TRI-VALLEY CORPORATION
NOTES TO CONDENSED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED
September 30, 2007 and 2006
(Unaudited)

NOTE 1 - DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Description of Business

Tri-Valley Corporation (“TVC” or the Company), a Delaware corporation formed in 1971, is in the business of exploring, acquiring and developing petroleum and metal and mineral properties and interests therein. Tri-Valley has five subsidiaries and four operating segments or business lines.

- Tri-Valley Oil & Gas Company (“TVOG”) operates the oil & gas activities. TVOG derives the majority of its revenue from oil and gas drilling and turnkey development. TVOG primarily generates its own exploration prospects from its internal database, and also screens prospects from other geologists and companies. TVOG generates these geological “plays” within a certain geographic area of mutual interest. The prospect is then presented to potential co-ventures. The company deals with both accredited individual investors and energy industry companies. TVOG serves as the operator of these co-ventures. TVOG operates both the oil and gas production segment and the drilling and development segment of our business lines.
 - Select Resources Corporation (“Select”) was created in late 2004 to manage, grow and operate Tri-Valley’s mineral interests. Select operates the minerals segment of our business lines.
- Great Valley Production Services, LLC, (“GVPS”) was formed in 2006 to operate oil production services, well work over and drilling rigs, primarily for TVOG. However, from time to time TVOG may contract various units to third parties when not immediately needed for TVOG projects. Tri-Valley has retained 64% of the ownership interest and the remainder is owned by private parties. Operations began in the third quarter of 2006.
- Great Valley Drilling Company, LLC (“GVDC”) was formed in 2006 to operate oil drilling rigs, primarily in Nevada where Tri-Valley has 17,000 acres of prospective oil leases. However, because rig availability is scarce in Nevada, GVDC has an opportunity to do contract drilling for third parties in both petroleum and geothermal projects. For the time being GVDC, whose operation began in the first quarter of 2007, expects its primary activity will be contract drilling for third parties. TVC exercised its option to buy back the minority interest in GVDC in May 2007 and the buy back was finalized by the end of June 2007. The cost to buy back the minority interest was \$1,319,040. GVDC is now 100% owned by TVC.
 - Tri-Valley Power Corporation is inactive at the present time.

Basis of Presentation

The financial information included herein is unaudited; however, such information reflects all adjustments (consisting solely of normal recurring adjustments), which are, in the opinion of management, necessary for a fair statement of results for the interim periods. The results of operations for the nine-month period ended September 30, 2007, are not necessarily indicative of the results to be expected for the full year.

The accompanying consolidated financial statements do not include footnotes and certain financial presentations normally required under generally accepted accounting principles in the United States of America; and, therefore, should be read in conjunction with our Annual Report on Form 10-K, filed with the Securities and Exchange Commission on March 31, 2007, for the year ended December 31, 2006.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company, its wholly owned subsidiaries, TVOG, Select, GVDC, Tri-Valley Power Corporation, since their inception. GVPS, where the Company has retained a 64% ownership interest, is also included in the consolidation. Other partnerships in which the Company has an operating or nonoperating interest in which the Company is not the primary beneficiary and owns less than 51%, are proportionately combined. This includes Opus I, Martins-Severin, Martins-Severin Deep, and Tri-Valley Exploration 1971-1 partnerships. All material intra and intercompany accounts and transactions have been eliminated in combination and consolidation.

NOTE 2 - PER SHARE COMPUTATIONS

Per share computations are based upon the weighted-average number of common shares outstanding during each year. Common stock equivalents are not included in the computations since their effect would be anti-dilutive.

NOTE 3 – SUMMARY OF RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Accounting for Uncertainty in Income Taxes

In July 2006, the Financial Accounting Standards Board (“FASB”) issued Interpretation No. 48, “*Accounting for Uncertainty in Income Taxes*– An interpretation of FASB Statement No. 109” (“FIN 48”). This Interpretation provides a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns. We adopted this Interpretation in the first quarter of 2007 with no effect to the Company and do not expect the adoption to have a material impact on our financial position or results of operations.

