- During 2002, more than 400 thousand line equivalents for data transmission were added totaling 2,020,792

## Operating results

### Local

In the fourth quarter, 288,333 lines were added, 19.8% lower than the same period of 2001 but 6.8% higher than the third quarter. For the 12 months, there was a gain of 1,074,857 lines. Total lines in service had an annual increase of 8.0% totaling 14,446,436 lines.

Lines with at least one digital service increased 36.1% totaling 4,365,695 in the twelve months, reflecting penetration of digital services of 30.2% of lines, 6.2% more than in 2001.

In the fourth quarter, total call traffic amounted to 6,489 million calls, an increase of 2.0% compared with the same period of 2001 and 0.9% lower than the third quarter. For the full year, total call traffic rose to 25,678 million calls, 0.4% higher than the previous year.

Interconnection traffic with telecommunications operators was 5,822 million minutes in the fourth quarter, an increase of 13.4% and 3.4% more than in the third quarter. At year-end 2002, interconnection traffic rose to 21,651 million minutes, 12.1% higher than the previous year.

### Long distance

In the fourth quarter, domestic long distance minutes totaled 3,731 million, 5.9%, higher than the same period of 2001 and 3.2% higher than the third quarter. For the full year, domestic long distance minutes increased 0.7%, totaling 14,347 million minutes.

In the fourth quarter, international long distance traffic totaled 912 million minutes, 19.9% lower than the same period of the previous year and 30.0% lower than in the third quarter. The decrease was due to lower economic activity in the United States as well as lower incoming international long distance traffic. For the full year, international long distance traffic increased 11.7%, totaling 4,922 million minutes.

### Data

In the fourth quarter, 180,042 line equivalents for data transmission were added, 29.3% higher than the fourth quarter of 2001. At December 31, 2002, TELMEX had 2,020,792 line equivalents for data transmission, an annual increase of 28.4%.

During the quarter, 63,783 Internet access accounts were added, 5.8% lower than the same period of last year and 25.4% lower than the third quarter. For the full year, 252,274 Internet access accounts were added, 9.6% lower than the same period of last year. At year-end, TELMEX had 1,165,401 Internet access accounts in operation, 27.6% more than in 2001.

Prodigy Infinitum (DSL) had a gain of 21,681 accounts during the fourth quarter bringing the total at year-end to 66,566 accounts, up from 4,938 accounts in 2001. Prodigy Infinitum offers three speeds: 256 Kbps, 512 Kbps and 2,048 Kbps to its residential and small and medium sized business customers in order to meet their specific needs.

In 2002, TELMEX continued to offer packages of products and services in order to maintain the company's position in the competitive data market. As a result, revenues generated by the data transmission business for the fourth quarter rose to 3,355 million pesos, 8.2% higher than the fourth quarter of 2001 and 7.2% more than the third quarter. For the full year, data transmission revenues totaled 12,454 million pesos, 3.3% higher than the previous year.

## TELMEX financial results

For the fourth quarter, total revenues decreased 1.6% compared with the same period of 2001 and for the full year, the decrease was 3.8% compared with 2001. The decrease in revenues was due to lower local, interconnection, domestic and international long distance traffic growth rhythm and because of the slowdown of economic activity and the reduction of rates in real terms.

Operating costs and expenses increased 4.5% compared with last year's fourth quarter and for the full year they increased 1.3%. If costs related with interconnection that increased 12.6% in the fourth quarter and 10.7% for the full year, due to the increase in traffic carried through TELMEX's network, and depreciation and amortization were put aside, total costs would show a decrease of 5.3% in the fourth quarter and 3.4% in the full year.

This is the result of a reduction in commercial, administrative and general expenses of 11.6% in the fourth quarter and a decrease of 8.7% for the full year. Cost of sales and services decreased 0.2% compared with the fourth quarter of last year and for the full year they only increased 0.4%.

In November 2002, TELMEX registered a charge of 12.5 million dollars related to our settlement with XO Communications.

In the fourth quarter, EBITDA decreased 1.2% totaling 15,205 million pesos and for the full year it totaled 59,185 million pesos, a decrease of 6.4%. Operating income was 10,763 million pesos in the fourth quarter, 10.6% lower than the same period of 2001. For the full year, operating income totaled 39,617 million pesos, 12.0% lower than in 2001.

