

GENERAL ELECTRIC CAPITAL CORP
Form 10-Q
July 26, 2013

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-06461

GENERAL ELECTRIC CAPITAL CORPORATION
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

13-1500700
(I.R.S. Employer Identification No.)

901 Main Avenue, Norwalk, CT
(Address of principal executive offices)

06851-1168
(Zip Code)

(Registrant's telephone number, including area code) (203) 840-6300

(Former name, former address and former fiscal year,
if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

At July 26, 2013, 1,000 shares of voting common stock, which constitute all of the outstanding common equity, with a par value of \$14 per share were outstanding.

REGISTRANT MEETS THE CONDITIONS SET FORTH IN GENERAL INSTRUCTION h(1)(a) AND (b) OF FORM 10-Q AND IS THEREFORE FILING THIS FORM 10-Q WITH THE REDUCED DISCLOSURE FORMAT.

Forward-Looking Statements

This document contains “forward-looking statements” – that is, statements related to future, not past, events. In this context, forward-looking statements often address our expected future business and financial performance and financial condition, and often contain words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “see,” or “will.” Forward-looking statements by their nature address matters that are, to different degrees, uncertain. For us, particular uncertainties that could cause our actual results to be materially different than those expressed in our forward-looking statements include: current economic and financial conditions, including volatility in interest and exchange rates, equity prices and the value of financial assets; potential market disruptions or other impacts arising in the United States or Europe from developments in sovereign debt situations; the impact of conditions in the financial and credit markets on the availability and cost of our funding and on our ability to reduce our asset levels as planned; the impact of conditions in the housing market and unemployment rates on the level of commercial and consumer credit defaults; changes in Japanese consumer behavior that may affect our estimates of liability for excess interest refund claims (GE Money Japan); pending and future mortgage securitization claims and litigation in connection with WMC, which may affect our estimates of liability, including possible loss estimates; our ability to maintain our current credit rating and the impact on our funding costs and competitive position if we do not do so; our ability to pay dividends to GE at the planned level; the level of demand and financial performance of the major industries GE serves, including, without limitation, air transportation, energy generation, real estate and healthcare; the impact of regulation and regulatory, investigative and legal proceedings and legal compliance risks, including the impact of financial services regulation; our success in completing announced transactions and integrating acquired businesses; the impact of potential information technology or data security breaches; and numerous other matters of national, regional and global scale, including those of a political, economic, business and competitive nature. These uncertainties may cause our actual future results to be materially different than those expressed in our forward-looking statements. We do not undertake to update our forward-looking statements.

GE's Investor Relations website at www.ge.com/investor and our corporate blog at www.gereports.com, as well as GE's Facebook page and Twitter accounts, contain a significant amount of information about GE, including financial and other information for investors. GE encourages investors to visit these websites from time to time, as information is updated and new information is posted.

Notes to Condensed Financial Statements (Unaudited)

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General Electric Company (GE Company or GE) owns all of the common stock of General Electric Capital Corporation (GECC). Our financial statements consolidate all of our affiliates – companies that we control and in which we hold a majority voting interest. We also consolidate the economic interests we hold in certain businesses within companies in which we hold a voting equity interest and are majority owned by our parent, but which we have agreed to actively manage and control. See Note 1 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012 (2012 consolidated financial statements), which discusses our consolidation and financial statement presentation. GECC includes Commercial Lending and Leasing (CLL), Consumer, Real Estate, Energy Financial Services and GE Capital Aviation Services (GECAS).

Effects of transactions between related companies are made on an arms-length basis and are eliminated. As a wholly-owned subsidiary, GECC enters into various operating and financing arrangements with its parent, GE. These arrangements are made on an arms-length basis and consist primarily of GECC dividends to GE; GE customer receivables sold to GECC; GECC services for trade receivables management and material procurement; buildings and equipment (including automobiles) leased between GE and GECC; information technology (IT) and other services sold to GECC by GE; aircraft engines manufactured by GE that are installed on aircraft purchased by GECC from third-party producers for lease to others; and various investments, loans and allocations of GE corporate costs.

We have reclassified certain prior-period amounts to conform to the current-period presentation. Unless otherwise indicated, information in these notes to the condensed, consolidated financial statements relates to continuing operations.

Accounting Changes

On January 1, 2012, we adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2011-05, an amendment to Accounting Standards Codification (ASC) 220, Comprehensive Income. ASU 2011-05 introduced a new statement, the Consolidated Statement of Comprehensive Income. The amendments affect only the display of those components of equity categorized as other comprehensive income and do not change existing recognition and measurement requirements that determine net earnings.

On January 1, 2012, we adopted FASB ASU 2011-04, an amendment to ASC 820, Fair Value Measurements. ASU 2011-04 clarifies or changes the application of existing fair value measurements, including: that the highest and best use valuation premise in a fair value measurement is relevant only when measuring the fair value of nonfinancial assets; that a reporting entity should measure the fair value of its own equity instrument from the perspective of a market participant that holds that instrument as an asset; to permit an entity to measure the fair value of certain financial instruments on a net basis rather than based on its gross exposure when the reporting entity manages its financial instruments on the basis of such net exposure; that in the absence of a Level 1 input, a reporting entity should apply premiums and discounts when market participants would do so when pricing the asset or liability consistent with the unit of account; and that premiums and discounts related to size as a characteristic of the reporting entity's holding are not permitted in a fair value measurement. Adopting these amendments had no effect on the financial statements. For a description of how we estimate fair value and our process for reviewing fair value measurements classified as Level 3 in the fair value hierarchy, see Note 1 in our 2012 consolidated financial statements.

See Note 1 in our 2012 consolidated financial statements for a summary of our significant accounting policies.

(8)

Interim Period Presentation

The condensed, consolidated financial statements and notes thereto are unaudited. These statements include all adjustments (consisting of normal recurring accruals) that we considered necessary to present a fair statement of our results of operations, financial position and cash flows. The results reported in these condensed, consolidated financial statements should not be regarded as necessarily indicative of results that may be expected for the entire year. It is suggested that these condensed, consolidated financial statements be read in conjunction with the financial statements and notes thereto included in our 2012 consolidated financial statements. We label our quarterly information using a calendar convention, that is, first quarter is labeled as ending on March 31, second quarter as ending on June 30, and third quarter as ending on September 30. It is our longstanding practice to establish interim quarterly closing dates using a fiscal calendar, which requires our businesses to close their books on either a Saturday or Sunday, depending on the business. The effects of this practice are modest and only exist within a reporting year. The fiscal closing calendar for 2013 is available on our website, www.ge.com/secreports.

2. ASSETS AND LIABILITIES OF BUSINESSES HELD FOR SALE AND DISCONTINUED OPERATIONS

Assets and Liabilities of Businesses Held for Sale

In the first quarter of 2013, we committed to sell our Consumer auto and personal loan business in Portugal.

In the second quarter of 2012, we committed to sell a portion of our Business Properties portfolio (Business Property) in Real Estate, including certain commercial loans, the origination and servicing platforms and the servicing rights on loans previously securitized by GECC. We completed the sale of Business Property on October 1, 2012 for proceeds of \$2,406 million. We deconsolidated substantially all Real Estate securitization entities in the fourth quarter of 2012 as servicing rights related to these entities were transferred to the buyer at closing.

Summarized financial information for businesses held for sale is shown below.

(In millions)	June 30, 2013	December 31, 2012
Assets		
Cash and equivalents	\$ 16	\$ 74
Financing receivables – net	109	47
Property, plant and equipment – net	–	31
All other	40	59
Assets of businesses held for sale	\$ 165	\$ 211
Liabilities		
Short-term borrowings	\$ –	\$ 138
All other	7	19
Liabilities of businesses held for sale	\$ 7	\$ 157

Discontinued Operations

Discontinued operations primarily comprised GE Money Japan (our Japanese personal loan business, Lake, and our Japanese mortgage and card businesses, excluding our investment in GE Nissen Credit Co., Ltd.), our U.S. mortgage business (WMC), our Consumer mortgage lending business in Ireland (Consumer Ireland) and our CLL trailer

services business in Europe (CLL Trailer Services). Associated results of operations, financial position and cash flows are separately reported as discontinued operations for all periods presented.

Assets at June 30, 2013 and December 31, 2012 primarily comprised cash, property, plant and equipment - net and a deferred tax asset for a loss carryforward, which expires principally in 2017 and in part in 2019, related to the sale of our GE Money Japan business.

GE Money Japan

During the third quarter of 2008, we completed the sale of GE Money Japan, which included our Japanese personal loan business. Under the terms of the sale, we reduced the proceeds for estimated refund claims in excess of the

statutory interest rate. Proceeds from the sale were to be increased or decreased based on the actual claims experienced in accordance with loss-sharing terms specified in the sale agreement, with all claims in excess of 258 billion Japanese yen (approximately \$3,000 million) remaining our responsibility. The underlying portfolio to which this obligation relates is in runoff and interest rates were capped for all designated accounts by mid-2009. In the third quarter of 2010, we were required to begin making reimbursements under this arrangement.

Overall, excess interest refund claims experience has been difficult to predict and subject to several adverse factors, including the challenging global economic conditions over the last few years, the financial status of other Japanese personal lenders (including the 2010 bankruptcy of a large independent personal loan company), substantial ongoing legal advertising, and consumer behavior. Our reserves declined from \$700 million at December 31, 2012 to \$557 million at June 30, 2013, as claim payments and the effects of a strengthening U.S. dollar against the Japanese yen were partially offset by an increase to reserves of \$126 million. In determining reserve levels, we consider analyses of recent and historical claims experience, as well as pending and estimated future refund requests, adjusted for the estimated percentage of customers who present valid requests and associated estimated payments. We determined our reserve assuming the pace of incoming claims will decelerate, that average exposure per claim remains consistent with recent experience, and that we continue to see the impact of loss mitigation efforts. Since our disposition of the business, incoming claims have continued to decline, however, it is highly variable and difficult to predict the pace and pattern of that decline and such assumptions have a significant effect on the total amount of our liability. Holding all other assumptions constant, an adverse change of 20% and 50% in assumed incoming daily claim rate reduction (resulting in an extension of the claim period and higher incoming claims), would result in an increase to our reserve of approximately \$75 million and \$400 million, respectively. We continue to closely monitor and evaluate claims activity.

(10)

Based on the uncertainties discussed above, and considering other environmental factors in Japan, including the runoff status of the underlying book of business, challenging economic conditions, the impact of laws and regulations (including consideration of proposed legislation that could impose a framework for collective legal action proceedings), and the financial status of other local personal lending companies, it is difficult to develop a meaningful estimate of the aggregate possible claims exposure. These uncertainties and factors could have an adverse effect on claims development.

GE Money Japan earnings (loss) from discontinued operations, net of taxes, were \$(65) million and \$(327) million in the three months ended June 30, 2013 and 2012, respectively, and \$(116) million and \$(354) million in the six months ended June 30, 2013 and 2012, respectively.

WMC

During the fourth quarter of 2007, we completed the sale of WMC, our U.S. mortgage business. WMC substantially discontinued all new loan originations by the second quarter of 2007, and is not a loan servicer. In connection with the sale, WMC retained certain representation and warranty obligations related to loans sold to third parties prior to the disposal of the business and contractual obligations to repurchase previously sold loans as to which there was an early payment default. All claims received by WMC for early payment default have either been resolved or are no longer being pursued.

Pending repurchase claims based upon representations and warranties made in connection with loan sales were \$6,335 million at June 30, 2013, \$5,357 million at December 31, 2012 and \$705 million at December 31, 2011. Pending claims represent those active repurchase claims that identify the specific loans tendered for repurchase and, for each loan, the alleged breach of a representation or warranty. As such, they do not include unspecified repurchase claims, such as the Litigation Claims discussed below, or claims relating to breaches of representations that were made more than six years before WMC was notified of the claim. WMC believes that these repurchase claims do not meet the substantive and procedural requirements for tender under the governing agreements, would be barred from being enforced in legal proceedings under applicable statutes of limitations or are otherwise invalid. The amounts reported in pending claims reflect the purchase price or unpaid principal balances of the loans at the time of purchase and do not give effect to pay downs, accrued interest or fees, or potential recoveries based upon the underlying collateral. Historically, a small percentage of the total loans WMC originated and sold have been treated as “validly tendered,” meaning there was a breach of a representation and warranty that materially and adversely affects the value of the loan, and the demanding party met all other procedural and substantive requirements for repurchase.

Reserves related to WMC pending and estimated future loan repurchase claims were \$787 million at June 30, 2013, reflecting an increase to reserves in the six months ended June 30, 2013 of \$154 million due to incremental claim activity and updates to WMC’s estimate of future losses. The amount of these reserves is based upon pending and estimated future loan repurchase requests and WMC’s historical loss experience and evaluation of claim activity on loans tendered for repurchase.

The following table provides a roll forward of the reserve and pending repurchase claims.

(In millions)	Reserve		(In millions)	Pending claims	
	Three months ended June 30, 2013	Six months ended June 30, 2013		Three months ended June 30, 2013	Six months ended June 30, 2013
Reserve, beginning of period	\$ 740	\$ 633	Pending claims, beginning of period	\$ 6,210	\$ 5,357

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-Q

Provision	47		154	New claims	125		978
Claim resolutions	—		—	Claim resolutions	—		—
Reserve, end of period	\$ 787	\$	787	Pending claims, end of period	\$ 6,335	\$	6,335

Given the significant recent activity in pending claims and related litigation filed in connection with such claims, it is difficult to assess whether future losses will be consistent with WMC's past experience. Adverse changes to WMC's assumptions supporting the reserve for pending and estimated future loan repurchase claims may result in an increase to these reserves. For example, a 50% increase in the estimate of future loan repurchase requests and a 100% increase in the estimated loss rate on loans tendered, would result in an increase to the reserves of approximately \$750 million.

(11)

There are 15 lawsuits involving pending repurchase claims on loans included in 14 securitizations. WMC initiated three of the cases as the plaintiff; in the other cases WMC is a defendant. The adverse parties in these cases are securitization trustees or parties claiming to act on their behalf. In 11 of these lawsuits, the adverse parties seek relief for mortgage loans beyond those included in WMC's previously discussed pending claims at June 30, 2013 (Litigation Claims). These Litigation Claims consist of sampling-based claims in two cases on approximately \$900 million of mortgage loans and, in the other nine cases, claims for repurchase or damages based on the alleged failure to provide notice of defective loans, breach of a corporate representation and warranty, and/or non-specific claims for rescissionary damages on approximately \$5,700 million of mortgage loans. These claims reflect the purchase price or unpaid principal balances of the loans at the time of purchase and do not give effect to pay downs, accrued interest or fees, or potential recoveries based upon the underlying collateral. As noted above, WMC believes that the Litigation Claims are disallowed by the governing agreements and applicable law. As a result, WMC has not included the Litigation Claims in its pending claims or in its estimates of future loan repurchase requests and holds no related reserve as of June 30, 2013.

At this point, WMC is unable to develop a meaningful estimate of reasonably possible loss in connection with the Litigation Claims described above due to a number of factors, including the extent to which courts will agree with the theories supporting the Litigation Claims. Specifically, while several courts in cases not involving WMC have supported some of those theories, other courts have rejected them. In addition, WMC lacks experience resolving such claims, and there are few public industry settlements that may serve as benchmarks to estimate a reasonably possible loss. An adverse court decision on any of the theories supporting the Litigation Claims could increase WMC's exposure in some or all of the 15 lawsuits and result in additional claims and lawsuits. However, WMC believes that it has defenses to all the claims asserted in litigation, including for example, causation and materiality requirements, limitations on remedies for breach of representations and warranties, and the applicable statutes of limitations. To the extent WMC is required to repurchase loans, WMC's loss also would be affected by several factors, including pay downs, accrued interest and fees, and the value of the underlying collateral. It is not possible to predict the outcome or impact of these defenses and other factors, any one of which could materially affect the amount of any loss ultimately incurred by WMC on these claims.

WMC has received claims on approximately \$900 million of mortgage loans after the expiration of the statute of limitations as of June 30, 2013, \$700 million of which are also included as Litigation Claims. WMC has also received unspecified indemnification demands from depositors/underwriters/sponsors of residential mortgage-backed securities (RMBS) in connection with lawsuits brought by RMBS investors concerning alleged misrepresentations in the securitization offering documents to which WMC is not a party. WMC believes that it has defenses to these demands.

The reserve estimates reflect judgment, based on currently available information, and a number of assumptions, including economic conditions, claim activity, pending and threatened litigation, indemnification demands, estimated repurchase rates, and other activity in the mortgage industry. Actual losses arising from claims against WMC could exceed the reserve amount and additional claims and lawsuits could result if actual claim rates, governmental actions, litigation and indemnification activity, adverse court decisions, settlement activity, actual repurchase rates or losses WMC incurs on repurchased loans differ from its assumptions. It is difficult to develop a meaningful estimate of aggregate possible claims exposure because of uncertainties surrounding economic conditions, the ability and propensity of mortgage loan holders to present valid claims, governmental actions, mortgage industry activity and litigation, as well as pending and threatened litigation and indemnification demands against WMC.

WMC revenues (loss) from discontinued operations were \$(47) million and \$(351) million in the three months ended June 30, 2013 and 2012, respectively, and \$(154) million and \$(358) million in the six months ended June 30, 2013 and 2012, respectively. WMC's losses from discontinued operations, net of taxes, were \$33 million and \$227 million in the three months ended June 30, 2013 and 2012, respectively, and \$105 million and \$236 million in the six months ended June 30, 2013 and 2012, respectively.

Other

In the first quarter of 2013, we announced the planned disposition of CLL Trailer Services and classified the business as discontinued operations. CLL Trailer Services revenues from discontinued operations were \$90 million and \$104 million in the three months ended June 30, 2013 and 2012, respectively, and \$183 million and \$206 million in the six months ended June 30, 2013 and 2012, respectively. CLL Trailer Services earnings (loss) from discontinued operations, net of taxes, were \$(24) million and \$(1) million in the three months ended June 30, 2013 and 2012, respectively, and \$(10) million (including a \$98 million loss on disposal) and \$19 million in the six months ended June 30, 2013 and 2012, respectively.

(12)

In the first quarter of 2012, we announced the planned disposition of Consumer Ireland and classified the business as discontinued operations. We completed the sale in the third quarter of 2012 for proceeds of \$227 million. Consumer Ireland revenues from discontinued operations were an insignificant amount and \$2 million in the three months ended June 30, 2013 and 2012, respectively, and an insignificant amount and \$6 million in the six months ended June 30, 2013 and 2012, respectively. Consumer Ireland earnings (loss) from discontinued operations, net of taxes, were an insignificant amount and \$2 million in the three months ended June 30, 2013 and 2012, respectively, and \$1 million and \$(186) million (including a \$131 million loss on disposal) in the six months ended June 30, 2013 and 2012, respectively.

3. INVESTMENT SECURITIES

Substantially all of our investment securities are classified as available-for-sale. These comprise mainly investment grade debt securities supporting obligations to annuitants, policyholders and holders of guaranteed investment contracts (GICs) in our run-off insurance operations and Trinity, and investments held in our CLL business collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries. We do not have any securities classified as held-to-maturity.

(a) Substantially collateralized by U.S. mortgages. Of our total RMBS portfolio at June 30, 2013, \$1,346 million relates to securities issued by government-sponsored entities and \$770 million relates to securities of private label issuers. Securities issued by private label issuers are collateralized primarily by pools of individual direct mortgage loans of financial institutions.

The fair value of investment securities decreased to \$43,661 million at June 30, 2013, from \$48,439 million at December 31, 2012, primarily due to the sale of U.S. government and federal agency securities at our treasury operations and the impact of higher interest rates.