Fair Value Measurements

In September 2006, the FASB issued SFAS No. 157, “*Fair Value Measurements*.” This Statement replaces multiple existing definitions of fair value with a single definition, establishes a consistent framework for measuring fair value and expands financial statement disclosures regarding fair value measurements. This Statement applies only to fair value measurements that already are required or permitted by other accounting standards and does not require any new fair value measurements. SFAS No. 157 is effective for fiscal years beginning subsequent to November 15, 2007. We will adopt this Statement in the first quarter of 2008 and do not expect the adoption to have a material impact on our financial position or results of operations.

Effects of Prior Year Misstatements

In September 2006, Staff Accounting Bulletin (“SAB”) No. 108, “*Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*.” Registrants must quantify the impact on current period financial statements of correcting all misstatements, including both those occurring in the current period and the effect of reversing those that have accumulated from prior periods. This SAB was adopted at December 31, 2006. The adoption of SAB No. 108 had no effect on our financial position or on the results of our operations.

The Fair Value Option for Financial Assets and Financial Liabilities

In February 2007, the FASB issued SFAS No. 159, "*The Fair Value Option for Financial Assets and Financial Liabilities*," which permits an entity to measure certain financial assets and financial liabilities at fair value. The objective of SFAS No. 159 is to improve financial reporting by allowing entities to mitigate volatility in reported earnings caused by the measurement of related assets and liabilities using different

NOTE 3 – RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS (Continued)

attributes, without having to apply complex hedge accounting provisions. Under SFAS No. 159, entities that elect the fair value option (by instrument) will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option election is irrevocable, unless a new election date occurs. SFAS No. 159 establishes presentation and disclosure requirements to help financial statement users understand the effect of the entity's election on its earnings, but does not eliminate disclosure requirements of other accounting standards. Assets and liabilities that are measured at fair value must be displayed on the face of the balance sheet. This statement is effective beginning January 1, 2008. We are evaluating this pronouncement, but do not expect the adoption to have a material impact on our financial position or results of operations.

NOTE 4 - INVESTMENT

In the second quarter the Company received 150,000 stock options for Duluth Metals common stock for providing executive and geological services for Duluth Metals. The stock options are exercisable at \$0.30 Canadian. The market value of the stock on September 30, 2007 was \$2.81 Canadian. The Company follows the provisions of Statement of Financial Accounting Standards No. 115 (SFAS 115), "*Accounting for Certain Investments in Debt and Equity Securities*." SFAS 115 requires companies to classify their investments as trading, available-for-sale or held-to-maturity. The Company's securities consist of stock options which have been classified as available-for-sale. These are recorded in the financial statements at fair market value and any unrealized gains (losses) will be reported as a component of shareholder equity. The fair market value of these stock options was determined based on the Black-Scholes options-pricing model using quoted market prices of the common stock and the exercise price of the stock option. At September 30, 2007, the cost basis net of write-downs, unrealized gains, unrealized losses and fair market value of the Company's holdings are as follows:

September 30,
2007

Net cost of equities	\$ 380,000
Unrealized Losses	(10,000)
Fair Market Value	\$ 370,000

SFAS 115 requires that for each individual security classified as available-for-sale, a company shall determine whether a decline in fair value below the cost basis is other than temporary. If the decline in fair value is judged as such, the cost basis of the individual security shall be written down to fair value as a new cost basis and the amount of the write-down shall be reflected in other comprehensive income of the equity section. At September 30, 2007, the company's marketable securities had a fair market value of \$ 370,000. As of September 30, 2007, there were unrealized losses of \$10,000.

This investment was translated into U.S. Dollars in accordance with SFAS No. 52, "*Foreign Currency Translation*." The investment was translated at the rate of exchange on the balance sheet date.

NOTE 5 - CHANGES IN SECURITIESCommon Stock

During the third quarter of 2007, the Company issued 64,898 shares of common stock. Two employees exercised employee stock options issued in previous years to purchase 63,750 shares of common stock totaling \$31,875. One employee exercised 25,000 stock options in a cashless exercise which netted 1,148 shares of common stock. There was no stock issuance cost for the third quarter.