During the fourth quarter, comprehensive financing cost had a charge of 802 million pesos, resulting from an exchange loss of 629 million pesos of a net interest charge of 853 million pesos and a gain of 680 million pesos in the monetary position. The exchange loss was mainly due to the fluctuation of the peso against the dollar, partially offset by hedges made by the company. For the full year, comprehensive financing cost rose to 6,470 million pesos.

At year-end, total debt outstanding was 66.1 billion pesos of which 57.2 billion pesos was in foreign currency. Hedges rose to 418 million dollars with an average strike price of 10.2487 pesos per dollar and monetary assets were 920 million dollars.

Net income for the fourth quarter was 5,284 million pesos, 17.6% lower than the same period of 2001. For the full year, net income was 19,568 million pesos, a decrease of 21.2% compared with the previous year. TELMEX's earnings per share for the fourth quarter, based on the number of shares outstanding at period end, were 0.41 pesos, 16.3% lower than the same period of the previous year, and for the full year were 1.53 pesos, 19.0% lower than 2001.

#### Comments on local financial results

The local service income statement shows an increase in revenues for this line of business of 1.0% for the fourth quarter of 2002. The increase was mainly due to interconnection traffic with telecommunications and cellular operators that offset lower revenues in access, rents and measured service. For the year, local revenues decreased 3.3% because of the reduction of the interconnection rate and the reduction of local rates in real terms.

In the fourth quarter, costs increased 7.3% compared with the same period of the previous year. The decrease was due to charges of depreciation amortization and interconnection. If these charges were eliminated, operating costs and expenses would have decreased 1.8%.

EBITDA increased 0.2% in the fourth quarter and for the full year, it decreased 7.9%. Operating income for the fourth quarter decreased 9.5% and for the full year the decrease was 13.8%.

#### Comments on long distance financial results

The long distance income statement shows that long distance revenues for the fourth quarter decreased 8.0% due lower international long distance billed traffic as well as the reduction of long distance rates in real terms. Revenues for the full year decreased 8.9% because growth in traffic did not offset the decrease of long distance rates in real terms.

In the fourth quarter, total operating costs and expenses decreased 6.5% compared with the same period of 2001, due to the reduction of commercial, administrative and general expenses of 18.5% and the reduction of 14.9% of interconnection costs to the local network.

EBITDA for the fourth quarter was 5.3% lower than the same period of 2001. Operating income decreased 11.5% compared with the same period of the previous year. For the full year, EBITDA and operating income for the long distance business decreased 13.8% and 19.8%, respectively.

Notes to Consolidated Financial Statements

Years Ended December 31, 2002 and 2001

(Thousands of Mexican pesos with purchasing power at December 31, 2002)

## 1. Description of the Business and Significant Accounting Policies

### I. Description of business

Telefonos de Mexico, S.A. de C.V. and its subsidiaries (collectively the Company or TELMEX ) provide telecommunications services, primarily in Mexico.

TELMEX obtains its revenues primarily from telecommunications services, including domestic and international long-distance and local telephone services, data transmission and internet services, and the interconnection of [our customers](#) with cellular networks, as well as the interconnection of domestic long-distance operators', cellular telephone companies' and local service operators' networks with the TELMEX local network. The Company also obtains revenues from other activities related to its telephone operations, such as the sale of advertising in the published telephone directory and the sale of telephone equipment.

The amended Mexican government concession under which the Company operates was signed on August 10, 1990. The concession runs through the year 2026, but it may be renewed for an additional period of fifteen years. The concession defines, among other things, the quality standards for telephone service and establishes the basis for regulating rates.

### II. Significant accounting policies

The significant accounting policies and practices followed in the preparation of these financial statements are described below:

#### a) Consolidation

The consolidated financial statements include the accounts of Telefonos de Mexico, S.A. de C.V. and subsidiaries, all of which are wholly owned, except for two in which the Company holds an equity interest of 80% and 85%. Related minority interest is not significant to these financial statements. All the companies operate in the telecommunications sector or they provide services to companies operating in this sector.

All significant intercompany accounts and transactions have been eliminated in consolidation.

#### b) Recognition of revenues

Revenues are recognized as they accrue.

Local service revenues are derived from new-line installation charges, monthly service fees, measured usage charges based on the number of calls made, and other service charges to [customers](#).