(13)

(a) Includes gross unrealized losses at June 30, 2013 of \$(145) million related to securities that had other-than-temporary impairments previously recognized.

We regularly review investment securities for impairment using both qualitative and quantitative criteria. We presently do not intend to sell the vast majority of our debt securities that are in an unrealized loss position and believe that it is not more likely than not that we will be required to sell these securities before recovery of our amortized cost. We believe that the unrealized loss associated with our equity securities will be recovered within the foreseeable future. The methodologies and significant inputs used to measure the amount of credit loss for our investment securities during the six months ended June 30, 2013 have not changed from those described in Note 3 in our 2012 consolidated financial statements.

During the three months ended June 30, 2013, we recognized pre-tax, other-than-temporary impairments of \$152 million, of which \$133 million was recorded through earnings, of which \$96 million related to the impairment of an investment in a Brazilian company that was fully offset by the benefit of a guarantee provided by GE, and \$19 million was recorded in accumulated other comprehensive income (loss) (AOCI). At April 1, 2013, cumulative impairments recognized in earnings associated with debt securities still held were \$694 million. During the three months ended June 30, 2013, we recognized first-time impairments of \$122 million and incremental charges on previously impaired securities of \$7 million. These amounts included \$46 million related to securities that were subsequently sold.

During the three months ended June 30, 2012, we recognized pre-tax, other-than-temporary impairments of \$33 million, of which \$32 million was recorded through earnings (\$16 million relates to equity securities) and \$1 million was recorded in AOCI. At April 1, 2012, cumulative impairments recognized in earnings associated with debt securities still held were \$434 million. During the three months ended June 30, 2012, we recognized first-time impairments of \$3 million and incremental charges on previously impaired securities of \$6 million. These amounts included \$33 million related to securities that were subsequently sold.

(14)

During the six months ended June 30, 2013, we recognized pre-tax, other-than-temporary impairments of \$441 million, of which \$411 million was recorded through earnings (\$1 million relates to equity securities), of which \$96 million related to the impairment of an investment in a Brazilian company that was fully offset by the benefit of a guarantee provided by GE, and \$30 million was recorded in AOCI. At January 1, 2013, cumulative impairments recognized in earnings associated with debt securities still held were \$420 million. During the six months ended June 30, 2013, we recognized first-time impairments of \$385 million and incremental charges on previously impaired securities of \$19 million. These amounts included \$47 million related to securities that were subsequently sold.

During the six months ended June 30, 2012, we recognized pre-tax, other-than-temporary impairments of \$65 million, of which \$64 million was recorded through earnings (\$23 million relates to equity securities) and \$1 million was recorded in AOCI. At January 1, 2012, cumulative impairments recognized in earnings associated with debt securities still held were \$558 million. During the six months ended June 30, 2012, we recognized first-time impairments of \$10 million and incremental charges on previously impaired securities of \$11 million. These amounts included \$169 million related to securities that were subsequently sold.

Contractual Maturities of Investment in Available-for-Sale Debt Securities (Excluding Mortgage-Backed and Asset-Backed Securities)

(In millions)	Amortized cost	Estimated fair value
Due		
Within one year	\$ 2,675	\$ 2,689
After one year through five years	3,424	3,630
After five years through ten years	5,346	5,604
After ten years	17,841	20,132

We expect actual maturities to differ from contractual maturities because borrowers have the right to call or prepay certain obligations.

Supplemental information about gross realized gains and losses on available-for-sale investment securities follows.

(In millions)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Gains	\$ 123	\$ 21	\$ 185	\$ 59
Losses, including impairments	(139)	(34)	(417)	(104)
Net	\$ (16)	\$ (13)	\$ (232)	\$ (45)

Although we generally do not have the intent to sell any specific securities at the end of the period, in the ordinary course of managing our investment securities portfolio, we may sell securities prior to their maturities for a variety of reasons, including diversification, credit quality, yield and liquidity requirements and the funding of claims and obligations to policyholders. In some of our bank subsidiaries, we maintain a certain level of purchases and sales volume principally of non-U.S. government debt securities. In these situations, fair value approximates carrying value for these securities.

Proceeds from investment securities sales and early redemptions by issuers totaled \$4,296 million and \$2,742 million in the three months ended June 30, 2013 and 2012, respectively, and \$7,084 million and \$6,504 million in the six months ended June 30, 2013 and 2012, respectively, principally from the sales of short-term securities in our bank subsidiaries and treasury operations.

We recognized pre-tax gains (losses) on trading securities of \$5 million and \$13 million in the three months ended June 30, 2013 and 2012, respectively, and \$41 million and \$36 million in the six months ended June 30, 2013 and 2012, respectively.

(15)

4. FINANCING RECEIVABLES AND ALLOWANCE FOR LOSSES ON FINANCING RECEIVABLES

(In millions)	June 30, 2013	December 31, 2012
Loans, net of deferred income(a)	\$231,672	\$241,465
Investment in financing leases, net of deferred income	30,708	32,471

(a) Other primarily included transfers to held for sale and the effects of currency exchange.

(b) Net write-offs (gross write-offs less recoveries) in certain portfolios may exceed the beginning allowance for losses as a result of losses that are incurred subsequent to the beginning of the fiscal year due to information becoming available during the current year, which may identify further deterioration on existing financing receivables.

See Note 12 for supplemental information about the credit quality of financing receivables and allowance for losses on financing receivables.

(18)

5. GOODWILL AND OTHER INTANGIBLE ASSETS

(In millions)	June 30, 2013	December 31, 2012
Goodwill	\$26,818	\$27,032
Other intangible assets - net Intangible assets subject to amortization	\$ 1,203	\$ 1,294

Changes in goodwill balances follow.

(In millions)	Balance at January 1, 2013	Acquisitions	Dispositions, currency exchange and other	Balance at June 30, 2013
CLL	\$ 13,454	\$ 3	\$ 80	\$ 13,537
Consumer	10,943	21	(148)	10,816
Real Estate	926	–	(169)	757
Energy Financial Services	1,562	–	–	1,562
GECAS	147	–	(1)	146
Total	\$ 27,032	\$ 24	\$ (238)	\$ 26,818

Goodwill balances decreased \$214 million during the six months ended June 30, 2013, primarily as a result of currency exchange effects of a stronger U.S. dollar. Our reporting units and related goodwill balances are CLL (\$13,537 million), Consumer (\$10,816 million), Real Estate (\$757 million), Energy Financial Services (\$1,562 million) and GECAS (\$146 million) at June 30, 2013.

Intangible Assets Subject to Amortization

(In millions)	June 30, 2013			December 31, 2012		
	Gross carrying amount	Accumulated amortization	Net	Gross carrying amount	Accumulated amortization	Net
Customer-related Patents, licenses and trademarks	\$ 1,199	\$ (809)	\$ 390	\$ 1,227	\$ (808)	\$ 419
Capitalized software	195	(166)	29	191	(160)	31
Lease valuations	2,246	(1,747)	499	2,126	(1,681)	445
Present value of future profits (a)	764	(522)	242	1,163	(792)	371
All other	553	(553)	–	530	(530)	–
Total	292	(249)	43	283	(255)	28
	\$ 5,249	\$ (4,046)	\$ 1,203	\$ 5,520	\$ (4,226)	\$ 1,294

- (a) Balances at June 30, 2013 and December 31, 2012 reflect adjustments of \$336 million and \$353 million, respectively, to the present value of future profits in our run-off insurance operation to reflect the effects that would have been recognized had the related unrealized investment securities holding gains and losses actually been realized.

Amortization related to intangible assets subject to amortization was \$111 million and \$124 million in the three months ended June 30, 2013 and 2012, respectively, and \$219 million and \$234 million in the six months ended June 30, 2013 and 2012, respectively, and is recorded in operating and administrative expense on the financial statements.

(19)

6. BORROWINGS AND BANK DEPOSITS

(In millions)	June 30, 2013	December 31, 2012
Short-term borrowings		
Commercial paper		
U.S.	\$ 29,664	\$ 33,686
Non-U.S.	6,375	9,370
Current portion of long-term borrowings(a)(b)	31,828	44,264
GE Interest Plus notes(c)	8,421	8,189
Other(b)	482	431
Total short-term borrowings	\$ 76,770	\$ 95,940
Long-term borrowings		
Senior unsecured notes(a)	\$ 194,132	\$ 199,646
Subordinated notes(d)	4,789	4,965
Subordinated debentures(e)(f)	7,297	7,286
Other(b)	13,789	12,879
Total long-term borrowings	\$ 220,007	\$ 224,776
Non-recourse borrowings of consolidated securitization entities(g)	\$ 30,250	\$ 30,123
Bank deposits(h)	\$ 48,597	\$ 46,461
Total borrowings and bank deposits	\$ 375,624	\$ 397,300

(a) Included in total long-term borrowings were \$526 million and \$604 million of obligations to holders of GICs at June 30, 2013 and December 31, 2012, respectively. These obligations included conditions under which certain GIC holders could require immediate repayment of their investment should the long-term credit ratings of GECC fall below AA-/Aa3. The remaining outstanding GICs will continue to be subject to their scheduled maturities and individual terms, which may include provisions permitting redemption upon a downgrade of one or more of GECC's ratings, among other things.

(b) Included \$9,669 million and \$9,757 million of funding secured by real estate, aircraft and other collateral at June 30, 2013 and December 31, 2012, respectively, of which \$3,595 million and \$3,294 million is non-recourse to GECC at June 30, 2013 and December 31, 2012, respectively.

(c) Entirely variable denomination floating-rate demand notes.

(d) Included \$300 million of subordinated notes guaranteed by GE at both June 30, 2013 and December 31, 2012.

(e) Subordinated debentures receive rating agency equity credit and were hedged at issuance to the U.S. dollar equivalent of \$7,725 million.

(f) Includes \$2,913 million of subordinated debentures, which constitute the sole assets of wholly-owned trusts who have issued trust preferred securities. Obligations associated with these trusts are unconditionally guaranteed by

GECC.

- (g) Included at June 30, 2013 and December 31, 2012, were \$7,078 million and \$7,707 million of current portion of long-term borrowings, respectively, and \$23,172 million and \$22,416 million of long-term borrowings, respectively. See Note 13.
- (h) Included \$16,013 million and \$16,157 million of deposits in non-U.S. banks at June 30, 2013 and December 31, 2012, respectively, and \$16,259 million and \$17,291 million of certificates of deposits with maturities greater than one year at June 30, 2013 and December 31, 2012, respectively.

(20)

7. INCOME TAXES

The balance of “unrecognized tax benefits,” the amount of related interest and penalties we have provided and what we believe to be the range of reasonably possible changes in the next 12 months are:

(In millions)	June 30, 2013	December 31, 2012
Unrecognized tax benefits	\$ 3,379	\$ 3,106
Portion that, if recognized, would reduce tax expense and effective tax rate(a)	2,530	2,253
Accrued interest on unrecognized tax benefits	580	559
Accrued penalties on unrecognized tax benefits	94	101
Reasonably possible reduction to the balance of unrecognized tax benefits in succeeding 12 months	0-600	0-400
Portion that, if recognized, would reduce tax expense and effective tax rate(a)	0-450	0-350

(a) Some portion of such reduction may be reported as discontinued operations.

The Internal Revenue Service (IRS) is currently auditing the GE consolidated income tax returns for 2008-2009, a substantial portion of which include our activities. In addition, certain other U.S. tax deficiency issues and refund claims for previous years were unresolved. The IRS has disallowed the tax loss on our 2003 disposition of ERC Life Reinsurance Corporation. We expect to contest the disallowance of this loss. It is reasonably possible that other unresolved items related to pre-2010 federal tax returns could be resolved during the next 12 months, which could result in a decrease in our balance of “unrecognized tax benefits” – that is, the aggregate tax effect of differences between tax return positions and the benefits recognized in our financial statements. We believe that there are no other jurisdictions in which the outcome of unresolved issues or claims is likely to be material to our results of operations, financial position or cash flows. We further believe that we have made adequate provision for all income tax uncertainties.

GE and GECC file a consolidated U.S. federal income tax return. This enables GE to use GECC tax deductions and credits to reduce the tax that otherwise would have been payable by GE. The GECC effective tax rate for each period reflects the benefit of these tax reductions in the consolidated return. GE makes cash payments to GECC for these tax reductions at the time GE’s tax payments are due. The effect of GECC on the amount of the consolidated tax liability from the 2011 formation of the GE NBC Universal joint venture will be settled in cash no later than when GECC tax deductions and credits otherwise would have reduced the liability of the group absent the tax on formation.

AOCI and other	(29)	(21)	(40)	48
Ending balance	\$ 550	\$ 759	\$ 550	\$ 759

During the second quarter of 2013, we issued 10,000 shares of non-cumulative perpetual preferred stock with a \$0.01 par value for proceeds of \$990 million. The preferred shares bear an initial fixed interest rate of 5.25% through June 15, 2023, bear a floating rate equal to three-month LIBOR plus 2.967% thereafter and are callable on June 15, 2023. Dividends on the preferred stock are payable semi-annually, in June and December, with the first payment on this issuance beginning in December 2013.

During 2012, we issued 40,000 shares of non-cumulative perpetual preferred stock with a \$0.01 par value for proceeds of \$3,960 million. Of these shares, 22,500 bear an initial fixed interest rate of 7.125% through June 12, 2022, bear a floating rate equal to three-month LIBOR plus 5.296% thereafter and are callable on June 15, 2022 and 17,500 shares bear an initial fixed interest rate of 6.25% through December 15, 2022, bear a floating rate equal to three-month LIBOR plus 4.704% thereafter and are callable on December 15, 2022. Dividends on the preferred stock are payable semi-annually, in June and December, with the first payment on these issuances made in December 2012.

(23)

We paid dividends of \$447 million and \$475 million and special dividends of \$1,500 million and \$2,525 million to GE in the second quarters of 2013 and 2012, respectively.

9. REVENUES FROM SERVICES

(In millions)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Interest on loans	\$ 4,477	\$ 4,762	\$ 9,023	\$ 9,620

Investment income(a)	574	668	988	1,335
Financing leases	389	529	825	1,063
Associated companies(b)	274	425	446	695
Premiums earned by insurance activities	410	416	806	861
Real estate investments(c)	508	382	1,808	738
Other items(a)	718	440	1,300	817
Total	\$ 10,949	\$ 11,328	\$ 22,458	\$ 22,638

- (a) Included net other-than-temporary impairments on investment securities, of which \$96 million related to the impairment of an investment in a Brazilian company that was fully offset by the benefit of a guarantee provided by GE reflected as a component in other items for both the three and six months ended June 30, 2013.
- (b) Aggregate summarized financial information for significant associated companies assuming a 100% ownership interest included total assets at June 30, 2013 and December 31, 2012 of \$111,041 million and \$110,695 million, respectively. Assets were primarily financing receivables of \$68,280 million and \$66,878 million at June 30, 2013 and December 31, 2012, respectively. Total liabilities were \$83,107 million and \$81,784 million, consisted primarily of bank deposits of \$28,510 million and \$26,386 million at June 30, 2013 and December 31, 2012, respectively, and debt of \$41,059 million and \$42,664 million at June 30, 2013 and December 31, 2012, respectively. Revenues for the three months ended June 30, 2013 and 2012 totaled \$4,503 million and \$4,702 million, respectively, and net earnings for the three months ended June 30, 2013 and 2012 totaled \$795 million and \$772 million, respectively. Revenues for the six months ended June 30, 2013 and 2012 totaled \$8,513 million and \$9,192 million, respectively, and net earnings for the six months ended June 30, 2013 and 2012 totaled \$1,360 million and \$1,301 million, respectively.
- (c) During the six months ended June 30, 2013, we sold real estate comprising certain floors located at 30 Rockefeller Center, New York for a pre-tax gain of \$902 million.

10. FAIR VALUE MEASUREMENTS

For a description of how we estimate fair value, see Note 1 in our 2012 consolidated financial statements.

The following tables present our assets and liabilities measured at fair value on a recurring basis. Included in the tables are investment securities primarily supporting obligations to annuitants and policyholders in our run-off insurance operations and supporting obligations to holders of GICs in Trinity (which ceased issuing new investment contracts beginning in the first quarter of 2010), investment securities held at our treasury operations and investments

held in our CLL business collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries. Such securities are mainly investment grade.

- (a) The fair value of securities transferred between Level 1 and Level 2 was \$2 million in the six months ended June 30, 2013.
- (b) The netting of derivative receivables and payables (including the effects of any collateral posted or received) is permitted when a legally enforceable master netting agreement exists.
- (c) Includes investments in our CLL business in asset-backed securities collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries.
- (d) The fair value of derivatives included an adjustment for non-performance risk. The cumulative adjustment was a gain (loss) of \$(14) million and \$(15) million at June 30, 2013 and December 31, 2012, respectively. See Note 11 for additional information on the composition of our derivative portfolio.
- (e) Included private equity investments and loans designated under the fair value option.

(25)

The following tables present the changes in Level 3 instruments measured on a recurring basis for the three and six months ended June 30, 2013 and 2012, respectively. The majority of our Level 3 balances consist of investment securities classified as available-for-sale with changes in fair value recorded in shareowners' equity.

Changes in Level 3 Instruments for the Three Months Ended June 30, 2013

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-Q

- (a) Earnings effects are primarily included in the “Revenues from services” and “Interest” captions in the Condensed Statement of Earnings.
- (b) Transfers in and out of Level 3 are considered to occur at the beginning of the period. Transfers out of Level 3 were a result of increased use of quotes from independent pricing vendors based on recent trading activity.
- (c) Represented the amount of unrealized gains or losses for the period included in earnings.
- (d) Represented derivative assets net of derivative liabilities and included cash accruals of \$6 million not reflected in the fair value hierarchy table.
- (e) Gains (losses) included in net realized/unrealized gains (losses) included in earnings were offset by the earnings effects from the underlying items that were economically hedged. See Note 11.

(29)

Non-Recurring Fair Value Measurements

The following table represents non-recurring fair value amounts (as measured at the time of the adjustment) for those assets remeasured to fair value on a non-recurring basis during the fiscal year and still held at June 30, 2013 and December 31, 2012. These assets can include loans and long-lived assets that have been reduced to fair value when they are held for sale, impaired loans that have been reduced based on the fair value of the underlying collateral, cost and equity method investments and long-lived assets that are written down to fair value when they are impaired and the remeasurement of retained investments in formerly consolidated subsidiaries upon a change in control that results in deconsolidation of a subsidiary, if we sell a controlling interest and retain a noncontrolling stake in the entity. Assets that are written down to fair value when impaired and retained investments are not subsequently adjusted to fair value unless further impairment occurs.

(In millions)	Remeasured during the six months ended June 30, 2013		Remeasured during the year ended December 31, 2012	
	Level 2	Level 3	Level 2	Level 3
Financing receivables and loans held for sale	\$ 260	\$ 2,658	\$ 366	\$ 4,094
Cost and equity method investments(a)	13	778	8	313
Long-lived assets, including real estate	908	2,284	702	2,182
Total	\$ 1,181	\$ 5,720	\$ 1,076	\$ 6,589

(a) Includes the fair value of private equity and real estate funds included in Level 3 of \$22 million and \$84 million at June 30, 2013 and December 31, 2012, respectively.

The following table represents the fair value adjustments to assets measured at fair value on a non-recurring basis and still held at June 30, 2013 and 2012.

