Chairman's
LETTER TO SHAREHOLDERS

Once again, I am pleased to report that over the six-month period covered
by this report your Fund continued to provide you with attractive monthly

tax-free income. For more details about the management strategy and performance of your Fund, please read the Portfolio Manager's Comments, the Dividend and Share Price Information, and the Performance Overview sections of this report.

For some time, I've used these letters to remind you that municipal bonds can be an important building block in a well balanced investment portfolio. In addition to providing attractive tax-free monthly income, a municipal bond investment like your Fund may help you achieve and benefit from greater portfolio diversification. Portfolio diversification is a recognized way to try to reduce some of the risk that

"IN ADDITION TO PROVIDING ATTRACTIVE TAX-FREE MONTHLY INCOME, A MUNICIPAL BOND INVESTMENT LIKE YOUR FUND MAY HELP YOU ACHIEVE AND BENEFIT FROM GREATER PORTFOLIO DIVERSIFICATION."

comes with investing. For more information about this important investment strategy, I encourage you to contact your personal financial advisor.

We also are pleased to be able to offer you a choice concerning how you receive your shareholder reports and other Fund information. As an alternative to mailed copies, you can sign up to receive future Fund reports and other Fund information by e-mail and the Internet. The inside front cover of this report contains information on how you can sign up.

We are grateful that you have chosen us as a partner as you pursue your financial goals, and we look forward to continuing to earn your trust in the months and years ahead. At Nuveen Investments, our mission continues to be to assist you and your financial advisor by offering investment services and products that can help you to secure your financial objectives.

Sincerely,

/s/ Timothy R. Schwertfeger

Timothy R. Schwertfeger
Chairman of the Board

Nuveen Investments Municipal Closed-End Funds
(NPC, NCL, NCU, NAC, NVX, NZH, NKL, NKX)

Portfolio Manager's
COMMENTS

Portfolio manager Scott Romans discusses key investment strategies and the six-month performance of these eight closed-end Nuveen California Funds. Scott, who joined Nuveen in 2000, has managed NCU, NAC, NVX, NZH, NKL and NKX since 2003. He assumed portfolio management responsibility for NPC and NCL in 2005.

WHAT KEY STRATEGIES WERE USED TO MANAGE THE CALIFORNIA FUNDS DURING THE SIX-MONTH REPORTING PERIOD ENDED FEBRUARY 28, 2007?

During this six-month period, we saw a modest increase in short-term interest rates, while longer-term rates continued to decline, resulting in further

flattening of the yield curve. In this environment, where the yield curve remained the dominant market factor, we continued to emphasize a disciplined approach to duration¹ management and yield curve positioning. As part of this approach, our purchases for the Funds' portfolios focused mainly on attractively priced bonds in the 20-year to 30-year part of the yield curve. We believed that bonds in this part of the curve generally offered better value and reward opportunities more commensurate with their risk levels. To help us maintain the Funds' durations within our preferred strategic range, we also selectively sold holdings with shorter durations, including pre-refunded bonds and bonds with short maturities.

Our duration management strategies during this period also included the purchase of inverse floating rate trusts, a type of derivative financial instrument, in all eight of these California Funds. The inverse floaters had the dual benefit of increasing the Funds' distributable income and bringing their durations closer to our preferred strategic target. In past shareholder reports, we also have discussed the use of other derivatives as a duration management tool. Going into this reporting period, four of these California Funds--NPC, NCL, NAC and NVX--were using forward interest rate swaps to help manage net asset value (NAV) volatility. NAC also had purchased a small number of U.S. Treasury note futures contracts. As of February 28, 2007, these four Funds continued to use these derivatives, although we reduced the positions in NCL during this six-month period. (NCU, NZH, NKL and NKX did not use swaps during this period because we believed the durations of these Funds were adequately positioned relative to the general market.)

Overall, portfolio activity was relatively light during much of this period due to the fact that the rate environment was not advantageous for active trading. In watching the market for opportunities to add value to our portfolios, we focused mainly on premium

- 1 Duration is a measure of a bond's price sensitivity as interest rates change, with longer duration bonds displaying more sensitivity to these changes than bonds with shorter durations.

