(Registrant's Telephone Number, Including Area Code)

Edgar Filing: MARIN SOFTWARE INC - Form 10-Q

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by checkmark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter time period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer  (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

As of October 31, 2015, the registrant had 37,082,459 shares of common stock outstanding.

Marin Software Incorporated

Notes to Condensed Consolidated Financial Statements

(dollars and share numbers in thousands, except per share data)

## 1. Summary of Business and Significant Accounting Policies

Marin Software Incorporated (the “Company”) was incorporated in Delaware in March 2006. The Company provides a leading cross-channel performance advertising cloud platform for search, display and social advertising channels, offered as an integrated software-as-a-service, or SaaS, solution. The Company’s platform enables digital marketers to improve financial performance, realize efficiencies and time savings, and make better business decisions. The Company’s corporate headquarters are located in San Francisco, California, and the Company has additional offices in the following locations: New York, Chicago, Austin, Portland, London, Dublin, Hamburg, Paris, Tokyo, Sydney and Shanghai.

### Basis of Presentation and Consolidation

The accompanying unaudited condensed consolidated financial statements and condensed footnotes have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments, consisting of only normal recurring items, considered necessary for fair statement have been included. The results of operations for the three and nine months ended September 30, 2015, are not necessarily indicative of the results to be expected for the year ended December 31, 2015, or for other interim periods or for future years.

The accompanying unaudited condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated on consolidation. The condensed consolidated balance sheet as of December 31, 2014, is derived from audited financial statements as of that date but does not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2014 filed with the Securities and Exchange Commission (“SEC”) on February 20, 2015.

### Recent Accounting Pronouncements

In September 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments. The new standard eliminates the requirement for an acquirer to retrospectively adjust provisional amounts recorded in a business combination to reflect new information about the facts and circumstances that existed as of the acquisition date and that, if known, would have affected measurement or recognition of amounts initially recognized. As an alternative, the standard requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. It requires that the acquirer record, in the financial statements of the period in which adjustments to provisional amounts are determined, the effect on earnings of changes in depreciation, amortization or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date.

The new standard is effective prospectively for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years, with early adoption permitted. The Company is currently evaluating the impact of this ASU on the consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15, Disclosures of Uncertainties About an Entity's Ability to Continue as a Going Concern. The new standard provides guidance around management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of this ASU on the consolidated financial statements.

In June 2014, the FASB issued ASU 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. The guidance requires that a performance target that affects vesting and could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance as it relates to such awards. This guidance is effective for the Company in its first quarter of fiscal year ending December 31, 2017. The Company is currently evaluating the impact of the adoption of this ASU on the consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which provides guidance for revenue recognition. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates when compared with the current guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. This guidance will be effective for the Company in the first quarter of its fiscal year ending December 31, 2018. Early adoption is permitted for the Company in the first quarter of its fiscal year ending December 31, 2017. The Company is currently evaluating the impact of the adoption of this ASU on the consolidated financial statements.

#### Cash and Cash Equivalents

The Company considers all highly liquid investments with an original or remaining maturity from the Company's date of purchase of 90 days or less to be cash equivalents. Deposits held with financial institutions are likely to exceed the amount of insurance on these deposits. Cash equivalents consist of money market funds, which are readily convertible into cash and are stated at cost, which approximates fair market value. Cash equivalents were \$25,553 and \$58,027 as of September 30, 2015, and December 31, 2014, respectively.

#### Fair Value of Financial Instruments

The Company's financial instruments, including cash equivalents, accounts receivable, accounts payable and accrued expenses are carried at cost, which approximates fair value because of the short-term nature of those instruments. Based on borrowing rates available to the Company for loans with similar terms and maturities, the carrying value of borrowings approximates fair value (Level 2 within the fair value hierarchy).

The Company measures and reports certain financial assets at fair value on a recurring basis, including its investments in money market funds. The fair value hierarchy prioritizes the inputs into three broad levels:

Level 1 Inputs are unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument.

Level 3 Inputs are unobservable inputs based on the Company's assumptions.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The Company's cash equivalents as of September 30, 2015, and December 31, 2014, consisted of money market funds with original maturity dates of less than three months from the date of their respective purchase. Cash equivalents are classified as Level 1. The fair value of the Company's money market funds approximated amortized cost and, as such, there were no unrealized gains or losses on money market funds as of September 30, 2015, and December 31, 2014.

#### Allowance for Doubtful Accounts and Revenue Credits

The allowance for doubtful accounts reflects the Company's best estimate of probable losses inherent in the Company's receivables portfolio determined on the basis of historical experience, specific allowances for known troubled accounts and other currently available evidence. The Company has not experienced significant credit losses from its accounts receivable. The Company performs a regular review of its customers' payment histories and associated credit risks and it does not require collateral from its customers. Certain contracts with advertising agencies contain sequential liability provisions, whereby the agency does not have an obligation to pay the Company until payment is received from the agency's customers. In these circumstances, the Company evaluates the credit worthiness of the agency's customers, in addition to the agency itself.

From time to time, the Company provides credits to customers and an allowance is made based on historical credit activity. As of September 30, 2015, and December 31, 2014, the Company recorded an allowance for potential customer credits in the amount of \$1,531 and \$508, respectively.

## Property and Equipment

Property and equipment are stated at historical cost less accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line method over the estimated useful lives of the related assets.

The useful lives of the property and equipment are as follows:

Computer equipment	3 to 5 years
Office equipment, furniture and fixtures	3 to 5 years
Software	3 years
Leasehold improvements	Shorter of useful life or lease term

Upon retirement or sale, the cost and related accumulated depreciation are removed from the balance sheet and the resulting gain or loss is reflected in operations. Major additions and improvements are capitalized while repairs and maintenance that do not extend the life of the asset are charged to operations as incurred. Depreciation and amortization expense is allocated to both cost of revenues and operating expenses.

## Internally Developed Software

Costs incurred in the development phase are capitalized and amortized over the product's estimated useful life, which is three years. The Company expenses all costs incurred that relate to planning and post implementation phases of development. Capitalized costs related to internally developed software under development are treated as construction in progress until the program, feature or functionality is ready for its intended use, at which time amortization commences. The Company capitalized internally developed software costs of \$1,683 and \$1,035 during the three months ended September 30, 2015 and 2014, respectively, and \$4,107 and \$2,381 during the nine months ended September 30, 2015 and 2014, respectively. Amortization of capitalized costs related to internally developed software for the three months ended September 30, 2015 and 2014, was \$683 and \$480, respectively, and for the nine months ended September 30, 2015 and 2014, was \$1,850 and \$1,390, respectively. As of September 30, 2015, and December 31, 2014, unamortized internally developed software costs totaled \$7,734 and \$5,476, respectively. Amortization of internally developed software is reflected in cost of revenues. Costs associated with minor enhancements and maintenance are expensed as incurred.

## Goodwill, Intangible Assets and Impairment Assessments

Goodwill represents the excess of the purchase price in a business combination over the fair value of net tangible and intangible assets acquired. Intangible assets that are not considered to have an indefinite useful life are amortized over their useful lives, which generally range from two to six years. Estimated remaining useful lives of purchased intangible assets are evaluated to assess whether events or changes in circumstances warrant a revision to the remaining periods of amortization.

In addition, we evaluate our goodwill for impairment at least annually or more frequently if events or changes in circumstances indicate that these assets may be impaired. No goodwill impairment has been identified in any of the periods presented.

## Impairment of Long-Lived Assets

The Company evaluates long-lived assets, excluding goodwill, for potential impairment whenever adverse events or changes in circumstances or business climate indicate that expected undiscounted future cash flows related to such long-lived assets may not be sufficient to support the net book value of such assets. An impairment exists when the carrying value of a long-lived asset exceeds its fair value. An impairment loss is recognized only if the carrying value of a long-lived asset is not recoverable and exceeds its fair value. The carrying value of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. There were no such impairment losses during the periods presented.

#### Operating Leases

The Company's operating lease agreements include provisions for tenant improvement allowances, certain rent holidays and escalations in the base price of the rent payment. The Company defers tenant improvement allowances and amortizes the balance as a reduction to rent expense over the lease term. The Company records rent holidays and rent escalations on a straight-line basis over the lease term. Deferred rent is included in accrued expenses and other current liabilities, as well as other long-term liabilities in the accompanying unaudited condensed consolidated balance sheets.

## Revenue Recognition

The Company generates revenues principally from subscriptions either directly with advertisers or with advertising agencies to its platform for the management of search, display and social advertising. The Company's subscription agreements are generally one year or longer in length. The Company's subscription fee under most contracts is variable based on the value of the advertising spend that the Company's advertisers manage through the Company's platform and is generally invoiced on a monthly basis. Contracts with direct advertisers and certain contracts with advertising agencies also include a minimum monthly fee that is payable over the duration of the contract. The Company's customers do not have the right to take possession of the software supporting the application service at any time, nor do the arrangements contain general rights of return. The Company commences revenue recognition for both direct advertisers and advertising agencies when all of the following conditions are met:

- persuasive evidence of an arrangement exists;
- the Company's platform is made available to the customer;
- the fee is fixed or determinable; and
- collection is reasonably assured.

The Company recognizes the total minimum fee for both direct advertisers and advertising agencies, where applicable, over the duration of the contract, commencing on the date that the Company's platform is made available to the customer, provided revenues recognized do not exceed amounts that are invoiced and due. The variable fee, which is based on a percentage of the value of the advertising spend managed through the Company's platform, is recognized once the amount is fixed or determinable, which is generally on a monthly basis concurrent with the issuance of the customer invoice. Signed contracts are used as evidence of an arrangement. The Company assesses collectability based on a number of factors such as past collection history with the customer and creditworthiness of the customer. Certain agreements with advertising agencies also contain sequential liability provisions, which provide that the agency has no obligation to pay the Company until the agency receives payment from its customers. In these circumstances, the Company evaluates the credit worthiness of the agency's customers, in addition to the agency itself, to conclude whether or not collectability is reasonably assured. If the Company determines collectability is not reasonably assured, the Company defers the revenue recognition until collectability becomes reasonably assured.

The Company applies the authoritative accounting guidance regarding revenue recognition for arrangements with multiple deliverables. Professional services and training, when sold with the Company's platform subscription services, are accounted for separately when those services have standalone value. In determining whether professional services and training services can be accounted for separately from subscription services, the Company considers the following factors: availability of the services from other vendors; the nature of the services; the dependence of the subscription services on the customer's decision to buy the professional services; and whether the Company sells the Company's subscription services without professional services. If the deliverables have stand-alone value, the Company accounts for each deliverable separately and revenues are recognized for the respective deliverables as they are delivered. If one or more of the deliverables do not have stand-alone value, the deliverables that do not have stand-alone value are combined with the final deliverables within the arrangement and treated as a single unit of accounting. Revenues for arrangements treated as a single unit of accounting are recognized over the period of the contract commencing upon delivery of the final deliverable. As of September 30, 2015, the Company did not have stand-alone value for the professional services and training services. This is because the Company includes professional services and training services with the Company's subscription services and those services are not available from other vendors.

## Cost of Revenues

Cost of revenues primarily consists of costs related to hosting the Company's cloud-based platform, providing implementation and ongoing customer support, data communications expenses, salaries and benefits of operations and

support personnel, software license fees, costs associated with website development activities, allocated overhead, amortization expense associated with capitalized internally developed software and intangible assets and property and equipment depreciation.

#### Stock-Based Compensation

Stock-based compensation is measured at grant date based on the fair value of the award and is expensed on a straight-line basis over the requisite service period.

Fair values of stock option awards are determined on the date of grant using an option-pricing model. The Company has selected the Black-Scholes option pricing model to estimate the fair value of its stock option awards to employees and non-employees. In applying the Black-Scholes option pricing model, the Company's determination of the fair value of the stock option award on the date of grant is affected by the Company's fair value of its common stock, as well as assumptions regarding a number of subjective

variables. These variables include, but are not limited to, the Company's expected stock price volatility and the optionholders' actual and projected stock option exercise and employment termination behaviors.

For stock option awards with time-based vesting, the Company recognizes stock-based compensation expense over the requisite service period using the straight-line method, based on awards ultimately expected to vest. The Company estimates future forfeitures at the date of grant and revises the estimates, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Restricted stock units ("RSUs") are measured based on the fair market values of the underlying common stock on the dates of grant. Shares of common stock are issued on the vesting dates. For awards with time-based vesting, the Company recognizes stock-based compensation expense over the requisite service period using the straight-line method, based on awards ultimately expected to vest. The Company estimates future forfeitures at the date of grant and revises the estimates, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Stock options issued to non-employees such as consultants are recorded at their fair value on the measurement date. The measurement of stock-based compensation is subject to periodic adjustment as the underlying equity instruments vest. The fair value of options granted to consultants is expensed when vested, and such vested outstanding options are recognized as liabilities on the accompanying unaudited condensed consolidated balance sheets. Non-employee stock-based compensation expense was not material for all periods presented.

See Note 9 for further information.

## 2. Business Combinations

The Company accounts for business combinations using the acquisition accounting method in which the tangible and identifiable assets and liabilities of each acquired company are recorded at their respective fair values as of each acquisition date, including an amount for goodwill representing the difference between the respective purchase price and fair values of identifiable net assets. The goodwill arising from each of the Company's two acquisitions described below is primarily attributable to the value of the synergies expected to arise from combining the technology and operations of the Company and the acquired entity and is not expected to be deductible for tax purposes.

Best estimates and assumptions are used in the purchase price allocation process to accurately value assets acquired and liabilities assumed at the business combination date. These estimates and assumptions are inherently uncertain and subject to further refinement. As a result, during the measurement period, which may be up to one year from the business combination date, the Company may record adjustments to the assets acquired and liabilities assumed with the corresponding adjustment to goodwill. After the measurement period, adjustments are recorded in the operating results in the period in which the adjustments were determined.