(In millions)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Financing receivables and loans held for sale	\$ (102)	\$ (105)	\$ (212)	\$ (211)
Cost and equity method investments(a)	(157)	(38)	(220)	(58)
Long-lived assets, including real estate(b)	(253)	(106)	(593)	(245)
Total	\$ (512)	\$ (249)	\$ (1,025)	\$ (514)

(a) Includes fair value adjustments associated with private equity and real estate funds of \$(2) million and \$(1) million in the three months ended June 30, 2013 and 2012, respectively, and \$(5) million and \$(2) million in the six months ended June 30, 2013 and 2012, respectively.

(b) Includes impairments related to real estate equity properties and investments recorded in operating and administrative expenses of \$(51) million and \$(6) million in the three months ended June 30, 2013 and 2012,

respectively, and \$(274) million and \$(56) million in the six months ended June 30, 2013 and 2012, respectively.

(30)

Level 3 Measurements

The following table presents information relating to the significant unobservable inputs of our Level 3 recurring and non-recurring measurements.

(Dollars in millions)	Fair value at June 30, 2013	Valuation technique	Unobservable inputs	Range (weighted average)
Recurring fair value measurements				
Investment securities				
Debt				
U.S. corporate	\$ 1,308	Income approach	Discount rate(a)	1.5%-38.0% (13.8%)
Asset-backed	5,293	Income approach	Discount rate(a)	2.3%-10.5% (4.8%)
Corporate non-U.S.	872	Income approach	Discount rate(a)	4.2%-33.4% (15.4%)
Other financial assets	270	Income approach	Weighted average cost of capital	9.1%-9.2% (9.2%)
	162	Income approach	Discount rate(a)	3.7%-5.2% (4.3%)
Non-recurring fair value measurements				
Financing receivables and loans held for sale	\$ 1,890	Income approach	Capitalization rate(b)	5.4%-16.7% (8%)
	94	Business enterprise value	EBITDA multiple	4.3X-7.0X (5.3X)
Cost and equity method investments	282	Income approach	Discount rate(a)	11.5% (11.5%)
	85	Income approach	Discount for lack	5.7%-5.9% (5.8%)

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-Q

				of marketability	
		20	Income approach	Capitalization rate(b)	7.7%-10.6% (10.2%)
Long-lived assets, including real estate		1,360	Income approach	Capitalization rate(b)	5.4%-14.5% (7.9%)
	Fair value at December 31, 2012		Valuation technique	Unobservable inputs	Range (weighted average)
Recurring fair value measurements					
Investment securities					
Debt					
U.S. corporate	\$	1,652	Income approach	Discount rate(a)	1.3%-29.9% (11.1%)
Asset-backed		4,977	Income approach	Discount rate(a)	2.1%-13.1% (3.8%)
Corporate non-U.S.		865	Income approach	Discount rate(a)	1.5%-25.0% (13.2%)
Other financial assets		360	Income approach	Weighted average cost of capital	8.7%-10.2% (8.7%)
		65	Income approach	Discount rate(a)	4.0%-4.7% (4.4%)
Non-recurring fair value measurements					
Financing receivables and loans held for sale	\$	2,633	Income approach	Capitalization rate(b)	3.8%-14.0% (8%)
		202	Business enterprise value	EBITDA multiple	2.0X-6.0X (4.8X)
Cost and equity method investments		72	Income approach	Capitalization rate(b)	9.2%-12.8% (12%)
Long-lived assets, including real estate		985	Income approach	Capitalization rate(b)	4.8%-14.6% (7.3%)

- (a) Discount rates are determined based on inputs that market participants would use when pricing investments, including credit and liquidity risk. An increase in the discount rate would result in a decrease in the fair value.
- (b) Represents the rate of return on net operating income that is considered acceptable for an investor and is used to determine a property's capitalized value. An increase in the capitalization rate would result in a decrease in the fair value.

(31)

At June 30, 2013 and December 31, 2012, other Level 3 recurring fair value measurements of \$2,855 million and \$2,990 million, respectively, and non-recurring measurements of \$1,611 million and \$2,412 million, respectively, are valued using non-binding broker quotes or other third-party sources. For a description of our process to evaluate third-party pricing servicers, see Note 1 in our 2012 consolidated financial statements. At June 30, 2013 and December 31, 2012, other recurring fair value measurements of \$179 million and \$168 million, respectively, and non-recurring fair value measurements of \$378 million and \$285 million, respectively, were individually insignificant and utilize a number of different unobservable inputs not subject to meaningful aggregation.

11. FINANCIAL INSTRUMENTS

The following table provides information about the assets and liabilities not carried at fair value in our Condensed Statement of Financial Position. The table excludes finance leases and non-financial assets and liabilities. Substantially all of the assets discussed below are considered to be Level 3. The vast majority of our liabilities' fair value can be determined based on significant observable inputs and thus considered Level 2. Few of the instruments are actively traded and their fair values must often be determined using financial models. Realization of the fair value of these instruments depends upon market forces beyond our control, including marketplace liquidity. For a description on how we estimate fair value, see Note 15 in our 2012 consolidated financial statements.

(In millions)	Notional amount	June 30, 2013		Notional amount	December 31, 2012	
		Assets (liabilities) Carrying amount (net)	Estimated fair value		Assets (liabilities) Carrying amount (net)	Estimated fair value
Assets						
Loans	\$ (a)	\$ 226,586	\$ 229,999	\$ (a)	\$ 236,678	\$ 239,084
Other commercial mortgages	(a)	2,202	2,154	(a)	2,222	2,249
Loans held for sale	(a)	875	872	(a)	1,180	1,181
Other financial instruments(c)	(a)	1,778	2,287	(a)	1,858	2,276
Liabilities						
Borrowings and bank deposits(b)(d)	(a)	(375,624)	(387,973)	(a)	(397,300)	(414,533)
Investment contract benefits	(a)	(3,246)	(3,817)	(a)	(3,321)	(4,150)
Guaranteed investment contracts	(a)	(1,546)	(1,549)	(a)	(1,644)	(1,674)
Insurance - credit life(e)	2,197	(116)	(99)	2,277	(120)	(104)

(a) These financial instruments do not have notional amounts.

(b) See Note 6.

(c) Principally cost method investments.

(d) Fair values exclude interest rate and currency derivatives designated as hedges of borrowings. Had they been included, the fair value of borrowings at June 30, 2013 and December 31, 2012 would have been reduced by

\$3,469 million and \$7,937 million, respectively.

- (e) Net of reinsurance of \$2,000 million at both June 30, 2013 and December 31, 2012.

Loan Commitments

(In millions)	Notional amount at	
	June 30, 2013	December 31, 2012
Ordinary course of business lending commitments(a)	\$ 3,935	\$ 3,708
Unused revolving credit lines(b)		
Commercial(c)	15,870	17,929
Consumer - principally credit cards	276,784	271,387

- (a) Excluded investment commitments of \$1,542 million and \$1,276 million as of June 30, 2013 and December 31, 2012, respectively.
- (b) Excluded inventory financing arrangements, which may be withdrawn at our option, of \$13,013 million and \$12,813 million as of June 30, 2013 and December 31, 2012, respectively.
- (c) Included commitments of \$11,048 million and \$12,923 million as of June 30, 2013 and December 31, 2012, respectively, associated with secured financing arrangements that could have increased to a maximum of \$14,093 million and \$15,731 million at June 30, 2013 and December 31, 2012, respectively, based on asset volume under the arrangement.

(32)

Securities Repurchase and Reverse Repurchase Arrangements

Our issuances of securities repurchase agreements are insignificant and are limited to activities at certain of our foreign banks primarily for purposes of liquidity management. At June 30, 2013, we were party to repurchase agreements totaling \$71 million, which were reported in short-term borrowings on the financial statements. We have had no repurchase agreements that were accounted for as off-book financing and we do not engage in securities lending transactions.

We also enter into reverse securities repurchase agreements, primarily for short-term investment with maturities of 90 days or less. At June 30, 2013, we were party to reverse repurchase agreements totaling \$22.5 billion, which were reported in cash and equivalents on the financial statements. Under these reverse securities repurchase agreements, we typically lend available cash at a specified rate of interest and hold U.S. or highly-rated European government securities as collateral during the term of the agreement. Collateral value is in excess of amounts loaned under the agreements.

Derivatives and hedging

As a matter of policy, we use derivatives for risk management purposes and we do not use derivatives for speculative purposes. A key risk management objective for our financial services businesses is to mitigate interest rate and currency risk by seeking to ensure that the characteristics of the debt match the assets they are funding. If the form (fixed versus floating) and currency denomination of the debt we issue do not match the related assets, we typically execute derivatives to adjust the nature and tenor of funding to meet this objective within pre-defined limits. The determination of whether we enter into a derivative transaction or issue debt directly to achieve this objective depends on a number of factors, including market related factors that affect the type of debt we can issue.

The notional amounts of derivative contracts represent the basis upon which interest and other payments are calculated and are reported gross, except for offsetting foreign currency forward contracts that are executed in order to manage our currency risk of net investment in foreign subsidiaries. Of the outstanding notional amount of \$287,000 million, approximately 96% or \$277,000 million, is associated with reducing or eliminating the interest rate, currency or market risk between financial assets and liabilities in our financial services businesses. The instruments used in these activities are designated as hedges when practicable. When we are not able to apply hedge accounting, or when the derivative and the hedged item are both recorded in earnings concurrently, the derivatives are deemed economic hedges and hedge accounting is not applied. This most frequently occurs when we hedge a recognized foreign currency transaction (e.g., a receivable or payable) with a derivative. Since the effects of changes in exchange rates are reflected concurrently in earnings for both the derivative and the transaction, the economic hedge does not require hedge accounting.

The following table provides information about the fair value of our derivatives, by contract type, separating those accounted for as hedges and those that are not.

(In millions)	June 30, 2013		December 31, 2012	
	Fair value		Fair value	
	Assets	Liabilities	Assets	Liabilities
Derivatives accounted for as hedges				
Interest rate contracts	\$ 4,875	\$ 1,621	\$ 8,443	\$ 719
Currency exchange contracts	1,438	1,466	827	1,762
Other contracts	-	-	-	-
	6,313	3,087	9,270	2,481
Derivatives not accounted for as hedges				
Interest rate contracts	348	172	452	195
Currency exchange contracts	1,133	1,489	1,457	358
Other contracts	46	18	35	26
	1,527	1,679	1,944	579
Gross derivatives recognized in statement of financial position				
Gross derivatives	7,840	4,766	11,214	3,060
Gross accrued interest	1,186	(213)	1,683	14
	9,026	4,553	12,897	3,074
Amounts offset in statement of financial position				
Netting adjustments(a)	(3,642)	(3,628)	(2,532)	(2,517)
Cash collateral(b)	(3,164)	(306)	(5,125)	(391)
	(6,806)	(3,934)	(7,657)	(2,908)
Net derivatives recognized in statement of financial position				
Net derivatives	2,220	619	5,240	166
Amounts not offset in statement of financial position				
Securities held as collateral(c)	(2,046)	-	(5,060)	-
Net amount	\$ 174	\$ 619	\$ 180	\$ 166

Derivatives are classified in the captions “Other assets” and “Other liabilities” and the related accrued interest is classified in “Other receivables” and “Other liabilities” in our financial statements.

(a) The netting of derivative receivables and payables is permitted when a legally enforceable master netting agreement exists. Amounts included fair value adjustments related to our own and counterparty non-performance risk. At June 30, 2013 and December 31, 2012, the cumulative adjustment for non-performance risk was a gain

(loss) of \$(14) million and \$(15) million, respectively.

- (b) Excludes excess cash collateral received and posted of \$47 million and \$28 million at June 30, 2013, respectively, and \$42 million and \$10 million at December 31, 2012, respectively.
- (c) Excludes excess securities collateral received of \$22 million and \$359 million at June 30, 2013 and December 31, 2012, respectively.

(34)

Fair value hedges

We use interest rate and currency exchange derivatives to hedge the fair value effects of interest rate and currency exchange rate changes on local and non-functional currency denominated fixed-rate debt. For relationships designated as fair value hedges, changes in fair value of the derivatives are recorded in earnings within interest along with offsetting adjustments to the carrying amount of the hedged debt. The following tables provide information about the earnings effects of our fair value hedging relationships for the three and six months ended June 30, 2013 and 2012, respectively.

(In millions)	Three months ended June 30,			
	2013	2013	2012	2012
	Gain (loss)	Gain (loss)	Gain (loss)	Gain (loss)
	on hedging	on hedged	on hedging	on hedged
	derivatives	items	derivatives	items
Interest rate contracts	\$ (2,932)	\$ 2,945	\$ 2,232	\$ (2,312)
Currency exchange contracts	2	(1)	(63)	60

Fair value hedges resulted in \$14 million and \$(82) million of ineffectiveness in the three months ended June 30, 2013 and 2012, respectively. In both the three months ended June 30, 2013 and 2012, there were insignificant amounts excluded from the assessment of effectiveness.

(In millions)	Six months ended June 30,			
	2013	2013	2012	2012
	Gain (loss)	Gain (loss)	Gain (loss)	Gain (loss)
	on hedging	on hedged	on hedging	on hedged
	derivatives	items	derivatives	items
Interest rate contracts	\$ (3,841)	\$ 3,826	\$ 785	\$ (962)
Currency exchange contracts	(7)	7	(111)	100

Fair value hedges resulted in \$(15) million and \$(187) million of ineffectiveness in the six months ended June 30, 2013 and 2012, respectively. In both the six months ended June 30, 2013 and 2012, there were insignificant amounts excluded from the assessment of effectiveness.

Cash flow hedges

We use interest rate, currency exchange and commodity derivatives to reduce the variability of expected future cash flows associated with variable rate borrowings and commercial purchase and sale transactions, including

commodities. For derivatives that are designated in a cash flow hedging relationship, the effective portion of the change in fair value of the derivative is reported as a component of AOCI and reclassified into earnings contemporaneously and in the same caption with the earnings effects of the hedged transaction.

The following tables provide information about the amounts recorded in AOCI, as well as the gain (loss) recorded in earnings, when reclassified out of AOCI, for the three and six months ended June 30, 2013 and 2012, respectively. See Note 8 for additional information about reclassifications out of AOCI.

(35)

(In millions)	Gain (loss) recognized in AOCI for the three months ended June 30,		Gain (loss) reclassified from AOCI into earnings for the three months ended June 30,	
	2013	2012	2013	2012
Cash flow hedges				
Interest rate contracts	\$ 20	\$ (52)	\$ (92)	\$ (124)
Currency exchange contracts	272	(345)	164	(265)
Commodity contracts	—	—	—	—
Total	\$ 292	\$ (397)	\$ 72	\$ (389)

(In millions)	Gain (loss) recognized in AOCI for the six months ended June 30,		Gain (loss) reclassified from AOCI into earnings for the six months ended June 30,	
	2013	2012	2013	2012
Cash flow hedges				
Interest rate contracts	\$ 9	\$ (79)	\$ (194)	\$ (264)
Currency exchange contracts	238	340	119	352
Total	\$ 247	\$ 261	\$ (75)	\$ 88

The total pre-tax amount in AOCI related to cash flow hedges of forecasted transactions was a \$515 million loss at June 30, 2013. We expect to transfer \$330 million to earnings as an expense in the next 12 months contemporaneously with the earnings effects of the related forecasted transactions. In both the three and six months ended June 30, 2013 and 2012, we recognized insignificant gains and losses related to hedged forecasted transactions and firm commitments that did not occur by the end of the originally specified period. At June 30, 2013 and 2012, the maximum term of derivative instruments that hedge forecasted transactions was 19 years and 20 years, respectively.

For cash flow hedges, the amount of ineffectiveness in the hedging relationship and amount of the changes in fair value of the derivatives that are not included in the measurement of ineffectiveness are both reflected in earnings each reporting period. These amounts are primarily reported in revenues from services and totaled \$0 million and \$(1) million in the three months ended June 30, 2013 and 2012, respectively, and \$1 million and \$3 million in the six months ended June 30, 2013 and 2012, respectively.

Net investment hedges in foreign operations

We use currency exchange derivatives to protect our net investments in global operations conducted in non-U.S. dollar currencies. For derivatives that are designated as hedges of net investment in a foreign operation, we assess effectiveness based on changes in spot currency exchange rates. Changes in spot rates on the derivative are recorded

as a component of AOCI until such time as the foreign entity is substantially liquidated or sold. The change in fair value of the forward points, which reflects the interest rate differential between the two countries on the derivative, is excluded from the effectiveness assessment.

The following tables provide information about the amounts recorded in AOCI for the three and six months ended June 30, 2013 and 2012, respectively, as well as the gain (loss) recorded in revenues from services when reclassified out of AOCI.

(36)

(In millions)	Gain (loss) recognized in CTA for the three months ended June 30,		Gain (loss) reclassified from CTA for the three months ended June 30,	
	2013	2012	2013	2012
Net investment hedges				
Currency exchange contracts	\$ 412	\$ 1,853	\$ 15	\$ (2)

(In millions)	Gain (loss) recognized in CTA for the six months ended June 30,		Gain (loss) reclassified from CTA for the six months ended June 30,	
	2013	2012	2013	2012
Net investment hedges				
Currency exchange contracts	\$ 2,517	\$ 351	\$ (109)	\$ (12)

The amounts related to the change in the fair value of the forward points that are excluded from the measure of effectiveness were \$(187) million and \$(260) million in the three months ended June 30, 2013 and 2012, respectively, and \$(353) million and \$(480) million in the six months ended June 30, 2013 and 2012, respectively, and are recorded in interest.

Free-standing derivatives

Changes in the fair value of derivatives that are not designated as hedges are recorded in earnings each period. As discussed above, these derivatives are typically entered into as economic hedges of changes in interest rates, currency exchange rates, commodity prices and other risks. Gains or losses related to the derivative are typically recorded in revenues from services, based on our accounting policy. In general, the earnings effects of the item that represent the economic risk exposure are recorded in the same caption as the derivative. Gains (losses) for the six months ended June 30, 2013 on derivatives not designated as hedges were \$(1,052) million composed of amounts related to interest rate contracts of \$(79) million, currency exchange contracts of \$(997) million, and other derivatives of \$24 million. These losses were more than offset by the earnings effects from the underlying items that were economically hedged. Gains (losses) for the six months ended June 30, 2012 on derivatives not designated as hedges were \$(1,579) million composed of amounts related to interest rate contracts of \$(132) million, currency exchange contracts of \$(1,443) million, and other derivatives of \$(4) million. These losses were more than offset by the earnings effects from the underlying items that were economically hedged.

Counterparty credit risk

Fair values of our derivatives can change significantly from period to period based on, among other factors, market movements and changes in our positions. We manage counterparty credit risk (the risk that counterparties will default and not make payments to us according to the terms of our agreements) on an individual counterparty basis. Where we have agreed to netting of derivative exposures with a counterparty, we net our exposures with that counterparty and apply the value of collateral posted to us to determine the exposure. We actively monitor these net exposures against defined limits and take appropriate actions in response, including requiring additional collateral.

As discussed above, we have provisions in certain of our master agreements that require counterparties to post collateral (typically, cash or U.S. Treasury securities) when our receivable due from the counterparty, measured at current market value, exceeds a specified limit. The fair value of such collateral was \$5,210 million, of which \$3,164 million was cash and \$2,046 million was in the form of securities held by a custodian for our benefit. Under certain of these same agreements, we post collateral to our counterparties for our derivative obligations, the fair value of which was \$306 million at June 30, 2013. At June 30, 2013, our exposure to counterparties (including accrued interest), net of collateral we hold, was \$133 million. This excludes exposure related to embedded derivatives.

