Notes to Condensed Consolidated Financial Statements

NOTE 1 - BASIS OF PRESENTATION

The interim condensed consolidated financial statements of Coeur Mining, Inc. and its subsidiaries (collectively, “Coeur” or the “Company”) are unaudited. In the opinion of management, all adjustments and disclosures necessary for the fair presentation of these interim statements have been included. The results reported in these interim statements may not be indicative of the results which will be reported for the year ending December 31, 2016. The condensed consolidated December 31, 2015 balance sheet data was derived from audited consolidated financial statements. Accordingly, these unaudited interim condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Recent Accounting Standards

In August 2016, the FASB issued ASU 2016-15, “Statement of Cash Flows (Topic 230),” which provides guidance on presentation and classification of certain cash receipts and payments in the statement of cash flows. These changes become effective for the Company's fiscal year beginning January 1, 2018. The Company is currently evaluating the potential impact of implementing these changes on the Company's consolidated cash flows.

In March 2016, the FASB issued ASU 2016-09, “Improvements to Employee Share-Based Payment Accounting,” which amends several aspects of the accounting for share-based payment transaction, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. These changes become effective for the Company's fiscal year beginning January 1, 2017. The Company is currently evaluating the potential impact of implementing these changes on the Company's consolidated financial position, results of operations, and cash flows.

In February 2016, the FASB issued ASU 2016-02, “Leases,” which will require lessees to recognize assets and liabilities for the rights and obligations created by most leases on the balance sheet. These changes become effective for the Company's fiscal year beginning January 1, 2019. Modified retrospective adoption for all leases existing at, or entered into after, the date of initial application, is required with an option to use certain transition relief. The Company is currently evaluating the potential impact of implementing these changes on the Company's consolidated financial position, results of operations, and cash flows.

In November 2015, the FASB issued ASU 2015-17, “Balance Sheet Classification of Deferred Taxes,” which requires entities with a classified balance sheet to present all deferred tax assets and liabilities as non-current. The updated guidance became effective upon early adoption for the Company's fiscal year beginning January 1, 2015, and resulted in a reclassification of amounts from Current deferred tax assets to Non-current deferred tax assets and Current deferred tax liabilities to Non-current deferred tax liabilities in the current and prior periods.

In September 2015, the FASB issued ASU 2015-16, “Simplifying the Accounting for Measurement-Period Adjustments,” which eliminates the requirement for an acquirer to retrospectively adjust the financial statements for measurement-period adjustments that occur in periods after a business combination is consummated. These changes become effective for the Company's fiscal year beginning January 1, 2016. The Company's adoption had no impact on the Company's consolidated financial position, results of operations, and cash flows.

In August 2015, the FASB issued ASU 2015-14, “Deferral of the Effective Date,” which defers the effective date of ASU 2014-09, “Revenue from Contracts with Customers” to January 1, 2018. The Company is currently evaluating the potential impact of adopting the prescribed changes on the Company's consolidated financial position, results of operations, and cash flows.

In July 2015, the FASB issued ASU 2015-11, “Simplifying the Measurement of Inventory,” which provides a revised, simpler measurement for inventory to be measured at the lower of cost and net realizable value. These changes become effective for the Company's fiscal year beginning January 1, 2018. The Company is currently evaluating the potential impact of implementing these changes on the Company's consolidated financial position, results of operations, and cash flows.

In April 2015, the FASB issued ASU 2015-03, "Simplifying the Presentation of Debt Issuance Costs," which requires that debt issuance costs related to a recognized debt liability be presented as a reduction to the carrying amount of that debt liability, not as an asset. The updated guidance became effective under early adoption for the Company's fiscal year beginning January 1, 2015, and resulted in a reclassification of amounts from Other Non-current Assets to Debt in the current and prior periods.

In February 2015, the FASB issued ASU 2015-02, "Amendments to the Consolidation Analysis," which amends the consolidation requirements in ASC 810. These changes become effective for the Company's fiscal year beginning January 1, 2016. The Company's adoption had no impact on the Company's consolidated financial position, results of operations, and cash flows.

NOTE 3 – SEGMENT REPORTING

The Company's operating segments include the Palmarejo complex, Rochester, Kensington, Wharf, and San Bartolomé mines, and Coeur Capital. All operating segments are engaged in the discovery and mining of gold and silver and generate the majority of their revenues from the sale of these precious metals with the exception of Coeur Capital, which primarily holds the Endeavor silver stream. Other includes the La Preciosa project, Joaquin project, corporate office, elimination of intersegment transactions, and other items necessary to reconcile to consolidated amounts.