### SocialMoov S.A.S.

On February 12, 2015, pursuant to the terms of a Share Purchase Agreement, the Company acquired all outstanding shares of capital stock of SocialMoov S.A.S. ("SocialMoov"), with SocialMoov surviving as a wholly-owned subsidiary of the Company. Based in Paris, France, SocialMoov is a provider of social advertising tools for advertisers and agencies.

The fair value of assets acquired and liabilities assumed was recorded based on a preliminary valuation and the Company's estimates and assumptions are subject to change within the measurement period. The primary areas of the purchase price allocation that are not yet finalized are related to the fair values of intangible assets acquired and residual goodwill. The results of operations and the preliminary fair values of the assets acquired and liabilities assumed have been included in the accompanying unaudited condensed financial statements since the acquisition date. Revenue from SocialMoov was not material for the three and nine months ended September 30, 2015.

The total purchase price for the acquisition was \$13,195, which consisted of 636 shares of the Company's common stock valued at \$4,337 upon the closing date using the Company's closing date stock price immediately preceding the acquisition, and \$8,858 in cash. Of the cash consideration paid, \$1,894 is held in escrow to secure indemnification obligations of the shareholders of SocialMoov to the Company following the closing, which has not been released as of the filing date of this Quarterly Report on Form 10-Q.

In addition, the Company will issue 927 shares of common stock at future dates as defined in the Share Purchase Agreement, valued at \$6,487 upon the closing date of the acquisition using the Company's closing date stock price immediately preceding the acquisition, to existing shareholders of SocialMoov that are also employees of SocialMoov in connection with the acquisition, which are conditioned upon such employees' continuous employment with the Company. These shares have been excluded from the

purchase consideration and will be recognized as post-acquisition stock-based compensation expense. The Company also granted RSUs representing 219 shares of common stock, valued at \$959, with time-based vesting to employees of SocialMoov that continued employment with SocialMoov subsequent to the acquisition. The Company recognizes compensation expense equal to the grant date fair value of the common stock or stock-based awards on a straight-line basis over the employee's requisite service period.

The following table summarizes the fair values of tangible assets acquired, liabilities assumed, intangible assets and residual goodwill from the acquisition of SocialMoov (in thousands except years):

	Estimated Fair Value	Estimated Useful Life
Tangible assets acquired	\$ 2,889	N/A
Liabilities assumed (see Note 6)	(3,759 )	N/A
Developed technology	3,800	5 years
Customer relationships	2,080	4 years
Tradename	260	3 years
Goodwill	7,925	Indefinite
Total purchase price	\$ 13,195	

NowSpots, Inc.

On June 2, 2014, the Company acquired NowSpots, Inc. (which conducted business as Perfect Audience ("Perfect Audience")), which provides audience retargeting in the display and social advertising channels. The total purchase price for the acquisition was \$16,470, which consisted of 1,119 shares of the Company's common stock valued upon the closing date of the acquisition using the Company's closing date stock price immediately preceding the acquisition, and \$5,275 in cash. In addition, the Company issued 630 shares of common stock, valued at \$6,301 upon the closing date of the acquisition using the Company's closing date stock price immediately preceding the acquisition, to existing Perfect Audience employees in connection with the acquisition, which are conditioned upon such employees' continuous employment with the Company. These shares have been excluded from the purchase consideration and will be recognized as post-acquisition stock-based compensation expense.

### 3. Restructuring Activities

During the third quarter of fiscal 2015, the Company executed organizational restructurings (the "2015 Restructuring Plans") in order to improve cost efficiencies, increase the investment in its cloud-based platform and realign its sales and marketing operations. The total estimated restructuring related expenses associated with the 2015 Restructuring Plans, consisting primarily of severance costs, are \$1,214, and will be recorded to cost of revenues or operating expenses, as applicable, within the Company's condensed consolidated statements of operations as they are incurred. The Company recorded \$1,081 of restructuring related expenses in connection with the 2015 Restructuring Plans for the three and nine months ended September 30, 2015, and the Company expects to incur and pay the majority of the estimated remaining amount of \$133 by the end of fiscal 2016.

As of September 30, 2015, approximately \$636 in restructuring related expenses associated with the 2015 Restructuring Plans remained unpaid and included primarily in accrued expenses and other current liabilities on the Company's condensed consolidated balance sheets.

#### 4. Balance Sheet Components

The following table shows the components of property and equipment as of the dates presented:

	September 30, 2015	December 31, 2014
Computer equipment	\$ 26,218	\$ 21,422
Software	15,140	11,022
Office equipment	975	795
Furniture, fixtures and leasehold improvements	6,178	2,092
	48,511	35,331
Less: Accumulated depreciation and amortization	(25,644 )	(19,057 )
	\$ 22,867	\$ 16,274

Depreciation and amortization of internally developed software for the nine months ended September 30, 2015 and 2014, was \$7,016 and \$5,535, respectively.

The following table shows the components of accrued expenses and other current liabilities as of the dates presented:

	September 30, 2015	December 31, 2014
Accrued salary and payroll related expenses	\$ 5,773	\$ 6,017
Accrued accounts payable	4,185	3,709
Customer advances	1,399	1,366
Income tax payable	660	377
Sales and use tax payable	368	263
Deferred tax liabilities	223	—
Deferred rent and other	414	321
	\$ 13,022	\$ 12,053

## 5. Goodwill and Intangible Assets

The goodwill balance as of September 30, 2015, totaling \$19,432 was the result of the business combinations disclosed in Note 2 of these unaudited condensed consolidated financial statements. The activity for the nine months ended September 30, 2015 consisted of the following:

Balance at December 31, 2014	\$ 11,527
Add: Goodwill from SocialMoov acquisition	7,925
Less: Other adjustments to goodwill	(20 )
Balance at September 30, 2015	\$ 19,432

Intangible assets, excluding goodwill, consisted of the following as of the dates presented:

	September 30, 2015	December 31, 2014	Estimated Useful Life
Developed technology	\$ 9,910	\$ 6,110	5-6 years

Edgar Filing: MARIN SOFTWARE INC - Form 10-Q

Customer relationships	3,370	1,290	4 years
Non-compete agreements and tradenames	1,390	1,130	2-3 years
	14,670	8,530	
Less: accumulated amortization	(3,439 )	(1,131 )	
	\$ 11,231	\$ 7,399	

Amortization expense of intangible assets was \$826 and \$485 for the three months ended September 30, 2015 and 2014, respectively, and \$2,308 and \$646 for the nine months ended September 30, 2015 and 2014, respectively.

Future estimated amortization of intangible assets as of September 30, 2015, is presented below:

Remaining three months of 2015	\$826
Year ending December 31, 2016	3,080
Year ending December 31, 2017	2,850
Year ending December 31, 2018	2,537
Year ending December 31, 2019 and thereafter	1,938
	\$11,231

## 6. Debt

In February 2013, the Company entered into a capital lease arrangement with an equipment manufacturer to finance the acquisition of computer equipment. The lease has an effective annual interest rate of 6.0% and is repayable in 36 consecutive equal monthly installments of principal and interest. In August 2015, the Company entered into a separate capital lease arrangement with the same equipment manufacturer to finance the acquisition of additional computer equipment. This lease has an effective annual interest

rate of 5.8% and is repayable in 48 consecutive equal monthly installments of principal and interest. At the end of the lease periods of both leases, the Company has the option to purchase the underlying equipment at the estimated fair market value or for a nominal amount. As of September 30, 2015 and December 31, 2014, the net book value of the equipment under the capital leases was \$2,448 and \$1,439, respectively, and the remaining principal balance payable was \$2,656 and \$1,542, respectively.

In December 2014, the Company entered into a standby letter of credit for \$1,293 with Silicon Valley Bank in connection with the non-cancelable lease for the Company's corporate headquarters in San Francisco. This standby letter of credit does not impact the balances available for withdrawal under the revolving credit facility or other facilities available to the Company. As of September 30, 2015 and December 31, 2014, no amount was drawn on this standby letter of credit.

In connection with the acquisition of SocialMoov on February 12, 2015 (see Note 2), the Company assumed outstanding debt totaling approximately \$1,043, which consisted primarily of individual loans payable to (a) an agency of the French government, (b) a French public-sector investment bank and (c) a French private-sector financial institution. As of September 30, 2015, these loans were fully repaid.

In July 2015, the Company entered into an amendment to its existing loan and security agreement pursuant to which Silicon Valley Bank agreed to increase the revolving credit facility of up to the lesser of \$20,000 or 80% of the Company's eligible accounts receivable. Also, the expiration date of the revolving credit facility was extended to July 31, 2017, and the annual interest rate was amended to (a) the prime rate or (b) the London interbank offered rate then in effect, plus a margin of 2.75%, payable on a monthly basis. The amendment contains affirmative and negative covenants, including covenants related to the delivery of financial and other information, the maintenance of certain financial covenants, as well as limitations on dispositions, changes in business or management, mergers or consolidations, dividends and other corporate actions. No amounts were outstanding pursuant to the revolving credit facility as of September 30, 2015 and December 31, 2014.

The maturities of all outstanding debt, including the capital lease arrangements, as of September 30, 2015, are as follows:

Year ending	
2015	\$ 842
2016	1,099
2017	472
2018	500
2019	307
	3,220
Less:	
Current portion	(1,826)
Discount on long-term debt	(48 )
Noncurrent portion of debt	\$ 1,346

## 7. Common Stock

## Edgar Filing: MARIN SOFTWARE INC - Form 10-Q

As of September 30, 2015, and December 31, 2014, the Company's certificate of incorporation authorizes the issuance of 500,000 shares of \$0.001 par value common stock. Reserved shares of common stock are as follows:

	September 30, 2015	December 31, 2014
Options or RSUs available for future grant under stock option plans	3,658	3,154
Options outstanding under stock option plans	6,400	6,376
RSUs outstanding under stock option plans	1,334	769
Shares available for future issuance under ESPP	930	1,005
Shares to be issued in connection with acquisition of SocialMoov	927	—
	13,249	11,304

### 8. Equity Award Plans

In April 2006, the Company's Board of Directors (the "Board") adopted and the stockholders approved the 2006 Stock Option Plan ("2006 Plan"). The 2006 Plan provides for the grant of incentive stock options under the federal tax laws and non-statutory stock options. Only employees may receive incentive stock options, but non-statutory stock options may be granted to employees, non-

employee directors and consultants. The stock options are exercisable at a price equal to the market value of the underlying shares of common stock on the date of the grant as determined by the Company's Board. The term of options granted under the 2006 Plan may not exceed ten years. Certain options are eligible for exercise prior to vesting. Exercised but unvested shares of common stock are subject to repurchase by the Company at the initial exercise price. The proceeds from the shares of common stock subject to repurchase are classified as a liability and reclassified to equity as the shares vest. Under the 2006 Plan's early exercise feature, the Company had the right to repurchase 25 and 85 shares of common stock as of September 30, 2015, and December 31, 2014, respectively. The Company records cash received from the exercise of unvested stock options as a long-term liability, as well as the fair value of vested outstanding options to non-employee consultants. As of September 30, 2015, and December 31, 2014, \$275 and \$826, respectively, has been recorded as a long-term liability on the accompanying unaudited condensed consolidated balance sheets.

In February 2013, the Board and stockholders approved the 2013 Equity Incentive Plan ("2013 Plan"), under which 4,500 shares of common stock were originally reserved for issuance. Additionally, all reserved and unissued shares under the 2006 Plan at the time the 2013 Plan became effective are eligible for issuance under the 2013 Plan. The 2013 Plan became effective on March 21, 2013, at which time the Company ceased to grant equity awards under the 2006 Plan. The 2013 Equity Incentive Plan authorizes the award of stock options, restricted stock awards, stock appreciation rights, RSUs, performance awards and stock bonuses to the Company's employees, directors, consultants, independent contractors and advisors. On January 1 of each of the first ten calendar years through 2023, the number of shares of common stock reserved under the 2013 Equity Incentive Plan will automatically increase by an amount equal to 5% of the total outstanding shares as of immediately preceding December 31, or such lesser number of shares as determined by the Company's Board of Directors. Pursuant to terms of the 2013 Plan, the shares available for issuance increased by approximately 1,792 shares of common stock on January 1, 2015.

### Stock Options

A summary of stock option activity under the 2006 Plan and 2013 Plan is as follows:

	Options Outstanding		Weighted	
	Number	Weighted	Average	Aggregate
	of	Average	Remaining	
	Shares	Exercise	Contractual	Intrinsic
		Price Per Share	Term	Value
			(in Years)	
Balances at December 31, 2014	6,376	\$ 7.99	7.82	\$ 9,697
Options granted	2,141	5.99	7.82	
Options exercised	(579 )	1.91	—	
Options forfeited and cancelled	(1,538)	8.87	—	
Balances at September 30, 2015	6,400	7.66	7.52	\$ 869
Options exercisable	2,891	\$ 7.65	5.56	\$ 869
Options vested	2,708	\$ 7.49	5.46	\$ 869
Options vested and expected to vest	6,068	\$ 7.67	7.43	\$ 869

### RSUs

Edgar Filing: MARIN SOFTWARE INC - Form 10-Q

A summary of RSUs granted and unvested under the 2013 Plan as of September 30, 2015, is as follows:

	RSUs Outstanding Number of Shares	Weighted Average Grant Date Fair Value Per Unit
Granted and unvested at December 31, 2014	769	\$ 9.36
RSUs granted	1,137	5.75
RSUs vested	(121 )	10.04
RSUs cancelled and withheld to cover taxes	(451 )	7.92
Granted and unvested at September 30, 2015	1,334	

## Employee Stock Purchase Plan

In February 2013, the Board and stockholders approved the 2013 Employee Stock Purchase Plan (“2013 ESPP”), under which 1,000 shares of common stock were originally reserved for issuance. The 2013 ESPP became effective on March 22, 2013. The 2013 ESPP provides generally for six-month purchase periods and the purchase price for shares of common stock purchased under the 2013 Employee Stock Purchase Plan will be 85% of the lesser of the fair market value of the common stock on (i) the first trading day of the applicable offering period and (ii) the last trading day of each purchase period in the applicable offering period. On January 1 of each of the first 10 calendar years following the first offering date, the number of shares reserved under the 2013 Employee Stock Purchase Plan will automatically increase by an amount equal to 1% of the total outstanding shares as of immediately preceding December 31, but not to exceed 700 shares. Pursuant to terms of the 2013 ESPP, the shares available for issuance increased by approximately 358 shares on January 1, 2015. During the three and nine months ended September 30, 2015, 105 shares were issued under the 2013 ESPP. During the three and nine months ended September 30, 2014, 90 shares were issued under the 2013 ESPP.

