or Freddie Mac guidelines, but are eligible for sale to various other investors. C&F Mortgage also has a division, Lender Solutions, that provides certain mortgage loan origination functions to third parties and a subsidiary, Certified Appraisals LLC, which provides ancillary mortgage loan origination services to third parties for residential appraisals. Revenues from mortgage banking operations consist principally of gains on sales of loans to investors in the secondary mortgage market, loan origination fee income and interest earned on mortgage loans held for sale. Revenues and income from mortgage banking, which are driven primarily by the origination and sale of mortgage loans, are subject to seasonal factors, including the volume of home sales in the residential real estate market, which typically rises during spring and summer months and declines during fall and winter months. However, seasonal trends may be disrupted by cyclical and other economic factors that affect the residential real estate market. At December 31, 2018, assets of the mortgage banking segment totaled \$56.1 million. For the year ended December 31, 2018, net income for this segment totaled \$1.9 million.

Consumer Finance

We conduct consumer finance activities through C&F Finance. C&F Finance is a regional finance company purchasing automobile, marine and recreational vehicle (RV) loans throughout Virginia and in portions of Alabama, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Maryland, Minnesota, Missouri, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Texas and West Virginia through its offices in Richmond and Hampton, Virginia, and in Nashville, Tennessee. C&F Finance is an indirect lender that primarily provides automobile financing through lending programs that are designed to serve customers in the “non-prime” market who have limited access to traditional automobile financing. C&F Finance generally purchases automobile retail installment sales contracts from manufacturer-franchised dealerships with used-car operations and through selected independent dealerships. C&F Finance selects these dealers based on the types of vehicles sold. Specifically, C&F Finance prefers to finance later model, low mileage used vehicles because the initial depreciation on new vehicles is extremely high. The typical borrowers on the automobile retail installment sales contracts purchased have experienced prior credit difficulties. Because C&F Finance serves customers who are unable to meet the credit standards imposed by most traditional automobile financing sources, C&F Finance typically charges interest at higher rates than those charged by traditional financing sources. In addition, because C&F Finance provides financing in a relatively high-risk market, it expects to experience a higher level of credit losses than traditional automobile financing sources. Beginning in 2016 with C&F Finance’s implementation of a scorecard model for purchasing loan contracts, the credit worthiness of borrowers at origination has improved for automobile loans purchased by C&F Finance and both the interest rates charged and level of credit losses experienced have decreased. In addition to non-prime automobile financing, beginning in the first quarter of 2018, C&F Finance expanded its lending

Table of Contents

portfolio to include marine and RV loan contracts in the prime sector. These contracts are also purchased on an indirect basis through a referral program administered by a third party. Because these contracts are for prime loans made to individuals with higher credit scores, they are priced at rates substantially lower than the non-prime automobile portfolio. Revenues from consumer finance operations consist principally of interest earned on automobile, marine and RV loans. While the consumer finance segment's loans outstanding and interest income are not materially affected by seasonal factors, delinquencies on automobile loans are generally highest in the period from November through January, related in part to seasonal trends affecting borrowers, including consumer spending. At December 31, 2018, assets of the consumer finance segment totaled \$297.6 million. For the year ended December 31, 2018, net income for this segment totaled \$6.7 million.

Employees

At December 31, 2018, we employed 634 full-time equivalent employees. We consider relations with our employees to be excellent.

Competition

Retail Banking

In the Bank's market area, we compete with large national and regional financial institutions, savings associations and other independent community banks, as well as credit unions, mutual funds, brokerage firms, insurance companies and other lending and deposit platforms offered by non-bank financial technology firms. Increased competition has come from out-of-state banks through their acquisition of Virginia-based banks and interstate branching, and expansion of community and regional banks into our service areas.

The banking business in Virginia, and specifically in the Bank's primary service area in the Hampton to Charlottesville corridor, is highly competitive for both loans and deposits, and is dominated by a relatively small number of large banks with many offices operating over a wide geographic area. Among the advantages such large banks have are their ability to finance wide-ranging advertising campaigns, to maximize efficiencies through economies of scale and, by virtue of their greater total capitalization, to have substantially higher lending limits than the Bank.

Factors such as interest rates offered, the number and location of branches and the types of products offered, as well as the reputation of the institution, affect competition for deposits and loans. We compete by emphasizing customer

service, establishing long-term customer relationships, building customer loyalty and providing traditional and digital products and services to address the specific needs of our customers. We target individual customers, small-to-medium size business customers and acquisition, development and construction loan customers in our markets.

No material part of the Bank's business is dependent upon a single or a few customers, and the loss of any single customer would not have a materially adverse effect upon the Bank's business.

Mortgage Banking

C&F Mortgage competes with large national and regional banks, credit unions, smaller regional mortgage lenders, small local broker operations and internet lending platforms. Due to the increased regulatory and compliance burden, the industry has seen a consolidation in the number of competitors in the marketplace. The agency guidelines for sales of mortgages in the secondary market business continue to be stringent.

The competitive factors faced by C&F Mortgage continue to evolve because of regulatory reforms and initiatives, including but not limited to the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). While C&F Mortgage has kept pace with all aspects of the regulations issued pursuant to the Dodd-Frank Act and by the Consumer Financial Protection Bureau (CFPB), other such legislative and regulatory initiatives in the future have the potential to affect the operations of C&F Mortgage. Given the far-reaching effect of the Dodd-Frank Act and CFPB regulations on mortgage finance, compliance with the requirements of the Dodd-Frank Act and CFPB regulations has required and may continue to require substantial changes to mortgage lending systems and processes and other implementation efforts.

Table of Contents

To operate profitably in this competitive and regulatory environment, mortgage companies must have a high level of operational and risk management skills and be able to attract and retain top mortgage origination talent. C&F Mortgage competes by attracting the top people in sales and operations in the industry, expanding into new markets that offer strategic growth opportunities, providing an infrastructure that manages regulatory changes efficiently and effectively, utilizing technology to improve efficiency and consistency in its operations and to mitigate compliance risk, offering products that are competitive in both loan parameters and pricing, and providing consistently high quality customer service.

No material part of C&F Mortgage's business is dependent upon a single customer and the loss of any single customer would not have a materially adverse effect upon C&F Mortgage's business. C&F Mortgage, like all residential mortgage lenders, would be affected by the inability of Fannie Mae, Freddie Mac, the FHA or the VA to purchase or guarantee loans. Although C&F Mortgage sells loans to various third-party counterparties (i.e., investors), the ability of these aggregators to purchase or guarantee loans would be limited if these government-sponsored entities cease to exist or materially limit their purchases or guarantees of mortgage loans or suffer deteriorations in their financial condition.

Consumer Finance

The non-prime automobile finance business is highly competitive. The automobile finance market is highly fragmented and is served by a variety of financial entities, including the captive finance affiliates of major automotive manufacturers, banks, savings associations, credit unions and independent finance companies. Many of these competitors have substantially greater financial resources and lower costs of funds than our finance subsidiary. In addition, competitors often provide financing on terms that are more favorable to automobile purchasers or dealers than the terms C&F Finance offers. Many of these competitors also have long-standing relationships with automobile dealerships and may offer dealerships or their customers other forms of financing, including dealer floor plan financing and leasing, which we do not.

Over the past several years, a number of financial institutions and other lenders have increased focus on operations in the non-prime automobile finance markets resulting in intensified competition for loans and qualified personnel. In addition, certain competitors in the industry have (i) relaxed underwriting standards resulting in higher delinquencies and charge-offs for the industry and (ii) used loan pricing strategies resulting in lower loan yields. To continue to operate profitably, lenders must have a high level of operational and risk management skills and access to competitive costs of funds.

Providers of automobile financing traditionally have competed on the basis of interest rates charged, the quality of credit accepted, the flexibility of loan terms offered and the quality of service provided to dealers and customers. To establish C&F Finance as one of the principal financing sources for the dealers it serves, we compete predominately by providing a high level of dealer service, building strong dealer relationships, offering flexible loan terms and quickly funding loans purchased from dealers.

No material part of C&F Finance's business is dependent upon any single dealer relationship, and the loss of any single dealer relationship would not have a materially adverse effect upon C&F Finance's business.

Regulation and Supervision

General

Bank holding companies, banks and their affiliates are extensively regulated under both federal and state law. The following summary briefly describes significant provisions of currently applicable federal and state laws and certain regulations and the potential impact of such provisions. This summary is not complete, and we refer you to the particular statutory or regulatory provisions or proposals for more information. Because regulation of financial institutions changes regularly and is the subject of constant legislative and regulatory debate, we cannot forecast how federal and state regulation and supervision of financial institutions may change in the future and affect the Corporation's and the Bank's operations.

Table of Contents

Regulatory Reform

The financial crisis of 2008, including the downturn of global economic, financial and money markets and the threat of collapse of numerous financial institutions, and other events led to the adoption of numerous laws and regulations that apply to, and focus on, financial institutions. The most significant of these laws is the Dodd-Frank Act, which was enacted on July 21, 2010 and, in part, was intended to implement significant structural reforms to the financial services industry.