NOTE 4 – RECLAMATION

Reclamation and mine closure costs are based principally on legal and regulatory requirements. Management estimates costs associated with reclamation of mining properties. On an ongoing basis, management evaluates its estimates and assumptions, and future expenditures could differ from current estimates.

Changes to the Company's asset retirement obligations for operating sites are as follows:

In thousands	Three months ended September 30,		Nine months ended September 30,

The Company has accrued \$1.5 million and \$3.2 million at September 30, 2016 and December 31, 2015, respectively, for reclamation liabilities related to former mining activities, which are included in Reclamation.

NOTE 5 – STOCK-BASED COMPENSATION

The Company has stock incentive plans for executives and eligible employees. Stock awards include stock options, restricted stock, and performance shares. Stock-based compensation expense for the three and nine months ended September 30, 2016 and 2015 was \$2.3 million and \$1.6 million and \$7.5 million and \$6.4 million, respectively. At September 30, 2016, there was \$8.1 million of unrecognized stock-based compensation cost which is expected to be recognized over a weighted-average remaining vesting period of 1.5 years. During the nine months ended September 30, 2016, the supplemental incentive accrual increased \$0.8 million to \$2.0 million.

NOTE 6 – RETIREMENT SAVINGS PLAN

The Company has a 401(k) retirement savings plan that covers all eligible U.S. employees. Eligible employees may elect to contribute up to 75% of base salary, subject to ERISA limitations. In addition, the Company has a deferred compensation plan for employees whose benefits under the 401(k) plan are limited by federal regulations. The Company generally makes matching contributions equal to 100% of the employee's contribution up to 4% of the employee's salary. The Company may also provide an additional contribution based on an eligible employee's salary. Total plan expenses (income) recognized for the three and nine months ended September 30, 2016 and 2015 were \$2.3 million and \$(0.7) million and \$4.2 million and \$2.8 million, respectively.

Coeur Mining, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

The Company's effective tax rate is impacted by recurring items, such as foreign exchange rates on deferred tax balances, uncertain tax position and mining tax expense accruals, and the full valuation allowance on the deferred tax assets relating to losses in the United States and certain foreign jurisdictions. During the third quarter, the Company completed a legal entity reorganization to integrate recent acquisitions resulting in a valuation allowance release of \$40.8 million and recorded a \$15.0 million deferred tax benefit related to unremitted earnings. In addition, the Company's consolidated effective income and mining tax rate is a function of the combined effective tax rates and foreign exchange rates in the jurisdictions in which it operates. Variations in the jurisdictional mix of income and loss and foreign exchange rates result in significant fluctuations in our consolidated effective tax rate.

A valuation allowance is provided for deferred tax assets for which it is more likely than not that the related tax benefits will not be realized. Each quarter, the Company analyzes its deferred tax assets and, if it is determined that the Company will not realize all or a portion of its deferred tax assets, it will record or increase a valuation allowance. Conversely, if it is determined that the Company will ultimately be more likely than not able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of risk factors that could impact the Company's ability to realize its deferred tax assets. For additional information, please see the sections titled "Risk Factors" set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 and the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2016.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. The statute of limitations remains open from 2012 forward for the U.S. federal jurisdiction and from 2008 forward for certain other foreign jurisdictions. As a result of statutes of limitation that will begin to expire within the next 12 months in various jurisdictions and possible settlements of audit-related issues with taxing authorities in various jurisdictions with respect to which none of the issues are individually significant, the Company believes that it is reasonably possible that the total amount of its net unrecognized income tax benefits will decrease between \$3.5 million and \$4.5 million in the next 12 months.

At September 30, 2016 and December 31, 2015, the Company had \$22.6 million and \$17.9 million of total gross unrecognized tax benefits, respectively. If recognized, these unrecognized tax benefits would positively impact the Company's effective income tax rate. The Company's continuing practice is to recognize potential interest and/or penalties related to unrecognized tax benefits as part of its income tax expense. At September 30, 2016 and December 31, 2015, the amount of accrued income-tax-related interest and penalties was \$9.0 million and \$9.2 million, respectively.

NOTE 9 – NET INCOME (LOSS) PER SHARE

Basic net income (loss) per share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share reflects the potential dilution that would occur if securities or other contracts to issue common stock were exercised or converted into common stock.