## 9. Stock-Based Compensation

For stock-based awards granted by the Company, stock-based compensation expense is measured at grant date based on the fair value of the award and is expensed over the requisite service period. The Company recorded stock-based compensation of \$3,606 and \$2,916 for the three months ended September 30, 2015 and 2014, respectively, and \$12,040 and \$6,353 for the nine months ended September 30, 2015 and 2014, respectively.

### Stock Options

The Company uses the Black-Scholes option pricing model to estimate the fair value of options. This model requires the input of highly subjective assumptions including the expected volatility, risk-free interest rate and the expected life of options. The Company used the following assumptions:

	Three Months Ended September 30, 2015		Nine Months Ended September 30, 2014	
Dividend yield	—	—	—	—
Expected volatility	44.3 %	51.3 %	49.2 %	51.3 %
Risk-free interest rate	1.76 %	1.88 %	1.74 %	1.92 %
Expected life of options (in years)	6.25	6.25	6.25	6.26
Forfeiture rate	7.0 %	7.0 %	7.0 %	7.0 %

As the Company has limited historical option exercise data, the expected term of the stock options granted to employees was calculated based on the simplified method. Under the simplified method, the expected term is equal to the average of an option’s weighted-average vesting period and its contractual term. Pursuant to the SEC Staff Accounting Bulletin (“SAB”) No. 110, the Company is permitted to continue using the simplified method until

sufficient information regarding exercise behavior, such as historical exercise data or exercise information from external sources, becomes available. The Company estimates the expected volatility of its common stock on the date of grant based on the historical stock volatilities of similar publicly-traded entities over a period equal to the expected terms of the options, as the Company does not have sufficient trading history to use the volatility of its own common stock. The Company has no history or expectation of paying cash dividends on its common stock. The risk-free interest rate is based on the U.S. Treasury yield for a term consistent with the expected life of the options in effect at the time of grant.

Cash proceeds from the exercise of stock options were \$1,107 and \$1,977 during the nine months ended September 30, 2015 and 2014, respectively.

Compensation expense is recognized ratably over the requisite service period. As of September 30, 2015, there was \$11,710 of unrecognized compensation cost related to options, which is expected to be recognized over a weighted-average period of 2.7 years.

#### Restricted Stock and RSUs

As of September 30, 2015, there was \$13,273 of unrecognized compensation cost related to restricted stock and RSUs, which is expected to be recognized over a weighted-average period of 2.1 years. The Company uses the fair market value of the underlying common stock on the dates of grant to determine the fair value of restricted stock and RSUs. Stock-based compensation expense related to these awards is recognized on a straight-line basis over the service period of the award for the estimated number of shares that are ultimately expected to vest.

## Employee Stock Purchase Plan

The Company estimates the fair value of purchase rights under the ESPP using the Black-Scholes valuation model. The fair value of each purchase right under the ESPP was estimated on the date of grant using the Black-Scholes option valuation model and the straight-line attribution approach with assumptions substantially similar to those used for the valuation of our stock option awards.

## 10. Income Taxes

The Company's quarterly provision for income taxes is based on an estimated effective annual income tax rate. The Company's quarterly provision for income taxes also includes the tax impact of certain unusual or infrequently occurring items, if any, including changes in judgment about valuation allowances and effects of changes in tax laws or rates, in the interim period in which they occur.

Income tax expense for the three and nine months ended September 30, 2015, was \$300 and \$674 on pre-tax losses of \$9,204 and \$30,537, respectively. As of September 30, 2015, the income tax rate varies from the United States statutory income tax rate primarily due to valuation allowances in the United States and taxable income generated by the Company's foreign wholly-owned subsidiaries. The income tax expense for the three months ended September 30, 2014 was \$259 on a pre-tax loss of \$8,985 and the income tax benefit for the nine months ended September 30, 2014 was \$1,992 on a pre-tax loss of \$26,333. The benefit recorded for the nine months ended September 30, 2014, was primarily attributable to a decrease in our valuation allowances of \$2,603 due to deferred tax liabilities recorded as part of our acquisition of Perfect Audience (Note 2).

The Company reviews the likelihood that it will realize the benefit of its deferred tax assets and, therefore, the need for valuation allowances on a quarterly basis. There is no corresponding income tax benefit recognized with respect to losses incurred and no corresponding income tax expense recognized with respect to earnings generated in jurisdictions with a valuation allowance. This causes variability in the Company's effective tax rate. The Company will maintain the valuation allowances until it is more likely than not that the net deferred tax assets will be realized.

As of September 30, 2015, the Company's gross uncertain tax benefits totaled \$1,581, and none of the Company's uncertain tax benefits, including related accrued interest and penalties, would affect the Company's effective tax rate if recognized.

## 11. Net Loss Per Share Available to Common Stockholders

Basic net loss per share available to common stockholders is calculated by dividing the net loss available to common stockholders by the weighted-average number of shares of common stock outstanding for the period. The weighted-average number of shares of common stock used to calculate the Company's basic net loss per share available to common stockholders excludes those shares subject to repurchase related to unvested common shares, stock options that were exercised prior to vesting, restricted stock issued and RSUs settled for shares of common stock, as these shares are not deemed to be outstanding for accounting purposes until they vest. The diluted net loss

Edgar Filing: MARIN SOFTWARE INC - Form 10-Q

per share of common stock is computed by dividing the net loss using the weighted-average number of shares of common stock, excluding common stock subject to repurchase, and, if dilutive, potential shares of common stock outstanding during the period. Potential shares of common stock consist of common stock subject to repurchase, stock options to purchase common stock, restricted common stock issued and RSUs settled for shares of common stock.

The following table presents the calculation of basic and diluted net loss per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
<b>Numerator:</b>				
Net loss	\$(9,504 )	\$(9,244 )	\$(31,211 )	\$(24,341 )
<b>Denominator:</b>				
Weighted average number of shares, basic and diluted	36,953	34,849	36,367	34,018
Net loss per share available to common stockholders				
Basic and diluted net loss per common share available to common stockholders	\$(0.26 )	\$(0.27 )	\$(0.86 )	\$(0.72 )

The following table presents the potential shares of common stock outstanding that were excluded from the computation of diluted net loss per share available to common stockholders for the periods presented because including them would have been anti-dilutive:

	Three and Nine Months Ended September 30,	
	2015	2014
Options to purchase common stock	6,400	6,204
Restricted stock units	1,334	355
Restricted common stock issued	239	606
Common stock subject to repurchase	25	103
	7,998	7,268

## 12. Segment Reporting

The Company defines the term “chief operating decision maker” to be the Chief Executive Officer. The Chief Executive Officer reviews the financial information presented on a consolidated basis for purposes of allocating resources and evaluating of financial performance. Accordingly, the Company has determined that it operates as a single reportable and operating segment.

Revenues by geographic area, based on the billing location of the customer, were as follows for the periods presented:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
United States of America	\$18,123	\$16,839	\$53,333	\$47,519
International	8,204	8,845	26,182	24,834
Total revenues, net	\$26,327	\$25,684	\$79,515	\$72,353

Long-lived assets, excluding goodwill and intangible assets, by geographic area were as follows for the periods presented:

	September 30, 2015	December 31, 2014
United States of America	\$ 21,788	\$ 15,701
International	1,079	573
Total long-lived assets, net	\$ 22,867	\$ 16,274

## 13. Commitments and Contingencies

## Operating Leases

Rent expense for the three months ended September 30, 2015 and 2014, was \$2,279 and \$1,856, respectively, and for the nine months ended September 30, 2015 and 2014, was \$6,496 and \$5,645, respectively.

Future minimum lease payments for significant operating leases as of September 30, 2015, were as follows:

Remaining three months of 2015	\$1,937
Year ending December 31, 2016	7,732
Year ending December 31, 2017	7,427
Year ending December 31, 2018	4,503
Year ending December 31, 2019 and thereafter	13,752
	\$35,351

## Legal Matters

From time to time, the Company may be involved in lawsuits, claims, investigations and proceedings, consisting of intellectual property, commercial, employment and other matters, which arise in the ordinary course of business. In accordance with U.S. generally accepted accounting principles ("GAAP"), the Company records a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to

reflect the impact of negotiations, settlements, ruling, advice of legal counsel and other information and events pertaining to a particular case. Litigation is inherently unpredictable. If any unfavorable ruling was to occur in any specific period or if a loss becomes probable and estimable, there exists the possibility of a material adverse impact on the Company's results of operations, financial position or cash flows.

#### Indemnification

The Company enters into standard indemnification agreements in the ordinary course of business. Pursuant to the agreements, each party may indemnify, defend and hold the other party harmless with respect to such claim, suit or proceeding brought against it by a third party alleging that the indemnifying party's intellectual property infringes upon the intellectual property of the third party, or results from a breach of the indemnifying party's representations and warranties or covenants, or that results from any acts of negligence or willful misconduct. The term of these indemnification agreements is generally perpetual any time after execution of the agreement. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited. Historically, the Company has not been obligated to make significant payments for these obligations and no liabilities have been recorded for these obligations on the unaudited consolidated condensed balance sheets as of September 30, 2015 and December 31, 2014.

The Company also indemnifies its officers and directors for certain events or occurrences, subject to certain limits, while the officer or director is or was serving at the Company's request in such capacity. The maximum amount of potential future indemnification is unlimited; however, the Company has a Directors and Officers insurance policy that limits its exposure and enables the Company to recover a portion of any future amounts paid. Historically, the Company has not been obligated to make any payments for these obligations and no liabilities have been recorded for these obligations on the unaudited consolidated condensed balance sheets as of September 30, 2015 and December 31, 2014.

#### Other Contingencies

The Company is subject to claims and assessments from time to time in the ordinary course of business. The Company's management does not believe that any such matters, individually or in the aggregate, will have a material adverse effect on the Company's financial position, results of operations or cash flows.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition, results of operations and cash flows should be read in conjunction with the (1) unaudited condensed consolidated financial statements and the related notes thereto included elsewhere in this Quarterly Report on Form 10-Q, and (2) the audited consolidated financial statements and notes thereto and management's discussion and analysis of financial condition and results of operations for the fiscal year ended December 31, 2014, included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014, filed with the SEC on February 20, 2015. This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. These statements are often identified by the use of words such as "believe," "may," "potentially," "will," "estimate," "continue," "anticipate," "intend," "could," "should," "would," "project," "plan," "predict," "expect," "seek" and similar expressions. Such forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those identified herein, and those discussed in the section titled "Risk Factors", set forth in Part II, Item 1A of this Form 10-Q. We disclaim any obligation to update any forward-looking statements to reflect events or circumstances after the date of such statements.

### Overview

We provide a leading cross-channel advertising cloud platform that enables digital marketers to improve performance of their online advertising campaigns, realize efficiencies and time savings, and make better business decisions. Our integrated platform is a software-as-a-service, or SaaS, analytics, workflow, and optimization solution for marketing professionals, allowing them to effectively manage their digital advertising spend across search, display, social and mobile advertising channels. Our software solution is designed to help our customers:

- measure the effectiveness of their advertising campaigns through our proprietary reporting and analytics capabilities;
- manage and execute campaigns through our intuitive user interface and underlying technology that streamlines and automates key functions, such as ad creation and bidding, across multiple publishers and channels; and
- optimize campaigns across multiple publishers and channels based on market and business data to achieve desired revenue outcomes using our predictive bid management technology.

In December 2014, our customers collectively managed more than \$7.2 billion in annualized advertising spend on our platform and for the quarter ended September 30, 2015, we had 827 active advertisers using our solution globally across a wide range of industries. We market and sell our solutions to advertisers directly and through leading advertising agencies. For the three months ended September 30, 2015, our revenues grew 3% to \$26.3 million from \$25.7 million for the three months ended September 30, 2014. For the nine months ended September 30, 2015, our revenues grew 10% to \$79.5 million from \$72.4 million for the nine months ended September 30, 2014. We incurred net losses of \$9.5 million and \$31.2 million for the three and nine months ended September 30, 2015, respectively.

We earn revenues principally from subscription contracts under which we provide advertisers with access to our search, social and display advertising management platform, either directly or through the advertiser's relationship with an agency that has a contract with us. In accordance with the subscription contracts, we charge fees generally based upon the amount of advertising spend that our customers manage through our platform. Our subscription contracts are generally one year or longer in length. Under our subscription contracts with most of our direct advertisers and some of our agency customers, customers are contractually committed to a monthly minimum fee, which is payable on a monthly basis over the duration of the contract and is generally greater than one-half of our estimated monthly revenues from these customers, at the time the contract is signed. However, most of our subscription contracts with our advertising agency customers do not include a committed monthly minimum fee. Our contractual arrangement is with the advertising agency and the advertiser is not a party to the terms of the contract.

Accordingly, most advertisers through our agency customers do not have a commitment to use our services and the advertisers may be added or removed from our platform at the discretion of the respective agency. We invoice the advertising agency for the amounts due under the contract. Historically, approximately half of our revenues have been earned from advertising agency customers. Our subscription fee under most contracts is variable based upon the value of advertising spend that our customers manage through our platform. Our deferred revenues consist of the unearned portion of billed subscription fees.

Our subscription contracts indicate the date at which we begin invoicing our customers, which is generally the first day of the month following the execution of the contract. We generally invoice the greater of the minimum fee or the percentage of advertising spend on our platform. The implementation process for new advertisers is typically four to six weeks; however, we generally have not charged a separate implementation fee under our standard subscription contracts.

