## COLLINS INDUSTRIES, INC. AND SUBSIDIARIES

### Notes to Consolidated Condensed Financial Statements

(Unaudited)

#### (1) General

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

In the opinion of management, the accompanying unaudited consolidated condensed financial statements contain all adjustments (consisting of only normal recurring items) necessary to present fairly the Company's financial position at April 30, 2004 and the results of operations and the cash flows for the three and six months ended April 30, 2004 and 2003.

The Company suggests that the unaudited Consolidated Condensed Financial Statements for the three and six months ended April 30, 2004 be read in conjunction with the Company's Annual Report for the year ended October 31, 2003.

**(2) Inventories**

Inventories, which include material, labor, and manufacturing overhead, are stated at the lower of cost (FIFO) or market. See Note 3 regarding a one-time special purchase of inventory.

Major classes of inventories as of April 30, 2004 and October 31, 2003 consisted of the following:

	April 30, 2004	October 31, 2003
Chassis	\$ 8,265,765	\$ 5,727,490
Raw materials & components	13,449,032	15,980,298
Work-in-process	6,773,340	6,705,560
Finished goods	<u>9,020,989</u>	<u>7,951,558</u>
	<u>\$37,509,126</u>	<u>\$36,364,906</u>

### **(3) Long Term Debt and Shareholders Equity**

On January 7, 2004 the Company initiated purchases of normal inventory from a key supplier which carried a special, one-time purchase discount. The discount amounted to approximately \$500,000. The transaction also resulted in the Company amending its bank credit agreement to fund the purchase. The impact of this purchase increased the Company's inventories and revolving bank debt by approximately \$13.5 million at January 31, 2004. At April 30, 2004 the Company's inventories related to this special purchase amounted to \$7.0 million and the related revolving debt was \$6.6 million. The Company expects to fully utilize this inventory in normal production over the next fiscal quarter.

On December 1, 2003 the Company completed a modified Dutch auction tender offer for the purchase of a portion of its common stock. As a result, the Company purchased and retired 14.4% of its outstanding common stock (1,050,879 shares) at \$4.50 per share exclusive of transaction expenses. The purchase was financed by the Company's revolving credit facility. The effect of this transaction increased the Company's interest-bearing debt and reduced its stockholders equity by \$5.1 million.

### **(4) Earnings per Share**

Dilutive securities, consisting of options to purchase the Company's common stock and restricted stock awards, are included in the calculation of diluted weighted average common shares were 423,139 and 193,448 for the three months ended April 30, 2004 and 2003, respectively. Dilutive securities for the six months ended April 30, 2004 were 392,590 and were zero for the same period last year.

### **(5) Contingencies and Litigation**

At April 30, 2004 the Company had contingencies and pending litigation which arose in the ordinary course of business. Litigation is subject to many uncertainties and the outcome of the individual matters is not presently determinable. It is management's opinion that this litigation would not result in liabilities that would have a material adverse effect on the Company's consolidated financial position or results of operations or cash flows.

**(6) Segment Information**

The Company has three reportable segments: ambulances, buses and terminal trucks/road construction equipment. The ambulance segment produces modular and van type ambulances for sale to hospitals, ambulance services, fire departments and other governmental agencies. The bus segment produces small school buses, commercial buses and shuttle buses for sale to schools, hotel shuttle services, airports, and other governmental agencies. The terminal truck/road construction equipment segment produces off road trucks designed to move trailers and containers for warehouses, truck terminals, rail yards, rail terminals and shipping ports and produces a line of road construction equipment.

