Securities registered pursuant to Section 12(g) of the Securities Exchange Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (Section 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company (as defined in Rule 12b-2 of the Exchange Act).
large accelerated filer accelerated filer non-accelerated filer smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).
Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, as of the last business day of the registrant's most recently completed second fiscal quarter is \$24,717,504.

The number of the Registrant's Common Shares outstanding at October 31, 2016 was 5,525,256.

Documents incorporated by reference: Portions of the definitive Proxy Statement for the Annual Meeting of Shareholders to be held on January 25, 2017 (Part III).

PART I

Item 1. Business

A. The Company

SIFCO Industries, Inc. ("SIFCO," "Company," "we" or "our"), an Ohio corporation, was incorporated in 1916. The executive offices of the Company are located at 970 East 64th Street, Cleveland, Ohio 44103, and its telephone number is (216) 881-8600.

SIFCO Industries, Inc. is engaged in the production of forgings and machined components primarily for the Aerospace and Energy ("A&E") markets. The processes and services include forging, heat-treating and machining. The Company's operations are conducted in a single business segment. Information relating to the Company's financial results is set forth in the consolidated financial statements included in Item 8.

B. Principal Products and Services

1. SIFCO

Operations

SIFCO is a manufacturer of forgings and machined components for the A&E markets. SIFCO services both original equipment manufacturers ("OEM") and aftermarket customers with products that range in size from approximately 2 to 1,200 pounds. The Company's strategic vision is to build a leading A&E company positioned for long-term, stable growth and profitability. In the past several years, SIFCO has actively diversified into the industrial gas turbine business, added more commercial aerospace business, reduced its dependence on the U.S. military business, and broadened the scope of its product and service offerings by adding machining and finishing to its forgings capabilities.

SIFCO's continued migration toward a more commercial business and decreased dependence on military business is consistent with its strategic vision. In fiscal 2016, commercial and military revenues accounted for 60.9% and 39.1% of revenues, respectively, compared with 57.0% in commercial revenues and 43.0% in military revenues in fiscal 2015. The Company has also expanded its capabilities to be a supplier of forged and machined components, consisting primarily of aluminum, steel and titanium.

SIFCO operates from multiple locations. SIFCO manufacturing facilities are located in Cleveland, Ohio; Alliance, Ohio; Orange, California; Long Beach, California (production through March 2016 and transferred to Orange); Colorado Springs, Colorado (production through August 2016 and transferred to Orange); and Maniago, Italy.

The Company's success is not dependent on patents, trademarks, licenses or franchises.

SIFCO generally has multiple sources for its raw materials, which consist primarily of high quality metals essential to its business. Suppliers of such materials are located principally in North America, Taiwan and Europe. SIFCO generally does not depend on a single source for the supply of its materials. Due to the limited supply of certain raw materials, some material is provided by a small number of suppliers; however, SIFCO believes that its sources are adequate for its business. SIFCO's various operations are AS 9100C and/or ISO 9001:2000 certified.

Products

SIFCO's products are made primarily of steel, stainless steel, titanium and aluminum and include: OEM and aftermarket components for aircraft and industrial gas turbine engines; steam turbine blades; structural airframe components; aircraft landing gear components; aircraft wheels and brakes; critical rotating components for helicopters; and commercial/industrial products. SIFCO also provides heat-treatment, surface-treatment, non-destructive testing and select machining of forged components.

Industry

The performance of the domestic and international air transport industry and the energy industry, as well as government defense spending, directly and significantly impacts the performance of SIFCO.

SIFCO supplies new and spare components for commercial aircraft, principally for large aircraft produced by Boeing and Airbus. A continued increase in passenger travel demand will drive backlog for new aircraft. Demand for more fuel-efficient aircraft, particularly the Boeing 737Max and 787 and the Airbus A320neo and A350, remains strong with both companies reporting healthy backlogs.

SIFCO also supplies new and spare components to the U.S. military for aircraft, helicopters, vehicles, and ammunition. While the defense budget in the United States has decreased in recent years, the demand for certain programs in which the Company participates has been more favorable.

SIFCO supplies new and spare components to the energy industry, particularly the industrial turbine market. The industrial gas turbine market is projecting flat near-term growth and improved long-term OEM growth, due to the entrance of new fuel efficient turbines into the energy market by General Electric and Siemens. We anticipate that the demand in the maintenance, repair and overhaul market will remain strong.

Competition

SIFCO competes with numerous companies, approximately fifteen of which are known by SIFCO, and some of which are non-U.S. based companies. Many of these companies focus within the A&E markets. While there has been some consolidation in the forging industry, SIFCO believes there is limited opportunity to increase prices, other than for the pass-through of raw material price increases and valued added services. SIFCO believes that it has an advantage in the primary markets it serves due to: (i) demonstrated A&E expertise; (ii) focus on quality and customer service; (iii) operating initiatives such as SMART (Streamlined Manufacturing Activities to Reduce Time/Cost) and Six Sigma; and (iv) offering a broad range of capabilities. SIFCO competes with both U.S. and non-U.S. suppliers of forgings, some of which are significantly larger than SIFCO. As customers establish new facilities throughout the world, SIFCO will continue to encounter non-U.S. competition. SIFCO believes it can expand its markets by (i) acquiring additional forging and machining operations; (ii) broadening its product lines through investment in equipment that expands its manufacturing capabilities; and (iii) developing new customers in markets where the participants require similar technical competence and service as those in the A&E industries and who are willing to pay a premium for quality and service.

Customers

During fiscal 2016, SIFCO had two customers, consisting of various business units of Rolls Royce and United Technologies Corporation, which accounted for 11% and 10%, respectively, of consolidated net sales. The net sales to these two customers, and to their direct subcontractors, accounted for 23% of consolidated net sales in fiscal 2016. SIFCO believes that the loss of sales to such customers would result in a materially adverse impact on the business and its income. However, SIFCO has maintained a business relationship with these customers for several years and is currently conducting business with them under multi-year agreements. Although there is no assurance that this will continue, historically, as one or more major customers have reduced their purchases, SIFCO has generally been successful in gaining new business, thereby avoiding a material adverse impact on the Company. SIFCO relies on its ability to adapt its services and operations to changing requirements of the market in general and its customers in particular. No material part of SIFCO's business is seasonal. For additional financial information about geographic areas, refer to Note 10 of the consolidated financial statements included in Item 8.

Backlog of Orders

SIFCO's total backlog as of September 30, 2016 decreased to \$92.5 million, compared with \$94.8 million as of September 30, 2015. Despite the decline in total backlog, orders for delivery scheduled within the upcoming fiscal year increased to \$84.3 million compared with \$78.1 million scheduled in fiscal 2016. Orders may be subject to modification or cancellation by the customer with limited charges. The decrease in total backlog as of September 30, 2016 compared with the previous year is primarily attributable to loss of low margin customer accounts. Backlog information may not be indicative of future sales.

2. Other

In fiscal 2013, the Company discontinued its Turbine Component Services and Repair ("Repair Group") operations. The Repair Group had a single operation in Minneapolis, Minnesota, and this segment of the Company's business

consisted of the repair and remanufacture of small turbine engine components principally for aerospace applications. As a part of the repair and remanufacture process, the business performed precision component machining and applied high temperature-resistant coatings to turbine engine components. In January of fiscal 2015, the Company completed the sale of its Minneapolis building.

C. Environmental Regulations

The Company is required to comply with various laws and regulations relating to the protection of the environment. The costs of such compliance have not had, and are not presently expected to have, a material effect on the capital expenditures, earnings or competitive position of the Company and its subsidiaries under existing regulations and interpretations.

D. Employees

The number of SIFCO employees increased from approximately 593 at the beginning of fiscal 2016 to approximately 607 employees at the end of fiscal 2016. The Company is a party to collective bargaining agreements with certain employees located at the Cleveland, Ohio (expires in May 2020) and Alliance, Ohio (expires in July 2017) plants. The Maniago location is party to the National Collective Agreement in metal working (expired December 2015; negotiations are ongoing and has not disrupted the Company's operations in Italy).

E. Non-U.S. Operations

In fiscal 2015, SIFCO completed the acquisition of all of the outstanding equity of C*Blade S.p.A. Forging & Manufacturing ("Maniago", previously disclosed as "C*Blade"), located in Maniago, Italy, from Riello Investimenti Partners SGR S.p.A., Giorgio Visentini, Giorgio Frassini, Giancarlo Sclabi and Matteo Talmassons. Financial information relating to the Company's acquisition is referenced in Note 11 of the consolidated financial statements included in Item 8. Maniago specializes in the manufacturing of steam turbine blades and gas compressor blades for the energy industry.

