PROSPECTUS

**Select Medical Corporation
Offer to Exchange**

\$660,000,000 principal amount of our 7⁵/₈% Senior Subordinated Notes due 2015, which have been registered under the Securities Act, for our outstanding 7⁵/₈% Senior Subordinated Notes due 2015

We are offering to exchange new 7⁵/₈% Senior Subordinated Notes due 2015, or the senior subordinated exchange notes, for our currently outstanding 7⁵/₈% Senior Subordinated Notes due 2015, or the outstanding senior subordinated notes. We refer to the outstanding senior subordinated notes as the outstanding notes, the senior subordinated exchange notes as the exchange notes, and the outstanding notes and the exchange notes collectively as the notes. The exchange notes are substantially identical to the outstanding notes, except that the exchange notes have been registered under the federal securities laws, are not subject to transfer restrictions and are not entitled to certain registration rights relating to the outstanding notes. The exchange notes will represent the same debt as the outstanding notes and we will issue the exchange notes under the same indenture as the outstanding notes. We are also hereby offering the subsidiary guarantees of the exchange notes for guarantees of the outstanding notes described herein.

The principal features of the exchange offer are as follows:

The exchange offer expires at 5:00 p.m., New York City time, on, July 26, 2005, unless extended. We do not currently intend to extend the expiration date of the exchange offer.

The exchange offer is not subject to any condition other than that the exchange offer not violate applicable law or any applicable interpretation of the Staff of the Securities and Exchange Commission.

We will exchange the exchange notes for all outstanding notes that are validly tendered and not validly withdrawn prior to the expiration of the exchange offer.

You may withdraw tendered outstanding notes at any time prior to the expiration of the exchange offer.

We do not intend to apply for listing of the exchange notes on any securities exchange or automated quotation system.

We will not receive any proceeds from the exchange offer. We will pay all expenses incurred by us in connection with the exchange offer and the issuance of the exchange notes.

You should consider carefully the risk factors beginning on page 13 of this prospectus before participating in the exchange offer.

Neither the U.S. Securities and Exchange Commission nor any other federal or state agency has approved or disapproved of these securities to be distributed in the exchange offer, nor have any of these organizations determined that this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this Prospectus is June 24, 2005.

PROSPECTUS SUMMARY

This summary does not contain all of the information that is important to you. Please review this prospectus in its entirety, including the risk factors and our financial statements and the related notes included elsewhere herein, before you decide to invest.

*Unless the context otherwise requires, the terms *Select*, *our company*, *us*, *we* and *our* refer to *Select Medical Corporation* together with its subsidiaries, and the terms *Holdings* and *our parent* refer to our parent company, *Select Medical Holdings Corporation*, a Delaware corporation which was formerly known as *EGL Holding Company*. *Select Medical Corporation* became a wholly owned subsidiary of *Holdings* on February 24, 2005 as a result of a merger of *EGL Acquisition Corp.*, a subsidiary of *Holdings*, with and into *Select Medical Corporation*, with *Select Medical Corporation* continuing as the surviving corporation. Unless otherwise noted, references to *pro forma* and other financial terms have the meanings set forth under *Summary Consolidated Financial and Other Data*.*

The Exchange Offer

On February 24, 2005, EGL Acquisition Corp. completed a private offering of \$660.0 million in aggregate principal amount of 7⁵/₈% senior subordinated notes due 2015, referred to in this prospectus as the outstanding notes. The outstanding notes became our obligations when EGL Acquisition Corp. was merged into Select on February 24, 2005. We entered into an exchange and registration rights agreement with the initial purchasers in the private offering in which we agreed, among other things, to file the registration statement of which this prospectus forms a part within 150 days of the issuance of the outstanding notes. You are entitled to exchange in this exchange offer your outstanding notes for 7⁵/₈% senior subordinated notes due 2015 (referred to in this prospectus as the exchange notes), which have been registered under the federal securities laws and have substantially identical terms as the outstanding notes, except for the elimination of certain transfer restrictions and registration rights. You should read the discussion under the heading *Summary Description of the Exchange Notes* and *Description of the Exchange Notes* for further information regarding the exchange notes.

Our Business

Company Overview

We are a leading operator of specialty hospitals in the United States. We are also a leading operator of outpatient rehabilitation clinics in the United States and Canada. As of March 31, 2005, we operated 99 long-term acute care hospitals in 26 states, four acute medical rehabilitation hospitals, which are certified by Medicare as inpatient rehabilitation facilities, in New Jersey and 753 outpatient rehabilitation clinics in 25 states, the District of Columbia and seven Canadian provinces. We also provide medical rehabilitation services on a contract basis at nursing homes, hospitals, assisted living and senior care centers, schools and worksites. We began operations in 1997 under the leadership of our current management team, including our co-founders, Rocco A. Ortenzio and Robert A. Ortenzio, both of whom have significant experience in the healthcare industry. Under this leadership, we have grown our business through internal development initiatives and strategic acquisitions.

The Transactions

On February 24, 2005, pursuant to a merger agreement among EGL Acquisition Corp., Holdings and Select, EGL Acquisition Corp. was merged with and into Select. Select continued as the surviving corporation in the merger and as a wholly owned subsidiary of Holdings. Holdings and EGL Acquisition Corp. were Delaware corporations formed at the direction of Welsh, Carson, Anderson & Stowe IX, L.P. (*Welsh Carson*) for purposes of engaging in the merger and related transactions. In the merger, Select's then-existing stockholders (other than rollover stockholders) and option holders were paid a total purchase price of

Table of Contents

approximately \$1,827.7 million. The merger and related transactions are collectively referred to in this prospectus as the Transactions and are more fully described below in The Transactions.

The merger was financed by:

a cash equity investment in Holdings by an investor group lead by our sponsors Welsh Carson and Thoma Cressey Equity Partners Inc. (Thoma Cressey),

a rollover investment in Holdings by our continuing investors including members of our senior management team and certain of our directors,

Holdings issuance and sale of senior subordinated notes, preferred stock and common stock to WCAS Capital Partners IV, L.P., an investment fund affiliated with Welsh Carson, Rocco A. Ortenzio, Robert A. Ortenzio and certain other investors who are members of or affiliated with the Ortenzio family,

borrowings by us under our new senior secured credit facility,

a portion of our cash on hand, and

the issuance of the outstanding notes.

In connection with the merger, we commenced tender offers to acquire all of our 9¹/₂% senior subordinated notes due 2009 and all of our 7¹/₂% senior subordinated notes due 2013. In connection with each such tender offer we sought consents to eliminate substantially all of the restrictive covenants and make other amendments to the indentures governing such notes. Upon the completion of the tender offers on February 24, 2005, holders of all of our 7¹/₂% senior subordinated notes and holders of approximately 96.7% of our 9¹/₂% senior subordinated notes had delivered consents and tendered their notes in connection with such tender offers and consent solicitations. See The Transactions.

As a result of the Transactions, the majority of our assets and liabilities were adjusted to their fair value as of February 25, 2005. The excess of the total purchase price over the fair value of our tangible and identifiable intangible assets was allocated to goodwill, which is the subject of an annual impairment test. Additionally, pursuant to Financial Accounting Standards Board Emerging Issues Task Force Issue No. 88-16 Basis in Leveraged Buyout Transactions, a portion of the equity related to our continuing stockholders was recorded at the stockholder's predecessor basis and a corresponding portion of the fair value of the acquired assets was reduced accordingly. By definition, our statements of financial position and results of operations subsequent to the Transactions are not comparable to the same statements for the periods prior to the Transactions due to the resulting change in basis. See Unaudited Pro Forma Condensed Consolidated Financial Information.

Corporate Information

Select Medical Corporation is a corporation organized under the laws of the State of Delaware with principal executive offices located at 4716 Old Gettysburg Road, P.O. Box 2034, Mechanicsburg, Pennsylvania 17055. Our telephone number at our principal executive offices is (717) 972-1100. Our worldwide web address is www.selectmedicalcorp.com. The information on our website is not part of this prospectus.

Table of Contents

Summary of the Terms of the Exchange Offer

On February 24, 2005, we completed an offering of \$660.0 million in aggregate principal amount of 7⁵/₈% senior subordinated notes due 2015, which was exempt from registration under the Securities Act.

We sold the outstanding notes to certain initial purchasers, who subsequently resold the outstanding notes to qualified institutional buyers pursuant to Rule 144A under the Securities Act and to non-U.S. persons outside the United States in reliance on Regulation S under the Securities Act.

In connection with the sale of the outstanding notes, we and the subsidiary guarantors entered into an exchange and registration rights agreement with the initial purchasers of the outstanding notes. Under the terms of that agreement, we each agreed to use commercially reasonable efforts to consummate the exchange offer contemplated by this prospectus.

If we and the subsidiary guarantors are not able to effect the exchange offer contemplated by this prospectus, we and the subsidiary guarantors will use commercially reasonable efforts to file and cause to become effective a shelf registration statement relating to the resales of the outstanding notes.

The following is a brief summary of the terms of the exchange offer. Certain of the terms and conditions described below are subject to important limitations and exceptions. For a more complete description of the exchange offer, see

The Exchange Offer .
Securities Offered

\$660,000,000 in aggregate principal amount of 7⁵/₈% senior subordinated notes due 2015. We are also hereby offering to exchange the guarantees of the exchange notes for guarantees of outstanding notes as described herein.

Exchange Offer

The exchange notes are being offered in exchange for a like principal amount of outstanding notes. We will accept any and all outstanding notes validly tendered and not withdrawn prior to 5:00 p.m., New York City time, on July 26, 2005. Holders may tender some or all of their outstanding notes pursuant to the exchange offer. However, each of the outstanding notes may be tendered only in integral multiples of \$1,000 in principal amount. The form and terms of each of the exchange notes are the same as the form and terms of each of the outstanding notes except that:

the exchange notes have been registered under the federal securities laws and will not bear any legend restricting their transfer;

each of the exchange notes bear different CUSIP numbers than the applicable outstanding notes; and

the holders of the exchange notes will not be entitled to certain rights under the exchange and registration rights agreement, including the provisions for an increase in the interest rate on the applicable outstanding notes in some circumstances.

Resale

Based on an interpretation by the Staff of the SEC set forth in no-action letters issued to third parties, we believe that the exchange notes may be offered for resale, resold and otherwise transferred by you without compliance with the registration and prospectus delivery provisions of the Securities Act provided that:

you are acquiring the exchange notes in the ordinary course of your business;

Table of Contents

you have not participated in, do not intend to participate in, and have no arrangement or understanding with any person to participate in the distribution of exchange notes; and

you are not an affiliate of Select, within the meaning of Rule 405 of the Securities Act.

Each participating broker-dealer that receives exchange notes for its own account during the exchange offer in exchange for outstanding notes that were acquired as a result of market-making or other trading activity must acknowledge that it will deliver a prospectus in connection with any resale of the exchange notes. Prospectus delivery requirements are discussed in greater detail in the section captioned Plan of Distribution. Any holder of outstanding notes who:

is an affiliate of Select,

does not acquire exchange notes in the ordinary course of its business, or

tenders in the exchange offer with the intention to participate, or for the purpose of participating, in a distribution of exchange notes,

cannot rely on the aforementioned position of the Staff of the SEC enunciated in Exxon Capital Holdings Corporation, Morgan Stanley & Co. Incorporated or similar no-action letters and, in the absence of an exemption, must comply with the registration and prospectus delivery requirements of the Securities Act in connection with the resale of the exchange notes.

Expiration Date

The exchange offer will expire at 5:00 p.m., New York City time on July 26, 2005 unless we decide to extend the exchange offer. We may extend the exchange offer for the outstanding notes. Any outstanding notes not accepted for exchange for any reason will be returned without expense to the tendering holders promptly after expiration or termination of the exchange offer.

Conditions to the Exchange Offer

The exchange offer is subject to certain customary conditions, some of which may be waived by us.

Procedures for Tendering Outstanding Notes

If you wish to accept the exchange offer, you must complete, sign and date the letter of transmittal, or a facsimile of the letter of transmittal, in accordance with the instructions contained in this prospectus and in the letter of transmittal. You should then mail or otherwise deliver the letter of transmittal, or facsimile, together with the outstanding notes to be exchanged and any other required documentation, to the exchange agent at the address set forth in this prospectus and in the letter of transmittal. If you hold outstanding notes through The Depository Trust Company, or DTC, and wish to participate in the exchange offer, you must comply with the Automated Tender Offer Program procedures of DTC, by which you will agree to be bound by the applicable letter of transmittal.

Table of Contents

By executing or agreeing to be bound by the letter of transmittal, you will represent to us that, among other things:

any exchange notes to be received by you will be acquired in the ordinary course of business;

you have no arrangement or understanding with any person to participate in the distribution (within the meaning of the Securities Act) of exchange notes in violation of the provisions of the Securities Act;

you are not an affiliate (within the meaning of Rule 405 under the Securities Act) of Select, or if you are an affiliate, you will comply with any applicable registration and prospectus delivery requirements of the Securities Act; and

if you are a broker-dealer that will receive exchange notes for your own account in exchange for applicable outstanding notes that were acquired as a result of market-making or other trading activities, then you will deliver a prospectus in connection with any resale of such exchange notes.

See The Exchange Offer Procedures for Tendering and Plan of Distribution.

Effect of Not Tendering in the Exchange Offer

Any outstanding notes that are not tendered or that are tendered but not accepted will remain subject to the restrictions on transfer. Since the outstanding notes have not been registered under the federal securities laws, they bear a legend restricting their transfer absent registration or the availability of a specific exemption from registration. Upon the completion of the exchange offer, we will have no further obligations to register, and we do not currently anticipate that we will register, the outstanding notes not exchanged in this exchange offer under the Securities Act.

Special Procedures for Beneficial Owners

If you are a beneficial owner of outstanding notes that are not registered in your name, and you wish to tender outstanding notes in the exchange offer, you should contact the registered holder promptly and instruct the registered holder to tender on your behalf. If you wish to tender on your own behalf, you must, prior to completing and executing the applicable letter of transmittal and delivering your outstanding notes, either make appropriate arrangements to register ownership of the outstanding notes in your name or obtain a properly completed bond power from the registered holder.

Guaranteed Delivery Procedures

If you wish to tender your outstanding notes and your outstanding notes are not immediately available or you cannot deliver your outstanding notes, the applicable letter of transmittal or any other documents required by the applicable letter of transmittal or comply with the applicable procedures under DTC's Automated Tender Offer Program prior to the expiration date, you must tender your outstanding notes according to the guaranteed delivery procedures set forth in this prospectus under The Exchange Offer Guaranteed Delivery Procedures.

Table of Contents

Interest on the Exchange Notes and the Outstanding Notes	The exchange notes will bear interest at their respective interest rates from the most recent interest payment date to which interest has been paid on the outstanding notes or, if no interest has been paid, from February 24, 2005. Interest on the outstanding notes accepted for exchange will cease to accrue upon the issuance of the exchange notes.
Withdrawal Rights	Tenders of outstanding notes may be withdrawn at any time prior to 5:00 p.m., New York City time, on the expiration date.
Material United States Federal Income Tax Considerations	The exchange of outstanding notes for exchange notes in the exchange offer is not a taxable event for U.S. federal income tax purposes. Please read the section of this prospectus captioned Material U.S. Federal Income Tax Considerations for more information on tax consequences of the exchange offer.
Use of Proceeds	We will not receive any cash proceeds from the issuance of exchange notes pursuant to the exchange offer.
Exchange Agent	U.S. Bank Trust National Association, the trustee under the indenture governing the outstanding notes, is serving as exchange agent in connection with the exchange offer. The address and telephone number of the exchange agent are set forth under the heading The Exchange Offer Exchange Agent .

Table of Contents

Summary Description of the Exchange Notes

The brief summary below describes the principal terms of the exchange notes. Some of the terms described below are subject to important limitations and exceptions. The Description of the Exchange Notes section of this prospectus contains a more detailed description of the terms of the exchange notes.

Issuer	Select Medical Corporation.
Exchange notes	\$660,000,000 in aggregate principal amount of 7 ⁵ / ₈ % senior subordinated notes due 2015.
Maturity date	February 1, 2015.
Interest payment dates	February 1 and August 1, beginning August 1, 2005.
Optional redemption	We may redeem some or all of the notes prior to February 1, 2010 at a price equal to 100% of the principal amount thereof, plus accrued and unpaid interest and a make-whole premium. Thereafter, we may redeem some or all of the notes at the redemption prices set forth in this prospectus. See Description of the Exchange Notes Optional Redemption.
Equity offering optional redemption	At any time before February 1, 2008, we may redeem up to 35% of the aggregate principal amount of the notes at 107.625% of the principal amount thereof, plus accrued and unpaid interest, with the proceeds of one or more equity offerings so long as at least 65% of the originally issued aggregate principal amount of the notes remains outstanding after such redemption.
Change of control	Upon the occurrence of certain change of control events, we will be required to offer to repurchase all or a portion of the notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest. See Description of the Exchange Notes Repurchase at the Option of Holders Change of Control.
Guarantees	All of our existing and future restricted domestic subsidiaries, other than certain non-guarantor subsidiaries, guarantee the notes on an unsecured senior subordinated basis.
Ranking	The notes are our unsecured senior subordinated obligations and: <ul style="list-style-type: none"> rank junior to all of our existing and future senior indebtedness, which includes indebtedness under our new senior secured credit facility; rank equally with all of our existing and future senior subordinated indebtedness; rank senior to all of our existing and future subordinated indebtedness; and are effectively subordinated to all of our existing and future secured obligations to the extent of the value of the assets securing such obligations, including indebtedness under our new senior secured credit facility, and to all of the existing and future liabilities of our subsidiaries that do not guarantee the notes.

Table of Contents

Similarly, the guarantees of the notes by our subsidiaries:

rank junior to all of the existing and future senior indebtedness of such subsidiaries, which includes the subsidiary guarantees of our new senior secured credit facility;

rank equally with all of the existing and future senior subordinated indebtedness of such subsidiaries;

rank senior to all of the existing and future subordinated indebtedness of such subsidiaries; and

are effectively subordinated to all of the existing and future secured obligations of such subsidiaries to the extent of the value of the assets securing such obligations, including the subsidiary guarantees of our new senior secured credit facility, and to all of the existing and future liabilities of our subsidiaries that do not guarantee the notes.

As of March 31, 2005, we and our subsidiaries that are guarantors of the notes had approximately \$782.9 million of senior debt outstanding to which the notes were subordinated and our subsidiaries that are not guaranteeing the notes had total assets and total liabilities of \$49.3 million and \$10.3 million, respectively. See Description of the Exchange Notes Subordination.

Certain covenants

The indenture governing the notes contains covenants that, among other things, limit our ability and the ability of our restricted subsidiaries to:

incur additional indebtedness and issue or sell preferred stock,

pay dividends on, redeem or repurchase our capital stock,

make investments,

create certain liens,

sell assets,

incur obligations that restrict the ability of our subsidiaries to make dividend or other payments to us,

guarantee indebtedness,

engage in transactions with affiliates,

create or designate unrestricted subsidiaries, and

consolidate, merge or transfer all or substantially all of our assets and the assets of our subsidiaries on a consolidated basis.

As of March 31, 2005, all of our subsidiaries were restricted subsidiaries, as defined in the indenture. These covenants are subject to important exceptions and qualifications. See Risk Factors Risks Related to the Notes and Description of the Exchange Notes.

No established market for the exchange notes

The exchange notes generally will be freely transferable but will also be new securities for which there will not initially be a market. Accordingly, we cannot assure you that a market for the exchange

Table of Contents

notes will develop or make any representation as to the liquidity of any market. We do not intend to apply for the listing of the exchange notes on any securities exchange or automated dealer quotation system. The initial purchasers advised us that they intend to make a market in the exchange notes. However, they are not obligated to do so, and any market making with respect to the exchange notes may be discontinued at any time without notice. See Plan of Distribution.