Our implementation and customer support personnel, as well as costs associated with our operating infrastructure, are included in our cost of revenues. Our cost of revenues and operating expenses have increased in absolute dollars due to our need to increase our headcount to grow our business and to increase data center capacity to support customer revenue growth on our platform. We expect that our cost of revenues will continue to increase in absolute dollars as we continue to invest in our growth.

In order to grow revenues, we need to invest in (1) sales activities by adding sales representatives globally to target new advertisers and agencies and (2) research and development to improve and further expand our platform and support for additional publishers. These activities will require us to make investments, particularly in research and development and sales and marketing, and if these investments do not generate additional customers or additional advertising spend managed by our platform, our future operating results could be harmed.

The majority of our revenues are derived from our advertisers in the United States. We believe the markets outside of the United States offer an opportunity for growth, and we intend to make additional investments in sales and marketing to expand in these markets. Advertisers from outside of the United States represented 31% and 33% of total revenues for the three and nine months ended September 30, 2015, respectively, and 34% of total revenues for both the three and nine months ended September 30, 2014.

We were incorporated in 2006 and initially focused on building the core elements of our cloud-based platform, which we currently use to service our customers. In September 2007, we launched Marin Enterprise, which targets large advertisers and agencies. We released Marin Professional Edition in March 2011, which targets mid-market advertisers and agencies. We have an iterative development process and we typically release new features every month. Additionally, we have continued to expand internationally, opening our London office in 2009, our Paris, Hamburg and Sydney offices in 2011, our Dublin and Tokyo offices in 2012 and our Shanghai office in 2013.

We completed our acquisitions of NowSpots, Inc., which conducted business as Perfect Audience, or “Perfect Audience,” and SocialMoov S.A.S., or “SocialMoov,” in June 2014 and February 2015, respectively, to complement our product offerings. These acquisitions are more fully described in Note 2 to our accompanying unaudited condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

## Key Factors Affecting Our Performance

### Number of Active Advertisers

We define an active advertiser as an advertiser from whom we recognized revenues in excess of \$2,000 in at least one month in a period. We believe the \$2,000 threshold best identifies advertisers who are actively using our platform. We focus on revenues in at least one month in a period to account for seasonality in advertising spend by our customers, some of whom may not run digital advertising campaigns in every month of a year but still represent an active advertiser on our platform. We count organizations within the same corporate structure as one advertiser, even if they have signed separate contracts with us for different brands or divisions, whether they are a direct advertiser or an advertiser through an agency. When our subscription contract is with an advertising agency, we include each advertiser whose advertising spend is managed by the agency through our platform as a different advertiser. Advertisers who have advertising spend managed by multiple agencies on our platform are counted as one advertiser. We had 827 and 825 active advertisers in the quarters ending September 30, 2015 and 2014, respectively. This metric can fluctuate from quarter to quarter due to seasonality and timing and amount of revenue contributed from new active advertisers and therefore, there is not necessarily a direct correlation between the amount of increased revenues and the change in active advertisers in a particular period.

### Revenue Retention Rate

We believe our ability to retain and grow revenues from our existing advertisers is an indicator of the stability of our revenue base and the long-term value of our advertiser relationships. We assess our ability to retain and grow subscription revenues using a metric we refer to as revenue retention rate. We calculate our revenue retention rate metric by dividing retained revenues by retention base revenues. We define retention base revenues as revenues from all advertisers in the corresponding prior period, and we define retained revenues as revenues from all advertisers from the prior period that remain advertisers in the current period. Advertising spend on our platform may vary quarter to quarter, and as a result, quarterly revenue retention rates may fluctuate quarter to quarter.

#### Annualized Advertising Spend on our Platform

We calculate annualized advertising spend as advertising spend in the last month of the fourth quarter multiplied by 12. We believe that increases in annualized advertising spend generally lead to increases in revenues over time. However, we believe that other factors related to the terms of customer agreements and seasonality can make it difficult to directly correlate annual advertising

spend to changes in revenues in a particular period. Our customers collectively managed \$7.2 billion in annualized advertising spend on our platform in December 2014.

## Components of Results of Operations

### Revenues

We generate revenues principally from subscription contracts under which we provide advertisers with access to our search, social and display advertising management platform, either directly or through the advertiser's relationship with an agency with whom we have a contract. Under our subscription contracts with most direct advertisers and some of our agency customers, customers contractually commit to a monthly minimum fee, which is generally greater than one-half of our estimated monthly revenues from these customers, at the time the contract is signed. However, most of our subscription contracts with our advertising agency customers do not include a committed monthly minimum fee. Additionally, advertisers we serve through our arrangements with our advertising agencies generally do not have a minimum commitment to continue using our services. Our subscription fee under most contracts is variable based upon the value of advertising spend that our customers manage through our platform, although some customers pay a flat monthly rate over the term of their subscription contract. Our deferred revenues consist of the unearned portion of billed subscription fees.

### Cost of Revenues

Cost of revenues primarily includes personnel costs, consisting of salaries, benefits, bonuses and stock-based compensation, for employees associated with our cloud infrastructure and global services for implementation and ongoing customer service organizations. Other costs of revenues include fees paid to contractors who supplement our support and data center personnel, expenses related to the use of a third-party data center, depreciation of data center equipment, amortization of internally developed software, amortization of intangible assets and allocated overhead.

We intend to continue to invest in our global services and in the capacity of our hosting service infrastructure. As we continue to invest in technology innovation through our research and development organization, we expect to have increased amortization of capitalized internally developed software costs. We expect that this investment in technology should not only expand the breadth and depth of our cross-channel performance advertising cloud platform but also increase the efficiency of how we deliver these solutions, enabling us to improve our gross margin over time. The level and timing of investment in these areas could affect our cost of revenues in the future.

### Sales and Marketing Expenses

Sales and marketing expenses include personnel costs, sales commissions and other costs including travel and entertainment, marketing and promotional events, public relations, marketing activities, professional fees and allocated overhead. All of these costs are expensed as incurred, including sales commissions. Our commission plans provide that payment of commissions to our sales representatives are paid based on the actual amounts we invoice customers over a period that is generally up to five months following the execution of the applicable customer contract.

We plan to continue investing in sales and marketing, expanding our domestic and international sales and marketing activities, building brand awareness and sponsoring marketing events, which we believe will enable us to add new customers and increase penetration within our existing customer base. We expect that, in the future, sales and marketing expenses will continue to be our largest operating expense category.

### Research and Development Expenses

Research and development expenses consist primarily of personnel costs for our product development and engineering employees and executives, including salaries, benefits, stock-based compensation expense and bonuses. Also included are non-personnel costs such as professional fees payable to third-party development resources, amortization of intangible assets and allocated overhead.

Our research and development efforts are focused on enhancing our software architecture, adding new features and functionality to our platform and improving the efficiency with which we deliver these services to our customers. In the future, research and development expenses may increase in absolute dollars, partially offset by the capitalization of internally developed software costs. We believe that these investments are necessary to maintain and improve our competitive position.

## General and Administrative Expenses

General and administrative expenses consist primarily of personnel costs, including salaries, benefits, stock-based compensation expense and bonuses, for our administrative, legal, human resources, finance and accounting employees and executives. Also included are non-personnel costs, such as travel-related expenses, audit fees, tax services and legal fees, as well as professional fees, insurance and other corporate expenses, along with amortization of intangible assets and allocated overhead.

We expect to incur incremental costs associated with supporting the growth of our business, both in terms of size and geographic expansion, and to meet the increased compliance requirements associated with our continued operation as a public company. Such costs include increases in our accounting and legal personnel, additional consulting, legal and audit fees, insurance costs, board of directors' compensation and the costs of achieving and maintaining compliance with the Sarbanes-Oxley Act of 2002. As a result, our general and administrative expenses may increase in absolute dollars in future periods.

## Results of Operations

The following table is a summary of our consolidated statements of operations. The period-to-period comparisons of results are not necessarily indicative of results for future periods.

	Three Months Ended September 30, 2015		Nine Months Ended September 30, 2015	
	2014	2014	2014	2014
	(in thousands)		(in thousands)

General and administrative	1,058	851	3,305	1,947

(2) Amortization of intangible assets included in the unaudited condensed consolidated statements of operations data above was as follows:

	Three Months Ended September 30, 2015 2014		Nine Months Ended September 30, 2015 2014	
	(in thousands)		(in thousands)	
Cost of revenues	\$ 271	\$ 171	\$ 762	\$ 227
Sales and marketing	247	112	674	150
Research and development	271	170	763	227
General and administrative	37	32	109	42

(3) During the third quarter of fiscal 2015, we executed organizational restructurings (the “2015 Restructuring Plans”) in order to improve cost efficiencies, increase the investment in our cloud-based platform and realign our sales and marketing operations. We estimate that an additional \$0.1 million in expenses related to the 2015 Restructuring Plans will be incurred and paid by the end of fiscal 2016. Restructuring related expenses included in the unaudited condensed consolidated statements of operations data above was as follows:

	Three Months Ended September 30, 2015 2014		Nine Months Ended September 30, 2015 2014	
	(in thousands)		(in thousands)	
Cost of revenues	\$ 105	\$ —	\$ 105	\$ —
Sales and marketing	659	—	659	—
Research and development	53	—	53	—
General and administrative	264	—	264	—

(4) We define Adjusted EBITDA as net loss, adjusted for stock-based compensation expense, depreciation, the amortization of internally developed software, the amortization of intangible assets, the capitalization of internally developed software, interest expense, net, the benefit from or provision for income taxes, other income or expenses, net and costs associated with acquisitions and restructurings. Adjusted EBITDA is a financial measure that is not calculated in accordance with GAAP. Adjusted EBITDA should not be considered as an alternative to net loss, operating loss or any other measure of financial performance calculated and presented in accordance with GAAP. We prepare Adjusted EBITDA to eliminate the impact of items that we do not consider indicative of our core operating performance. Investors are encouraged to evaluate these adjustments and the reason we consider them appropriate.

We believe Adjusted EBITDA is useful to investors in evaluating our operating performance for the following reasons:

- Adjusted EBITDA is widely used by investors and securities analysts to measure a company’s operating performance without regard to items, such as stock-based compensation expense, depreciation and amortization, capitalized software development costs, interest expense, net, benefit from or provision for income taxes, other income or expenses, net and costs associated with acquisitions and restructurings, that can vary substantially from company to

company depending upon their financing, capital structures and the method by which assets were acquired;

- Our management uses Adjusted EBITDA in conjunction with GAAP financial measures for planning purposes, including the preparation of our annual operating budget, as a measure of operating performance and the effectiveness of our business strategies and in communications with our board of directors concerning our financial performance; and
- Adjusted EBITDA provides consistency and comparability with our past financial performance, facilitates period-to-period comparisons of operations and also facilitates comparisons with other peer companies, many of which use similar non-GAAP financial measures to supplement their GAAP results.

We understand that, although Adjusted EBITDA is frequently used by investors and securities analysts in their evaluations of companies, Adjusted EBITDA has limitations as an analytical tool, and investors should not consider it in isolation or as a substitute for analysis of our results of operations as reported under GAAP. These limitations include:

- Depreciation and amortization are non-cash charges, and the assets being depreciated or amortized will often have to be replaced in the future; Adjusted EBITDA does not reflect any cash requirements for these replacements;
- Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs or contractual commitments;

- Adjusted EBITDA does not reflect cash requirements for income taxes and the cash impact of other income or expense; and
- Other companies may calculate Adjusted EBITDA differently than we do, limiting its usefulness as a comparative measure.

The following table presents a reconciliation of net loss, the most comparable GAAP measure, to Adjusted EBITDA for each of the periods indicated:

	Three Months Ended		Nine Months Ended	
	September 30, 2015	2014	September 30, 2015	2014
	(in thousands)		(in thousands)

Comparison of the Three and Nine Months Ended September 30, 2015 and 2014

Revenues

	Three Months Ended		Change		Nine Months Ended		Change	
	September 30, 2015	September 30, 2014	\$	%	September 30, 2015	September 30, 2014	\$	%
	(dollars in thousands)				(dollars in thousands)			
Revenues, net	\$26,327	\$25,684	\$643	3 %	\$79,515	\$72,353	\$7,162	10 %

24

---

Subscription revenues for the three and nine months ended September 30, 2015, increased \$0.6 million and \$7.2 million, respectively, or 3% and 10%, respectively, compared to the corresponding periods in 2014. This increase was driven by growth in revenues from new advertisers and new product offerings. There were no customers that accounted for greater than 10% of our revenues in either of the three or nine months ended September 30, 2015 or 2014.

Revenues in the three and nine months ended September 30, 2015, from the United States locations represented 69% and 67%, respectively, of revenues, and in both the three and nine months ended September 30, 2014, revenues from the United States locations represented 66% of revenues.

#### Cost of Revenues and Gross Margin

	Three Months Ended				Nine Months Ended			
	September 30,		Change		September 30,		Change	
	2015	2014	\$	%	2015	2014	\$	%
	(dollars in thousands)				(dollars in thousands)			
Cost of revenues	\$10,375	\$9,145	\$1,230	13 %	\$30,683	\$26,291	\$4,392	17 %
Gross profit	15,952	16,539	(587 )	(4 )	48,832	46,062	2,770	6
Gross profit percentage	61	% 64	%		61	% 64	%	

Cost of revenues for the three and nine months ended September 30, 2015, increased \$1.2 million and \$4.4 million, respectively, or 13% and 17%, respectively, compared to the corresponding periods in 2014. This was largely driven by hosting costs, which during the three and nine months ended September 30, 2015 increased \$0.4 million and \$1.4 million, respectively, to support the increased use of our hosted platform. During the three and nine months ended September 30, 2015, we also experienced increases of \$0.5 million and \$1.2 million, respectively, of depreciation and amortization of internally developed software, and \$0.1 million and \$0.5 million, respectively, in amortization of intangible assets acquired as part of our acquisitions of Perfect Audience in June 2014 and SocialMoov in February 2015. In addition, compensation expense and allocated overhead increased \$0.6 million and \$0.3 million, respectively, during the nine months ended September 30, 2015, due to an increase in the number of global services and platform infrastructure personnel as compared to the same period in 2014. Expenses related to the 2015 Restructuring Plans during the third quarter of fiscal 2015 totaled \$0.1 million for the three and nine months ended September 30, 2015.