(37)

Additionally, our master agreements typically contain mutual downgrade provisions that provide the ability of each party to require termination if the long-term credit rating of the counterparty were to fall below A-/A3. In certain of these master agreements, each party also has the ability to require termination if the short-term rating of the counterparty were to fall below A-1/P-1. Our master agreements also typically contain provisions that provide termination rights upon the occurrence of certain other events, such as a bankruptcy or events of default by one of the parties. If an agreement was terminated under any of these circumstances, the termination amount payable would be determined on a net basis and could also take into account any collateral posted. The net amount of our derivative liability, after consideration of collateral posted by us and outstanding interest payments was \$593 million at June 30, 2013. This excludes embedded derivatives.

12. SUPPLEMENTAL INFORMATION ABOUT THE CREDIT QUALITY OF FINANCING RECEIVABLES AND ALLOWANCE FOR LOSSES ON FINANCING RECEIVABLES

We provide further detailed information about the credit quality of our Commercial, Real Estate and Consumer financing receivables portfolios. For each portfolio, we describe the characteristics of the financing receivables and provide information about collateral, payment performance, credit quality indicators, and impairment. We manage these portfolios using delinquency and nonearning data as key performance indicators. The categories used within this section such as impaired loans, troubled debt restructuring (TDR) and nonaccrual financing receivables are defined by the authoritative guidance and we base our categorization on the related scope and definitions contained in the related standards. The categories of nonearning and delinquent are defined by us and are used in our process for managing our financing receivables. Definitions of these categories are provided in Note 1 in our 2012 consolidated financial statements.

We recognized \$112 million, \$253 million and \$115 million of interest income, including \$36 million, \$92 million and \$49 million on a cash basis, for the six months ended June 30, 2013, the year ended December 31, 2012 and the six months ended June 30, 2012, respectively, principally in our CLL Americas business. The total average investment in impaired loans for the six months ended June 30, 2013 and the year ended December 31, 2012 was \$4,735 million and \$5,688 million, respectively.

Impaired loans classified as TDRs in our CLL business were \$3,350 million and \$3,872 million at June 30, 2013 and December 31, 2012, respectively, and were primarily attributable to CLL Americas (\$2,351 million and \$2,577 million, respectively). For the six months ended June 30, 2013, we modified \$825 million of loans classified as TDRs, primarily in CLL Americas (\$513 million). Changes to these loans primarily included extensions, interest only payment periods, debt to equity exchange and forbearance or other actions, which are in addition to, or sometimes in lieu of, fees and rate increases. Of our \$1,961 million and \$2,796 million of modifications classified as TDRs in the twelve months ended June 30, 2013 and 2012, respectively, \$87 million and \$96 million have subsequently experienced a payment default in the six months ended June 30, 2013 and 2012, respectively.

(40)

Credit Quality Indicators

Substantially all of our Commercial financing receivables portfolio is secured lending and we assess the overall quality of the portfolio based on the potential risk of loss measure. The metric incorporates both the borrower's credit quality along with any related collateral protection.

Our internal risk ratings process is an important source of information in determining our allowance for losses and represents a comprehensive, statistically validated approach to evaluate risk in our financing receivables portfolios. In deriving our internal risk ratings, we stratify our Commercial portfolios into 21 categories of default risk and/or six categories of loss given default to group into three categories: A, B and C. Our process starts by developing an internal risk rating for our borrowers, which are based upon our proprietary models using data derived from borrower financial statements, agency ratings, payment history information, equity prices and other commercial borrower characteristics. We then evaluate the potential risk of loss for the specific lending transaction in the event of borrower default, which takes into account such factors as applicable collateral value, historical loss and recovery rates for similar transactions, and our collection capabilities. Our internal risk ratings process and the models we use are subject to regular monitoring and validation controls. The frequency of rating updates is set by our credit risk policy, which requires annual Risk Committee approval. The models are updated on a regular basis and statistically validated annually, or more frequently as circumstances warrant.

The table below summarizes our Commercial financing receivables by risk category. As described above, financing receivables are assigned one of 21 risk ratings based on our process and then these are grouped by similar characteristics into three categories in the table below. Category A is characterized by either high credit quality borrowers or transactions with significant collateral coverage, which substantially reduces or eliminates the risk of loss in the event of borrower default. Category B is characterized by borrowers with weaker credit quality than those in Category A, or transactions with moderately strong collateral coverage, which minimizes but may not fully mitigate the risk of loss in the event of default. Category C is characterized by borrowers with higher levels of default risk relative to our overall portfolio or transactions where collateral coverage may not fully mitigate a loss in the event of default.

For our secured financing receivables portfolio, our collateral position and ability to work out problem accounts mitigates our losses. Our asset managers have deep industry expertise that enables us to identify the optimum approach to default situations. We price risk premiums for weaker credits at origination, closely monitor changes in creditworthiness through our risk ratings and watch list process, and are engaged early with deteriorating credits to minimize economic loss. Secured financing receivables within risk Category C are predominantly in our CLL businesses and are primarily composed of senior term lending facilities and factoring programs secured by various asset types including inventory, accounts receivable, cash, equipment and related business facilities as well as franchise finance activities secured by underlying equipment.

Loans within Category C are reviewed and monitored regularly, and classified as impaired when it is probable that they will not pay in accordance with contractual terms. Our internal risk rating process identifies credits warranting closer monitoring; and as such, these loans are not necessarily classified as nonearning or impaired.

Our unsecured Commercial financing receivables portfolio is primarily attributable to our Interbanca S.p.A. and GE Sanyo Credit acquisitions in Europe and Asia, respectively. At June 30, 2013 and December 31, 2012, these financing receivables included \$424 million and \$458 million rated A, \$602 million and \$583 million rated B, and \$317 million and \$452 million rated C, respectively.

(43)

Impaired Loans

The following table provides information about loans classified as impaired and specific reserves related to Real Estate.

(In millions)	With no specific allowance			With a specific allowance			Average investment in loans
	Recorded investment in loans	Unpaid principal balance	Average investment in loans	Recorded investment in loans	Unpaid principal balance	Associated allowance	
June 30, 2013							
Real Estate	\$ 3,207	\$ 3,369	\$ 3,295	\$ 1,521	\$ 1,973	\$ 144	\$ 1,931
December 31, 2012							
Real Estate	\$ 3,491	\$ 3,712	\$ 3,773	\$ 2,202	\$ 2,807	\$ 188	\$ 3,752

We recognized \$110 million, \$329 million and \$183 million of interest income, including \$90 million, \$237 million and \$129 million on a cash basis, for the six months ended June 30, 2013, the year ended December 31, 2012 and the six months ended June 30, 2012, respectively. The total average investment in impaired loans for the six months ended June 30, 2013 and the year ended December 31, 2012 was \$5,226 million and \$7,525 million, respectively.

Real Estate TDRs decreased from \$5,146 million at December 31, 2012 to \$4,356 million at June 30, 2013, primarily driven by resolution of TDRs through paydowns and the impact of currency exchange, partially offset by extensions of loans scheduled to mature during 2013, some of which were classified as TDRs upon modification. We deem loan modifications to be TDRs when we have granted a concession to a borrower experiencing financial difficulty and we do not receive adequate compensation in the form of an effective interest rate that is at current market rates of interest given the risk characteristics of the loan or other consideration that compensates us for the value of the concession. The limited liquidity and higher return requirements in the real estate market for loans with higher loan-to-value (LTV) ratios has typically resulted in the conclusion that the modified terms are not at current market rates of interest, even if the modified loans are expected to be fully recoverable. For the six months ended June 30, 2013, we modified \$776 million of loans classified as TDRs. Changes to these loans primarily included maturity extensions, principal payment acceleration, changes to collateral or covenant terms and cash sweeps, which are in addition to, or sometimes in lieu of, fees and rate increases. Of our \$2,858 million and \$4,454 million of modifications classified as TDRs in the twelve months ended June 30, 2013 and 2012, respectively, \$65 million and \$407 million have subsequently experienced a payment default in the six months ended June 30, 2013 and 2012, respectively.

Credit Quality Indicators

Due to the primarily non-recourse nature of our Debt portfolio, loan-to-value ratios provide the best indicators of the credit quality of the portfolio.

Loan-to-value ratio				
	June 30, 2013		December 31, 2012	
Less than	80% to		Less than	80% to

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-Q

(In millions)	80%	95%	Greater than 95%	80%	95%	Greater than 95%
Debt	\$ 13,977	\$ 1,970	\$ 2,591	\$ 13,570	\$ 2,572	\$ 3,604

(44)

By contrast, the credit quality of the owner occupied/credit tenant portfolio is primarily influenced by the strength of the borrower's general credit quality, which is reflected in our internal risk rating process, consistent with the process we use for our Commercial portfolio. As of June 30, 2013, the internal risk rating of A, B and C for our owner occupied/credit tenant portfolio approximated \$681 million, \$201 million and \$201 million, respectively, as compared to the December 31, 2012, ratings of \$956 million, \$25 million and \$219 million, respectively.

Within Real Estate-Debt, these financing receivables are primarily concentrated in our North American and European Lending platforms and are secured by various property types. A substantial majority of the Real Estate-Debt financing receivables with loan-to-value ratios greater than 95% are paying in accordance with contractual terms. Substantially all of these loans and the majority of our owner occupied/credit tenant financing receivables included in Category C are impaired loans that are subject to the specific reserve evaluation process described in Note 1 in our 2012 consolidated financial statements. The ultimate recoverability of impaired loans is driven by collection strategies that do not necessarily depend on the sale of the underlying collateral and include full or partial repayments through third-party refinancing and restructurings.

CONSUMER

At June 30, 2013, our U.S. consumer financing receivables included private-label credit card and sales financing for approximately 55 million customers across the U.S. with no metropolitan area accounting for more than 6% of the portfolio. Of the total U.S. consumer financing receivables, approximately 65% relate to credit card loans, which are often subject to profit and loss sharing arrangements with the retailer (which are recorded in revenues), and the remaining 35% are sales finance receivables, which provide financing to customers in areas such as electronics, recreation, medical and home improvement.

Financing Receivables and Allowance for Losses

The following table provides further information about general and specific reserves related to Consumer financing receivables.

(In millions)	Financing receivables	
	June 30, 2013	December 31, 2012
Non-U.S. residential mortgages	\$ 31,784	\$ 33,451
Non-U.S. installment and revolving credit	17,620	18,546
U.S. installment and revolving credit	50,155	50,853
Non-U.S. auto	3,808	4,260
Other	7,547	8,070
Total Consumer financing receivables, before allowance for losses	\$ 110,914	\$ 115,180
Non-impaired financing receivables	\$ 107,705	\$ 111,960
General reserves	3,483	2,950
Impaired loans	3,209	3,220
Specific reserves	668	674

(45)

Past Due Financing Receivables

The following table displays payment performance of Consumer financing receivables.

	June 30, 2013		December 31, 2012	
	Over 30 days past due	Over 90 days past due(a)	Over 30 days past due	Over 90 days past due(a)
Non-U.S. residential mortgages	11.8%	7.4%	12.0%	7.5%
Non-U.S. installment and revolving credit	4.0	1.2	3.9	1.1
U.S. installment and revolving credit	3.9	1.7	4.6	2.0
Non-U.S. auto	3.3	0.4	3.1	0.5
Other	2.8	1.6	2.8	1.7
Total	6.1	3.2	6.5	3.4

(a) Included \$22 million and \$24 million of loans at June 30, 2013 and December 31, 2012, respectively, which are over 90 days past due and accruing interest, mainly representing accretion on loans acquired at a discount.

Nonaccrual Financing Receivables

The following table provides further information about Consumer financing receivables that are classified as nonaccrual.

	Nonaccrual financing receivables		Nonearning financing receivables	
	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012
(Dollars in millions)				
Non-U.S. residential mortgages	\$ 2,399	\$ 2,600	\$ 2,388	\$ 2,569
Non-U.S. installment and revolving credit	225	224	225	224
U.S. installment and revolving credit	822	1,026	822	1,026
Non-U.S. auto	21	24	21	24
Other	379	427	324	351
Total	\$ 3,846	\$ 4,301	\$ 3,780	\$ 4,194
Allowance for losses percentage	107.9%	84.3%	109.8%	86.4%

Impaired Loans

The vast majority of our Consumer nonaccrual financing receivables are smaller balance homogeneous loans evaluated collectively, by portfolio, for impairment and therefore are outside the scope of the disclosure requirement for impaired loans. Accordingly, impaired loans in our Consumer business represent restructured smaller balance

homogeneous loans meeting the definition of a TDR, and are therefore subject to the disclosure requirement for impaired loans, and commercial loans in our Consumer–Other portfolio. The recorded investment of these impaired loans totaled \$3,209 million (with an unpaid principal balance of \$3,298 million) and comprised \$85 million with no specific allowance, primarily all in our Consumer–Other portfolio, and \$3,124 million with a specific allowance of \$668 million at June 30, 2013. The impaired loans with a specific allowance included \$312 million with a specific allowance of \$73 million in our Consumer–Other portfolio and \$2,812 million with a specific allowance of \$595 million across the remaining Consumer business and had an unpaid principal balance and average investment of \$3,183 million and \$3,117 million, respectively, at June 30, 2013. We recognized \$115 million, \$169 million and \$76 million of interest income, including \$1 million, \$5 million and \$3 million on a cash basis, for the six months ended June 30, 2013, the year ended December 31, 2012 and the six months ended June 30, 2012, respectively, principally in our Consumer–U.S. installment and revolving credit portfolios. The total average investment in impaired loans for the six months ended June 30, 2013 and the year ended December 31, 2012 was \$3,211 million and \$3,056 million, respectively.

(46)

Impaired loans classified as TDRs in our Consumer business were \$3,068 million and \$3,053 million at June 30, 2013 and December 31, 2012, respectively. We utilize certain loan modification programs for borrowers experiencing financial difficulties in our Consumer loan portfolio. These loan modification programs primarily include interest rate reductions and payment deferrals in excess of three months, which were not part of the terms of the original contract, and are primarily concentrated in our non-U.S. residential mortgage and U.S. credit card portfolios. For the six months ended June 30, 2013, we modified \$852 million of consumer loans for borrowers experiencing financial difficulties, which are classified as TDRs, and included \$541 million of non-U.S. consumer loans, primarily residential mortgages, credit cards and personal loans and \$311 million of U.S. consumer loans, primarily credit cards. We expect borrowers whose loans have been modified under these programs to continue to be able to meet their contractual obligations upon the conclusion of the modification. Of our \$1,694 million and \$2,106 million of modifications classified as TDRs in the twelve months ended June 30, 2013 and 2012, respectively, \$158 million and \$352 million have subsequently experienced a payment default in the six months ended June 30, 2013 and 2012, respectively.

Credit Quality Indicators

Our Consumer financing receivables portfolio comprises both secured and unsecured lending. Secured financing receivables comprise residential loans and lending to small and medium-sized enterprises predominantly secured by auto and equipment, inventory finance, and cash flow loans. Unsecured financing receivables include private-label credit card financing. A substantial majority of these cards are not for general use and are limited to the products and services sold by the retailer. The private label portfolio is diverse with no metropolitan area accounting for more than 5% of the related portfolio.

Non-U.S. residential mortgages

For our secured non-U.S. residential mortgage book, we assess the overall credit quality of the portfolio through loan-to-value ratios (the ratio of the outstanding debt on a property to the value of that property at origination). In the event of default and repossession of the underlying collateral, we have the ability to remarket and sell the properties to eliminate or mitigate the potential risk of loss. The table below provides additional information about our non-U.S. residential mortgages based on loan-to-value ratios.

(In millions)	Loan-to-value ratio					
	June 30, 2013		December 31, 2012			
	80% or less	Greater than 80% to 90%	Greater than 90%	80% or less	Greater than 80% to 90%	Greater than 90%
Non-U.S. residential mortgages	\$ 17,764	\$ 5,340	\$ 8,680	\$ 18,613	\$ 5,739	\$ 9,099

The majority of these financing receivables are in our U.K. and France portfolios and have re-indexed loan-to-value ratios of 80% and 57%, respectively. We have third-party mortgage insurance for about 30% of the balance of Consumer non-U.S. residential mortgage loans with loan-to-value ratios greater than 90% at June 30, 2013. Such loans were primarily originated in Poland, France and the U.K.

Installment and Revolving Credit

For our unsecured lending products, including the non-U.S. and U.S. installment and revolving credit and non-U.S. auto portfolios, we assess overall credit quality using internal and external credit scores. Our internal credit scores

imply a probability of default, which we consistently translate into three approximate credit bureau equivalent credit score categories, including (a) 681 or higher, which are considered the strongest credits; (b) 615 to 680, considered moderate credit risk; and (c) 614 or less, which are considered weaker credits.

(47)

(In millions)	Internal ratings translated to approximate credit bureau equivalent score					
	June 30, 2013			December 31, 2012		
	681 or higher	615 to 680	614 or less	681 or higher	615 to 680	614 or less
Non-U.S. installment and revolving credit	\$ 10,262	\$ 4,162	\$ 3,196	\$ 10,493	\$ 4,496	\$ 3,557
U.S. installment and revolving credit	32,869	9,876	7,410	33,204	9,753	7,896
Non-U.S. auto	2,881	546	381	3,141	666	453

Of those financing receivable accounts with credit bureau equivalent scores of 614 or less at June 30, 2013, 97% relate to installment and revolving credit accounts. These smaller balance accounts have an average outstanding balance less than one thousand U.S. dollars and are primarily concentrated in our retail card and sales finance receivables in the U.S. (which are often subject to profit and loss sharing arrangements), and closed-end loans outside the U.S., which minimizes the potential for loss in the event of default. For lower credit scores, we adequately price for the incremental risk at origination and monitor credit migration through our risk ratings process. We continuously adjust our credit line underwriting management and collection strategies based on customer behavior and risk profile changes.

Consumer – Other

Secured lending in Consumer – Other comprises loans to small and medium-sized enterprises predominantly secured by auto and equipment, inventory finance and cash flow loans. We develop our internal risk ratings for this portfolio in a manner consistent with the process used to develop our Commercial credit quality indicators, described above. We use the borrower's credit quality and underlying collateral strength to determine the potential risk of loss from these activities.

At June 30, 2013, Consumer – Other financing receivables of \$6,385 million, \$433 million and \$729 million were rated A, B, and C, respectively. At December 31, 2012, Consumer – Other financing receivables of \$6,873 million, \$451 million and \$746 million were rated A, B, and C, respectively.

13. VARIABLE INTEREST ENTITIES

We use variable interest entities primarily to securitize financial assets and arrange other forms of asset-backed financing in the ordinary course of business. Except as noted below, investors in these entities only have recourse to the assets owned by the entity and not to our general credit. We do not have implicit support arrangements with any VIE. We did not provide non-contractual support for previously transferred financing receivables to any VIE in 2013 or 2012.

In evaluating whether we have the power to direct the activities of a VIE that most significantly impact its economic performance, we consider the purpose for which the VIE was created, the importance of each of the activities in which it is engaged and our decision-making role, if any, in those activities that significantly determine the entity's economic performance as compared to other economic interest holders. This evaluation requires consideration of all facts and circumstances relevant to decision-making that affects the entity's future performance and the exercise of professional judgment in deciding which decision-making rights are most important.

In determining whether we have the right to receive benefits or the obligation to absorb losses that could potentially be significant to the VIE, we evaluate all of our economic interests in the entity, regardless of form (debt, equity, management and servicing fees, and other contractual arrangements). This evaluation considers all relevant factors of the entity's design, including: the entity's capital structure, contractual rights to earnings (losses), subordination of our interests relative to those of other investors, contingent payments, as well as other contractual arrangements that have potential to be economically significant. The evaluation of each of these factors in reaching a conclusion about the potential significance of our economic interests is a matter that requires the exercise of professional judgment.