4

coupon - typically 5% bonds priced to 10-year calls. As the bond market continued to rally, especially in November and December 2006, we also purchased bonds with coupons in the 4% range which typically offered higher income.

We also continued to emphasize maintaining weightings of lower credit quality bonds in the four uninsured Funds (NCU, NAC, NVX, and NZH) and in NKL and NKX (which can invest up to 20% of their assets in uninsured investment-grade quality securities). We generally saw fewer attractively priced lower-rated credit offerings in the California market. Although California remained the largest state issuer of municipal debt in the nation, much of the new supply during this period was insured, and we did not find many opportunities outside the insured sector. Apart from credit, one area of the market in which we did continue to find value was the single family housing sector, where we purchased bonds for all four of the uninsured Funds as well as NKL.

HOW DID THE FUNDS PERFORM?

Individual results for these Nuveen California Funds, as well as relevant index and peer group information, are presented in the accompanying table.

Edgar Filing: NUVEEN INSURED CALIFORNIA DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-CSRS

TOTAL RETURNS ON NET ASSET VALUE
For periods ended 2/28/07

UNINSURED FUNDS	CUMULATIVE		ANNUALIZED	
	6-MONTH	1-YEAR	5-YEAR	10-YEAR
NCU	3.45%	5.40%	6.87%	7.05%
NAC	3.16%	5.37%	7.40%	NA
NVX	3.04%	5.47%	7.13%	NA
NZH	3.38%	5.65%	7.49%	NA
Lehman Brothers CA Tax-Exempt Bond Index ²	3.01%	5.21%	5.29%	5.90%
Lipper CA Municipal Debt Funds Average ³	3.66%	6.15%	6.85%	6.41%

- 2 The Lehman Brothers California Tax-Exempt Bond Index is an unleveraged, unmanaged index comprising a broad range of investment-grade California municipal bonds, while the Lehman Brothers Insured California Tax-Exempt Bond Index is an unleveraged, unmanaged index containing a broad range of insured California municipal bonds. Results for the Lehman Brothers indexes do not reflect any expenses.
- 3 The Lipper California Municipal Debt Funds category average is calculated using the returns of all closed-end funds in this category for each period as follows: 6 months, 25; 1 year, 25; 5 years, 15; and 10 years, 13. Fund and Lipper returns assume reinvestment of dividends.

5

INSURED FUNDS	CUMULATIVE		ANNUALIZED	
	6-MONTH	1-YEAR	5-YEAR	10-YEAR
NPC	3.07%	4.86%	6.13%	6.42%
NCL	3.13%	5.22%	6.18%	6.70%
NKL	3.40%	5.60%	NA	NA

Lehman Brothers Insured CA Tax-Exempt Bond Index ²	3.12%	5.28%	5.24%	5.99%
Lipper Insured CA Municipal Debt Funds Average ⁴	3.66%	5.87%	5.56%	6.15%

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

For the six months ended February 28, 2007, the cumulative returns on NAV for NCU, NAC and NZH outperformed the return on the Lehman Brothers California Tax-Exempt Bond Index while NVX performed in line. The six-month returns for all four of the Funds underperformed the average return of the Lipper California peer group for this period. Among the insured Funds, NKL and NKX exceeded the return on the Lehman Brothers Insured California Tax-Exempt Bond Index, while NPC and NCL performed in line with this index return. NKX outperformed the average return for the Lipper Insured California peer group, while NPC, NCL and NKL trailed this group average.

Factors that influenced the Funds' returns during this period included duration management, exposure to lower-rated credits (or credit risk) in the four uninsured Funds, as well as NKL, and NKX, sector allocations, the relative amount of advance refunding activity⁵, and the use of financial leverage.

As the yield curve continued to flatten over the course of this period, bonds with longer duration structures, including zero coupon and non-callable bonds, generally outperformed shorter duration bonds. Overall, these Funds were strategically well positioned in terms of duration, as our careful approach to duration management--including the use of inverse floaters and interest rate swaps--kept the Funds' durations close to their preferred range.