Interconnection service revenues include charges for inconnecting fixed-system users with cellular users, as well as the interconnection of domestic long-distance [operators'](#), cellular telephone companies and local service [operators'](#) networks with the Telmex local network.

Revenues from domestic and international long-distance telephone services are determined on the basis of the duration of the calls and the type of service used. All these services are billed monthly, based on the rates authorized by the Ministry of Communications and Transportation (SCT), through the Federal Telecommunications Commission (COFETEL). Domestic long-distance service revenues include data transmission and internet service revenues. International long-distance service revenues include the revenues earned under agreements with foreign telephone

service operators for the use of facilities in interconnecting international calls. These agreements specify the rates for the use of such international interconnecting facilities. These service revenues represent the net settlement between the parties.

Revenues from the sale of prepaid telephone service cards are recognized based on an estimate of the usage of time covered by the prepaid card.

c) Recognition of the effects of inflation on financial information

The Company recognizes the effects of inflation on financial information as required by Mexican Accounting Principles Bulletin B-10, *Accounting Recognition of the Effects of Inflation on Financial Information*, issued by the Mexican Institute of Public Accountants (MIPA). Consequently, the amounts shown in the accompanying financial statements and in these notes are expressed in thousands of constant Mexican pesos as of December 31, 2002. The December 31, 2001 restatement factor applied to the financial statements at December 31, 2001 was 5.7%, based on the Mexican National Consumer Price Index (NCPI) published by Banco de Mexico (the Central Bank).

Plant, property and equipment and construction in progress were restated as described in Note 4. Telephone plant and equipment depreciation is computed on the restated investment using the composite group method. All other assets are depreciated using the straight-line method based on the estimated useful lives of the related assets.

Inventories for the operation of the telephone plant are valued at average cost and are restated on the basis of specific indexes. The stated value of inventories is similar to replacement value, not in excess of market.

Other nonmonetary assets were restated using adjustment factors obtained from the NCPI.

Capital stock, premium on sale of shares, and retained earnings were restated using adjustment factors obtained from the NCPI.

Other accumulated comprehensive income items includes the deficit from restatement of stockholders' equity, which consists of the accumulated monetary position loss at the time the provisions of Bulletin B-10 were first applied, which was Ps. 12,426,533 at December 31, 2002 and 2001, and of the result from holding nonmonetary assets, which represents the net difference between restatement by the specific indexation method (see Note 4) and restatement based on the NCPI.

The net monetary gain represents the impact of inflation on monetary assets and liabilities. The net monetary gain of each year is included in the statements of income as a part of the comprehensive financing cost.

Bulletin B-12, *Statement of Changes in Financial Position*, specifies the appropriate presentation of the statement of changes in financial position based on financial statements restated in constant pesos in accordance with Bulletin B-10. Bulletin B-12 identifies the sources and applications of resources representing differences between beginning and ending financial statement balances in constant pesos. In accordance with this bulletin, monetary and foreign exchange gains and losses are not treated as noncash items in the determination of resources provided by operations.

d) Short-term investments and marketable securities

Short-term investments and marketable securities consist basically by time deposits in financial institutions; marketable securities are represented by equity securities and corporate bonds for trading. Both are stated at market value.

e) Equity investments in affiliates

The investment in shares of affiliates is valued using the equity method. This accounting method consists basically of recognizing the investor's equity interest in the results of operations and in the stockholders' equity of investees at the time such results are determined (see Note 6).

f) Exchange differences

Transactions in foreign currency are recorded at the prevailing exchange rate at the time of the related transactions. Foreign currency denominated assets and liabilities are translated at the prevailing exchange rate at the balance sheet date. Exchange rate differences are applied to income of the year.

g) Labor obligations

Pension and seniority premium costs are recognized periodically during the years of service of personnel, based on actuarial computations made by independent actuaries, using the projected unit-credit method and financial hypotheses net of inflation, as required by Mexican Accounting Principles Bulletin D-3, *Labor Obligations*, issued by the MIPA (see Note 7). Termination payments are charged to income in the year in which the decision to dismiss an employee is made.

h) Income tax and employee profit sharing

The Company provides for deferred taxes based on the requirements of Mexican Accounting Principles Bulletin D-4, *Accounting for Income Tax, Asset Tax and Employee Profit Sharing*, issued by the MIPA. Bulletin D-4 establishes the rules with respect to the determination and presentation of deferred income tax (deferred taxes). Basically, the new bulletin requires that deferred taxes be determined on virtually all temporary differences in balance sheet accounts for financial and tax reporting purposes, using the enacted income tax rate at the time the financial statements are issued. Accordingly, the provision for income tax includes both the current year tax and the deferred portion. See Note 14 for additional information.