(48)

Consolidated Variable Interest Entities

We consolidate VIEs because we have the power to direct the activities that significantly affect the VIEs economic performance, typically because of our role as either servicer or manager for the VIE. Our consolidated VIEs fall into three main groups, which are further described below:

- Trinity comprises two consolidated entities that hold investment securities, the majority of which are investment grade, and were funded by the issuance of GICs. The GICs included conditions under which certain holders could require immediate repayment of their investment should the long-term credit ratings of GECC fall below AA-/Aa3 or the short-term credit ratings fall below A-1+/P-1. The outstanding GICs are subject to their scheduled maturities and individual terms, which may include provisions permitting redemption upon a downgrade of one or more of GECC's ratings, among other things, and are reported in investment contracts, insurance liabilities and insurance annuity benefits.
- Consolidated Securitization Entities (CSEs) comprise primarily our previously unconsolidated QSPEs that were consolidated on January 1, 2010 in connection with our adoption of ASU 2009-16 & 17. These entities were created to facilitate securitization of financial assets and other forms of asset-backed financing, which serve as an alternative funding source by providing access to variable funding notes and term markets. The securitization transactions executed with these entities are similar to those used by many financial institutions and substantially all are non-recourse. We provide servicing for substantially all of the assets in these entities.

The financing receivables in these entities have similar risks and characteristics to our other financing receivables and were underwritten to the same standard. Accordingly, the performance of these assets has been similar to our other financing receivables; however, the blended performance of the pools of receivables in these entities reflects the eligibility criteria that we apply to determine which receivables are selected for transfer. Contractually the cash flows from these financing receivables must first be used to pay third-party debt holders as well as other expenses of the entity. Excess cash flows are available to GECC. The creditors of these entities have no claim on other assets of GECC.

- Other remaining assets and liabilities of consolidated VIEs relate primarily to three categories of entities: (1) joint ventures that lease light industrial equipment of \$1,562 million of assets and \$847 million of liabilities; (2) other entities that are involved in power generating and leasing activities of \$807 million of assets and no liabilities; and (3) insurance entities that, among other lines of business, provide property and casualty and workers' compensation coverage for GE of \$1,176 million of assets and \$561 million of liabilities.

(49)

The table below summarizes the assets and liabilities of consolidated VIEs described above.

(In millions)	Consolidated Securitization Entities						Total
	Trinity(a)	Credit cards(b)	Equipment(b)	Trade receivables	Other		
June 30, 2013							
Assets(c)							
Financing receivables, net	\$ –	\$ 23,647	\$ 12,810	\$ 2,290	\$ 2,024	\$ –	\$ 40,771
Investment securities	3,308	–	–	–	1,026	–	4,334
Other assets	123	25	599	–	1,940	–	2,687
Total	\$ 3,431	\$ 23,672	\$ 13,409	\$ 2,290	\$ 4,990	\$ –	\$ 47,792
Liabilities(c)							
Borrowings	\$ –	\$ –	\$ –	\$ –	\$ 713	\$ –	\$ 713
Non-recourse borrowings	–	16,291	10,280	1,978	51	–	28,600
Other liabilities	1,556	218	124	14	1,391	–	3,303
Total	\$ 1,556	\$ 16,509	\$ 10,404	\$ 1,992	\$ 2,155	\$ –	\$ 32,616
December 31, 2012							
Assets(c)							
Financing receivables, net	\$ –	\$ 24,169	\$ 12,456	\$ 2,339	\$ 1,952	\$ –	\$ 40,916
Investment securities	3,435	–	–	–	1,051	–	4,486
Other assets	217	29	360	–	1,873	–	2,479
Total	\$ 3,652	\$ 24,198	\$ 12,816	\$ 2,339	\$ 4,876	\$ –	\$ 47,881
Liabilities(c)							
Borrowings	\$ –	\$ –	\$ –	\$ –	\$ 707	\$ –	\$ 707
Non-recourse borrowings	–	17,208	9,811	2,050	54	–	29,123
Other liabilities	1,656	146	11	8	1,315	–	3,136
Total	\$ 1,656	\$ 17,354	\$ 9,822	\$ 2,058	\$ 2,076	\$ –	\$ 32,966

(a) Excludes intercompany advances from GECC to Trinity, which are eliminated in consolidation of \$2,241 million and \$2,441 million at June 30, 2013 and December 31, 2012, respectively.

(b) We provide servicing to the CSEs and are contractually permitted to commingle cash collected from customers on financing receivables sold to CSE investors with our own cash prior to payment to a CSE, provided our short-term credit rating does not fall below A-1/P-1. These CSEs also owe us amounts for purchased financial assets and scheduled interest and principal payments. At June 30, 2013 and December 31, 2012, the amounts of commingled cash owed to the CSEs were \$6,644 million and \$6,225 million, respectively, and the amounts owed

to us by CSEs were \$6,552 million and \$6,143 million, respectively.

- (c) Asset amounts exclude intercompany receivables for cash collected on behalf of the entities by GE as servicer, which are eliminated in consolidation. Such receivables provide the cash to repay the entities' liabilities. If these intercompany receivables were included in the table above, assets would be higher. In addition, other assets, borrowings and other liabilities exclude intercompany balances that are eliminated in consolidation.

Revenues from services from our consolidated VIEs were \$1,669 million and \$1,660 million in the three months ended June 30, 2013 and 2012, respectively, and \$3,372 million and \$3,240 million in the six months ended June 30, 2013 and 2012, respectively. Related expenses consisted primarily of provisions for losses of \$175 million and \$170 million in the three months ended June 30, 2013 and 2012, respectively, and \$589 million and \$370 million in the six months ended June 30, 2013 and 2012, respectively, and interest of \$95 million and \$115 million in the three months ended June 30, 2013 and 2012, respectively, and \$184 million and \$247 million in the six months ended June 30, 2013 and 2012, respectively. These amounts do not include intercompany revenues and costs, principally fees and interest between GECC and the VIEs, which are eliminated in consolidation.

Investments in Unconsolidated Variable Interest Entities

Our involvement with unconsolidated VIEs consists of the following activities: assisting in the formation and financing of the entity, providing recourse and/or liquidity support, servicing the assets and receiving variable fees for services provided. We are not required to consolidate these entities because the nature of our involvement with the activities of the VIEs does not give us power over decisions that significantly affect their economic performance.

(50)

Our largest exposure to any single unconsolidated VIE at June 30, 2013 is an investment in asset-backed securities issued by the Senior Secured Loan Program (“SSLP”), a fund that invests in high-quality senior secured debt of various middle-market companies (\$5,646 million). Other significant unconsolidated VIEs include investments in real estate entities (\$2,510 million), which generally consist of passive limited partnership investments in tax-advantaged, multi-family real estate and investments in various European real estate entities; and exposures to joint ventures that purchase factored receivables (\$2,237 million).

The classification of our variable interests in these entities in our financial statements is based on the nature of the entity and the type of investment we hold. Variable interests in partnerships and corporate entities are classified as either equity method or cost method investments. In the ordinary course of business, we also make investments in entities in which we are not the primary beneficiary but may hold a variable interest such as limited partner interests or mezzanine debt investments. These investments are classified in two captions in our financial statements: “Other assets” for investments accounted for under the equity method, and “Financing receivables – net” for debt financing provided to these entities. Our investments in unconsolidated VIEs at June 30, 2013 and December 31, 2012 follow.

(In millions)	June 30, 2013	December 31, 2012
Other assets and investment securities	\$ 7,994	\$ 10,386
Financing receivables – net	2,595	2,654
Total investments	10,589	13,040
Contractual obligations to fund investments or guarantees	2,471	2,602
Revolving lines of credit	58	41
Total	\$ 13,118	\$ 15,683

As previously reported, during 2012, Penske Truck Leasing Co., L.P. (PTL) effected a recapitalization and subsequently acquired third-party financing in order to repay outstanding debt owed to GECC. In the first quarter of 2013, PTL had repaid all outstanding debt owed and terminated its borrowing arrangement with GECC. During the second quarter of 2013, PTL ceased to be a VIE as a result of a principal in PTL retiring from the GE Board. Therefore, our investment in PTL (\$813 million at June 30, 2013) is not reported in the June 30, 2013 balance in the table above. As co-issuer and co-guarantor of \$700 million of debt raised by the funding entity related to PTL, GECC reports this amount, which is also our loss exposure and excluded from the table above, as debt of GECC in its financial statements. GECC has been indemnified by the general partner and the other limited partners of PTL for their proportionate share of the debt obligation.

In addition to the entities included in the table above, we also hold passive investments in RMBS, commercial mortgage-backed securities and asset-backed securities issued by VIEs. Such investments were, by design, investment grade at issuance and held by a diverse group of investors. Further information about such investments is provided in Note 3.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

A. Results of Operations

In the accompanying analysis of financial information, we sometimes use information derived from consolidated financial information but not presented in our financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP). Certain of these data are considered “non-GAAP financial measures” under the U.S. Securities and Exchange Commission (SEC) rules. For such measures, we have provided supplemental explanations and reconciliations in Exhibit 99(a) to this Form 10-Q Report.

Unless otherwise indicated, we refer to captions such as revenues and earnings from continuing operations attributable to GECC simply as “revenues” and “earnings” throughout this Management’s Discussion and Analysis. Similarly, discussion of other matters in our condensed, consolidated financial statements relates to continuing operations unless otherwise indicated.

(51)

Overview

Revenues in the second quarter of 2013 were \$11.0 billion, a \$0.4 billion (3%) decrease from the second quarter of 2012. Revenues for the quarter decreased as a result of organic revenue declines, primarily due to lower GE Capital Ending Net Investment (ENI) and higher impairments, partially offset by higher gains. Earnings were \$1.9 billion, down from \$2.1 billion in the second quarter of 2012.

Revenues in the first six months of 2013 were \$22.5 billion, a \$0.2 billion (1%) decrease from the first six months of 2012. Revenues for the six months ended June 30, 2013 included \$0.1 billion from acquisitions. Revenues for the first six months of 2013 decreased as a result of organic revenue declines, primarily due to lower ENI and higher impairments, partially offset by higher gains. Organic revenue excludes the effects of acquisitions, business dispositions (other than dispositions of businesses acquired for investment) and currency exchange rates. Earnings were \$3.8 billion, down from \$3.9 billion in the first six months of 2012.

Overall, acquisitions contributed an insignificant amount to total revenues in both the second quarters of 2013 and 2012, respectively. Our earnings in both the second quarters of 2013 and 2012 included an insignificant amount from acquired businesses. We integrate acquisitions as quickly as possible. Only revenues and earnings from the date we complete the acquisition through the end of the fourth following quarter are attributed to such businesses. Dispositions also affected our operations through lower revenues of an insignificant amount and \$0.2 billion in the second quarters of 2013 and 2012, respectively. The effects of dispositions on earnings were \$0.1 billion and an insignificant amount in the second quarters of 2013 and 2012, respectively.

Overall, acquisitions contributed \$0.1 billion to total revenues in both the six months of 2013 and 2012. Our earnings in both the six months of 2013 and 2012 included an insignificant amount from acquired businesses. We integrate acquisitions as quickly as possible. Only revenues and earnings from the date we complete the acquisition through the end of the fourth following quarter are attributed to such businesses. Dispositions also affected our operations through lower revenues of an insignificant amount and \$0.3 billion in the six months of 2013 and 2012, respectively. The effects of dispositions on earnings were \$0.2 billion and \$0.1 billion in the six months of 2013 and 2012, respectively.

We have communicated our goal of reducing our ENI. To achieve this goal, we are more aggressively focusing our businesses on selective financial services products where we have deep domain experience, broad distribution, and the ability to earn a consistent return on capital, while managing our overall balance sheet size and risk. We have a strategy of exiting those businesses that are underperforming or that are deemed to be non-strategic. We have completed a number of dispositions in our businesses in the past and will continue to evaluate options going forward.

While we are exiting non-core businesses, we are investing in our core businesses in markets where we believe that GECC has deep domain experience and is competitively advantaged. Accordingly, in the short-term, as we reduce our ENI through exiting non-core businesses, the overall level of our future net earnings may be reduced. However, over the long-term, we believe that this strategy will improve our long-term performance through higher returns as we will have a larger concentration of assets in our core businesses, as opposed to the underperforming or non-strategic assets we will be exiting; reduce liquidity risk as we pay down outstanding debt and diversify our sources of funding (with less reliance on the global commercial paper markets and an increase in alternative sources of funding such as deposits); and reduce capital requirements while strengthening capital ratios. Additional information about our liquidity and how we manage this risk can be found in the Financial Resources and Liquidity section in our consolidated financial statements for the year ended December 31, 2012.

Segment Operations

Operating segments comprise our five segments focused on the broad markets they serve: Commercial Lending and Leasing (CLL), Consumer, Real Estate, Energy Financial Services and GE Capital Aviation Services (GECAS). The

Chairman allocates resources to, and assesses the performance of, these five businesses. In addition to providing information on segments in their entirety, we have also provided supplemental information for the geographic regions within the CLL segment.

(52)

Corporate items and eliminations include unallocated Treasury and Tax operations; Trinity, a group of sponsored special purpose entities; certain consolidated liquidating securitization entities; the effects of eliminating transactions between operating segments; results of our run-off insurance operations remaining in continuing operations attributable to GECC; unallocated corporate costs; certain non-allocated amounts determined by the Chairman; and a variety of sundry items. Corporate items and eliminations is not an operating segment. Rather, it is added to operating segment totals to reconcile to consolidated totals on the financial statements.

Segment profit is determined based on internal performance measures used by the Chairman to assess the performance of each business in a given period. In connection with that assessment, the Chairman may exclude matters such as charges for restructuring; rationalization and other similar expenses; acquisition costs and other related charges; technology and product development costs; certain gains and losses from acquisitions or dispositions; and litigation settlements or other charges, responsibility for which preceded the current management team.

Segment profit excludes results reported as discontinued operations, earnings attributable to noncontrolling interests of consolidated subsidiaries, GECC preferred stock dividends declared and accounting changes. Segment profit, which we sometimes refer to as “net earnings”, includes interest and income taxes. GE allocates certain corporate costs to its segments based on an estimate of expected benefit to the respective segment relative to total GE. Factors considered in the determination of relative benefit include a segment’s direct costs and number of employees compared to the total direct costs and number of employees for all segments. GE allocates service costs related to its principal pension plans and GE no longer allocates the retiree costs of its postretirement healthcare benefits to its segments. This allocation methodology better aligns segment operating costs to the active employee costs, which are managed by the segments.

We have reclassified certain prior-period amounts to conform to the current-period presentation. Refer to the Summary of Operating Segments on page 7 for a reconciliation of the total reportable segments’ profit to the consolidated net earnings attributable to the Company.

CLL revenues decreased 3% and net earnings increased 31% in the second quarter of 2013. Revenues decreased as a result of higher impairments (\$0.1 billion) and organic revenue declines, primarily due to lower ENI (\$0.2 billion). Net earnings increased reflecting core increases (\$0.2 billion) and dispositions (\$0.1 billion), partially offset by higher impairments (\$0.1 billion).

CLL revenues decreased 12% and net earnings decreased 5% in the first six months of 2012. Revenues decreased as a result of organic revenue declines (\$0.5 billion), primarily due to lower ENI (\$0.4 billion), and higher impairments (\$0.4 billion). Net earnings decreased reflecting higher impairments (\$0.3 billion), partially offset by dispositions (\$0.1 billion) and core increases (\$0.1 billion).

(54)

Consumer

(In millions)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Revenues	\$ 3,715	\$ 3,812	\$ 7,606	\$ 7,689
Segment profit	\$ 828	\$ 907	\$ 1,351	\$ 1,736

	2013	31,	2012
		2012	
Total assets	\$ 135,884	\$ 138,997	\$ 134,874

Consumer revenues decreased 3% and net earnings decreased 9% in the second quarter of 2013. Revenues decreased as a result of organic revenue declines (\$0.1 billion). The decrease in net earnings resulted primarily from core decreases (\$0.1 billion), which included higher provisions for losses on financial receivables (\$0.1 billion) reflecting the use of a more granular portfolio segmentation approach, by loss type, in determining the incurred loss period and projected net write-offs over the next twelve months in our installment and revolving credit portfolios.

Consumer revenues decreased 1% and net earnings decreased 22% in the six months ended June 30, 2013. Revenues in the six months ended June 30, 2013 included \$0.1 billion from acquisitions. Revenues decreased as a result of organic revenue declines (\$0.2 billion). The decrease in net earnings resulted primarily from core decreases (\$0.4 billion), which included higher provisions for losses on financing receivables (\$0.5 billion).

Real Estate

(In millions)	Three months ended June		Six months ended June 30,	
	2013	2012	2013	2012
Revenues	\$ 872	\$ 876	\$ 2,529	\$ 1,712
Segment profit	\$ 435	\$ 221	\$ 1,125	\$ 277

(In millions)	June 30,	December	June 30,
	2013	31,	2012
		2012	
Total assets	\$ 41,588	\$ 46,247	\$ 57,892

Real Estate revenues were flat and net earnings increased 97% in the second quarter of 2013. Revenues included increases in net gains on property sales (\$0.2 billion) offset by organic revenue declines (\$0.2 billion), primarily due

to lower ENI (\$0.2 billion). Real Estate net earnings increased as a result of core increases (\$0.2 billion) including net gains on property sales (\$0.2 billion) and higher tax benefits (\$0.1 billion). Depreciation expense on real estate equity investments totaled \$0.1 billion and \$0.2 billion in the second quarters of 2013 and 2012, respectively.

Real Estate revenues increased 48% and net earnings were favorable in the six months ended June 30, 2013. Revenues increased as a result of increases in net gains on property sales (\$1.2 billion) mainly due to the sale of real estate comprising certain floors located at 30 Rockefeller Center, New York, partially offset by organic revenue declines (\$0.3 billion), primarily due to lower ENI (\$0.3 billion). Real Estate net earnings increased as a result of core increases (\$0.8 billion) including increases in net gains on property sales (\$0.8 billion) and higher tax benefits (\$0.2 billion), partially offset by higher impairments (\$0.1 billion). Depreciation expense on real estate equity investments totaled \$0.3 billion and \$0.4 billion in the six months ended June 30, 2013 and 2012, respectively.

(55)

Energy Financial Services

(In millions)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Revenues	\$ 303	\$ 446	\$ 646	\$ 685

(In millions)	June 30,	December	June 30,
	2013	31, 2012	2012
Total assets	\$ 18,422	\$ 19,185	\$ 19,559

Energy Financial Services revenues decreased 32% and net earnings decreased 51% in the second quarter of 2013. Revenues decreased primarily as a result of higher impairments (\$0.1 billion) and lower gains (\$0.1 billion). The decrease in net earnings resulted primarily from higher impairments and lower gains.

Energy Financial Services revenues decreased 6% and net earnings decreased 26% in the six months ended June 30, 2013. Revenues decreased primarily as a result of lower gains (\$0.1 billion) and higher impairments (\$0.1 billion), partially offset by organic revenue growth (\$0.1 billion) and dispositions. The decrease in net earnings resulted primarily from lower gains and higher impairments, partially offset by dispositions.

GECAS

(In millions)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Revenues	\$ 1,282	\$ 1,317	\$ 2,661	\$ 2,648
Segment profit	\$ 304	\$ 308	\$ 652	\$ 626

(In millions)	June 30,	December	June 30,
	2013	31, 2012	2012
Total assets	\$ 48,316	\$ 49,420	\$ 49,927

GECAS revenues decreased 3% and net earnings decreased 1% in the second quarter of 2013. Revenues decreased as a result of higher impairments (\$0.1 billion) and lower gains, partially offset by organic revenue growth. The decrease in net earnings resulted primarily from higher impairments and lower gains, partially offset by core increases.