For the three and nine months ended September 30, 2016 and 2015, 215,298 and 3,302,701 shares and 404,543 and 3,251,347 shares, respectively, of common stock equivalents related to equity-based awards were not included in the diluted per share calculation as the shares would be antidilutive.

The 3.25% Convertible Senior Notes (“Convertible Notes”) were not included in the computation of diluted net income (loss) per share for the three and nine months ended September 30, 2016 and 2015 because there is no excess value upon conversion over the principal amount of the Convertible Notes. The outstanding Convertible Notes were redeemed in the third quarter of 2016.

During the second quarter 2016, the Company completed a \$75.0 million “at the market” stock offering (“\$75.0 million offering”). In connection with the \$75.0 million offering, the Company sold 9,253,016 shares of its common stock at an average price of \$8.11 per share.

Pursuant to an equity distribution agreement dated September 9, 2016, the Company may issue and sell shares of its common stock from time to time through ordinary broker transactions having an aggregate offering price of up to \$200.0 million, with the net proceeds available for repayment of indebtedness and other general corporate purposes. The terms of sales transactions under the agreement, including trading day(s), number of shares sold in the aggregate, number of shares sold per trading day, and the floor selling price per share, are proposed by the Company to the sales agents. Whether or not the Company engages in sales from time to time may depend on a variety of factors, including share price, our cash resources, customary black-out restrictions, and whether we have any material nonpublic information. The agreement can be terminated by the Company at any time, and the Company has initially authorized sales under the agreement through no later than June 30, 2017. The shares issued under the equity distribution agreement are registered under the Securities Act of 1933, as amended, pursuant to the Company’s shelf registration statement on Form S-3, which was filed with the SEC on March 29, 2016. At September 30, 2016, the Company had sold 4,293,785 shares under the agreement for net proceeds of approximately \$53.4 million, net of commissions and fees of approximately \$1.2 million.

Accounting standards establish a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1), secondary priority to quoted prices in inactive markets or observable inputs (Level 2), and the lowest priority to unobservable inputs (Level 3).

Notes to Consolidated Financial Statements

The following table presents the Company's financial assets and liabilities measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

		Fair Value at September 30, 2016

	\$15,058	\$—	\$508	\$14,550	

The Company's investments in equity securities are recorded at fair market value in the financial statements based primarily on quoted market prices. Such instruments are classified within Level 1 of the fair value hierarchy. Quoted market prices are not available for certain equity securities; these securities are valued using pricing models, which require the use of observable and unobservable inputs, and are classified within Level 3 of the fair value hierarchy. The Company's silver and gold options and other derivative instruments, net, which relate to concentrate and certain doré sales contracts and foreign exchange contracts, are valued using pricing models, which require inputs that are derived from observable market data, including contractual terms, forward market prices, yield curves, credit spreads, and other unobservable inputs. The model inputs can generally be verified and do not involve significant management judgment. Such instruments are classified within Level 2 of the fair value hierarchy.

The fair values of the Palmarejo royalty obligation embedded derivative and Rochester NSR royalty obligation were estimated based on observable market data including contractual terms, forward silver and gold prices, yield curves, and credit spreads, as well as the Company's current mine plan which is considered a significant unobservable input. Therefore, the Company has classified these obligations as Level 3 financial liabilities. Based on current mine plans, 1.9 years was used to estimate the fair value of the Rochester NSR royalty obligation at September 30, 2016. At September 30, 2016, there was no balance outstanding related to the Palmarejo royalty obligation embedded derivative as a result of the satisfaction of the minimum ounce obligation under the Palmarejo gold production royalty obligation in the third quarter of 2016.

No assets or liabilities were transferred between fair value levels in the nine months ended September 30, 2016. The following tables present the changes in the fair value of the Company's Level 3 financial assets and liabilities for the three and nine months ended September 30, 2016:

(1) Net of unamortized debt issuance costs and premium received of \$5.3 million.

(2) Net of unamortized debt issuance costs of \$5.0 million.