NOTE 5 - CHANGES IN SECURITIES (Continued)

Options

During the third quarter of 2007, the Company issued 35,000 stock options to two employees. The employee stock options will be vested over the next two years. 63,750 stock options were exercised for cash and 25,000 stock options were exercised as a cashless exercise for a total of 88,750 options being exercised for 64,898 shares of common stock. The options exercised resulted in a reduction in paid in capital of \$138,000 and the stock option expense for the quarter was \$35,354, resulting in a decrease in paid in capital of \$102,646. Please see footnote 6 for additional information on stock-based compensation expense.

NOTE 6 – STOCK BASED COMPENSATION EXPENSE

Stock Based Compensation

Compensation expense charged against income for stock based awards in the third quarter of 2007 and 2006 was \$35,354 and \$348,760, pre-tax, respectively, and is included in general and administrative expense in the Consolidated Statement of Operations.

For further information regarding stock based compensation, please refer to Note 5 of the Notes to the Consolidated Financial Statements in the Annual Report on Form 10-K for the year ended December 31, 2006.

NOTE 7 - FINANCIAL INFORMATION RELATING TO INDUSTRY SEGMENTS

The Company reports operating segments according to SFAS No. 131, “*Disclosure about Segments of an Enterprise and Related Information.*”

The Company identifies reportable segments by products and services. The Company includes revenues from both external customers and revenues from transactions with other operating segments in its measure of segment profit or loss.

The Company’s operations are classified into four principal industry segments:

- o *Oil and gas operations* include our share of revenues from oil and gas wells on which TVOG serves as operator, royalty income and production revenue from other partnerships in which we have operating or non-operating interests. It also includes revenues for consulting services for oil and gas related activities.
- o *Rig operations* began in 2006, when the Company acquired drilling rigs and began operating them through subsidiaries GVPS and GVDC. Rig operations include income from rental of oil field equipment.
- o *Minerals* include the Company’s mining and mineral prospects and operations, and expenses associated with those operations. In 2007 and 2006, the Company recorded minerals revenue from consulting services performed for the mining and minerals industry, which are included on the operating statement as other income.
- o *Drilling and development* includes revenues received from oil and gas drilling and development operations performed for joint venture partners, including the Opus-I drilling partnership.

NOTE 8 – NOTES PAYABLE – RELATED PARTY

A note payable to Gary D. Borgna and Julie R. Borgna, and Equipment 2000 dated December 30, 2006; secured by rig equipment; imputed interest at 8.00%; payable in 120 monthly installments of \$9,100 . The unpaid balance as of September 30, 2007 is \$712,107. Mr. Borgna is the manager of GVDC and a stockholder of the Company.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**Notice Regarding Forward-Looking Statements**

This report contains forward-looking statements. The words, "anticipate," "believe," "expect," "plan," "intend," "estimate," "project," "could," "may," "foresee," and similar expressions are intended to identify forward-looking statements. These statements include information regarding expected development of Tri-Valley's business, lending activities, relationship with customers, and development in the oil and gas industry. Should one or more of these risks or uncertainties occur, or should underlying assumptions prove incorrect, actual results may vary materially and adversely from those anticipated, believed, estimated or otherwise indicated.

Results of Operations

For the quarter ended September 30, 2007, revenue was \$4.0 million, compared to \$1.2 million in the third quarter of 2006, an increase of \$2.8 million. For the first nine months of 2007, revenue was \$7.0 million, compared to \$2.5 million in the first nine months of 2006, an increase of \$4.5 million. We had an operating loss of about \$1.3 million in the third quarter of 2007, compared to a loss of \$1.5 million in the third quarter of 2006. During the first nine months of 2007, our loss was \$6.4 million, compared to a loss of \$4.5 million for the first nine months of 2006. Non-cash amounts included in the loss for the first nine months are depreciation, depletion and amortization of \$740,000; stock compensation expense of \$689,000; warrant expense of \$317,000 and impairment write-off of \$476,000.