Consolidated Total	<u>\$74,181</u>	<u>\$73,988</u>

**(7) Guarantees and Warranties**

## Letters of Credit

The Company has issued various standby letters of credit in the ordinary course of business. No liability has been reflected in the accompanying balance sheet under and no draws on the Company's standby letters of credit have ever been made. The current outstanding standby letters of credit are limited to (i) a letter of credit originally issued approximately 15 years ago (renewable annually) as required under Kansas law to backup self-insured reserves for workers compensation insurance, (ii) a declining standby letter of credit required under Texas law to backup certain industrial revenue bonds issued for a plant expansion in Longview, Texas in 1999 that is renewable annually and (iii) other standby letters of credit related to periodic bids and issued for other similar purposes. A default in meeting an obligation or condition under the above-referenced standby letters of credit could require the Company to record a liability. The letters of credit outstanding at April 30, 2004 are summarized as follows:

<u>Purpose</u>	<u>Amount</u>	<u>Date of Expiration</u>
Workers compensation Kansas self-insurance reserves	\$1,373,000	April 1, 2005
Industrial revenue bond-Longview, Texas [a]	1,618,411	September 16, 2004
Bids and other	249,285	Various

[a] All assets (originally \$3.0 million) acquired with the proceeds of the Longview, Texas industrial revenue bonds would also be available to offset any defaults under these obligations. The liquidation amount of such assets is not reasonably estimable.

## Warranties

The Company's products generally carry explicit product warranties that extend from several months to more than a year, based on terms that are generally accepted in the marketplace. Certain components included in the Company's end products (such as chassis, engines, axles, transmissions, tires, etc.) may include warranties from original equipment manufacturers (OEM). These OEM warranties are generally passed on to the end customer of the Company's products and the customer generally deals directly with the applicable component manufacturer. The Company records provisions for estimated warranty and other related costs at the time of sale based on historical warranty loss experience and periodically adjusts these provisions to reflect actual experience. Certain warranty and other related claims involve matters of dispute that ultimately are resolved by negotiation, arbitration or litigation. Infrequently, a material warranty issue may arise which is beyond the scope of the Company's historical experience. The Company provides for any such warranty issues as they become known and estimable. It is reasonably possible that from time to time additional warranty and other related claims could arise from disputes or other matters beyond

the scope of the Company's historical experience. The following tables provide the changes in the Company's product warranties (in thousands):

8

	Three Months Ended	Six Months Ended
	April 30, 2004	April 30, 2004
Reconciliation of Accrued Warranties		
Accrued warranties at beginning of period	\$1,134	\$1,133

Payments and adjustments of warranties	<u>(296)</u>	<u>(635)</u>
Accrued warranties at end of period	<u>\$1,146</u>	<u>\$1,146</u>

### **(8) Stock Based Compensation**

On November 1, 2002 the Company adopted FASB Statement No. 148 (SFAS 148), Accounting for Stock-Based Compensation Transition and Disclosure. At April 30, 2004 the Company had two stock-based employee compensation plans, which are more fully described in Note 5 of the Notes to Consolidated Financial Statements in the Company's 2003 Form 10-K. The Company accounts for these plans under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees and related interpretations. No stock based compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. No stock options have been granted since 1999 and therefore, no proforma net income disclosures are required.

9

**Item 2 Management's Discussion and Analysis of Financial Condition and Result of Operations****GENERAL**

The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of the Company's consolidated results of operations and financial condition. The discussion should be read in conjunction with the consolidated financial statements and notes thereto.

**OVERVIEW**

Collins Industries, Inc. is a manufacturer of specialty vehicles and has three reportable segments: ambulances, buses and terminal trucks/road construction equipment. The ambulance segment produces modular and van type ambulances for sale to hospitals, ambulance services, fire departments and other governmental agencies. The bus segment produces small school buses, commercial buses and shuttle buses for sale to schools, hotel shuttle services, airports, and other governmental agencies. The terminal trucks/road construction equipment segment produces off-road trucks designed to move trailers and containers for warehouses, truck terminals, rail yards, rail terminals and shipping ports and produces a line of road construction equipment. Each of the Company's product groups is responsible for its own marketing activities and maintains independent relationships with dealers and distributors.

10

The accounting policies of the segments are the same as those described in the summary of significant accounting policies of the Notes to Consolidated Financial Statements in the Company's 2003 Form 10-K. The Company evaluates performance based on profit or loss from operations before income taxes not including nonrecurring gains and losses.

The Company accounts for intersegment sales and transfers as if the sales or transfers were to third parties, with all intercompany sales eliminated in consolidation.

The Company's reportable segments are strategic business units that offer different products and services. They are managed separately because each business requires different technology and marketing strategies.