The fair values of the Convertible Notes and 7.875% Senior Notes due 2021 (the “Senior Notes”) outstanding were estimated using quoted market prices. The fair value of the Term Loan due 2020 (the “Term Loan”) approximates book value (excluding unamortized debt issuance costs) as the liability is secured, has a variable interest rate, and lacks significant credit concerns. The fair value of the San Bartolomé line of credit approximates book value due to the short-term nature of the liability and absence of significant interest rate or credit concerns. The fair value of the Palmarejo gold production royalty obligation is estimated based on observable market data including contractual terms, forward silver and gold prices, yield curves, and credit spreads, as well as the Company’s current mine plan which is considered a significant unobservable input.

NOTE 11 – DERIVATIVE FINANCIAL INSTRUMENTS

Palmarejo Gold Production Royalty

On January 21, 2009, the Company's subsidiary, Coeur Mexicana, S.A. de C.V. (“Coeur Mexicana”), entered into a gold production royalty agreement with a subsidiary of Franco-Nevada Corporation. The royalty covered 50% of the life of mine production from the Palmarejo mine and legacy adjacent properties, excluding production from the properties acquired in the 2015 Paramount Gold and Silver Corp. (“Paramount”) acquisition. The royalty transaction included a minimum obligation of 4,167 gold ounces per month and terminated effective as of the date payments on 400,000 gold ounces were made, which occurred in July 2016.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

The price volatility associated with the minimum royalty obligation was considered an embedded derivative. The Company was required to recognize the change in fair value of the remaining minimum obligation due to changing gold prices. Unrealized gains were recognized in periods when the gold price decreased from the previous period and unrealized losses were recognized in periods when the gold price increases. The fair value of the embedded derivative was reflected net of the Company's current credit adjusted risk free rate, which was 19.9% at December 31, 2015. The fair value of the embedded derivative at December 31, 2015 was a liability of \$5.0 million. For the three and nine months ended September 30, 2016 and 2015, the mark-to-market adjustments were losses of \$0.1 million and gains of \$3.0 million and losses of \$5.9 million and gains \$1.8 million, respectively.

Payments on the royalty obligation decreased the carrying amount of the minimum obligation and the derivative liability. Each monthly payment was an amount equal to the greater of the minimum of 4,167 ounces of gold or 50% of actual gold production multiplied by the excess of the monthly average market price of gold above \$416 per ounce, subject to a 1% annual inflation adjustment. For the three and nine months ended September 30, 2016 and 2015, realized losses on settlement of the liabilities were \$0.1 million and \$3.3 million and \$5.9 million and \$11.0 million, respectively. The mark-to-market adjustments and realized losses are included in Fair value adjustments, net.

Provisional Silver and Gold Sales

The Company enters into sales contracts with third-party smelters and refiners which, in some cases, provide for a provisional payment based upon preliminary assays and quoted metal prices. The provisionally priced sales contracts contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable recorded at the forward price at the time of sale. The embedded derivatives do not qualify for hedge accounting and are marked to market through earnings each period until final settlement. Changes in silver and gold prices resulted in provisional pricing mark-to-market losses of \$0.8 million and gains of \$0.1 million, \$0.4 million and \$0.4 million in the three and nine months ended September 30, 2016 and 2015, respectively. At September 30, 2016, the Company had outstanding provisionally priced sales of 0.3 million ounces of silver and 24,449 ounces of gold at prices of \$19.35 and \$1,315, respectively.

At September 30, 2016, the Company had the following derivative instruments that settle as follows:

Credit Risk

The credit risk exposure related to any derivative instrument is limited to the unrealized gains, if any, on outstanding contracts based on current market prices. To reduce counter-party credit exposure, the Company enters into contracts with institutions management deems credit worthy and limits credit exposure to each institution. The Company does not anticipate non-performance by any of its counterparties.

NOTE 12 – ACQUISITIONS

In July 2016, the Company acquired its joint venture partner's 20% interest in the Golden Cross joint venture on the Correnso mine in New Zealand for \$1.4 million.

On February 20, 2015, the Company completed its acquisition of the Wharf gold mine located near Lead, South Dakota, for \$99.4 million in cash. The transaction was accounted for as a business combination which requires that assets acquired and liabilities assumed be recognized at their respective fair values at the acquisition date. The Company incurred \$2.1 million of acquisition costs, which are included in Pre-development, reclamation, and other on the Condensed Consolidated Statements of Comprehensive Income (Loss).

The following table presents the unaudited pro forma summary of the Company's Condensed Consolidated Statements of Comprehensive Income (Loss) for the three and nine months ended September 30, 2016 and 2015, as if the acquisition had occurred on January 1, 2015. The following unaudited pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations as they would have been had the transaction occurred on the assumed date, nor is it necessarily an indication of trends in future results for a number of reasons, including, but not limited to, differences between the assumptions used to prepare the pro forma information, potential synergies, and cost savings from operating efficiencies.