Our gross margin decreased to 61% during the three and nine months ended September 30, 2015, respectively, compared to 64% during the corresponding periods in 2014. These decreases were due primarily to an overall decline in revenue growth during 2015, as well as our continued investment in display and social advertising initiatives. The gross margins were also negatively impacted by rising hosting and associated equipment costs, which were 7% of revenues during both of the three and nine months ended September 30, 2015, as compared to 5% and 4% in the three and nine months ended September 30, 2014, respectively.

#### Sales and Marketing

Change

Change

Edgar Filing: MARIN SOFTWARE INC - Form 10-Q

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015	2014	\$	%	2015	2014	\$	%
	(dollars in thousands)				(dollars in thousands)			
Sales and marketing	\$10,835	\$12,186	\$(1,351)	(11)%	\$36,056	\$36,152	\$(96)	(0)%
Percent of revenues, net	42	% 48	%		45	% 50	%	

Sales and marketing expenses for the three and nine months ended September 30, 2015, decreased \$1.4 million and \$0.1 million, respectively, or 11% and less than 1%, respectively, compared to the corresponding periods in 2014. The decreases were due primarily to a decrease in the global sales support and marketing headcount, including those that were part of the 2015 Restructuring Plans, contributing to a net decrease of \$1.7 million and \$1.0 million, respectively, in personnel-related costs, consisting primarily of employee compensation, benefits and travel costs, and \$0.3 million in marketing costs, during the three and nine months ended September 30, 2015. These personnel and marketing cost reductions were partially offset by \$0.7 million in restructuring related expenses during the three and nine months ended September 30, 2015, which primarily consisted of employee severance, as well as an increase in amortization expense of \$0.1 million and \$0.5 million, respectively, related to the intangible assets acquired as part of the Perfect Audience and SocialMoov acquisitions.

## Research and Development

	Three Months Ended				Nine Months Ended			
	September 30, 2015		2014		September 30, 2015		2014	
			Change				Change	
			\$	%	\$	%	\$	%
	(dollars in thousands)				(dollars in thousands)			
Research and development	\$8,162	\$7,824	\$338	4 %	\$25,840	\$20,535	\$5,305	26 %
Percent of revenues, net	31 %	30 %			32 %	29 %		

Research and development expenses for the three and nine months ended September 30, 2015, increased \$0.3 million and \$5.3 million, respectively, or 4% and 26%, respectively, compared to the corresponding periods in 2014. These fluctuations in research and development expenses partially reflected changes in the number of research and development personnel, resulting in a decrease of \$0.1 million and an increase of \$3.6 million in compensation expense during the three and nine months ended September 30, 2015, respectively. The remaining \$0.4 million and \$1.7 million increases during the three and nine months ended September 30, 2015, respectively, are primarily the result of an increase in professional fees of \$0.2 million and \$0.6 million, respectively, due to the usage of additional third-party resources to support the engineering and quality assurance functions; an increase in allocated overhead of \$0.1 million and \$0.6 million, respectively, due to the growth in headcount; and an increase in amortization expense of \$0.1 million and \$0.5 million, respectively, related to the intangible assets acquired as part of the Perfect Audience and SocialMoov acquisitions.

	(dollars in thousands)				(dollars in thousands)			
General and administrative	\$5,882	\$5,682	\$200	4 %	\$17,257	\$15,466	\$1,791	12 %
Percent of revenues, net	22 %	22 %			22 %	21 %		

General and administrative expenses for the three and nine months ended September 30, 2015, increased \$0.2 million and \$1.8 million, respectively, or 4% and 12%, respectively, compared to the corresponding periods in 2014. Compensation, benefits and other employee-related expenses decreased by \$0.1 million during the three months ended September 30, 2015, and increased by \$1.3 million during the nine months ended September 30, 2015, due to fluctuations in the number of general and administrative personnel and the granting of additional equity awards to our existing employees. Additionally, expenses related to the 2015 Restructurings totaled \$0.3 million for the three and nine months ended September 30, 2015.

## Interest Expense, Net and Other (Expenses) Income, Net

Edgar Filing: MARIN SOFTWARE INC - Form 10-Q

	Three Months Ended				Nine Months Ended			
	September 30, 2015		September 30, 2014		September 30, 2015		September 30, 2014	
			Change			Change		
		\$	%			\$	%	
	(dollars in thousands)				(dollars in thousands)			
Interest expense, net and Other (expenses) income, net	\$ (277)	\$ 168	\$ (445)	(265)%	\$ (216)	\$ (242)	\$ 26	11 %

Other (expenses) income, net, primarily consists of foreign currency transaction gains and losses. During the three months ended September 30, 2015, the increase of \$0.4 million, or 265%, in interest expense, net and other (expenses) income, net, was primarily due to \$0.4 million in net foreign exchange losses related to fluctuations in foreign currency exchange rates. During the nine months ended September 30, 2015, interest expense, net and other (expenses) income, net, remained relatively constant.

(Provision for) Benefit from Income Taxes

	Three Months Ended				Nine Months Ended			
	September 30, 2015		September 30, 2014		September 30, 2015		September 30, 2014	
			Change			Change		
		\$	%			\$	%	
	(dollars in thousands)				(dollars in thousands)			
(Provision for) benefit from income taxes	\$ (300)	\$ (259)	\$ (41)	16 %	\$ (674)	\$ 1,992	\$ (2,666)	(134)%

The provision for income taxes for the three and nine months ended September 30, 2015, totaled \$0.3 million and \$0.7 million, respectively, primarily as a result of revenues generated from our foreign operations. The provision for income taxes for the three months ended September 30, 2014 totaled \$0.3 million, while the benefit from income taxes for the nine months ended September 30, 2014 totaled \$2.0 million, primarily due to a decrease in our valuation allowances of \$2.6 million as a result of deferred tax liabilities recorded as part of the acquisition of Perfect Audience.

### Liquidity and Capital Resources

Since our incorporation in March 2006, we have relied primarily on sales of our capital stock to fund our operating activities. From incorporation until our IPO, we raised \$105.7 million, net of related issuance costs, in funding through private placements of our preferred stock. In March and April 2013, we raised net proceeds of \$109.3 million in our IPO. From time to time, we have also utilized equipment lines to fund capital purchases. As of September 30, 2015, our principal sources of liquidity were our cash and cash equivalents of \$33.3 million, access to borrowings under our fully available revolving credit facility (the lesser of \$20.0 million or 80% of our eligible accounts receivable) and our capital lease arrangements. Additionally, in July 2015 we amended our existing revolving credit facility, which increased the amount available for borrowing to \$20.0 million. The approximate weighted average interest rate on our outstanding borrowings as of September 30, 2015, was 3%. Our primary operating cash requirements include the payment of compensation and related costs, as well as costs for our facilities and information technology infrastructure. We also have an outstanding irrevocable letter of credit for \$1.3 million related to the non-cancelable lease for our corporate headquarters in San Francisco, California.

We presently maintain cash balances in our foreign subsidiaries. As of September 30, 2015, we had \$33.3 million of cash and cash equivalents, of which only \$5.5 million was held by our foreign subsidiaries. In the future, we plan to increase the invoicing and remittance of proceeds from our international operations in our foreign subsidiaries' bank accounts. We plan to re-invest the cash earned by our foreign subsidiaries to finance the growth of our foreign operations.

Based on our current level of operations and anticipated growth, we believe that our existing cash and cash equivalents will be sufficient to fund our operations for at least the next 12 months. Our future capital requirements will depend on many factors, including our rate of revenue growth, the expansion of our sales and marketing activities, and the timing and extent of spending to support product development efforts and expansion into new territories and the timing of introductions of new features and enhancements to our platform. To the extent that existing cash and cash equivalents are insufficient to fund our future activities, we may need to raise additional funds through public or private equity or debt financing.

### Summary of Cash Flows

The following table sets forth a summary of our cash flows for the periods indicated:

	Nine Months Ended September 30,	
	2015	2014
	(in thousands)	
Net cash used in operating activities	\$(13,600)	\$(20,128)
Net cash used in investing activities	(19,833)	(9,260)
Net cash (used in) provided by financing activities	(962)	738
Effect of foreign exchange rate changes on cash and cash equivalents	(526)	—

Net decrease in cash and cash equivalents	\$(34,921)	\$(28,650)
---	------------	------------

### Operating Activities

Cash used in operating activities is primarily influenced by the amount of cash we invest in personnel and infrastructure to support the anticipated growth of our business and the increase in the number of advertisers using our platform. Cash used in operating activities has typically been affected by net losses and further increased by changes in our operating assets and liabilities, particularly in the areas of accounts receivable, prepaid expenses and other current assets, deferred revenue, accounts payable and accrued expenses and other current liabilities, adjusted for non-cash expense items such as depreciation, amortization, stock-based compensation expense and deferred income tax benefits.

Cash used in operating activities during the nine months ended September 30, 2015, of \$13.6 million was primarily the result of a net loss of \$31.2 million, offset by non-cash expenses of \$21.7 million, which primarily included depreciation, amortization, unrealized foreign currency gain or loss, stock-based compensation expense and deferred income tax expenses or benefits. These non-

cash expenses increased due to capital expenses and headcount growth related to continued investment in our business, as well as the acquisition of SocialMoov. This was further offset by a \$4.1 million net change in working capital items (exclusive of changes due to net liabilities assumed from the acquisition of SocialMoov in February 2015), most notably (1) an increase in accounts receivable of \$3.4 million due to the increase in sales and timing of related collections; (2) an increase in prepaid expenses and other current assets, and other (noncurrent) assets, of \$1.3 million related to the growth of our operations and timing of related disbursements; (3) a decrease in deferred revenues of \$0.7 million related to the timing of the collection of minimum fees at the start of our subscription agreements; and (4) a net increase in accounts payable and accrued expenses and other current and noncurrent liabilities of \$1.4 million due to the timing of related disbursements and customer advances.

Cash used in operating activities during the nine months ended September 30, 2014, of \$20.1 million was primarily the result of a net loss of \$24.3 million, offset by non-cash expenses of \$10.3 million, which primarily included depreciation, amortization, stock-based compensation expense and deferred income tax expenses or benefits. These non-cash expenses increased due to headcount growth related to continued investment in our business, as well as the acquisition of Perfect Audience in June 2014. This was further offset by a \$6.1 million net change in working capital items (exclusive of changes due to net liabilities assumed from Perfect Audience), most notably (1) an increase in accounts receivable of \$5.4 million due to the increase in sales and the timing of related collections; (2) an increase in prepaid expenses and other current assets, and other (noncurrent) assets, of \$1.3 million related to the growth of operations and timing of related disbursements; (3) an increase in deferred revenues of \$0.6 million related to the timing of the collection of minimum fees at the start of our subscription agreements; and (4) a net decrease in accounts payable and accrued expenses and other current and noncurrent liabilities of less than \$0.1 million due to the timing of related disbursements and customer advances.

#### Investing Activities

During the nine months ended September 30, 2015 and 2014, investing activities primarily consisted of purchases of property and equipment, including technology hardware and software to support our growth as well as capitalized internally developed software costs. Purchases of property and equipment may vary from period-to-period due to the timing of the expansion of our operations and the development cycles of our internally developed hosted software platform. We expect to continue to invest in property and equipment and develop our software platform for the foreseeable future. Investing activities during the nine months ended September 30, 2015 and 2014, are also inclusive of cash paid for the acquisitions of SocialMoov (\$8.9 million, net of cash acquired of \$1.4 million) and Perfect Audience (\$5.3 million, net of cash acquired of \$1.1 million), respectively.

#### Financing Activities

Cash used in financing activities during the nine months ended September 30, 2015, was \$1.0 million. This was primarily due to \$3.0 million net repayments under the loans assumed in the SocialMoov acquisition, our credit facility and our capital lease arrangements, partially offset by \$2.1 million of proceeds from the exercise of stock options and contributions to our employee stock purchase plan.

Cash provided by financing activities during the nine months ended September 30, 2014, was \$0.7 million. This was primarily related to \$3.0 million of proceeds from the exercise of stock options and contributions to our employee stock purchase plan. These amounts were partially offset by \$2.4 million in net repayments under our credit facility and capital lease arrangement.

## Contractual Obligations and Commitments

Our principal commitments consist of obligations under operating leases for office space and our data center and capital leases for computer equipment, as well as debt obligations under our credit facilities with Silicon Valley Bank. As of September 30, 2015, the future minimum payments under these commitments, as well as obligations under our credit facilities, were as follows:

	Payments Due By Period (In thousands)			
	Interest			
	Debt	Expense	Operating	
	Obligations	Payments	Leases	Total
Remaining three months of 2015	\$842	\$ 48	\$ 1,937	\$2,827
Year ending December 31, 2016	1,099	89	7,732	8,920
Year ending December 31, 2017	472	61	7,427	7,960
Year ending December 31, 2018	500	33	4,503	5,036
Year ending December 31, 2019 and thereafter	307	6	13,752	14,065
Total	\$3,220	\$ 237	\$ 35,351	\$38,808

The amounts in the table above are associated with agreements that are enforceable and legally binding, which specify significant terms including payment terms, related services and the approximate timing of the transaction. Purchase obligations under contracts that we can cancel without a significant penalty are not included in the table.

During the ordinary course of business, we include indemnification provisions within certain of our contracts. Pursuant to these arrangements, we may be obligated to indemnify, hold harmless and agree to reimburse the indemnified party for losses suffered or incurred by the indemnified party, generally parties with which we have commercial relations, in connection with certain intellectual property infringement claims by any third party with respect to our software. To date, there have not been any costs incurred in connection with such indemnification arrangements and therefore, there is no accrual for such amounts as of September 30, 2015.

In addition to the obligations in the table above, we have approximately \$0.1 million of unrecognized tax benefits that have been recorded as liabilities as of September 30, 2015. It is uncertain as to if or when such amounts may be settled.