In May 2018, the Economic Growth, Regulatory Relief and Consumer Protection Act (the EGRRCPA) was enacted to reduce the regulatory burden on certain banking organizations, including community banks, by modifying or eliminating certain federal regulatory requirements. While the EGRRCPA maintains most of the regulatory structure established by the Dodd-Frank Act, it amends certain aspects of the regulatory framework for small depository institutions with assets of less than \$10 billion as well as for larger banks with assets above \$50 billion. In addition, the EGRRCPA included regulatory relief for community banks regarding regulatory examination cycles, call reports, application of the Volcker Rule (proprietary trading prohibitions), mortgage disclosures, qualified mortgages, and risk weights for certain high-risk commercial real estate loans. However, federal banking regulators retain broad discretion to impose additional regulatory requirements on banking organizations based on safety and soundness and U.S. financial system stability considerations.

The Corporation continues to experience ongoing regulatory reform. These regulatory changes could have a significant effect on how the Corporation conducts its business. The specific implications of the Dodd-Frank Act, the EGRRCPA, and other potential regulatory reforms cannot yet be fully predicted and will depend to a large extent on the specific regulations that are to be adopted in the future. Certain aspects of the Dodd-Frank Act and the EGRRCPA are discussed in more detail below.

Regulation of the Corporation

As a bank holding company, the Corporation is subject to the Bank Holding Company Act of 1956 (the BHCA) and regulation and supervision by the Board of Governors of the Federal Reserve System (the Federal Reserve Board). Pursuant to the BHCA the Federal Reserve Board has the power to order any bank holding company or its subsidiaries to terminate any activity or to terminate its ownership or control of any subsidiary when the Federal Reserve Board has reasonable grounds to believe that continuation of such activity or ownership constitutes a serious risk to the financial soundness, safety or stability of any bank subsidiary of the bank holding company. The Federal Reserve Board and the Federal Deposit Insurance Corporation (the FDIC) have adopted guidelines and released interpretative materials that establish operational and managerial standards to promote the safe and sound operation of banks and bank holding companies. These standards relate to the institution's key operating functions, including but not limited to capital management, internal controls, internal audit systems, information systems, data and cybersecurity, loan

documentation, credit underwriting, interest rate exposure and risk management, vendor management, executive management and its compensation, corporate governance, asset growth, asset quality, earnings, liquidity and risk management.

The BHCA generally limits the activities of a bank holding company and its subsidiaries to that of banking, managing or controlling banks, or any other activity that is closely related to banking or to managing or controlling banks, and permits interstate banking acquisitions subject to certain conditions, including national and state concentration limits. The Federal Reserve Board has jurisdiction under the BHCA to approve any bank or non-bank acquisition, merger or consolidation proposed by a bank holding company. A bank holding company must be “well capitalized” and “well managed” to engage in an interstate bank acquisition or merger, and banks may branch across state lines provided that the law of the state in which the branch is to be located would permit establishment of the branch if the bank were a state bank chartered by such state. Bank holding companies and their subsidiaries are also subject to restrictions on transactions with insiders and affiliates, as further discussed below.

Each of the Bank’s depository accounts is insured by the FDIC against loss to the depositor to the maximum extent permitted by applicable law, and federal law and regulatory policy impose a number of obligations and restrictions on the Corporation and the Bank to reduce potential loss exposure to depositors and to the FDIC Deposit Insurance Fund (DIF). For example, pursuant to the Dodd-Frank Act and Federal Reserve Board policy, a bank holding company must commit resources to support its subsidiary depository institutions, which is referred to as serving as a “source of strength.” In addition, insured depository institutions under common control must reimburse the FDIC for any loss suffered or reasonably anticipated by the DIF as a result of the default of a commonly controlled insured depository institution. The

Table of Contents

FDIC may decline to enforce the provisions if it determines that a waiver is in the best interest of the DIF. An FDIC claim for damages is superior to claims of stockholders of an insured depository institution or its holding company but is subordinate to claims of depositors, secured creditors and holders of subordinated debt, other than affiliates, of the commonly controlled insured depository institution.

The Federal Deposit Insurance Act (the FDIA) provides that amounts received from the liquidation or other resolution of any insured depository institution must be distributed, after payment of secured claims, to pay the deposit liabilities of the institution before payment of any other general creditor or stockholder of that institution – including that institution’s parent holding company. This provision would give depositors a preference over general and subordinated creditors and stockholders if a receiver is appointed to distribute the assets of a bank.

The Corporation also is subject to regulation and supervision by the State Corporation Commission of Virginia. The Corporation also must file annual, quarterly and other periodic reports with, and comply with other regulations of, the Securities and Exchange Commission (the SEC).

Capital Requirements

Basel III Capital Framework. The Federal Reserve Board and the FDIC have adopted rules to implement the Basel III capital framework as outlined by the Basel Committee on Banking Supervision and standards for calculating risk-weighted assets and risk-based capital measurements (collectively, the Basel III Final Rules) that apply to banking institutions they supervise. For the purposes of these capital rules, (i) common equity tier 1 capital (CET1) consists principally of common stock (including surplus) and retained earnings; (ii) Tier 1 capital consists principally of CET1 plus non-cumulative preferred stock and related surplus, and certain grandfathered cumulative preferred stocks and trust preferred securities; and (iii) Tier 2 capital consists of other capital instruments, principally qualifying subordinated debt and preferred stock, and limited amounts of an institution’s allowance for loan losses. Each regulatory capital classification is subject to certain adjustments and limitations, as implemented by the Basel III Final Rules. The Basel III Final Rules also establish risk weightings that are applied to many classes of assets held by community banks, importantly including applying higher risk weightings to certain commercial real estate loans.

The Basel III Final Rules and minimum capital ratios required to be maintained by banks were effective January 1, 2015. The Basel III Final Rules also include a requirement that banks maintain additional capital (the “capital conservation buffer”), which was phased in beginning January 1, 2016 and was fully phased in effective January 1, 2019. The Basel III Final Rules and fully phased in capital conservation buffer require banks to maintain (i) a minimum ratio of CET1 to risk-weighted assets of at least 4.5 percent, plus a 2.5 percent capital conservation buffer (which is added to the minimum CET1 ratio, effectively resulting in a required ratio of CET1 to risk-weighted assets of at least 7 percent), (ii) a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0 percent, plus the capital conservation buffer (effectively resulting in a required Tier 1 capital ratio of 8.5 percent), (iii) a minimum ratio

of total (that is, Tier 1 plus Tier 2) capital to risk-weighted assets of at least 8.0 percent, plus the capital conservation buffer (effectively resulting in a required total capital ratio of 10.5 percent) and (iv) a minimum leverage ratio of 4 percent, calculated as the ratio of Tier 1 capital to average total assets, subject to certain adjustments and limitations.

The Basel III Final Rules provide deductions from and adjustments to regulatory capital measures, primarily to CET1, including deductions and adjustments that were not applied to reduce CET1 under historical regulatory capital rules. For example, mortgage servicing rights, deferred tax assets dependent upon future taxable income, and significant investments in non-consolidated financial entities must be deducted from CET1 to the extent that any one such category exceeds 10 percent of CET1 or all such categories in the aggregate exceed 15 percent of CET1.

The Basel III Final Rules permanently include in Tier 1 capital trust preferred securities issued prior to May 19, 2010 by bank holding companies with less than \$15 billion in total assets, subject to a limit of 25 percent of Tier 1 capital. The Corporation expects that its trust preferred securities will be included in the Corporation's Tier 1 capital until their maturity.

Community Bank Leverage Ratio. As a result of the EGRRCPA, the federal banking agencies were required to develop a Community Bank Leverage Ratio (the ratio of a bank's tangible equity capital to average total consolidated assets) for banking organizations with assets of less than \$10 billion, such as the Bank. On November 21, 2018, the federal

Table of Contents

banking agencies invited public comment on their proposal to establish the Community Bank Leverage Ratio framework. Under the proposal, a community banking organization would be eligible to elect the Community Bank Leverage Ratio framework if it has less than \$10 billion in total consolidated assets, limited amounts of certain assets and off-balance sheet exposures, and a Community Bank Leverage Ratio greater than 9 percent. A qualifying community banking organization that has chosen the proposed framework would be automatically considered in compliance with the Basel III capital requirements and would be exempt from the complex Basel III risk-based capital calculations. Such a community banking organization would be considered to have met the capital ratio requirements to be “well capitalized” for the federal banking agencies’ Prompt Corrective Action rules provided it has a Community Bank Leverage Ratio greater than 9 percent. Because the proposal has not been finalized and a final rule has not been issued, it is difficult at this time to predict when or how this new capital ratio will ultimately be applied to community banking organizations or to predict the specific effects of the final rule.

Small Bank Holding Company. The EGRRCPA also expanded the category of bank holding companies that may rely on the Federal Reserve Board’s Small Bank Holding Company Policy Statement by raising the maximum amount of assets a qualifying bank holding company may have from \$1 billion to \$3 billion. In addition to meeting the asset threshold, a bank holding company must not engage in significant nonbanking activities, not conduct significant off-balance sheet activities, and not have a material amount of debt or equity securities outstanding and registered with the SEC (subject to certain exceptions). The Federal Reserve Board may, in its discretion, exclude any bank holding company from the application of the Small Bank Holding Company Policy Statement if such action is warranted for supervisory purposes.