F. Available Information

The Company files annual, quarterly, and current reports, proxy statements, and other documents with the SEC under the Securities Exchange Act of 1934. The public may read and copy any materials filed with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Also, the SEC maintains an Internet website that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The public can obtain any documents that are filed by the Company at <http://www.sec.gov>.

In addition, our annual reports on Form 10-K, as well as our quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to all of the foregoing reports, are made available free of charge on or through the "Investor Relations" section of our website at www.sifco.com as soon as reasonably practicable after such reports are electronically filed with or furnished to the SEC.

Information relating to our corporate governance at SIFCO, including the Audit Committee, Corporate Governance and Nominating Committee and Compensation Committee Charters, as well as the Corporate Governance Guidelines and Policies and the Code of Conduct & Ethics adopted by our Board of Directors, is available free of charge on or through the "Investor Relations" section of our website at www.sifco.com. References to our website or the SEC's website do not constitute incorporation by reference of the information contained on such websites, and such information is not part of this Form 10-K.

Item 2. Properties

The Company's property, plant and equipment include the facilities described below and a substantial quantity of machinery and equipment, most of which consists of industry specific machinery and equipment using special dies, jigs, tools and fixtures and in many instances having automatic control features and special adaptations. In general, the Company's property, plant and equipment are in good operating condition, are well maintained, and substantially all of its facilities are in regular use. The Company considers its investment in property, plant and equipment as of September 30, 2016 suitable and adequate given the current product offerings for the respective business segments' operations in the current business environment. The square footage numbers set forth in the following paragraphs are approximations:

SIFCO operates and manufactures in multiple facilities—(i) an owned 240,000 square foot facility located in Cleveland, Ohio, which is also the site of the Company's corporate headquarters, (ii) an owned 450,000 square foot facility located in Alliance, Ohio, (iii) leased facilities aggregating approximately 70,000 square feet located in Orange, California after the expansion and consolidation, and (iv) owned facilities aggregating approximately 91,000 square

feet located in Maniago, Italy.

The Company also leases space in its Colorado Springs facility which expires at December 31, 2016 and will not be renewed. The Long Beach facility is under a month-to-month agreement and is being consolidated into an expanded Orange facility.

The Company owns a building located in Cork, Ireland (59,000 square feet) that is subject to a long-term lease arrangement with the acquirer of the Repair Group's industrial turbine engine component repair business that was sold in June 2007.

Item 3. Legal Proceedings

In the normal course of business, the Company may be involved in ordinary, routine legal actions. The Company cannot reasonably estimate future costs, if any, related to these matters and does not believe any such matters are material to its financial condition or results of operations. The Company maintains various liability insurance coverages to protect its assets from losses arising out of or involving activities associated with ongoing and normal business operations; however, it is possible that the Company's future operating results could be affected by future costs of litigation.

Executive Officers of the Registrant

Set forth below is certain information concerning the Company's executive officers. The executive officers are appointed annually by the Board of Directors.

Peter W. Knapper - President and Chief Executive Officer

Salvatore Incanno - Vice President and Chief Financial Officer

Name	Age	Title and Business Experience
Peter W. Knapper	55	President and Chief Executive Officer. Mr. Knapper succeeded Mr. Lipscomb to this position on June 29, 2016. Prior to his appointment, Mr. Knapper worked for the TECT Corporation from 2007 to 2016, and was the Director of Strategy and Site Development. TECT offers the aerospace, power-generation, transportation, marine, and medical industries a combination of capabilities unique among metal component manufacturers. Prior to this role, Mr. Knapper, served as President of TECT Aerospace and Vice President of Operations of TECT Power. In addition, Mr. Knapper spent five years at Rolls Royce Energy Systems, Inc., a subsidiary of Roll-Royce Holdings plc, as the Director of Component Manufacturing and Assembly. Mr. Knapper brings his strategic and industry experience to his role in management and to the Board of the Company.
Salvatore Incanno	49	Vice President and Chief Financial Officer since May 2015. Prior to joining SIFCO, Mr. Incanno was General Manager of Patch Rubber Company, a rubber manufacturer located in Weldon, NC and subsidiary of Myers Industries. From 2007 to 2015, Mr. Incanno served various roles at Myers Industries, a diversified manufacturing and distribution company, including Vice President of Corporate Development and Corporate Treasurer. Prior to Myers Industries, Mr. Incanno has held various Finance positions at The Reynolds & Reynolds Company, Compaq Computer Corp., and Conoco Inc.

PART II

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Form 10-K may contain various forward-looking statements and includes assumptions concerning the Company's operations, future results and prospects. These forward-looking statements are based on current expectations and are subject to risk and uncertainties. In connection with the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, the Company provides this cautionary statement identifying important economic, political and technological factors, among others, the absence or effect of which could cause the actual results or events to differ materially from those set forth in or implied by the forward-looking statements and related assumptions. Such factors include the following: (1) the impact on business conditions in general, and on the demand for product in the A&E industries in particular, of the global economic outlook, including the continuation of military spending at or near current levels and the availability of capital and liquidity from banks and other providers of credit; (2) the future business environment, including capital and consumer spending; (3) competitive factors, including the ability to replace business that may be lost at comparable margins; (4) metals and commodities price increases and the

Company's ability to recover such price increases; (5) successful development and market introduction of new products and services; (6) continued reliance on consumer acceptance of regional and business aircraft powered by more fuel efficient turboprop engines; (7) continued reliance on military spending, in general, and/or several major customers, in particular, for revenues; (8) the impact on future contributions to the Company's defined benefit pension plans due to changes in actuarial assumptions, government regulations and the market value of plan assets; (9) stable governments, business conditions, laws, regulations and taxes in economies where business is conducted; and (10) the ability to successfully integrate businesses that may be acquired into the Company's operations.

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Company’s Common Shares are traded on the NYSE MKT exchange under the symbol “SIF”. The following table sets forth, for the periods indicated, the high and low closing sales price for the Company’s Common Shares.

	Years Ended September 30,			
	2016		2015	
	High	Low	High	Low
First Quarter	\$13.20	\$9.50	\$34.89	\$27.66
Second Quarter	10.08	7.58	30.50	19.54
Third Quarter	11.00	9.09	22.21	13.80
Fourth Quarter	9.96	6.29	15.44	11.29

Dividends and Shares Outstanding

The Company did not declare a cash dividend during fiscal 2016 or fiscal 2015. The Company will continue to evaluate the payment of such dividends annually based on its relative profitability, available resources, and investment strategies. The Company currently intends to retain a significant majority of its earnings for the operation and growth of its business. The Company’s ability to declare or pay cash dividends is limited by its credit agreement covenants. At October 31, 2016, there were approximately 545 shareholders of record of the Company’s Common Shares, as reported by Computershare, Inc., the Company’s Transfer Agent and Registrar, which maintains its U.S. corporate offices at 250 Royall Street, Canton, MA 02021.

Reference Part III, Item 12. “Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters” for information related to the Company’s equity compensation plans.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

SIFCO is engaged in the production of forgings and machined components primarily for the aerospace and energy markets. The processes and services include forging, heat-treating and machining. The Company operates under one business segment.

The Company endeavors to plan and evaluate its business operations while taking into consideration certain factors including the following: (i) the projected build rate for commercial, business and military aircraft, as well as the engines that power such aircraft; (ii) the projected build rate for industrial steam and gas turbine engines; and (iii) the projected maintenance, repair and overhaul schedules for commercial, business and military aircraft, as well as the engines that power such aircraft.

The Company operates within a cost structure that includes a significant fixed component. Therefore, higher net sales volumes are expected to result in greater operating income because such higher volumes allow the business operations to better leverage the fixed component of their respective cost structures. Conversely, the opposite effect is expected to occur at lower net sales and related production volumes.

A. Results of Operations

Overview

SIFCO is building on the transformative changes set in motion in previous years. The changes revolved around a strategy to focus on the aerospace and energy markets through the divestiture of its Repair Group business in fiscal 2013 and to grow its worldwide footprint through the acquisition of Maniago in fiscal 2015. The Company implemented an Enterprise Resource Planning system at two of its facilities and is now focusing on the improvements to enable it to process product through its plants efficiently and effectively. With the hiring of a new CEO this year,

the top priority is to its customers, employees, and shareholders, by committing to deliver quality products on-time within a safe working environment and to react quickly to changes in market conditions.