Revenues and Activities by Segment

The Company identifies reportable segments by products and services. The Company includes revenues from both external customers and revenues from transactions with other operating segments in its measure of segment profit or loss. The Company also allocates interest revenue and expense, DD&A, and other operating expenses in its measure of segment profit or loss. The following table sets forth our revenues by segment for the third fiscal quarter of 2007 and 2006 and the first nine months of fiscal year 2007 and 2006, in thousands.

	Third Quarter		First Nine Months	
	2007	2006	2007	2006
Oil and gas	\$ 301	\$ 310	\$ 895	\$ 1,006
Rig operations	269	-	2,213	-
Minerals	119	12	598	43
Drilling and development	3,285	900	3,285	1,459
Total revenues	\$ 3,974	\$ 1,222	\$ 6,991	\$ 2,508
<i>Oil and Gas</i>				

Oil and gas revenues in the third quarter of 2007 included approximately \$205,000 from the sale of oil and gas, compared to \$268,000 in the third quarter of 2006, due to a needed repair on a gas well which was completed in October 2007. Other oil and gas revenues in the third quarter of 2007 consisted of approximately \$62,000 from interest income and \$34,000 from other income, an increase of \$54,000 from the third quarter of 2006 primarily because of maintaining increased cash balances.

The oil and gas activities during the third quarter of 2007 involved the drilling of two wells, reworking of existing wells and the continued conversion of three wells for our waterflood operations in the South Belridge field.

During the 3rd Quarter of 2007, Tri-Valley continued to implement the Etchegoin Pilot Waterflood which resulted in the conversion of three injectors, two primary injectors and one back-up injector. At the end of the 3rd Quarter injection was proceeding into the pilots on schedule and as anticipated with initial response expected in the 4th quarter.

The 5th delineation well, the Lundin-Weber D-24-31, which was a 3/8-mile step-out well to evaluate the Tulare, Etchegoin and Diatomite Zones in the West Temblor, South Belridge Carneros Lease Prospect was drilled and casing run to 2500' with an initial completion into a portion of the Diatomite Zone. Following perforating a portion of the lower Diatomite Zone a decision was made to steam-stimulate the zone once a steam generator became available in the 4th Quarter.

During the 3rd Quarter, the Lundin-Weber D-352-30 Diatomite Zone was steam-stimulated with 8000-bbls of water converted to steam utilizing a small 4.9-Million BTU per hour steamer, which was all that was available at the time. Results of the stimulation attempt indicated that the 4.9-steamer was not optimum for the task. The well is awaiting a 12 to 16-Million BTU size steam generator.

Also, during the 3rd Quarter, the Lundin-Weber D-344-30 a Diatomite Zone completion was steam-stimulated with 8400-bbls of water converted to steam with a conventional 16-Million BTU per hour generator. Results to date indicate that the steam likely did not confine itself to the exact intended interval due to intensive fracturing in the well. Operations are underway during the 4th Quarter to determine the location of the stimulated interval and to perforate and produce that interval.

In August, the Pleasant Valley #1 well in the Pleasant Valley Prospect in the Oxnard Oil Field in Ventura County, California was spudded to drill, core and evaluate the target Vaca Tar Sand between the depths of 2050' and 2292'. As expected, the well encountered a continuous section of approximately 240' of productive interval. Following the coring in the vertical well, the well was plugged-back with cement and then a 1475' horizontal well was drilled across the Hunsucker Lease as the first production well in a SAG-D (Steam Assisted Gravity Drainage) thermal development program which classically consists of pairs of wells, one being a producing well in conjunction with an adjacent steam injection well approximately 15' vertically above the producing well to provide steam to heat the thick tarry oil to make it more fluid-like to flow into the producing well below it as a sump pump would in a cellar to remove water. The SAG-D technology was developed in Canada in the last 20-years to produce the Athabasca Tar Sands which is now responsible for almost 1,000,000-barrels of oil per day. Facilities are currently being installed during the 4th Quarter, along with the appropriate steam generators to steam stimulate and produce the first producing well during the 4th Quarter. Since this is the first well of its kind in the field, there are several factors built into this well and its stimulation that will be monitored, which will tailor future producing and injection wells.