In August 2018, the Federal Reserve Board issued an interim final rule to apply the Small Bank Holding Company Policy Statement to bank holding companies with consolidated total assets of less than \$3 billion. The policy statement, which, among other things, exempts certain bank holding companies from minimum consolidated regulatory capital ratios that apply to other bank holding companies. As a result of the interim final rule, which was effective August 30, 2018, the Corporation expects that it will be treated as a small bank holding company and will no longer be subject to regulatory capital requirements. The comment period on the interim final rule closed on October 29, 2018. The Bank remains subject to the regulatory capital requirements described above.

Limits on Dividends

The Corporation is a legal entity that is separate and distinct from the Bank. A significant portion of the revenues of the Corporation result from dividends paid to it by the Bank. Both the Corporation and C&F Bank are subject to laws and regulations that limit the payment of dividends, including limits on the sources of dividends and requirements to maintain capital at or above regulatory minimums. Banking regulators have indicated that Virginia banking organizations should generally pay dividends only (1) from net undivided profits of the bank, after providing for all expenses, losses, interest and taxes accrued or due by the bank and (2) if the prospective rate of earnings retention appears consistent with the organization’s capital needs, asset quality and overall financial condition. In addition, Federal Reserve Board supervisory guidance indicates that the Federal Reserve Board may have safety and soundness

concerns if a bank holding company pays dividends that exceed earnings for the period in which the dividend is being paid. Further, the FDIA prohibits insured depository institutions such as C&F Bank from making capital distributions, including paying dividends, if, after making such distribution, the institution would become undercapitalized as defined in the statute. We do not expect that any of these laws, regulations or policies will materially affect the ability of the Corporation or C&F Bank to pay dividends.

The Dodd-Frank Act

The Dodd-Frank Act implemented far-reaching changes across the financial regulatory landscape, including changes that have affected all bank holding companies and banks, including the Corporation and the Bank. Provisions that significantly affect the business of the Corporation and the Bank include the following:

- Insurance of Deposit Accounts. The Dodd-Frank Act changed the assessment base for federal deposit insurance from the amount of insured deposits to consolidated assets less tangible capital. The Dodd-Frank Act also made permanent the \$250,000 limit for federal deposit insurance and increased the cash limit of Securities Investor Protection Corporation protection from \$100,000 to \$250,000.

Table of Contents

- Payment of Interest on Demand Deposits. The Dodd-Frank Act repealed the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts.
- Creation of the Consumer Financial Protection Bureau. The Dodd-Frank Act centralized significant aspects of consumer financial protection by creating a new agency, the CFPB, which is discussed in more detail below.
- Debit Card Interchange Fees. The Dodd-Frank Act imposed limits for debit card interchange fees for issuers that have over \$10 billion in assets, which could affect the amount of interchange fees collected by financial institutions with less than \$10 billion in assets.

In addition, the Dodd-Frank Act implements other changes to financial regulations, including provisions that:

- Restrict the preemption of state law by federal law and disallow subsidiaries and affiliates of national banks from availing themselves of such preemption.
- Impose comprehensive regulation of the over-the-counter derivatives market, subject to significant rulemaking processes, which would include certain provisions that would effectively prohibit insured depository institutions from conducting certain derivatives businesses in the institution itself.
- Require loan originators to retain 5 percent of any loan sold or securitized, unless it is a “qualified residential mortgage,” subject to certain exceptions.
- Prohibit banks and their affiliates from engaging in proprietary trading and investing in and sponsoring certain unregistered investment companies (the Volcker Rule), as subsequently amended by the EGRRCPPA which provides an exemption from the Volcker Rule for many community banking organizations.
- Implement corporate governance revisions that apply to all public companies not just financial institutions.

Some of the rules that have been proposed and, in some cases, adopted to comply with the Dodd-Frank Act's mandates are discussed further below.

Insurance of Accounts, Assessments and Regulation by the FDIC

The Bank's deposits are insured by the DIF of the FDIC up to the standard maximum insurance amount for each deposit insurance ownership category. The basic limit on FDIC deposit insurance coverage is \$250,000 per depositor. Under the FDIA, the FDIC may terminate deposit insurance upon a finding that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations as an insured institution, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC, subject to administrative and potential judicial hearing and review processes.

Deposit Insurance Assessments. The DIF is funded by assessments on banks and other depository institutions calculated based on average consolidated total assets minus average tangible equity (defined as Tier 1 capital). As required by the Dodd-Frank Act, the FDIC has adopted a large-bank pricing assessment scheme, set a target "designated reserve ratio" (described in more detail below) of 2 percent for the DIF and, in lieu of dividends, provides for a lower assessment rate schedule when the reserve ratio reaches 2 percent and 2.5 percent. An institution's assessment rate is based on a statistical analysis of financial ratios that estimates the likelihood of failure over a three-year period, which considers the institution's weighted average CAMELS component rating, and is subject to further adjustments including those related to levels of unsecured debt and brokered deposits (not applicable to banks with less than \$10 billion in assets). At December 31, 2018, total base assessment rates for institutions that have been insured for at least five years range from 1.5 to 30 basis points applying to banks with less than \$10 billion in assets.

The Dodd-Frank Act transferred to the FDIC increased discretion with regard to managing the required amount of reserves for the DIF, or the "designated reserve ratio." Among other changes, the Dodd-Frank Act (i) raised the minimum

Table of Contents

designated reserve ratio to 1.35 percent and removed the upper limit on the designated reserve ratio, (ii) requires that the reserve ratio reach 1.35 percent by September 2020, and (iii) requires the FDIC to offset the effect on institutions with total consolidated assets of less than \$10 billion of raising the reserve ratio from 1.15 percent to 1.35 percent – which requirement was met by rules adopted by the FDIC during 2016. The FDIC adopted a DIF restoration plan, which resulted in the fund reserve ratio exceeding 1.35 percent by September 30, 2018, as discussed below. The FDIA requires that the FDIC consider the appropriate level for the designated reserve ratio on at least an annual basis.

On June 30, 2016, the reserve ratio rose to 1.17 percent, which triggered three major changes to deposit insurance assessments beginning for the third quarter of 2016: (i) the range of initial assessment rates for all institutions declined from 5 to 35 basis points to 3 to 30 basis points (which are included in the total base assessment rates in the above paragraph); (ii) surcharges equal to an annual rate of 4.5 basis points began for insured depository institutions with total consolidated assets of \$10 billion or more; and (iii) the revised assessment method described above was implemented.

At September 30, 2018, the reserve ratio was 1.36 percent. Banks with less than \$10 billion in total consolidated assets will receive credits to offset the portion of their assessments that help to raise the reserve ratio to 1.35 percent. Beginning when the reserve ratio is at or above 1.38 percent, the FDIC will automatically apply such a bank's credits to reduce its regular DIF assessment up to the entire amount of the assessment.

Regulation of the Bank and Other Subsidiaries

The Bank is subject to supervision, regulation and examination by the Virginia State Corporation Commission Bureau of Financial Institutions (VBFI) and its primary federal regulator, the FDIC. The various laws and regulations issued and administered by the regulatory agencies (including the CFPB) affect corporate practices, such as the payment of dividends, the incurrence of debt and the acquisition of financial institutions and other companies, and affect business practices and operations, such as the payment of interest on deposits, the charging of interest on loans, the types of business conducted, the products and terms offered to customers and the location of offices. Prior approval of the applicable primary federal regulator and the VBFI is required for a Virginia chartered bank or bank holding company to merge with another bank or bank holding company, or purchase the assets or assume the deposits of another bank or bank holding company, or acquire control of another bank or bank holding company. In reviewing applications seeking approval of merger and acquisition transactions, the bank regulatory authorities will consider, among other things, the competitive effect and public benefits of the transactions, the financial condition, managerial resources, capital position and any asset concentrations (including commercial real estate loan concentrations) of the constituent organizations and the combined organization, the risks to the stability of the U.S. banking or financial system, the applicant's performance record under the Community Reinvestment Act (CRA) and fair housing initiatives, the data security and cybersecurity infrastructure of the constituent organizations and the combined organization, the applicant's risk management programs and processes, and the applicant's compliance with and the effectiveness of the subject organizations in combating money laundering activities and complying with Bank Secrecy Act requirements.

Certain Transactions by Insured Banks with their Affiliates. There are statutory restrictions related to the extent bank holding companies and their non-bank subsidiaries may borrow, obtain credit from or otherwise engage in “covered transactions” with their insured depository institution (i.e., banking) subsidiaries. In general, an “affiliate” of a bank includes the bank’s parent holding company and any subsidiary thereof. However, an “affiliate” does not generally include the bank’s operating subsidiaries. The Dodd-Frank Act amended the definition of affiliate to include any investment fund for which the bank or one of its affiliates is an investment adviser. A bank (and its subsidiaries) may not lend money to, or engage in other covered transactions with, its non-bank affiliates if the aggregate amount of covered transactions outstanding involving the bank, plus the proposed transaction, exceeds the following limits: (a) in the case of any one such affiliate, the aggregate amount of covered transactions of the bank and its subsidiaries cannot exceed 10 percent of the bank’s capital stock and surplus; and (b) in the case of all affiliates, the aggregate amount of covered transactions of the bank and its subsidiaries cannot exceed 20 percent of the bank’s capital stock and surplus. “Covered transactions” are defined to include a loan or extension of credit to an affiliate, a purchase of or investment in securities issued by an affiliate, a purchase of assets from an affiliate, the acceptance of securities issued by an affiliate as collateral for a loan or extension of credit to any person or company, the issuance of a guarantee, acceptance or letter of credit on behalf of an affiliate, securities borrowing or lending transactions with an affiliate that creates a credit exposure to such affiliate, or a derivatives

Table of Contents

transaction with an affiliate that creates a credit exposure to such affiliate. Certain covered transactions are also subject to collateral security requirements.