The Company posted a 38% increase in its sales backlog at April 30, 2004 to \$79.1 million compared to \$57.1 million at April 30, 2003. The backlog at October 31, 2003 was \$46.7 million. The increased backlog at April 30, 2004 resulted from new orders across all of the Company's segments.

See Segment Information (Note 6 to the Consolidated Financial Statements) for quantitative segment information.

**Three months ended April 30**

Consolidated sales for the three months ended April 30, 2004 increased 10% to \$50.0 million compared to \$45.6 million for the same period last year. This increase was principally lead by a 73% improvement in sales from terminal truck/road construction products and was partially offset by a 9% decrease in ambulance sales. Additionally, sales of

bus products were impacted (reduced) by approximately \$6.2 million for the three months ended April 30, 2004 due to customer-supplied bus chassis compared to an impact (reduction) of approximately \$1.9 million for the same period last year.

Consolidated gross profit for the three months ended April 30, 2004 increased \$.92 million or 17% over the same period last year. This increase was principally due to the impact of higher sales from terminal truck/construction products and the impact of cost reductions realized from a special, one-time purchase discount offered by a major supplier. This increase was partially offset by the impact of lower sales and gross profits from the ambulance products.

Consolidated selling, general and administrative expenses for the three months ended April 30, 2004 increased \$.14 million or 3% over the same period last year. This increase was principally due to higher accrued incentives associated with higher earnings, higher insurance costs and higher corporate costs. These increases were partially offset by lower telemarketing and promotion expenses.

Interest expense for the three months ended April 30, 2004 decreased to \$.39 million compared to \$.48 million in the same period last year. This decrease was principally a result of an overall decrease of the Company's average borrowings throughout most of the second quarter of fiscal 2004.

The Company posted a consolidated net income of \$.63 million (\$.10 per share diluted) for the three months ended April 30, 2004 compared to a \$.08 million (\$.01 per share diluted) for the same period last year. The net income for the three months ended April 30, 2004 increased principally due to higher profit contributions from terminal truck/road construction equipment and bus products and lower interest costs. These increases were partially offset by lower profit contributions from ambulance products and higher corporate expenses.

**Six months ended April 30**

Consolidated sales for the six months ended April 30, 2004 increased 2% to \$91.1 million compared to \$89.4 million the same period last year. This sales increase principally resulted from higher sales from terminal truck/construction products. Additionally, sales of bus products were impacted (reduced) by approximately \$10.2 million for the six months ended April 30, 2004 due to customer-supplied bus chassis compared to an impact (reduction) of approximately \$3.0 million for the same period last year.

Consolidated gross profit for the six months ended April, 2004 increased \$.45 million or 4% over the same period last year. This increase was principally due to the impact of higher gross profit from terminal truck/road construction products. This increase was partially offset by the impact of lower sales and gross profit from the ambulance segment and by the impact of lower sales and gross profits of bus products in the first fiscal quarter ended January 31, 2004.

Consolidated selling, general and administrative expenses for the six months ended April 30, 2004 decreased \$.06 million over same period last year. This decrease was principally due to lower telemarketing and promotion expenses. These decreases were partially offset by higher accrued incentives associated with higher earnings, higher insurance costs and higher corporate costs.

Interest expense for the six months ended April 30, 2004 decreased to \$.76 million compared to \$.96 million in the same period last year. This decrease was principally a result of an overall decrease of the Company's average borrowings throughout most of fiscal 2004.

Other income for the six months ended April 30, 2004 was \$.32 million. Of this amount, \$.30 million resulted from a nonrecurring gain from the sale of a building and land.

The Company posted a consolidated net income of \$.56 million (\$.09 per share diluted) for the six months ended April 30, 2004 compared to a net loss of \$.07 million (\$.01 per share diluted) for the same period last year. The net income for the six months ended April 30, 2004 increased principally due to higher profit contributions from terminal truck/road construction products, lower interest costs and a nonrecurring gain from the sale of a building and land. These improvements were partially offset by lower profit contributions from ambulance and bus products.