With the positive results from the Pleasant Valley #1 in hand, as the 3rd Quarter ended, the rig utilized to drill the Pleasant Valley #1, Kenai Rig #4, was moved 40' to the east and a 8500' projected depth well, the Pleasant Valley #2 was spudded to test multiple deeper horizons, those being the Miocene, Topanga and Sespe light oil zones which produce on offsetting leases. The Pleasant Valley Project is expected to have a multitude of concurrent developments being simultaneously developed and produced at the same time.

Rig Operations

Revenues from rig operations totaled \$269,000 in the third quarter of 2007, including \$266,000 from drilling and completion operations and approximately \$3,000 from other income and interest. This segment of our business began incurring expenses in the third quarter of 2006 when we began purchasing and refurbishing drilling rigs, though no revenues were generated from this segment until 2007.

During the 3rd Quarter, GVPS essentially completed the initial task of drilling the delineation wells in the Temblor West, South Belridge Carneros Lease Field and it also completed the major task of returning all available non-producing wells on the Carneros Lease to production. At this point a corporate decision was made to API inspect the rigs, which had been working for one year, and to obtain certain certifications before embarking on developing outside 3rd party contracts for these rigs. Due to a backlog of work with 3rd party inspection and upgrading contractors, the GVPS rigs are not expected to resume work before the end of the 4th Quarter.

During the 3rd Quarter, GVDC's Rig 2000 remained idle due to several confluencing factors with the significant ones being (1) other significant operators in Nevada purchased their own rigs almost coincidentally when Tri-Valley/GVDC purchased Rig 2000, (2) a "bottle-neck" in granting drilling permits developed with other operators not being able to timely obtain drilling permits primarily in the geothermal area, and (3) a general lull developed in oil exploration wildcat drilling in Nevada.

As the 3rd Quarter ended, GVDC consummated signing a contract for one well with an option for two additional wells while at the same time the client was preparing locations for more than those wells. GVDC believes that this one project could develop into a multiple year contract effort as Nevada is increasingly becoming the focus and receiving the attention of even foreign companies from countries such as Italy and Canada, which have recognized the value of potential geothermal development in Nevada. GVDC believes that Nevada is poised to be a significant geothermal energy contributor in the U.S. and GVDC is poised to increase its fleet as development heightens.

The tactical reason for purchasing the rig fleet is to enable Tri-Valley to work on its growing inventory of wells and drill new ones as needed rather than be delayed for months or even a year because of unavailability of contractor supplied rigs. The strategic reason is that as other property owners experience delays in timely service of their wells and production begins to decline they will tend to want to sell and the only logical bidders will be the few companies like Tri-Valley with the equipment to service additional properties.

Minerals Activities

Precious Metals

Revenues from minerals activities in the third quarter of 2007 were \$119,000 compared to \$12,000 in 2006. The 2007 revenues were recorded from geological services provided to outside third parties.

Mineral programs for the third quarter consisted largely of continuing the transition to new management and continuing the work from the previous quarter, i.e. generally assessing and compiling geologic information collected in previous work programs associated with the Calder, Richardson, and Shorty Creek properties in Alaska. Select is soliciting large precious metal mining companies as potential joint-venture partners to fund larger scale exploration on both the Richardson and Shorty Creek properties, as well as identifying a field site manager for both properties. Select continues to pursue returning the Admiral Calder mine to production, has added uranium as a new commodity of interest, and has reduced efforts directed towards new base metals and industrial minerals properties.

Base Metals

Both of Select's employees who had been lent to Duluth opted to continue permanently at Duluth Metals, and Select is recruiting replacement personnel. Base Metals operations are on hold at this time.

Uranium

Select Resources has begun soliciting and reviewing uranium opportunities in a very targeted and selective manner. Select is adhering rigorously to strict high-end criteria for these properties.

Industrial Minerals

During the third quarter, Select initiated a maintenance and repair program at the Admiral Calder calcium carbonate mine in Alaska. Select is further evaluating the site's product to support other market categories, and continues to solicit calcium carbonate mining and processing companies as potential joint-venture partners to fund larger scale development and operations on the Admiral Calder mine. Putting the mine into production remains a Select priority. Select is reviewing candidates for a long-term position to head up the development of this property.