In March 2016, Coeur sold its 2.0% NSR royalty on the Cerro Bayo mine to the operator, a subsidiary of Mandalay Resources Corporation (“Mandalay”), for total consideration of approximately \$5.7 million, consisting of \$4.0 million in cash and 2.5 million Mandalay shares. The Company recognized a \$1.9 million pre-tax gain on this sale. The mineral interest associated with the Cerro Bayo mine was included in the Coeur Capital segment.

The operator of the Endeavor mine in Australia, on which the Company has a 100% silver stream, announced in early 2016 a significant curtailment of production due to low lead and zinc prices. As a result, Coeur recorded a \$2.5 million write-down of the mineral interest associated with the Endeavor silver stream within the Coeur Capital segment at March 31, 2016.

In April 2016, Coeur sold its tiered NSR royalty on the El Gallo mine to the operator, a subsidiary of McEwen Mining Inc., for total consideration of approximately \$6.3 million, including \$1 million in contingent consideration. In anticipation of this sale, the Company recorded a \$1.9 million write-down of the mineral interest within the Coeur Capital segment at March 31, 2016.

In April 2016, Coeur closed the sale of its 2.5% NSR royalty on the La Cigarra project to Kootenay Silver Inc. for total consideration of approximately \$3.6 million, consisting of \$500,000 in cash and 9.6 million Kootenay shares. The Company recognized a \$1.2 pre-tax gain on this sale. The mineral interest associated with La Cigarra was included in the Coeur Capital segment.

In May 2016, Coeur closed on the sale of its Martha assets and related liabilities in Argentina to Hunt Mining Corp. for total cash consideration of \$3.0 million, including \$1.5 million received at closing and \$1.5 million receivable on the one-year anniversary of the closing. The Company recognized a \$5.3 million pre-tax gain on this sale.

In July 2016, the Company completed the sale of its NSR royalty on the Correnso mine in New Zealand to the operator, a subsidiary of Oceana Gold Corporation, for total consideration of \$5.4 million, including \$0.7 million in contingent consideration. The Company recognized a \$4.7 million pre-tax gain on this sale.

7.875% Senior Notes due 2021

During the third quarter of 2016, the Company entered into two privately-negotiated agreements to exchange \$10.8 million in aggregate principal amount of its Senior Notes for 0.7 million shares of common stock. Based on the closing price of the Company's common stock on the date of the exchange, the exchange resulted in a loss of \$1.2 million which is recognized in Other, net in the Company's Condensed Consolidated Statement of Comprehensive Income (Loss).

At any time prior to February 1, 2017, the Company may redeem all or part of the Senior Notes upon not less than 30 nor more than 60 days' prior notice at a redemption price equal to the sum of 100% of the principal amount thereof, a make-whole premium as of the date of redemption, and accrued and unpaid interest and additional interest, if any, thereon, to the date of redemption. In addition, the Company may redeem some or all of the Senior Notes on or after February 1, 2017, at redemption prices set forth in the Indenture for the Senior Notes, together with accrued and unpaid interest.

3.25% Convertible Senior Notes due 2028

During the third quarter of 2016, all outstanding Convertible Notes were redeemed for \$0.7 million.

Term Loan due 2020

On July 15, 2016, the Company voluntarily terminated and repaid the Term Loan for \$103.4 million including the \$99.0 million remaining principal balance and a \$4.4 million prepayment premium. The termination of the Term Loan resulted in a loss of \$8.8 million which is recognized in Other, net in the Company's Condensed Consolidated Statement of Comprehensive Income (Loss).

On June 23, 2015, the Company and certain of its subsidiaries entered into a credit agreement for the Term Loan with Barclays Bank PLC, as administrative agent (the "Term Loan Credit Agreement"). The Term Loan Credit Agreement provided for a five year \$100.0 million term loan to the Company, of which a portion of the proceeds were used to repay the Short-term Loan, and the remaining proceeds were used for general corporate purposes. The obligations under the Term Loan were secured by substantially all of the assets of the Company and its domestic subsidiaries, including the land, mineral rights and infrastructure at the Kensington, Rochester and Wharf mines, as well as a pledge of the shares of certain of the Company's subsidiaries.