## Off-Balance Sheet Arrangements

During the periods presented, we did not have, nor do we currently have, any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. We are therefore not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in those types of relationships.

We have no obligations that meet the definition of an off-balance sheet arrangement as of September 30, 2015, other than operating leases and a standby letter of credit, as described in the notes to the unaudited condensed consolidated

financial statements.

#### Recent Accounting Pronouncements

For information regarding recent accounting pronouncements, refer to Note 1, Summary of Business and Significant Accounting Policies, within our condensed consolidated financial statements.

#### Critical Accounting Policies and Significant Judgments and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these condensed consolidated financial statements requires us to make estimates, assumptions and judgments that can have significant impact on the reported amounts of assets and liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of our financial statements. We base our estimates, assumptions and judgments on historical experience and various other factors that we believe to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. On a regular basis we evaluate our estimates, assumptions and judgments and make changes accordingly.

We believe the estimates, assumptions and judgments involved in revenue recognition, stock-based compensation, including historical common stock valuations, accounting for income taxes, reserving for doubtful accounts receivable, business combinations and impairment assessments of our goodwill, intangible assets and other long-lived assets have the greatest potential impact on our condensed consolidated financial statements, and consider these to be our critical accounting policies. Historically, our estimates, assumptions and judgments relative to our critical accounting policies have not differed materially from actual results. There have been no material changes to our critical accounting policies and significant judgments and estimates as compared to the critical accounting policies and significant judgments and estimates as described in our Annual Report on Form 10-K for the fiscal year 2014 filed with the SEC on February 20, 2015, under “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

### Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We have operations both within the United States and internationally and we are exposed to market risks in the ordinary course of our business. These risks primarily include interest rate, foreign exchange and inflation risks, as well as risks relating to changes in the general economic conditions in the countries where we conduct business. To reduce certain of these risks, we monitor the financial condition of our large customers and limit credit exposure by setting credit limits as we deem appropriate. In addition, our investment strategy has been to invest in financial instruments that are highly liquid and readily convertible into cash, with maturity dates within three months from the date of purchase. To date, we have not used derivative instruments to mitigate the impact of our market risk exposures. We have also not used, nor do we intend to use, derivatives for trading or speculative purposes.

#### Interest Rate Risk

We are exposed to market risk related to changes in interest rates. Our investments are considered cash equivalents and primarily consist of money market funds. As of September 30, 2015, we had cash and cash equivalents of \$33.3 million. The carrying amount of our cash and cash equivalents reasonably approximates fair value, due to the short maturities of these investments. The primary objectives of our investment activities are the preservation of capital, the fulfillment of liquidity needs and the fiduciary control of cash and investments. We do not enter into investments for trading or speculative purposes. Our investments are exposed to market risk due to a fluctuation in interest rates, which may affect our interest income and the fair market value of our investments. Due to the short-term nature of our investment portfolio, we believe only dramatic fluctuations in interest rates would have a material effect on our investments. As such we do not expect our operating results or cash flows to be materially affected by a sudden change in market interest rates.

As of September 30, 2015, we had borrowings outstanding in the aggregate of \$3.2 million. Our outstanding long-term borrowings consist of fixed and variable interest rate financial instruments. The interest rates of our borrowings range from 3% to 6%. A hypothetical 10% increase or decrease in interest rates relative to our current interest rates would not have a material impact on the fair values of all of our outstanding borrowings. Changes in interest rates would, however, affect operating results and cash flows, because of the variable rate nature of our borrowings. A hypothetical 10% increase or decrease in interest rates relative to interest rates as of September 30, 2015, would result in an insignificant impact to interest expense for 2015.

#### Foreign Currency Exchange Risk

We have foreign currency risks related to our revenues and operating expenses denominated in currencies other than the U.S. Dollar, primarily the Euro, British Pound Sterling, Canadian Dollar, Singapore Dollar, Japanese Yen, Chinese Yuan, and Australian Dollar. Revenues outside of the United States as a percentage of consolidated revenues were 33% and 34% during the nine months ended September 30, 2015 and 2014, respectively. Changes in exchange rates may negatively affect our revenues and other operating results as expressed in U.S. Dollars. Aggregate foreign currency gains (losses) included in determining net loss were \$(0.2) million and insignificant for the three and nine months ended September 30, 2015, respectively, and \$0.2 million and \$(0.1) million for the three and nine months ended September 30, 2014. Transaction gains and losses are included in other (expenses) income, net.

As our international operations grow, our risks associated with fluctuation in currency rates will become greater, and we will continue to reassess our approach to managing this risk. In addition, currency fluctuations or a weakening U.S. Dollar can increase the costs of our international expansion, while a strengthening U.S. Dollar can negatively impact our international revenues. To date, we have not entered into any foreign currency hedging contracts, since exchange rate fluctuations have not had a material impact on our operating results and cash flows. Based on our current international structure, we do not plan on engaging in hedging activities in the near future, and we also do not expect that the effects of a 10% shift in foreign currency exchange rates would have a material impact on any financial instruments currently held by the Company.

## Inflation Risk

We do not believe that inflation has had a material effect on our business, financial condition or results of operations. Nonetheless, if our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could harm our business, financial condition and results of operations.

## Item 4. Controls and Procedures.

### Evaluation of Disclosure Controls and Procedures

Regulations under the Securities Exchange Act of 1934, or the Exchange Act, require public companies, including us, to maintain “disclosure controls and procedures,” which are defined in Rule 13a-15(e) and Rule 15d-15(e) to mean a company’s controls and other procedures that are designed to ensure that information required to be disclosed in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required or necessary disclosures.

In designing and evaluating our disclosure controls and procedures, management recognizes that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. Our Principal Executive Officer and Principal Financial Officer have concluded, based on the evaluation of the effectiveness of the disclosure controls and procedures by our management as of the end of the fiscal quarter covered by this Quarterly Report, that our disclosure controls and procedures were effective at the reasonable assurance level.

### Changes in Internal Control over Financial Reporting

Regulations under the Exchange Act require public companies, including our company, to evaluate any change in our “internal control over financial reporting” as such term is defined in Rule 13a-15(f) and Rule 15d-15(f) of the Exchange Act. As of the end of the period covered by this Quarterly Report, our Principal Executive Officer and Principal Financial Officer did not identify any change in our internal control over financial reporting during the fiscal quarter covered by this Quarterly Report that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

## PART II

### OTHER INFORMATION

#### ITEM 1. LEGAL PROCEEDINGS

From time to time, we may become involved in legal proceedings arising in the ordinary course of our business. We are not presently a party to any legal proceedings that, if determined adversely to us, would individually or taken together have a material adverse effect on our business, operating results, financial condition or cash flows.

#### ITEM 1A. RISK FACTORS

Our operations and financial results are subject to various risks and uncertainties, including those described below, which could adversely affect our business, results of operations, cash flows, financial conditions, and the trading price of our common stock.

##### Risks Related to Our Business

We have a history of losses and we may not achieve or sustain profitability in the future.

We have incurred significant losses in each fiscal year since our incorporation in 2006. We experienced net losses of \$33.2 million during 2014, and net losses of \$31.2 million for the nine months ended September 30, 2015. As of September 30, 2015, we had an accumulated deficit of \$177.6 million. The losses and accumulated deficit were due to the substantial investments we made to grow our business and acquire customers. We anticipate that our cost of revenues and operating expenses will increase in the foreseeable future as we continue to invest to grow our business and acquire customers and develop our platform and new functionality. These efforts may prove more expensive than we currently anticipate, and we may not succeed in increasing our revenues sufficiently to offset these higher expenses. Many of our efforts to generate revenues from our business are new and unproven, and any failure to increase our revenues or generate revenues from new solutions could prevent us from attaining or increasing profitability. Furthermore, to the extent we are successful in increasing our customer base, we also could incur increased losses because costs associated with entering into customer contracts are generally incurred up front, while customers are billed over the term of the contract generally through our usage-based pricing model. We do not expect to be profitable in 2015 on the basis of generally accepted accounting principles in the United States (“GAAP”), and we cannot be certain that we will be able to attain profitability on a quarterly or annual basis, or if we do, that we will sustain profitability.

Our limited operating history makes it difficult to evaluate our current business and future prospects.

Although we began our operations in March 2006, we did not begin generating substantial revenues until 2009. Our limited operating history may make it difficult to evaluate our current business and our future prospects. We have encountered and will continue to encounter risks and difficulties frequently experienced by growing companies in rapidly developing and changing industries, including challenges in forecasting accuracy, hiring and retaining qualified employees, determining appropriate investments of our limited resources, market acceptance of our existing and future solutions, effectively integrating acquired products, competition from established companies with greater financial and technical resources, acquiring and retaining customers, managing customer deployments, making improvements to our existing products and developing new solutions. Our current operations infrastructure may require changes in order for us to achieve profitability and scale our operations efficiently. For example, we may need to automate portions of our solution to decrease our costs, ensure our marketing infrastructure is designed to drive highly qualified leads cost effectively and implement changes in our sales model to improve the predictability of our

sales and reduce our sales cycle. If we fail to implement these changes on a timely basis or are unable to implement them due to factors beyond our control, our business may suffer, our revenue may decline and we may not be able to achieve further growth or profitability. We cannot assure you that we will be successful in addressing these and other challenges we may face in the future.

Our usage-based pricing model makes it difficult to forecast revenues from our current customers and future prospects.

We primarily have a usage-based pricing model in which most of our fees are calculated as a percentage of customers' advertising spend managed on our platform. This pricing model makes it difficult to accurately forecast revenues because our customers' advertising spend managed by our platform may vary from month to month based on the variety of industries in which our advertisers operate, the seasonality of those industries and fluctuations in our customers' advertising budgets or other factors. Our subscription contracts with our direct advertiser customers generally contain a minimum monthly fee, which is generally greater than one-half of our estimated monthly revenues from the customer at the time the contract is signed, and, as a result, the monthly minimum may not be a good indicator of our revenues from that customer. In addition, advertisers that use our platform through our agency customers typically do not have a minimum monthly spend amount or a minimum term during which they must use our platform and, as a result, the ability to forecast revenues from these advertisers is difficult. If we incorrectly forecast revenues for these

advertisers and the amount of revenue is less than projections we provide to investors, the price of our common stock could decline substantially. Additionally, if we overestimate usage, we may incur additional expenses in adding infrastructure, without a commensurate increase in revenues, which would harm our gross margins and other operating results.

The market for advertising cloud solutions is relatively new and dependent on growth in various digital advertising channels. If this market develops more slowly or differently than we expect, our business, growth prospects and financial condition would be adversely affected.

The market for advertising cloud solutions such as ours is relatively new and these solutions may not achieve or sustain high levels of demand and market acceptance. While search and display advertising has been used successfully for several years, marketing via new cloud-based advertising channels such as mobile and social media is not as well established. The future growth of our business could be constrained by the level of acceptance and expansion of emerging cloud-based advertising channels, as well as the continued use and growth of existing channels, such as search and display advertising. Even if these channels become widely adopted, advertisers and agencies may not make significant investments in solutions such as ours that help them manage their digital advertising spend across publisher platforms and advertising channels. It is difficult to predict customer adoption rates, customer demand for our platform, the future growth rate and size of the advertising cloud solutions market or the entry of competitive solutions. Any expansion of the market for advertising cloud solutions depends on a number of factors, including the growth of the cloud-based advertising market, the growth of social and mobile as advertising channels and the cost, performance and perceived value associated with advertising cloud solutions. If advertising cloud solutions do not achieve widespread adoption, or there is a reduction in demand for digital advertising caused by weakening economic conditions, decreases in corporate spending or otherwise, it could result in reduced usage, which could decrease revenues or otherwise adversely affect our business.

If we are unable to maintain our relationships with, and access to, publishers, advertising exchange platforms and other platforms that aggregate the supply of advertising inventory, our business will suffer.

We currently depend on relationships with various publishers, including Baidu, Bing, Facebook, Google, Twitter, Yandex, Yahoo! and Yahoo! Japan, as well as advertising exchange platforms and aggregators of advertising inventory, including Google's DoubleClick Ad Exchange, Yahoo!'s Right Media, Facebook's Exchange, Microsoft's Ad Exchange, Twitter's MoPub and AppNexus. Our subscription services interface with these publishers' platforms through APIs, such as the Google AdWords API or Facebook API. We are subject to the respective platforms' standard API terms and conditions, which govern the use and distribution of data from these platforms. Our business significantly depends on having access to these APIs, particularly the Google AdWords API, which the substantial majority of our customers use, on commercially reasonable terms and our business would be harmed if any of these publishers, advertising exchanges or aggregators of advertising inventory discontinues or limits access to their platforms, modifies their terms of use or other policies or place additional restrictions on us as API users, or charges API license fees for API access. Moreover, some of these publishers, such as Google, market competitive solutions for their platforms. Because the advertising inventory suppliers control their APIs, they may develop competitive offerings that are not subject to the limits imposed on us through the API terms and conditions. Currently, restrictions in these API agreements limit our ability to implement certain functionality, require us to implement functionality in a particular manner or require us to implement certain required minimum functionality, causing us to devote development resources to implement certain functionality that we would not otherwise include in our subscription services and to incur costs for personnel to provide services to implement functionality that we are prohibited from automating. Publishers, advertising exchanges and advertising inventory aggregators update their API terms of use from time to time and new versions of these terms could impose additional restrictions on us. In addition, publishers, advertising exchanges and advertising inventory aggregators continually update their APIs and may update or modify functionality, which requires us to modify our software to accommodate these changes and to devote technical

resources and personnel to these efforts which could otherwise be used to focus on other priorities. Any of these outcomes could cause demand for our products to decrease, our research and development costs to increase, and our results of operations and financial condition to be harmed.

Our growth depends in part on the success of our relationships with advertising agencies.

Our future growth will depend, in part, on our ability to enter into successful relationships with advertising agencies. Identifying agencies and negotiating and documenting relationships with them requires significant time and resources. These relationships may not result in additional customers or enable us to generate significant revenues. Our contracts for these relationships are typically non-exclusive and do not prohibit the agency from working with our competitors or from offering competing services. Frequently, these agencies do in fact work with our competitors and compete with us. In addition, we often work with, or seek to work with, high-profile brands directly. This may not be possible where, for example, those brands obtain advertising services exclusively or primarily from advertising agencies.