Fiscal Year 2016 Compared with Fiscal Year 2015

Net Sales

The Company produces forged components for (i) turbine engines that power commercial, business and regional aircraft as well as military aircraft and armored military vehicles; (ii) airframe applications for a variety of aircraft; (iii) industrial gas and steam turbine engines for power generation units; and (iv) other commercial applications. SIFCO's results for fiscal 2016 include a full

6

year of Maniago, compared with three months in fiscal 2015. Net sales in fiscal 2016 increased 9.0% to \$119.1 million, compared to \$109.3 million in fiscal 2015. Net sales comparative information for fiscal 2016 and 2015, respectively, is as follows:

(Dollars in millions)	Years Ended		Increase (Decrease)
	September 30, 2016	2015	
Net Sales			
Aerospace components for:			
Fixed wing aircraft	\$63.0	\$58.7	\$ 4.3
Rotorcraft	18.5	23.2	(4.7)
Energy components for power generation units	29.2	15.4	13.8
Commercial product and other revenue	8.4	12.0	(3.6)
Total	\$119.1	\$109.3	\$ 9.8

Overall, net sales for the Company increased \$9.8 million in fiscal 2016 compared to fiscal 2015. The increase in sales is primarily attributed to \$12.6 million in net sales due to the acquisition of Maniago, which is included within energy components for power generation units. Also included in energy components for power generation units, the Company experienced higher volume with one of its primary customers and direct subcontractors. Changes in build rates and spare requirements in programs, such as the Boeing 787, the SKF GEAE LEAP X, the Bell-Boeing V-22, the Lockheed Martin F-16 and the Sikorsky H-60 drove the increase in fixed wing aircraft net sales and a decrease in rotorcraft net sales compared with last year. Commercial product and other revenue decreased \$3.6 million to \$8.4 million in fiscal 2016 due primarily to a decrease of \$1.0 million in a military ordnance program as a result of timing of customer order placement in the current period and build rates within the industrial, mining, gas and oil markets. The Company's aerospace components have both military and commercial applications. Commercial net sales were 60.9% of total net sales and military net sales were 39.1% of total net sales in fiscal 2016, compared with 56.9% and 43.1%, respectively, in the comparable period in fiscal 2015. Commercial net sales increased \$10.3 million to \$72.5 million in fiscal 2016, compared to \$62.2 million in fiscal 2015, primarily due to higher sales from the Company's energy components and a full year of net sales at Maniago. Military net sales decreased \$0.5 million to \$46.6 million in fiscal 2016, compared to \$47.1 million in fiscal 2015 primarily due to changes in build rates to the programs mentioned above, partially offset by the continued increase in sales related to a military ordnance program.

Cost of Goods Sold

Cost of goods sold increased by \$13.5 million, or 14.4%, to \$107.0 million during fiscal 2016, compared with \$93.6 million in the same period of fiscal 2015, primarily due to \$12.9 million attributed to the acquisition of Maniago and higher benefits, primarily pension expenses, of \$0.6 million.

Gross Profit

Gross profit decreased by \$3.7 million, or 23.2%, to \$12.1 million during fiscal 2016, compared with \$15.7 million in fiscal 2015. Gross margin as a percentage of sales was 10.1% during fiscal 2016, compared with 14.4% in fiscal 2015. The decrease in gross profit was primarily a result of product mix due to change in customer build rates to programs as noted above and higher benefit charges, which resulted in unabsorbed costs.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased by \$1.8 million to \$17.4 million, or 14.6% of net sales, during fiscal 2016, compared to \$19.2 million, or 17.5% of net sales, in fiscal 2015. The decrease in selling, general and administrative expenses is primarily due to one-time charges in fiscal 2015 for \$2.7 million of transactional costs related to the acquisition of Maniago and \$1.0 million severance charges which were not incurred in fiscal 2016. Additionally, the Company recorded \$0.9 million lower long-term incentive compensation expense than in prior year. These benefits were partially offset by \$1.1 million of selling, general and administrative expenses at Maniago, higher costs of \$0.8 million related to the expansion of one of its plant locations, higher audit-related costs of \$0.7 million and \$0.2 million in search costs for the new CEO as disclosed in the Company's Form 8-K filing on March 18, 2016.

Amortization of Intangibles and Goodwill Impairment

Amortization of intangibles was \$2.6 million during fiscal 2016, compared to \$2.2 million in the comparable period of fiscal 2015. The increase is primarily associated with the amortization of intangible assets as a result of the acquisition of Maniago.

After performing its annual goodwill impairment test in the fourth quarter of 2016, it was determined that \$4.2 million of goodwill associated with our Orange, California reporting unit was impaired as the carrying value of the reporting unit exceeded its fair value. This is further referenced in Note 3 of the consolidated financial statements included in Item 8.

Other/General

Interest expense increased to \$1.7 million during fiscal 2016, compared with \$0.6 million in fiscal 2015. The increase is primarily due to the increased borrowing in connection with the acquisition of Maniago.

The following table sets forth the weighted average interest rates and weighted average outstanding balances under the Company's debt agreements in fiscal 2016 and 2015:

	Weighted Average Interest Rate		Weighted Average Outstanding Balance	
	Years Ended September 30,		Years Ended September 30,	
	2016	2015	2016	2015
Revolving credit agreement	3.9 %	2.1 %	\$ 14.0 million	\$ 13.4 million
Term note	3.8 %	3.3 %	\$ 18.2 million	\$ 8.0 million
Foreign term debt	2.5 %	2.3 %	\$ 11.7 million	\$ 13.2 million

Other income, (net) was \$0.4 million during fiscal 2016, compared to \$0.5 million in the comparable period of fiscal 2015. The amount principally consists of rental income earned from the lease of the Cork, Ireland facility for both fiscal 2016 and 2015.

The Company believes that inflation did not materially affect its results of operations in either fiscal 2016 or 2015 and does not expect inflation to be a significant factor in fiscal 2017.

Income Taxes

The Company's effective tax rate in fiscal 2016 was 15%, compared with 41% in fiscal 2015. This decrease is primarily attributed to tax expense applied against a pre-tax book loss related to the establishment of a valuation allowance against the Company's U.S. deferred tax assets determined to be not more likely than not realizable as of September 30, 2016. Additionally, in fiscal 2015, the effective tax rate was increased due to a tax benefit applied against a pre-tax book loss associated with the reversal of previously recorded U.S. deferred taxes on the Company's non-U.S. undistributed earnings.

The effective tax rate differs from the U.S. federal statutory rate in fiscal 2016 due primarily to (i) the establishment of a valuation allowance in the U.S., and (ii) current year losses incurred in the U.S. where no associated tax benefit can be realized due to the valuation allowance. In fiscal 2015, the effective tax rate differed from the U.S. federal statutory rate due primarily to (i) a change in the Company's indefinite reinvestment assertion, (ii) the application of U.S. tax credits, and (iii) the impact of U.S. state and local income taxes. The impact of these rate reconciling items were partially offset by (i) the impact of foreign earnings taxed at different rates than U.S. statutory rates, (ii) permanent book-tax difference related to acquisition costs, and (iii) an increase in the valuation allowance related to foreign tax credits.

Loss from Continuing Operations

Loss from continuing operations, net of tax was \$11.3 million during fiscal 2016, compared with loss of \$3.6 million, in fiscal 2015 due primarily to the factors noted above.

Income from Discontinued Operations

The Company did not incur costs related to discontinued operations in fiscal 2016. Included in fiscal 2015 there was \$0.7 million in income from discontinued operations, which includes the after-tax gain on the sale of the building and land of the Turbine Component Service and Repair business.

Net Loss

Net loss was \$11.3 million during fiscal 2016, compared with net loss of \$2.9 million in fiscal 2015. Results decreased primarily due to lower gross profit, goodwill impairment charge, higher interest expense incurred and lower income tax benefits as noted above.

Non-GAAP Financial Measures

Presented below is certain financial information based on our EBITDA and Adjusted EBITDA. References to "EBITDA" mean earnings from continuing operations before interest, taxes, depreciation and amortization, and

references to “Adjusted EBITDA” mean EBITDA plus, as applicable for each relevant period, certain adjustments as set forth in the reconciliations of net income to EBITDA and Adjusted EBITDA.

