UNISYS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
(Dollars in millions, except share and per share amounts)

Note 1 - Basis of Presentation

The accompanying consolidated financial statements and footnotes of Unisys Corporation have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP). The financial statements and footnotes are unaudited. In the opinion of management, the financial information furnished herein reflects all adjustments necessary for a fair presentation of the results of operations, comprehensive income, financial position, cash flows and deficit for the interim periods specified. These adjustments consist only of normal recurring accruals except as disclosed herein. Because of seasonal and other factors, results for interim periods are not necessarily indicative of the results to be expected for the full year.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions about future events. These estimates and assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities and the reported amounts of revenue and expenses. Such estimates include the valuation of accounts receivable, contract assets, inventories, operating lease right-of-use assets, outsourcing assets, marketable software, goodwill and other long-lived assets, legal contingencies, indemnifications, assumptions used in the calculation for systems integration projects, income taxes and retirement and other post-employment benefits, among others. These estimates and assumptions are based on management’s best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Management adjusts such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in those estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods.

The company’s accounting policies are set forth in detail in Note 1 of the Notes to Consolidated Financial Statements in the company’s Annual Report on Form 10-K for the year ended December 31, 2018 (2018 Form 10-K) filed with the Securities and Exchange Commission. Such Annual Report also contains a discussion of the company’s critical accounting policies and estimates. The company believes that these critical accounting policies and estimates affect its more significant estimates and judgments used in the preparation of the company’s consolidated financial statements.

As described in Note 3, effective January 1, 2019 the company adopted the requirements of Accounting Standards Update (ASU) No. 2016-02, Leases (Topic 842) using the effective date transition method. The company’s updated accounting policy on leases is described in Note 2 of this Form 10-Q.

Note 2 - Summary of Significant Accounting Policies

Leases

The company determines if an arrangement is a lease at inception. This determination generally depends on whether the arrangement conveys to the company the right to control the use of an explicitly or implicitly identified asset for a period of time in exchange for consideration. Control of an underlying asset is conveyed to the company if the company obtains the rights to direct the use of and to obtain substantially all of the economic benefits from using the underlying asset. The company has lease agreements that include lease and non-lease components, which the company accounts for as a single lease component for all personal property leases. Lease expense for variable leases and short-term leases is recognized when the expense is incurred.

Operating leases are included in operating lease right-of-use (ROU) assets, other accrued liabilities and long-term operating lease liabilities on the consolidated balance sheets. Operating lease ROU assets and lease liabilities are recognized at the commencement date of the lease based on the present value of lease payments over the lease term. Operating lease payments are recognized as lease expense on a straight-line basis over the lease term.

Finance leases are included in outsourcing assets, net and long-term debt on the consolidated balance sheets. Finance lease ROU assets and lease liabilities are initially measured in the same manner as operating leases. Finance lease ROU assets are amortized using the straight-line method. Finance lease liabilities are measured at amortized cost using the effective interest method.

The company has not capitalized leases with terms of twelve months or less.

As most of the company's leases do not provide an implicit rate, the company uses its incremental borrowing rate, based on the information available at the lease commencement date, in determining the present value of lease payments.
The lease term for all of the company's leases includes the non-cancelable period of the lease plus any additional periods covered by either a company option to extend (or not to terminate) the lease that the company is reasonably certain to exercise, or an option to extend (or not to terminate) the lease controlled by the lessor.
Lease payments included in the measurement of the lease liability are comprised of fixed payments, variable payments that depend on index or rate, amounts expected to be payable under a residual value guarantee and the exercise of the company option to purchase the underlying asset, if reasonably certain.
Variable lease payments associated with the company's leases are recognized when the event, activity, or circumstance in the lease agreement on which those payments are assessed occurs. Variable lease payments are presented as an operating expense in the company's consolidated results of operations in the same line item as expense arising from fixed lease payments (operating leases) or amortization of the ROU asset (finance leases).
The company uses the long-lived assets impairment guidance in ASC Subtopic 360-10 Property, Plant, and Equipment to determine whether an ROU asset is impaired, and if so, the amount of the impairment loss to recognize. If impaired, ROU assets for operating and finance leases are reduced for any impairment losses.
The company monitors for events or changes in circumstances that require a reassessment of its leases. When a reassessment results in the remeasurement of a lease liability, a corresponding adjustment is made to the carrying amount of the corresponding ROU asset unless doing so would reduce the carrying amount of the ROU asset to an amount less than zero. In that case, the amount of the adjustment that would result in a negative ROU asset balance is recorded in the consolidated statement of income.
The company has commitments under operating leases for certain facilities and equipment used in its operations. The company also has finance leases for equipment. The company's leases generally have initial lease terms ranging from 1 year to 8 years, most of which include options to extend or renew the leases for up to 5 years, and some of which may include options to terminate the leases within 1 year. Certain lease agreements contain provisions for future rent increases.
The components of lease expense for the three months ended March 31, 2019 are as follows:

	Three Months Ended March 31, 2019
Operating lease cost	$ 14.8
Finance lease cost	
Amortization of right-of-use assets	0.4
Interest on lease liabilities	—
Total finance lease cost	0.4
Short-term lease costs	0.1
Variable lease cost	3.9
Sublease income	(0.5)
Total lease cost	$ 18.7

Supplemental balance sheet information related to leases is as follows:

	March 31, 2019	
Operating Leases		
Operating lease right-of-use assets	$ 115.5	
Other accrued liabilities	45.9	
Long-term operating lease liabilities	97.2	
Total operating lease liabilities	$ 143.1	
Finance Leases		
Outsourcing assets, net	$ 4.7	
Current maturities of long-term debt	$ 1.6	
Long-term debt	3.8	
Total finance lease liabilities	$ 5.4	
Weighted-Average Remaining Lease Term		
Operating leases	3.9	
Finance leases	3.3	
Weighted-Average Discount Rate		
Operating leases	6.3	%
Finance leases	2.5	%

Supplemental cash flow information related to leases is as follows:

	Three Months Ended March 31, 2019
Cash paid for amounts included in the measurement of lease liabilities:	
Cash payments for operating leases included in operating activities	$ 13.4
Cash payments for finance leases included in financing activities	0.5

Right-of-use assets obtained in exchange for lease obligations are as follows:

	Three Months Ended March 31, 2019
Operating leases	$ 6.7
Finance leases	—

9

Maturities of lease liabilities as of March 31, 2019 are as follows:

Year	Finance Leases	Operating Leases
2019	$ 1.4	$ 40.4
2020	1.6	47.0
2021	1.6	28.9
2022	1.0	17.8
2023	—	20.7
Thereafter	—	6.6
Total lease payments	5.6	161.4
Less imputed interest	0.2	18.3
Total	$ 5.4	$ 143.1

Maturities of lease liabilities as of December 31, 2018, prior to the adoption of ASU No. 2016-02 as described in Note 3, "Accounting Standards," are as follows:

Year	Finance Leases	Operating Leases[i]
2019	$ 1.6	$ 48.5
2020	1.6	42.1
2021	1.6	30.0
2022	1.0	20.8
2023	—	14.3
Thereafter	—	24.4
Total	$ 5.8	$ 180.1

[i]Such rental commitments have been reduced by minimum sublease rentals of $2.7 million, due in the future under noncancelable leases.

For transactions where the company is considered the lessor, revenue for operating leases is recognized on a monthly basis over the term of the lease and for sales-type leases at the inception of the lease term. These amounts were immaterial for the three months ended March 31, 2019.

As of March 31, 2019, receivables under sales-type leases before the allowance for unearned income were collectible as follows:

Year	
2019	$21.2
2020	15.2
2021	10.7
2022	10.1
2023	10.2
Thereafter	8.6
Total	$76.0

Marketable software

The cost of development of computer software to be sold or leased, incurred subsequent to establishment of technological feasibility, is capitalized and amortized to cost of sales over the estimated revenue-producing lives of the products. In assessing the estimated revenue-producing lives and recoverability of the products, the company considers operating strategies, underlying technologies utilized, estimated economic life and external market factors, such as expected levels of competition, barriers to entry by potential competitors, stability in the market and governmental regulation. The company continually

reassesses the estimated revenue-producing lives of the products and any change in the company's estimate could result in the remaining amortization expense being accelerated or spread out over a longer period.