Lines of Credit

San Bartolomé has two available lines of credit for an aggregate amount of \$27.0 million, both of which were undrawn at September 30, 2016.

Short-term Loan

On March 31, 2015, the Company entered into a credit agreement (the "Short-term Credit Agreement") with The Bank of Nova Scotia. The Short-term Credit Agreement provided for a \$50.0 million loan (the "Short-term Loan") to the Company. On June 25, 2015, the Short-term Loan was repaid in full, the security for the Short-term Loan was released, and the Short-term Credit Agreement was terminated.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

Capital Lease Obligations

From time to time, the Company acquires mining equipment under capital lease agreements. During the nine months ended September 30, 2016, the Company entered into new lease financing arrangements primarily for a larger haul truck fleet at its Rochester mine and mining equipment to support the continued underground mine expansion at the Palmarejo complex. All capital lease obligations are recorded, upon lease inception, at the present value of future minimum lease payments.

Palmarejo Gold Production Royalty Obligation

On January 21, 2009, Coeur Mexicana entered into a gold production royalty transaction with a subsidiary of Franco-Nevada Corporation under which the subsidiary of Franco-Nevada Corporation purchased a royalty covering 50% of the life of mine gold to be produced from the Palmarejo silver and gold mine in Mexico. On October 2, 2014, Coeur Mexicana terminated the Palmarejo gold production royalty in exchange for a termination payment of \$2.0 million, effective upon completion of the minimum ounce delivery requirement. Subsequently, Coeur Mexicana entered into a gold stream agreement (the "Gold Stream Agreement") with a subsidiary of Franco-Nevada Corporation whereby Coeur Mexicana will sell 50% of Palmarejo gold production (excluding production from the recently acquired Paramount properties) effective upon completion of the gold production royalty minimum ounce delivery requirement.

In July 2016, the remaining minimum obligation under the Palmarejo royalty agreement was satisfied and the termination of the Palmarejo royalty agreement became effective. The royalty agreement provided for a minimum obligation to be paid monthly on a total of 400,000 ounces of gold, or 4,167 ounces per month over an initial eight year period. Each monthly payment was an amount equal to the greater of 4,167 ounces of gold or 50% of actual gold production multiplied by the excess of the monthly average market price of gold above \$416 per ounce, subject to a 1% annual inflation compounding adjustment. Payments under the royalty agreement were made in cash or gold bullion. During the three months ended September 30, 2016 and 2015, the Company paid \$7.6 million and \$10.2 million, respectively and the Company paid \$27.2 million and \$30.3 million during the nine months ended September 30, 2016 and 2015, respectively. The Company recognized accretion expense for the three months ended September 30, 2016 and 2015 of \$0.0 million and \$1.6 million, respectively, and \$1.2 million and \$5.4 million for the nine months ended September 30, 2016 and 2015, respectively.

Following the completion of the minimum ounce obligation and the effective termination of the Palmarejo royalty agreement in July 2016, Coeur Mexicana began selling 50% of the Palmarejo gold production (excluding production from the recently acquired Paramount properties) for the lesser of \$800 or spot price per ounce under the Gold Stream Agreement.

NOTE 20 – COMMITMENTS AND CONTINGENCIES

Labor Union Contract

The Company maintains a labor agreement with Sindicato de Trabajadores Mineros de la Empresa Manquiri S.A. at the San Bartolomé mine in Bolivia. The San Bartolomé mine labor agreement, which became effective January 28, 2010, is currently active and does not have a fixed term. At September 30, 2016, approximately 11% of the Company's global labor force was covered by this collective bargaining agreement. The Company cannot predict whether this agreement will be renewed on similar terms or at all, whether future labor disruptions will occur or, if disruptions do occur, how long they will last.

Rochester Production Royalty

Commencing January 1, 2014, Coeur Rochester is obligated to pay a 3.4% net smelter returns royalty on up to 39.4 million silver equivalent ounces produced and sold from a portion of the Rochester mine, payable on a quarterly basis. For each calendar quarter, the royalty is payable on the actual sales prices received (exclusive of gains or losses associated with trading activities), less refining and related costs, of gold and silver produced and sold from the applicable portions of the Rochester mine. Changes in the Company's mine plan and silver and gold prices result in the recognition of mark-to-market gains or losses in Fair value adjustments, net. At September 30, 2016, a total of 20.1 million silver equivalent ounces remain outstanding under the obligation.