Select continues to maintain a number of industrial mineral projects in six western states in a hold status, pending further review. Commodities in these projects include barite, sand & gravel, aggregate, limestone, dolomite, calcium carbonate, cinder, and other industrial mineral commodities.

Drilling and Development Operations

We received \$3.3 million revenue in the third quarter of 2007 compared to \$0.9 million in the same period of 2006 from our drilling and development segment. This was due to the drilling of a more complex and deeper well. This operating segment consists of turnkey contract drilling and completion operations for joint ventures.

Costs and Expenses

The following table sets forth our operating income (loss) by segment in the third quarter of 2007 and 2006, in thousands.

	Quarter Ended 9/30/07	Quarter Ended 9/30/06
Oil and gas	\$ (1,689)	\$ (1,380)
Rig operations	(874)	(570)
Minerals	(159)	(1,446)
Drilling and development	1,395	723
Total operating income (loss)	\$ (1,327)	\$ (2,673)

Costs and expenses were approximately \$5.3 million in the third quarter of 2007, an increase of approximately \$2.6 million over the same period in 2006 when costs and expenses were \$2.7 million. Oil and gas lease expense increased from \$54,000 in the third quarter of 2006 to \$56,000 in the same period of 2007 due to an increased number of leases. Rig operations expense decreased from \$514,000 in the third quarter of 2006 to \$180,000 in the third quarter of 2007, due to decreased rig operations by our recently formed GVPS and GVDC. We spent \$61,000 on mining exploration in the third quarter of 2007, which was \$98,000 dollars less than the same period in 2006 due to a lower activity level in our exploration. Drilling and development expenses increased from \$344,000 in the third quarter of 2006 to \$1.9 million in the third quarter of 2007, reflecting an increase in our drilling activities. Depletion, depreciation and amortization increased from \$176,000 in the third quarter of 2006 to \$254,000 in the same period of 2007, primarily because the increased property and equipment from our rig operations.

We also recognized impairment losses of \$230,000, primarily on the write-off of our Wildwood prospect. During our regular evaluation of our prospects, we determined that this and six other properties are no longer viable.

General and administrative costs for the third quarter of 2007 were \$2.6 million an increase from \$1.4 million in the same period of 2006. The increase was due to the expenses of our recently formed drilling subsidiaries, increased staff and capital formation expense.

Capital Resources and Liquidity

In 2002 through the third quarter of 2007, our drilling activities have been largely funded by selling interests in our OPUS I drilling partnership. We do not borrow in order to fund drilling activities. Our continued drilling activity relies on our ability to raise money for projects through drilling partnerships or other joint ventures.

Current assets were about \$13.4 million at September 30, down from \$16.0 million at year end 2006. Cash on hand September 30 is down \$3.0 million from year end which was \$15.6 million. Prepaid expenses increased to \$552,000 a \$499,000 increase over the year end balance of \$42,000.

Property, plant and equipment increased from \$12.1 million at year end 2006 to \$14.5 million at the end of the third quarter. The increase was primarily due the increased rigs, rig related equipment and steam generators.

Current liabilities rose to about \$11.7 million at September 30, 2007, from \$9.0 million at year end 2006, due primarily to a decrease of \$0.8 million in notes payable, an increase of \$2.6 million in accounts payable and accrued expenses and an increase of \$0.9 million in advances from joint venture participants.

During the remainder of 2007, we expect to expend approximately \$7 million on drilling activities. Funds for these activities will be provided by sales of partnership interests in the Opus I drilling partnership, which will still be raising funds for development purposes. Tri-Valley's portion is expected to be approximately \$3 million as most of the expense will be carried by joint venture partners. We are analyzing results of five recent development test wells on our Temblor West producing property adjoining the South Belridge oil field in order to design the optimum development plan for the property. Also, at our Pleasant Valley property in the Oxnard oilfield we project one vertical development test well, one horizontal injector and one horizontal producer in 2007. We expect to drill at least one shallow well in the Moffat Ranch East gas field and one deep wildcat exploration well. Our ability to complete our planned drilling activities in 2007 depends on some factors beyond our control, such as availability of equipment and personnel. Our actual capital commitments for the remainder of fiscal year 2007 are less than \$2 million, but to expend \$7 million, additional capital from the OPUS partnership or other outside parties will be required. For the remainder of fiscal year 2007, the Company expects expenditures of approximately \$0.3 million on mining activities, including mining lease and exploration expenses.