Tax consequences

For a discussion of certain U.S. federal income tax consequences of an investment in the exchange notes, see Material U.S. Federal Income Tax Considerations. You should consult your own tax advisor to determine the federal, state, local and other tax consequences of an investment in the exchange notes.

Risk factors

See Risk Factors beginning on page 13 of this prospectus for a discussion of factors you should carefully consider before deciding to invest in the exchange notes.

Table of Contents**Summary Consolidated Financial and Other Data**

You should read the summary consolidated financial and other data below in conjunction with our consolidated financial statements and the accompanying notes and Unaudited Pro Forma Condensed Consolidated Financial Information. All of these materials are contained later in this prospectus. We derived the historical financial data for the years ended December 31, 2002, 2003 and 2004, and as of December 31, 2002, 2003 and 2004 from our audited consolidated financial statements. We derived the historical financial data for the three months ended March 31, 2004, the period from January 1, 2005 through February 24, 2005 and the period from February 25, 2005 through March 31, 2005, and as of March 31, 2004 and 2005, from our unaudited interim consolidated financial statements. You should also read Selected Historical Consolidated Financial Data and the accompanying Management's Discussion and Analysis of Financial Condition and Results of Operations. The unaudited pro forma condensed consolidated statement of operations data for the three months ended March 31, 2005 present results of operations before cumulative effects of accounting changes and are pro forma for the Transactions as if the Transactions had been completed on January 1, 2005. The unaudited pro forma condensed consolidated statement of operations data for the year ended December 31, 2004 present results of operations before cumulative effects of accounting changes and are pro forma for the Transactions, as if the Transactions had been completed on January 1, 2004. By definition, our statements of financial position and results of operations subsequent to the Transactions are not comparable to the same statements for the periods prior to the Transactions due to the resulting change in basis.

Table of Contents**Selected Operating Data**

The following table sets forth operating statistics for our specialty hospitals and our outpatient rehabilitation business for each of the periods presented. The data in the table reflects the changes in the number of long-term acute care hospitals and outpatient rehabilitation clinics we operate that resulted from acquisitions, start-up activities and closures. The operating statistics reflect data for the period of time these operations were managed by us. Further information on our acquisition activities can be found in Management's Discussion and Analysis of Financial Condition and Results of Operations Operating Statistics and the notes to our consolidated financial statements.

(1) Our recent acquisition of SemperCare, Inc. does not meet the significance thresholds under Rule S-X and accordingly is excluded from the Unaudited Pro Forma Condensed Consolidated Financial Information. See Management's Discussion and Analysis of Financial Condition and Results of Operations Recent Trends and Events SemperCare Acquisition.

(2) Operating expenses include cost of services, general and administrative expenses, and bad debt expenses.

- (3) Consists of stock compensation expense related to the repurchase of outstanding stock options in the Predecessor period from January 1, 2005 through February 24, 2005 and compensation expense related to restricted stock and a warrant that were issued in the Successor period from February 25, 2005 through March 31, 2005.
- (4) In connection with the merger, we tendered for all of our 9¹/₂% senior subordinated notes due 2009 and all of our 7¹/₂% senior subordinated notes due 2013. The loss in the Predecessor period of January 1, 2005 through February 24, 2005 consists of the tender premium cost of \$34.8 million and the remaining write-off of unamortized deferred financing costs of \$7.9 million.

Table of Contents

- (5) As a result of the merger, we incurred costs in the Predecessor period of January 1, 2005 through February 24, 2005 directly related to the merger. This included the cost of the investment advisor hired by the Special Committee of the Board of Directors to evaluate the merger, legal and accounting fees, costs associated with the Hart-Scott-Rodino filing relating to the merger, cost associated with purchasing a six year extended reporting period under our directors and officers liability insurance policy and other associated expenses.
- (6) Net interest equals interest expense minus interest income.
- (7) Reflects interests held by other parties in subsidiaries, limited liability companies and limited partnerships owned and controlled by us.
- (8) For purposes of computing the ratio of earnings to fixed charges, earnings consist of income (loss) from continuing operations before income taxes, fixed charges, minority interest in income of subsidiaries, and income (loss) from unconsolidated joint ventures. Fixed charges include preferred dividend requirements of subsidiaries, deemed dividends on preferred stock conversion, interest expense, and the portion of operating rents that is deemed representative of an interest factor. For the period January 1, 2005 through February 24, 2005 (Predecessor period), the ratio coverage was less than 1:1. We would have had to generate additional earnings of approximately \$159.1 million to achieve a coverage ratio of 1:1.
- (9) As of March 31, 2005, we owned 100% of the equity interests in all of our hospitals except for two hospitals that had a 14% minority owner, three hospitals that had a 3% minority owner and two hospitals that had a 9% minority owner.
- (10) Available licensed beds are the number of beds that are licensed with the appropriate state agency and which are readily available for patient use at the end of the period indicated.
- (11) Admissions represent the number of patients admitted for treatment.
- (12) Patient days represent the total number of days of care provided to patients.
- (13) Average length of stay (days) represents the average number of days patients stay in our hospitals per admission, calculated by dividing total patient days by the number of discharges for the period.
- (14) We calculate occupancy rate by dividing the average daily number of patients in our hospitals by the weighted average number of available licensed beds over the period indicated.
- (15) We calculate percent patient days Medicare by dividing the number of Medicare patient days by the total number of patient days.
- (16) Managed clinics are clinics that we operate through long-term management arrangements and clinics operated through unconsolidated joint ventures.

Table of Contents**RISK FACTORS**

Investing in the notes involves a number of risks and uncertainties, many of which are beyond our control. You should carefully consider each of the risks and uncertainties we describe below and all of the other information in this prospectus before deciding to invest in the notes. The risks and uncertainties we describe below are not the only ones we face. Additional risks and uncertainties that we do not currently know about or that we currently believe to be immaterial may also adversely affect our business, operations, financial condition or financial results.

Risks Related to Our Businesses

Compliance with recent changes in federal regulations applicable to long-term acute care hospitals operated as hospitals within hospitals or as satellites will result in increased capital expenditures and may have an adverse effect on our future net operating revenues and profitability.

On August 11, 2004, the Centers for Medicare & Medicaid Services, also known as CMS, published final regulations applicable to long-term acute care hospitals that are operated as hospitals within hospitals or as satellites (collectively referred to as HIHs). HIHs are separate hospitals located in space leased from, and located in, general acute care hospitals, known as host hospitals. Effective for hospital cost reporting periods beginning on or after October 1, 2004, the final regulations, subject to certain exceptions, provide lower rates of reimbursement to HIHs for those Medicare patients admitted from their hosts that are in excess of a specified percentage threshold. For HIHs opened after October 1, 2004, the Medicare admissions threshold has been established at 25%. For HIHs that meet specified criteria and were in existence as of October 1, 2004, including all of our existing HIHs, the Medicare admissions thresholds will be phased-in over a four-year period starting with hospital cost reporting periods beginning on or after October 1, 2004, as follows: (i) for discharges during the cost reporting period beginning on or after October 1, 2004 and before October 1, 2005, the Medicare admissions threshold is the Fiscal 2004 Percentage (as defined below) of Medicare discharges admitted from the host hospital; (ii) for discharges during the cost reporting period beginning on or after October 1, 2005 and before October 1, 2006, the Medicare admissions threshold is the lesser of the Fiscal 2004 Percentage of Medicare discharges admitted from the host hospital or 75%; (iii) for discharges during the cost reporting period beginning on or after October 1, 2006 and before October 1, 2007, the Medicare admissions threshold is the lesser of the Fiscal 2004 Percentage of Medicare discharges admitted from the host hospital or 50%; and (iv) for discharges during cost reporting periods beginning on or after October 1, 2007, the Medicare admissions threshold is 25%. As used above, Fiscal 2004 Percentage means, with respect to any HIH, the percentage of all Medicare patients discharged by such HIH during its cost reporting period beginning on or after October 1, 2003 and before October 1, 2004 who were admitted to such HIH from its host hospital. As of December 31, 2004, 78 of our 82 long-term acute care hospitals operated as HIHs. For the year ended December 31, 2004, approximately 60% of the Medicare admissions to our HIHs were from host hospitals. For the year ended December 31, 2004, approximately 9% of our HIHs admitted 25% or fewer of their Medicare patients from their host hospitals, approximately 31% of our HIHs admitted 50% or fewer of their Medicare patients from their host hospitals, and approximately 78% of our HIHs admitted 75% or fewer of their Medicare patients from their host hospitals. There are several factors that should be taken into account in evaluating this admissions data. First, the admissions data for the year ended December 31, 2004 is not necessarily indicative of the admissions mix these hospitals will experience in the future. Second, admissions data for the year ended December 31, 2004 includes four hospitals that were open for less than one year, and the data from these hospitals may not be indicative of the admissions mix these hospitals will experience over a longer period of time. Third, admissions data for the year ended December 31, 2004 does not include admissions data for the hospitals recently acquired in the SemperCare acquisition. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Recent Trends and Events—SemperCare Acquisition.

We currently anticipate that these new HIH regulations will have only a negligible impact on our 2005 financial results but could have a significant negative impact on our financial results thereafter. In order to minimize the more significant impact of the HIH regulations in 2006 and future years, we have developed a business plan and strategy in each of our markets to adapt to the HIH regulations and maintain our company's

Table of Contents

current business. Our transition plan includes managing admissions at existing HIHs, relocating certain HIHs to leased spaces in smaller host hospitals in the same markets, consolidating HIHs in certain of our markets, relocating certain of our facilities to alternative settings, building or buying free-standing facilities and closing a small number of facilities. There can be no assurance that we can successfully implement such changes to our existing HIH business model or successfully control the capital expenditures associated with such changes. As a result, our ability to operate our long-term acute care hospitals effectively and our net operating revenues and profitability may be adversely affected. For example, because physicians generally direct the majority of hospital admissions, our net operating revenues and profitability may decline if the relocation efforts for certain of our HIHs adversely affect our relationships with the physicians in those communities. See [Our Business Specialty Hospitals Recent HIH Regulatory Changes](#) and [Our Business Government Regulations Overview of U.S. and State Government Reimbursements Regulatory Changes](#).

If our long-term acute care hospitals fail to maintain their certifications as long-term acute care hospitals or if our facilities operated as HIHs fail to qualify as hospitals separate from their host hospitals, our net operating revenues and profitability may decline.

As of March 31, 2005, 97 of our 99 long-term acute care hospitals were certified by Medicare as long-term acute care hospitals, and two more were in the process of becoming certified as Medicare long-term acute care hospitals. If our long-term acute care hospitals fail to meet or maintain the standards for certification as long-term acute care hospitals, namely minimum average length of patient stay, they will receive payments under the prospective payment system applicable to general acute care hospitals rather than payment under the system applicable to long-term acute care hospitals. Payments at rates applicable to general acute care hospitals would likely result in our long-term acute care hospitals receiving less Medicare reimbursement than they currently receive for their patient services. In its preamble to the May 6, 2005 final rule updating the long-term acute care Medicare prospective payment system, CMS confirmed that it had awarded a contract to Research Triangle Institute, International (RTI) to examine recent recommendations made by the Medicare Payment Advisory Commission, or MedPAC, concerning how long-term acute care hospitals are defined and differentiated from other types of Medicare providers. MedPAC is an independent federal body that advises Congress on issues affecting the Medicare program. In its June 2004 Report to Congress, MedPAC recommended the adoption by CMS of new facility staffing and services criteria and patient clinical characteristics and treatment requirements for long-term acute care hospitals in order to ensure that only appropriate patients are admitted to these facilities. CMS anticipates making RTI's findings available in the proposed prospective payment system update to be published in early 2006. Although CMS has so far declined to impose the MedPAC recommended criteria, the agency has stated that if RTI's analysis suggests that changes should be made affecting long-term acute care hospital payments, discharges or certification criteria, statutory or regulatory modifications to implement these changes may be required. Failure to meet existing long-term acute care certification criteria or implementation of additional criteria that would limit the population of patients eligible for our hospitals' services could adversely affect our net operating revenues and profitability.

Nearly all of our long-term acute care hospitals operate as HIHs and as a result are subject to additional Medicare criteria that require certain indications of separateness from the host hospital. If any of our long-term acute care HIHs fail to meet the separateness requirements, they will be reimbursed at the lower general acute care hospital rate, which would likely cause our net operating revenues and profitability to decrease. See [Our Business Government Regulations Overview of U.S. and State Government Reimbursements Long-term acute care hospital Medicare reimbursement](#).

Implementation of modifications to the admissions policies for our inpatient rehabilitation facilities as required in order to achieve compliance with Medicare regulations may result in a loss of patient volume at these hospitals and, as a result, may reduce our future net operating revenues and profitability.

As of March 31, 2005, our four acute medical rehabilitation hospitals were certified by Medicare as inpatient rehabilitation facilities. Under the historic inpatient rehabilitation facility, or IRF, certification criteria that had been in effect since 1983, in order to qualify as an IRF, a hospital was required to satisfy

Table of Contents

certain operational criteria as well as demonstrate that, during its most recent 12-month cost reporting period, it served an inpatient population of whom at least 75% required intensive rehabilitation services for one or more of ten conditions specified in the regulations (referred to as the 75% test). In 2002, CMS became aware that its various contractors were using inconsistent methods to assess compliance with the 75% test and that many inpatient rehabilitation facilities were not in compliance with the 75% test. In response, in June 2002, CMS suspended enforcement of the 75% test and, on September 9, 2003, proposed modifications to the regulatory standards for certification as an IRF. Notwithstanding concerns stated by the industry and Congress in late 2003 and early 2004 about the adverse impact that CMS's proposed changes and renewed enforcement efforts might have on access to inpatient rehabilitation facility services, and notwithstanding Congressional requests that CMS delay implementation of or changes to the 75% test for additional study of clinically appropriate certification criteria, on May 7, 2004, CMS adopted a final rule that made significant changes to the certification standard. CMS temporarily lowered the 75% compliance threshold to 50%, with a gradual increase back to 75% over the course of a four-year period. CMS also expanded from 10 to 13 the number of medical conditions used to determine compliance with the 75% test (or any phase-in percentage) and finalized the conditions under which comorbidities may be used to satisfy the 75% test. Finally, CMS changed the timeframe used to determine a provider's compliance with the inpatient rehabilitation facility criteria including the 75% test so that any changes in a facility's certification based on compliance with the 75% test may be made effective in the cost reporting period immediately following the review period for determining compliance. Congress temporarily suspended enforcement of the 75% test when it enacted the Consolidated Appropriations Act, 2005, which requires the Secretary of Health and Human Services to respond within 60 days to a report by the Government Accountability Office, or GAO, on the standards for defining inpatient rehabilitation services before the Secretary may terminate a hospital's designation as an inpatient rehabilitation facility for failure to meet the 75% test. The GAO issued its report on April 22, 2005, and recommended that CMS, based on further research, refine the 75% test to describe more thoroughly the subgroups of patients within the qualifying conditions that are appropriate for care in an inpatient rehabilitation facility. The Secretary has not yet issued a formal response to the GAO report. The inpatient rehabilitation facilities we acquired as part of our Kessler acquisition in September 2003 may not have fully met the historic standard. If the revised 75% test is ultimately enforced without further modifications, in order to achieve compliance with the new certification standard, it may be necessary for us to implement more restrictive admissions policies at our inpatient rehabilitation facilities and not admit patients whose diagnoses fall outside the specified conditions. Such policies may result in decreased patient volumes, which could have a negative effect on the financial performance of these facilities. See [Our Business Government Regulations Overview of U.S. and State Government Reimbursements Inpatient rehabilitation facility Medicare reimbursement.](#)

Implementation of annual caps that limit the amounts that can be paid for outpatient therapy services rendered to any Medicare beneficiary may reduce our future net operating revenues and profitability.

Our outpatient rehabilitation clinics receive payments from the Medicare program under a fee schedule. Congress has established annual caps that limit the amounts that can be paid (including deductible and coinsurance amounts) for outpatient therapy services rendered to any Medicare beneficiary. These annual caps were to go into effect on January 1, 1999, however, after their adoption, Congress imposed a moratorium on the caps through 2002, and then re-imposed the moratorium for 2004 and 2005. Upon the expiration of the moratorium, we believe these therapy caps could have an adverse effect on the net operating revenues we generate from providing outpatient rehabilitation services to Medicare beneficiaries, to the extent that such patients receive services for which total payments would exceed the annual caps. For the year ended December 31, 2004, we received approximately 9% of our outpatient rehabilitation net operating revenues from Medicare. See [Our Business Government Regulations Overview of U.S. and State Government Reimbursements Outpatient rehabilitation services Medicare reimbursement.](#)

Table of Contents

If there are changes in the rates or methods of government reimbursements for our services, our net operating revenues and profitability could decline.

Approximately 48% of our net operating revenues for the year ended December 31, 2004 came from the highly regulated federal Medicare program. In recent years, through legislative and regulatory actions, the federal government has made substantial changes to various payment systems under the Medicare program. Additional changes to these payment systems, including modifications to the conditions on qualification for payment and the imposition of enrollment limitations on new providers, may be proposed or could be adopted, either in Congress or by CMS. Because of the possibility of adoption of these kinds of proposals, the availability, methods and rates of Medicare reimbursements for services of the type furnished at our facilities could change at any time. Some of these changes and proposed changes could adversely affect our business strategy, operations and financial results. In addition, there can be no assurance that any increases in Medicare reimbursement rates established by CMS will fully reflect increases in our operating costs.

We conduct business in a heavily regulated industry, and changes in regulations or violations of regulations may result in increased costs or sanctions that reduce our net operating revenues and profitability.

The healthcare industry is subject to extensive federal, state and local laws and regulations relating to: facility and professional licensure, including certificates of need;

conduct of operations, including financial relationships among healthcare providers, Medicare fraud and abuse, and physician self-referral;

addition of facilities and services and enrollment of newly developed facilities in the Medicare program; and

payment for services.

Recently, there have been heightened coordinated civil and criminal enforcement efforts by both federal and state government agencies relating to the healthcare industry. The ongoing investigations relate to, among other things, various referral practices, cost reporting, billing practices, physician ownership and joint ventures involving hospitals. In the future, different interpretations or enforcement of these laws and regulations could subject our current practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services and capital expenditure programs, increase our operating expenses and reduce our operating revenues. If we fail to comply with these extensive laws and government regulations, we could become ineligible to receive government program reimbursement, suffer civil or criminal penalties or be required to make significant changes to our operations. In addition, we could be forced to expend considerable resources responding to an investigation or other enforcement action under these laws or regulations. See Our Business Government Regulations.

Integrating SemperCare into our company structure may strain our resources and prove to be difficult.

On January 1, 2005, we acquired SemperCare, Inc., or SemperCare, which operated 17 long-term acute care hospitals in 11 states. Six of the SemperCare facilities are in markets that overlapped with other Select hospital markets. The expansion of our business and operations resulting from the recent SemperCare acquisition may strain our administrative, operational and financial resources. The continued integration of SemperCare into our business will require substantial time, effort, attention and dedication of management resources and may distract our management from our existing business in unpredictable ways and may take longer than anticipated. The integration process could create a number of potential challenges and adverse consequences for us, including the difficulty and expense of integrating acquired personnel into our existing business, the difficulty and expense of integrating SemperCare's billing and information systems with ours, the possible unexpected loss of key employees, customers or suppliers, a possible loss of net operating revenues or an increase in operating or other costs and the assumption of liabilities and exposure to unforeseen liabilities of SemperCare. Additionally, all of the SemperCare facilities are HIHs, and while we expect to transition these facilities to adapt to the new HIH regulations within a similar timeframe and using strategies similar to those

Table of Contents

that we will use to transition our existing hospitals, there can be no assurance that such transition will be successful. These types of challenges and uncertainties could have an adverse effect on our business, financial condition and results of operations. We may not be able to manage the combined operations and assets effectively or realize any anticipated benefits of the SemperCare acquisition, including a reduction of corporate overhead expenses.

Future acquisitions may use significant resources, may be unsuccessful and could expose us to unforeseen liabilities.