GECAS revenues were flat and net earnings increased 4% in the six months ended June 30, 2013. Revenues increased as a result of organic revenue growth (\$0.1 billion), partially offset by higher impairments (\$0.1 billion) and lower gains. The increase in net earnings resulted primarily from core increases (\$0.1 billion), partially offset by higher impairments and lower gains.

Corporate Items and Eliminations

Corporate items and eliminations include an insignificant amount of Treasury operation earnings in both the second quarters of 2013 and 2012. Corporate items and eliminations include an insignificant amount and \$0.1 billion of Treasury operation expenses for the six months ended June 30, 2013 and 2012, respectively. These Treasury results were primarily related to derivative activities that reduce or eliminate interest rate, currency or market risk between financial assets and liabilities.

Corporate items and eliminations include adjustments in the second quarters and the first six months of 2013 and 2012 to bring our six month tax rates in line with the projected full year tax.

(56)

Certain amounts included in corporate items and eliminations are not allocated to the five operating businesses within the GE Capital segment because they are excluded from the measurement of their operating performance for internal purposes. Unallocated costs included \$0.1 billion in both the second quarter and first six months ended June 30, 2013 and an insignificant amount in both the second quarter and first six months ended 2012, primarily related to restructuring and other charges.

Income Taxes

Our provision for income taxes was an insignificant expense in the second quarter of 2013 (an effective tax rate of 0.6%), compared with \$0.1 billion expense in the second quarter of 2012 (an effective tax rate of 4.6%). The decrease in tax expense is attributable to increased benefits from low-taxed global operations partially offset by the absence of the 2012 benefit attributable to the high tax basis in the entity sold in the Business Property disposition and the adjustment in the second quarter to bring our six month tax rate in line with the projected full year tax rate that was higher than the similar adjustment in the second quarter 2012.

The provision for income taxes was an expense of \$0.1 billion for the first six months of 2013 (an effective tax rate of 2.3%), compared with \$0.3 billion expense for the first six months of 2012 (an effective tax rate of 7.5%). The decrease in tax expense is attributable to increased benefits from low-taxed global operations including the first quarter tax benefits related to the extension of the U.S. tax provision deferring tax on active financial services income partially offset by the absence of the 2012 benefit attributable to the high tax basis in the entity sold in the Business Property disposition and the adjustment to bring our six month tax rate in line with the projected full year tax rate that was higher than the similar adjustment in the first six months of 2012.

On January 2, 2013, the American Taxpayer Relief Act of 2012 was enacted and the law extended several provisions, including a two year extension of the U.S. tax provision deferring tax on active financial services income retroactive to January 1, 2012. Under accounting rules, a tax law change is taken into account in calculating the income tax provision in the period enacted. Because the extension was enacted into law in 2013, tax expense in the first quarter of 2013 reflected retroactive extension of the previously expired provisions.

Our effective income tax rate is lower than the U.S. statutory rate primarily because of benefits from lower-taxed global operations, including the use of global funding structures. There is a tax benefit from global operations as non-U.S. income is subject to local country tax rates that are significantly below the 35% U.S. statutory rate. These non-U.S. earnings have been indefinitely reinvested outside the U.S. and are not subject to current U.S. income tax. The rate of tax on our indefinitely reinvested non-U.S. earnings is below the 35% U.S. statutory rate largely because GECC funds the majority of its non-U.S. operations through foreign companies that are subject to low foreign taxes and because we have significant business operations subject to tax in countries where the tax on that income is lower than the U.S. statutory rate. The most significant portion of these benefits depends on the provision of U.S. law deferring the tax on active financial services income, which, as discussed below, is subject to expiration. A substantial portion of the remaining benefit related to business operations subject to tax in countries where the tax on that income is lower than the U.S. statutory rate is derived from our GECAS aircraft leasing operations located in Ireland. No other operation in any one country accounts for a material portion of the remaining balance of the benefit.

We expect our ability to benefit from non-U.S. income taxed at less than the U.S. rate to continue subject to changes of U.S. or foreign law, including the expiration of the U.S. tax law provision deferring tax on active financial services income, as discussed in Note 10 in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012 (2012 consolidated financial statements). If this provision is not extended, our tax rate will increase significantly after 2014. In addition, since this benefit depends on management's intention to indefinitely reinvest amounts outside the U.S., our tax provision will increase to the extent we no longer intend to indefinitely reinvest foreign earnings.

Discontinued Operations

(In millions)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Earnings (loss) from discontinued operations, net of taxes	\$ (121)	\$ (553)	\$ (230)	\$ (750)

(57)

Discontinued operations primarily comprised GE Money Japan (our Japanese personal loan business, Lake, and our Japanese mortgage and card businesses, excluding our investment in GE Nissen Credit Co., Ltd.), our U.S. mortgage business (WMC), our Consumer mortgage lending business in Ireland (Consumer Ireland) and our CLL trailer services business in Europe (CLL Trailer Services). Results of these businesses are reported as discontinued operations for all periods presented.

Loss from discontinued operations, net of taxes, in the three months ended June 30, 2013 primarily reflected a \$0.1 billion after-tax effect of incremental reserves for excess interest claims related to our loss-sharing arrangement on the 2008 sale of GE Money Japan.

Loss from discontinued operations, net of taxes, in the three months ended June 30, 2012 primarily reflected a \$0.3 billion after-tax effect of incremental reserves for excess interest claims related to our loss-sharing arrangement on the 2008 sale of GE Money Japan, and a \$0.2 billion after-tax effect of incremental reserves related to retained representation and warranty obligations to repurchase previously sold loans on the 2007 sale of WMC.

Loss from discontinued operations, net of taxes, in the six months ended June 30, 2013 primarily reflected a \$0.1 billion after-tax effect of incremental reserves for excess interest claims related to our loss-sharing arrangement on the 2008 sale of GE Money Japan, and a \$0.1 billion after-tax effect of incremental reserves related to retained representation and warranty obligations to repurchase previously sold loans on the 2007 sale of WMC.

Loss from discontinued operations, net of taxes, in the six months ended June 30, 2012 primarily reflected a \$0.4 billion after-tax effect of incremental reserves for excess interest claims related to our loss-sharing arrangement on the 2008 sale of GE Money Japan, a \$0.2 billion after-tax effect of incremental reserves related to retained representation and warranty obligations to repurchase previously sold loans on the 2007 sale of WMC, and a \$0.2 billion loss (which includes a \$0.1 billion loss on disposal) related to Consumer Ireland.

For additional information related to discontinued operations, see Note 2 to the condensed, consolidated financial statements.

B. Statement of Financial Position

Overview of Financial Position

Major changes in our financial position for the six months ended June 30, 2013 resulted from the following:

- Repayments exceeded new issuances of total borrowings by \$18.0 billion and collections (which includes sales) on financing receivables exceeded originations by \$6.9 billion.
- The U.S. dollar was stronger for most major currencies at June 30, 2013 than at December 31, 2012, decreasing the translated levels of our non-U.S. dollar assets and liabilities.

Our assets were \$521.1 billion at June 30, 2013, an \$18.2 billion decrease from December 31, 2012, and primarily reflect a reduction of net financing receivables of \$11.9 billion and decreases in other assets of \$9.8 billion and investment securities of \$4.8 billion, partially offset by an increase in cash and equivalents of \$7.6 billion, primarily due to the acquisition of the deposit business of MetLife Bank, N.A.

Our liabilities decreased \$20.4 billion from December 31, 2012 to \$436.3 billion at June 30, 2013, and primarily reflect a \$23.8 billion net reduction in borrowings, primarily in short-term borrowings and commercial paper, which is consistent with our overall reduction in assets, partially offset by higher deposits at our banks of \$2.1 billion. Deposits

increased primarily due to the acquisition of the deposit business of MetLife Bank, N.A., partially offset by a reduction in deposits at our other banks.

Cash Flows

Our cash and equivalents were \$69.5 billion at June 30, 2013, compared with \$66.3 billion at June 30, 2012. Our cash from operating activities totaled \$8.8 billion for the six months ended June 30, 2013, compared with cash from operating activities of \$10.7 billion for the same period of 2012.

(58)

Cash from investing activities was \$23.3 billion during the six months ended June 30, 2013, consistent with our plan to reduce GECC asset levels. Cash from investing activities for the period was primarily driven by: collections (which includes sales) exceeding originations of financing receivables of \$6.9 billion; the acquisition of MetLife Bank, N.A. resulting in net cash provided by the acquisition of \$6.4 billion; and principal business dispositions of \$0.8 billion, including the disposition of our CLL fleet business in Canada of \$0.6 billion. Additionally, included within all other investing activities were proceeds from real estate property sales of \$4.1 billion, net maturities of investment securities of \$2.4 billion and \$2.0 billion related to net loan repayments from our equity method investments.

GECC cash used for financing activities for the six months ended June 30, 2013 of \$23.9 billion related primarily to an \$18.0 billion reduction in total borrowings, consisting primarily of reductions in short-term borrowings and commercial paper, and a \$4.5 billion reduction in deposits at our banks, partially offset by \$1.0 billion of proceeds from the issuance of preferred stock. Dividends of \$1.9 billion paid to GE represent the distribution of a portion of GECC retained earnings. Beginning in the second quarter of 2012, GECC restarted its dividend to GE. In the second quarter of 2013, GECC paid GE a dividend of \$0.4 billion and a special dividend of \$1.5 billion.

Fair Value Measurements

See Note 1 in our 2012 consolidated financial statements for disclosures related to our methodology for fair value measurements. Additional information about fair value measurements is provided in Note 10 to the condensed, consolidated financial statements.

At June 30, 2013, the aggregate amount of assets that are measured at fair value through earnings totaled \$7.1 billion and consisted primarily of various assets held for sale in the ordinary course of business, as well as equity investments.

C. Financial Services Portfolio Quality

Investment securities comprise mainly investment grade debt securities supporting obligations to annuitants, policyholders and holders of guaranteed investment contracts (GICs) in our run-off insurance operations and Trinity, and investments held in our CLL business collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries. The fair value of investment securities decreased to \$43.7 billion at June 30, 2013 from \$48.4 billion at December 31, 2012, primarily due to the sale of U.S. government and federal agency securities at our treasury operations and the impact of higher interest rates. Of the amount at June 30, 2013, we held debt securities with an estimated fair value of \$43.2 billion, which included corporate debt securities, asset-backed securities (ABS), residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS) with estimated fair values of \$24.5 billion, \$6.0 billion, \$2.1 billion and \$3.0 billion, respectively. Net unrealized gains on debt securities were \$2.9 billion and \$4.8 billion at June 30, 2013 and December 31, 2012, respectively. This amount included unrealized losses on corporate debt securities, ABS, RMBS and CMBS of \$0.3 billion, \$0.1 billion, \$0.1 billion and \$0.1 billion, respectively, at June 30, 2013, as compared with \$0.4 billion, \$0.1 billion, \$0.1 billion and \$0.1 billion, respectively, at December 31, 2012.

We regularly review investment securities for impairment using both qualitative and quantitative criteria. For debt securities, our qualitative review considers our intent to sell the security and the financial health of and specific prospects for the issuer, including whether the issuer is in compliance with the terms and covenants of the security. Our quantitative review considers whether there has been an adverse change in expected future cash flows. Unrealized losses are not indicative of the amount of credit loss that would be recognized. We presently do not intend to sell the vast majority of our debt securities that are in an unrealized loss position and believe that it is not more likely than not that we will be required to sell the vast majority of these securities before recovery of our amortized cost. For equity securities, we consider the length of time and magnitude of the amount that each security is in an unrealized loss

position. We believe that the unrealized loss associated with our equity securities will be recovered within the foreseeable future. Uncertainty in the capital markets may cause increased levels of other-than-temporary impairments.

(59)

Our RMBS portfolio is collateralized primarily by pools of individual, direct mortgage loans (a majority of which were originated in 2006 and 2005), not other structured products such as collateralized debt obligations. Substantially all of our RMBS are in a senior position in the capital structure of the deals and more than 70% are agency bonds or insured by Monoline insurers (Monolines) (on which we continue to place reliance). Of our total RMBS portfolio at June 30, 2013 and December 31, 2012, approximately \$0.4 billion and \$0.5 billion, respectively, relates to residential subprime credit, primarily supporting our guaranteed investment contracts. A majority of this exposure is related to investment securities backed by mortgage loans originated in 2006 and 2005. Substantially all of the subprime RMBS were investment grade at the time of purchase and approximately 70% have been subsequently downgraded to below investment grade.

Our CMBS portfolio is collateralized by both diversified pools of mortgages that were originated for securitization (conduit CMBS) and pools of large loans backed by high quality properties (large loan CMBS), a majority of which were originated in 2008 and 2007. The vast majority of the securities in our CMBS portfolio have investment grade credit ratings and the vast majority of the securities are in a senior position in the capital structure of the deals.

Our ABS portfolio is collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries, as well as a variety of diversified pools of assets such as student loans and credit cards. The vast majority of the securities in our ABS portfolio are in a senior position in the capital structure of the deals.

If there has been an adverse change in cash flows for RMBS, management considers credit enhancements such as Monoline insurance (which are features of a specific security). In evaluating the overall creditworthiness of the Monoline, we use an analysis that is similar to the approach we use for corporate bonds, including an evaluation of the sufficiency of the Monoline's cash reserves and capital, ratings activity, whether the Monoline is in default or default appears imminent, and the potential for intervention by an insurance or other regulator.

Monolines provide credit enhancement for certain of our investment securities, primarily RMBS and municipal securities. The credit enhancement is a feature of each specific security that guarantees the payment of all contractual cash flows, and is not purchased separately by GE. The Monoline industry continues to experience financial stress from increasing delinquencies and defaults on the individual loans underlying insured securities. We continue to rely on Monolines with adequate capital and claims paying resources. We have reduced our reliance on Monolines that do not have adequate capital or have experienced regulator intervention. At June 30, 2013, our investment securities insured by Monolines on which we continue to place reliance were \$1.2 billion, including \$0.3 billion of our \$0.4 billion investment in subprime RMBS. At June 30, 2013, the unrealized loss associated with securities subject to Monoline credit enhancement, for which there is an expected credit loss, was \$0.2 billion.

Total pre-tax, other-than-temporary impairment losses during the three months ended June 30, 2013 were \$0.1 billion, which was recognized in earnings and primarily relates to credit losses on corporate debt securities.

Total pre-tax, other-than-temporary impairment losses during the three months ended June 30, 2012 were an insignificant amount, which was recognized in earnings and primarily relates to credit losses on non-U.S. corporate securities and other-than-temporary losses on equity securities.

Total pre-tax, other-than-temporary impairment losses during the six months ended June 30, 2013 were \$0.4 billion, which was recognized in earnings and primarily relates to credit losses on corporate debt securities.

Total pre-tax, other-than-temporary impairment losses during the six months ended June 30, 2012 were \$0.1 billion, which was recognized in earnings and primarily relates to credit losses on non-U.S. corporate securities and other-than-temporary losses on equity securities.

(60)

At June 30, 2013 and December 31, 2012, unrealized losses on investment securities totaled \$0.7 billion and \$0.8 billion, respectively, including \$0.4 billion and \$0.8 billion, respectively, aged 12 months or longer. Of the amount aged 12 months or longer at June 30, 2013, more than 70% are debt securities that were considered to be investment grade by the major rating agencies. In addition, of the amount aged 12 months or longer, \$0.2 billion related to both structured securities (mortgage-backed and asset-backed) and corporate debt securities. With respect to our investment securities that are in an unrealized loss position, aged 12 months or longer at June 30, 2013, the majority relate to debt securities held to support obligations to holders of GICs. We presently do not intend to sell the vast majority of our debt securities that are in an unrealized loss position and believe that it is not more likely than not that we will be required to sell these securities before recovery of our amortized cost. For additional information, see Note 3 to the condensed, consolidated financial statements.

Financing receivables is our largest category of assets and represents one of our primary sources of revenues. Our portfolio of financing receivables is diverse and not directly comparable to major U.S. banks. A discussion of the quality of certain elements of the finance receivables portfolio follows.

Our consumer portfolio is composed primarily of non-U.S. mortgage, sales finance, auto and personal loans in various European and Asian countries and U.S. consumer credit card and sales finance receivables. In 2007, we exited the U.S. mortgage business and we have no U.S. auto or student loans.

Our commercial portfolio primarily comprises senior, secured positions with comparatively low loss history. The secured receivables in this portfolio are collateralized by a variety of asset classes, which for our CLL business primarily include: industrial-related facilities and equipment, vehicles, corporate aircraft, and equipment used in many industries, including the construction, manufacturing, transportation, media, communications, entertainment, and healthcare industries. The portfolios in our Real Estate, GECAS and Energy Financial Services businesses are collateralized by commercial real estate, commercial aircraft and operating assets in the global energy and water industries, respectively. We are in a secured position for substantially all of our commercial portfolio.

Losses on financing receivables are recognized when they are incurred, which requires us to make our best estimate of probable losses inherent in the portfolio. The method for calculating the best estimate of losses depends on the size, type and risk characteristics of the related financing receivable. Such an estimate requires consideration of historical loss experience, adjusted for current conditions, and judgments about the probable effects of relevant observable data, including present economic conditions such as delinquency rates, financial health of specific customers and market sectors, collateral values (including housing price indices as applicable), and the present and expected future levels of interest rates. The underlying assumptions, estimates and assessments we use to provide for losses are updated periodically to reflect our view of current conditions and are subject to the regulatory examinations process, which can result in changes to our assumptions. Changes in such estimates can significantly affect the allowance and provision for losses. It is possible to experience credit losses that are different from our current estimates.

Our risk management process includes standards and policies for reviewing major risk exposures and concentrations, and evaluates relevant data either for individual loans or financing leases, or on a portfolio basis, as appropriate.

Loans acquired in a business acquisition are recorded at fair value, which incorporates our estimate at the acquisition date of the credit losses over the remaining life of the portfolio. As a result, the allowance for losses is not carried over at acquisition. This may have the effect of causing lower reserve coverage ratios for those portfolios.

For purposes of the discussion that follows, “delinquent” receivables are those that are 30 days or more past due based on their contractual terms; and “nonearning” receivables are those that are 90 days or more past due (or for which collection is otherwise doubtful). Nonearning receivables exclude loans purchased at a discount (unless they have deteriorated post acquisition). These loans are initially recorded at fair value and accrete interest income over the

estimated life of the loan based on reasonably estimable cash flows even if the underlying loans are contractually delinquent at acquisition. In addition, nonearning receivables exclude loans that are paying on a cash accounting basis but classified as nonaccrual and impaired. "Nonaccrual" financing receivables include all nonearning receivables and are those on which we have stopped accruing interest. We stop accruing interest at the earlier of the time at which collection of an account becomes doubtful or the account becomes 90 days past due. Recently restructured financing receivables are not considered delinquent when payments are brought current according to the restructured terms, but may remain classified as nonaccrual until there has been a period of satisfactory payment performance by the borrower and future payments are reasonably assured of collection.

(61)

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-Q

Further information on the determination of the allowance for losses on financing receivables and the credit quality and categorization of our financing receivables is provided in Notes 4 and 12.

Total	\$ 262,380	\$ 273,936	\$ 6,576	\$ 7,528	\$ 5,288	\$ 4,985

(a) Included financing receivables of \$11,613 million and \$12,221 million, nonearning receivables of \$955 million and \$1,036 million and allowance for losses of \$167 million and \$142 million at June 30, 2013 and December 31, 2012, respectively, primarily related to loans, net of credit insurance, whose terms permitted interest-only payments and high loan-to-value ratios at inception (greater than 90%). At origination, we underwrite loans with

an adjustable rate to the reset value. Of these loans, about 85% are in our U.K. and France portfolios, have a delinquency rate of 15%, have a loan-to-value ratio at origination of 82% and have re-indexed loan-to-value ratios of 87% and 65%, respectively. At June 30, 2013, 11% (based on dollar values) of these loans in our U.K. and France portfolios have been restructured.