## **RESULTS OF OPERATIONS**

### **AMBULANCE SEGMENT**

#### **Three months ended April 30**

For the three months ended April 30, 2004, the ambulance segment sales were \$20.9 million or 42% of the Company's consolidated sales compared to \$23.1 million or 51% for the same period in fiscal 2003. Unit volume sales of

ambulance products decreased 9% for the three months ended April 30, 2004 compared to the same period in fiscal 2003. This decrease was principally due to budgetary curtailments by certain municipalities and national not-for-profit organizations. Ambulance products selling prices in the three months ended April 30, 2004 remained unchanged compared to the same period in fiscal 2003.

For the three months ended April 30, 2004, ambulance segment gross profit decreased 3% and selling, general and administrative expenses remained flat compared to the same period last year. The gross profit decline was principally due to the lower sales volume of ambulance products discussed above and was partially offset by higher purchase discounts and incentives from chassis manufacturers.

Pretax profit of the ambulance segment decreased by 12% to \$.89 million for the three months ended April 30, 2004 compared to \$1.0 million for the same period last year principally as a result of the sales volume declines discussed above.

#### **Six months ended April 30**

For the six months ended April 30, 2004, the ambulance segment sales were \$39.0 million or 43% of the Company's consolidated sales compared to \$44.7 million or 50% for the same period in fiscal 2003. Unit volume sales of ambulance products decreased 14% for the six months ended April 30, 2004 compared to the same period in fiscal 2003. This decrease was principally due to budgetary curtailments by certain municipalities and national not-for-profit organizations. Ambulance products selling prices increased approximately 1% in the six months ended April 30, 2004 compared to the same period in fiscal 2003. This increase principally resulted from changes in product mix.

For the six months ended April 30, 2004, ambulance segment gross profit decreased 12% and selling, general and administrative expenses decreased by 4% compared to the same period in fiscal 2003. Substantially all of the gross profit decrease was a result of lower sales volumes and was partially offset by higher purchase discounts and incentives from chassis manufacturers. Selling, general and administrative expenses decreased principally as a result of lower telemarketing expenses and were partially offset by higher legal costs.

Pretax profit of the ambulance segment decreased by 29% to \$1.36 million for the six months ended April 30, 2004 compared to \$1.92 million for the same period last year principally as a result of the sales volume declines discussed above.

**Three months ended April 30**

For the three months ended April 30, 2004, bus segment sales were \$13.4 million or 27% of the Company's consolidated sales compared to \$13.4 million or 30% for the same period last year. The sales dollar volume remained flat due to the impact of higher customer-supplied chassis in the three months ended April 30, 2004. The impact of customer-supplied chassis reduced the overall sales dollar volume by approximately \$6.2 million for the three months ended April 30, 2004 compared to a reduction of approximately \$1.9 million in the same period last year. Units with customer-supplied chassis in the three months ended April 30, 2004 amounted to 61% of the total bus units sold compared to 24% for the same period last year. The overall unit volume sales of bus products, including units built on customer-supplied chassis, increased by 30% for the three months ended April 30, 2004 compared to the same period last year. This increase was principally due to increased sales to day-care providers and to church-related organizations. The average unit selling price of bus products decreased by 23% in the three months ended April 30, 2004 compared to the same period in fiscal 2003. Substantially all of this unit price decrease resulted from the impact of customer-supplied chassis discussed above.

For the three months ended April 30, 2004, gross profit increased 2% and selling, general and administrative expenses decreased by 14% compared to the same period last year. The increase in gross profit was principally due to purchase discounts from a key supplier and was partially offset by temporary manufacturing inefficiencies. The reduction in selling, general and administrative expense was principally a result of lower promotion, legal and bad debt expenses.

Pretax profit of the bus segment increased by 195% to \$.29 million for the three months ended April 30, 2004 compared to \$.1 million for the same period last year. This increase principally resulted from lower selling, general and administrative expenses discussed above.