As part of our growth strategy, we may pursue acquisitions of specialty hospitals and outpatient rehabilitation clinics. Acquisitions may involve significant cash expenditures, debt incurrence, additional operating losses and expenses that could have a material adverse effect on our financial condition and results of operations. Acquisitions involve numerous risks, including:

the difficulty and expense of integrating acquired personnel into our business;

diversion of management's time from existing operations;

potential loss of key employees or customers of acquired companies; and

assumption of the liabilities and exposure to unforeseen liabilities of acquired companies, including liabilities for failure to comply with healthcare regulations.

We cannot assure you that we will succeed in obtaining financing for acquisitions at a reasonable cost, or that such financing will not contain restrictive covenants that limit our operating flexibility. We also may be unable to operate acquired hospitals and outpatient rehabilitation clinics profitably or succeed in achieving improvements in their financial performance.

Future cost containment initiatives undertaken by private third-party payors may limit our future net operating revenues and profitability.

Initiatives undertaken by major insurers and managed care companies to contain healthcare costs affect the profitability of our specialty hospitals and outpatient rehabilitation clinics. These payors attempt to control healthcare costs by contracting with hospitals and other healthcare providers to obtain services on a discounted basis. We believe that this trend may continue and may limit reimbursements for healthcare services. If insurers or managed care companies from whom we receive substantial payments reduce the amounts they pay for services, our profit margins may decline, or we may lose patients if we choose not to renew our contracts with these insurers at lower rates.

If we fail to maintain established relationships with the physicians in our markets, our net operating revenues may decrease.

Our success is, in part, dependent upon the admissions and referral practices of the physicians in the communities our hospitals and our outpatient rehabilitation clinics serve, and our ability to maintain good relations with these physicians. Physicians referring patients to our hospitals and clinics are generally not our employees and, in many of the markets that we serve, most physicians have admitting privileges at other hospitals and are free to refer their patients to other providers. If we are unable to successfully cultivate and maintain strong relationships with these physicians, our hospitals' admissions and clinics' businesses may decrease, and our net operating revenues may decline.

Shortages in qualified nurses or therapists could increase our operating costs significantly.

Our specialty hospitals are highly dependent on nurses for patient care and our outpatient rehabilitation clinics are highly dependant on therapists for patient care. The availability of qualified nurses and therapists nationwide has declined in recent years, and the salaries for nurses and therapists have risen accordingly. We cannot assure you we will be able to attract and retain qualified nurses or therapists in the future. Additionally,

Table of Contents

the cost of attracting and retaining nurses and therapists may be higher than we anticipate, and as a result, our profitability could decline.

Competition may limit our ability to acquire hospitals and clinics and adversely affect our growth.

We have historically faced limited competition in acquiring specialty hospitals and outpatient rehabilitation clinics, but we may face heightened competition in the future. Our competitors may acquire or seek to acquire many of the hospitals and clinics that would be suitable acquisition candidates for us. This could limit our ability to grow by acquisitions or make our cost of acquisitions higher and therefore decrease our profitability.

If we fail to compete effectively with other hospitals, clinics and healthcare providers, our net operating revenues and profitability may decline.

The healthcare business is highly competitive, and we compete with other hospitals, rehabilitation clinics and other healthcare providers for patients. If we are unable to compete effectively in the specialty hospital and outpatient rehabilitation businesses, our net operating revenues and profitability may decline. Many of our specialty hospitals operate in geographic areas where we compete with at least one other hospital that provides similar services. Our outpatient rehabilitation clinics face competition from a variety of local and national outpatient rehabilitation providers. Other outpatient rehabilitation clinics in markets we serve may have greater name recognition and longer operating histories than our clinics. The managers of these clinics may also have stronger relationships with physicians in their communities, which could give them a competitive advantage for patient referrals.

Our business operations could be significantly disrupted if we lose key members of our management team.

Our success depends to a significant degree upon the continued contributions of our senior officers and key employees, both individually and as a group. Our future performance will be substantially dependent on our ability to retain and motivate these individuals. The loss of the services of any of our senior officers or key employees, particularly our executive officers named in Management Executive Officers and Directors, could prevent us from successfully executing our business strategy and could have a material adverse affect on our results of operations.

Significant legal actions as well as the cost and possible lack of available insurance could subject us to substantial uninsured liabilities.

In recent years, physicians, hospitals and other healthcare providers have become subject to an increasing number of legal actions alleging malpractice, product liability or related legal theories. Many of these actions involve large claims and significant defense costs. We are also subject to lawsuits under a federal whistleblower statute designed to combat fraud and abuse in the healthcare industry. These lawsuits can involve significant monetary damages and award bounties to private plaintiffs who successfully bring the suits. See Our Business Legal Proceedings Other Legal Proceedings.

We maintain professional malpractice liability insurance and general liability insurance coverage. As a result of unfavorable pricing and availability trends in the professional liability insurance market and the insurance market in general, the cost and risk sharing components of professional liability coverage have changed dramatically. Many insurance underwriters have become more selective in the insurance limits and types of coverage they will provide as a result of rising settlement costs and the significant failures of some nationally known insurance underwriters. In some instances, insurance underwriters will no longer issue new policies in certain states that have a history of high medical malpractice awards. As a result, we have experienced substantial changes in our medical and professional malpractice insurance program. Among other things, in order to obtain malpractice insurance at a reasonable cost, we are required to assume substantial self-insured retentions for our professional liability claims. A self-insured retention is a minimum amount of damages and expenses (including legal fees) that we must pay for each claim. We use actuarial methods to

Table of Contents

determine the value of the losses that may occur within this self-insured retention level. Our insurance agreements require us to post letters of credit or set aside cash in a trust arrangement in an amount equal to the estimated losses that we assumed for previous policy years. Because of the high retention levels, we cannot predict with certainty the actual amount of the losses we will assume and pay. To the extent that subsequent claims information varies from loss estimates, the liabilities will be adjusted to reflect current loss data. There can be no assurance that in the future malpractice insurance will be available at a reasonable price or that we will not have to further increase our levels of self-insurance. In addition, our insurance coverage does not cover punitive damages and may not cover all claims against us. See Our Business Government Regulations Other Healthcare Regulations and Management s Discussion and Analysis of Financial Condition and Results of Operations Medical and Professional Malpractice Insurance.

Risks Related to the Notes

Our substantial indebtedness may limit the amount of cash flow that is available to invest in the ongoing needs of our business, which could prevent us from generating the future cash flow needed to fulfill our obligations under the notes.

We have a substantial amount of indebtedness. As of March 31, 2005, we had approximately \$1.5 billion of total indebtedness and a total debt to total capitalization ratio of 0.76 to 1.0.

Our indebtedness could have important consequences to you. For example, it:

requires us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, reducing the availability of our cash flow to fund working capital, capital expenditures, development activity, acquisitions and other general corporate purposes;

increases our vulnerability to adverse general economic or industry conditions;

limits our flexibility in planning for, or reacting to, changes in our business or the industries in which we operate;

makes us more vulnerable to increases in interest rates, as borrowings under our new senior secured credit facility are at variable rates;

limits our ability to obtain additional financing in the future for working capital or other purposes, such as raising the funds necessary to repurchase all notes tendered to us upon the occurrence of specified changes of control in our ownership; or

places us at a competitive disadvantage compared to our competitors that have less indebtedness.

See Capitalization, Unaudited Pro Forma Condensed Consolidated Financial Information, and Description of Certain Other Indebtedness Our New Senior Secured Credit Facility.

Despite our substantial level of indebtedness, we and our subsidiaries may be able to incur additional indebtedness. This could further exacerbate the risks described above.

We and our subsidiaries may be able to incur additional indebtedness in the future. Although our new senior secured credit facility and the indenture governing the notes each contain restrictions on the incurrence of additional indebtedness, these restrictions are subject to a number of qualifications and exceptions, and the indebtedness incurred in compliance with these restrictions could be substantial. Also, these restrictions do not prevent us or our subsidiaries from incurring obligations that do not constitute indebtedness. As of March 31, 2005, we had \$83.6 million of revolving loan availability under our new senior secured credit facility with \$16.4 million in outstanding letters of credit, all of which are senior to the notes. To the extent new debt is added to our and our subsidiaries currently anticipated debt levels, the substantial leverage risks described above would increase. See Description of the Exchange Notes and Description of Certain Other Indebtedness Our New Senior Secured Credit Facility.

Table of Contents

To service our indebtedness and meet our other ongoing liquidity needs, we will require a significant amount of cash. Our ability to generate cash depends on many factors beyond our control, including possible changes in government reimbursement rates or methods. If we cannot generate the required cash, we may not be able to make the required payments under the notes.

Our ability to make payments on our indebtedness, including the notes, and to fund our planned capital expenditures and our other ongoing liquidity needs will depend on our ability to generate cash in the future. Our future financial results will be subject to substantial fluctuations upon a significant change in government reimbursement rates or methods. We cannot assure you that our business will generate sufficient cash flow from operations to enable us to pay our indebtedness, including our indebtedness in respect of the notes, or to fund our other liquidity needs. Our inability to pay our debts would require us to pursue one or more alternative strategies, such as selling assets, refinancing or restructuring our indebtedness or selling equity capital. However, we cannot assure you that any alternative strategies will be feasible at the time or provide adequate funds to allow us to pay our debts as they come due and fund our other liquidity needs. Also, some alternative strategies would require the prior consent of our senior secured lenders, which we may not be able to obtain. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources and Description of Certain Other Indebtedness—Our New Senior Secured Credit Facility.

Your right to receive payments on the notes is junior to our senior indebtedness and the senior indebtedness of the subsidiary guarantors. Further, the notes and the subsidiary guarantees are effectively subordinated to all liabilities of our non-guarantor subsidiaries.

The notes and the subsidiary guarantees are subordinated to the prior payment in full of our and the subsidiary guarantors' respective current and future senior indebtedness. As of March 31, 2005, we had approximately \$782.9 million of indebtedness to which the notes would have been subordinated. Because of the subordination provisions of the notes, in the event of the bankruptcy, liquidation or dissolution of our company or any subsidiary guarantor, our assets or the assets of such subsidiary guarantor would be available to pay obligations under the notes only after all payments had been made on our senior indebtedness or the senior indebtedness of such subsidiary guarantor. Sufficient assets may not remain after all these payments have been made to make any payments on the notes. In addition, all payments on the notes and the subsidiary guarantees thereof will be prohibited in the event of a payment default on our senior indebtedness (including borrowings under our new senior secured credit facility) and, for limited periods, upon the occurrence of other defaults under our new senior secured credit facility.

The notes are structurally subordinated to all of the liabilities of our subsidiaries that do not guarantee the notes. In the event of a bankruptcy, liquidation or dissolution of any of our non-guarantor subsidiaries, holders of their debt, their trade creditors and holders of their preferred equity will generally be entitled to payment on their claims from assets of those subsidiaries before any assets are made available for distribution to us. Although the indenture governing the notes contains limitations on the incurrence of additional indebtedness and the issuance of preferred stock by us and our restricted subsidiaries, such limitation is subject to a number of significant exceptions. Moreover, the indenture governing the notes does not impose any limitation in the incurrence by our restricted subsidiaries of liabilities that do not constitute indebtedness under the indenture. The aggregate net operating revenues and income from operations for the three months ended March 31, 2005 of our subsidiaries that are not guaranteeing the notes were \$60.6 million and \$9.5 million, respectively, and at March 31, 2005, those subsidiaries had total assets and total liabilities of \$49.3 million and \$10.3 million, respectively. See Description of the Exchange Notes—Subordination and Description of the Exchange Notes—Certain Covenants—Incurrence of Indebtedness and Issuance of Disqualified Stock and Preferred Stock. See also Description of the Exchange Notes—Subsidiary Guarantees and the condensed consolidating financial information included in the notes to our consolidated financial statements included herein.

Table of Contents

The notes are not secured by our assets nor those of our subsidiaries and the lenders under our new senior secured credit facility are entitled to remedies available to a secured lender, which gives them priority over the note holders to collect amounts due to them.

In addition to being subordinated to all of our existing and future senior indebtedness, the notes and the related subsidiary guarantees are not secured by any of our or our subsidiaries' assets and therefore are effectively subordinated to the claims of our secured debt holders to the extent of the value of the assets securing our secured debt. Our obligations under our new senior secured credit facility are secured by, among other things, a first priority pledge of our capital stock and the capital stock of our domestic subsidiaries, up to 65% of the capital stock of certain of our foreign subsidiaries and by substantially all of the assets of our company and each of our existing and subsequently acquired or organized domestic subsidiaries. If we become insolvent or are liquidated, or if payment under our new senior secured credit facility or in respect of any other secured senior indebtedness is accelerated, the lenders under our new senior secured credit facility or holders of other secured senior indebtedness will be entitled to exercise the remedies available to a secured lender under applicable law (in addition to any remedies that may be available under documents pertaining to our new senior secured credit facility or the other senior debt). In addition, we and or the subsidiary guarantors may incur additional secured senior indebtedness, the holders of which are also entitled to the remedies available to a secured lender. See Description of Certain Other Indebtedness Our New Senior Secured Credit Facility and Description of the Exchange Notes.

Restrictions imposed by our new senior secured credit facility and the indenture governing the notes limit our ability to engage in or enter into business, operating and financing arrangements, which could prevent us from taking advantage of potentially profitable business opportunities.

The operating and financial restrictions and covenants in our debt instruments, including our new senior secured credit facility and the indenture governing the notes, may adversely affect our ability to finance our future operations or capital needs or engage in other business activities that may be in our interest. For example, our new senior secured credit facility restricts our and our subsidiaries' ability to, among other things:

incur or guarantee additional debt and issue or sell preferred stock;

pay dividends on, redeem or repurchase our capital stock;

make certain acquisitions or investments;

incur or permit to exist certain liens;

enter into transactions with affiliates;

merge, consolidate or amalgamate with another company;

transfer or otherwise dispose of assets;

redeem subordinated debt;

incur capital expenditures;

incur contingent obligations;

incur obligations that restrict the ability of our subsidiaries to make dividends or other payments to us; and

create or designate unrestricted subsidiaries.

The indenture governing the notes includes similar restrictions. See Description of the Exchange Notes. Our new senior secured credit facility also requires us to comply with certain financial covenants which become more

restrictive over time. Our ability to comply with these ratios may be affected by events beyond our control. A breach of any of these covenants or our inability to comply with the required financial ratios could result in a default under our new senior secured credit facility. In the event of any default under our new senior secured credit facility, the lenders under our new senior secured credit facility could elect to

Table of Contents

terminate borrowing commitments and declare all borrowings outstanding, together with accrued and unpaid interest and other fees, to be due and payable, to require us to apply all of our available cash to repay these borrowings or to prevent us from making debt service payments on the notes, any of which would be an event of default under the notes. See Description of the Exchange Notes and Description of Certain Other Indebtedness Our New Senior Secured Credit Facility.

We may not have the funds to purchase the notes upon a change of control as required by the indenture governing the notes.

If we were to experience a change of control as described under Description of the Exchange Notes, we would be required to make an offer to purchase all of the notes then outstanding at 101% of their principal amount, plus accrued and unpaid interest to the date of purchase. The source of funds for any purchase of the notes would be our available cash or cash generated from other sources, including borrowings, sales of assets, sales of equity or funds provided by our existing or new stockholders. We cannot assure you that any of these sources will be available or sufficient to make the required repurchase of the notes, and restrictions in our new senior secured credit facility may not allow such repurchases. Upon the occurrence of a change of control event, we may seek to refinance the debt outstanding under our new senior secured credit facility and the notes. However, it is possible that we will not be able to complete such refinancing on commercially reasonable terms or at all. In such event, we would not have the funds necessary to finance the required change of control offer. See Description of the Exchange Notes Repurchase at the Option of Holders Change of Control.

In addition, a change of control would be an event of default under our new senior secured credit facility. Any future credit agreement or other agreements relating to our senior debt to which we become a party may contain similar provisions. Our failure to purchase the notes upon a change of control under the indenture would constitute an event of default under the indenture. This default would, in turn, constitute an event of default under our new senior secured credit facility and may constitute an event of default under future senior debt, any of which may cause the related debt to be accelerated after any applicable notice or grace periods. If debt were to be accelerated, we might not have sufficient funds to repurchase the notes and repay the debt.

Federal and state statutes could allow courts, under specific circumstances, to void the subsidiary guarantees, subordinate claims in respect of the notes and require note holders to return payments received from subsidiary guarantors.

Under U.S. bankruptcy law and comparable provisions of state fraudulent transfer laws, a court could void a subsidiary guarantee or claims related to the notes or subordinate a subsidiary guarantee to all of our other debts or to all other debts of a subsidiary guarantor if, among other things, we or a subsidiary guarantor, at the time we or such subsidiary guarantor incurred the indebtedness evidenced by its subsidiary guarantee:

intended to hinder, delay or defraud any present or future creditor or received less than reasonably equivalent value or fair consideration for the incurrence of such indebtedness; and

the subsidiary guarantor was insolvent or rendered insolvent by reason of such incurrence;

the subsidiary guarantor was engaged in a business or transaction for which the subsidiary guarantor's remaining assets constituted unreasonably small capital; or

the subsidiary guarantor intended to incur, or believed that it would incur, debts beyond the subsidiary guarantor's ability to pay such debts as they mature.

In addition, a court could void any payment by a subsidiary guarantor pursuant to the notes or a subsidiary guarantee and require that payment to be returned to such subsidiary guarantor or to a fund for the benefit of the creditors of the subsidiary guarantor.

Table of Contents

The measures of insolvency for purposes of fraudulent transfer laws will vary depending upon the governing law in any proceeding to determine whether a fraudulent transfer has occurred. Generally, however, a subsidiary guarantor would be considered insolvent if:

the sum of its debts, including contingent liabilities, was greater than the fair saleable value of all of its assets;

the present fair saleable value of its assets was less than the amount that would be required to pay its probable liability on its existing debts, including contingent liabilities, as they become absolute and mature; or

it could not pay its debts as they become due.

On the basis of historical financial information, our operating history and other factors, we believe that, in connection with the issuance of the outstanding notes, we and each subsidiary guarantor, after giving effect to its subsidiary guarantee of the notes, were not rendered insolvent, did not have insufficient capital for the business in which we are or it is engaged and did not incur debts beyond our or its ability to pay such debts as they mature. There can be no assurance, however, as to what standard a court would apply in making such determinations or that a court would agree with our or the subsidiary guarantors' conclusions in this regard.

There may be no active trading market for the exchange notes.

The exchange notes will constitute a new issue of securities for which there will be no established trading market. We do not intend to list the exchange notes on any national securities exchange or to seek the admission of the exchange notes for quotation through the National Association of Securities Dealers Automated Quotation System. Although the initial purchasers advised us that they intend to make a market in the exchange notes, they are not obligated to do so and may discontinue such market making activity at any time without notice. In addition, market making activity will be subject to the limits imposed by the Securities Act and the Securities Exchange Act of 1934, as amended, or the Exchange Act, and may be limited during the exchange offer and the pendency of any shelf registration statement. There can be no assurance as to the development or liquidity of any market for the exchange notes, the ability of the holders of the exchange notes to sell their exchange notes or the price at which the holders would be able to sell their exchange notes.

The market price for the notes may be volatile.

Historically, the market for non-investment grade debt has been subject to disruptions that have caused substantial volatility in the prices of securities similar to the notes. The market for the notes, if any, may be subject to similar disruptions. Any such disruptions may adversely affect the value of your notes.

Risk Relating to Our Structure

We depend on distributions from our operating subsidiaries to pay the interest on the notes. Contractual or legal restrictions applicable to our subsidiaries could limit distributions from them.