Neither EBITDA nor Adjusted EBITDA is a measurement of financial performance under generally accepted accounting principles in the United States of America (“GAAP”). The Company presents EBITDA and Adjusted EBITDA because it believes that they are useful indicators for evaluating operating performance and liquidity, including the Company’s ability to incur and service debt and it uses EBITDA to evaluate prospective acquisitions. Although the Company uses EBITDA and Adjusted EBITDA for the reasons noted above, the use of these non-GAAP financial measures as analytical tools has limitations. Therefore, reviewers of the Company’s financial information should not consider them in isolation, or as a substitute for analysis of the Company’s results of operations as reported in accordance with GAAP. Some of these limitations include:

Neither EBITDA nor Adjusted EBITDA reflects the interest expense, or the cash requirements necessary to service interest payments, on indebtedness;

Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and neither EBITDA nor Adjusted EBITDA reflects any cash requirements for such replacements;

The omission of the substantial amortization expense associated with the Company’s intangible assets further limits the usefulness of EBITDA and Adjusted EBITDA; and

Neither EBITDA nor Adjusted EBITDA includes the payment of taxes, which is a necessary element of operations. Because of these limitations, EBITDA and Adjusted EBITDA should not be considered as measures of discretionary cash available to the Company to invest in the growth of its businesses. Management compensates for these limitations by not viewing EBITDA or Adjusted EBITDA in isolation and specifically by using other GAAP measures, such as net income (loss), net sales, and operating profit (loss), to measure operating performance. The Company’s calculation of EBITDA and Adjusted EBITDA may not be comparable to the calculation of similarly titled measures reported by other companies.

The following table sets forth a reconciliation of net loss to EBITDA and Adjusted EBITDA:

(Dollars in thousands)	Years Ended	
	September 30, 2016	2015
Net loss	\$(11,335)	\$(2,872)
Less: Income from discontinued operations, net of tax	—	709
Loss from continuing operations	(11,335)	(3,581)
Adjustments:		
Depreciation and amortization expense	10,766	8,293
Interest expense, net	1,664	574
Income tax benefit	(1,998)	(2,444)
EBITDA	(903)	2,842
Adjustments:		
Foreign currency exchange loss, net (1)	33	215
Other income, net (2)	(429)	(507)
Loss on disposal of operating assets (3)	31	63
Inventory purchase accounting adjustments (4)	266	412
Non-recurring severance expense (5)	—	964
Equity compensation expense (income) (6)	(474)	730
Pension settlement expense (7)	223	—
Acquisition transaction-related expenses (8)	(94)	2,681
LIFO impact (9)	(482)	629
Orange expansion (10)	1,419	631
Executive search (11)	223	—
Goodwill impairment charge (12)	4,164	—
Adjusted EBITDA	\$3,977	\$8,660

(1) Represents the gain or loss from changes in the exchange rates between the functional currency and the foreign currency in which the transaction is denominated.

9

- (2) Represents miscellaneous non-operating income or expense, primarily rental income from the Company's Irish subsidiary.
- (3) Represents the difference between the proceeds from the sale of operating equipment and the carrying value shown on the Company's books.
- (4) Represents accounting adjustments to value inventory at fair market value associated with the acquisition of a business that was charged to cost of goods sold when the inventory was sold.
- (5) Represents severance expense related to the departure of an executive officer. Included in the \$964 for fiscal 2015 is \$233 of equity based compensation expense recognized by the Company under its 2007 Long-Term Incentive Plan.
- (6) Represents the equity-based compensation benefit and expense recognized by the Company under its 2007 Long-term Incentive Plan due to granting of awards, awards not vesting and/or forfeitures.
- (7) Represents expense incurred by a defined benefit pension plan related to settlement of pension obligations.
- (8) Represents transaction-related costs such as legal, financial, tax due diligence expenses, valuation services, costs, and executive travel that are required to be expensed as incurred.
- (9) Represents the increase (decrease) in the reserve for inventories for which cost is determined using the last in, first out ("LIFO") method.
- (10) Represents costs related to expansion of one of the plant locations that are required to be expensed as incurred.
- (11) Represents costs incurred for executive search fees as mentioned in its Form 8-K filing on March 18, 2016.
- (12) Represents goodwill impairment charge incurred at our Orange, California reporting unit. See Note 3 within Item 8 of the consolidated financial statements for further discussion.

B. Liquidity and Capital Resources

Cash and cash equivalents decreased to \$0.5 million at September 30, 2016 compared with \$0.7 million at September 30, 2015. At September 30, 2016 and 2015, approximately \$0.3 million and \$0.6 million, respectively, of the Company's cash and cash equivalents were in the possession of its non-U.S. subsidiaries. Distributions from the Company's non-U.S. subsidiaries to the Company may be subject to adverse tax consequences.

Operating Activities

The Company's operating activities from continuing operations provided \$12.3 million of cash in fiscal 2016, compared with cash used of \$1.3 million in fiscal 2015. The increase in cash provided by operating activities from continuing operations in fiscal 2016 was due to \$7.9 million of cash generated through working capital management, \$15.7 million of non-cash items such as depreciation and amortization expense, goodwill impairment charge, LIFO expense and equity compensation, partially offset by net loss of \$11.3 million. Cash provided by working capital is primarily due to a \$10.9 million decrease in accounts receivable due to collections of customer receivables, partially offset by a \$3.2 million reduction in accrued liabilities. Cash used for operating activities in 2015 was due to the net loss of \$2.9 million and a \$7.2 million use of working capital. The use of working capital is primarily due to a \$3.6 million increase in inventory due to delays in customer releases and was used to support sales in the first quarter of fiscal 2016 and \$3.3 million increase in receivables due to the timing of collections from customers. The use of cash in fiscal 2015 was partially offset by \$9.5 million of non-cash items, such as depreciation and amortization expense, LIFO expense and equity-based compensation expense.

Investing Activities

Cash used for investing activities of continuing operations was \$2.1 million in fiscal 2016, compared with \$25.8 million in fiscal 2015. Cash used for investing activities in fiscal 2015 included a cash payment of \$17.0 million for the acquisition of Maniago. Capital expenditures were \$2.4 million in fiscal 2016, compared with \$8.8 million in fiscal 2015. The decrease in capital expenditures is attributed to the reduced spending on the Company's ERP installation and the completion of the prior year's Cleveland plant investment project. In addition to the \$2.4 million expended for capital expenditures during fiscal 2016, \$0.3 million was committed as of September 30, 2016. The Company anticipates that total fiscal 2017 capital expenditures will be within the range of \$7.0 to \$8.0 million and will relate principally to the further enhancement of production and product offering capabilities, operating cost

reductions and expansion to one of the Company's plant locations.

Financing Activities

Cash used for financing activities was \$10.4 million in fiscal 2016, compared with \$22.5 million of cash provided by financing activities in fiscal 2015.

The Company had net repayments under its term loan of \$2.8 million and \$2.4 million under its foreign long-term loan of in fiscal 2016, compared with total net borrowings of \$14.6 million in fiscal 2015. The borrowings in fiscal 2015 were attributed to the acquisition of Maniago as further discussed in Note 11 of the consolidated financial statements included in Item 8.

The Company had net repayments under its revolving credit facility and short-term debt of \$5.2 million in fiscal 2016, compared with net borrowings of \$9.8 million in fiscal 2015. The repayments in fiscal 2016 were attributed to the improvements in working

capital. The increase in net borrowings from the revolving credit facility in fiscal 2015 was to fulfill working capital requirements, along with funding of the capital expenditures mentioned above and the cash dividend of \$0.20 per common share declared in the fourth quarter of fiscal 2014, which resulted in a cash expenditure of \$1.1 million during the first quarter of fiscal 2015.

On June 26, 2015, the Company entered into a Credit and Security Agreement (the "2015 Credit Agreement") with its lender. The credit facility under the 2015 Credit Agreement was comprised of (i) a five year revolving credit facility with a maximum borrowing amount of up to \$25.0 million, which reduced to \$20.0 million on January 1, 2016, and (ii) a five-year term loan of \$20.0 million. Amounts borrowed under the credit facility were secured by substantially all the assets of the Company and its U.S. subsidiaries and a pledge of 65% of the stock of its non-U.S. subsidiaries. The term loan under the 2015 Credit Agreement was repayable in quarterly installments of \$0.7 million starting September 30, 2015. The amounts borrowed under the 2015 Credit Agreement were used to repay the Company's existing revolver and term note, to fund the acquisition of Maniago on July 1, 2015, as referenced in Note 11 of the consolidated financial statements included in Item 8 and for working capital and general corporate purposes. The 2015 Credit Agreement also had an accordion feature, which allowed the Company to increase the availability by up to \$15.0 million upon consent of the existing lenders or upon additional lenders being joined to the facility. Borrowings bore interest at the LIBOR rate, prime rate, or the eurocurrency reference rate depending on the type of loan requested by the Company in each case, plus the applicable margin as set forth in the 2015 Credit Agreement. With the 2015 Credit Agreement, the Company incurred debt issuance costs of \$0.7 million.