We generally bill agencies for their customers' use of our platform, but in most cases the agency's customer has no direct contractual commitment to make payment to us. Furthermore, some of these agency contracts include provisions whereby the agency

is not liable for making payment to us for our subscription services if the agency does not receive a corresponding payment from its client on whose behalf the subscription services were rendered. These provisions may result in longer collections periods or our inability to collect payment for some of our subscription services. If we are unsuccessful in establishing or maintaining our relationships with these agencies on commercially reasonable terms, or if these relationships are not profitable for us, our ability to compete in the marketplace or to grow our revenues could be impaired and our operating results would suffer.

We may not be able to compete successfully against current and future competitors.

The overall market for advertising cloud solutions is rapidly evolving, highly competitive, complex, fragmented, and subject to changing technology and shifting customer needs. We face significant competition in this market and we expect competition to intensify in the future. We currently compete with large, well-established companies, such as Adobe Systems Incorporated and Google Inc. (through its wholly-owned subsidiary DoubleClick), and privately-held companies, such as Kenshoo Ltd. We also compete with channel-specific offerings, in-house proprietary tools, tools from publishers and custom solutions, including spreadsheets. Increased competition may result in reduced pricing for our solutions, longer sales cycles or a decrease of our market share, any of which could negatively affect our revenues and future operating results and our ability to grow our business.

A number of competitive factors could cause us to lose potential sales or to sell our solutions at lower prices or at reduced margins, including, among others:

- potential customers may choose to develop or continue to use internal solutions rather than paying for our solutions or may choose to use a competitor's solution that has different or additional technical capabilities;
- companies may enter our market by expanding their platforms or acquiring a competitor;
- some of our competitors, such as Adobe and Google, have greater financial, marketing and technical resources than we do, allowing them to leverage a larger installed customer base, adopt more aggressive pricing policies, and devote greater resources to the development, promotion and sale of their products and services than we can;
- channel-specific competitors, such as AdRoll Inc., Criteo S.A., MediaMath Inc., Nanigans, Inc., Rocket Fuel Inc. and Salesforce.com (through its wholly-owned subsidiary Social.com), may devote greater resources to the development, promotion and sale of their channel-specific products and services than we can; and
- publishers generally offer their tools for free, or at a reduced price, as their primary compensation is via the sale of advertising on their own or syndicated websites.

We cannot assure you that we will be able to compete successfully against current and future competitors. If we cannot compete successfully, our business, results of operations and financial condition could be negatively impacted.

Our business depends on our customers' continued willingness to manage advertising spend on our platform.

In order for us to improve our operating results, it is important that our customers continue to manage their advertising spend on our platform, increase their usage and also purchase additional solutions from us. In the case of our direct advertiser customers, we offer our solutions primarily through subscription contracts and generally bill customers over the related subscription period, which is generally one year or longer. During the term of their contracts, our direct advertiser customers generally have no obligation to maintain or increase their advertising spend on our platform beyond a specified minimum monthly fee, which is typically set at the time the contract is signed and is generally greater than half of the monthly amount we anticipate the customer will spend. Our direct advertiser customers generally have no renewal obligation after the initial or then-current renewal subscription period expires, and even if customers renew contracts, they may decrease the level of their digital advertising spend managed through our platform, resulting in lower revenues from that customer. Advertisers that we serve through our arrangements with our advertising agencies generally do not have any contractual commitment to use our platform. Our customers' usage may decline or fluctuate as a result of a number of factors, including, but not limited to, their satisfaction with our platform

and our customer support, the frequency and severity of outages, the pricing of our, or competing, solutions, the effects of global economic conditions and reductions in spending levels or changes in our customers' strategies regarding digital advertising. Due to our limited historical experience, we may not be able to accurately predict future usage trends. If our customers renew on less favorable terms or reduce their advertising spend on our platform, our revenues may grow more slowly than expected or decline.

We incur upfront costs associated with onboarding advertisers to our platform and may not recoup our investment if we do not maintain the advertiser relationship over time.

Our operating results may be negatively affected if we are unable to recoup our upfront costs for onboarding new advertisers to our platform. Upfront costs when adding new advertisers generally include sales commissions for our sales force, expenses associated

with entering customer data into our platform and other implementation-related costs. Because our customers, including direct advertisers and agencies, are billed over the term of the contract, if new customers sign contracts with short initial subscription periods and do not renew their subscriptions, or otherwise do not continue to use our platform to a level that generates revenues in excess of our upfront expenses, our operating results could be negatively impacted. In cases in which the implementation process is particularly complex, the revenues resulting from the customer under our contract may not cover the upfront investment, so if a significant number of these customers do not renew their contracts, it could negatively affect our operating results.

Because we generally bill our customers over the term of the contract, near term decline in new or renewed subscriptions may not be reflected immediately in our operating results.

Most of our revenues in each quarter are derived from contracts entered into with our customers during previous quarters. Consequently, a decline in new or renewed subscriptions in any one quarter may not be fully reflected in our revenues for that quarter. Such declines, however, would negatively affect our revenues in future periods and the effect of significant downturns in sales and market acceptance of our solutions, and potential changes in our rate of renewals or renewal terms, may not be fully reflected in our results of operations until future periods. In addition, we may be unable to adjust our cost structure rapidly, or at all, to take account of reduced revenues. Our subscription model also makes it difficult for us to rapidly increase our total revenues through additional sales in any period, as revenues from new customers must be earned over the applicable subscription term based on the value of their monthly advertising spend.

We have been dependent on our customers' use of search advertising. Any decrease in the use of search advertising or our inability to further penetrate social and display advertising channels would harm our business, growth prospects, operating results and financial condition.

Historically, our customers have primarily used our solutions for managing their search advertising, including mobile search advertising, and the substantial majority of our revenues are derived from advertisers that use our platform to manage their search advertising. We expect that search advertising will continue to be the primary channel used by our customers for the foreseeable future. Should our customers lose confidence in the value or effectiveness of search advertising, or if search advertising growth moderates or declines, the demand for our solutions may decline. In addition, our failure to achieve market acceptance of our solution for the management of social and display advertising spend would harm our growth prospects, operating results and financial condition.

Our sales cycle can be long and unpredictable and require considerable time and expense, which may cause our operating results to fluctuate.

The sales cycle for our solutions, from initial contact with a potential lead to contract execution and implementation, varies widely by customer, but can take up to nine months. Some of our customers undertake a significant evaluation process that frequently involves not only our solutions but also those of our competitors, which has in the past resulted in extended sales cycles. Our sales efforts involve educating our customers about the use, technical capabilities and benefits of our platform. In addition, under certain circumstances, we sometimes offer an initial term, typically of a few months in duration, to new customers who may terminate their subscription at any time during this initial period before the fixed term contract commences. We have no assurance that the substantial time and money spent on our sales efforts will produce any sales. If our sales efforts result in a new customer subscription, the customer may terminate its subscription during the initial period, after we have incurred the expenses associated with entering the customer's data in our platform and related training and support. If sales expected from a customer are not realized in the time period expected or not realized at all, or if a customer terminates during the initial period, our business, operating results and financial condition could be adversely affected.

Our ability to generate revenue depends on our collection of significant amounts of data from various sources.

Our ability to optimize the delivery of internet advertisements for our customers depends on our ability to successfully leverage data, including data that we collect from our customers as well as data provided by publishers and from third parties. Using cookies and similar tracking technologies, we collect information about the interaction of users with our advertisers' and publishers' websites. Our ability to successfully leverage such data is dependent upon our continued ability to access and utilize such data. Our ability to access and use such data could be restricted by a number of factors, including consumer choice, restrictions imposed by advertisers and publishers, changes in technology, and new developments in laws, regulations, and industry standards.

If consumer resistance to the collection and sharing of the data used to deliver targeted advertising, increased visibility of consent / Do Not Track mechanisms as a result of industry regulatory and/or legal developments, and/or the development and deployment of new technologies result in a material impact on our ability to collect data, this will materially impair the results of our operations.

Material defects or errors in our software platform could harm our reputation, result in significant costs to us and impair our ability to sell our subscription services.

The software applications underlying our subscription services are inherently complex and may contain material defects or errors, which may cause disruptions in availability, misallocation of advertising spend or other performance problems. Any such errors, defects, disruptions in service or other performance problems with our software platform could negatively impact our customers' businesses or the success of their advertising campaigns and cause harm to our reputation. If we have any errors, defects, disruptions in service or other performance problems with our software platform, customers could elect not to renew or reduce their usage or delay or withhold payment to us, which could result in an increase in our provision for doubtful accounts or an increase in the length of collection cycles for accounts receivable. Errors, defects, disruptions in service or other performance problems could also result in customers making warranty or other claims against us, our giving credits to our customers toward future advertising spend or costly litigation. As a result, material defects or errors in our platform could have a material adverse impact on our business and financial performance.

The costs incurred in correcting any material defects or errors in our software platform may be substantial and could adversely affect our operating results. After the release of new versions of our software, defects or errors may be identified from time to time by our internal team and by our customers. We implement bug fixes and upgrades as part of our regularly scheduled system maintenance. If we do not complete this maintenance according to schedule or if customers are otherwise dissatisfied with the frequency and/or duration of our maintenance services, customers could elect not to renew, or delay or withhold payment to us, or cause us to issue credits, make refunds or pay penalties.

We primarily derive our revenues from a single software platform and any factor adversely affecting subscriptions to our platform could harm our business and operating results.

We primarily derive our revenues from sales of a single software platform. As such, any factor adversely affecting subscriptions to our platform, including product release cycles, market acceptance, product competition, performance and reliability, reputation, price competition, and economic and market conditions, could harm our business and operating results.

If mobile connected devices, their operating systems or content distribution channels, including those controlled by our competitors, develop in ways that prevent our advertising campaigns from being delivered to their users, our ability to grow our business will be impaired.

Our success in the mobile channel depends upon the ability of our technology platform to integrate with mobile inventory suppliers and provide advertising for most mobile connected devices, as well as the major operating systems that run on them and the applications that are downloaded onto them. The design of mobile devices and operating systems is controlled by third parties with whom we do not have any formal relationships. These parties frequently introduce new devices, and from time to time they may introduce new operating systems or modify existing ones. Network carriers may also impact the ability to access specified content on mobile devices. If our solution were unable to work on these devices or operating systems, either because of technological constraints or because an operating system or app developer, device maker or carrier wished to impair our ability to purchase inventory and provide advertisements, our ability to generate revenue could be significantly harmed.

We primarily use a single third-party data center to deliver our services. Any disruption of service at this facility could harm our business.

While we utilize two third-party data centers in total, we manage a significant portion of our services and serve substantially all of our customers from only a single third-party data center facility. While we control the actual

computer, network and storage systems upon which our platform runs, and deploy them to the data center facility, we do not control the operation of the facility. The owner of the facility has no obligation to renew the agreement with us on commercially reasonable terms, or at all. If we are unable to renew the agreement on commercially reasonable terms, we may be required to transfer to a new facility or facilities, and we may incur significant costs and possible service interruption in connection with doing so.

The facility is vulnerable to damage or service interruption resulting from human error, intentional bad acts, earthquakes, hurricanes, floods, fires, war, terrorist attacks, power losses, hardware failures, systems failures, telecommunications failures and similar events. Moreover, while we have a disaster recovery plan in place, we do not maintain a “hot failover” instance of our software platform permitting us to immediately switch over in the event of damage or service interruption at our data center. The occurrence of a natural disaster or an act of terrorism, any outages or vandalism or other misconduct, or a decision to close the facility without adequate notice or other unanticipated problems could result in lengthy interruptions in our services.

Any changes in service levels at the facility or any errors, defects, disruptions or other performance problems at or related to the facility that affect our services could harm our reputation and may damage our customers' businesses. Interruptions in our services might reduce our revenues, subject us to potential liability, or result in reduced usage of our platform. In addition, some of our customer contracts require us to issue credits for downtime in excess of certain levels and in some instances give our customers the ability to terminate their subscriptions.

We also depend on third-party Internet-hosting providers and continuous and uninterrupted access to the Internet through third-party bandwidth providers to operate our business. If we lose the services of one or more of our Internet-hosting or bandwidth providers for any reason or if their services are disrupted, for example due to viruses or "denial-of-service" or other attacks on their systems, or due to human error, intentional bad acts, power loss, hardware failures, telecommunications failures, fires, wars, terrorist attacks, floods, earthquakes, hurricanes, tornadoes or similar events, we could experience disruption in our ability to offer our solutions or we could be required to retain the services of replacement providers, which could increase our operating costs and harm our business and reputation.

If we cannot efficiently implement our solutions for customers, we may lose customers.

Our customers have a variety of different data formats, enterprise applications and infrastructure and our platform must support our customers' data formats and integrate with complex enterprise applications and infrastructures. If our platform does not currently support a customer's required data format or appropriately integrate with a customer's applications and infrastructure, then we may choose to configure our platform to do so, which would increase our expenses. Additionally, we do not control our customers' implementation schedules. As a result, as we have experienced in the past, if our customers do not allocate internal resources necessary to meet their implementation responsibilities or if we face unanticipated implementation difficulties, the implementation may be delayed. Further, in the past, our implementation capacity has at times constrained our ability to successfully implement our solutions for our customers in a timely manner, particularly during periods of high demand. If the customer implementation process is not executed successfully or if execution is delayed, we could incur significant costs, customers could become dissatisfied and decide not to increase usage of our platform, not to use our platform beyond an initial period prior to their term commitment and revenue recognition could be delayed. In addition, competitors with more efficient operating models with lower implementation costs could penetrate our customer relationships.