We are a holding company and derive all of our operating income from, and hold substantially all of our assets through, our subsidiaries. The effect of this structure is that we depend on the earnings of our subsidiaries, and the distribution, loan or other payment to us of these earnings to meet our obligations, including those under our new senior secured credit facility, the notes offered hereby and any of our other debt obligations. Our subsidiaries' ability to make payments to us depends upon their operating results and is also subject to applicable law and contractual restrictions. Some of our subsidiaries may become subject to loan agreements and indentures that restrict the sale of assets and significantly restrict or prohibit the payment of dividends or the making of distributions, loans or other payments to stockholders and members. The indenture governing the notes permits our subsidiaries to incur debt with similar prohibitions and restrictions in the future. Provisions of law, like those requiring that dividends be paid only out of surplus, and provisions of our senior indebtedness can also limit the ability of our subsidiaries to make distributions, loans or other payments to us. See "Description of Certain Other Indebtedness - Our New Senior Secured Credit Facility."

Table of Contents

The interests of our principal stockholder may conflict with your interests as a holder of the notes.

An investor group led by our sponsors owns substantially all of the outstanding equity securities of our parent. Welsh Carson controls a majority of the voting power of such outstanding equity securities and therefore ultimately controls all of our affairs and policies, including the election of our board of directors, the approval of certain actions such as amending our charter, commencing bankruptcy proceedings and taking certain corporate actions (including, without limitation, incurring debt, issuing stock, selling assets and engaging in mergers and acquisitions), and appointing members of our management. Welsh Carson's interests in exercising control over our business may conflict with your interests as a holder of the notes.

Table of Contents

INDUSTRY AND MARKET DATA

Throughout this prospectus we rely on and refer to information and statistics regarding the healthcare industry. We obtained this information and these statistics from various third-party sources, discussions with our customers and our own internal estimates. We believe that these sources and estimates are reliable, but we have not independently verified them and cannot guarantee their accuracy or completeness.

FORWARD LOOKING STATEMENTS

This prospectus contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 regarding, among other things, our financial condition, results of operations, plans, objectives, future performance and business. All statements contained in this document other than historical information are forward-looking statements. Forward-looking statements include, but are not limited to, statements that represent our beliefs concerning future operations, strategies, financial results or other developments, and contain words and phrases such as may, expects, believes, anticipates, estimates, should, or similar expressions. Because these forward-looking statements are based on estimates and assumptions that are subject to significant business, economic and competitive uncertainties, many of which are beyond our control or are subject to change, actual results could be materially different. Although we believe that our plans, intentions and expectations reflected in or suggested by these forward-looking statements are reasonable, we cannot assure you that we will achieve or realize these plans, intentions or expectations. Forward-looking statements are inherently subject to risks, uncertainties and assumptions. Important factors that could cause actual results to differ materially from the forward-looking statements include, but are not limited to:

compliance with the Medicare hospital within a hospital regulation changes will require increased capital expenditures and may have an adverse effect on our future net operating revenues and profitability;

the failure of our long-term acute care hospitals to maintain their status as such may cause our net operating revenues and profitability to decline;

the failure of our facilities operated as hospitals within hospitals to qualify as hospitals separate from their host hospitals may cause our net operating revenues and profitability to decline;

implementation of modifications to the admissions policies for our inpatient rehabilitation facilities, as required to achieve compliance with Medicare guidelines, may result in a loss of patient volume at these hospitals and, as a result, may reduce our future net operating revenues and profitability;

implementation of annual caps that limit the amounts that can be paid for outpatient therapy services rendered to any Medicare beneficiary may reduce our future net operating revenues and profitability;

additional changes in government reimbursement for our services may have an adverse effect on our future net operating revenues and profitability;

changes in applicable regulations or a government investigation or assertion that we have violated applicable regulations may result in increased costs or sanctions that reduce our net operating revenues and profitability;

integration of recently acquired operations and future acquisitions may prove difficult or unsuccessful, use significant resources or expose us to unforeseen liabilities;

private third-party payors for our services may undertake future cost containment initiatives that limit our future net operating revenues and profitability;

the failure to maintain established relationships with the physicians in our markets could reduce our net operating revenues and profitability;

shortages in qualified nurses or therapists could increase our operating costs significantly;

Table of Contents

competition may limit our ability to grow and result in a decrease in our net operating revenues and profitability;

the loss of key members of our management team could significantly disrupt our operations; and

the effect of claims asserted against us or lack of adequate available insurance could subject us to substantial uninsured liabilities.

Consequently, such forward-looking statements should be regarded solely as our current plans, estimates and beliefs. You should review carefully the section captioned "Risk Factors" in this prospectus for a more complete discussion of the risks of an investment in the notes.

Table of Contents

THE EXCHANGE OFFER

General

Concurrently with the sale of the outstanding notes on February 24, 2005, we entered into an exchange and registration rights agreement with the initial purchasers of the outstanding notes, which requires us to file a registration statement under the Securities Act with respect to the exchange notes and, upon the effectiveness of the registration statement, offer to the holders of the outstanding notes the opportunity to exchange their outstanding notes for a like principal amount of exchange notes. The exchange notes will be issued without a restrictive legend and generally may be reoffered and resold without registration under the Securities Act. The exchange and registration rights agreement further provides that we must (i) file on or prior to 150 days, and use commercially reasonable efforts to cause to become effective on or prior to 240 days, from the date of the original issue of the outstanding notes, the registration statement of which this prospectus is a part with respect to the exchange of the outstanding notes for the exchange notes to be issued in the exchange offer and (ii) use commercially reasonable efforts to cause the exchange offer to be completed on or prior to 270 days from the original issue of the outstanding notes.

Except as described below, upon the completion of the exchange offer, our obligations with respect to the registration of the outstanding notes and the exchange notes will terminate. A copy of the exchange and registration rights agreement has been filed as an exhibit to the registration statement of which this prospectus is a part. Following the completion of the exchange offer, holders of outstanding notes not tendered will not have any further registration rights other than as set forth in the paragraphs below, and the outstanding notes will continue to be subject to certain restrictions on transfer.

In order to participate in the exchange offer, a holder must represent to us, among other things, that:

the exchange notes acquired pursuant to the exchange offer are being obtained in the ordinary course of business of the holder;

the holder does not have an arrangement or understanding with any person to participate in the distribution of the exchange notes;

the holder is not an affiliate, as defined under Rule 405 under the Securities Act, of Select; and

if the holder is a broker-dealer that will receive exchange notes for its own account in exchange for outstanding notes that were acquired as a result of market-making or other trading activities, then the holder will deliver a prospectus in connection with any resale of such exchange notes.

Under certain circumstances specified in the exchange and registration rights agreement, we may be required to file a shelf registration statement covering resales of the outstanding notes pursuant to Rule 415 under the Securities Act.

Based on an interpretation by the SEC's staff set forth in no-action letters issued to third parties unrelated to us, we believe that, with the exceptions set forth below, the exchange notes issued in the exchange offer may be offered for resale, resold and otherwise transferred by the holder of exchange notes without compliance with the registration and prospectus delivery requirements of the Securities Act, unless the holder:

is an affiliate, within the meaning of Rule 405 under the Securities Act, of Select;

is a broker-dealer who purchased outstanding notes directly from us for resale under Rule 144A or Regulation S or any other available exemption under the Securities Act;

acquired the exchange notes other than in the ordinary course of the holder's business;

has an arrangement with any person to engage in the distribution of the exchange notes; or

is prohibited by any law or policy of the SEC from participating in the exchange offer.

Any holder who tenders in the exchange offer for the purpose of participating in a distribution of the exchange notes cannot rely on this interpretation by the SEC's staff and must comply with the registration and

27

Table of Contents

prospectus delivery requirements of the Securities Act in connection with a secondary resale transaction. Each broker-dealer that receives exchange notes for its own account in exchange for outstanding notes, where such outstanding notes were acquired by such broker-dealer as a result of market making activities or other trading activities, must acknowledge that it will deliver a prospectus in connection with any resale of such exchange note. See Plan of Distribution. Broker-dealers who acquired outstanding notes directly from us and not as a result of market making activities or other trading activities may not rely on the staff's interpretations discussed above or participate in the exchange offer, and must comply with the prospectus delivery requirements of the Securities Act in order to sell the outstanding notes.

Terms of the Exchange Offer

Upon the terms and subject to the conditions set forth in this prospectus and in the letter of transmittal, we will accept any and all outstanding notes validly tendered and not withdrawn prior to 5:00 p.m., New York City time, on July 26, 2005, or such date and time to which we extend the offer. We will issue \$1,000 in principal amount of exchange notes in exchange for each \$1,000 principal amount of outstanding notes accepted in the exchange offer. Holders may tender some or all of their outstanding notes pursuant to the exchange offer. However, outstanding notes may be tendered only in integral multiples of \$1,000 in principal amount.

The exchange notes will evidence the same debt as the outstanding notes and will be issued under the terms of, and entitled to the benefits of, the indenture relating to the outstanding notes.

As of the date of this prospectus, \$660.0 million in aggregate principal amount of outstanding notes were outstanding, and there was one registered holder, a nominee of The Depository Trust Company. This prospectus, together with the letter of transmittal, is being sent to the registered holder and to others believed to have beneficial interests in the outstanding notes. We intend to conduct the exchange offer in accordance with the applicable requirements of the Exchange Act and the rules and regulations of the SEC promulgated under the Exchange Act.

We will be deemed to have accepted validly tendered outstanding notes when, as and if we have given oral or written notice thereof to U.S. Bank Trust National Association, the exchange agent. The exchange agent will act as agent for the tendering holders for the purpose of receiving the exchange notes from us. If any tendered outstanding notes are not accepted for exchange because of an invalid tender, the occurrence of certain other events set forth under the heading Conditions to the Exchange Offer, certificates for any such unaccepted outstanding notes will be returned, without expense, to the tendering holder of those outstanding notes promptly after the expiration date unless the exchange offer is extended.

Holders who tender outstanding notes in the exchange offer will not be required to pay brokerage commissions or fees or, subject to the instructions in the letter of transmittal, transfer taxes with respect to the exchange of outstanding notes in the exchange offer. We will pay all charges and expenses, other than certain applicable taxes, applicable to the exchange offer. See Fees and Expenses.

Expiration Date; Extensions; Amendments

The expiration date shall be 5:00 p.m., New York City time, on July 26, 2005, unless we, in our sole discretion, extend the exchange offer, in which case the expiration date shall be the latest date and time to which the exchange offer is extended. In order to extend the exchange offer, we will notify the exchange agent and each registered holder of any extension by oral or written notice prior to 9:00 a.m., New York City time, on the next business day after the previously scheduled expiration date and will also disseminate notice of any extension by press release or other public announcement prior to 9:00 a.m., New York City time on such date. We reserve the right, in our sole discretion:

to delay accepting any outstanding notes, to extend the exchange offer or, if any of the conditions set forth under Conditions to the Exchange Offer shall not have been satisfied, to terminate the exchange offer, by giving oral or written notice of that delay, extension or termination to the exchange agent, or

to amend the terms of the exchange offer in any manner.

Table of Contents

In the event that we make a fundamental change to the terms of the exchange offer, we will file a post-effective amendment to the registration statement. In the event that we make a material change in the exchange offer, including the waiver of a material condition, we will extend the expiration date of the exchange offer so that at least five business days remain in the exchange offer following notice of the material change.

Procedures for Tendering

Only a holder of outstanding notes may tender the outstanding notes in the exchange offer. Except as set forth under Book-Entry Transfer, to tender in the exchange offer a holder must complete, sign and date the letter of transmittal, or a copy of the letter of transmittal, have the signatures on the letter of transmittal guaranteed if required by the letter of transmittal and mail or otherwise deliver the letter of transmittal or copy to the exchange agent prior to the expiration date. In addition:

certificates for the outstanding notes must be received by the exchange agent along with the letter of transmittal prior to the expiration date, or

a timely confirmation of a book-entry transfer, or a book-entry confirmation, of the outstanding notes, if that procedure is available, into the exchange agent's account at The Depository Trust Company, which we refer to as the book-entry transfer facility, following the procedure for book-entry transfer described below, must be received by the exchange agent prior to the expiration date, or you must comply with the guaranteed delivery procedures described below.

To be tendered effectively, the letter of transmittal and the required documents must be received by the exchange agent at the address set forth under Exchange Agent prior to the expiration date.

Your tender, if not withdrawn prior to 5:00 p.m., New York City time, on the expiration date, will constitute an agreement between you and us in accordance with the terms and subject to the conditions set forth herein and in the letter of transmittal.

The method of delivery of outstanding notes and the letter of transmittal and all other required documents to the exchange agent is at your election and risk. Instead of delivery by mail, it is recommended that you use an overnight or hand delivery service. In all cases, sufficient time should be allowed to assure delivery to the exchange agent before the expiration date. No letter of transmittal or outstanding notes should be sent to us. You may request your broker, dealer, commercial bank, trust company or nominee to effect these transactions for you.

Any beneficial owner whose outstanding notes are registered in the name of a broker, dealer, commercial bank, trust company, or other nominee and who wishes to tender should contact the registered holder promptly and instruct the registered holder to tender on the beneficial owner's behalf. If the beneficial owner wishes to tender on its own behalf, the beneficial owner must, prior to completing and executing the letter of transmittal and delivering the owner's outstanding notes, either make appropriate arrangements to register ownership of the outstanding notes in the beneficial owner's name or obtain a properly completed bond power from the registered holder. The transfer of registered ownership may take considerable time.

Signatures on a letter of transmittal or a notice of withdrawal, as the case may be, must be guaranteed by an eligible guarantor institution within the meaning of Rule 17Ad-15 under the Exchange Act unless outstanding notes tendered pursuant thereto are tendered:

by a registered holder who has not completed the box entitled Special Issuance Instruction or Special Delivery Instructions on the letter of transmittal, or

for the account of an eligible guarantor institution.

If signatures on a letter of transmittal or a notice of withdrawal, as the case may be, are required to be guaranteed, the guarantee must be by any eligible guarantor institution that is a member of or participant in the Securities Transfer Agents Medallion Program, the New York Stock Exchange Medallion Signature Program or an eligible guarantor institution.

Table of Contents

If the letter of transmittal is signed by a person other than the registered holder of any outstanding notes listed in the letter of transmittal, the outstanding notes must be endorsed or accompanied by a properly completed bond power, signed by the registered holder as that registered holder's name appears on the outstanding notes.

If the letter of transmittal or any outstanding notes or bond powers are signed by any trustee, executor, administrator, guardian, attorney-in-fact or officer, such person should so indicate when signing, and evidence satisfactory to us of their authority to so act must be submitted with the letter of transmittal unless waived by us.

All questions as to the validity, form, eligibility, including time of receipt, acceptance, and withdrawal of tendered outstanding notes will be determined by us in our sole discretion, which determination will be final and binding. We reserve the absolute right to reject any and all outstanding notes not properly tendered or any outstanding notes our acceptance of which would, in the opinion of our counsel, be unlawful. We also reserve the right to waive any defects, irregularities or conditions of tender as to particular outstanding notes. Our interpretation of the terms and conditions of the exchange offer, including the instructions in the letter of transmittal, will be final and binding on all parties. Unless waived, any defects or irregularities in connection with tenders of outstanding notes must be cured within such time as we shall determine. Although we intend to notify holders of defects or irregularities with respect to tenders of outstanding notes, neither we, the exchange agent, nor any other person shall incur any liability for failure to give that notification. Tendere of outstanding notes will not be deemed to have been made until such defects or irregularities have been cured or waived. Any outstanding notes received by the exchange agent that are not properly tendered and as to which the defects or irregularities have not been cured or waived will be returned by the exchange agent to the tendering holders, unless otherwise provided in the letter of transmittal, promptly following the expiration date, unless the exchange offer is extended.

In addition, we reserve the right in our sole discretion to purchase or make offers for any outstanding notes that remain outstanding after the expiration date or, as set forth under Conditions to the Exchange Offer, to terminate the exchange offer and, to the extent permitted by applicable law, purchase outstanding notes in the open market, in privately negotiated transactions, or otherwise. The terms of any such purchases or offers could differ from the terms of the exchange offer.

In all cases, issuance of exchange notes for outstanding notes that are accepted for exchange in the exchange offer will be made only after timely receipt by the exchange agent of certificates for such outstanding notes or a timely book-entry confirmation of such outstanding notes into the exchange agent's account at the book-entry transfer facility, a properly completed and duly executed letter of transmittal or, with respect to The Depository Trust Company and its participants, electronic instructions in which the tendering holder acknowledges its receipt of and agreement to be bound by the letter of transmittal, and all other required documents. If any tendered outstanding notes are not accepted for any reason set forth in the terms and conditions of the exchange offer or if outstanding notes are submitted for a greater principal amount than the holder desires to exchange, such unaccepted or non-exchanged outstanding notes will be returned without expense to the tendering holder or, in the case of outstanding notes tendered by book-entry transfer into the exchange agent's account at the book-entry transfer facility according to the book-entry transfer procedures described below, those non-exchanged outstanding notes will be credited to an account maintained with that book-entry transfer facility, in each case, promptly after the expiration or termination of the exchange offer.

Each broker-dealer that receives exchange notes for its own account in exchange for outstanding notes, where those outstanding notes were acquired by such broker-dealer as a result of market making activities or other trading activities, must acknowledge that it will deliver a prospectus in connection with any resale of those exchange notes. See Plan of Distribution.

Book-Entry Transfer

The exchange agent will make a request to establish an account with respect to the outstanding notes at the book-entry transfer facility for purposes of the exchange offer promptly after the date of this prospectus, and any financial institution that is a participant in the book-entry transfer facility's systems may make book-

Table of Contents

entry delivery of outstanding notes being tendered by causing the book-entry transfer facility to transfer such outstanding notes into the exchange agent's account at the book-entry transfer facility in accordance with that book-entry transfer facility's procedures for transfer. However, although delivery of outstanding notes may be effected through book-entry transfer at the book-entry transfer facility, the letter of transmittal or copy of the letter of transmittal, with any required signature guarantees and any other required documents, must, in any case other than as set forth in the following paragraph, be transmitted to and received by the exchange agent at the address set forth under Exchange Agent on or prior to the expiration date or the guaranteed delivery procedures described below must be complied with.

The Depository Trust Company's Automated Tender Offer Program is the only method of processing exchange offers through The Depository Trust Company. To accept the exchange offer through the Automated Tender Offer Program, participants in The Depository Trust Company must send electronic instructions to The Depository Trust Company through The Depository Trust Company's communication system instead of sending a signed, hard copy letter of transmittal. The Depository Trust Company is obligated to communicate those electronic instructions to the exchange agent. To tender outstanding notes through the Automated Tender Offer Program, the electronic instructions sent to The Depository Trust Company and transmitted by The Depository Trust Company to the exchange agent must contain the character by which the participant acknowledges its receipt of and agrees to be bound by the letter of transmittal.

Guaranteed Delivery Procedures

If a registered holder of the outstanding notes desires to tender outstanding notes and the outstanding notes are not immediately available, or time will not permit that holder's outstanding notes or other required documents to reach the exchange agent prior to 5:00 p.m., New York City time, on the expiration date, or the procedure for book-entry transfer cannot be completed on a timely basis, a tender may be effected if:

the tender is made through an eligible guarantor institution;

prior to 5:00 p.m., New York City time, on the expiration date, the exchange agent receives from that eligible guarantor institution a properly completed and duly executed letter of transmittal or a facsimile of a duly executed letter of transmittal and notice of guaranteed delivery, substantially in the form provided by us, by telegram, fax transmission, mail or hand delivery, setting forth the name and address of the holder of outstanding notes and the amount of the outstanding notes tendered and stating that the tender is being made by guaranteed delivery, the certificates for all physically tendered outstanding notes, in proper form for transfer, or a book-entry confirmation, as the case may be, will be deposited by the eligible guarantor institution with the exchange agent; and

the certificates for all physically tendered outstanding notes, in proper form for transfer, or a book-entry confirmation, as the case may be, are received by the exchange agent within five business days after the date of execution of the notice of guaranteed delivery.

Withdrawal Rights

Tenders of outstanding notes may be withdrawn at any time prior to 5:00 p.m., New York City time, on the expiration date.