**Six months ended April 30**

For the six months ended April 30, 2004, bus segment sales were \$22.4 million or 25% of the Company's consolidated sales compared to \$26.9 million or 30% for the same period last year. The decrease was principally the result of customer supplied chassis for bus products. Sales of bus products were impacted (reduced) by approximately \$10.2 million for the six months ended April 30, 2004 due to customer-supplied bus chassis compared to an impact (reduction) of approximately \$3.0 million for the same period last year. Units with customer-supplied chassis in the six months ended April 30, 2004 amounted to 60% of bus units produced compared to 19% for the same period last year. Unit volume sales of bus products increased by 9% for the six months ended April 30, 2004 compared to the same period in fiscal 2003. This increase was principally due to increased sales to day-care providers and to church-related organizations. The average unit price of bus products decreased by 23% in the six months ended April 30, 2004 compared to the same period in

fiscal 2003. Substantially all of this unit price decrease resulted from customer supplied chassis as discussed above.

For the six months ended April 30, 2004, bus segment gross profit decreased 19% compared to the same period last year. The decrease in gross profit was principally attributable to temporary production inefficiencies during the first six months of fiscal 2004 and by a unit volume decrease in the first quarter of fiscal 2004. The first quarter unit volume decrease was partially offset by the unit volume increase in second fiscal quarter. For the six months ended April 30, 2004, selling, general and administrative expenses decreased by 10% compared to the same period last year. This decrease was principally a result of lower promotional expenses, reduced legal costs and lower bad debt expense.

The pretax loss of the bus segment was \$.18 million for the six months ended April 30, 2004 compared to a pretax loss of \$.15 million in the same period last year. The increase in pretax loss was principally attributable to temporary production inefficiencies and unit volume decreases in the first quarter of fiscal 2004. This loss was partially offset by reductions in selling, general and administrative expenses discussed in the immediately preceding paragraph.

## **TERMINAL TRUCK/ROAD CONSTRUCTION SEGMENT**

### **Three months ended April 30**

For the three months ended April 30, 2004, terminal truck/road construction segment sales were \$15.7 million or 31% of the Company's consolidated sales compared to \$9.1 million or 20% for the same period last year. Unit volume sales of terminal truck/road construction products increased by 61% for the three months ended April 30, 2004 compared to the same period in fiscal 2003. This increase was principally due to the impact of additional export sales associated with foreign stevedoring operations, changes in currency exchange rates and higher domestic sales to intermodal and warehousing customers. Additionally, this segment experienced a rebound in the number of road sweepers sold to the domestic rental market. The average unit price of terminal truck/road construction products increased by 7% in the three months ended April 30, 2004 compared to the same period in fiscal 2003. Substantially all of this increase related to the product mix of terminal truck products.

For the three months ended April 30, 2004, terminal truck/road construction segment gross profit increased 119% and selling, general and administrative expenses increased by 8% compared to the same period last year. The increase in gross profit was principally a result of the higher sales volumes described above. The increase in selling, general and administrative expenses was principally due to higher incentives associated with improved sales and profitability and higher insurance costs. These increases were partially offset by lower promotional and telemarketing expenses.

The pretax income of the terminal truck/road construction segment increased to \$.90 million for the three months ended April 30, 2004 compared to a pretax loss of \$.01

15

million in the same period last year. The pretax income of the terminal truck/road construction segment increased principally as a result of the sales volume gains discussed above.

**Six months ended April 30**

For the six months ended April 30, 2004, terminal truck/road construction segment sales were \$29.7 million or 33% of the Company's consolidated sales compared to \$17.8 million or 20% for the same period last year. Unit volume sales of terminal truck/road construction products increased by 58% for the six months ended April 30, 2004 compared to the same period in fiscal 2003. This increase was principally due to the impact of additional export sales associated with foreign stevedoring operations, the changes in currency exchange rates and higher domestic sales to intermodal and warehousing customers. Additionally, this segment experienced a rebound in the number of road sweepers sold to the domestic rental market. The average unit price of terminal truck/road construction products increased by 6% in the six months ended April 30, 2004 compared to the same period in fiscal 2003. Substantially all of this unit price increase related to the product mix of terminal truck products.