The portfolio of financing receivables, before allowance for losses, was \$262.4 billion at June 30, 2013, and \$273.9 billion at December 31, 2012. Financing receivables, before allowance for losses, decreased \$11.6 billion from December 31, 2012, primarily as a result of collections (which includes sales) exceeding originations (\$6.9 billion), write-offs (\$2.9 billion) and the stronger U.S. dollar (\$2.1 billion).

Related nonearning receivables totaled \$6.6 billion (2.5% of outstanding receivables) at June 30, 2013, compared with \$7.5 billion (2.7% of outstanding receivables) at December 31, 2012. Nonearning receivables decreased from December 31, 2012, primarily due to write-offs and payoffs at CLL and improved entry rates and collections in our Non-U.S. residential mortgage and U.S. installment and revolving portfolios.

(62)

The allowance for losses at June 30, 2013 totaled \$5.3 billion compared with \$5.0 billion at December 31, 2012, representing our best estimate of probable losses inherent in the portfolio. Allowance for losses increased \$0.3 billion from December 31, 2012, primarily because provisions were higher than write-offs, net of recoveries by \$0.4 billion, which is attributable to an increase in provisions in our Consumer installment and revolving portfolios. The allowance for losses as a percent of total financing receivables increased from 1.8% at December 31, 2012 to 2.0% at June 30, 2013 primarily due to an increase in the allowance for losses as discussed above, partially offset by a decline in the overall financing receivables balance as collections exceeded originations. Further information surrounding the allowance for losses related to each of our portfolios is detailed below.

The following table provides information surrounding selected ratios related to nonearning financing receivables and the allowance for losses.

	Nonearning financing receivables as a percent of financing receivables		Allowance for losses as a percent of nonearning financing receivables		Allowance for losses as a percent of total financing receivables	
	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012

Total Consumer	3.4	3.6	109.8	86.4	3.7	3.1
Total	2.5	2.7	80.4	66.2	2.0	1.8

(a) Included nonearning financing receivables as a percent of financing receivables of 8.2% and 8.5%, allowance for losses as a percent of nonearning receivables of 17.5% and 13.7% and allowance for losses as a percent of total financing receivables of 1.4% and 1.2% at June 30, 2013 and December 31, 2012, respectively, primarily related to loans, net of credit insurance, whose terms permitted interest-only payments and high loan-to-value ratios at inception (greater than 90%). Compared to the overall Non-U.S. residential mortgage loan portfolio, the ratio of allowance for losses as a percent of financing receivables and ratio of allowance for losses as a percent of nonearning financing receivables for these loans are lower, driven primarily by the higher mix of such products in the U.K. and France portfolios and as a result of the better performance and collateral realization experience in these markets.

Included below is a discussion of financing receivables, allowance for losses, nonearning receivables and related metrics for each of our significant portfolios.

(63)

CLL – Americas. Nonearning receivables of \$1.2 billion represented 18.7% of total nonearning receivables at June 30, 2013. The ratio of allowance for losses as a percent of nonearning receivables increased from 36.8% at December 31, 2012, to 39.0% at June 30, 2013, reflecting a decrease in nonearning receivables. The ratio of nonearning receivables as a percent of financing receivables decreased from 1.8% at December 31, 2012, to 1.7% at June 30, 2013, primarily due to decreased nonearning exposures in our industrial materials and consumer-facing portfolios, partially offset by our Latin America portfolios. Collateral supporting these nonearning financing receivables primarily includes assets in the restaurant and hospitality, trucking and industrial equipment industries and corporate aircraft, and for our leveraged finance business, equity of the underlying businesses.

CLL – Europe. Nonearning receivables of \$1.0 billion represented 14.6% of total nonearning receivables at June 30, 2013. The ratio of allowance for losses as a percent of nonearning receivables remained constant at 34.3% at June 30, 2013, reflecting a decrease in nonearning receivables and allowance for losses in our Interbanca S.p.A., acquisition finance and asset-backed lending portfolios. The majority of our CLL – Europe nonearning receivables are attributable to the Interbanca S.p.A. portfolio, which was acquired in 2009. The loans acquired with Interbanca S.p.A. were recorded at fair value, which incorporates an estimate at the acquisition date of credit losses over their remaining life. Accordingly, these loans generally have a lower ratio of allowance for losses as a percent of nonearning receivables compared to the remaining portfolio. Excluding the nonearning loans attributable to the 2009 acquisition of Interbanca S.p.A., the ratio of allowance for losses as a percent of nonearning receivables increased from 58.4% at December 31, 2012, to 79.8% at June 30, 2013, primarily due to a decrease in nonearning receivables as a result of write-offs and sales in our acquisition finance and asset-backed lending portfolios. The ratio of nonearning receivables as a percent of financing receivables decreased from 3.5% at December 31, 2012, to 2.7% at June 30, 2013, for the reasons described above. Collateral supporting these secured nonearning financing receivables are primarily equity of the underlying businesses for our Interbanca S.p.A. and acquisition finance businesses, the purchased receivables for our asset-backed lending portfolio, and equipment for our equipment finance portfolio.

CLL – Asia. Nonearning receivables of \$0.2 billion represented 2.7% of total nonearning receivables at June 30, 2013. The ratio of allowance for losses as a percent of nonearning receivables decreased from 41.5% at December 31, 2012, to 40.7% at June 30, 2013, primarily due to an increase in non-earnings in our structured finance business, partially offset by restructuring activities and write-offs resulting in a reduction of nonearning receivables in our asset based financing businesses in Japan and Australia. Collateral supporting these nonearning financing receivables is primarily manufacturing equipment, commercial real estate, corporate aircraft and assets in the auto industry.

Real Estate. Nonearning receivables of \$0.4 billion represented 6.4% of total nonearning receivables at June 30, 2013. The slight decrease in nonearning receivables was primarily driven by resolution of North American multi-family and hotel nonearning loans, as well as European retail and mixed-use loans through payoffs and foreclosures. The ratio of allowance for losses as a percent of nonearning receivables decreased from 72.1% to 56.1% reflecting the reduction in overall reserves due to improving market conditions and higher originations. The ratio of allowance for losses as a percent of total financing receivables decreased from 1.5% at December 31, 2012, to 1.2% at June 30, 2013, driven primarily by write-offs and the reduction in overall reserves due to improving market conditions.

The Real Estate financing receivables portfolio is collateralized by income-producing or owner-occupied commercial properties across a variety of asset classes and markets. At June 30, 2013, total Real Estate financing receivables of \$19.6 billion were primarily collateralized by office buildings (\$4.8 billion), hotel properties (\$3.4 billion), apartment buildings (\$3.1 billion), warehouse (\$2.7 billion) and retail facilities (\$2.5 billion). In the first six months of 2013, commercial real estate markets continued to show signs of improved stability and liquidity in certain markets; however, the pace of improvement varies significantly by asset class and market and the long term outlook remains uncertain. We have and continue to maintain an intense focus on operations and risk management. Loan loss reserves related to our Real Estate financing receivables are particularly sensitive to declines in underlying property values. Assuming global property values decline an incremental 1% or 5%, and that decline occurs evenly across geographies

and asset classes, we estimate incremental loan loss reserves would be required of less than \$0.1 billion and approximately \$0.1 billion, respectively. Estimating the impact of global property values on loss performance across our portfolio depends on a number of factors, including macroeconomic conditions, property level operating performance, local market dynamics and individual borrower behavior. As a result, any sensitivity analyses or attempts to forecast potential losses carry a high degree of imprecision and are subject to change. At June 30, 2013, we had 107 foreclosed commercial real estate properties totaling \$0.9 billion.

(64)

Consumer – Non-U.S. residential mortgages. Nonearning receivables of \$2.4 billion represented 36.3% of total nonearning receivables at June 30, 2013. The ratio of allowance for losses as a percent of nonearning receivables increased from 18.7% at December 31, 2012 to 21.6% at June 30, 2013, as a result of lower nonearning receivables due to improved collections and an increase in the allowance for losses primarily in our U.K. and Spain portfolios. Our non-U.S. mortgage portfolio has a loan-to-value ratio of approximately 76% at origination and the vast majority are first lien positions. Our U.K. and France portfolios, which comprise a majority of our total mortgage portfolio, have reindexed loan-to-value ratios of 80% and 57%, respectively, and about 12% of these loans are without mortgage insurance and have a reindexed loan-to-value ratio equal to or greater than 100%. Loan-to-value information is updated on a quarterly basis for a majority of our loans and considers economic factors such as the housing price index. At June 30, 2013, we had in repossession stock 501 houses in the U.K., which had a value of approximately \$0.1 billion.

Consumer – Non-U.S. installment and revolving credit. Nonearning receivables of \$0.2 billion represented 3.4% of total nonearning receivables at June 30, 2013. The ratio of allowance for losses as a percent of nonearning receivables increased from 278.1% at December 31, 2012 to 294.7% at June 30, 2013, reflecting an increase in the allowance for losses primarily due to the approach described below.

Consumer – U.S. installment and revolving credit. Nonearning receivables of \$0.8 billion represented 12.5% of total nonearning receivables at June 30, 2013. The ratio of allowance for losses as a percent of nonearning receivables increased from 222.4% at December 31, 2012 to 330.2% at June 30, 2013 reflecting an increase in the allowance for losses primarily due to the approach described below. The ratio of nonearning receivables as a percentage of financing receivables decreased from 2.0% at December 31, 2012 to 1.6% at June 30, 2013 primarily due to improved delinquency rates.

In the first quarter of 2013, we completed our implementation of a more granular portfolio segmentation approach, by loss type, in determining the incurred loss period in our consumer revolving credit portfolios, which resulted in an increase to the incurred loss period and included a qualitative assessment of the adequacy of the consumer revolving credit portfolios' allowance for losses, which compares this allowance for losses to projected net write-offs over the next twelve months, in a manner consistent with regulatory guidance. This resulted in an increase of \$0.6 billion to the allowance for losses on financing receivables (\$0.3 billion, after tax), the vast majority of which was attributable to our U.S. consumer revolving credit portfolios.

Nonaccrual Financing Receivables

The following table provides details related to our nonaccrual and nonearning financing receivables. Nonaccrual financing receivables include all nonearning receivables and are those on which we have stopped accruing interest. We stop accruing interest at the earlier of the time at which collection becomes doubtful or the account becomes 90 days past due. Substantially all of the differences between nonearning and nonaccrual financing receivables relate to loans that are classified as nonaccrual financing receivables but are paying on a cash accounting basis, and therefore excluded from nonearning receivables. Of our \$11.6 billion nonaccrual loans at June 30, 2013, \$6.6 billion are currently paying in accordance with their contractual terms.

(In millions)	Nonaccrual financing receivables	Nonearning financing receivables

Consumer	3,846	3,780
Total	\$ 11,553	\$ 6,576

(65)

Impaired Loans

“Impaired” loans in the table below are defined as larger balance or restructured loans for which it is probable that the lender will be unable to collect all amounts due according to original contractual terms of the loan agreement. The vast majority of our Consumer and a portion of our CLL nonaccrual receivables are excluded from this definition, as they represent smaller balance homogeneous loans that we evaluate collectively by portfolio for impairment.

Impaired loans include nonearning receivables on larger balance or restructured loans, loans that are currently paying interest under the cash basis (but are excluded from the nonearning category), and loans paying currently but which have been previously restructured.

Specific reserves are recorded for individually impaired loans to the extent we have determined that it is probable that we will be unable to collect all amounts due according to original contractual terms of the loan agreement. Certain loans classified as impaired may not require a reserve because we believe that we will ultimately collect the unpaid balance (through collection or collateral repossession).

Further information pertaining to loans classified as impaired and specific reserves is included in the table below.

(In millions)	June 30, 2013	December 31, 2012
Loans requiring allowance for losses		
Commercial(a)	\$ 947	\$ 1,372

Average investment during the period	\$ 13,172	\$ 16,269
Interest income earned while impaired(b)	337	751

(a) Includes CLL, Energy Financial Services, GECAS and Other.

(b) Recognized principally on an accrual basis.

We regularly review our Real Estate loans for impairment using both quantitative and qualitative factors, such as debt service coverage and loan-to-value ratios. We classify Real Estate loans as impaired when the most recent valuation reflects a projected loan-to-value ratio at maturity in excess of 100%, even if the loan is currently paying in accordance with contractual terms.

Of our \$4.7 billion impaired loans at Real Estate at June 30, 2013, \$4.3 billion are currently paying in accordance with the contractual terms of the loan and are typically loans where the borrower has adequate debt service coverage to meet contractual interest obligations. Impaired loans at CLL primarily represent senior secured lending positions.

(66)

Our impaired loan balance at June 30, 2013 and December 31, 2012, classified by the method used to measure impairment was as follows.

(In millions)	June 30, 2013	December 31, 2012
Method used to measure impairment		
Discounted cash flow	\$ 6,160	\$ 6,704
Collateral value	6,068	7,278
Total	\$ 12,228	\$ 13,982

See Note 1 in our 2012 consolidated financial statements for further information on our valuation processes.

Our loss mitigation strategy is intended to minimize economic loss and, at times, can result in rate reductions, principal forgiveness, extensions, forbearance or other actions, which may cause the related loan to be classified as a troubled debt restructuring (TDR), and also as impaired. Changes to Real Estate's loans primarily include maturity extensions, principal payment acceleration, changes to collateral terms and cash sweeps, which are in addition to, or sometimes in lieu of, fees and rate increases. The determination of whether these changes to the terms and conditions of our commercial loans meet the TDR criteria includes our consideration of all relevant facts and circumstances. At June 30, 2013, TDRs included in impaired loans were \$10.8 billion, primarily relating to Real Estate (\$4.4 billion), CLL (\$3.4 billion) and Consumer (\$3.1 billion).

Real Estate TDRs decreased from \$5.1 billion at December 31, 2012 to \$4.4 billion at June 30, 2013, primarily driven by resolution of TDRs through paydowns and the effects of currency exchange, partially offset by extensions of loans scheduled to mature during 2013, some of which were classified as TDRs upon modification. For borrowers with demonstrated operating capabilities, we work to restructure loans when the cash flow and projected value of the underlying collateral support repayment over the modified term. We deem loan modifications to be TDRs when we have granted a concession to a borrower experiencing financial difficulty and we do not receive adequate compensation in the form of an effective interest rate that is at current market rates of interest given the risk characteristics of the loan or other consideration that compensates us for the value of the concession. For the six months ended June 30, 2013, we modified \$0.8 billion of loans classified as TDRs. Changes to these loans primarily included maturity extensions, principal payment acceleration, changes to collateral or covenant terms and cash sweeps, which are in addition to, or sometimes in lieu of, fees and rate increases. The limited liquidity and higher return requirements in the real estate market for loans with higher loan-to-value (LTV) ratios has typically resulted in the conclusion that the modified terms are not at current market rates of interest, even if the modified loans are expected to be fully recoverable. We received the same or additional compensation in the form of rate increases and fees for the majority of these TDRs. Of our \$2.9 billion and \$4.5 billion of modifications classified as TDRs in the twelve months ended June 30, 2013 and 2012, respectively, \$0.1 billion and \$0.4 billion have subsequently experienced a payment default in the six months ended June 30, 2013 and 2012, respectively.

The substantial majority of the Real Estate TDRs have reserves determined based upon collateral value. Our specific reserves on Real Estate TDRs were \$0.1 billion at June 30, 2013 and \$0.2 billion at December 31, 2012, and were 3.0% and 3.1%, respectively, of Real Estate TDRs. In many situations these loans did not require a specific reserve as collateral value adequately covered our recorded investment in the loan. While these modified loans had adequate collateral coverage, we were still required to complete our TDR classification evaluation on each of the modifications without regard to collateral adequacy.

We utilize certain short-term (three months or less) loan modification programs for borrowers experiencing temporary financial difficulties in our Consumer loan portfolio. These loan modification programs are primarily concentrated in our non-U.S. residential mortgage and non-U.S. installment and revolving portfolios. We sold our U.S. residential mortgage business in 2007 and as such, do not participate in the U.S. government-sponsored mortgage modification programs. For the six months ended June 30, 2013, we provided short-term modifications of less than \$0.1 billion of consumer loans for borrowers experiencing financial difficulties, substantially all in our non-U.S. residential mortgage, credit card and personal loan portfolios, which are not classified as TDRs. For these modified loans, we provided insignificant interest rate reductions and payment deferrals, which were not part of the terms of the original contract. We expect borrowers whose loans have been modified under these short-term programs to continue to be able to meet their contractual obligations upon the conclusion of the short-term modification. In addition, we have modified \$0.9 billion of Consumer loans for the six months ended June 30, 2013, which are classified as TDRs. Further information on Consumer impaired loans is provided in Note 12 to the condensed, consolidated financial statements.

(67)

Delinquencies

For additional information on delinquency rates at each of our major portfolios, see Note 12 to the condensed, consolidated financial statements.

GECC Selected European Exposures

At June 30, 2013, we had \$84.2 billion in financing receivables to consumer and commercial customers in Europe. The GECC financing receivables portfolio in Europe is well diversified across European geographies and customers. Approximately 87% of the portfolio is secured by collateral and represents approximately 500,000 commercial customers. Several European countries, including Spain, Portugal, Ireland, Italy, Greece and Hungary (“focus countries”), have been subject to credit deterioration due to weaknesses in their economic and fiscal situations. The carrying value of GECC funded exposures in these focus countries and in the rest of Europe comprised the following at June 30, 2013.

June 30, 2013 (In millions)	Spain	Portugal	Ireland	Italy	Greece	Hungary	Rest of Europe	Total Europe
Financing receivables, before allowance for losses on financing receivables	\$ 1,652	\$ 271	\$ 314	\$ 6,733	\$ 1	\$ 2,979	\$ 73,745	\$ 85,695

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-Q

Real estate held for investment(g)	796	-	-	414	-	-	5,867	7,077
Total funded exposures(h)	\$ 3,137	\$ 399	\$ 1,060	\$ 8,348	\$ 282	\$ 3,363	\$ 91,671	\$ 108,260
Unfunded commitments(i)	\$ 22	\$ 10	\$ 108	\$ 243	\$ 5	\$ 754	\$ 8,736	\$ 9,878

- (a) Financing receivable amounts are classified based on the location or nature of the related obligor.
- (b) Substantially all relates to non-sovereign obligors. Includes residential mortgage loans of approximately \$31.2 billion before consideration of purchased credit protection. We have third-party mortgage insurance for less than 15% of these residential mortgage loans, substantially all of which were originated in the U.K., Poland and France.
- (c) Investments and derivatives are classified based on the location of the parent of the obligor or issuer.
- (d) Includes \$0.8 billion related to financial institutions, \$0.3 billion related to non-financial institutions and \$1.8 billion related to sovereign issuers. Sovereign issuances totaled \$0.1 billion and \$0.2 billion related to Italy and Hungary, respectively. We held no investments issued by sovereign entities in the other focus countries.
- (e) Substantially all is non-sovereign.
- (f) Net of cash collateral; entire amount is non-sovereign.
- (g) These assets are held under long-term investment and operating strategies, and our equipment leased to others (ELTO) strategies contemplate an ability to redeploy assets under lease should default by the lessee occur. The values of these assets could be subject to decline or impairment in the current environment.
- (h) Excludes \$36.2 billion of cash and equivalents, which is composed of \$21.7 billion of cash on short-term placement with highly rated global financial institutions based in Europe, sovereign central banks and agencies or supranational entities, of which \$1.3 billion is in focus countries, and \$14.5 billion of cash and equivalents placed with highly rated European financial institutions on a short-term basis, secured by U.S. Treasury securities (\$11.1 billion) and sovereign bonds of non-focus countries (\$3.4 billion), where the value of our collateral exceeds the amount of our cash exposure.
- (i) Includes ordinary course of business lending commitments, commercial and consumer unused revolving credit lines, inventory financing arrangements and investment commitments.