The revolver and term loan had a rate based on LIBOR, which were 3.9% and 3.8%, respectively at September 30, 2016. The bank loans were subject to certain customary financial covenants including, without limitation, covenants that required the Company to not exceed a maximum leverage ratio and to maintain a minimum fixed charge coverage ratio. There was also a commitment fee ranging from 0.15% to 0.35%, to be incurred on the unused balance.

Effective November 9, 2016, the Company entered into an amended and restated credit and security agreement (the "Amended and Restated Agreement") with its lenders. The Amended and Restated Agreement matures on June 25, 2020 and consists of senior secured loans in an aggregate principal amount of up to \$39.9 million (the "Credit Facility"). The Credit Facility is composed of (i) a senior secured revolving credit facility of a maximum of \$35.0 million (the "Revolving Credit Facility"), including swing line loans and letters of credit and (ii) a senior secured term loan facility of up to \$4.9 million (the "Term Loan Facility"). The terms of Credit Facility contain both a lockbox arrangement and subjective acceleration clause. As a result, the amounts outstanding on the Revolving Credit Facility will be classified as current maturities of long-term debt.

Amounts borrowed under the Credit Facility will be used to repay amounts outstanding under the 2015 Credit Agreement, for working capital, for general corporate purposes and to pay fees and expenses associated with this transaction. Amounts borrowed under the Credit Facility are secured by substantially all the assets of the Company and its U.S. subsidiaries and a pledge of 65% of the stock of its first-tier non-U.S. subsidiaries. Borrowings will bear interest at the LIBOR rate or prime rate, depending on the type of loan requested by the Company, in each case, plus the applicable margin as set forth in the Amended and Restated Agreement. The Amended and Restated Agreement contains customary affirmative and negative covenants which, among other things, require the Company to maintain a minimum consolidated adjusted EBITDA and maintain a minimum fixed charge coverage ratio. The Amended and Restated Agreement also contains covenants which, among other things, limit the Company's ability to: make capital expenditures beyond agreed upon dollar amounts; incur additional debt; make certain investments; create or permit certain liens; merge, consolidate or sell assets outside of the ordinary course of business; and engage in other activities customarily restricted in such agreements, in each case subject to exceptions permitted by the Amended and Restated Agreement. The Amended and Restated Agreement also contains customary representations and warranties and default provisions (with customary grace periods, as applicable) and provides that, upon the occurrence and continuation of an event of default, payment of all amounts payable under the Credit Facility may be accelerated and/or the lenders' commitments may be terminated. In addition, upon the occurrence of certain insolvency or bankruptcy related events of default, such commitments will automatically terminate and all amounts outstanding under the Credit Facility will automatically become immediately due and payable. Refer to Item 8. Note 13 Subsequent Events for further discussion.

Upon closing of the Credit Facility, any defaults that may have existed under the 2015 Credit Agreement were waived and no longer in effect. As a result of the Amended and Restated Agreement and the inclusion of a lockbox arrangement and subjective acceleration clause, the Revolving Credit Facility and all but \$4.1 million of the Term Loan Facility at September 30, 2016 was classified as current maturities of long-term debt. Refer to Note 5 Debt included in Item 8 for further discussion.

Future cash flows from the Company's operations will be used to pay down amounts outstanding under the credit agreement. The Company believes it has adequate cash/liquidity available to finance its operations from the combination of (i) the Company's expected cash flows from operations and (ii) funds available under the credit agreement.

C. Off-Balance Sheet Arrangements

In the normal course of business, the Company is party to certain arrangements that are not reflected in the Statement of Consolidated Financial Position. These include operating leases as described more fully in Note 9 to the consolidated financial statements included in Item 8, which primarily relate to office space. The Company does not have obligations that meet the definition of an off-balance sheet arrangement that have had, or are reasonably likely to have, a material effect on the Company's financial condition or results of operations.

D. Critical Accounting Policies and Estimates

Allowances for Doubtful Accounts

The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of certain customers to make required payments. The Company evaluates the adequacy of its allowances for doubtful accounts each quarter based on the customers' credit-worthiness, current economic trends or market conditions, past collection history, aging of outstanding accounts receivable and specific identified risks. As these factors change, the Company's allowances for doubtful accounts may change in subsequent periods. Historically, losses have been within management's expectations and have not been significant.

Inventories

The Company maintains allowances for obsolete and excess inventory. The Company evaluates its allowances for obsolete and excess inventory each quarter. The Company maintains a formal policy, which requires at a minimum, that a reserve be established based on an analysis of the age of the inventory. In addition, if the Company learns of specific obsolescence, other than that identified by the aging criteria, an additional reserve will be recognized as well. Specific obsolescence may arise due to a technological or market change, or based on cancellation of an order. Management's judgment is necessary in determining the realizable value of these products to arrive at the proper allowance for obsolete and excess inventory.

Impairment of Long-Lived Assets

The Company reviews the carrying value of its long-lived assets, including property, plant and equipment, at least annually or when events and circumstances warrant such a review. This review involves judgment and is performed using estimates of future undiscounted cash flows, which include proceeds from disposal of assets and which the Company considers a critical accounting estimate. If the carrying value of a long-lived asset is greater than the estimated undiscounted future cash flows, then the long-lived asset is considered impaired and an impairment charge is recorded for the amount by which the carrying value of the long-lived asset exceeds its fair value.

In projecting future undiscounted cash flows, the Company relies on internal budgets and forecasts, and projected proceeds upon disposal of long-lived assets. The Company's budgets and forecasts are based on historical results and anticipated future market conditions, such as the general business climate and the effectiveness of competition. The Company believes that its estimates of future undiscounted cash flows and fair value are reasonable; however, changes in estimates of such undiscounted cash flows and fair value could change the Company's estimates of fair value, which could result in future impairment charges.

Impairment of Goodwill

Goodwill is the excess of the purchase price paid over the fair value of the net assets of an acquired business. The determination of the fair value of assets and liabilities acquired typically involves obtaining independent appraisals of certain tangible and intangible assets and may require management to make certain assumptions and estimates regarding future events. Goodwill is not amortized, but is subject to an annual impairment test or more frequently if events or changes in circumstances indicate that goodwill may be impaired.

We use a two-step process to test goodwill for impairment. In the first step, we use a discounted cash flow analysis to determine the fair value of each reporting unit, which considers forecasted cash flows discounted at an estimated weighted average cost of capital. In assessing the valuation of our goodwill, significant assumptions regarding the estimated future cash flows and other factors to determine the fair value of a reporting unit must be made, including among other things, prospective financial information, growth rates, terminal value and discount rates and requires the Company to make certain assumptions and estimates regarding industry economic factors and future profitability of its businesses.

If the discounted cash flow analysis yields a fair value estimate less than the reporting unit's carrying value, we would proceed to step two of the impairment test. In the second step, the implied fair value of the reporting unit's goodwill is determined by allocating the reporting unit's fair value to the assets and liabilities other than goodwill in a manner similar to a purchase price allocation.

In performing this allocation of fair value to the assets and liabilities of the reporting unit, we typically utilize third-party valuation firms to support the fair values allocated. The resulting implied fair value of the goodwill that results from the application of this second step is then compared to the carrying amount of the goodwill and, if the carrying amount exceeds the implied fair value, an impairment charge is recorded for the difference. If these estimates were to change in the future as a result of changes in strategy or market conditions, we may be required to record impairment charges for these assets in the period such determination was made.

In performing our annual goodwill impairment test in the fourth quarter of 2016, we determined that \$4.2 million of goodwill associated with our Orange, California reporting unit was impaired as the carrying value of the reporting unit exceeded its fair value.

As of September 30, 2016, the remaining value of goodwill associated with our reporting units totaled \$11.7 million.

No impairment charges were identified in connection with our annual goodwill impairment test with respect to any of our other identified reporting units. The fair values for our Alliance and Maniago reporting units were in excess of our carrying values.