For a withdrawal of a tender of outstanding notes to be effective, a written or, for The Depository Trust Company participants, electronic Automated Tender Offer Program transmission, notice of withdrawal, must be received by the exchange agent at its address set forth under Exchange Agent prior to 5:00 p.m., New York City time, on the expiration date. Any such notice of withdrawal must:

specify the name of the person having deposited the outstanding notes to be withdrawn, whom we refer to as the depositor;

identify the outstanding notes to be withdrawn, including the certificate number or numbers and principal amount of such outstanding notes;

Table of Contents

be signed by the holder in the same manner as the original signature on the letter of transmittal by which such outstanding notes were tendered, including any required signature guarantees, or be accompanied by documents of transfer sufficient to have the trustee register the transfer of such outstanding notes into the name of the person withdrawing the tender; and

specify the name in which any such outstanding notes are to be registered, if different from that of the depositor.

All questions as to the validity, form, eligibility and time of receipt of such notices will be determined by us, whose determination shall be final and binding on all parties. Any outstanding notes so withdrawn will be deemed not to have been validly tendered for exchange for purposes of the exchange offer. Any outstanding notes which have been tendered for exchange, but which are not exchanged for any reason, will be returned to the holder of those outstanding notes without cost to that holder promptly after withdrawal, rejection of tender, or termination of the exchange offer. Properly withdrawn outstanding notes may be retendered by following one of the procedures under

Procedures for Tendering at any time on or prior to the expiration date.

Conditions to the Exchange Offer

Notwithstanding any other provision of the exchange offer, we will not be required to accept for exchange, or to issue exchange notes in exchange for, any outstanding notes and may terminate or amend the exchange offer if at any time before the expiration of the exchange offer, we determine that the exchange offer violates applicable law, any applicable interpretation of the staff of the SEC or any order of any governmental agency or court of competent jurisdiction.

The foregoing conditions are for our sole benefit and may be asserted by us regardless of the circumstances giving rise to any such condition or may be waived by us in whole or in part at any time and from time to time. The failure by us at any time to exercise any of the foregoing rights shall not be deemed a waiver of any of those rights and each of those rights shall be deemed an ongoing right which may be asserted at any time and from time to time.

In addition, we will not accept for exchange any outstanding notes tendered, and no exchange notes will be issued in exchange for those outstanding notes, if at such time any stop order shall be threatened or in effect with respect to the registration statement of which this prospectus constitutes a part or the qualification of the indenture under the Trust Indenture Act of 1939. In any of those events we are required to use every reasonable effort to obtain the withdrawal of any stop order at the earliest possible time.

Effect of Not Tendering

Holders of outstanding notes who do not exchange their outstanding notes for exchange notes in the exchange offer will remain subject to the restrictions on transfer of such outstanding notes:

as set forth in the legend printed on the outstanding notes as a consequence of the issuance of the outstanding notes pursuant to the exemptions from, or in transactions not subject to, the registration requirements of the Securities Act and applicable state securities laws; and

otherwise set forth in the prospectus distributed in connection with the private offering of the outstanding notes.

Exchange Agent

All executed letters of transmittal should be directed to the exchange agent. U.S. Bank Trust National Association has been appointed as exchange agent for the exchange offer. Questions, requests for assistance

Table of Contents

and requests for additional copies of this prospectus or of the letter of transmittal should be directed to the exchange agent addressed as follows:

By Mail, Hand Delivery or Facsimile:

U.S. Bank Trust National Association
Specialized Finance Group
60 Livingston Avenue
St. Paul, MN 55107
Facsimile: (651) 495-8158

Originals of all documents sent by facsimile should be sent promptly by registered or certified mail, by hand or by overnight delivery service.

Fees and Expenses

We will not make any payments to brokers, dealers or others soliciting acceptances of the exchange offer. The principal solicitation is being made by mail; however, additional solicitations may be made in person or by telephone by our officers and employees. The estimated cash expenses to be incurred in connection with the exchange offer will be paid by us and will include fees and expenses of the exchange agent, accounting, legal, printing and related fees and expenses.

Transfer Taxes

Holders who tender their outstanding notes for exchange will not be obligated to pay any transfer taxes in connection with that tender or exchange, except that holders who instruct us to register exchange notes in the name of, or request that outstanding notes not tendered or not accepted in the exchange offer be returned to, a person other than the registered tendering holder will be responsible for the payment of any applicable transfer tax on those outstanding notes.

THE TRANSACTIONS

On February 24, 2005, EGL Acquisition Corp. was merged with and into Select, with Select continuing as the surviving corporation and a wholly owned subsidiary of Select Medical Holdings Corporation. Select Medical Holdings Corporation was formally known as EGL Holding Company and is referred to in this prospectus as Holdings. The merger was completed pursuant to an agreement and plan of merger, dated as of October 17, 2004, among EGL Acquisition Corp., Holdings and Select. Holdings and EGL Acquisition Corp. were Delaware corporations formed by Welsh Carson for purposes of engaging in the merger and the related transactions described below.

Upon the consummation of the merger, Select became a wholly owned subsidiary of Holdings and all of the capital stock of Holdings was owned by an investor group that includes our sponsors, Welsh Carson and Thoma Cressey, and certain other rollover investors that participated in the merger. We refer to those other investors as the continuing investors. Our continuing investors include Rocco A. Ortenzio, our Executive Chairman and the chairman of our board of directors, Robert A. Ortenzio, our Chief Executive Officer and a member of our board of directors, certain other investors who are members of or affiliated with the Ortenzio family, certain individuals affiliated with Welsh Carson, including Russell L. Carson, a member of our board of directors and a founding general partner of Welsh, Carson, Anderson & Stowe, Bryan C. Cressey, a member of our board of directors and a founding partner of Thoma Cressey, various investment funds affiliated with Thoma Cressey, Patricia A. Rice, our President and Chief Operating Officer, Martin F. Jackson, our Senior Vice President and Chief Financial Officer, S. Frank Fritsch, our Senior Vice President, Human Resources, Michael E. Tarvin, our Senior Vice President, General Counsel and Secretary, James J. Talalai, our Senior Vice President and Chief Information Officer, and Scott A. Romberger, our Vice President, Controller and Chief Accounting Officer. Immediately prior to the merger, shares of our common stock which were owned by our continuing investors were contributed to Holdings in exchange for equity securities of Holdings. For purposes of such exchange, these rollover shares were valued at \$152.0 million in the aggregate, or \$18.00 per share (the per share merger consideration). Upon consummation of the merger, these rollover shares were cancelled without payment of any merger consideration.

The amount of funds and rollover equity used to consummate the Transactions was \$2,443.1 million, including:

\$1,827.7 million to pay our then existing stockholders (other than rollover stockholders) and option holders all amounts due under the merger agreement;

\$152.0 million of rollover equity from our continuing investors;

\$344.2 million to repay existing indebtedness; and

\$119.2 million to pay related fees and expenses, including premiums, consent fees and interest payable in connection with the tender offers and consent solicitations for our existing senior subordinated notes.

The Transactions were financed by:

a cash equity investment in Holdings of \$570.0 million by an investor group led by our sponsors (the net proceeds of which were contributed by Holdings to us) and a rollover equity investment in Holdings of \$152.0 million by our continuing investors;

Holdings issuance and sale of senior subordinated notes, preferred stock and common stock to WCAS Capital Partners IV, L.P., an investment fund affiliated with Welsh Carson, Rocco A. Ortenzio, Robert A. Ortenzio and certain other investors who are members of or affiliated with the Ortenzio family, for an aggregate purchase price of \$150.0 million (the net proceeds of which were contributed by Holdings to us);

borrowings by us of \$580.0 million in term loans and \$200.0 million in revolving loans under our new senior secured credit facility;

existing cash on hand of \$131.1 million; and

the issuance of \$660.0 million in aggregate principal amount of the outstanding notes.

Table of Contents

In connection with the merger, we commenced tender offers to acquire all of our 9¹/₂% senior subordinated notes due 2009 and all of our 7¹/₂% senior subordinated notes due 2013. In connection with each such tender offer we sought consents to eliminate substantially all of the restrictive covenants and make other amendments to the indentures governing such notes. Upon completion of the tender offers on February 24, 2005, holders of all of our 7¹/₂% senior subordinated notes and holders of approximately 96.7% of our 9¹/₂% senior subordinated notes had delivered consents and tendered their notes in connection with such tender offers and consent solicitations.

As a result of the Transactions, the majority of our assets and liabilities were adjusted to their fair value as of February 25, 2005. The excess of the total purchase price over the fair value of our tangible and identifiable intangible assets was allocated to goodwill, which is the subject of an annual impairment test. Additionally, pursuant to Financial Accounting Standards Board Emerging Issues Task Force Issue No. 88-16 Basis in Leveraged Buyout Transactions, a portion of the equity related to our continuing stockholders was recorded at the stockholder's predecessor basis and a corresponding portion of the fair value of the acquired assets was reduced accordingly. By definition, our statements of financial position and results of operations subsequent to the Transactions are not comparable to the same statements for the periods prior to the Transactions due to the resulting change in basis. See Unaudited Pro Forma Condensed Consolidated Financial Information.

Table of Contents**USE OF PROCEEDS**

This exchange offer is intended to satisfy certain of our obligations under the exchange and registration rights agreement, dated February 24, 2005, by and among us and the initial purchasers of the outstanding notes. We will not receive any proceeds from the issuance of the exchange notes in the exchange offer. In exchange for each of the exchange notes, we will receive outstanding notes in like principal amount. We will retire or cancel all of the outstanding notes tendered in the exchange offer. Accordingly, issuance of the exchange notes will not result in any change in our capitalization.

CAPITALIZATION

The following table sets forth our capitalization as of March 31, 2005 on an actual basis. You should read this table in conjunction with our unaudited and audited consolidated financial statements and the related notes thereto included in this prospectus.

	As of March 31, 2005
	(Dollars in millions)
Cash and cash equivalents	\$ 19.3
Debt:	
New revolving credit facility(1)	200.0
New term loan facility(1)	580.0
9 ¹ / ₂ % senior subordinated notes due 2009	5.8
Outstanding notes	660.0
Other debt and capital leases	4.3
Total debt	1,450.1
Total stockholders' equity	449.6
Total capitalization	\$ 1,899.7

- (1) Total revolving loan availability under our new senior secured credit facility is \$300.0 million. Upon consummation of the Transactions, we borrowed \$200.0 million in revolving loans to provide a portion of the funds required to consummate the Transactions. In addition, approximately \$16.4 million of letters of credit were outstanding under our new senior secured credit facility.

Table of Contents**SELECTED HISTORICAL CONSOLIDATED FINANCIAL DATA**

You should read the following selected historical consolidated financial data in conjunction with our consolidated financial statements and the accompanying notes. You should also read Management's Discussion and Analysis of Financial Condition and Results of Operations. All of these materials are contained in this prospectus. The data as of December 31, 2000, 2001, 2002, 2003 and 2004 and for the years ended December 31, 2000, 2001, 2002, 2003 and 2004 have been derived from consolidated financial statements audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Consolidated balance sheets at December 31, 2003 and 2004 and the related statements of operations, stockholders' equity and cash flows for the years ended December 31, 2002, 2003 and 2004 and the related notes appear elsewhere in this prospectus. The data for the three months ended March 31, 2004, the period from January 1, 2005 through February 24, 2005 and the period from February 25, 2005 through March 31, 2005 have been derived from unaudited consolidated financial statements also contained in this prospectus and which, in the opinion of management, include all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results for the unaudited interim period. By definition, our statements of financial position and results of operations subsequent to the Transactions are not comparable to the same statements for the periods prior to the Transactions due to the resulting change in basis.

(1) Operating expenses include cost of services, general and administrative expenses and bad debt expenses.

footnotes continued on following page

Table of Contents

- (2) Consists of stock compensation expense related to the repurchase of outstanding stock options in the Predecessor period of January 1, 2005 through February 24, 2005 and compensation expenses related to restricted stock and a warrant that were issued in the Successor period of February 25, 2005 through March 31, 2005.
- (3) Reflects the write-off of deferred financing costs that resulted from the refinancing of our senior credit facilities in September 2000. Also reflects the write-off of deferred financing costs and discounts resulting from the repayment of indebtedness with the proceeds from our initial public offering in April 2001 and our 9¹/₂% senior subordinated notes offering in June 2001. In connection with the merger on February 24, 2005, we tendered for all of our 9¹/₂% senior subordinated notes due 2009 and all of our 7¹/₂% senior subordinated notes due 2013. The loss in the Successor period of February 25, 2005 through March 31, 2005 consists of the tender premium cost of \$34.8 million and the write-off of the remaining unamortized deferred financing costs of \$7.9 million.
- (4) As a result of the merger, we incurred costs in the Predecessor period of January 1, 2005 through February 24, 2005 directly related to the merger. This included the cost of the investment advisor hired by the Special Committee of our Board of Directors to evaluate the merger, legal and accounting fees, costs associated with the Hart-Scott-Rodino filing relating to the merger, cost associated with purchasing a six year extended reporting period under our directors and officers liability insurance policy and other associated expenses.
- (5) Reflects interests held by other parties in subsidiaries, limited liability companies and limited partnerships owned and controlled by us.
- (6) For purposes of computing the ratio of earnings to fixed charges, earnings consist of income (loss) from continuing operations before income taxes, fixed charges, minority interest in income of subsidiaries and income (loss) from unconsolidated joint ventures. Fixed charges include preferred dividend requirements of subsidiaries, deemed dividends on preferred stock conversion, interest expense and the portion of operating rents that is deemed representative of an interest factor. In 2000, and the period from January 1, 2005 through February 24, 2005, the ratio coverage was less than 1:1. We would have had to generate additional earnings of approximately \$4.3 million in 2000, and \$159.1 million in the period from January 1, 2005 through February 24, 2005 to achieve a coverage ratio of 1:1.

Table of Contents

UNAUDITED PRO FORMA CONDENSED CONSOLIDATED FINANCIAL INFORMATION

The following unaudited pro forma condensed consolidated financial data has been derived by the application of pro forma adjustments to our historical consolidated statements of operations. The unaudited pro forma condensed consolidated statements of operations for the three months ended March 31, 2005 give effect to the Transactions as if such events occurred on January 1, 2005. The unaudited pro forma condensed consolidated statements of operations for the year ended December 31, 2004 give effect to the Transaction as if such events occurred on January 1, 2004. The unaudited pro forma condensed consolidated statements of operations is for comparative purposes only and does not purport to represent what our results of operations would actually have been had the Transactions in fact occurred on the assumed dates or to project our results of operations for any future date or future period. A pro forma balance sheet is not presented because the Transactions are fully reflected in our historical balance sheet as of March 31, 2005 that is contained herein.

The acquisition of Select by Holdings is accounted for, and is presented in the pro forma condensed consolidated statements of operations, under the purchase method of accounting prescribed in Statement of Financial Accounting Standards (SFAS) No. 141, Business Combinations, with intangible assets recorded in accordance with SFAS No. 142, Goodwill and Other Intangible Assets (FAS 142). The excess purchase price over net tangible and intangible assets acquired and liabilities assumed has been allocated to goodwill. The fair values of tangible and identifiable intangible assets acquired were determined based on preliminary valuation information. We continue to obtain additional information necessary to finalize the determination of the fair value of the assets acquired. In accordance with the provisions of SFAS 142, identifiable intangibles are amortized over their estimated life and no amortization of indefinite-lived intangible assets or goodwill will be recorded.

Assumptions underlying the pro forma adjustments are described in the accompanying notes, which should be read in conjunction with these unaudited pro forma condensed consolidated statements of operations. The actual purchase accounting adjustments described in the accompanying notes were made as of the closing date of the Transactions. Revisions to the preliminary purchase price allocation of the Transactions may have an impact on the unaudited pro forma condensed consolidated statements of operations contained herein.

You should read our unaudited pro forma condensed consolidated statements of operations and the related note thereto in conjunction with our historical consolidated financial statements and related notes thereto and other information in Select Consolidated Financial Information, and Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents**NOTES TO UNAUDITED PRO FORMA CONDENSED CONSOLIDATED STATEMENTS OF OPERATIONS**

(1) Represents amortization on an incremental increase in identifiable intangible assets of which \$32.1 million would be amortized over a five year life.

(2) The adjustment to interest expense represents the elimination of historical interest expense related to the 9¹/₂% and 7¹/₂% senior subordinated notes that were tendered. In addition, the adjustment includes the recording of interest expense for the Transactions, as if the Transactions had occurred as of the beginning of the respective periods presented. The following presents the interest expense for the senior subordinated notes being offered hereby calculated based upon the interest rate and principal amount outstanding and the interest expense for the new term loans and revolving credit facility are calculated based on the principal amount outstanding and interest rates:

	Outstanding Principal	Interest Rate
	(In thousands)	
New revolving credit facility	\$ 200,000	5.4145%
New term loans	580,000	4.6300%
Senior subordinated notes	660,000	7.6250%

The following table summarizes the Transactions pro forma interest expense adjustment (in thousands):

	Year Ended December 31, 2004	Three Months Ended March 31, 2005(a)
Eliminate interest expense on 9 ¹ / ₂ % senior subordinated notes	\$ (16,079)	\$ (2,457)
Eliminate interest expense on 7 ¹ / ₂ % senior subordinated notes	(13,125)	(2,005)
Eliminate amortization of deferred financing fees from the tendered 9 ¹ / ₂ % and 7 ¹ / ₂ % senior subordinated notes and existing credit facility	(2,169)	(361)
Eliminate commitment fees related to former credit facility	(1,054)	(147)
Interest on new revolving credit facility	10,829	1,654
Commitment fee on unused portion of credit facility	424	70
Interest on new term loan facility	26,854	4,103
Interest on senior subordinated notes	50,325	7,689
Amortization of deferred financing fees from senior subordinated notes and new credit facility	7,302	1,217
Reduction of interest income related to use of existing cash to fund transaction(b)	1,639	517
Transaction pro forma interest adjustment	\$ 64,946	\$ 10,280

(a) Transaction pro forma interest adjustment for the three months ended March 31, 2005 represents elimination of historical amounts from January 1, 2005 through February 24, 2005 and inclusion of pro forma amounts for that

same period.

- (b) The reduction in interest income is related to the use of \$131.1 million of Select's existing cash to fund the transaction. The interest rates used were 1.250% and 2.369% for the year ended December 31, 2004 and the three months ended March 31, 2005, respectively, and represent the average interest rate earned by us during the period presented.

An increase or decrease in 12.5 basis points would result in an increase or decrease of annual interest expense associated with the new revolving credit facility and the new term loan facility of approximately \$1.0 million.

- (3) Represents the incremental tax effect of the adjustments based upon our effective statutory tax rate as follows:

Time Period	Tax Rate

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

You should read this discussion together with our consolidated financial statements and the accompanying notes and Selected Historical Consolidated Financial Data included elsewhere in this prospectus.

Overview

We are a leading operator of specialty hospitals in the United States. We are also a leading operator of outpatient rehabilitation clinics in the United States and Canada. As of March 31, 2005, we operated 99 long-term acute care hospitals in 26 states, four acute medical rehabilitation hospitals, which are certified by Medicare as inpatient rehabilitation facilities, in New Jersey and 753 outpatient rehabilitation clinics in 25 states, the District of Columbia and seven Canadian provinces. We also provide medical rehabilitation services on a contract basis at nursing homes, hospitals, assisted living and senior care centers, schools and work sites. We began operations in 1997 under the leadership of our current management team.

On February 24, 2005, we consummated a merger with a wholly owned subsidiary of Select Medical Holdings Corporation (Holdings) pursuant to which we became a wholly owned subsidiary of Holdings. Holdings is owned by an investor group that includes affiliates of Welsh Carson and Thoma Cressey and members of our senior management. This merger is discussed in more detail herein. As a result of the merger, a majority of our assets and liabilities have been adjusted to their fair value as of the closing. We have also experienced an increase in our aggregate outstanding indebtedness as a result of financing transactions associated with the merger. Accordingly, our amortization expense and interest expense is higher in periods following the merger. The excess of the total purchase price over the fair value of our tangible and identifiable intangible assets of \$1.3 billion has been allocated to goodwill, which will be the subject of an annual impairment test. In determining the total economic consideration to use for financial accounting purposes, we have applied guidance found in Financial Accounting Standards Board Emerging Issues Task Force Issue No. 88-16 Basis in Leveraged Buyout Transactions. This has resulted in a portion of the equity related to our continuing stockholders to be recorded at the stockholder's predecessor basis and a corresponding portion of the acquired assets to be recorded likewise.