Deferred employee profit sharing is provided on temporary non-recurring differences with a known turnaround time.

i) Basis of translation of financial statements of foreign subsidiaries

The financial statements of the subsidiaries located in the United States of America (U.S.A.) were translated into Mexican pesos in conformity with Mexican Accounting Principles Bulletin B-15, *Transactions in Foreign Currency and Translation of Financial Statements of Foreign Operations*, issued by the MIPA, as follows:

All balance sheet amounts, except for stockholders' equity, were translated at the prevailing exchange rate at year-end; stockholders' equity accounts were translated at the prevailing exchange rate at the time capital contributions were made and earnings were generated. The statement of income amounts were translated at the prevailing exchange rate at the end of the reporting period. The effect of inflation and changes in exchange rates were not material and are presented as part of the result from holding nonmonetary assets.

j) Comprehensive income

In conformity with Mexican Accounting Principles Bulletin B-4, *Comprehensive Income*, issued by the MIPA, comprehensive income consists of the net income for the year, plus the effects of labor obligations, the result from holding nonmonetary assets

and related deferred income taxes applied directly to stockholders' equity.

k) Earnings per share

TELMEX determined earnings per share in conformity with Mexican Accounting Principles Bulletin B-14, *Earnings per Share*, issued by the MIPA (see Note 1

3).

l) Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

m) Concentration of risk

The Company invests a portion of its surplus cash in cash deposits in financial institutions with strong credit ratings and has established guidelines relating to diversification and maturities that maintain safety and liquidity. TELMEX does not believe it has significant concentrations of credit risks in its accounts receivable because it has a broad and geographically diverse customer base.

n) Financial instruments

The Company observes the requirements of Mexican Accounting Principles Bulletin C-2, *Financial Instruments*, issued by the MIPA. Bulletin C-2 establishes the basic rules to be observed by issuers of and investors in financial instruments when valuing, presenting and disclosing these instruments in their financial information. Bulletin C-2 requires that financial instruments (derivatives) be recognized as assets and liabilities and that the determined gains and losses on such instruments be credited and charged, respectively, to income, except for asset and liability hedges. To protect itself against fluctuations in interest and exchange rates, the Company uses derivatives such as interest-rate swaps and short-term exchange hedges. The determined gains or losses on these transactions are credited or charged to income using the accrual method, net of the gains or losses on the related liabilities covered (see Note 8).

o) Reclassifications

Certain amounts shown in the 2001 financial statements as originally issued have been reclassified for uniformity of presentation with 2002.

## 5. Licenses

In May 1998, TELMEX acquired from the Mexican Government licenses to operate radio spectrum wave frequency bands to provide fixed wireless telephone services at a cost of Ps. 606,686. In December 1997, the Company also acquired from the Mexican Government concessions to operate radio spectrum wave frequency bands for point-to-point and point-to-multipoint microwave communications at a cost of Ps. 181,628. ## 6. Equity Investments

a) An analysis of the equity investment in affiliated and other companies at December 31, 2002 and 2001, together with a brief description, is as follows:

In November 2001, the Company sold to a related party all of its equity interest in Prodigy Communications Corporation (a company engaged in providing internet services in the U.S.A.) for U.S.\$ 82.6 million, realizing a gain of Ps. 108,976.

In May 1999, the Company entered into an agreement with Williams Communications Group, Inc., which changed its name to WiTel Communications Group, Inc. in October 2002 (Williams), which is engaged in providing telecommunications services in U.S.A., to acquire approximately 1% of the shares comprising the capital stock of Williams. Since the market value of this investment at December 31, 2001 had substantially declined, the Company decided to make a charge of Ps. 931,870 to results of operations; this amount was included in the comprehensive financing cost. In 2002 the Company decided to write off the balance of this investment (Ps. 104,746) as TELMEX ceased to be a Williams stockholder as a result of the Company's restructuring.