Covered transactions as well as other types of transactions between a bank and a bank holding company must be on market terms, which means that the transaction must be conducted on terms and under circumstances that are substantially the same, or at least as favorable to the bank, as those prevailing at the time for comparable transactions with or involving nonaffiliates or, in the absence of comparable transactions, that in good faith would be offered to or would apply to nonaffiliates. Moreover, certain amendments to the BHCA provide that, to further competition, a bank holding company and its subsidiaries are prohibited from engaging in certain tying arrangements in connection with any extension of credit, lease or sale of property of any kind, or furnishing of any service.

Community Reinvestment Act. The CRA imposes on financial institutions an affirmative and ongoing obligation to meet the credit needs of their local communities, including low and moderate-income neighborhoods, consistent with the safe and sound operation of those institutions. A financial institution's efforts in meeting community credit needs are assessed based on specified factors. These factors also are considered in evaluating mergers, acquisitions and applications to open a branch or facility. In 2017, the Bank received a "Satisfactory" CRA rating.

Federal Home Loan Bank of Atlanta. The Bank is a member of the Federal Home Loan Bank (FHLB) of Atlanta, which is one of 12 regional FHLBs that provide funding to their members for making housing loans as well as for affordable housing and community development loans. Each FHLB serves as a reserve, or central bank, for the members within its assigned region. Each FHLB makes loans to members in accordance with policies and procedures established by the Board of Directors of the FHLB. As a member, the Bank must purchase and maintain stock in the FHLB. At December 31, 2018, the Bank owned \$3.2 million of FHLB stock.

Consumer Protection. The CFPB is the federal regulatory agency that is responsible for implementing, examining and enforcing compliance with federal consumer financial laws for institutions with more than \$10 billion of assets and, to a lesser extent, smaller institutions. The CFPB supervises and regulates providers of consumer financial products and services, and has rulemaking authority in connection with numerous federal consumer financial protection laws (for example, but not limited to, the Truth-in-Lending Act (TILA) and the Real Estate Settlement Procedures Act (RESPA)).

Because the Corporation and the Bank are smaller institutions (i.e., with assets of \$10 billion or less), most consumer protection aspects of the Dodd-Frank Act will continue to be applied to the Corporation by the Federal Reserve Board and to the Bank by the FDIC. However, the CFPB may include its own examiners in regulatory examinations by a smaller institution's principal regulators and may require smaller institutions to comply with certain CFPB reporting requirements. In addition, regulatory positions taken by the CFPB and administrative and legal precedents established by CFPB enforcement activities, including in connection with supervision of larger bank holding companies and

banks, could influence how the Federal Reserve Board and FDIC apply consumer protection laws and regulations to financial institutions that are not directly supervised by the CFPB. The precise effect of the CFPB's consumer protection activities on the Corporation and the Bank cannot be determined with certainty.

Mortgage Banking Regulation. In connection with making mortgage loans, the Bank and C&F Mortgage are subject to rules and regulations that, among other things, establish standards for loan origination, prohibit discrimination, provide for inspections and appraisals of property, require credit reports on prospective borrowers, in some cases restrict certain loan features and fix maximum interest rates and fees, require the disclosure of certain basic information to mortgagors concerning credit and settlement costs, limit payment for settlement services to the reasonable value of the services rendered and require the maintenance and disclosure of information regarding the disposition of mortgage applications based on race, gender, geographical distribution and income level. The Bank's mortgage origination activities are subject to the Equal Credit Opportunity Act (ECOA), TILA, Home Mortgage Disclosure Act, RESPA, and Home Ownership Equity Protection Act, and the regulations promulgated under these acts, among other additional state and federal laws, regulations and rules.

The Bank's mortgage origination activities are also subject to Regulation Z, which implements TILA. Certain provisions of Regulation Z require mortgage lenders to make a reasonable and good faith determination, based on verified and documented information, that a consumer applying for a mortgage loan has a reasonable ability to repay the loan according to its terms. Alternatively, a mortgage lender can originate "qualified mortgages", which are generally defined

Table of Contents

as mortgage loans without negative amortization, interest-only payments, balloon payments, terms exceeding 30 years, and points and fees paid by a consumer equal to or less than 3 percent of the total loan amount. Under the EGRRCPA, most residential mortgage loans originated and held in portfolio by a bank with less than \$10 billion in assets will be designated as “qualified mortgages.” Higher-priced qualified mortgages (e.g., sub-prime loans) receive a rebuttable presumption of compliance with ability-to-repay rules, and other qualified mortgages (e.g., prime loans) are deemed to comply with the ability-to-repay rules. The Corporation’s mortgage banking segment predominately originates mortgage loans that comply with Regulation Z’s “qualified mortgage” rules.

In addition to certain regulations applicable to the Bank’s mortgage origination activities, C&F Mortgage is subject to the rules and regulations of, and examination by, the Department of Housing and Urban Development (HUD), the FHA, the USDA, the VA and state regulatory authorities with respect to originating, processing and selling mortgage loans. Those rules and regulations, among other things, establish standards for loan origination, prohibit discrimination, provide for inspections and appraisals of property, require credit reports on prospective borrowers and, in some cases, restrict certain loan features and fix maximum interest rates and fees.

Consumer Financing Regulation. C&F Finance also is regulated by the VBFI and the states and jurisdictions in which it operates, and its lending operations are subject to numerous federal regulations over which the CFPB has rulemaking authority and regarding which enforcement authority is shared by the Federal Reserve Board, the FDIC, the Department of Justice and the Federal Trade Commission. The VBFI regulates and enforces laws relating to consumer lenders and sales finance agencies such as C&F Finance. Such rules and regulations generally provide for licensing of sales finance agencies; limitations on amounts, duration and charges, including interest rates, for various categories of loans; requirements as to the form and content of finance contracts and other documentation; and restrictions on collection practices and creditors’ rights.

Certain federal regulatory agencies, and in particular, the CFPB, the Federal Trade Commission, and the Federal Reserve Board, have recently become more active in investigating the products, services and operations of banks and other finance companies engaged in auto finance activities. These investigations have extended to banks that engage in indirect automobile lending, and the CFPB has released regulatory guidance that deems automobile lenders within the CFPB’s jurisdiction responsible for ECOA noncompliance even if such noncompliance is a result of dealer lending practices. As of January 1, 2019, the Corporation and C&F Finance were not subject to supervision by the CFPB.

Brokered Deposits. Section 29 of the FDIA and FDIC regulations generally limit the ability of any bank to accept, renew or roll over any brokered deposit unless it is “well capitalized” or, with the FDIC’s approval, “adequately capitalized.” However, as a result of the EGRRCPA, the FDIC is undertaking a comprehensive review of its regulatory approach to brokered deposits, including reciprocal deposits, and interest rate caps applicable to banks that are less than “well capitalized.” At this time, it is difficult to predict the impact, if any, of the FDIC’s review of brokered deposit regulations.

Other Regulations

Prompt Corrective Action. The federal banking agencies have broad powers under current federal law to take prompt corrective action to resolve problems of insured depository institutions. The extent of these powers depends upon whether the institution in question is “well capitalized,” “adequately capitalized,” “undercapitalized,” “significantly undercapitalized” or “critically undercapitalized.” These terms are defined under uniform regulations issued by each of the federal banking agencies regulating these institutions. An insured depository institution which is less than adequately capitalized must adopt an acceptable capital restoration plan, is subject to increased regulatory oversight and is increasingly restricted in the scope of its permissible activities. As of December 31, 2018, the Bank was considered “well capitalized.”

Incentive Compensation. The Federal Reserve Board, the Office of the Comptroller of the Currency (OCC) and the FDIC have issued regulatory guidance (the Incentive Compensation Guidance) intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The Federal Reserve will review, as part of the regular, risk-focused examination process, the incentive compensation arrangements of banking organizations, such as the Corporation, that are not “large, complex banking organizations.” The findings will be included in reports of examination, and deficiencies will be incorporated into the organization’s supervisory ratings. Enforcement actions may be taken against a banking organization

Table of Contents

if its incentive compensation arrangements, or related risk-management control or governance processes, pose a risk to the organization's safety and soundness and the organization is not taking prompt and effective measures to correct the deficiencies.

In 2016, the SEC and the federal banking agencies proposed rules that prohibit covered financial institutions (including bank holding companies and banks) from establishing or maintaining incentive-based compensation arrangements that encourage inappropriate risk taking by providing covered persons (consisting of senior executive officers and significant risk takers, as defined in the rules) with excessive compensation, fees or benefits that could lead to material financial loss to the financial institution. The proposed rules outline factors to be considered when analyzing whether compensation is excessive and whether an incentive-based compensation arrangement encourages inappropriate risks that could lead to material loss to the covered financial institution, and establishes minimum requirements that incentive-based compensation arrangements must meet to be considered to not encourage inappropriate risks and to appropriately balance risk and reward. The proposed rules also impose additional corporate governance requirements on the boards of directors of covered financial institutions and impose additional record-keeping requirements. The comment period for these proposed rules has closed and a final rule has not yet been published.