For the six months ended April 30, 2004, terminal truck/road construction segment gross profit increased 96% and selling, general and administrative expenses increased by 6% compared to the same period last year. The increase in gross profit was principally a result of higher sales volumes described above. The increase in selling, general and administrative expenses was principally a result of higher incentives associated with improved profitability and higher insurance costs and were partially offset by lower promotional costs.

The pretax income of the terminal truck/road construction segment increased to \$1.32 million for the six months ended April 30, 2004 compared to a pretax loss of \$.13 million in the same period last year. The pretax income of the terminal truck/road construction segment increased principally as a result of the sales volume gains discussed above.

**LIQUIDITY AND CAPITAL RESOURCES**

The Company used existing credit lines, proceeds from Industrial Revenue Bonds, internally generated funds and supplier financing to fund its operations and capital expenditures for the six months ended April 30, 2004.

Cash provided by operations was \$.4 million for the six months ended April 30, 2004, compared to cash used in operations of \$8.4 million for the same period last year. Cash provided by operations was principally due to net income of \$.6 million, depreciation and amortization of \$1.7 million and a decrease in prepaid and other current assets of \$1.3 million. These increases were partially offset by increases in accounts receivable and inventories of \$1.1 million each and a reduction of accounts payable and accrued expenses of \$.6 million.

Cash used in investing activities was \$.4 million for the six months ended April 30, 2004 compared to \$2.5 million for the same period last year. The decrease in cash used by investing activities was principally due to the proceeds from the sale of a building and land in the first fiscal quarter of 2004 and higher capital expenditures for the six months ended April 30, 2003 associated with certain equipment acquired for the automation of certain ambulance operations.

Cash flow provided by financing activities was \$.05 million for the six months ended April 30, 2004 compared to \$10.7 million for the same period last year. This change principally resulted from a reduction in borrowings, the repurchase of the 1,050,879 shares of the Company's common stock in a modified Dutch auction tender offer (\$5.3 million) and a decrease in restricted cash (\$1.6 million) associated with the capital expenditures financed by Industrial Revenue Bonds in 2003.

The Company uses derivative financial instruments to reduce exposure to its variable-rate debt. On July 5, 2002, the Company entered into a \$6.8 million declining balance interest rate swap agreement to limit the effect of increases in the interest rates on its floating rate term debt through May 2005. The effect of this agreement is to convert underlying variable-rate debt based on LIBOR to fixed rate debt with an interest rate between 4.42% and 4.65% plus a margin of 175 basis points. This agreement reduces the Company's risk with respect to variable-rate debt. At April 30, 2004, the fair value of this debt was \$5.0 million, net of the fair value of the swap of \$.1 million (loss). This debt is reflected as a liability within long-term debt and capitalized leases.

The Company believes that its cash flows from operations, its credit facility with its lead bank and unused funds restricted for future capital expenditures will be sufficient to satisfy its future working capital needs, capital expenditure requirements and anticipated dividends. The total amount of unused revolving credit available to the

Company was \$11.2 million at April 30, 2004.

It is customary practice for companies in the specialty vehicle industry to enter into repurchase agreements with financing institutions to provide floor plan financing for dealers. In the event of a dealer default, these agreements generally require the repurchase of products at the original invoice price net of certain adjustments. The risk of loss under the agreements is limited to the risk that market prices for these products may decline between the time of delivery to the dealer and time of repurchased and resale by the Company. The risk is spread over numerous dealers and the Company has not incurred significant losses under these agreements. In the opinion of management, any future losses under these agreements will not have a material adverse effect on the Company's financial position or results of operations. The Company's repurchase obligation under these agreements is limited to vehicles which are in new condition and as to which the dealer still holds title. The Company's contingent obligation under such agreements was approximately \$2.6 million at April 30, 2004.

17

#### *CRITICAL ACCOUNTING PRINCIPLES AND ESTIMATES*

The Company's consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States. The preparation of these financial statements requires the use of estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. We believe that of our critical accounting policies, the following may involve a higher degree of judgments, estimates, and complexity:

#### **Inventories**

The Company values its inventories at the lower of cost or market. The company has chosen the first-in, first-out (FIFO) cost method of valuing its inventories. The effect of the FIFO method is to value ending inventories on the balance sheet at their approximate current or most recent cost. The market values for finished goods inventories are determined based on recent selling prices.