Purchase Price Allocations

The costs of business acquisitions are allocated to the acquired assets and liabilities based on their respective fair value at the time of the acquisition. The determination of fair values typically involves obtaining independent appraisals of certain tangible and intangible assets and may require management to make certain assumptions and estimates regarding future events. In determining fair value, management may develop a number of possible future cash flow scenarios to which probabilities are judgmentally assigned and evaluated. This allocation process impacts the Company's reported assets and liabilities and future net income.

Defined Benefit Pension Plan Expense

The Company maintains three defined benefit pension plans in accordance with the requirements of the Employee Retirement Income Security Act of 1974 ("ERISA"). The amounts recognized in the consolidated financial statements for pension benefits under these three defined benefit pension plans are determined on an actuarial basis utilizing various assumptions. The following table is a summary of our defined benefit pension funding and expense for fiscal 2016 and 2015, respectively:

	Pension Funding	Expense
2015	\$ —	\$ —
2016	—	0.8

The discussion that follows provides information on the significant assumptions/elements associated with these defined benefit pension plans.

One significant assumption in determining net pension expense is the expected return on plan assets. The Company determines the expected return on plan assets principally based on (i) the expected return for the various asset classes in the respective plans' investment portfolios and (ii) the targeted allocation of the respective plans' assets. The expected return on plan assets is developed using historical asset return performance as well as current and anticipated market conditions such as inflation, interest rates and market performance. Should the actual rate of return differ materially from the assumed/expected rate, the Company could experience a material adverse effect on the funded status of its plans and, accordingly, on its related future net pension expense.

Another significant assumption in determining the net pension expense is the discount rate. The discount rate for each plan is determined, as of the fiscal year end measurement date, using prevailing market spot-rates (from an appropriate

yield curve) with maturities corresponding to the expected timing/date of the future defined benefit payment amounts for each of the respective plans. Such corresponding spot-rates are used to discount future years' projected defined benefit payment amounts back to the fiscal year end measurement date as a present value. A composite discount rate is then developed for each plan by determining the single rate of discount that will produce the same present value as that obtained by applying the annual spot-rates. The discount rate may be further revised if the market environment indicates that the above methodology generates a discount rate that does not accurately reflect the prevailing interest rates as of the fiscal year end measurement date.

As of September 30, 2016 and 2015, SIFCO used the following assumptions:

	Years Ended	
	September 30,	
	2016	2015
Discount rate for expenses	3.8 %	3.9 %
Expected return on assets	8.0 %	8.0 %

Deferred Tax Valuation Allowance

The Company accounts for deferred taxes in accordance with the provisions of the Accounting Standards Codification guidance related to accounting for income taxes, whereby the Company recognizes an income tax benefit related to income tax credits, loss carryforwards and deductible temporary differences between financial reporting basis and tax reporting basis.

A high degree of judgment is required to determine the extent a valuation allowance should be provided against deferred tax assets. On a quarterly basis, the Company assesses the likelihood of realization of its deferred tax assets considering all available evidence, both positive and negative. In determining whether a valuation allowance is warranted, the Company evaluates factors such as prior earnings history, expected future earnings, carry-back and carry-forward periods and tax strategies that could potentially enhance the likelihood of the realization of a deferred tax asset. The weight given to the positive and negative evidence is commensurate with the extent to which the evidence may be objectively verified. It is generally difficult to outweigh objectively verifiable negative evidence of recent financial reporting losses. Based on the weight of available evidence, the Company determines if it is more likely than not that its deferred tax assets will be realized in the future.

As a result of losses incurred in recent years, the Company entered into a three year cumulative loss position in the U.S. jurisdiction during the fourth quarter of fiscal 2016. As mentioned above, a cumulative loss position is considered significant negative evidence in assessing the realizability of a deferred tax asset that is difficult to overcome when determining whether a valuation allowance is required. Positive evidence was also considered, including taxable income available in the carryback period. Based on the weight of available positive and negative evidence, the Company established a valuation allowance of \$3.3 million in the fourth quarter of fiscal 2016 on its U.S. deferred tax assets. Of this amount, \$0.8 million relates to deferred tax assets that existed as of the beginning of the fiscal year. As a valuation allowance had already been maintained on certain U.S. federal and state tax credit carryforwards with limited lives, the total U.S. valuation allowance as of September 30, 2016 is \$3.9 million.

Uncertain Tax Positions

The calculation of the Company's tax liabilities also involves considering uncertainties in the application of complex tax regulations. SIFCO recognizes liabilities for uncertain income tax positions based on its estimate of whether it is more likely than not that additional taxes will be required and it reports related interest and penalties as income taxes. Refer to Note 6 in the consolidated financial statements included in Item 8.

E. Impact of Newly Issued Accounting Standards

In August 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-15, which amends certain cash flow issues which apply to all entities required to present a statement of cash flow. The amendments are effective for public companies for fiscal years beginning after December 15, 2017, including interim periods. Early adoption is permitted. The Company is currently evaluating the impact it may have on its consolidated financial statements together with evaluating the adoption date.

In August 2014, the FASB issued ASU 2014-15, "Presentation of Financial Statements—Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern," which is intended to define the Company's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. This ASU will be effective for the Company

as of October 1, 2017. The Company will prospectively apply the guidance to applicable conditions. In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)." ASU 2014-09 completes the joint effort by the FASB and International Accounting Standards Board to improve financial reporting by creating common revenue recognition guidance for GAAP and International Financial Reporting Standards. In March 2016, the FASB issued ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)." The ASU 2016-08 clarifies the implementation guidance on principal versus agent considerations. In April 2016, the FASB issued ASU 2016-10, "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and

Licensing.” This ASU 2016-10 clarifies the implementation guidance on identifying performance obligations. These ASUs, along with subsequent updates, apply to all companies that enter into contracts with customers to transfer goods or services, and are effective for public entities for interim and annual reporting periods beginning after December 15, 2017. Early adoption is permitted, but not before interim and annual reporting periods beginning after December 15, 2016. Companies have the choice to apply these ASUs either retrospectively to each reporting period presented or by recognizing the cumulative effect of applying these standards at the date of initial application and not adjusting comparative information. The Company is planning a bottom up approach to analyze the standard's impact on its revenues by looking at historical policies and practices and identifying the differences from applying the new standard to its revenue stream. The Company has not selected a transition date or method nor has it determined the effect of the standard to its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842).” This ASU requires lessees to recognize a lease liability and a right-of-use asset on the balance sheet and aligns many of the underlying principles of the new lessor model with those in Accounting Standards Codification Topic 606, Revenue from Contracts with Customers. The ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. The Company is currently evaluating the requirements of ASU 2016-02 and has not yet determined its impact on our condensed consolidated financial statements.

On March 30, 2016, the FASB issued ASU No. 2016-09, “Improvements to Employee Share-Based Payment Accounting,” which makes a number of changes meant to simplify and improve accounting for share-based payments. The ASU will be effective for the Company for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The Company is currently considering early adoption of ASU 2016-09 in the next reporting period, as is permitted under the standard and has not yet determined the impact on our condensed consolidated financial statements.

In November 2015, the FASB issued ASU No. 2015-17, “Balance Sheet Classification of Deferred Taxes,” which requires that deferred tax liabilities and assets be classified as non-current in the statement of financial position. This ASU is effective for annual and interim periods beginning after December 15, 2016. The Company has elected to early adopt this ASU prospectively for the year ended September 30, 2016, as is permitted under the standard. Due to the prospective treatment, prior periods presented in these financial statements have not been adjusted.

Item 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders of
SIFCO Industries, Inc.

We have audited the accompanying consolidated balance sheets of SIFCO Industries, Inc. (an Ohio corporation) and subsidiaries (the "Company") as of September 30, 2016 and 2015, and the related consolidated statements of operations, comprehensive loss, shareholders' equity, and cash flows for the years then ended. Our audits of the basic consolidated financial statements included the financial statement schedule listed in the index appearing under Item 15(a)(2). These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of SIFCO Industries, Inc. and subsidiaries as of September 30, 2016 and 2015, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, the Company adopted new accounting guidance in 2016, related to the presentation of deferred income taxes.

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(Amounts in thousands, except per share data)

1. Summary of Significant Accounting Policies

A. DESCRIPTION OF BUSINESS

SIFCO Industries, Inc. and its subsidiaries are engaged in the production of forgings and machined components primarily in the Aerospace and Energy ("A&E") market. The Company's operations are conducted in a single business segment, "SIFCO" or "Company." In July 2015, SIFCO completed the acquisition of all of the outstanding equity of C Blade S.p.A. Forging & Manufacturing ("Maniago", previously disclosed as "C*Blade"), located in Maniago, Italy, from Riello Investimenti Partners SGR S.p.A., Giorgio Visentini, Giorgio Frassini, Giancarlo Scabi and Matteo Talmassons. Financial information relating to the Company's acquisition in fiscal 2015 is referenced in Note 11.