Palmarejo Gold Production Royalty and Gold Stream

On January 21, 2009, Coeur Mexicana entered into a gold production royalty agreement with a subsidiary of Franco-Nevada Corporation under which the subsidiary of Franco-Nevada Corporation purchased a royalty covering 50% of the life of mine gold to be produced from its Palmarejo silver and gold mine in Mexico (excluding production from the recently acquired Paramount properties). The royalty agreement provided for a minimum obligation of 4,167 ounces per month over an initial eight-year period for a total of 400,000 ounces of gold. On October 2, 2014, Coeur Mexicana terminated the Palmarejo gold production royalty in exchange for a termination payment of \$2.0 million. In July 2016, the remaining minimum obligation under the Palmarejo royalty agreement was satisfied and the termination of the Palmarejo royalty agreement became effective.

Subsequently, Coeur Mexicana entered into the Gold Stream Agreement, whereby Coeur Mexicana will sell 50% of Palmarejo gold production (excluding production from the recently acquired Paramount properties) to a subsidiary of Franco-Nevada Corporation upon completion of the gold production royalty minimum ounce delivery requirement, for the lesser of \$800 or spot price per ounce. Under the Gold Stream Agreement, Coeur Mexicana received a \$22.0 million deposit toward future deliveries under the Gold Stream Agreement.

Sites Related to Callahan Mining Corporation

In 1991, the Company acquired all of the outstanding common stock of Callahan Mining Corporation. The Company has received requests for information or notices of potential liability from state or federal agencies with regard to Callahan's operations at sites in Maine, Colorado and Washington. The Company did not make any decisions with respect to generation, transport or disposal of hazardous waste at these sites. Therefore, the Company believes that it is not liable for any potential cleanup costs either directly as an operator or indirectly as a parent. The Company anticipates that further agency interaction may occur with respect to these sites.

Callahan operated a mine and mill in Brooksville, Maine from 1968 until 1972 and subsequently disposed of the property. In 2000, the U.S. Environmental Protection Agency, or EPA, made a formal request to the Company for information regarding the site. The site was placed on the National Priorities List on September 5, 2002, and the Maine Department of Transportation, a partial owner of the property, signed a consent order in 2005. In January 2009, the EPA and the State of Maine made additional formal requests to the Company for information relating to the site, to which the Company responded. The first phase of cleanup at the site began in April 2011.

The Van Stone Mine in Stevens County, Washington consists of several parcels of land and was mined from 1926 until 1993 by multiple owners. Callahan sold its parcel in 1990. In February 2010, the State of Washington Department of Ecology notified Callahan that it, among others, is a potentially liable person (PLP) under Washington

law.

Under lease and option agreements with several owners, Callahan was involved with the Akron Mine located in Gunnison County, Colorado from 1937-1960. The United States Forest Service (“USFS”) made formal requests for information to Callahan regarding the site in December 2003, February 2007, March 2013, and November 2013. Callahan timely responded to each request. In August 2014, Callahan received a notice of potential CERCLA liability from the USFS regarding environmental contamination at the Akron Mine.

Bolivian Temporary Restriction on Mining above 4,400 Meters

On October 14, 2009, the Bolivian state-owned mining organization, COMIBOL, announced by resolution that it was temporarily suspending mining activities above the elevation of 4,400 meters above sea level while stability studies of Cerro Rico mountain are undertaken. The Company holds rights to mine above this elevation under valid contracts with COMIBOL as well as under authorized contracts with local mining cooperatives that hold their rights under contract themselves with COMIBOL. The stability studies have been completed and officially submitted to the Bolivian mining technical authorities. Accordingly, the COMIBOL suspension has expired in accordance with the terms of the resolution. As a result of the resolution, the Company temporarily adjusted its mine plan to confine mining activities to the ore deposits below 4,400 meters above sea level and timely notified COMIBOL of the need to lift the restriction. The Cooperative Reserva Fiscal, with whom the Company has one of those contracts, subsequently interpreted the COMIBOL resolution and determined that the Huacajchi deposit was not covered by such resolution. In March 2010, the Cooperative Reserva Fiscal notified COMIBOL that, based on its interpretation, it was resuming mining of high grade material above the 4,400 meter level in the Huacajchi deposit. In December 2011, the Cooperative Reserva Fiscal sent a similar notification to COMIBOL with respect to a further area above the 4,400 meter level known as Huacajchi Sur. Based on these notifications and on the absence of any objection from COMIBOL, the Company resumed limited mining operations at the San Bartolomé mine on the Huacajchi deposit and Huacajchi Sur. Despite the fact that the COMIBOL suspension has expired, the Company has not resumed mining in other areas above the 4,400 meter level due to community relations concerns and the current political climate in Bolivia.