Operating Activities

We had a negative cash flow of \$1.8 million for the nine months ended September 30, 2007 compared to a negative cash flow of \$1.2 million from continuing operations for the same period in 2006. The increase in the negative cash flow in the current period is due largely to our loss from operations being offset by our increase in accounts payable and our decrease in advances from joint venture participants. The increase in accounts payable was primarily due to the completion of a well at the end of the quarter, and many of the invoices not being received until October. Our loss from operations was approximately \$6.4 million for the nine months ended September 30, 2007, compared to a loss from continuing operations in the same period of 2006 of \$4.5 million loss for the same period in 2006.

A large component of cash flow in the first nine months of 2007 was receipt of advances of \$0.9 million from joint venture participants for future drilling operations, These do not contribute to operating revenues at the time received but are held in cash until expended in drilling and operations. We cannot predict the levels at which we will continue to receive funds for additional drilling, and in the past we have experienced wide swings in receipt of these funds from quarter to quarter. We do not commit to drilling activities unless and until we have sufficient advances in hand to fund a particular project.

Investing Activities

Cash used in investing activities was \$7.3 million for the first nine months of 2007. We used \$2.8 million towards the refurbishing of the new rigs for GVPS and the remainder was for the acquisitions of equipment for TVOG. We used \$3.0 million in the repurchase of the minority interest in GVDC, and we used \$0.3 million to repurchase the interest of five members in GVPS. Also, we received options to purchase shares of common stock of Duluth Metals as payment for executive and geological services provided and is being held as an investment. The options had a fair market value of \$370,000 at September 30, 2007. *See Note 4 to Consolidated Financial Statements.*

Financing Activities

Net cash provided by financing activities was \$6.0 million for the first nine months of 2007. We received \$6.0 million proceeds from issuance of restricted shares of common stock in privately negotiated transactions including the exercise of stock options by employees. We received \$658,000 in proceeds from warrants issued in conjunction with the issuance of restricted shares of common stock in privately negotiated transactions which had warrants attached and had stock issuance costs of \$650,000. We expect to use these funds for working capital. We have not planned any private placement of equity securities for the remainder of 2007, but we may continue to receive funds from privately negotiated transactions. We do not have a targeted or budgeted amount of equity financing activities.

New Accounting Pronouncements

See Note 3 to our unaudited consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Tri-Valley Corporation does not engage in hedging activities and does not use commodity futures or forward contracts in its cash management functions.

Item 4. Controls and Procedures

Disclosure Controls

As of September 30, 2007, an evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. These controls and procedures are based on the definition of disclosure controls and procedures in Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934. Based on that evaluation, our management, including the CEO and CFO concluded that our disclosure controls and procedures were effective as of September 30, 2007. Management has remediated all five material weaknesses identified in the Company's Annual Report on Form 10-K for the year ended 2006. The weaknesses were remediated by instituting improved controls and procedures, adding additional controls regarding collateralized loans, improved disclosure of share based payment arrangements, improved evaluation of proved properties and the purchase of additional research materials and the utilization of outside consulting. The remediated weaknesses are: Loans guaranteed with restricted common stock (Deposits); the accounting treatment for the discontinued operations from the sale of our interest in Tri western Resources; share-based payment arrangements; evaluation of proved properties; and accounting for income taxes.

Management, including our CEO and CFO, do not expect that our disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud. In designing and evaluating our control system, management recognized that any control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance of achieving the desired control objectives. Further, the design of a control system must reflect the fact that there are resource constraints, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any that may affect our operations have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake.

During the third quarter of 2007, there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2006.

Item 2. Unregistered Sales of Equity Securities

There were no sales of unregistered sales of equity securities during the 3rd quarter.

Item 6. Exhibits