Although the Predecessor and Successor results are not comparable by definition due to the merger and the resulting change in basis, for ease of comparison in the following discussion, the financial data for the period after the merger, February 25, 2005 through March 31, 2005 (Successor period), has been added to the financial data for the period from January 1, 2005 through February 24, 2005 (Predecessor period), to arrive at the combined three months ended March 31, 2005. The combined data is referred to herein as the combined three months ended March 31, 2005. As a result of the merger, interest expense, loss on early retirement of debt, merger related charges, depreciation and amortization have been impacted. No other statement of operations data has been affected as a result of the merger. Accordingly, we believe this combined presentation is a reasonable means of presenting our operating results.

We manage our company through two business segments, our specialty hospital segment and our outpatient rehabilitation segment. We had net operating revenues of \$1,660.8 million and \$482.9 million for the year ended December 31, 2004 and the combined three months ended March 31, 2005, respectively. Of this total, we earned approximately 66% and 71% of our net operating revenues from our specialty hospitals and approximately 34% and 29% from our outpatient rehabilitation business for the year ended December 31, 2004 and the combined three months ended March 31, 2005, respectively.

Our specialty hospital segment consists of hospitals designed to serve the needs of long-term stay acute patients and hospitals designed to serve patients that require intensive medical rehabilitation care. Patients in our long-term acute care hospitals typically suffer from serious and often complex medical conditions that require a high degree of care. Patients in our inpatient rehabilitation facilities typically suffer from debilitating injuries, including traumatic brain and spinal cord injuries, and require rehabilitation care in the form of physical and vocational rehabilitation services. Our outpatient rehabilitation business consists of clinics and contract services that provide physical, occupational and speech rehabilitation services. Our outpatient

Table of Contents

rehabilitation patients are typically diagnosed with musculoskeletal impairments that restrict their ability to perform normal activities of daily living.

Recent Trends and Events***First Quarter Ended March 31, 2005***

For the combined three months ended March 31, 2005, our net operating revenues increased 15.4% to \$482.9 million compared to the three months ended March 31, 2004. This increase in net operating revenues was principally attributable to our acquisition of SemperCare, Inc. on January 1, 2005 and the growth in net operating revenues at our same store hospitals. This growth in net operating revenue was offset by a decline in our outpatient rehabilitation net operating revenues that resulted from a decline in the number of clinics we operate and in the volume of visits occurring at the operating clinics. We incurred a loss from operations for the combined three months ended March 31, 2005 of \$68.2 million that was attributable to the stock compensation costs associated with the merger. Excluding the stock compensation costs associated with the merger of \$146.5 million, income from operations would have been \$78.3 million compared to \$59.3 million for the three months ended March 31, 2004. This increase is also principally attributable to the growth in income at our same store hospitals and the income generated from the recently acquired SemperCare hospitals. For the combined three months ended March 31, 2005, we also incurred a loss of early retirement of debt of \$42.7 million related to the tender of our 7¹/₂% and 9¹/₂% senior subordinated notes and other expenses related to our merger of \$12.0 million.

Our cash flow from operations used \$172.9 million of cash for the combined three months ended March 31, 2005, which includes \$186.0 million in cash expenses related to the merger. Excluding the merger related expenses, operating activities would have provided \$13.1 million of cash flow.

SemperCare Acquisition

On January 1, 2005, we acquired SemperCare, Inc., or SemperCare, for approximately \$100 million in cash. The purchase price for the SemperCare acquisition is subject to an upward or downward adjustment based on the level of SemperCare's net working capital on the closing date of the acquisition. SemperCare operated 17 long-term acute care hospitals in 11 states. Six of the SemperCare facilities are in markets that overlap with other of our hospital markets. All of the SemperCare facilities are HIHs, and we expect to transition these facilities to adapt to the new HIH regulations within a similar time frame and using strategies similar to those that we will use to transition our other HIHs.

Year Ended December 31, 2004

In 2004 our net operating revenues increased 19.3%, income from operations increased 54.6%, net income increased 58.7% and diluted earnings per share increased 54.2% over 2003. Our specialty hospital segment was the primary source of this growth. In our specialty hospital segment we experienced growth resulting from the addition of four inpatient rehabilitation facilities acquired through our September 2003 acquisition of Kessler Rehabilitation Corporation, growth from our hospitals opened in 2003 and 2004, and an increase in our revenue per patient day in our same store hospitals. Our outpatient segment experienced growth related primarily to the full year effect of the Kessler clinics in 2004. We also continued to experience significant cash flow from operations resulting from our growth in net income and a continued reduction in accounts receivable days outstanding.

Regulatory Changes

On August 11, 2004, the Centers for Medicare & Medicaid Services, also known as CMS, published final regulations applicable to long-term acute care hospitals that are operated as hospitals within hospitals or as satellites (collectively referred to as HIHs). HIHs are separate hospitals located in space leased from, and located in, general acute care hospitals, known as host hospitals. Effective for hospital cost reporting periods beginning on or after October 1, 2004, subject to certain exceptions, the final regulations provide lower rates of reimbursement to HIHs for those Medicare patients admitted from their hosts that are in excess of a

Table of Contents

specified percentage threshold. For HIHs opened after October 1, 2004, the Medicare admissions threshold has been established at 25%. For HIHs that meet specified criteria and were in existence as of October 1, 2004, including all of our existing HIHs, the Medicare admissions thresholds will be phased-in over a four-year period starting with hospital cost reporting periods beginning on or after October 1, 2004, as follows: (i) for discharges during the cost reporting period beginning on or after October 1, 2004 and before October 1, 2005, the Medicare admissions threshold is the Fiscal 2004 Percentage (as defined below) of Medicare discharges admitted from the host hospital; (ii) for discharges during the cost reporting period beginning on or after October 1, 2005 and before October 1, 2006, the Medicare admissions threshold is the lesser of the Fiscal 2004 Percentage of Medicare discharges admitted from the host hospital or 75%; (iii) for discharges during the cost reporting period beginning on or after October 1, 2006 and before October 1, 2007, the Medicare admissions threshold is the lesser of the Fiscal 2004 Percentage of Medicare discharges admitted from the host hospital or 50%; and (iv) for discharges during cost reporting periods beginning on or after October 1, 2007, the Medicare admissions threshold is 25%. As used above, Fiscal 2004 Percentage means, with respect to any HIH, the percentage of all Medicare patients discharged by such HIH during its cost reporting period beginning on or after October 1, 2003 and before October 1, 2004 who were admitted to such HIH from its host hospital.

At December 31, 2004, we operated 82 long-term acute care hospitals. Of this total, 78 operated as HIHs. At March 31, 2005 we operated 99 long-term acute care hospitals, 95 of which operated as HIHs. For the year ended December 31, 2004, approximately 60% of the Medicare admissions to our HIHs were from host hospitals. For the year ended December 31, 2004, approximately 9% of our HIHs admitted 25% or fewer of their Medicare patients from their host hospitals, approximately 31% of our HIHs admitted 50% or fewer of their Medicare patients from their host hospitals, and approximately 78% of our HIHs admitted 75% or fewer of their Medicare patients from their host hospitals. There are several factors that should be taken into account in evaluating this admissions data. First, the admissions data for the year ended December 31, 2004 is not necessarily indicative of the admissions mix these hospitals will experience in the future. Second, admissions data for the year ended December 31, 2004 includes four hospitals that were open for less than one year, and the data from these hospitals may not be indicative of the admissions mix these hospitals will experience over a longer period of time. Third, admissions data for the year ended December 31, 2004 does not include admissions data for the hospitals recently acquired in the SemperCare acquisition.

Our existing HIHs will be substantially unaffected by the new HIH regulations until cost reporting periods beginning on or after October 1, 2005, when the 75% limitation on Medicare host admissions is implemented. Thus, the HIH regulations had no effect on our 2004 financial results. Our HIHs have cost reporting periods that commence on various dates throughout the calendar year. Consequently, any effect of the new admissions thresholds on our HIHs may be delayed depending on when a particular HIH's cost reporting period begins. For example, although approximately 22% of our HIHs open at December 31, 2004 admitted more than 75% of their Medicare patients from their host hospitals during the year ended December 31, 2004, only three of such HIHs have cost reporting periods that will begin after October 1, 2005 and before December 31, 2005. As a result, the HIH regulations should have only a minimal impact on our 2005 financial results.

In order to minimize the more significant impact of the HIH regulations in 2006 and future years, we have developed a business plan and strategy in each of our markets to adapt to the HIH regulations and maintain our company's current business. Our transition plan includes managing admissions at existing HIHs, relocating certain HIHs to leased spaces in smaller host hospitals in the same markets, consolidating HIHs in certain of our markets, relocating certain of our facilities to alternative settings, building or buying free-standing facilities and closing a small number of facilities. We currently anticipate that approximately 50% of our hospitals will not require a move.

The new HIH regulations established exceptions to the Medicare admissions thresholds with respect to patients who reach outlier status at the host hospital, HIHs located in MSA-dominant hospitals or HIHs located in rural areas.

Table of Contents**Development of New Specialty Hospitals and Clinics**

Historically our goal had been to open approximately eight to ten new long-term acute care hospitals each year, utilizing primarily our hospital within a hospital model. As a result of the regulatory changes published by CMS on August 11, 2004, we opened four long-term acute care hospitals in 2004. We expect to open four new long-term acute care hospitals in 2005, primarily in settings where the new HHH regulations would have little or no impact, for example, in free-standing buildings. Additionally, we are evaluating opportunities to develop free-standing inpatient rehabilitation facilities similar to the four inpatient rehabilitation facilities acquired through our September 2003 Kessler acquisition. We also intend to open new outpatient rehabilitation clinics in our current markets where we can benefit from existing referral relationships and brand awareness to produce incremental growth.

Critical Accounting Matters***Sources of Revenue***

Our net operating revenues are derived from a number of sources, including commercial, managed care, private and governmental payors. Our net operating revenues include amounts estimated by management to be reimbursable from each of the applicable payors and the federal Medicare program. Amounts we receive for treatment of patients are generally less than the standard billing rates. We account for the differences between the estimated reimbursement rates and the standard billing rates as contractual adjustments, which we deduct from gross revenues to arrive at net operating revenues.

Net operating revenues generated directly from the Medicare program from all segments represented approximately 48%, 46% and 40% of net operating revenues for the years ended December 31, 2004, 2003 and 2002, respectively, and approximately 55% and 48% of net operating revenues for the combined three months ended March 31, 2005 and the three months ended March 31, 2004, respectively. The increase in the percentage of our revenues generated from the Medicare program is due to the growth in the number of specialty hospitals and their higher respective share of Medicare revenues generated in this segment of our business compared to our outpatient rehabilitation segment.

Approximately 68%, 69% and 63% of our specialty hospital revenues for the years ended December 31, 2004, 2003 and 2002, respectively, and approximately 74% and 69% of our specialty hospital revenues for the combined three months ended March 31, 2005 and the three months ended March 31, 2004, respectively, were received in respect of services provided to Medicare patients. For the year ended December 31, 2004 and the combined three months ended March 31, 2005, all of our Medicare payments are being paid under a prospective payment system. For the years ended December 31, 2003 and 2002, approximately 23% and 92%, respectively, were paid by Medicare under a full cost-based reimbursement methodology. Payments made under a cost-based reimbursement methodology are subject to final cost report settlements based on administrative review and audit by third parties. An annual cost report was filed for each provider to report the cost of providing services and to settle the difference between the interim payments we receive and final costs. We record adjustments to the original estimates in the periods that such adjustments become known. Historically these adjustments have not been significant. Substantially all of our Medicare cost reports are settled through 2002. Because our routine payments from Medicare are different than the final reimbursement due to us under the cost based reimbursement system, we record a receivable or payable for the difference.

The LTCH-PPS regulations also refined the criteria that must be met in order for a hospital to be certified as a long-term acute care hospital. For cost reporting periods beginning on or after October 1, 2002, a long-term acute care hospital must have an average inpatient length of stay for Medicare patients (including both Medicare covered and non-covered days) of greater than 25 days. Previously, average lengths of stay were measured with respect to all patients.

While the implementation of LTCH-PPS is intended to be revenue neutral to the industry, our long-term acute care hospitals experienced enhanced financial performance in 2003 due to our low cost operating model and the high acuity of our patient population.

Table of Contents

Most of our specialty hospitals receive bi-weekly periodic interim payments (PIP) from Medicare instead of being paid on an individual claim basis. Under a PIP payment methodology, Medicare estimates a hospital's claim volume based on historical trends and periodically reconciles the differences between the actual claim data and the estimated payments. At each balance sheet date, we record the difference between our actual claims and the PIP payments as a receivable or payable from third-party payors on our balance sheet.

For 2003 and 2004, other revenue primarily represents amounts we have received for other services, which include sales of home medical equipment, orthotics, prosthetics, infusion/intravenous services and computer software. In 2002, other revenue primarily represented amounts the Medicare program reimbursed us for a portion of our corporate expenses that are related to our long-term acute care hospital operations. Under the LTCH-PPS, we no longer are specifically reimbursed for the portion of our corporate costs related to the provision of Medicare services in our long-term acute care hospitals. Instead, we receive from Medicare a pre-determined fixed amount assigned to the applicable LTC-DRG, which is intended to reflect the average cost of treating such a patient, including corporate costs. As a result of this change in our revenue stream, in 2003 we began allocating corporate departmental costs that are directly related to our long-term acute care hospital operations to our specialty hospital segment to better match the cost with the revenues for this segment. This allocation has not had any adverse impact on the profitability or margins of this segment, due to the expected increase in net revenue this segment has experienced under LTCH-PPS. In addition to the Medicare revenue we recorded in 2003, we also reported as other revenue amounts we received for other services, which include sales of home medical equipment, orthotics, prosthetics and infusion/intravenous services. These other services were acquired as part of our acquisition of Kessler.

Contractual Adjustments

Net operating revenues include amounts estimated by us to be reimbursable by Medicare and Medicaid under prospective payment systems and provisions of cost-reimbursement and other payment methods. In addition, we are reimbursed by non-governmental payors using a variety of payment methodologies. Amounts we receive for treatment of patients covered by these programs are generally less than the standard billing rates. Contractual allowances are calculated and recorded through our internally developed systems. Within our hospital segment our billing system automatically calculates estimated Medicare reimbursement and associated contractual allowances. For non-governmental payors, we manually calculate the contractual allowance for each patient based upon the contractual provisions associated with the specific payor. In our outpatient segment, we perform provision testing, using internally developed systems, whereby we monitor a payor's historical paid claims data and compare it against the associated gross charges. This difference is determined as a percentage of gross charges and is applied against gross billing revenue to determine the contractual allowances for the period. Additionally, these contractual percentages are applied against the gross receivables on the balance sheet to determine that adequate contractual reserves are maintained for the gross accounts receivables reported on the balance sheet. We account for any difference as additional contractual adjustments deducted from gross revenues to arrive at net operating revenues in the period that the difference is determined. The estimation processes described above and used in recording our contractual adjustments have historically yielded consistent and reliable results.

Allowance for Doubtful Accounts

Substantially all of our accounts receivable are related to providing healthcare services to patients. Collection of these accounts receivable is our primary source of cash and is critical to our operating performance. Our primary collection risks relate to non-governmental payors who insure these patients and deductibles, co-payments and self-insured amounts owed by the patient. Deductible, co-payments and self-insured amounts are an immaterial portion of our net accounts receivable balance. At December 31, 2004, deductible, co-payments and self-insured amounts owed by the patient accounted for approximately 1.7% of our net accounts receivable balance before doubtful accounts. Our general policy is to verify insurance coverage prior to the date of admission for a patient admitted to our hospitals or in the case of our outpatient rehabilitation clinics, we verify insurance coverage prior to their first therapy visit. Our estimate for the

Table of Contents

allowance for doubtful accounts is calculated by generally reserving as uncollectible all governmental accounts over 365 days and non-governmental accounts over 180 days from discharge. This method is monitored based on our historical cash collections experience. Collections are impacted by the effectiveness of our collection efforts with non-governmental payors and regulatory or administrative disruptions with the fiscal intermediaries that pay our governmental receivables.

We estimate bad debts for total accounts receivable within each of our operating units. We believe our policies have resulted in reasonable estimates determined on a consistent basis. We believe that we collect substantially all of our third-party insured receivables which includes receivables from governmental agencies. To date, we believe there has not been a material difference between our bad debt allowances and the ultimate historical collection rates on accounts receivables. We review our overall reserve adequacy by monitoring historical cash collections as a percentage of net revenue less the provision for bad debts.

Uncollected accounts are written off the balance sheet when they are turned over to an outside collection agency, or when management determines that the balance is uncollectible, whichever occurs first.

The following table is an aging of our net (after allowances for contractual adjustments but before doubtful accounts) accounts receivable (in thousands):

	Balance as of December 31,			
	2004		2003	
	0-90 Days	Over 90 Days	0-90 Days	Over 90 Days
Medicare and Medicaid	\$ 88,174	\$ 20,182	\$ 87,089	\$ 28,490
Commercial insurance, and other	127,691	75,426	114,392	111,717
Total net accounts receivable	\$ 215,865	\$ 95,608	\$ 201,481	\$ 140,207

The approximate percentage of total net accounts receivable (after allowance for contractual adjustments but before doubtful accounts) summarized by aging categories is as follows:

	As of December 31,	
	2004	2003
	0 to 90 days	69.3%
91 to 180 days	11.2%	11.6%
180 to 365 days	9.9%	10.0%
Over 365 days	9.6%	19.4%
Total	100.0%	100.0%

The approximate percentage of total net accounts receivable (after allowance for contractual adjustments but before doubtful accounts) summarized by payor is as follows:

As of December 31,

	2004	2003
Insured receivables	98.3%	97.9%
Self-pay receivables (including deductible and copayments)	1.7%	2.1%
Total	100.0%	100.0%

Insurance

Under a number of our insurance programs, which include our employee health insurance program and certain components under our property and casualty insurance program, we are liable for a portion of our losses. In these cases we accrue for our losses under an occurrence based principal whereby we estimate the losses that will be incurred by us in a given accounting period and accrue that estimated liability. Where we have substantial exposure, we utilize actuarial methods in estimating the losses. In cases where we have minimal exposure, we will estimate our losses by analyzing historical trends. We monitor these programs

Table of Contents

quarterly and revise our estimates as necessary to take into account additional information. At March 31, 2005 and December 31, 2004, we have recorded a liability of \$48.4 million and \$44.4 million, respectively, for our estimated losses under these insurance programs.

Related Party Transactions

We are party to various rental and other agreements with companies affiliated with us through common ownership. Our payments to these related parties amounted to \$0.4 million and \$1.9 million for the combined three months ended March 31, 2005 and the year ended December 31, 2004, respectively. Our future commitments are related to commercial office space we lease for our corporate headquarters in Mechanicsburg, Pennsylvania. These future commitments amount to \$18.0 million through 2014. These transactions and commitments are described more fully in the notes to our consolidated financial statements included herein. See also Certain Relationships and Related Transactions.

Operating Statistics

The following table sets forth operating statistics for our specialty hospitals and our outpatient rehabilitation clinics for each of the periods presented. The data in the table reflect the changes in the number of specialty hospitals and outpatient rehabilitation clinics we operate that resulted from acquisitions, start-up activities, closures and consolidations. The operating statistics reflect data for the period of time these operations were managed by us.