B. PRINCIPLES OF CONSOLIDATION

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. The U.S. dollar is the functional currency for all the Company's U.S. operations and its Irish subsidiary. For these operations, all gains and losses from completed currency transactions are included in income currently. The functional currency for the Company's other non-U.S. subsidiaries is the Euro. Assets and liabilities are translated into U.S. dollars at the rates of exchange at the end of the period, and revenues and expenses are translated using average rates of exchange. Foreign currency translation adjustments are reported as a component of accumulated other comprehensive loss in the consolidated statements of shareholders' equity.

C. CASH EQUIVALENTS

The Company considers all highly liquid short-term investments with original maturities of three months or less to be cash equivalents. A substantial majority of the Company's cash and cash equivalent bank balances are within federally insured limits at September 30, 2016, however, balances exceed limits at September 30, 2015.

D. CONCENTRATIONS OF CREDIT RISK

Receivables are presented net of allowance for doubtful accounts of \$706 and \$1,127 at September 30, 2016 and 2015, respectively. Accounts receivable outstanding longer than the contractual payment terms are considered past due. The Company writes off accounts receivable when they become uncollectible. During fiscal 2016 and 2015, \$581 and \$0, respectively, of accounts receivable were written off against the allowance for doubtful accounts. Bad debt expense totaled \$359 and \$487 in fiscal 2016 and fiscal 2015, respectively.

Most of the Company's receivables represent trade receivables due from manufacturers of turbine engines and aircraft components as well as turbine engine overhaul companies located throughout the world, including a significant concentration of U.S. based companies. In fiscal 2016, 21% of the Company's consolidated net sales were from two of its largest customers; and 46% of the Company's consolidated net sales were from the four largest customers and their direct subcontractors, which individually accounted for 12%, 12%, 11% and 11%, of consolidated net sales, respectively. In fiscal 2015, 12% of the Company's consolidated net sales were from one of its largest customers; and 38% of the Company's consolidated net sales were from two of the largest customers and their direct subcontractors which individually accounted for 22%, and 16%, of consolidated net sales, respectively. No other single customer or group represented greater than 10% of total net sales in fiscal 2016 and 2015.

At September 30, 2016, two of the Company's largest customers had outstanding net accounts receivable which individually accounted for 14% and 11% of the total net accounts receivable; and four of the largest customers and direct subcontractors had outstanding net accounts receivable which accounted for 15%, 13%, 12% and 11% of total net accounts receivable, respectively. At September 30, 2015, one of the Company's largest customers had outstanding

net accounts receivable which accounted for 11% of total net accounts receivable; and two of the largest customers and direct subcontractors had outstanding net accounts receivable which accounted for 18% and 16% of total, net receivables, respectively. The Company performs ongoing credit evaluations of its customers' financial conditions. The Company believes its allowance for doubtful accounts is sufficient based on the credit exposures outstanding at September 30, 2016.

E. INVENTORY VALUATION

Inventories are stated at the lower of cost or market. For a portion of the Company's inventory, cost is determined using the last-in, first-out ("LIFO") method. For approximately 44% and 38% of the Company's inventories at September 30, 2016 and 2015, respectively, the LIFO method is used to value the Company's inventories. The first-in, first-out ("FIFO") method is used to value the remainder of the Company's inventories.

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

The Company maintains allowances for obsolete and excess inventory. The Company evaluates its allowances for obsolete and excess inventory each quarter, and requires at a minimum that reserves be established based on an analysis of the age of the inventory. In addition, if the Company identifies specific obsolescence, other than that identified by the aging criteria, an additional reserve will be recognized. Specific obsolescence and excess reserve requirements may arise due to technological or market changes, or based on cancellation of an order. The Company's reserves for obsolete and excess inventory were \$3,308 and \$3,022 at September 30, 2016 and 2015, respectively.

F. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are stated at cost. Depreciation is generally computed using the straight-line method. Depreciation is provided in amounts sufficient to amortize the cost of the assets over their estimated useful lives. Depreciation provisions are based on estimated useful lives: (i) buildings, including building improvements - 5 to 40 years; (ii) machinery and equipment, including office and computer equipment - 3 to 20 years; (iii) software - 3 to 7 years (included in machinery and equipment); and (iv) leasehold improvements - remaining life or length of the lease (included in buildings).

The Company's property, plant and equipment assets by major asset class at September 30 consist of:

	2016	2015
Property, plant and equipment:		
Land	\$979	\$975
Buildings	15,393	15,446
Machinery and equipment	82,665	80,687
Total property, plant and equipment	99,037	97,108
Accumulated depreciation	50,079	42,243
Property, plant and equipment, net	\$48,958	\$54,865

The Company reviews the carrying value of its long-lived assets, including property, plant and equipment, at least annually or when events and circumstances warrant such a review. This review is performed using estimates of future undiscounted cash flows, which include proceeds from disposal of assets. If the carrying value of a long-lived asset is greater than the estimated undiscounted future cash flows, then the long-lived asset is considered impaired and an impairment charge is recorded for the amount by which the carrying value of the long-lived asset exceeds its fair value. There have been no asset impairment charges as it relates to the above assets during fiscal 2016 and fiscal 2015. If an asset is determined to be impaired, the carrying value of such assets is reduced to its net realizable value. The gain/loss on disposal of operating assets is included as a separate line item in the accompanying consolidated statements of operations. Depreciation expense was \$8,173 and \$6,048 in fiscal 2016 and 2015, respectively.

The Company's Irish subsidiary sold its operating business in June 2007, but retained ownership of its Cork, Ireland facility. This property is subject to a lease arrangement with the acquirer of the business that expires in June 2027. Rental income is earned in quarterly installments of \$103. At September 30, 2016 and 2015, the carrying value of the property was \$1,496 (accumulated depreciation of \$1,437) and \$1,570 (accumulated depreciation of \$1,511), respectively. Rental income of \$413 was recognized in each of fiscal years 2016 and 2015, respectively, and is recorded in other income, net on the consolidated statements of operations.

G. GOODWILL AND INTANGIBLE ASSETS

Goodwill represents the excess of the purchase price paid over the fair value of the net assets of an acquired business. Goodwill is subject to annual impairment testing and the Company has selected July 31 as the annual impairment testing date. The Company first assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value, including goodwill. If so, then a two-step impairment test is

used to identify potential goodwill impairment. The first step of the goodwill impairment test compares the fair value of a reporting unit (as defined) with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill is not considered impaired, and the second step of the goodwill impairment test is not required. The second step measures the amount of impairment, if any, by comparing the carrying value of the goodwill associated with a reporting unit to the implied fair value of the goodwill derived from the estimated overall fair value of the reporting unit and the individual fair values of the other assets and liabilities of the reporting unit. See Note 3 to for further discussion of the July 31, 2016 annual impairment test results.

Intangible assets consist of identifiable intangibles acquired or recognized in the accounting for the acquisition of a business and include such items as a trade name, a non-compete agreement, below market lease, customer relationships and order backlog. Intangible assets are amortized over their useful lives ranging from one year to ten years.

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

H. NET LOSS PER SHARE

The Company's net loss per basic share has been computed based on the weighted-average number of common shares outstanding. Net loss per diluted share is the same as net loss per basic share.

The dilutive effect of the Company's stock options, restricted shares and performance shares were as follows:

	September 30,	
	2016	2015
Loss from continuing operations	\$(11,335)	\$(3,581)
Income from discontinued operations, net of tax	—	709
Net loss	\$(11,335)	\$(2,872)
Weighted-average common shares outstanding (basic)	5,475	5,438
Weighted-average common shares outstanding (diluted)	5,475	5,438
Net loss per share – basic		
Continuing operations	\$(2.07)	\$(0.66)
Discontinued operations	—	0.13
Net loss per share	\$(2.07)	\$(0.53)
Net loss per share – diluted:		
Continuing operations	\$(2.07)	\$(0.66)
Discontinued operations	—	0.13
Net loss per share	\$(2.07)	\$(0.53)
Anti-dilutive weighted-average common shares excluded from calculation of diluted earnings per share	32	27

I. REVENUE RECOGNITION

Revenue is generally recognized for products shipped or services performed when the following criteria are met: 1.) persuasive evidence of an arrangement exists; 2.) delivery has occurred; 3.) an established sales price has been set with the customer; and 4.) collectibility of the amounts due from the sale is reasonably assured.