With bonds rated BBB or lower and nonrated bonds generally outperforming other credit quality sectors during this period, the four uninsured Funds as well as NKL and NKX

- 4 The Lipper Insured California Municipal Debt Funds average is calculated using the returns of all closed-end funds in its category for each period as follows: 6 months, 13; 1 year, 13; 5 years, 8; and 10 years, 6. Fund and Lipper returns assume reinvestment of dividends.
- 5 Advance refundings, also known as pre-refundings or refinancings, occur when an issuer sells new bonds and uses the proceeds to fund principal and interest payments of older existing bonds. This process often results in lower borrowing costs for bond issuers.

(which can invest up to 20% of their assets in uninsured investment-grade quality securities) benefited from their allocations to lower-quality credits. The performance of this sector was largely the result of investor demand for the higher yields typically associated with lower-rated bonds, which drove up their value. (NPC and NCL, as 100% insured Funds, cannot hold any lower-rated credits.)

Among the lower-rated holdings making contributions to the returns of NCU, NAC,

NVX, NZH, NKL and NKX were health care (including hospitals) credits and industrial development revenue bonds, which ranked as the top performing revenue sectors in the national Lehman Brothers Municipal Bond Index for this period. Bonds backed by the 1998 master tobacco settlement agreement, which comprised approximately 2% to 6% of the portfolios of these six Funds as of February 28, 2007, also performed well during this period.

We also continued to see positive contributions from advance refunding activity, which benefited these Funds through price appreciation and enhanced credit quality. Some of the performance differential among these eight Funds can be attributed to the relative amounts of advance refundings they experienced during this period, with NVX having the fewest bonds pre-refunded (as a percentage of its portfolio) among the uninsured Funds. Among the insured Funds, NKX had more than three times the amount of advance refundings than the other three insured Funds.

At the same time, holdings of older, previously pre-refunded bonds tended to underperform the general municipal market during this period, due primarily to their shorter effective maturities and higher credit quality. Among these eight Funds, NAC and NVX had the heaviest allocations of pre-refunded bonds entering into this period.

Another factor in the six-month performance of these Funds, especially relative to the performances of the unleveraged Lehman Brothers California Tax-Exempt Bond Index and Lehman Brothers Insured California Tax-Exempt Bond Index, was the use of financial leverage. While leverage can add volatility to a Fund's NAV and share price, this strategy can also provide opportunities for additional income and total return for common shareholders. Over this period, our leveraging strategy had a positive impact on the results of these eight Funds.

7

Dividend and Share Price
INFORMATION

The dividends of all eight of these California Funds remained stable over the six-month reporting period ended February 28, 2007.

Due to normal portfolio activity, common shareholders of the following Funds received capital gains and net ordinary income distributions at the end of December 2006 as follows:

	LONG-TERM CAPITAL GAINS (PER SHARE)	SHORT-TERM CAPITAL GAINS AND/OR ORDINARY INCOME (PER SHARE)
NPC	\$0.0754	\$0.0058
NCU	\$0.0308	--
NAC	\$0.0533	--
NKL	\$0.0026	--

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During

certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of February 28, 2007, NPC and NCL had positive UNII balances for both financial statement and, based on our best estimates, tax purposes, while the other six Funds had negative UNII balances for financial statement purposes and positive UNII balances, based on our best estimates, for tax purposes.

8

At the end of the reporting period, the Funds' share prices were trading at premiums or discounts to their NAVs as shown in the accompanying chart:

	2/28/07 PREMIUM/DISCOUNT	6-MONTH AVERAGE PREMIUM/DISCOUNT
NPC	-3.14%	-3.10%
NCL	-5.09%	-5.35%
NCU	-3.93%	-4.84%
NAC	+1.92%	+1.48%
NVX	-1.23%	-1.26%
NZH	-0.13%	-0.07%
NKL	-1.15%	+0.21%
NKX	-2.64%	-1.72%

=====

USD-LIBOR (United States Dollar-London Inter-Bank Offered Rate)

All of the bonds in the Portfolio of Investments are either covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance, or are backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, any of which ensure the timely payment of principal and interest.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
 - (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
 - (3) Ratings: Using the higher of Standard & Poor's or Moody's rating. Ratings below BBB by Standard & Poor's Group or Baa by Moody's Investor Service, Inc. are considered to be below investment grade.
 - (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest.
 - (5) Effective date represents the date on which both the Fund and counterparty commence interest payment accruals on each forward swap contract.
- (ETM) Escrowed to maturity.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140.

See accompanying notes to financial statements.