	Fiscal Year Ended December 31,			Three Months Ended March 31,	
	2002	2003	2004	2004	2005
Specialty hospital data(1):					
Number of hospitals start of period	64	72	83	83	86
Number of hospital start-ups	8	8	4		
Number of hospitals acquired		4			17

Outpatient rehabilitation data:					
Number of clinics owned start of	664	679	758	758	705

Edgar Filing: SELECT MEDICAL CORP - Form 424B3

period					
Number of clinics acquired	14	125	5	2	7
Number of clinic start-ups	49	30	20	4	9
Number of clinics closed/sold	(48)	(76)	(78)	(23)	(6)
Number of clinics owned end of period	679	758	705	741	715
Number of clinics managed end of period	58	32	36	36	38
Total number of clinics (all) end of period	737	790	741	777	753
Number of visits (U.S.)	3,841,841	4,027,768	3,810,284	1,004,106	915,822
Net revenue per visit (U.S.)(3)	\$ 86	\$ 87	\$ 90	\$ 91	\$ 91

- (1) Specialty hospitals consist of long-term acute care hospitals and inpatient rehabilitation facilities.
- (2) Net revenue per patient day is calculated by dividing specialty hospital patient service revenues by the total number of patient days.

Table of Contents

(3) Net revenue per visit (U.S.) is calculated by dividing outpatient rehabilitation clinic revenue by the total number of visits. For purposes of this computation, outpatient rehabilitation clinic revenue does not include our Canadian subsidiary and contract services revenue.

Results of Operations

The following table presents the combined consolidated statement of operations for the three months ended March 31, 2005. The financial data for the period after the merger, February 25, 2005 through March 31, 2005 (Successor period), has been added to the financial data for the period from January 1, 2005 through February 24, 2005 (Predecessor period), to arrive at the combined three months ended March 31, 2005.

	Three Months Ended March 31, 2005		
	Predecessor	Successor	Combined
	(Dollars in thousands)		
Net operating revenues	\$ 287,787	\$ 195,112	\$ 482,899
Costs and expenses:

N/ M Not Meaningful.

- (1) The financial data for the period after the merger, February 25, 2005 through March 31, 2005 (Successor period), has been added to the financial data for the period from January 1, 2005 through February 24, 2005 (Predecessor period), to arrive at the combined three months ended March 31, 2005.
- (2) Cost of services include salaries, wages and benefits, operating supplies, lease and rent expense and other operating costs.
- (3) We define Adjusted EBITDA as net income before interest, income taxes, depreciation and amortization, income from discontinued operations, loss on early retirement of debt, equity in income from joint ventures, merger related charges, stock compensation associated with merger, and minority interest. We believe that the presentation of Adjusted EBITDA is important to investors because Adjusted EBITDA is used by management to evaluate financial performance and determine resource allocation for each of our operating units. Adjusted EBITDA is not a measure of financial performance under generally accepted accounting principles. Items excluded from Adjusted EBITDA are significant components in understanding and assessing financial performance. Adjusted EBITDA should not be considered in isolation or as an alternative to, or substitute for, net income, cash flows generated by operations,

Table of Contents

investing or financing activities, or other financial statement data presented in the consolidated financial statements as indicators of financial performance or liquidity. Because Adjusted EBITDA is not a measurement determined in accordance with generally accepted accounting principles and is thus susceptible to varying calculations, Adjusted EBITDA as presented may not be comparable to other similarly titled measures of other companies. See footnote 13 to our audited consolidated financial statements for the year ended December 31, 2004 and footnote 10 to our interim consolidated financial statements for the period ended March 31, 2005 for a reconciliation of net income to Adjusted EBITDA as utilized by us in reporting our segment performance in accordance with SFAS No. 131.

Combined Three Months Ended March 31, 2005 Compared to Three Months Ended March 31, 2004***Net Operating Revenues***

Our net operating revenues increased by 15.4% to \$482.9 million for the combined three months ended March 31, 2005 compared to \$418.5 million for the three months ended March 31, 2004.

Specialty Hospitals. Our specialty hospital net operating revenues increased 26.8% to \$341.5 million for the combined three months ended March 31, 2005 compared to \$269.4 million for the three months ended March 31, 2004. Net operating revenues for the specialty hospitals opened before January 1, 2004 and operated by us throughout both periods increased 9.5% to \$292.8 million for the combined three months ended March 31, 2005 from \$267.4 million for the three months ended March 31, 2004. This increase resulted primarily from higher net revenue per patient day. Our patient days for these hospitals increased 2.0%. Additionally, our occupancy percentage increased to 74% for the combined three months ended March 31, 2005 compared to 72% for the three months ended March 31, 2004. The remaining increase of \$46.7 million resulted primarily from the acquisition of the SemperCare facilities, which contributed \$42.1 million of net revenue growth.

Outpatient Rehabilitation. Our outpatient rehabilitation net operating revenues declined 5.1% to \$138.2 million for the combined three months ended March 31, 2005 compared to \$145.7 million for the three months ended March 31, 2004. The number of patient visits in our U.S. based outpatient rehabilitation clinics declined 8.8% for the combined three months ended March 31, 2005 to 915,822 visits compared to 1,004,106 visits for the three months ended March 31, 2004. The decrease in net operating revenues and patient visits was principally related to a 3.5% decline in the number of clinics we own and operate and a 3.8% decline in the volume of visits per clinic at our U.S. locations. Net revenue per visit in these clinics was \$91 in both 2005 and 2004.

Other. Our other revenues were \$3.2 million for the combined three months ended March 31, 2005 compared to \$3.4 million for the three months ended March 31, 2004.

Operating Expenses

Our operating expenses increased by 12.9% to \$394.1 million for the combined three months ended March 31, 2005 compared to \$349.0 million for the three months ended March 31, 2004. Our operating expenses include our cost of services, general and administrative expense and bad debt expense. The increase in operating expenses was principally related to the acquisition of SemperCare facilities on January 1, 2005. As a percentage of our net operating revenues, our operating expenses were 81.6% for the combined three months ended March 31, 2005 compared to 83.4% for the three months ended March 31, 2004. Cost of services as a percentage of operating revenues decreased to 76.9% for the combined three months ended March 31, 2005 from 77.8% for the three months ended March 31, 2004. These costs primarily reflect our labor expenses. This decrease resulted because we experienced a larger rate of growth in our specialty hospital revenues compared to the growth in our specialty hospital cost of services. Another component of cost of services is facility rent expense, which was \$21.7 million for the combined three months ended March 31, 2005 compared to \$19.7 million for the three months ended March 31, 2004. This increase is principally related to the SemperCare hospitals we acquired on January 1, 2005. During the same time period, general and administrative expense as a percentage of net operating revenues declined to 2.4% for the combined three months ended March 31, 2005 from 2.8% for the three months ended March 31, 2004. This decrease in

Table of Contents

general and administrative expenses as a percentage of net operating revenue is the result of a growth in net operating revenues of 15.4% that exceeded the growth in our general and administrative costs which were 1.9%. Our bad debt expense as a percentage of net operating revenues was 2.3% for the combined three months ended March 31, 2005 compared to 2.8% for the three months ended March 31, 2004. This decrease in bad debt expense resulted from an improvement in the composition and aging of our accounts receivable.

Adjusted EBITDA

Specialty Hospitals. Adjusted EBITDA increased by 36.5% to \$79.1 million for the combined three months ended March 31, 2005 compared to \$57.9 million for the three months ended March 31, 2004. Our Adjusted EBITDA margins increased to 23.1% for the combined three months ended March 31, 2005 from 21.5% for the three months ended March 31, 2004. The hospitals opened before January 1, 2004 and operated throughout both periods had Adjusted EBITDA of \$71.7 million, an increase of 22.5% over the Adjusted EBITDA of these hospitals in 2004. This increase in same hospital Adjusted EBITDA resulted from an increase in revenue per patient day that exceeded our increase in cost per patient day and an increase in our patient days. Our Adjusted EBITDA margin in these same store hospitals increased to 24.5% for the combined three months ended March 31, 2005 from 21.9% for the three months ended March 31, 2004.

Outpatient Rehabilitation. Adjusted EBITDA decreased by 4.7% to \$21.8 million for the combined three months ended March 31, 2005 compared to \$22.9 million for the three months ended March 31, 2004. Our Adjusted EBITDA margins increased to 15.8% for the combined three months ended March 31, 2005 from 15.7% for the three months ended March 31, 2004. The decline in Adjusted EBITDA was the result of the decline in number of clinics we operate and the decline in clinic visit volumes described under *Net Operating Revenue Outpatient Rehabilitation* above.

Other. The Adjusted EBITDA loss was \$12.1 million for the combined three months ended March 31, 2005 compared to a loss of \$11.3 million for the three months ended March 31, 2004. This small increase in the Adjusted EBITDA loss was primarily the result of the decline in the profitability at one of our ancillary businesses.

Income (Loss) from Operations

For the combined three months ended March 31, 2005 we experienced a loss from operations of \$68.2 million compared to income from operations of \$59.3 million for the three months ended March 31, 2004. The loss from operations experienced for the combined three months ended March 31, 2005 resulted from the significant stock compensation costs recorded related to the merger of \$146.5 million offset by the Adjusted EBITDA increases described above. The stock compensation expense was comprised of \$142.2 million related to the repurchase of all vested and unvested outstanding stock options in accordance with the terms of the merger agreement in the Predecessor period of January 1, 2005 through February 24, 2005 and an additional \$4.3 million of stock compensation expense related to restricted stock and a warrant that were issued in the Successor period of February 25, 2005 through March 31, 2005.

Loss on early retirement of debt

In connection with the merger, we commenced tender offers to acquire all of our 9¹/₂% senior subordinated notes due 2009 and all of our 7¹/₂% senior subordinated notes due 2013. Upon completion of the tender offers on February 24, 2005, all of the \$175.0 million of 7¹/₂% senior subordinated notes were tendered and \$169.3 million of the \$175.0 million of 9¹/₂% notes were tendered. The loss consists of the tender premium cost of \$34.8 million and the remaining unamortized deferred financing costs of \$7.9 million.

Merger related charges

As a result of the merger, we incurred costs in the Predecessor period of January 1, 2005 through February 24, 2005 directly related to the merger. This included the cost of the investment advisor hired by the Special Committee of our Board of Directors to evaluate the merger, legal and accounting fees, costs associated with the Hart-Scott-Rodino filing relating to the merger, cost associated with purchasing a six year

Table of Contents

extended reporting period under our directors and officers liability insurance policy and other associated expenses.

Interest Expense

Interest expense increased by \$5.0 million to \$14.4 million for the combined three months ended March 31, 2005 from \$9.4 million for the three months ended March 31, 2004. The increase in interest expense is due to the higher debt levels outstanding in the Successor period of February 25, 2005 through March 31, 2005. During this Successor period we had approximately \$1.1 billion in additional debt.

Minority Interests

Minority interests in consolidated earnings was \$0.9 million for the combined three months ended March 31, 2005 compared to \$1.0 million for the three months ended March 31, 2004.

Income Taxes

We recorded income tax benefit of \$59.4 million for the Predecessor period of January 1, 2005 through February 24, 2005. The tax benefit represented an effective tax benefit rate of 37.2%. This effective tax benefit rate consisted of the statutory Federal rate of 35% and a state rate of 2.2%. The Federal tax benefit will be carried forward and used to offset our Federal tax throughout the remainder of 2005. Because of the differing state tax rules related to net operating losses, a portion of these state net operating losses received valuation allowances. We recorded income tax expense of \$8.9 million for the Successor period of February 25, 2005 through March 31, 2005. The expense represented an effective tax rate of 40.4%. For the three months ended March 31, 2004 we recorded income tax expense of \$19.8 million. This expense represented an effective tax rate of 40.2%.

Income from discontinued operation, net of tax

On September 27, 2004 we sold the land, building and certain other assets and liabilities associated with our only skilled nursing facility that we acquired as part of the Kessler acquisition in September 2003. The operating results of the skilled nursing facility have been reclassified and reported as discontinued operations.

Year Ended December 31, 2004 Compared to Year Ended December 31, 2003***Net Operating Revenues***

Our net operating revenues increased by 19.3% to \$1,660.8 million for the year ended December 31, 2004 compared to \$1,392.4 million for the year ended December 31, 2003.

Specialty Hospitals. Our specialty hospital net operating revenues increased 28.3% to \$1,089.5 million for the year ended December 31, 2004 compared to \$849.3 million for the year ended December 31, 2003. Net operating revenues for the specialty hospitals opened before January 1, 2003 and operated by us throughout both periods increased 10.8% to \$867.5 million for the year ended December 31, 2004 from \$783.2 million for the year ended December 31, 2003. This increase resulted primarily from higher net revenue per patient day, offset by a decline in our patient days and occupancy rates. Our patient days and occupancy rates declined primarily as a result of additional admissions criteria implemented in our long-term acute care hospitals. The remaining increase of \$155.9 million resulted from the acquisition of the Kessler facilities, which contributed \$96.3 million of net revenue growth, and the internal development of new specialty hospitals that commenced operations in 2003 and 2004.

Outpatient Rehabilitation. Our outpatient rehabilitation net operating revenues increased 5.4% to \$558.1 million for the year ended December 31, 2004 compared to \$529.3 million for the year ended December 31, 2003. The increase in net operating revenues was principally related to the acquisition of the Kessler operations. The number of patient visits in our U.S. based outpatient rehabilitation clinics declined 5.4% for the year ended December 31, 2004 to 3,810,284 visits compared to 4,027,768 visits for the year ended December 31, 2003. Net revenue per visit in these clinics was \$90 in 2004 compared to \$87 in 2003. Excluding

Table of Contents

the effects of the Kessler operations in both periods, visits declined 11.0%. The majority of this decline is related to clinic closures. In addition, during the first and second quarters of 2004 various market factors such as elimination of unprofitable contracts and competition from referring physicians who are now developing their own rehabilitation therapy practices contributed to the decline.

Other. Our other revenues declined to \$13.2 million for the year ended December 31, 2004 compared to \$13.8 million for the year ended December 31, 2003. The principal reason for the decline is the conversion of our long-term acute care hospitals to LTCH-PPS and the associated changes in how we get reimbursed for the services which was \$8.7 million in 2003. The decline was offset by revenues related to the Kessler other businesses that are now being reported under this category. These businesses generated approximately \$7.9 million of incremental net operating revenues in 2004. See Critical Accounting Matters Sources of Revenue for a further discussion of this change.

Operating Expenses

Our operating expenses increased by 15.0% to \$1,389.3 million for the year ended December 31, 2004 compared to \$1,207.9 million for the year ended December 31, 2003. Our operating expenses include our cost of services, general and administrative expense and bad debt expense. The increase in operating expenses was principally related to the acquisition of Kessler and the internal development of new specialty hospitals that commenced operations in 2003 and 2004. As a percentage of our net operating revenues, our operating expenses were 83.7% for the year ended December 31, 2004 compared to 86.7% for the year ended December 31, 2003. Cost of services as a percentage of operating revenues decreased to 78.0% for the year ended December 31, 2004 from 79.8% for the year ended December 31, 2003. These costs primarily reflect our labor expenses. This decrease resulted because we experienced a larger rate of growth in our specialty hospital revenues compared to the growth in our specialty hospital cost of services. Another component of cost of services is facility rent expense, which was \$80.4 million for the year ended December 31, 2004 compared to \$74.3 million for the year ended December 31, 2003. This increase is principally related to our new hospitals that opened during 2003 and 2004 and the rent expense for the acquired Kessler clinics. During the same time period, general and administrative expense as a percentage of net operating revenues declined to 2.8% for the year ended December 31, 2004 from 3.2% for the year ended December 31, 2003. This decrease in general and administrative expenses as a percentage of net operating revenue is the result of a growth in net operating revenues that exceeded the growth in our general and administrative costs. Our bad debt expense as a percentage of net operating revenues was 2.9% for the year ended December 31, 2004 compared to 3.7% for the year ended December 31, 2003. This decrease in bad debt expense resulted from an improvement in the composition and aging of our accounts receivable.

Adjusted EBITDA

Specialty Hospitals. Adjusted EBITDA increased by 62.2% to \$236.2 million for the year ended December 31, 2004 compared to \$145.6 million for the year ended December 31, 2003. Our Adjusted EBITDA margins increased to 21.7% for the year ended December 31, 2004 from 17.2% for the year ended December 31, 2003. The hospitals opened before January 1, 2003 and operated throughout both periods had Adjusted EBITDA of \$189.4 million, an increase of 32.7% over the Adjusted EBITDA of these hospitals in 2003. This increase in same hospital Adjusted EBITDA resulted from an increase in revenue per patient day that exceeded our increase in cost per patient day. Our Adjusted EBITDA margin in these same store hospitals increased to 21.8% for the year ended December 31, 2004 from 18.2% for the year ended December 31, 2003.

Outpatient Rehabilitation. Adjusted EBITDA increased by 8.8% to \$81.6 million for the year ended December 31, 2004 compared to \$75.0 million for the year ended December 31, 2003. Our Adjusted EBITDA margins increased to 14.6% for the year ended December 31, 2004 from 14.2% for the year ended December 31, 2003. This Adjusted EBITDA margin increase was primarily the result of three factors. First, the acquired Kessler outpatient operations experienced negative margins in 2003, which had the effect of lowering the overall margins for the segment in 2003. We consolidated or closed many of the underperforming

Table of Contents

clinics in 2004. Second, we experienced lower bad debt expense in 2004. Third, the increases previously described were offset by an increase in labor costs due to increased competition for hiring therapists.

Other. The Adjusted EBITDA loss was \$46.3 million for the year ended December 31, 2004 compared to a loss of \$36.2 million for the year ended December 31, 2003. This increase in the Adjusted EBITDA loss was primarily the result of the decline in hospital reimbursements for corporate support costs of \$8.7 million (See Critical Accounting Matters Sources of Revenue) and an increase in our general and administrative expenses of \$1.4 million.

Income from Operations

Income from operations increased 54.6% to \$231.5 million for the year ended December 31, 2004 compared to \$149.8 million for the year ended December 31, 2003. The increase in income from operations resulted from the Adjusted EBITDA increases described above, and was offset by an increase in depreciation and amortization expense of \$5.3 million. The increase in depreciation and amortization expense resulted primarily from the additional depreciation associated with acquired Kessler assets, the amortization of the Kessler non-compete agreement, and increases in depreciation on fixed asset additions that are principally related to new hospital and clinic development.

Interest Expense

Interest expense increased by \$7.3 million to \$33.6 million for the year ended December 31, 2004 from \$26.3 million for the year ended December 31, 2003. The increase in interest expense is due to the higher debt levels outstanding in 2004 compared to 2003 resulting from the issuance of \$175.0 million of 7¹/₂% senior subordinated notes due 2013 on August 12, 2003, offset by a reduction in borrowings under our senior credit facility. The lower debt levels on our senior credit facility resulted from scheduled term amortization payments and principal pre-payments. All repayments have been made with cash flows generated through operations.

Minority Interests

Minority interests in consolidated earnings increased to \$3.4 million for the year ended December 31, 2004 compared to \$2.4 million for the year ended December 31, 2003. This increase is the result of the improved profitability of these jointly owned entities.

Income Taxes

We recorded income tax expense of \$79.6 million for the year ended December 31, 2004. The expense represented an effective tax rate of 40.4%. We recorded income tax expense of \$48.6 million for the year ended December 31, 2003. This expense represented an effective tax rate of 39.6%. The increase in the tax rate is the result of a larger portion of our net income in states with higher tax rates and the non-deductibility of certain expenses.

Year Ended December 31, 2003 Compared to Year Ended December 31, 2002***Net Operating Revenues***

Our net operating revenues increased by 23.6% to \$1,392.4 million for the year ended December 31, 2003 compared to \$1,126.6 million for the year ended December 31, 2002.

