Cash paid for interest	\$ 32,961	\$ 2,000
Cash paid for taxes	\$ 8,718	\$ 5,446

During the nine months ended Sept. 30, 2004, Tri-Valley issued \$712,000 (160,000 shares) of common stock in exchange for mineral interests purchased from two individuals (80,000 shares each) interest in the Richardson Alaska Gold mining claims, which was recorded as mining exploration expense in the Statement of Operations.

The accompanying notes are an integral part of these condensed financial statements.

TRI-VALLEY CORPORATION
NOTES TO CONDENSED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED
September 30, 2004 AND 2003
(Unaudited)

NOTE 1 - BASIS OF PRESENTATION

The financial information included herein is unaudited; however, such information reflects all adjustments (consisting solely of normal recurring adjustments), which are, in the opinion of management, necessary for a fair statement of results for the interim periods. The results of operations for the nine-month period ended September 30, 2004, are not necessarily indicative of the results to be expected for the full year.

The accompanying consolidated financial statements do not include footnotes and certain financial presentations normally required under generally accepted accounting principles; and, therefore, should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2003.

NOTE 2 - PER SHARE COMPUTATIONS

Per share computations are based upon the weighted average number of common shares outstanding during each year. Common stock equivalents are not included in the computations since their effect would be anti-dilutive.

NOTE 3 - RECENT ACCOUNTING PRONOUNCEMENTS

In July 2001, the FASB issued SFAS No. 143, Accounting for Asset Retirement Obligations (SFAS 143). Under SFAS 143, the fair value of a liability for an asset retirement obligation should be recorded in the period in which it is incurred. Upon settlement of the liability, an entity either settles the obligation for its recorded amount or incurs a gain or loss if the settled amount differs from the liability recorded. SFAS 143 is effective for fiscal years beginning after June 15, 2002. We have evaluated this guidance and have determined this will not have a material impact on our financial position, results of operations, or net cash flows.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. SFAS 146 nullifies the guidance of the Emerging Issues Task Force (EITF) Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). SFAS 146 requires that a liability for a cost that is associated with an exit or disposal activity be recognized when the liability is incurred. SFAS 146 also establishes that fair value is the objective for the initial measurement of the liability. The provisions of SFAS 146 are required for exit or disposal activities that are initiated after December 31, 2003. The adoption of this statement did not impact the Company's financial position, results of operations, or cash flows.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Business Review

Notice Regarding Forward-Looking Statements

This report contains forward-looking statements. The words, anticipate, believe, expect, plan, intend, estimate, could, may, foresee, and similar expressions are intended to identify forward-looking statements. These statements include information regarding expected development of the Company's business, lending activities, relationship with customers, and development in the oil and gas industry. Should one or more of these risks or uncertainties occur, or should underlying assumptions prove incorrect, actual results may vary materially and adversely from those anticipated, believed, estimated or otherwise indicated.

Petroleum Activities

Recompletions and workovers on the Martin-Severin #s 3 and 5 were approved in late July, but the unavailability of rigs to work on these wells delayed the work until late October and early November.

On the EKHO well the frac job was postponed until mid November due to all available frac equipment having been moved to the Rocky Mountain region until November first.

The Elk Ridge well has not been commercially successful to date and we are deciding on our alternatives.

We were able to acquire the permits for the Los Gatos Creek Prospect in the third quarter. However, due to rig and equipment shortages the original spud dated pf September 15th has been moved to November 15th.

Another prospect that has been developed is the Sunridge Prospect. Again, depending on rig and equipment availability we are planning to spud in late November.

On the Pimental # 1-15 we are attempting to frac a new zone, this is an ongoing job as of this date.

Precious Metals Activities

We are continuing to pursue our efforts to successfully spin-off our Richardson, Alaska gold project into a new, stand alone mining company and a new British Columbia corporation, Select International Resource Corporation, has been formed as one approach to use. The Company has also formed a new Delaware corporation, Select Resources Corporation, in the event it is preferable to use a U.S. corporation for the start up. Initially, Select will be a wholly owned subsidiary of Tri-Valley Corporation which will fund the start up. Very soon, Select will seek private placement to establish independent financing and operations. The plan is to qualify Select for an initial public offering as a stand alone company as soon as possible.

There were two property visits by geologists and prospective officers of Select. Winterizing work continued on the Richardson Road House which is owned by Tri-Valley and used for a base camp. Tri-Valley is in the process of purchasing the royalty burdens from the royalty owners with its unregistered, restricted stock to provide a clean property for transfer into Select. This is likely to cause one time, non cash loss for Tri-Valley. The Company likens this process to an actor burying out his contract in order to go on to bigger and better things.

Item 2.

(Continued)

Three Months Ended September 30, 2004 as compared with Three Months ended September 30, 2003

Total revenue was \$2,914,056 less in the quarter ended September 30, 2004 compared to the same period in 2003. Sales of natural gas were \$21,504 less in the third quarter of 2004 compared to 2003, due to certain wells being shut-in waiting on workovers.