Confidentiality and Required Disclosures of Customer Information. The Corporation is subject to various laws and regulations that address the privacy of nonpublic personal financial information of consumers. The Gramm-Leach-Bliley Act and certain regulations issued thereunder protect against the transfer and use by financial institutions of consumer nonpublic personal information. A financial institution must provide to its customers, at the beginning of the customer relationship and annually thereafter, the institution's policies and procedures regarding the handling of customers' nonpublic personal financial information. These privacy provisions generally prohibit a financial institution from providing a customer's personal financial information to unaffiliated third parties unless the institution discloses to the customer that the information may be so provided and the customer is given the opportunity to opt out of such disclosure. In August 2018, the CFPB published a final rule that provides an exception to the requirement to deliver an annual privacy notice if a financial institution only provides nonpublic personal information to unaffiliated third parties under limited exceptions under the Gramm-Leach-Bliley Act and related regulations, and has not changed its policies and practices regarding disclosure of nonpublic personal financial information from those disclosed in the most recent privacy notice provided to the customer. The final rule was effective September 17, 2018.

In August 2018, the CFPB published its final rule to update Regulation P pursuant to the amended Gramm-Leach-Bliley Act. Under this rule, certain qualifying financial institutions are not required to provide annual privacy notices to customers. To qualify, a financial institution must not share nonpublic personal information about customers except as described in certain statutory exceptions which do not trigger a customer's statutory opt-out right. In addition, the financial institution must not have changed its disclosure policies and practices from those disclosed in its most recent privacy notice. The rule sets forth timing requirements for delivery of annual privacy notices in the event that a financial institution that qualified for the annual notice exemption later changes its policies or practices in such a way that it no longer qualifies for the exemption.

The Corporation is also subject to various laws and regulations that attempt to combat money laundering and terrorist financing. The Bank Secrecy Act requires all financial institutions to, among other things, create a system of controls designed to prevent money laundering and the financing of terrorism, and imposes recordkeeping and reporting requirements. The USA Patriot Act added regulations to facilitate information sharing among governmental entities and financial institutions for the purpose of combating terrorism and money laundering, and requires financial institutions to establish anti-money laundering programs. The Office of Foreign Assets Control (OFAC), which is a division of the Treasury, is responsible for helping to ensure that United States entities do not engage in transactions with “enemies” of the United States, as defined by various Executive Orders and Acts of Congress. If the Bank finds a name of an “enemy” of the United States on any transaction, account or wire transfer that is on an OFAC list, it must freeze such account or place transferred funds into a blocked account, and report it to OFAC.

Although these laws and programs impose compliance costs and create privacy obligations and, in some cases, reporting obligations, and compliance with all of the laws, programs, and privacy and reporting obligations may require significant resources of the Corporation and the Bank, these laws and programs do not materially affect the Bank’s products, services or other business activities.

Table of Contents

Cybersecurity. The federal banking agencies have adopted guidelines for establishing information security standards and cybersecurity programs for implementing safeguards under the supervision of a financial institution's board of directors. These guidelines, along with related regulatory materials, increasingly focus on risk management and processes related to information technology and the use of third parties in the provision of financial products and services. The federal banking agencies expect financial institutions to establish lines of defense and ensure that their risk management processes also address the risk posed by compromised customer credentials, and also expect financial institutions to maintain sufficient business continuity planning processes to ensure rapid recovery, resumption and maintenance of the institution's operations after a cyber-attack. If the Corporation or the Bank fails to meet the expectations set forth in this regulatory guidance, the Corporation or the Bank could be subject to various regulatory actions and any remediation efforts may require significant resources of the Corporation or the Bank.

In October 2016, the federal banking agencies issued proposed rules on enhanced cybersecurity risk-management and resilience standards that would apply to very large financial institutions and to services provided by third parties to these institutions. The comment period for these proposed rules has closed and a final rule has not been published. Although the proposed rules would apply only to bank holding companies and banks with \$50 billion or more in total consolidated assets, these rules could influence the federal banking agencies' expectations and supervisory requirements for information security standards and cybersecurity programs of smaller financial institutions, such as the Corporation and the Bank.

Stress Testing. As required by the Dodd-Frank Act, the federal banking agencies implemented stress testing requirements for certain financial institutions, including bank holding companies and state-chartered banks, with more than \$10 billion in total consolidated assets. The EGRRCPA subsequently raised the asset thresholds for company-run stress testing and mandatory stress testing conducted by the Federal Reserve Board to \$50 billion and \$100 billion, respectively. Although these requirements do not apply to the Company and the Bank, the federal banking agencies emphasize that all banking organizations, regardless of size, should have the capacity to analyze the potential effect of adverse market conditions or outcomes on the organization's financial condition. Based on existing regulatory guidance, the Corporation and the Bank will be expected to consider the institution's interest rate risk management, commercial real estate loan concentrations and other credit-related information, and funding and liquidity management during this analysis of adverse market conditions or outcomes.

Volcker Rule. The Dodd-Frank Act prohibits bank holding companies and their subsidiary banks from engaging in proprietary trading except in limited circumstances, and places limits on ownership of equity investments in private equity and hedge funds (the Volcker Rule). The EGRRCPA exempted all banks with less than \$10 billion in assets (including their holding companies and affiliates) from the Volcker Rule, provided that the institution has total trading assets and liabilities of five percent or less of total assets, subject to certain limited exceptions. In December 2018, the federal banking agencies invited public comment on a proposal to exclude community banks from the application of the Volcker Rule. The Corporation believes that its financial condition and its operations are not and will not be significantly affected by the Volcker Rule, amendments thereto, or its implementing regulations.

Call Reports and Examination Cycle. All institutions, regardless of size, submit a quarterly call report that includes data used by federal banking agencies to monitor the condition, performance, and risk profile of individual institutions and the industry as a whole. The EGRRCPA contained provisions expanding the number of regulated institutions eligible to use streamline call report forms. In November 2018, the federal banking agencies issued a proposal to permit insured depository institutions with total assets of less than \$5 billion that do not engage in certain complex or international activities to file the most streamlined version of the quarterly call report, and to reduce data reportable on certain streamlined call report submissions.

In December 2018, consistent with the provisions of the EGRRCPA, the federal banking agencies jointly adopted final rules that permit banks with up to \$3 billion in total assets, that received a composite CAMELS rating of “1” or “2,” and that meet certain other criteria (including not having undergone any change in control during the previous 12-month period, and not being subject to a formal enforcement proceeding or order), to qualify for an 18-month on-site examination cycle.

Table of Contents

Future Regulation

From time to time, various legislative and regulatory initiatives are introduced in Congress and state legislatures, as well as by regulatory agencies. Such initiatives may include proposals to expand or contract the powers of bank holding companies and depository institutions or proposals to substantially change the financial institution regulatory system. Such legislation could change banking statutes and the operating environment of the Corporation in substantial and unpredictable ways. If enacted, such legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions, and other financial institutions. The Corporation cannot predict whether any such legislation will be enacted, and, if enacted, the effect that it, or any implementing regulations, would have on the financial condition or results of operations of the Corporation. A change in statutes, regulations or regulatory policies applicable to the Corporation or any of its subsidiaries could have a material effect on the business of the Corporation.

Available Information

The Corporation's SEC filings are filed electronically and are available to the public over the Internet at the SEC's web site at <http://www.sec.gov>. The Corporation's SEC filings also are available through our web site at <http://www.cffc.com> under "Investor Relations/SEC Filings" as of the day they are filed with the SEC. Copies of documents also can be obtained free of charge by writing to the Corporation's secretary at P.O. Box 391, West Point, VA 23181 or by calling 804-843-2360.

ITEM 1A.RISK FACTORS

Risks Related to the Corporation's Operations

We are subject to interest rate risk and fluctuations in interest rates may negatively affect our financial performance.

Our profitability depends in substantial part on our net interest margin, which is the difference between the interest earned on loans, securities and other interest-earning assets, and interest paid on deposits and borrowings divided by total interest-earning assets. Changes in interest rates will affect our net interest margin in diverse ways, including the pricing of loans and deposits, the levels of prepayments and asset quality. We are unable to predict actual fluctuations of market interest rates because many factors influencing interest rates are beyond our control. We believe that our current interest rate exposure is manageable and does not indicate any significant exposure to interest rate changes. On December 19, 2018, the Federal Open Market Committee (FOMC) announced its fourth increase during 2018 for the federal funds rate, which is the interest rate at which depository institutions lend reserve balances to other depository institutions overnight, to 2.25 to 2.50 percent. The FOMC's monetary policy remains accommodative after this increase, thereby supporting strong labor market conditions and a sustained return to two percent inflation. Financial markets expect two more quarter-point rate increases to the federal funds rate during 2019. As short-term market interest rates have risen, however, longer-term market interest rates, including yields on U.S. treasury bonds, remain low. Therefore, we are expecting continued pressure on our net interest margin due to intense competition for loans and deposits from both local and national financial institutions. In addition, a significant portion of C&F Finance's funding is indexed to short-term interest rates and reprices as short-term interest rates change. An upward movement in interest rates may result in an unfavorable pricing disparity between C&F Finance's fixed rate loan portfolio and its adjustable-rate borrowings. Continued pressure on our net interest margin could adversely affect our results of operations.