While the COMIBOL suspension has expired, it is uncertain at this time how long the Company will continue to suspend its mining operations in areas above the 4,400 meter level other than at Huacajchi and Huacajchi Sur. If COMIBOL decides to affirmatively adopt a new resolution to restrict access above the 4,400 meter level on a permanent basis, the Company may need to further write down the carrying value of the asset. While a portion of the Company's proven and probable reserves relate to material above the 4,400 meter level at San Bartolomé, so long as operations remain suspended, there is a risk that silver may not be produced from this material at expected levels or at all, particularly given the remaining anticipated mine life of this asset. It is also uncertain if any new mining or investment policies or shifts in political attitude may affect mining in Bolivia.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion provides information that management believes is relevant to an assessment and understanding of the consolidated financial condition and results of operations of Coeur Mining, Inc. and its subsidiaries (collectively “the Company”, “our”, or “we”). We use certain non-GAAP financial performance measures in Management's Discussion and Analysis (“MD&A”) such as costs applicable to sales, all-in sustaining costs, adjusted net income (loss), EBITDA, and adjusted EBITDA. For a detailed description of each of these non-GAAP measures, please see “Non-GAAP Financial Performance Measures” at the end of this item. We believe it is important to read this discussion in conjunction with our interim unaudited Condensed Consolidated Financial Statements and the notes thereto included in this quarterly report and our Annual Report on Form 10-K for the year ended December 31, 2015 (the “2015 10-K”), as well as other information we file with the Securities and Exchange Commission. We provide certain operational and financial data on a silver equivalent basis, converting gold to silver at a 60:1 ratio of silver ounces to gold ounces. We also provide realized silver equivalent data using a ratio determined by average realized silver and gold prices during the relevant period. Silver and gold equivalence are stated at a 60:1 ratio unless otherwise noted.

Overview

We are a gold and silver producer with mines located in the United States, Mexico, and Bolivia and exploration projects in the United States, Mexico and Argentina. The Palmarejo complex, Rochester, Kensington, Wharf, and San Bartolomé mines constitute our principal sources of revenue. The Company also owns Coeur Capital, which is primarily comprised of the Endeavor silver stream.

The Company's strategy is to discover, acquire, develop and operate low-cost silver and gold mines that produce long-term cash flow, provide opportunities for growth through continued exploration, and generate superior and sustainable returns for stockholders. Management focuses on maximizing net cash flow through identifying and implementing revenue enhancement opportunities, reducing operating and non-operating costs, exercising consistent capital discipline, and efficient working capital management.

Third Quarter Highlights

• Net income of \$69.6 million (\$0.42 per share) and adjusted net income of \$38.6 million (\$0.23 per share) (see “Non-GAAP Financial Performance Measures”)

• Production of 8.6 million silver equivalent ounces, consisting of 3.5 million silver ounces and 84,871 gold ounces

• Costs applicable to sales were \$12.38 per silver equivalent ounce (\$11.96 per realized silver equivalent ounce) and \$767 per gold equivalent ounce (see “Non-GAAP Financial Performance Measures”)

• All-in sustaining costs were \$17.02 per silver equivalent ounce (\$15.89 per realized silver equivalent ounce) (see “Non-GAAP Financial Performance Measures”)

• Reduced debt by 21%, primarily through the early repayment of the Term Loan due 2020

• Satisfied minimum obligation under the Palmarejo royalty agreement; now operating under new gold stream agreement with more favorable terms that are expected to significantly increase free cash flow at Palmarejo

• Additional sale of non-core royalty assets completed for total consideration of \$5.4 million, including \$0.7 million in contingent consideration

• Capital expenditures of \$25.6 million, primarily for the development of the Jualin deposit at Kensington and the Guadalupe and Independencia underground deposits at the Palmarejo complex

• Commenced a \$200.0 million “at the market” stock offering, and sold 4,293,785 shares under the offering which generated net proceeds of approximately \$53.4 million

• Cash and cash equivalents of \$222.5 million at September 30, 2016