Previously, the estimated revenue-producing lives of the company's proprietary enterprise software was three years. Due to the maturity of the company's proprietary enterprise software product, the company increased the time between its major releases as its product has a longer useful life. In addition, the company modified its commitment to provide post-contract support from an average of three years to five years following each new proprietary enterprise software release. In the first quarter of 2019, the company validated that the revised extended timeline between major product releases and the revised post-contract support period has achieved market acceptance. The company's historical experience is that its significant customers typically renew the software on average every five years. As a result, the company adjusted the remaining useful life of its proprietary enterprise software product, which represents approximately 64% of the company's marketable software, to five years. This change in estimate was applied prospectively effective January 1, 2019. The adjustment resulted in a $4.4 million decrease to cost of revenue in the three months ended March 31, 2019, and accordingly decreased consolidated net loss by $4.4 million or $0.08 per diluted loss per share. The useful lives of the remaining products classified as marketable software remain at three years, which is consistent with prior years. As of March 31, 2019, $90.1 million of marketable software was in process and the remaining $80.6 million has a weighted-average remaining life of 3.03 years. The company performs quarterly reviews to ensure that unamortized costs remain recoverable from future revenue. As of March 31, 2019, the company believes that all unamortized costs are fully recoverable.

Note 3 - Accounting Standards

Accounting Pronouncements Adopted

Effective January 1, 2019, the company adopted ASU No. 2016-02 Leases (Topic 842) issued by the Financial Accounting Standards Board (FASB) which is intended to improve financial reporting about leasing transactions. The ASU requires organizations that lease assets, referred to as lessees, to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases. The standard also requires disclosures to help investors and other financial statement users better understand the amount, timing and uncertainty of cash flows arising from leases. The company adopted the new standard using the effective date transition method by applying a cumulative-effect adjustment to the balance sheet through the addition of ROU assets and lease liabilities at January 1, 2019. Prior-period results were not restated.

The company applied certain practical expedients, including the package of practical expedients, permitted under the transition guidance within Topic 842 to leases that commenced before January 1, 2019. The election of the package of practical expedients resulted in the company not reassessing prior conclusions under FASB Topic 840 Leases related to lease identification, lease classification and initial direct costs for existing leases at January 1, 2019.

The adoption had a material impact on the consolidated financial position and did not have a material impact on the consolidated results of operations or cash flows as of and for the three months ended March 31, 2019. The most significant impact was the recognition of ROU assets and lease liabilities for operating leases, while the company's accounting for finance leases remained substantially unchanged.

Accounting Pronouncements Not Yet Adopted

In August 2018, the FASB issued ASU No. 2018-15, Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract which clarifies the accounting for implementation costs incurred in a cloud computing arrangement that is a service contract. This update is effective for fiscal years ending after December 15, 2019, with earlier adoption permitted, including adoption in any interim period. The new guidance can be applied retrospectively or prospectively to all implementation costs incurred after the date of adoption. The company is currently assessing when it will choose to adopt, and is currently evaluating the impact of the adoption on its consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments which introduces a new model for recognizing credit losses on financial instruments based on an estimate of current expected losses. This includes trade and other receivables, loans and other financial instruments. This update is effective for annual periods beginning after December 15, 2019, with earlier adoption permitted. The company will adopt the new guidance on January 1, 2020 through a cumulative-effect adjustment to retained earnings. The company is currently evaluating the impact of the adoption on its consolidated financial statements.

Note 4 - Cost-Reduction Actions

During the three months ended March 31, 2019, the company recognized cost-reduction charges and other costs of $2.6 million. Charges were comprised of $3.5 million for lease abandonment and asset write-offs and $(0.9) million for changes in estimates principally related to work-force reductions. The charges were recorded in the following statement of income classifications: cost of revenue – services, $(3.7) million; selling, general and administrative expenses, $5.0 million; and research and development expenses, $1.3 million.

No provisions for cost-reduction actions were recorded during the three months ended March 31, 2018; however, a benefit of $2.9 million was recorded in the prior period for changes in estimates. The benefit was recorded in the following statement of income classifications: cost of revenue - services, $(3.0) million and selling, general and administrative expenses, $0.1 million.