#### **Goodwill and Other Assets**

In June 2002, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142). SFAS No. 142 was effective for fiscal years beginning after December 15, 2002. Goodwill is no longer amortized over future periods, but will be assessed for impairment at least annually using a fair value test. The Company adopted this new standard on November 1, 2002.

As of October 31, 2003, the Company tested for impairment of the bus and terminal truck/road construction business segments using the discounted cash flow approach and determined that the fair values for each of these segments exceeded the related carrying values. On an on-going basis, and absent any impairment indicators, the Company will annually conduct similar tests and record any impairment loss. Management believes that the estimates of future cash flows and fair values are reasonable; however, changes in estimates of such cash flows and fair value could affect the evaluations.

### **Insurance Reserves**

Generally, the Company is self-insured for worker's compensation for certain subsidiaries and for all group medical insurance. Under these plans, liabilities are recognized for claims incurred (including claims incurred but not reported) and changes in the reserves. At the time a worker's compensation claim is filed, a liability is estimated to settle the claim. The liability for worker's compensation claims is determined based on management's estimates of the nature and severity of the claims and based on analyses by third party administrators and by various state statutes and reserve requirements. Since the liability is an estimate, the ultimate liability may be more or less than reported. If previously established accruals are

18

required to be adjusted, such amounts are included in cost of sales. Group medical reserves are funded through a trust and are estimated using historical claims' experience.

Due to the nature of the Company's products, the Company is subject to product liability claims in the normal course of business. To the extent permitted under applicable law, the Company maintains insurance to reduce or eliminate risk to the Company. This insurance coverage includes self-insured retentions that vary each year.

The Company maintains excess liability insurance with outside insurance carriers to minimize its risks related to catastrophic claims in excess of all self-insured positions. Any material change in the aforementioned factors could

have an adverse impact on our operating results.

## **Warranties**

The Company's products generally carry explicit product warranties that extend from several months to more than a year, based on terms that are generally accepted in the marketplace. Certain components included in the Company's end products (such as chassis, engines, axles, transmissions, tires, etc.) may include warranties from original equipment manufacturers (OEM). These OEM warranties are generally passed on to the end customer of the Company's products and the customer generally deals directly with the applicable component manufacturer. The Company records provisions for estimated warranty and other related costs at the time of sale based on historical warranty loss experience and periodically adjusts these provisions to reflect actual experience. Certain warranty and other related claims involve matters of dispute that ultimately are resolved by negotiation, arbitration or litigation. Infrequently, a material warranty issue may arise which is beyond the scope of the Company's historical experience. The Company provides for any such warranty issues as they become known and estimable. It is reasonably possible that from time to time additional warranty and other related claims could arise from disputes or other matters beyond the scope of the Company's historical experience.

## **Revenue Recognition**

The Company records vehicle sales and passes title to the customer, at the earlier of completion of the vehicle and receipt of full payment or shipment or delivery to the customer as specified by the customer purchase order. Customer deposits for partial payment of vehicles are deferred and treated as current liabilities until the vehicle is completed and recognized as revenue.

## *NEW ACCOUNTING PRONOUNCEMENTS*

In January 2003, the Financial Accounting Standards Board (FASB) issued Interpretation No. 46, Consolidation of Variable Interest Entities (FIN 46) which requires the consolidation of variable interest entities, as defined. FIN 46 is applicable to variable interest entities created after April 30, 2003. Variable interest entities created prior to February 1, 2003, must be consolidated effective July 1, 2003. Disclosures are required

currently if the Company expects to consolidate any variable interest entities. The Company does not have any variable interest entities; therefore, FIN 46 will not have a material effect on its consolidated results of operations or financial position.

*CAUTIONARY STATEMENTS REGARDING RISKS AND UNCERTAINTIES THAT MAY AFFECT FUTURE RESULTS*

This report and other written reports and oral statements made from time to time by the Company may contain so-called forward-looking statements about the business, financial condition and prospects of the Company, all of which are subject to risks and uncertainties. One can identify these forward-looking statements by their use of words such as expect, plans, will, estimates, forecasts, projects, and other words of similar meaning. One can also identify them by the fact that they do not relate strictly to historical or current facts. One should understand that it is not possible to predict or identify all factors, which involve risks and uncertainties. Consequently, the reader should not consider any such list or listing to be a complete statement or all potential risks or uncertainties.

The forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The Company believes the assumptions underlying these forward-looking statements are reasonable; however, any of the assumptions could be inaccurate, and therefore, actual results may differ materially from those projected in the forward-looking statements due to certain risks and uncertainties, including, but not limited to, changes in funds budgeted by Federal, state and local governments, changes in product demand, the availability of key raw materials, components and chassis, various inventory risks due to changes in market conditions, changes in competition, substantial dependence on third parties for product quality, interest rate fluctuations, adequate direct labor pools, development of new products, changes in tax and other governmental rules and regulations applicable to the Company, reliability and timely fulfillment of orders and other risks as indicated in the Company's filings with the Securities and Exchange Commission. The Company undertakes no obligation to publicly release any revisions to any forward-looking statements contained herein to reflect events or circumstances occurring after the date released or to reflect the occurrence of unanticipated events.

The Company does not assume the obligation to update any forward-looking statement. One should carefully evaluate such statements in light of factors described in the Company's filings with the Securities and Exchange Commission, especially on Forms 10-K, 10-Q and 8-K (if any).

**Item 3 Quantitative and Qualitative Disclosures About Market Risk**

There has been no material change in this disclosure.

**Item 4. Controls and Procedures**

- a) *Evaluation of disclosure controls and procedures.* Our chief executive officer and our chief financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934) as of the end of the period covered by this Form 10-Q, have concluded that, our disclosure controls and procedures were adequate and designed to ensure that the information required to be disclosed in the reports filed or submitted by us under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the required time periods.
  
- b) *Changes in internal controls over financial reporting.* There were no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) that occurred during the Company's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

**PART II OTHER INFORMATION****Item 1 - Legal Proceedings**

Not applicable

**Item 2 - Changes in Securities, Use of Proceeds and Issuer Purchases of Equity Securities**

Information regarding the repurchase of common stock during the three months ended April 30, 2004 is as follows:

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid Per Share</u>	<u>Total Number Of Shares Purchased As Part of Publicly Announced Plans or Programs</u>	<u>Maximum Number of Shares That May Yet Be Purchased Under the Plan or Programs</u>
02/01/04 02/29/04	32,036 (a)	4.75	--	--
03/01/04 03/31/04	--	--	--	--
04/01/04 04/30/04	--	--	--	--

(a)

Shares purchased to pay Federal and state income taxes on shares of Restricted Stock  
vested February 23, 2004.

**Item 3 - Defaults on Senior Securities**

Not applicable

**Item 4 - Submission of Matters to a Vote of Security-Holders**

The Company's 2004 Annual Meeting of Shareholders was held February 27, 2004. Mr. Donald Lynn Collins and Mr. William R. Patterson were each elected as director for a three-year term. Mr. Collins received 4,804,755 votes for, 40,932 withheld and no abstentions. Mr. Patterson received 4,785,225 votes for, 60,462 withheld and no abstentions. The other directors whose terms of office continued after the meeting were: Don

L. Collins, Arch Gothard III, and Don S. Peters.

**Item 5 - Other Information**

Not applicable

**Item 6 - Exhibits and Reports on Form 8-K**

(a) Exhibits

(31.1) Certifications-CEO

(31.2) Certifications-CFO

(32.1) Certification of Periodic Report-CEO

(32.2) Certification of Periodic Report-CFO

(b) Reports on Form 8-K

On February 23, 2004, the Company filed a Form 8-K furnishing its press release dated February 20, 2004, which announced its financial results for its first fiscal quarter ended January 31, 2004.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

COLLINS INDUSTRIES, INC.

Dated: June 9, 2004

By: /s/ Larry W. Sayre  
Larry W. Sayre, Vice President of Finance and Chief Financial Officer  
(Signing on behalf of the registrant and as principal accounting officer)