(68)

We manage counterparty exposure, including credit risk, on an individual counterparty basis. We place defined risk limits around each obligor and review our risk exposure on the basis of both the primary and parent obligor, as well as the issuer of securities held as collateral. These limits are adjusted on an ongoing basis based on our continuing assessment of the credit risk of the obligor or issuer. In setting our counterparty risk limits, we focus on high quality credits and diversification through spread of risk in an effort to actively manage our overall exposure. We actively monitor each exposure against these limits and take appropriate action when we believe that risk limits have been exceeded or there are excess risk concentrations. Our collateral position and ability to work out problem accounts has historically mitigated our actual loss experience. Delinquency experience has been relatively stable in our European commercial and consumer platforms in the aggregate, and we actively monitor and take action to reduce exposures where appropriate. Uncertainties surrounding European markets could have an impact on the judgments and estimates used in determining the carrying value of these assets.

Other assets comprise mainly real estate equity properties and investments, equity and cost method investments, derivative instruments and assets held for sale, and totaled \$52.4 billion at June 30, 2013, a decrease of \$9.8 billion, primarily related to the sale of certain held-for-sale real estate and aircraft (\$2.7 billion), a decrease in the fair value of derivative instruments (\$2.5 billion), the sale of certain real estate investments (\$2.4 billion) and a decrease in our Penske investment (\$1.2 billion). During the six months ended June 30, 2013, we recognized \$0.2 billion of other-than-temporary impairments of cost and equity method investments, excluding those related to real estate.

Included in other assets are Real Estate equity investments of \$15.3 billion and \$20.7 billion and Real Estate assets classified as held for sale of \$2.4 billion and \$0.3 billion at June 30, 2013 and December 31, 2012, respectively. Our portfolio is diversified, both geographically and by asset type. We review the estimated values of our commercial real estate investments at least annually, or more frequently as conditions warrant. Commercial real estate valuations have shown signs of improved stability and liquidity in certain markets, primarily in the U.S.; however, the pace of improvement varies significantly by asset class and market. Accordingly, there continues to be risk and uncertainty surrounding commercial real estate values. Declines in estimated value of real estate below carrying amount result in impairment losses when the aggregate undiscounted cash flow estimates used in the estimated value measurement are below the carrying amount. As such, estimated losses in the portfolio will not necessarily result in recognized impairment losses. During the three and six months ended June 30, 2013, Real Estate recognized pre-tax impairments of \$0.1 billion and \$0.3 billion, respectively, in its real estate held for investment, which were primarily driven by the strategic decision to exit certain equity platforms. Real Estate investments with undiscounted cash flows in excess of carrying value of 0% to 5% at June 30, 2013 had a carrying value of \$1.6 billion and an associated estimated unrealized loss of \$0.2 billion. Continued deterioration in economic conditions or prolonged market illiquidity may result in further impairments being recognized. On March 19, 2013, in connection with GE's sale of its remaining 49% interest in NBCUniversal LLC to Comcast Corporation, we sold real estate comprising certain floors located at 30 Rockefeller Center, New York and the CNBC property located in Englewood Cliffs, New Jersey to affiliates of NBC Universal for \$1.4 billion in cash.

D. Liquidity and Borrowings

We maintain a strong focus on liquidity. We manage our liquidity to help provide access to sufficient funding to meet our business needs and financial obligations throughout business cycles.

Our liquidity and borrowing plans are established within the context of our annual financial and strategic planning processes. Our liquidity and funding plans take into account the liquidity necessary to fund our operating commitments. We also take into account our capital allocation and growth objectives, including paying dividends.

Our liquidity position is targeted to meet our obligations under both normal and stressed conditions. We establish a funding plan annually that is based on the projected asset size and cash needs of the business. We rely on a diversified

source of funding, including the unsecured term debt markets, the global commercial paper markets, deposits, secured funding, retail funding products, bank borrowings and securitizations to fund our balance sheet, in addition to cash generated through collection of principal, interest and other payments on our existing portfolio of loans and leases to fund our operating and interest expense costs.

(69)

Our 2013 funding plan anticipates repayment of principal on outstanding short-term borrowings, including the current portion of long-term debt (\$44.3 billion at December 31, 2012), through issuance of long-term debt and reissuance of commercial paper, cash on hand, collections of financing receivables exceeding originations, dispositions, asset sales, and deposits and other alternative sources of funding. Long-term maturities and early redemptions were \$15 billion in the second quarter of 2013. Interest on borrowings is primarily repaid through interest earned on existing financing receivables. During the second quarter of 2013, we earned interest income on financing receivables of \$4.9 billion, which more than offset interest expense of \$2.4 billion.

We maintain a detailed liquidity policy, which includes a requirement to maintain a contingency funding plan. The liquidity policy defines our liquidity risk tolerance under different stress scenarios based on our liquidity sources and also establishes procedures to escalate potential issues. We actively monitor our access to funding markets and our liquidity profile through tracking external indicators and testing various stress scenarios. The contingency funding plan provides a framework for handling market disruptions and establishes escalation procedures in the event that such events or circumstances arise.

We are a regulated savings and loan holding company under U.S. law and became subject to Federal Reserve Board (FRB) supervision on July 21, 2011, the one-year anniversary of the Dodd-Frank Wall Street Reform and Consumer Protection Act (DFA). In addition, on July 8, 2013, the U.S. Financial Stability Oversight Council (FSOC) designated GECC as a nonbank systemically important financial institution (nonbank SIFI) under the DFA. Many of the rulemakings for supervision of nonbank SIFIs are not final and therefore the exact impact and implementation date remain uncertain. However, as we expected the nonbank SIFI designation, GECC has been planning for the enhanced prudential standards that will apply to nonbank SIFIs. These DFA rulemakings will require, among other items, enhanced capital and liquidity levels, compliance with the comprehensive capital analysis and review regulations (CCAR), compliance with counterparty credit exposure limits, and the development of a resolution plan for submission to regulators.

The FRB recently finalized regulations to revise and replace its current rules on capital adequacy and to extend capital regulations to savings and loan holding companies like GECC. Under the final rules, GECC expects that the standardized approach for calculating capital will apply to GECC, in its capacity as a Savings and Loan Holding Company, on January 1, 2015. However, that timing could change once nonbank SIFI rules are finalized. GECC will ultimately also become subject to the Basel III advanced capital rules that will be applicable to institutions with more than \$250 billion in assets. Initial actions required for compliance with the advanced capital rules will begin once GECC is subject to regulatory capital rules. However, full implementation will take several years to complete.

The FRB has also indicated in a proposed rulemaking that they will require nonbank SIFIs to submit annual capital plans for review, including institutions' plans to make capital distributions, such as dividend payments. The applicability and timing of this proposed regulation to GECC is not yet determined. While we are not yet subject to this regulation, our capital allocation planning remains subject to FRB review as a savings and loan holding company.

We undertake an annual review of our capital adequacy prior to establishing a plan for dividends to our parent. This review is based on a forward-looking assessment of our material enterprise risks and involves the consideration of a number of factors, including the impact of our announced goal to further reduce our ENI, which would reduce regulatory capital requirements. This analysis also includes an assessment of our capital and liquidity levels, as well as incorporating risk management and governance considerations. The capital adequacy review was approved by the GECC board of directors and the GE Board of Directors Risk Committee in the first quarter of 2013. While a savings and loan holding company and nonbank SIFI like GECC is currently not required to obtain FRB approval to pay a dividend, it may not, under FRB regulations, conduct its operations in an unsafe or unsound manner. The FRB has articulated factors that it expects boards of directors of bank holding companies and savings and loan holding companies to consider in determining whether to pay a dividend.

Overall, GECC does not believe that designation as a nonbank SIFI will have a material impact on its business or operations.

Liquidity Sources

We maintain liquidity sources that include cash and equivalents, committed unused credit lines and high-quality, liquid investments.

We have cash and equivalents of \$69.5 billion at June 30, 2013, which is available to meet our needs.

(70)

We have committed, unused credit lines totaling \$47.6 billion that have been extended to us by 48 financial institutions at June 30, 2013. GECC can borrow up to \$47.6 billion under all of these credit lines. GE can borrow up to \$12.8 billion under certain of these credit lines. These lines include \$27.2 billion of revolving credit agreements under which we can borrow funds for periods exceeding one year. Additionally, \$20.4 billion are 364-day lines that contain a term-out feature that allows us to extend borrowings for one to two years from the date of expiration of the lending agreement.

Cash and equivalents of \$45.4 billion at June 30, 2013 are held by non-U.S. subsidiaries. Of this amount at quarter-end, \$7.3 billion is indefinitely reinvested. Indefinitely reinvested cash held outside of the U.S. is available to fund operations and other growth of non-U.S. subsidiaries; it is also available to fund our needs in the U.S. on a short-term basis through short-term loans, without being subject to U.S. tax. Under the Internal Revenue Code, these loans are permitted to be outstanding for 30 days or less and the total of all such loans are required to be outstanding for less than 60 days during the year.

About \$12 billion of cash and equivalents are in regulated banks and insurance entities and are subject to regulatory restrictions.

If we were to repatriate indefinitely reinvested cash held outside the U.S., we would be subject to additional U.S. income taxes and foreign withholding taxes.

Funding Plan

GE reduced its GE Capital ending net investment, excluding cash and equivalents, to \$391 billion at June 30, 2013.

Through June 30, 2013, we completed issuances of \$24.8 billion of senior unsecured debt (excluding securitizations described below) with maturities up to 40 years (and subsequent to June 30, 2013, an additional \$5.1 billion). Average commercial paper borrowings during the second quarter were \$37.9 billion, and the maximum amount of commercial paper borrowings outstanding during the second quarter was \$39.2 billion. Our commercial paper maturities are funded principally through new commercial paper issuances.

We securitize financial assets as an alternative source of funding. During 2013, we completed \$5.4 billion of non-recourse issuances and had maturities of \$5.2 billion. At June 30, 2013, non-recourse borrowings were \$30.3 billion.

We have deposit-taking capability at 12 banks outside of the U.S. and two banks in the U.S. – GE Capital Retail Bank, a Federal Savings Bank (FSB), and GE Capital Financial Inc., an industrial bank (IB). The FSB and IB currently issue certificates of deposit (CDs) in maturity terms from two months to ten years. On January 11, 2013, the FSB acquired the deposit business of MetLife Bank, N.A. This acquisition added approximately \$6.4 billion in deposits and an online banking platform.

Total alternative funding at June 30, 2013 was \$103 billion, composed mainly of \$49 billion bank deposits, \$30 billion of non-recourse securitization borrowings, \$10 billion of funding secured by real estate, aircraft and other collateral and \$8 billion GE Interest Plus notes. The comparable amount at December 31, 2012 was \$101 billion.

As a matter of general practice, we routinely evaluate the economic impact of calling debt instruments where we have the right to exercise a call. In determining whether to call debt, we consider the economic benefit to GECC of calling debt, the effect of calling debt on our liquidity profile and other factors. During the first half of 2013, we settled \$7.8 billion of callable debt, of which \$4.1 billion was called in 2012. An additional \$0.2 billion of debt was called during the second quarter of 2013 that will settle after June 30, 2013.

Income Maintenance Agreement

As set forth in Exhibit 12 hereto, GECC's ratio of earnings to fixed charges was 1.78:1 during the six months ended June 30, 2013 due to higher pre-tax earnings at GECC, which were primarily driven by lower losses and delinquencies. For additional information, see the Income Maintenance Agreement section in the Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2012 consolidated financial statements.

(71)

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no significant changes to our market risk since December 31, 2012. For a discussion of our exposure to market risk, refer to Part II, Item 7A. "Quantitative and Qualitative Disclosures about Market Risk," contained in our consolidated financial statements for the year ended December 31, 2012.

Item 4. Controls and Procedures.

Under the direction of our Chief Executive Officer and Chief Financial Officer, we evaluated our disclosure controls and procedures and internal control over financial reporting and concluded that (i) our disclosure controls and procedures were effective as of June 30, 2013, and (ii) no change in internal control over financial reporting occurred during the quarter ended June 30, 2013, that has materially affected, or is reasonably likely to materially affect, such internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

The following information supplements and amends our discussion set forth under Part I, Item 3. "Legal Proceedings" in our consolidated financial statements for the fiscal year ended December 31, 2012 and in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2013.

We sold WMC, our U.S. mortgage business, in 2007. WMC substantially discontinued all new loan originations in 2007, and was not a loan servicer. In connection with the sale, WMC retained certain representation and warranty obligations related to loans sold to third parties prior to the disposal of the business.

There are 15 lawsuits relating to pending mortgage loan repurchase claims in which WMC is a party. The adverse parties in these cases are trustees of private label residential mortgage-backed securitization trusts or parties claiming to act on their behalf. While the alleged claims for relief vary from case to case, the complaints and counterclaims in these actions generally assert claims for breach of contract, indemnification, and/or declaratory judgment, and seek specific performance (repurchase) and/or monetary damages.

Four WMC cases are pending in the United States District Court for the District of Connecticut. All of these cases were initiated in 2012. Deutsche Bank National Trust Company (Deutsche Bank) is the adverse party in three cases, and Law Debenture Trust Company of New York (Law Debenture) is the adverse party in one case. The Deutsche Bank complaints assert claims on approximately \$2,700 million of mortgage loans and seek to recover damages on these loans in excess of approximately \$1,300 million. The Law Debenture complaint asserts claims on approximately \$1,000 million of mortgage loans, and alleges losses on these loans in excess of approximately \$425 million. GECC was initially named a defendant in each of the Connecticut cases and has been dismissed from all of those cases without prejudice.

Six WMC cases are pending in the United States District Court for the District of Minnesota against US Bank National Association (US Bank), of which three were initiated by WMC seeking declaratory judgment. Five of these cases were filed in 2012, and one was filed in 2011. One additional case filed by WMC in the fourth quarter 2012 was dismissed without prejudice by the court on July 22, 2013, due to the existence of a proceeding involving the same securitization in New York State Supreme Court, as described below. The Minnesota cases involve claims on approximately \$1,800 million of mortgage loans and do not specify the amount of damages sought.

(72)

Three cases are pending in New York State Supreme Court. One case, in which the plaintiff is Seagull Point, LLC (Seagull Point), acting individually and purportedly on behalf of Morgan Stanley ABS Capital I Trust 2007-HE5, was initiated in the second quarter 2013 and names as defendants WMC, Decision One Mortgage Company, LLC, Morgan Stanley Mortgage Capital Inc. and Morgan Stanley ABS Capital I (as nominal defendant). Seagull Point claims aggregate loan losses and seeks related damages against all defendants in excess of \$476 million. The second case was initiated by Deutsche Bank in the second quarter 2013 and names as defendants WMC and Barclays Bank PLC. It involves claims against WMC on approximately \$1,000 million of mortgage loans and does not specify the amount of damages plaintiff seeks to recover. The third case, in which the plaintiff is The Bank of New York Mellon (BNY), was initiated in the fourth quarter 2012 and names as defendants WMC, J.P. Morgan Mortgage Acquisition Corporation and JPMorgan Chase Bank, N.A. GECC, which was initially named, is no longer a defendant. This case arises from the same securitization as one of the cases initiated by WMC in Minnesota, noted above. BNY asserts claims on approximately \$1,900 million of mortgage loans, and seeks to recover damages in excess of \$650 million.

Two cases are pending in the United States District Court for the Southern District of New York. One case, in which the plaintiff is BNY, was filed in the third quarter 2012. In the second quarter 2013, BNY filed an amended complaint in which it asserts claims on approximately \$900 million of mortgage loans, and seeks to recover damages in excess of \$378 million. One case was initiated by the Federal Housing Finance Agency (FHFA) by filing a summons with notice in the fourth quarter 2012. In the second quarter 2013, Deutsche Bank, in its role as securitization trustee of the trust at issue in the case, intervened as a plaintiff and filed a complaint relating to approximately \$1,400 million of loans and alleging losses on these loans in excess of approximately \$100 million.

The amounts of the mortgage loans at issue in these cases (discussed above) reflect the purchase price or unpaid principal balances of the loans at the time of purchase and do not give effect to pay downs, accrued interest or fees, or potential recoveries based upon the underlying collateral. Of the mortgage loans involved in these lawsuits, approximately \$4,000 million were included in WMC's pending claims at June 30, 2013. The claims relating to other mortgage loans not included in WMC's pending claims consist of sampling-based claims in two cases on approximately \$900 million of mortgage loans and, in seven cases, claims for repurchase or damages based on the alleged failure to provide notice of defective loans, breach of a corporate representation and warranty, and/or non-specific claims for rescissionary damages on approximately \$5,700 million of mortgage loans. See Note 2 to the condensed, consolidated financial statements in Part I, Item 1 "Financial Statements" of this Form 10-Q Report for additional information.

(73)

Item 6. Exhibits.

- Exhibit 3(i) A complete copy of the Certificate of Incorporation of GECC consisting of the Restated Certificate of Incorporation of GECC as filed with the Office of the Secretary of State, State of Delaware on April 1, 2008, as amended by the Certificates of Designations of GECC with respect to the Series A, Series B and Series C Preferred Stock as filed with the Office of the Secretary of State, State of Delaware on June 8, 2012, July 25, 2012 and May 30, 2013, respectively.
- Exhibit 4 Form of Certificate representing the Series C Preferred Stock (Incorporated by reference to Exhibit 4.1 of GECC's Current Report on Form 8-K dated as of June 3, 2013) (Commission file number 001-06461).
- Exhibit 12 Computation of Ratio of Earnings to Fixed Charges and Computation of Ratio of Earnings to Combined Fixed Charges and Preferred Stock Dividends.
- Exhibit 31(a) Certification Pursuant to Rules 13a-14(a) or 15d-14(a) under the Securities Exchange Act of 1934, as Amended.
- Exhibit 31(b) Certification Pursuant to Rules 13a-14(a) or 15d-14(a) under the Securities Exchange Act of 1934, as Amended.
- Exhibit 32 Certification Pursuant to 18 U.S.C. Section 1350.
- Exhibit 99 Financial Measures That Supplement Generally Accepted Accounting Principles.
- Exhibit 101 The following materials from General Electric Capital Corporation's Quarterly Report on Form 10-Q for the quarter ended June 30, 2013, formatted in XBRL (eXtensible Business Reporting Language); (i) Condensed Statement of Earnings for the three and six months ended June 30, 2013 and 2012, (ii) Condensed Statement of Comprehensive Income for the three and six months ended June 30, 2013 and 2012, (iii) Condensed Statement of Changes in Shareowners' Equity for the six months ended June 30, 2013 and 2012, (iv) Condensed Statement of Financial Position at June 30, 2013 and December 31, 2012, (v) Condensed Statement of Cash Flows for the six months ended June 30, 2013 and 2012, and (vi) Notes to Condensed, Financial Statements.*

* Pursuant to Rule 406T of Regulation S-T, the Interactive Data Files on Exhibit 101 hereto are deemed not filed or part of a registration statement or prospectus for purposes of Sections 11 or 12 of the Securities Act of 1933, as amended, are deemed not filed for purposes of Section 18 of the Securities and Exchange Act of 1934, as amended, and otherwise are not subject to liability under those sections.

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