In 2001, TELMEX made additional capital contributions of U.S.\$ 3 million to Technology and Internet, LLC (TAI), thus maintaining its 50% equity interest in TAI's capital stock. TAI has made investments in companies engaged in e-commerce, located basically in the U.S.A. and Latin America.

In June 2001, TELMEX invested U.S.\$ 47 million in The Telvista Company (Telvista), which represents 45% of such company's capital stock. Telvista is engaged in providing telemarketing services in the U.S.A.

In 2002, TELMEX made other investments in affiliated companies of U.S.\$ 7 million (U.S.\$ 33 million in 2001), mostly in telecommunications sector.

Total equity investments in affiliated companies during 2002 aggregated approximately U.S.\$ 7 million (U.S. \$ 83 million in 2001). Goodwill generated on these investments was not material.

On October 14, 2002, TELMEX and Fortsmann Little mutually agreed with XO to terminate the investment commitment, each paying XO U.S.\$ 12 million, thus releasing all parties from any claim related to the commitment.

It adopted the policy of making annual contributions to the fund, which totaled Ps. 4,938,263 in 2002, and Ps. 5,173,979 in 2001. These contributions are deductible for Mexican corporate income tax purposes.

During 2002, the Company entered into short-term exchange hedges which, at December 31, 2002, cover liabilities of U.S.\$ 418 million (U.S.\$ 2,740 million in 2001). These swaps were recorded in results of operations of the year at the related market interest rates. d) In February 1998, the Federal Commission of Economic Competition (COFECO) determined that Telefonos de Mexico, S.A. de C.V. has substantial power in what it referred to as five telecommunications markets so that, in

conformity with Article 63 of the Federal Telecommunications Act, COFETEL may impose specific obligations with respect to rates charged and quality of services and information.

The Company's external lawyers who are handling this matter are of the opinion that this finding is unjustified. Consequently, Telefonos de Mexico, S.A. de C.V. filed an appeal in the Federal District Court and obtained protection and shelter under Mexican Federal law. COFETEL, based on the COFECO ruling, which was later reversed, handed down a new ruling imposing certain specific obligations on Telefonos de Mexico, S.A. de C.V. The ruling of the COFETEL was appealed in a Federal Court and is still pending. In 2001, the COFECO set aside its previous ruling and handed down a new ruling supporting the findings with respect to the substantial power that Telefonos de Mexico, S.A. de C.V. exercises over five telecommunications markets. In July 2002, the COFECO ruled that Telefonos de Mexico, S.A. de C.V. was responsible for monopolistic practices. Telefonos de Mexico, S.A. de C.V. filed an appeal for reconsideration against the ruling, but the appeal was declared unfounded and the ruling confirmed.

Currently, the respective defense against the confirmation of the ruling is being prepared before the Federal Court of Justice for Tax and Administrative Matters.

f) Under Mexican law, Telefonos de Mexico, S.A. de C.V. remains jointly and severally liable for any obligations transferred to America Movil pursuant to the spin-off for a period of three years beginning on September 25, 2001, the spin-off date. Such liability, however, does not extend to any obligation with a creditor that has given its express consent relieving Telefonos de Mexico, S.A. de C.V. of such liability and approving the spin-off. In addition, Telefonos de Mexico, S.A. de C.V., has the following specific obligations:

- Telefonos de Mexico, S.A. de C.V. has guaranteed the indebtedness of ATL Algar Telecom Leste, S.A. under certain credit facilities, for up to U.S.\$104.3 million. America Movil has agreed to indemnify Telefonos de Mexico, S.A. de C.V. for any liability under these guarantees.

### 13. Stockholders' Equity

a) At December 31, 2002, capital stock is represented by 12,777 million common shares issued and outstanding with no par value, representing the Company's fixed capital (13,165 million in 2001). An analysis is as follows:

	2002	2001
4,136 million Series "AA" shares (4,307 million in 2001)	Ps. 13,473,367	Ps. 14,028,025
289 million Series "A" shares (313 million in 2001)	1,103,334	1,193,662

Series "AA" shares, which may be subscribed only by Mexican individuals and corporate entities, must represent at all times no less than 20% of capital stock and no less than 51% of the common shares. Common Series "A" shares, which may be freely subscribed, must account for no more than 19.6% of capital stock and no more than 49% of the common shares. Series "AA" and "A" shares combined may not represent more than 51% of capital stock. The combined number of Series "L" shares, which have limited voting rights and may be freely subscribed, and Series "A" shares may not exceed 80% of capital stock.