Additionally, large customers may request or require specific features or functions unique to their particular business processes, which increase our upfront investment in sales and deployment efforts and the revenues resulting from the customers under our typical contract length may not cover the upfront investments. If prospective large customers require specific features or functions that we do not offer, then the market for our solution will be more limited and our business could suffer. In addition, supporting large customers could require us to devote significant development services and support personnel and strain our personnel resources and infrastructure. If we are unable to address the needs of these customers in a timely fashion or further develop and enhance our solution, these customers may not renew their subscriptions, seek to terminate their relationship with us, renew on less favorable terms, or reduce their advertising spend on our platform. If any of these were to occur, our revenues may decline and our operating results could be adversely affected.

If we are unable to maintain or expand our sales and marketing capabilities, we may not be able to generate anticipated revenues.

Increasing our customer base and achieving broader market acceptance of our software platform will depend to a significant extent on our ability to expand our sales and marketing operations and activities. We expect to be substantially dependent on our sales force to obtain new customers. We may expand our sales team in order to increase revenues from new and existing customers and to further penetrate our existing markets and expand into new markets, but may not be able to attract and hire qualified sales personnel quickly enough or at all. Our solutions

require a sophisticated sales force with specific sales skills and technical knowledge. Competition for qualified sales personnel is intense, and we may not be able to retain our existing sales personnel or attract, integrate or retain sufficient highly qualified sales personnel.

Our ability to achieve revenue growth in the future will depend, in large part, on our success in recruiting, training and retaining sufficient numbers of sales personnel. These new employees require significant training and experience before they achieve full productivity. As a result, the cost of hiring and carrying new representatives cannot be offset by the revenues they produce for a significant period of time. Our recent hires and planned hires may not become productive as quickly as we would like, and we may not be able to hire or retain sufficient numbers of qualified individuals in the markets where we do business. Our business will be seriously harmed if these expansion efforts do not work as planned or generate a corresponding significant increase in revenues.

Any failure to offer high-quality technical support services may adversely affect our relationships with our customers and harm our financial results.

Our customers depend on our support organization to resolve any technical issues relating to our solutions. In addition, our sales process is highly dependent on the quality of our solutions, our business reputation and on strong recommendations from our existing customers. Any failure to maintain high-quality technical support, or a market perception that we do not maintain high-quality support, could harm our reputation, adversely affect our ability to sell our solutions to existing and prospective customers, and harm our business, operating results and financial condition.

We offer technical support services with our solutions and may be unable to respond quickly enough to accommodate short-term increases in customer demand for support services. We also may be unable to modify the format of our support services to compete with changes in support services provided by competitors. It is difficult to predict customer demand for technical support services and if customer demand increases significantly, we may be unable to provide satisfactory support services to our customers. Additionally, increased customer demand for these services, without corresponding revenues, could increase costs and adversely affect our operating results.

If our security measures are breached or unauthorized access to customer data or our data is otherwise obtained, our solutions may be perceived as not being secure, customers may reduce the use of or stop using our solutions and we may incur significant liabilities.

In the ordinary course of our business, we maintain sensitive data on our networks, including our intellectual property and proprietary or confidential business information relating to our business and that of our customers and business partners. The secure maintenance of this information is critical to our business and reputation. We believe that companies have been increasingly subject to a wide variety of security incidents, cyber-attacks and other attempts to gain unauthorized access. These threats can come from a variety of sources, ranging in sophistication from an individual hacker to a state-sponsored attack. Cyber threats may be generic, or they may be custom-crafted against our information systems. Over the past year, cyber-attacks have become more prevalent and much harder to detect and defend against. Our network and storage applications may be subject to unauthorized access by hackers or breached due to operator error, malfeasance or other system disruptions. It is often difficult to anticipate or immediately detect such incidents and the damage caused by such incidents. These data breaches and any unauthorized access or disclosure of our information or intellectual property could result in the loss of information, litigation, indemnity obligations and other liability. While we have security measures in place, our systems and networks are subject to ongoing threats and therefore these security measures may be breached as a result of third-party action, including cyber-attacks or other intentional misconduct by computer hackers, employee error, malfeasance or otherwise. This could result in one or more third parties obtaining unauthorized access to our customers' data or our data, including intellectual property and other confidential business information. Because techniques used to obtain unauthorized access or to sabotage systems change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. Third parties may also attempt to fraudulently induce employees or customers into disclosing sensitive information such as user names, passwords or other information in order to gain access to our customers' data or our data, including intellectual property and other confidential business information. If an actual or perceived breach of our security occurs, the market perception of the effectiveness of our security measures could be harmed, we could lose potential sales and existing customers or we could incur other liabilities, which could adversely affect our business.

We must develop and introduce enhancements and new features that achieve market acceptance or that keep pace with technological developments to remain competitive in our evolving industry.

We operate in a dynamic market characterized by rapidly changing technologies and industry and legal standards. The introduction of new advertising cloud solutions by our competitors, the market acceptance of solutions based on new

or alternative technologies, or the emergence of new industry standards could render our platform obsolete. Our ability to compete successfully, attract new customers and increase revenues from existing customers depends in large part on our ability to enhance and improve our existing cross-channel performance advertising cloud platform and to continually introduce or acquire new features that are in demand by the market we serve. We also must update our software to reflect changes in publishers' APIs and terms of use. The success of any enhancement or new solution depends on several factors, including timely completion, adequate quality testing, appropriate introduction and market acceptance. Any new platform or feature that we develop or acquire may not be introduced in a timely or cost-effective manner, may contain defects or may not achieve the broad market acceptance necessary to generate significant revenues. If we are unable to anticipate or timely and successfully develop or acquire new offerings or features or enhance our existing platform to meet customer requirements, our business and operating results will be adversely affected.

Our growth depends in part on the success of our strategic relationships with third parties.

Our future growth will depend on our ability to enter into successful strategic relationships with third parties. For example, we are seeking to establish relationships with third parties to develop integrations with complementary technology and content. These relationships may not result in additional customers or enable us to generate significant revenues. Identifying partners and negotiating and documenting relationships with them require significant time and resources. Our contracts for these relationships are typically non-exclusive and do not prohibit the other party from working with our competitors or from offering competing services. If we are unsuccessful in establishing or maintaining our relationships with these third parties, our ability to compete in the marketplace or to grow our revenues could be impaired and our operating results would suffer.

As a result of our customers' increased usage of our software platform, we will need to continually improve our hosting infrastructure to avoid service interruptions or slower system performance.

We have experienced continued growth in the number of advertisers, transactions and data that our hosting infrastructure supports. We seek to maintain sufficient excess capacity in our infrastructure to meet the needs of all of our customers. We also seek to maintain excess capacity to facilitate the rapid provision of new customer deployments and the expansion of existing customer deployments. For example, if we secure a large customer or a group of customers that require significant amounts of bandwidth or storage, we may need to increase bandwidth, storage, power or other elements of our application architecture and our infrastructure, and our existing systems may not be able to scale in a manner satisfactory to our existing or prospective customers.

The amount of infrastructure needed to support our customers is based on our estimates of anticipated usage. If we were to experience unforeseen increases in usage, we could be required to increase our infrastructure investments resulting in increased costs or reduced gross margins, and if we do not accurately predict our infrastructure capacity requirements, our customers could experience service outages that may subject us to financial penalties and liabilities and result in customer losses. If our hosting infrastructure capacity fails to keep pace with increased sales, customers may experience service interruptions or slower system performance as we seek to obtain additional capacity, which could harm our reputation and adversely affect our revenue growth. As use of our software platform grows and as customers use it for more complicated tasks, we will need to devote additional resources to improving our application architecture and our infrastructure in order to maintain the performance of our software platform. We may need to incur additional costs to upgrade or expand our computer systems and architecture in order to accommodate increased demand if our systems cannot handle current or higher volumes of usage. In addition, increasing our systems and infrastructure in advance of new customers would cause us to have increased cost of revenues, which can adversely affect our gross margins until we increase revenues that are spread over the increased costs.

Any failure to protect our intellectual property rights could impair our ability to protect our proprietary technology and our brand.

Our success and ability to compete depends in part upon our intellectual property. We primarily rely on a combination of copyright, trade secret and trademark laws, as well as confidentiality procedures and contractual restrictions with our employees, customers, partners and others to establish and protect our intellectual property rights. However, the steps we take to protect our intellectual property rights may be inadequate or we may be unable to secure intellectual property protection for all of our solutions. In particular, we have two issued U.S. patents.

If we are unable to protect our intellectual property, our competitors could use our intellectual property to market products and services similar to ours and our ability to compete effectively would be impaired. Moreover, others may independently develop technologies that are competitive to ours or infringe our intellectual property. The enforcement of our intellectual property rights depends on our legal actions against these infringers being successful, but we cannot

be sure these actions will be successful, even when our rights have been infringed. In addition, defending our intellectual property rights might entail significant expense and diversion of management resources. Any of our intellectual property rights may be challenged by others or invalidated through administrative processes or litigation. Any patents issued in the future may not provide us with competitive advantages or may be successfully challenged by third parties.

Furthermore, legal standards relating to the validity, enforceability and scope of protection of intellectual property rights are uncertain. Effective protection of our intellectual property may not be available to us in every country in which our solutions are available. The laws of some foreign countries may not be as protective of intellectual property rights as those in the United States, and mechanisms for enforcement of intellectual property rights may be inadequate. Accordingly, despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property.

We might be required to spend significant resources to monitor and protect our intellectual property rights, and our efforts to enforce our intellectual property rights may be met with defenses, counterclaims and countersuits attacking the validity and enforceability of our intellectual property rights. Litigation to protect and enforce our intellectual property rights could be costly, time-

consuming and distracting to management, whether or not it is resolved in our favor, and could ultimately result in the impairment or loss of portions of our intellectual property.

We could incur substantial costs as a result of any claim of infringement of another party's intellectual property rights.

In recent years, there has been significant litigation in the United States involving patents and other intellectual property rights. Companies in the Internet and technology industries are increasingly bringing and becoming subject to suits alleging infringement of proprietary rights, particularly patent rights, and our competitors may hold patents or have pending patent applications, which could be related to our business. These risks have been amplified by the increase in third parties, which we refer to as non-practicing entities, whose sole primary business is to assert such claims. We have received in the past, and expect to receive in the future, notices that claim we or our customers using our solutions have misappropriated or misused other parties' intellectual property rights. If we are sued by a third party that claims that our technology infringes its rights, the litigation could be expensive and could divert our management resources. We do not currently have an extensive patent portfolio of our own, which may limit the defenses available to us in any such litigation.

In addition, in most instances, we have agreed to indemnify our customers against certain claims that our subscription services infringe the intellectual property rights of third parties. Our business could be adversely affected by any significant disputes between us and our customers as to the applicability or scope of our indemnification obligations to them. The results of any intellectual property litigation to which we might become a party, or for which we are required to provide indemnification, may require us to do one or more of the following:

- cease offering or using technologies that incorporate the challenged intellectual property;
- make substantial payments for legal fees, settlement payments or other costs or damages;
  - obtain a license, which may not be available on reasonable terms, to sell or use the relevant technology; or
- redesign technology to avoid infringement.

If we are required to make substantial payments or undertake any of the other actions noted above as a result of any intellectual property infringement claims against us or any obligation to indemnify our customers for such claims, such payments or costs could have a material adverse effect upon our business and financial results.

Our use of open source technology could impose limitations on our ability to commercialize our software platform.

We use open source software in our platform. Some open source software licenses require users who distribute open source software as part of their software to publicly disclose all or part of the source code to such software and/or make available any derivative works of the open source code on unfavorable terms or at no cost. The terms of various open source licenses have not been interpreted by the U.S. courts, and there is a risk that such licenses could be construed in a manner that imposes unanticipated conditions or restrictions on our ability to market our software platform. While we monitor our use of open source software and try to ensure that none is used in a manner that would require us to disclose our source code or that would otherwise breach the terms of an open source agreement, such use could inadvertently occur and we may be required to release our proprietary source code, pay damages for breach of contract, re-engineer our applications, discontinue sales in the event re-engineering cannot be accomplished on a timely basis or take other remedial action that may divert resources away from our development efforts, any of which could cause us to breach customer contracts, harm our reputation, result in customer losses or claims, increase our costs or otherwise adversely affect our business and operating results.

If the market for cloud-based software develops more slowly than we expect or declines, our business could be harmed.

The cloud computing market is not as mature as the market for on-premise software, and it is uncertain whether cloud computing will achieve and sustain high levels of customer demand and market acceptance. If other cloud computing providers experience security incidents, loss of customer data, disruptions in delivery or other problems, the market for cloud computing as a whole, including our solution, may be negatively affected. If cloud computing does not achieve widespread adoption, or there is a reduction in demand for cloud computing caused by a lack of customer acceptance, technological challenges, weakening economic conditions, security or privacy concerns, competing technologies and products, decreases in corporate spending or otherwise, it could result in decreased revenues or increased expenses from development of alternative on-premise solutions and our business could be adversely affected.

Because our long-term success depends, in part, on our ability to expand our sales to customers outside the United States, our business will be susceptible to risks associated with international operations.

We currently maintain offices and/or have sales personnel in Australia, China, England, France, Germany, Ireland and Japan, as well as the United States. As we continue to expand our customer base outside the United States, our business will be increasingly susceptible to risks associated with international operations. However, we have a limited operating history outside the United States, and our ability to manage our business and conduct our operations internationally requires considerable management attention and resources and is subject to particular challenges of supporting a rapidly growing business in an environment of diverse cultures, languages, customs, tax laws, legal systems, alternate dispute systems and regulatory systems. The risks and challenges associated with international expansion include:

- the need to support and integrate with local publishers and partners;
- continued localization of our platform, including translation into foreign languages and associated expenses;
- competition with companies that have greater experience in the local markets than we do or who have pre-existing relationships with potential customers in those markets;
- compliance with multiple, potentially conflicting and changing governmental laws and regulations, including employment, tax, privacy and data protection laws and regulations;
- compliance with anti-bribery laws, including compliance with the Foreign Corrupt Practices Act;
- difficulties in invoicing and collecting in foreign currencies and associated foreign currency exposure;
- difficulties in staffing and managing foreign operations and the increased travel, infrastructure and legal compliance costs associated with international operations;