Our business is subject to various lending and other economic risks that could adversely affect our results of operations and financial condition.

Deterioration in economic conditions could adversely affect our business. Our business is directly affected by general economic and market conditions; broad trends in industry and finance; legislative and regulatory changes; changes in governmental monetary and fiscal policies; and inflation, all of which are beyond our control. A deterioration in economic conditions, in particular a prolonged economic slowdown within our geographic region, could result in the

Table of Contents

following consequences, any of which could hurt our business materially: an increase in loan delinquencies; an increase in problem assets and foreclosures; a decline in demand for our products and services; and a deterioration in the value of collateral for loans made by our various business segments.

Adverse changes in economic conditions in our market areas or adverse conditions in an industry on which a local market in which we do business is dependent could adversely affect our results of operations and financial condition.

We provide full service banking and other financial services in the Hampton to Charlottesville corridor in Virginia. Our loan and deposit activities are directly affected by, and our financial success depends on, economic conditions within these markets, as well as conditions in the industries on which those markets are economically dependent. A deterioration in local economic conditions or in the condition of an industry on which a local market depends, such as the U.S. military and related defense contractors and industries, could adversely affect such factors as unemployment rates, business formations and expansions and housing market conditions. Adverse developments in any of these factors could result in among other things, a decline in loan demand, a reduction in the number of creditworthy borrowers seeking loans, an increase in delinquencies, defaults and foreclosures, an increase in classified and nonaccrual loans, a decrease in the value of loan collateral, and a decline in the financial condition of borrowers and guarantors, any of which could adversely affect our financial condition or business.

Our risk management framework may not be effective in mitigating risk and loss.

We maintain an enterprise risk management program that is designed to identify, quantify, monitor, report and control the risks we face. These risks include, but are not limited to, interest rate, credit, liquidity, operational, reputation, legal, compliance, economic and litigation risk. Although we assess our risk management program on an ongoing basis and make identified improvements to it, we can give no assurance that this approach and risk management framework (including related controls) will effectively mitigate the risks listed above or limit losses that we may incur. If our risk management program has flaws or gaps, or if our risk management controls do not function effectively, our results of operations, financial condition or business may be adversely affected.

Our level of credit risk is higher due to the concentration of our loan portfolio in commercial loans and in consumer finance loans.

At December 31, 2018, 43 percent of our loan portfolio consisted of commercial, financial and agricultural loans, which include loans secured by real estate for builder lines, acquisition and development and commercial development, as well as commercial loans secured by personal property. These loans generally carry larger loan balances and involve a greater degree of financial and credit risk than home equity and residential loans. The

increased financial and credit risk associated with these types of loans is a result of several factors, including the concentration of principal in a limited number of loans and to borrowers in similar lines of business, the size of loan balances, the effects of general economic conditions on income-producing properties and the increased difficulty of evaluating and monitoring these types of loans.

At December 31, 2018, 27 percent of our loan portfolio consisted of consumer finance loans that provide automobile financing for customers in the non-prime market. During periods of economic slowdown or recession, delinquencies, defaults, repossessions and losses may increase in this portfolio. Significant increases in the inventory of used automobiles during periods of economic recession may also depress the prices at which we may sell repossessed vehicles or delay the timing of these sales. Because we focus on non-prime borrowers, the actual rates of delinquencies, defaults, repossessions and losses on these loans are higher than those experienced in the general automobile finance industry and could be dramatically affected by a general economic downturn. In addition, our servicing costs may increase without a corresponding increase in our finance charge income. While we manage the higher risk inherent in loans made to non-prime borrowers through our underwriting criteria for installment sales contracts we purchase and collection methods, we cannot guarantee that these criteria or methods will ultimately provide adequate protection against these risks.

Competition from other financial institutions and financial intermediaries may adversely affect our profitability.

We face substantial competition in originating loans and in attracting deposits. Our competition in originating loans and attracting deposits comes principally from other banks, mortgage banking companies, consumer finance companies, savings associations, credit unions, brokerage firms, insurance companies and other institutional lenders and purchasers

Table of Contents

of loans. Additionally, banks and other financial institutions with larger capitalization and financial intermediaries not subject to bank regulatory restrictions have larger lending limits and are thereby able to serve the credit needs of larger clients. These institutions may be able to offer the same loan products and services that we offer at more competitive rates and prices. Increased competition could require us to increase the rates we pay on deposits or lower the rates we offer on loans, which could adversely affect our profitability.

Weakness in the secondary residential mortgage loan markets will adversely affect income from our mortgage company.

One of the components of our strategic plan is to generate significant noninterest income from C&F Mortgage, which originates a variety of residential loan products for sale into the secondary market. Interest rates, low housing inventory, cash buyers, new mortgage lending regulations and other market conditions have a direct effect on loan originations across the industry.

In addition, deterioration in economic conditions may also cause borrowers to default on their mortgages. This may result in potential repurchase or indemnification liability for C&F Mortgage on residential mortgage loans originated and sold into the secondary market in the event of claims by investors of borrower misrepresentation, fraud, early-payment default, or underwriting error, as investors attempt to minimize their losses. We cannot be assured that a prolonged period of payment defaults and foreclosures will not result in an increase in requests for repurchases or indemnifications. We attempt to maintain an appropriate allowance for indemnification losses. Although we believe our allowance for indemnification losses is adequate, this estimate is inherently subjective and indemnification losses depend on future events that are often not within our control. Therefore, we can give no assurance that established reserves will be adequate in the future. Additional provision for indemnification losses would have an adverse effect on the Corporation's net income.

Our home lending profitability could be significantly reduced if we are not able to originate and sell a high volume of mortgage loans.

The existence of an active secondary market is a critical component of C&F Mortgage's ability to generate income from the sale of loans to investors. Active secondary markets for residential mortgages depend upon the continuation of programs currently offered by government-sponsored enterprises (GSEs) (such as Fannie Mae and Freddie Mac), the FHA, the VA, the USDA, and state bond programs, which account for a substantial portion of the secondary market in residential mortgage loans. Because the largest participants in the secondary market are GSEs whose activities are governed by federal law, any future changes in laws that significantly affect the activity of the GSEs could adversely affect our mortgage company's operations. Further, in September 2008, Fannie Mae and Freddie Mac were placed into conservatorship by the U.S. government. Although to date, the conservatorship has not had a significant or adverse effect on our operations, it is unclear whether further changes or reforms would adversely affect

our operations. Although we sell loans to various third-party counterparties (i.e., investors), the ability of these aggregators to purchase loans would be limited if the GSEs cease to exist or materially limit their purchases of mortgage loans.

An increase in interest rates may reduce our mortgage revenues, which would negatively affect our noninterest income.

Our mortgage banking segment provides a significant portion of our noninterest income. We generate gains on sales of mortgage loans primarily from sales of mortgage loans that we originate. In a rising or higher interest rate environment, our originations of mortgage loans may decrease, resulting in fewer loans that are available to be sold to investors. This would result in a decrease in noninterest income. In addition, our results of operations are affected by the amount of noninterest expenses (including for personnel and systems infrastructure) associated with mortgage banking activities. During periods of reduced loan demand, our results of operations may be adversely affected to the extent that we are unable to reduce expenses commensurate with the decline in mortgage loan origination activity.

If our allowance for loan losses becomes inadequate, our results of operations may be adversely affected.

Making loans is an essential element of our business. The risk of nonpayment is affected by a number of factors, including but not limited to: the duration of the credit; credit risks of a particular customer; changes in economic and industry conditions; and, in the case of a collateralized loan, risks resulting from uncertainties about the future value of the collateral. Although we seek to mitigate risks inherent in lending by adhering to specific underwriting practices, our loans

Table of Contents

may not be repaid. We attempt to maintain an appropriate allowance for loan losses to provide for losses in our loan portfolio. Because any estimate of loan losses is necessarily subjective and the accuracy of any estimate depends on the outcome of future events that are not within our control, we face the risk that charge-offs in future periods will exceed our allowance for loan losses and that additional provision for loan losses will be required, which would have an adverse effect on the Corporation's net income. Although we believe our allowance for loan losses is adequate to absorb losses that are inherent in our loan portfolio, we cannot predict the timing or severity of such losses nor give any assurance that our allowance will be adequate in the future.

The Financial Accounting Standards Board (FASB) has issued a new accounting standard that will be effective for the Corporation for the fiscal year beginning January 1, 2020. This standard, Accounting Standards Codification (ASC) Topic 326, "Financial Instruments—Credit Losses" (ASC 326) will require the Corporation to record an allowance for credit losses that represents expected credit losses over the lifetime of all loans in its portfolio. This represents a change from the current method of providing for an allowance for loan losses that have been incurred. We have not yet determined the impact that ASC 326 will have on our consolidated financial statements and regulatory capital. While the adoption of ASC 326 will not affect ultimate loan performance or cash flows of the Corporation from making loans, the period in which expected credit losses affect net income of the Corporation may not be similar to the recognition of loan losses under current accounting guidance. If recognition of the allowance for credit losses results in a reduction of the regulatory capital of C&F Bank, the initial reduction in regulatory capital will be phased in over three years under regulatory guidance. If the reduction in regulatory capital of C&F Bank is significant, it may adversely impact the future ability of the Corporation to pay dividends to shareholders.