Since January 1, 2001, the Company's bylaws have contemplated the possibility of the holders of Series "L" shares exchanging such shares, in certain circumstances, for Series "AA" shares. In 2001, a total of 1,106 million Series "L" shares were exchanged for Series "AA" shares.

b) In 1994, TELMEX initiated a program to purchase its own shares. For this purpose, in accordance with the Securities Trading Act in force through May 2001, the Company appropriated retained earnings to set up a reserve to purchase its own shares. A charge is made to the reserve for the excess cost of the shares purchased over the portion of capital stock represented by the shares acquired.

In February 2001, the stockholders approved an increase in the reserve to purchase the Company's own shares, bringing the balance of the reserve to Ps. 10,940,185 (Ps. 10,008,918 historical). During 2001, the Company acquired 843.7 million Series "L" shares for Ps. 14,472,551 (Ps. 13,400,776 historical) and 1.5 million Series "A" shares for Ps. 24,604 (Ps. 22,715 historical).

Under the Securities Trading Act, amended as of June 1, 2002, companies are no longer required to create a reserve for the purchase of their own shares. The Company's own shares acquired subsequent to this amendment were purchased using the reserve until it was exhausted, after which shares were acquired using the unappropriated retained earnings in the amount the corresponding shares purchased exceeded capital stock.

In August 2001 and April 2002, the stockholders approved an increase of Ps. 10,000,000 (historical) and Ps. 4,549,888 (historical), respectively, in the total authorized historical amount to be used by the Company to acquire its own shares, bringing the total maximum amount to be used for this purpose to Ps. 10,037,564 (historical) and Ps. 10,000,000 (historical), respectively. c) In conformity with the Mexican Corporations Act, at least 5% of net income of the year must be appropriated to increase the legal reserve. This practice must be continued each year until the legal reserve reaches at least 20% of capital stock issued and outstanding.

d) Earnings per share are obtained by dividing net income for the year by the average weighted number of shares issued and outstanding during the period. To determine the average weighted number of shares issued and outstanding in 2002 and 2001, the shares held by the Company have been excluded from the computation.

The diluted earnings per share in 2002 and 2001, were determined considering the effect of the shares that may be delivered (potentially dilutive shares) as a result of the convertible senior debentures described in Note

8. The computation was made by deducting from net income for the year, the net comprehensive financing income, net of income tax and employee profit sharing, attributable to the convertible debentures. b) Asset tax for the years ended December 31, 2002 and 2001 was Ps. 2,691,626 and Ps. 2,761,145, respectively. In both years TELMEX credited against these amounts the corporate income tax paid in such years.

c) The corporate income tax rate for 2002 and 2001 was 35%. However, corporate taxpayers had the option of deferring a portion, so that the tax payable for those years represented 30% of taxable income. The earnings on which taxes were deferred must be controlled in a so-called "net reinvested tax profit" account ("CUFINRE"), to clearly identify the earnings on which the taxpayer opted to defer payment of corporate income tax. The above-mentioned option of deferring a portion of income tax was eliminated effective January 1, 2002.

Since in 2001 the Company opted for this tax deferral, earnings will be considered to be distributed first from the "CUFINRE" account, and any excess will be distributed from the "net tax profit" account ("CUFIN") so as to pay the 5% deferred tax.

Any distribution of earnings in excess of the above-mentioned account balances will be subject to payment of corporate income tax at the enacted tax rate at that time.