Specialty Hospitals. Our specialty hospital net operating revenues increased 35.8% to \$849.3 million for the year ended December 31, 2003 compared to \$625.2 million for the year ended December 31, 2002. Net operating revenues for the specialty hospitals opened before January 1, 2002 and operated throughout both periods increased 18.3% to \$726.8 million for the year ended December 31, 2003 from \$614.1 million for the year ended December 31, 2002. This increase resulted primarily from higher net revenue per patient day, which is primarily attributable to the improved reimbursement we are receiving from Medicare under the LTCH-PPS. Our patient days and occupancy rates for these hospitals were consistent in both periods. The remaining increase of \$111.4 million resulted from the acquisition of the Kessler facilities, which contributed

Table of Contents

\$43.9 million of net revenue, and the internal development of new specialty hospitals that commenced operations in 2002 and 2003.

Outpatient Rehabilitation. Our outpatient rehabilitation net operating revenues increased 9.1% to \$529.3 million for the year ended December 31, 2003 compared to \$485.1 million for the year ended December 31, 2002. The number of patient visits in our U.S. based outpatient rehabilitation clinics increased 4.8% for the year ended December 31, 2003 to 4,027,768 visits compared to 3,841,841 visits for the year ended December 31, 2002. Net revenue per visit in these clinics was \$87 in 2003 compared to \$86 in 2002. The increase in net operating revenues was related to the acquisition of the Kessler operations, which contributed \$23.0 million of net operating revenue, the consolidation of clinics that we previously managed and clinics that we acquired during 2002 and 2003, and changes in the economic environment that are reducing the number of therapy visits. These macro-economic trends affecting therapy visit volumes include increasing patient co-pays and a decline in the number of approved visits for a patient. Excluding the effects of the previously managed clinics and the recently acquired clinics (including the Kessler clinics), net operating revenues for the year ended December 31, 2003 would have been \$493.2 million, and the number of U.S. based visits would have been 3,741,717.

Other. Our other revenues declined to \$13.8 million for the year ended December 31, 2003 compared to \$16.2 million for the year ended December 31, 2002. The principal reason for the decline is the conversion of our long-term acute care hospitals to LTCH-PPS and the associated changes in how we get reimbursed for the services we provide. The decline was offset by revenues related to the other businesses we acquired as part of our Kessler acquisition that are now being reported under this category. These businesses generated approximately \$3.6 million of revenues in 2003. We expect this revenue item to continue declining throughout 2004. See **Critical Accounting Matters** **Sources of Revenue** for a further discussion of this change.

Operating Expenses

Our operating expenses increased by 20.9% to \$1,207.9 million for the year ended December 31, 2003 compared to \$999.3 million for the year ended December 31, 2002. Our operating expenses include our cost of services, general and administrative expense and bad debt expense. The increase in operating expenses was principally related to the acquisition of Kessler, the internal development of new specialty hospitals that commenced operations in 2002 and 2003, costs associated with increased patient volumes and the consolidation of previously managed clinics. As a percentage of our net operating revenues, our operating expenses were 86.7% for the year ended December 31, 2003 compared to 88.7% for the year ended December 31, 2002. Cost of services as a percentage of operating revenues decreased to 79.8% for the year ended December 31, 2003 from 81.9% for the year ended December 31, 2002. These costs primarily reflect our labor expenses. This decrease resulted because we experienced a larger rate of growth in our specialty hospital revenues compared to the growth in our specialty hospital cost of services. Another component of cost of services is facility rent expense, which was \$74.3 million for the year ended December 31, 2003 compared to \$66.4 million for the year ended December 31, 2002. This increase is principally related to our new hospitals that opened during 2002 and 2003 and the rent expense for the acquired Kessler clinics. During the same time period, general and administrative expense as a percentage of net operating revenues declined to 3.2% for the year ended December 31, 2003 from 3.5% for the year ended December 31, 2002. This decrease in general and administrative expenses as a percentage of net operating revenue is the result of a growth in net operating revenues that exceeded the growth in our general and administrative costs. Our bad debt expense as a percentage of net operating revenues was 3.7% for the year ended December 31, 2003 compared to 3.3% for the year ended December 31, 2002. This increase in bad debt expense resulted primarily from two factors. First, we experienced a migration of some of our accounts receivable to older aging categories where we significantly reduce our estimates of net realizable value. Second, the transition to the new LTCH-PPS payment mechanism in our long-term acute care hospitals has caused uncertainty associated with collections from payors that insure patient's co-payments and Medicare supplemental coverage.

Table of Contents***Adjusted EBITDA***

Specialty Hospitals. Specialty hospital Adjusted EBITDA increased by 105.5% to \$145.6 million for the year ended December 31, 2003 compared to \$70.9 million for the year ended December 31, 2002. Our specialty hospital Adjusted EBITDA margins increased to 17.2% for the year ended December 31, 2003 from 11.3% for the year ended December 31, 2002. The hospitals opened before January 1, 2002 and operated throughout both periods had Adjusted EBITDA of \$124.0 million, an increase of 62.0% over the Adjusted EBITDA of these hospitals in 2002. This increase in same hospital Adjusted EBITDA resulted from an increase in revenue per patient day, which is primarily attributable to the improved reimbursement we are receiving from Medicare under LTCH-PPS. Our Adjusted EBITDA margin in these same store hospitals increased to 17.1% for the year ended December 31, 2003 from 12.5% for the year ended December 31, 2002.

Outpatient Rehabilitation. Outpatient rehabilitation Adjusted EBITDA decreased by 7.6% to \$75.0 million for the year ended December 31, 2003 compared to \$81.1 million for the year ended December 31, 2002. Our outpatient rehabilitation Adjusted EBITDA margins decreased to 14.2% for the year ended December 31, 2003 from 16.7% for the year ended December 31, 2002. This Adjusted EBITDA margin decline was primarily the result of two factors. First, the acquired Kessler outpatient operations, which have historically had lower income from operations than our outpatient rehabilitation clinics, experienced negative margins for the year. The negative margins were primarily due to severance expense from staff reductions related to our consolidation and integration plan. Second, in January 2003 we began consolidating a group of clinics that we previously managed, which had the effect of further compressing margins.

Other. The Adjusted EBITDA loss was \$36.2 million for the year ended December 31, 2003 compared to a loss of \$24.7 million for the year ended December 31, 2002. This decrease in Adjusted EBITDA was primarily the result of the decline in Medicare reimbursements for corporate support costs of \$6.2 million resulting from the implementation of LTCH-PPS (See Critical Accounting Matters Sources of Revenue) and an increase in our general and administrative expenses of \$5.0 million.

Income from Operations

Income from operations increased 47.7% to \$149.8 million for the year ended December 31, 2003 compared to \$101.4 million for the year ended December 31, 2002. The increase in income from operations resulted from the Adjusted EBITDA increases described above, and was offset by an increase in depreciation and amortization expense of \$8.8 million. The increase in depreciation and amortization expense resulted primarily from the additional depreciation associated with the acquired Kessler assets, the amortization of the value of the seven year non-compete agreement that we received from Kessler's selling stockholder, and increases in depreciation on fixed asset additions that are principally related to new hospital and clinic development.

Interest Expense

Interest expense decreased by \$0.9 million to \$26.3 million for the year ended December 31, 2003 from \$27.2 million for the year ended December 31, 2002. The decline in interest expense is due to the lower debt levels outstanding in 2003 compared to 2002 on our credit facility and a lower effective interest rate in 2003. The lower debt levels resulted from scheduled term amortization payments and principal pre-payments that we have made under our credit facility. All repayments have been made with cash flows generated through operations. These reductions were offset by the incremental interest that resulted from the issuance of \$175 million of 7¹/₂% senior subordinated notes in August 2003.

Minority Interests

Minority interests in consolidated earnings increased to \$2.4 million for the year ended December 31, 2003 compared to \$2.0 million for the year ended December 31, 2002. This increase resulted from the improved profitability of our outpatient rehabilitation subsidiaries with minority interests. See Liquidity and Capital Resources.

Table of Contents***Income Taxes***

We recorded income tax expense of \$48.6 million for the year ended December 31, 2003. The expense represented an effective tax rate of 39.6%. We recorded income tax expense of \$28.6 million for the year ended December 31, 2002, representing an effective tax rate of 39.3%. The effective tax rates in both 2003 and 2002 approximate the federal and state statutory tax rates. The increase in the tax rate is the result of a larger portion of our net income being earned in states with higher tax rates.

Liquidity and Capital Resources***Three Months Ended March 31, 2005 and 2004***

Operating activities used \$172.9 million for the combined three months ended March 31, 2005 which includes \$186.0 million in cash expenses related to the merger. Excluding the merger related expenses, operating activities would have provided \$13.1 million of cash flow. This adjusted operating cash flow of \$13.1 million is below our recent historical trends due to a significant increase in our accounts receivable balance. Our days sales outstanding increased to 58 days at March 31, 2005, up from 48 days at December 31, 2004. The increase in days sales outstanding is primarily the result of a change in the way Medicare calculates our Periodic Interim Payments in our Specialty Hospitals. Medicare changed from a per day based calculation to a discharge based calculation to better align the Periodic Interim Payment methodology with the current discharged based reimbursement system. As a result, we are no longer receiving a periodic payment for those patients still in the hospital through our periodic interim payments. For the three months ended March 31, 2004, operating activities provided \$76.5 million of cash flow. Our cash flow from operations in this period benefited from strong collections of our accounts receivable, the timing of our payments from Medicare and our deferral of estimated tax payments. Our accounts receivable days outstanding were 49 days at March 31, 2004.

Investing activities used \$114.2 million of cash flow for the combined three months ended March 31, 2005. The primary use of cash related to the acquisition of SemperCare, which used \$105.1 million in cash. The remaining use of cash was primarily related to purchases of property and equipment of \$3.7 million and other acquisition related payments of \$5.4 million. For the three months ended March 31, 2004, investing activities used \$11.2 million of cash flow. This usage resulted from purchases of property and equipment of \$7.8 million, \$3.0 million in earn out payments and \$0.4 million in acquisition costs.

Financing activities provided \$59.0 million of cash for the combined three months ended March 31, 2005. The merger financing discussed below was the primary contributor of this cash flow. These excess proceeds from the merger financing were used to pay merger related costs, which includes the cancellation and cash-out of outstanding stock options. For the three months ended March 31, 2004, financing activities utilized \$20.0 million of cash. This principally related to the repurchase of our common stock during the quarter in accordance with the stock repurchase program we announced on February 23, 2004.

Years Ended December 31, 2004, 2003, and 2002

Operating activities generated \$174.3 million, \$246.2 million, and \$120.8 million in cash during the years ended December 31, 2004, 2003 and 2002, respectively. The significant increase in cash flow experienced in 2004 and 2003 compared to 2002 is attributable to improved operating income and significant reductions in our accounts receivable days outstanding. Our accounts receivable days outstanding were 48 days at December 31, 2004 compared to 52 days at December 31, 2003 and 73 days at December 31, 2002. This reduction has resulted from improvements we implemented in our business office operations which includes a focused effort to resolve problematic accounts in a timely manner and improved pre-admission policies to validate insurance coverage. In 2004, a one day change in our accounts receivable days outstanding had a \$4.6 million effect on operating cash flows.

Investing activities used \$21.9 million, \$261.5 million and \$54.0 million of cash flow for the years ended December 31, 2004, 2003 and 2002, respectively. Of this amount, we incurred earnout and acquisition related payments of \$4.9 million, \$228.2 million and \$10.9 million, respectively in 2004, 2003 and 2002. The Kessler acquisition costs, net of cash acquired, of \$223.9 million comprise most of the 2003 expenditures. The earnout

Table of Contents

payments related principally to obligations we assumed as part of our 1999 NovaCare acquisition. Acquisition payments related to amounts we paid for new business acquisitions. This usage also resulted from purchases of property and equipment of \$32.6 million, \$35.9 million and \$43.2 million in 2004, 2003 and 2002, respectively, which was related principally to new hospital development.

Financing activities used \$71.0 million and \$21.4 million of cash for the years ended December 31, 2004 and 2002, respectively. In 2004, this was principally due to the repurchase of our common stock during in accordance with the stock repurchase program we announced on February 23, 2004. During 2004, we repurchased a total of 3,399,400 shares at a cost, including fees and commissions, of \$48.1 million. Additionally, during 2004, we repaid all outstanding balances under our credit facility of \$8.5 million and repaid \$3.9 million of seller and other debt. Cash dividend payments in 2004 were \$9.2 million. Additionally, during 2004 we had \$18.6 million of cash flow from the issuance of common stock under our stock option plans. In 2002, the use of cash was due principally to the repayment of our credit facility and seller debt.

Financing activities provided \$124.3 million of cash for the year ended December 31, 2003. During 2003, we sold \$175.0 million of 7¹/₂% senior subordinated notes due 2013. The net proceeds from the sale were approximately \$169.4 million after deducting discounts, commissions and expenses of the offering, and were used to finance a portion of the Kessler acquisition. Deferred financing costs associated with the offering were \$5.9 million. During 2003, we repaid \$65.6 million of credit facility debt and \$3.7 million of seller and other debt. In December 2003, we declared and paid our company's first ever common stock cash dividend of \$0.03 per share, which resulted in an aggregate payment to our stockholders of \$3.1 million. In 2003 we received \$28.6 million of proceeds from the issuance of stock related to the exercise of employee stock options and stock warrants.

Capital Resources

Net working capital was \$158.0 million at March 31, 2005 compared to \$313.7 million at December 31, 2004. This decrease in working capital was principally related to the use of cash to fund merger costs, offset by an increase in accounts receivable.

Net working capital increased to \$313.7 million at December 31, 2004 compared to \$188.4 million at December 31, 2003. This increase in working capital was principally related to an increase in cash and a reduction in amounts due to third party payors. The reduction in amounts due to third-party payors was a result of filing and settling cost reports and refinements in the bi-weekly payments we receive from our Medicare fiscal intermediary related to our Medicare patients.

In connection with the Transactions, on February 24, 2005 we borrowed \$780.0 million under a new \$880.0 million senior secured credit facility and issued \$660.0 million principal amount of our outstanding notes. See The Transactions. At March 31, 2005 we had outstanding \$1.45 billion in aggregate indebtedness, excluding \$16.4 million of letters of credit, with approximately \$83.6 million of additional borrowing capacity under our new senior secured credit facility. As a result, our liquidity requirements will be significantly higher in future periods due to our increased debt service obligations than they were in prior years. For the year ended December 31, 2004, on a pro forma basis after giving effect to the Transactions, our interest expense would have been \$96.9 million.

On February 24, 2005, we entered into a new senior secured credit facility with a syndicate of financial institutions and institutional lenders. Our new senior secured credit facility provides for senior secured financing of up to \$880.0 million, consisting of:

- a \$300.0 million revolving loan facility with a maturity of six years, including both a letter of credit sub-facility and a swingline loan sub-facility, and

- a \$580.0 million term loan facility with a maturity of seven years.

Proceeds of the term loans and \$200.0 million of revolving loans, together with other sources of funds described under The Transactions, were used to finance the Transactions. Proceeds of the revolving loans borrowed after the closing date of the Transactions, swingline loans and letters of credit will be used for working capital and general corporate purposes.

Table of Contents

The interest rates per annum applicable to loans, other than swingline loans, under our new senior secured credit facility are, at our option, equal to either an alternate base rate or an adjusted LIBOR rate for a one, two, three or six month interest period, or a nine or twelve month period if available, in each case, plus an applicable margin percentage. The alternate base rate is the greater of (1) JPMorgan Chase Bank, N.A.'s prime rate and (2) one-half of 1% over the weighted average of rates on overnight Federal funds as published by the Federal Reserve Bank of New York. The adjusted LIBOR rate will be determined by reference to settlement rates established for deposits in dollars in the London interbank market for a period equal to the interest period of the loan and the maximum reserve percentages established by the Board of Governors of the United States Federal Reserve to which our lenders are subject. The applicable margin percentage is (1) 1.50% for alternate base rate revolving loans and (2) 2.50% for adjusted LIBOR rate revolving loans, subject to reduction beginning approximately six months after the closing based upon the ratio of our total indebtedness to our consolidated EBITDA (as defined in the credit agreement governing our new senior secured credit facility). The applicable margin percentages for the term loans are (1) 0.75% for alternate base rate loans and (2) 1.75% for adjusted LIBOR loans. See Interest Rate Risks.

For a summary of the terms of our new senior secured credit facility, see Description of Certain Other Indebtedness Our New Senior Secured Credit Facility.

On February 24, 2005, we issued and sold \$660.0 million in aggregate principal amount of our outstanding 7⁵/₈% senior subordinated notes due 2015. The net proceeds of the offering were used to finance a portion of the funds needed to consummate the merger with EGL Acquisition Corp. The notes were issued under an indenture between us and U.S. Bank Trust National Association, as trustee. Interest on the notes is payable semiannually in arrears on February 1 and August 1 of each year, commencing August 1, 2005. The notes are guaranteed by all of our wholly-owned domestic subsidiaries, subject to certain exceptions. On or after February 1, 2010, the notes may be redeemed at our option, in whole or in part, at redemption prices that decline annually to 100% on and after February 1, 2013, plus accrued and unpaid interest. Prior to February 1, 2008, we may at our option on one or more occasions with the net cash proceeds from certain equity offerings redeem the outstanding notes in an aggregate principal amount not to exceed 35% of the aggregate principal amount originally issued at a redemption price of 107.625%, plus accrued and unpaid interest to the redemption date.

Upon a change of control of our company (as defined in the indenture governing the notes), each holder of notes may require us to repurchase all or any portion of the holder's notes at a purchase price equal to 101% of the principal amount plus accrued and unpaid interest to the date of purchase.

Our 9¹/₂% senior subordinated notes due 2009 were issued in June 2001 in an original aggregate principal amount of \$175.0 million. We commenced a debt tender offer and redeemed \$169.3 million in aggregate principal amount of these notes in connection with the Transactions. See The Transactions. On June 15, 2005, we redeemed the remaining \$5.7 million outstanding principal amount of our 9¹/₂% senior subordinated notes due 2009 for a redemption price of 104.750% of the principal amount plus accrued and unpaid interest.

We believe internally generated cash flows and borrowings of revolving loans under our new senior secured credit facility will be sufficient to finance operations for at least the next twelve months.

As a result of the recently enacted HIH regulations, we currently anticipate that we will need to relocate approximately 50% of our long-term acute care hospitals over the next five years, including certain of our hospitals acquired in the SemperCare acquisition. This process will include relocating certain HIHs to leased spaces in smaller host hospitals in the same markets, consolidating HIHs in certain of our markets, relocating certain of our HIHs to alternative settings, building or buying free-standing facilities. These relocation efforts will require us to spend additional capital above historic levels. We currently expect to spend approximately \$500 million on capital expenditures over the next five years, including both our ongoing maintenance capital expenditures and the capital required for hospital relocations.

In the year ended December 31, 2004, we opened four long-term acute care hospitals and closed one existing hospital. We expect to open four new long-term acute care hospitals in 2005, primarily in settings

Table of Contents

where the HHI regulations would have little or no impact, such as in free-standing buildings. Additionally, we are evaluating opportunities to develop free-standing inpatient rehabilitation facilities similar to the four inpatient rehabilitation facilities acquired through our September 2003 Kessler acquisition. We also intend to open new outpatient rehabilitation clinics in our current markets where we can benefit from existing referral relationships and brand awareness to produce incremental growth. From time to time, we also intend to evaluate specialty hospital acquisition opportunities that may enhance the scale of our business and expand our geographic reach.

Commitments and Contingencies

The following table summarizes our contractual obligations at December 31, 2004, and the effect such obligations are expected to have on our liquidity and cash flow in future periods.

Contractual Obligations	Total	Payments Due by Year			
		2005	2006-2008	2009-2010	After 2010
(Dollars in thousands)					
9 ¹ / ₂ % Senior Subordinated Notes	\$ 175,000	\$	\$	\$ 175,000	\$
7 ¹ / ₂ % Senior Subordinated Notes	175,000				175,000
Seller Notes	3,406	2,782	624		
Capital Lease Obligations	252	119	133		
Other Debt Obligations	932	656	276		
Total Debt	354,590	3,557	1,033	175,000	175,000
Letters of Credit Outstanding	15,125	15,125			
Purchase Obligations	7,470	3,131	4,013	326