Our real estate lending business can result in increased costs associated with Other Real Estate Owned (OREO).

Because we originate loans secured by real estate, we may have to foreclose on the collateral property to protect our investment and may thereafter own and operate such property, in which case we are exposed to the risks inherent in the ownership of real estate. The amount that we may realize after a default is dependent upon factors outside of our control, including, but not limited to, general or local economic conditions, environmental cleanup liability, neighborhood values, interest rates, real estate tax rates, operating expenses of the mortgaged properties, and supply of and demand for properties. Certain expenditures associated with the ownership of income-producing real estate, principally real estate taxes and maintenance costs, may adversely affect the net cash flows generated by the real estate. Therefore, the cost of operating income-producing real property may exceed the rental income earned from such property, and we may have to advance funds in order to protect our investment or we may be required to dispose of the real property at a loss.

Acquisition of assets and assumption of liabilities may expose us to intangible asset risk, which could affect our result of operations and financial condition.

In connection with accounting for the acquisitions of C&F Finance Company in 2002 and CVBK in 2013, we recorded assets acquired and liabilities assumed at their fair value, which resulted in the recognition of certain

intangible assets, including goodwill. Adverse conditions in our business climate, including a significant decline in future operating cash flows, a significant change in our stock price or market capitalization, or a deviation from our expected growth rate and performance, may significantly affect the fair value of any goodwill and may trigger impairment losses, which could be materially adverse to our results of operations and financial condition.

We rely substantially on deposits obtained from customers in our target markets to provide liquidity and support growth.

Our business strategies are based on access to funding from local customer deposits. Deposit levels may be affected by a number of factors, including interest rates paid by competitors, general interest rate levels, returns available to customers on alternative investments and general economic conditions. If our deposit levels fall, we could lose a relatively low cost source of funding and our interest expense would likely increase as we obtain alternative funding to replace lost deposits. If local customer deposits are not sufficient to fund our normal operations and growth, we will look to outside sources, such as borrowings from the FHLB, which is a secured funding source. Our ability to access borrowings from the FHLB will be dependent upon whether and the extent to which we can provide collateral to secure FHLB borrowings. We may also look to federal funds purchased and brokered deposits, although the use of brokered deposits may be limited or discouraged by our banking regulators. We may also seek to raise funds through the issuance of shares of our common stock, or other equity or equity-related securities, or debt securities including subordinated notes as additional sources of

Table of Contents

liquidity. If we are unable to access funding sufficient to support our business operations and growth strategies or are only able to access such funding on unattractive terms, we may not be able to implement our business strategies which may negatively affect our financial performance.

We are subject to security and operational risks, including cybersecurity risks and cyber attacks, relating to our use of technology that could damage our reputation and our business.

In the ordinary course of business, the Corporation collects and stores sensitive data, including proprietary business information and personally identifiable information of our customers and employees, in systems and on networks. The secure processing, maintenance and use of this information is critical to operations and the Corporation's business strategy. The Corporation has invested in information security technologies and continually reviews processes and practices that are designed to protect its networks, computers and data from damage or unauthorized access. Despite these security measures, the Corporation's computer systems and infrastructure may be vulnerable to attacks by hackers or may be breached due to employee error, malfeasance or other disruptions. Security breaches, including cyber incidents, identity theft and hacking events, have been experienced by several of the world's largest financial institutions that utilize sophisticated security tools to prevent such breaches, incidents and events. Any security breach that we experience could result in legal claims, regulatory penalties, disruption in operation, remediation expenses, costs associated with customer notification and credit monitoring services, increased insurance premiums, loss of customers and business partners and damage to the Corporation's reputation. We rely on customary security systems and procedures to provide the security and authentication necessary to effect secure collection, transmission and storage of sensitive data. These systems and procedures include but are not limited to (i) regular penetration testing of our network, (ii) regular employee training programs on sound security practices and awareness of security threats, (iii) deployment of tools to monitor our network including intrusion prevention and detection systems, electronic mail spam filters, anti-virus, anti-malware, anti-ransomware, resource logging and patch management, (iv) multifactor authentication for customers using treasury management tools and employees who access our network from outside of our premises, and (v) enforcement of security policies and procedures for the additions and maintenance of user access and rights to resources. However, because the techniques used to obtain unauthorized access, or to disable or degrade systems change frequently and are often not recognized until launched against a target, the Corporation may be unable to anticipate these techniques or to implement adequate protective measures.

While most of our core data processing is conducted internally, certain key applications are outsourced to third party providers. If our third party providers encounter difficulties or if we have difficulty in communicating with such third parties, it will significantly affect our ability to adequately process and account for customer transactions, which would significantly affect our business operations and reputation. Additionally, in recent years banking regulators have focused on the responsibilities of financial institutions to supervise vendors and other third-party service providers. We may have to dedicate significant resources to manage risks and regulatory burdens presented by our relationship with vendors and third-party service providers, including our data processing and cybersecurity service providers.

Business counterparties, over which the Corporation may have limited or no control, may experience disruptions that could adversely affect the Corporation.

Multiple major U.S. retailers and a major consumer credit reporting agency have experienced data systems incursions in recent years reportedly resulting in the thefts of credit and debit card information, online account information, and other personal and financial data of hundreds of millions of individuals. Retailer incursions may affect debit cards issued and deposit accounts maintained by many banks, including C&F Bank. Although the Corporation is not aware of any instance in which the Corporation's or the Bank's systems have been breached in a retailer incursion, these events can cause the Bank to reissue a significant number of cards and take other costly steps to avoid significant theft loss to the Bank and its customers. In some cases, the Bank may be required to reimburse customers for the losses they incur. Credit reporting agency intrusions affect the Bank's customers and can require these customers and the Bank to increase account monitoring and take remedial action to prevent unauthorized account activity or access. Other possible points of intrusion or disruption outside the Corporation's and the Bank's control include internet service providers, electronic mail portal providers, social media portals, distant-server (or "cloud") service providers, electronic data security providers, telecommunications companies and smart phone manufacturers.

Table of Contents

Our business is technology dependent and an inability to invest in technological improvements may adversely affect results of operations and financial condition.

The financial services industry is undergoing rapid technological changes with frequent introductions of new technology-driven products and services, which may require substantial capital expenditures to modify or adapt existing products and services. In addition to enhancing customer service, the effective use of technology increases efficiency and results in reduced costs, although a financial institution's initial investment in a technology product or service may represent a significant incremental cost. Our future success will depend in part upon our ability to create synergies in our operations through the use of technology and to facilitate the ability of customers to engage in financial transactions in a manner that enhances the customer experience. We cannot assure that technological improvements will increase operational efficiency or that we will be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers, which may cause the Corporation to lose market share or incur additional expense.

Changes in accounting standards and management's selection of accounting methods, including assumptions and estimates, could materially affect our financial statements.

From time to time, the SEC and FASB change the financial accounting and reporting standards that govern the preparation of the Corporation's financial statements. These changes can be hard to predict and can materially affect how the Corporation records and reports its financial condition and results of operations. In some cases, the Corporation could be required to apply a new or revised standard retroactively, resulting in changes to previously reported financial results, or a cumulative charge to retained earnings. In addition, management is required to use certain assumptions and estimates in preparing our financial statements, including determining the fair value of certain assets and liabilities, among other items. If the assumptions or estimates are incorrect, the Corporation may experience unexpected material consequences.

We rely heavily on our management team and the unexpected loss of key officers may adversely affect our operations.

We believe that our growth and future success will depend in large part on the skills of our executive officers. We also depend upon the experience of the officers of our subsidiaries and on their relationships with the communities they serve. The loss of the services of one or more of these officers could disrupt our operations and impair our ability to implement our business strategy, which could adversely affect our business, financial condition and results of operations.

The success of our business strategies depends on our ability to identify and recruit individuals with experience and relationships in our primary markets.

The successful implementation of our business strategy will require us to continue to attract, hire, motivate and retain skilled personnel to develop new customer relationships as well as new financial products and services. The market for qualified management personnel is competitive, which has contributed to salary and employee benefit costs that have risen and are expected to continue to rise, which may have an adverse effect on the Corporation's net income. In addition, the process of identifying and recruiting individuals with the combination of skills and attributes required to carry out our strategy is often lengthy, and we may not be able to effectively integrate these individuals into our operations. Our inability to identify, recruit and retain talented personnel to manage our operations effectively and in a timely manner could limit our growth, which could materially adversely affect our business.

Our corporate culture has contributed to our success, and if we cannot maintain this culture as we grow, we could lose the beneficial aspects fostered by our culture, which could harm our business.

We believe that a critical contributor to our success has been our corporate culture, which focuses on building personal relationships with our customers. As our organization grows, and we are required to implement more complex organizational management structures, we may find it increasingly difficult to maintain the beneficial aspects of our corporate culture. This could negatively affect our future success.

Table of Contents

Risks Related to the Regulation of the Corporation

Compliance with laws, regulations and supervisory guidance, both new and existing, may adversely affect our business, financial condition and results of operations.

We are subject to numerous laws, regulations and supervision from both federal and state agencies. Failure to comply with these laws and regulations could result in financial, structural and operational penalties, including receivership. In addition, establishing systems and processes to achieve compliance with these laws and regulations may increase our costs and/or limit our ability to pursue certain business opportunities.