Liabilities and expected future payments related to the company's work-force reduction actions are as follows:

	Total	U.S.	International
Balance at December 31, 2018	$86.2	$6.1	$ 80.1
Payments	(13.9)	(0.5)	(13.4)
Changes in estimates	(1.0)	(0.8)	(0.2)
Translation adjustments	(0.2)	—	(0.2)
Balance at March 31, 2019	$71.1	$4.8	$ 66.3
Expected future utilization on balance at March 31, 2019:			
2019 remaining nine months	$59.8	$4.8	$ 55.0
Beyond 2019	$11.3	$—	$ 11.3

Note 5 - Pension and Postretirement Benefits

Net periodic pension expense for the three months ended March 31, 2019 and 2018 is presented below:

	Three Months Ended March 31, 2019			Three Months Ended March 31, 2018		
	Total	U.S. Plans	International Plans	Total	U.S. Plans	International Plans
Service cost[(i)]	$0.7	$—	$ 0.7	$0.8	$—	$ 0.8
Interest cost	66.7	49.2	17.5	64.0	46.6	17.4
Expected return on plan assets	(81.2)	(54.5)	(26.7)	(87.2)	(57.6)	(29.6)
Amortization of prior service benefit	(1.2)	(0.6)	(0.6)	(1.5)	(0.6)	(0.9)
Recognized net actuarial loss	37.6	28.9	8.7	42.1	31.2	10.9
Net periodic pension expense (benefit)	$22.6	$23.0	$ (0.4)	$18.2	$19.6	$ (1.4)

[(i)]Service cost is reported in selling, general and administrative expense. All other components of net periodic pension expense are reported in other income (expense), net in the consolidated statements of income.

In 2019, the company expects to make cash contributions of approximately $105.0 million to its worldwide defined benefit pension plans, which are comprised of $67.2 million for the company's U.S. qualified defined benefit pension plans and $37.8 million primarily for the company's international defined benefit pension plans. In 2018, the company made cash contributions of $129.7 million to its worldwide defined benefit pension plans. For the three months ended March 31, 2019 and 2018, the company made cash contributions of $21.2 million and $27.4 million, respectively.

Net periodic postretirement benefit expense for the three months ended March 31, 2019 and 2018 is presented below:

	Three Months Ended March 31,	
	2019	2018
Service cost[i]	$0.1	$0.2
Interest cost	1.2	1.2
Expected return on assets	(0.1)	(0.1)
Recognized net actuarial loss	0.1	0.3
Amortization of prior service benefit	(0.4)	(0.5)
Net periodic postretirement benefit expense	$0.9	$1.1

[i]Service cost is reported in selling, general and administrative expense. All other components of net periodic postretirement benefit expense are reported in other income (expense), net in the consolidated statements of income.

The company expects to make cash contributions of approximately $8.0 million to its postretirement benefit plans in 2019 compared to $9.0 million in 2018. For the three months ended March 31, 2019 and 2018, the company made cash contributions of $1.9 million and $3.5 million, respectively.

Note 6 - Stock Compensation

Under stockholder approved stock-based plans, stock options, stock appreciation rights, restricted stock and restricted stock units may be granted to officers, directors and other key employees. At March 31, 2019, 1.6 million shares of unissued common stock of the company were available for granting under these plans.

As of March 31, 2019, the company has granted non-qualified stock options and restricted stock units under these plans. The company recognizes compensation cost, net of a forfeiture rate, in selling, general and administrative expense, and recognizes compensation cost only for those awards expected to vest. The company estimates the forfeiture rate based on its historical experience and its expectations about future forfeitures.

During the three months ended March 31, 2019 and 2018, the company recorded $4.7 million and $4.0 million of share-based compensation expense, respectively, which was comprised of $4.7 million and $3.9 million of restricted stock unit expense and zero and $0.1 million of stock option expense, respectively.

There were no grants of stock option awards during the three months ended March 31, 2019 and 2018. As of March 31, 2019, 554,407 stock option awards with a weighted-average exercise price of $23.49 are outstanding.

Restricted stock unit awards may contain time-based units, performance-based units, total shareholder return market-based units, or a combination of these units. Each performance-based and market-based unit will vest into zero to two shares depending on the degree to which the performance or market conditions are met. Compensation expense for performance-based awards is recognized as expense ratably for each installment from the date of grant until the date the restrictions lapse, and is based on the fair market value at the date of grant and the probability of achievement of the specific performance-related goals. Compensation expense for market-related awards is recognized as expense ratably over the measurement period, regardless of the actual level of achievement, provided the service requirement is met. Time-based restricted stock unit grants for the company’s directors vest upon award and compensation expense for such awards is recognized upon grant.

A summary of restricted stock unit activity for the three months ended March 31, 2019 follows (shares in thousands):

	Restricted Stock Units	Weighted-Average Grant-Date Fair Value
Outstanding at December 31, 2018	2,151	$ 12.90
Granted	1,296