In addition, from January 1, 1999 through December 31, 2001, cash dividends obtained by individuals or residents abroad from corporate entities in Mexico, were subject to a 5% withholding tax on the amount of the dividend multiplied by 1.5385.

d) An analysis of income tax provisions is as follows:

	2002	2001
Current year	Ps. 10,638,595	Ps. 11,180,048
Deferred tax, net of related monetary position gain of Ps. 1,099,240 (Ps. 1,525,929 in 2001)	(K12,985)	J,856,035
Total	Ps. 10,325,610	Ps. 14,036,083

A reconciliation of the statutory corporate income tax rate to the effective rate recognized for financial reporting purposes is as follows:

	Year ended December 31,	
	2002	2001
	%	%
Statutory income tax rate	35.0	35.0
Depreciation	(2.9)	(0.5)
Financing costs	0.2	(2.2)
Other	(1.1)	0.7
Effective tax rate	31.2	33.0

A gradual one-percentage point annual reduction in the current 35% corporate income tax rate was approved starting in 2003 until the rate reaches 32% in 2005. The effect of this tax-rate change on deferred taxes represented a credit of Ps. 1,680,053 to 2002 results of operations (5% of pretax income). The effect of the tax-rate change is included in each of the related items presented.

The temporary differences on which the Company recognized deferred taxes in the years ended December 31, 2002 and 2001, were as follows:

	2002	2001
Deferred tax asset :		
Allowance for doubtful accounts and slow-moving inventories	Ps. N31,414	Ps. M67,776
Tax loss carryforwards	9,472	I8,292

Liability reserves	97,544	J61,837
Pensions and seniority premiums	J04,724	-
	1,260,038	979,785
Deferred tax liability:		
Fixed assets	(I3,669,431)	(I1,840,425)

	(I4,239,309)	(I3,160,433)
Net deferred tax (liability)	Ps. (I2,979,271)	Ps. (I2,180,648)

At December 31, 2002, the balance of the restated contributed capital account (CUCA), the net tax profit account (CUFIN) and the net reinvested tax profit account (CUFINRE) was Ps. 24,404,550, Ps. 68,635,667 and Ps. 1,940,232, respectively. These amounts are for Telefonos de Mexico, S.A. de C.V. computed on a stand-alone basis.

#### 15. Stock Option Plan

In September 2002, TELMEX introduced a stock option plan for its officers. The plan is for a duration of four years, and 50 million Series "L" shares are to be made available. Each year, plan participants may elect either to acquire all shares available or to defer their purchase until the final year. In 2002, options made available totaled 11,654,979 shares (11,546,917 shares in 2001) and options to 905,457 shares (106,248 shares in 2001) were exercised. The difference between market value and the assigned option price was not significant.

#### 16. Segments

TELMEX operates primarily in two segments: local and long-distance telephone services. Local telephone service corresponds to fixed local wired service. The long-distance service includes both domestic and international services, exclusive of the long-distance calls originated in public and rural telephones and data transmission, services included

in the others, adjustments and eliminations column. Additional information related to the Company's operations is provided in Note 1. The following summary shows the most important segment information, which has been prepared on a consistent basis:

	(Amounts in millions of Mexican pesos with purchasing power at December 31, 2002)

Additionally, the column Others, adjustments and eliminations includes the yellow and white pages directories and other services. Intersegmental transactions are reported at fair value. Comprehensive financing cost and provisions for income tax and employee profit sharing are not assigned to the segments; they are handled at the corporate level.

Segment assets include plant property and equipment (on gross basis) construction in progress, advances to suppliers and inventories for operation of the telephone plant.

#### 17. Generally Accepted Accounting Principles in the United States Reconciliation

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 6-K

The Company's consolidated financial statements are prepared in accordance with Mexican GAAP, which differ in certain significant respects from Generally Accepted Accounting Principles in the United States ("U.S. GAAP"). The principal differences between Mexican GAAP and U.S. GAAP, as they relate to the Company, consist of the accounting for pension plan costs, deferred income taxes and deferred employee profit sharing (deferred taxes), and the restatement of plant, property and equipment. Other differences are the accounting for interest on assets under construction, accrued vacation costs and the effect of derivated instruments.

The reconciliation to U.S. GAAP does not include the reversal of the adjustments to the financial statements for the effects of inflation required under Mexican GAAP (Bulletin B-10), because the application of Bulletin B-10 represents a comprehensive measure of the effects of price level changes in the Mexican economy and, as such, is considered a more meaningful presentation than historical cost- based financial reporting for both Mexican and U.S. accounting purposes.

A summary reconciliation of net income, comprehensive income and total stockholders' equity between Mexican and U.S.GAAP, is as follows:

2002 2001

Net income as reported under Mexican GAAP Ps. 19,567,915 Ps. 24,833,282