Laws and regulations, and any interpretations and applications with respect thereto, generally are intended to benefit consumers, borrowers and depositors, but not stockholders. The legislative and regulatory environment is beyond our control, may change rapidly and unpredictably and may negatively influence our revenues, costs, earnings, and capital levels. Our success depends on our ability to maintain compliance with both existing and new laws and regulations.

Future legislation, regulation and government policy could affect the banking industry as a whole, including the Corporation's business and results of operations, in ways that are difficult to predict. In addition, the Corporation's results of operations could be adversely affected by changes in the way in which existing statutes and regulations are interpreted or applied by courts and government agencies.

The Dodd-Frank Act could continue to increase our regulatory compliance burden and associated costs, place restrictions on certain products and services, and limit our future capital raising strategies.

A wide range of regulatory initiatives directed at the financial services industry have been proposed in recent years. One of those initiatives, the Dodd-Frank Act, represents a sweeping overhaul of the financial services industry regulatory environment within the United States and implements significant changes in the financial regulatory landscape, including through regulations issued pursuant to the Dodd-Frank Act, that will affect all financial institutions, including the Corporation. The Dodd-Frank Act and regulations adopted pursuant and related thereto have increased and will likely continue to increase our regulatory compliance burden and may have a material adverse effect on us, by increasing the costs associated with our regulatory examinations and compliance measures. The federal regulatory agencies, and particularly bank regulatory agencies, have been given significant discretion in drafting the Dodd-Frank Act's implementing rules and regulations, some of which have not been finalized. Consequently, the complete effect of the Dodd-Frank Act will depend on the final implementing rules and regulations, and it remains too early to fully assess the complete effect of the Dodd-Frank Act and related regulatory rulemaking processes on our business, financial condition or results of operations.

The CFPB may increase our regulatory compliance burden and could affect the consumer financial products and services that we offer.

Among the Dodd-Frank Act's significant regulatory changes, it created a new financial consumer protection agency, the CFPB. The CFPB is reshaping the consumer financial laws through rulemaking and enforcement of the Dodd-Frank Act's prohibitions against unfair, deceptive and abusive consumer finance products or practices, which are directly affecting the business operations of financial institutions offering consumer financial products or services, including the Corporation. This agency's broad rulemaking authority includes identifying practices or acts that are unfair, deceptive or abusive in connection with any consumer financial transaction, financial product or service. Although the CFPB has jurisdiction over banks with \$10 billion or greater in assets, rules, regulations and policies issued by the CFPB may also apply to the Corporation or its subsidiaries by virtue of the adoption of such policies and best practices by the Federal Reserve and the FDIC. Further, the CFPB may include its own examiners in regulatory examinations by the Corporation's primary regulators. The total costs and limitations related to this additional regulatory agency and the limitations and restrictions that will be placed upon the Corporation with respect to its consumer product and service offerings have yet to be determined in their entirety. However, these costs, limitations and restrictions are producing, and may continue to produce, significant, material effects on our business, financial condition and results of operations.

Table of Contents

Our earnings are significantly affected by the fiscal and monetary policies of the federal government and its agencies.

The policies of the Federal Reserve affect us significantly. The Federal Reserve regulates the supply of money and credit in the United States. Its policies directly and indirectly influence the rate of interest earned on loans and paid on borrowings and interest-bearing deposits and can also affect the value of financial instruments we hold. Those policies determine to a significant extent our cost of funds for lending and investing. Changes in those policies are beyond our control and are difficult to predict. Federal Reserve policies can also affect our borrowers, potentially increasing the risk that they may fail to repay their loans. For example, a tightening of the money supply by the Federal Reserve could reduce the demand for a borrower's products and services. This could adversely affect the borrower's earnings and ability to repay a loan, which could have a material adverse effect on our financial condition and results of operations.

Risks Related to the Corporation's Common Stock

Our common stock price may be volatile, which could result in losses to our investors.

Our common stock price has been volatile in the past, and several factors could cause the price to fluctuate in the future. These factors include, but are not limited to, actual or anticipated variations in earnings, changes in analysts' recommendations or projections with regard to our common stock or the markets and businesses in which we operate, operations and stock performance of other companies deemed to be our peers, and reports of trends and concerns and other issues related to the financial services industry. Fluctuations in our common stock price may be unrelated to our performance. General market declines or market volatility in the future, especially in the financial institutions sector, could adversely affect the price of our common stock, and the current market price may not be indicative of future market prices.

Future sales of our common stock by shareholders or the perception that those sales could occur may cause our common stock price to decline.

Although our common stock is listed for trading on NASDAQ Global Select Market, the trading volume in our common stock may be lower than that of other larger financial institutions. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the marketplace of willing buyers and sellers of the common stock at any given time. This presence depends on the individual decisions of investors and general economic and market conditions over which we have no control. Given the potential for lower relative trading volume in our common stock, significant sales of the common stock in the public market, or the perception that those sales may occur, could cause the trading price of our common stock to decline or to be lower than it otherwise might

be in the absence of these sales or perceptions.

Future issuances of our common stock could adversely affect the market price of our common stock and could be dilutive.

We may issue additional shares of common stock or securities that are convertible into or exchangeable for, or that represent the right to receive, shares of our common stock. Issuances of a substantial number of shares of our common stock, or the expectation that such issuances might occur, including in connection with acquisitions, could materially adversely affect the market price of the shares of our common stock and could be dilutive to shareholders. Any decision we make to issue common stock in the future will depend on market conditions and other factors, and we cannot predict or estimate the amount, timing, or nature of possible future issuances of our common stock. Accordingly, our shareholders bear the risk that future issuances of our securities will reduce the market price of the common stock and dilute their stock holdings in the Corporation.

The Corporation relies on dividends from its subsidiary for substantially all of its revenue.

The Corporation is a bank holding company that conducts substantially all of its operations through the Bank and the Bank's subsidiaries. As a result, the Corporation relies on dividends from the Bank for substantially all of its revenues. There are various regulatory restrictions on the ability of the Bank to pay dividends or make other payments to the Corporation, and the Corporation's right to participate in a distribution of assets upon the Bank's liquidation or reorganization is subject to the prior claims of the Bank's creditors. If the Bank is unable to pay dividends to the Corporation, the Corporation may not be able to service its outstanding borrowings and other debt, pay its other obligations

Table of Contents

or pay a cash dividend to the holders of the Corporation's common stock, and the Corporation's business, financial condition and results of operations may be materially adversely affected. Further, although the Corporation has historically paid cash dividends to holders of its common stock, holders of common stock are not entitled to receive dividends and regulatory or economic factors may cause the Corporation's Board of Directors to consider, among other actions, the reduction of dividends paid on the Corporation's common stock even if the Bank continues to pay dividends to the Corporation.

ITEM 1B.UNRESOLVED STAFF COMMENTS

The Corporation has no unresolved comments from the SEC staff.

ITEM 2.PROPERTIES

The following describes the location and general character of the principal offices and other materially important physical properties of the Corporation.

C&F Bank owns a building located at Eighth and Main Streets in the business district of West Point, Virginia. The building, originally constructed in 1923, has three floors totaling 15,000 square feet and houses C&F Bank's Main Office.

C&F Bank owns a building located at 3600 LaGrange Parkway in Toano, Virginia. The building was acquired in 2004 and has 85,000 square feet. Portions of the building have since been renovated in order to house C&F Bank's operations center, which consists of C&F Bank's loan, deposit and administrative functions and staff.

C&F Bank owns a building located at 1400 Alverser Drive in Midlothian, Virginia. The building provides space for a branch office of C&F Bank and for a C&F Mortgage branch office, as well as C&F Mortgage's main administrative offices. This two-story building has 25,000 square feet and was constructed in 2001.

C&F Bank owns 22 other retail banking branch locations and leases two retail banking branch locations and three regional commercial lending offices in Virginia.

C&F Mortgage's Newport News and Williamsburg loan production offices are located on the second floor of C&F Bank's Newport News and Williamsburg branch buildings, respectively. In addition, C&F Mortgage has 14 loan production offices leased from nonaffiliates including 8 in Virginia, two in Maryland, two in North Carolina, one in South Carolina and one in West Virginia.

The Hampton office of C&F Finance is located on the second floor of C&F Bank's Hampton branch building. C&F Finance leases approximately 17,000 square feet of office space from an unrelated third party in Richmond, Virginia, which provides space for C&F Finance's headquarters and its loan and administrative functions and staff. C&F Finance has one leased office in Tennessee.

All of the Corporation's properties are in good operating condition and are adequate for the Corporation's present and anticipated future needs.

ITEM 3.LEGAL PROCEEDINGS

The Corporation and its subsidiaries may be involved in certain litigation matters arising in the ordinary course of business. Although the ultimate outcome of these matters cannot be ascertained at this time, and the results of legal proceedings cannot be predicted with certainty, we believe, based on current knowledge, that the resolution of any such matters arising in the ordinary course of business will not have a material adverse effect on the Corporation.

ITEM 4.MINE SAFETY DISCLOSURES

None.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Corporation's common stock is listed for trading on the NASDAQ Global Select Market of the NASDAQ Stock Market under the symbol "CFFI." As of February 22, 2019, there were approximately 2,000 shareholders of record. As of that date, the closing price of our common stock on the NASDAQ Global Select Stock Market was \$51.73.