Total costs and expenses were \$2,262,382 less for the quarter ended September 30, 2004 compared to the same quarter in 2003, primarily the result of no cost of sales of oil and gas prospects. Oil and gas lease expense was less by \$23,851 in the 2004 quarter due to less activity because some wells were shut in.

Mining exploration expenses for the third quarter of 2004 was \$130,660 less than the same period in 2003, as we had very little activity on the claim blocks. Project geology, geophysics, land and administration costs were \$2,220,693 less due to no sale of prospects therefore there were no costs. General and administrative costs were \$113,021 more in the 2004 quarter due to increased costs in investor relations of \$27,075, an increase of \$25,600 in insurance costs and increased consulting fees of \$75,875. The consulting fees were due to increasing our exploration activities by hiring additional consultants.

We had a loss of \$479,104 for the third quarter ended September 30, 2004 compared to an income of \$172,570 for the same quarter in 2003.

Nine Months ended September 30, 2004 as compared to the Nine Months ended September 30, 2003

Revenue decreased \$1,860,016 during the first nine months of the year compared to the same period in 2003 due to less income from the sale of gas prospects and less gas revenue because some wells were shut in for additional work.

Costs and expenses were \$3,908,452 for the period ending September 30, 2004 compared to \$5,005,233 for the comparable period in 2003. Mining exploration expenses were \$610,630 higher due to expensing of mining interests we bought back on our Richardson gold mining claims. Project geology, geophysics, land and administration costs were \$2,178,256 less in 2004 due to a smaller number of oil and gas prospects being sold. Interest expense was \$30,961 more for the third quarter of 2004 due to settlement of a lawsuit with Armstrong Petroleum. General and administrative costs were \$477,188 higher than in 2003. These increased costs were due to expenses related to the Armstrong lawsuit, an increase in consulting fees, higher directors and officers liability insurance premiums and higher investor relations costs.

For the nine months ended September 30, 2004 we had a loss of \$1,164,255 compared to a loss of \$401,020 for the same period in 2003.

Capital Resources and Liquidity

We have funded our oil and gas exploration activities primarily with proceeds raised through privately placed drilling programs and turnkey drilling profits. We make decisions on the amount of capital expenditures for drilling as funds become available for that purpose. We do not, as a rule, rely on borrowings to fund drilling operations or other activities.

Item 2. (Continued)

Total current assets were \$8,693,875 at September 30, 2004, compared to \$6,182,829 as of December 31, 2003. This increase is due primarily from cash received from private placement of our common stock.

Property plant and equipment increase \$199,204 in 2004 compared to December 31, 2003 due to increased inventory in tubing.

Total Current liabilities were \$7,600,926 for the nine months ended September 30, 2004, compared to \$6,473,194 for the period ended December 31, 2003. This increase is due to advances from joint venture participants in our drilling programs for drilling activities in our limited liability drilling program and expenses related to the Armstrong lawsuit.

Total shareholder equity increased \$1,592,370 due primarily to private placement of common stock.

Operating Activities. We had a positive cash flow of \$662,721 for the nine months ended September 30, 2004 compared to a positive cash flow of \$4,482,062 for the same period in 2003. This difference is due to less advances from joint venture partners and our year to date operating loss. Our primary source of funds is comprised of selling prospects and oil and gas sales.

Investing Activities. In the first nine months of 2004 we had an increase of \$220,903 in capital expenditures. This was primarily the result of tubing purchase. This is compared to \$462,138 provided by the sale of an oil and gas prospect as of September 30, 2003.

Financing Activities. Net cash provided by financing activities was (\$9852), for automobile payments and \$2,044,625 from the issuance of common stock in private transactions in 2004 compared to (\$20,635) and \$108,201 respectively for 2003.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Tri-Valley Corporation does not engage in hedging activities and does not use commodity futures or forward contracts in its cash management functions.

Item 4. Controls and Procedures

As of September 30, 2004, an evaluation was performed under the supervision and with the participation of the Company's management, including the Company's CEO and CFO, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the CEO and CFO, concluded that the Company's disclosure controls and procedures were not effective as of June 30, 2004. Because of revenue and expense recognition timing mismatching and errors made relative to the turnkey drilling program, management has determined, with their auditor's concurrence, that the 2003 annual Form 10-K and the two quarters ended June 30, 2004 should no longer be relied upon until they are restated, and amended 10-K and 10-Qs are filed. Management determined these mismatching and accounting errors were caused by a significant deficiency in internal control over financial reporting. Management has implemented procedures to prevent this in the future. Based on that evaluation, the Company's management, including the CEO and CFO, concluded that the Company's disclosure controls and procedures were effective as of September 30, 2004.

Other than the change reported in the preceding paragraph, there has been no change in the Company's internal control over financial reporting that occurred during the quarter covered by this report that has materially affected, or

is reasonably likely to materially affect, the Company's internal control over financial reporting.