J. CAPITAL LEASE OBLIGATIONS

Capital leases are accounted for as the acquisition of an asset and the commitment of an obligation by the lessee and as a sale or financing by the lessor. All other leases are accounted for as operating leases.

K. IMPACT OF RECENTLY ADOPTED ACCOUNTING STANDARDS

In November 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-17, "Balance Sheet Classification of Deferred Taxes," which requires that deferred tax liabilities and assets be classified as non-current in the statement of financial position. This ASU is effective for annual and interim periods beginning after December 15, 2016. The Company has elected to early adopt this ASU prospectively for the year ended September 30, 2016, as is permitted under the standard. Due to the prospective treatment, prior periods presented in these financial statements have not been adjusted.

L. IMPACT OF NEWLY ISSUED ACCOUNTING STANDARDS

In August 2016, the FASB issued ASU 2016-15, which amends certain cash flow issues which apply to all entities required to present a statement of cash flow. The amendments are effective for public companies for fiscal years beginning after December 15, 2017, including interim periods. Early adoption is permitted. The Company is currently evaluating the impact it may have on its consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)." ASU 2014-09 completes the joint effort by the FASB and International Accounting Standards Board to improve financial reporting by creating common revenue recognition guidance for GAAP and International Financial Reporting Standards. In March 2016, the FASB issued ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)." The ASU 2016-08 clarifies the implementation guidance on principal versus agent considerations. In April 2016, the FASB issued ASU 2016-10, "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing." This ASU 2016-10 clarifies the implementation guidance on identifying performance obligations. These ASUs, along with subsequent updates, apply to all companies that enter into contracts with customers to transfer goods or services, and are effective for public entities for interim and annual reporting periods beginning after December 15, 2017. Early adoption is permitted,

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

but not before interim and annual reporting periods beginning after December 15, 2016. Companies have the choice to apply these ASUs either retrospectively to each reporting period presented or by recognizing the cumulative effect of applying these standards at the date of initial application and not adjusting comparative information. The Company is planning a bottoms up approach to analyze the standard's impact on its revenues by looking at historical policies and practices and identifying the differences from applying the new standard to its revenue stream. The Company has not selected a transition date or method nor has it determined the effect of the standard to its consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15, "Presentation of Financial Statements—Going Concern (Subtopic 205-40):

Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern," which the intent is to define the Company's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. This ASU will be effective for the Company as of October 1, 2017. The Company will prospectively apply the guidance to applicable conditions.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)." This ASU requires lessees to recognize a lease liability and a right-of-use asset on the balance sheet and aligns many of the underlying principles of the new lessor model with those in Accounting Standards Codification Topic 606, Revenue from Contracts with Customers. The ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. The Company is currently evaluating the requirements of ASU 2016-02 and has not yet determined its impact on our condensed consolidated financial statements.

On March 30, 2016, the FASB issued ASU No. 2016-09, "Improvements to Employee Share-Based Payment Accounting," which makes a number of changes meant to simplify and improve accounting for share-based payments. The ASU will be effective for the Company for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The Company is currently considering early adoption of ASU 2016-09 in the next reporting period, as is permitted under the standard and has not yet determined the impact on our condensed consolidated financial statements.

M. USE OF ESTIMATES

Accounting principles generally accepted in the U.S. require management to make a number of estimates and assumptions relating to the reported amounts of assets and liabilities and the disclosure of contingent liabilities, at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the period in preparing these financial statements. Actual results could differ from those estimates. In fiscal 2015, the Company changed how it estimates its workers' compensation reserve. The Company uses a third party actuary to evaluate its reserves annually. Effective in the first quarter of fiscal 2015, the Company changed to a new third party administrator that also evaluates the reserve on a monthly basis. The change in administrators resulted in a reduction in the Company's reserve and a corresponding decrease in expense of approximately \$400. The change is reflected in the Company's fiscal 2015 results.

N. DERIVATIVE FINANCIAL INSTRUMENTS

The Company periodically uses interest rate swap agreements to reduce risk related to variable-rate debt, which is subject to changes in market rates of interest. Interest rate swaps are designated as a cash flow hedges. At September 30, 2016, the Company held one interest rate swap with a notional amount of \$8,214. Cash flows related to the interest rate swap agreement are included in interest expense. The Company's interest rate swap agreement and its variable-rate term debt were based upon LIBOR. At September 30, 2016, the Company's interest rate swap agreement qualified as a fully effective cash flow hedge against the Company's variable-rate term note and its mark-to-market

valuation is a \$30 liability at September 30, 2016. As of September 30, 2015, no interest rate swap agreements were in place.

O. RESEARCH AND DEVELOPMENT

Research and development costs are expensed as they are incurred. Research and development expense was nominal in fiscal 2016 and 2015.

P. DEFERRED FINANCING COSTS

Debt issuance costs are capitalized and amortized over the life of the related debt. Amortization of deferred financing costs is included in interest expense in the consolidated statements of operations.

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

Q. ACCUMULATED OTHER COMPREHENSIVE LOSS

The components of accumulated other comprehensive loss as shown on the consolidated balance sheets at September 30 are as follows:

	2016	2015
Foreign currency translation adjustment, net of income tax benefit of \$0 and \$0, respectively	\$(5,623)	\$(5,731)
Net retirement plan liability adjustment, net of income tax benefit of (\$3,758) and (\$3,758), respectively	(7,197)	(6,257)
Interest rate swap agreement, net of income tax benefit of \$0 and \$0, respectively	(30)	—
Total accumulated other comprehensive loss	\$(12,850)	\$(11,988)

The following table provides additional details of the amounts recognized into net earnings from accumulated other comprehensive loss, net of tax:

	Foreign Currency Translation Adjustment	Retirement Plan Liability Adjustment	Interest Rates Swap Adjustment	Accumulated Other Comprehensive Loss
Balance at September 30, 2014	\$ (5,851)	\$ (4,757)	\$ (5)	\$ (10,613)
Other comprehensive income (loss) before reclassifications	120	(1,846)	5	(1,721)
Amounts reclassified from accumulated other comprehensive loss	—	346	—	346
Net current-period other comprehensive loss	\$ 120	\$ (1,500)	\$ 5	\$ (1,375)
Balance at September 30, 2015	\$ (5,731)	\$ (6,257)	\$ —	\$ (11,988)
Other comprehensive income (loss) before reclassifications	108	(1,991)	(30)	(1,913)
Amounts reclassified from accumulated other comprehensive loss	—	1,051	—	1,051
Net current-period other comprehensive loss	108	(940)	(30)	(862)
Balance at September 30, 2016	\$ (5,623)	\$ (7,197)	\$ (30)	\$ (12,850)

The following table reflects the changes in accumulated other comprehensive loss related to the Company for September 30, 2016 and 2015:

Details about accumulated other comprehensive loss components	Amount reclassified from accumulated other comprehensive loss			Affected line item in the Consolidated Statement of Operations
	2016	2015		
Amortization of Retirement plan liability:				
Net actuarial loss	828	545	(1)	
Settlements/curtailments	223	—	(1)	
	1,051	545		Total before taxes
	—	(199)		Income tax expense
	\$ 1,051	\$ 346		Net of taxes

(1) These accumulated other comprehensive income components are included in the computation of net periodic benefit cost. See Note 7 - Retirement benefit plans for further information.

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

R. INCOME TAXES

The Company files a consolidated U.S. federal income tax return and tax returns in various state and local jurisdictions. The Company's Irish and Italian subsidiaries also file tax returns in the respective jurisdictions.

The Company provides deferred income taxes for the temporary difference between the financial reporting basis and tax basis of the Company's assets and liabilities. Such taxes are measured using the enacted tax rates that are assumed to be in effect when the differences reverse. Deductible temporary differences result principally from recording certain expenses in the financial statements in excess of amounts currently deductible for tax purposes. Taxable temporary differences result principally from tax depreciation in excess of book depreciation.

The Company evaluates for uncertain tax positions taken at each balance sheet date. The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest cumulative benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company's policy for interest and/or penalties related to underpayments of income taxes is to include interest and penalties in tax expenses.

The Company maintains a valuation allowance against its deferred tax assets when management believes it is more likely than not that all or a portion of a deferred tax asset may not be realized. Changes in valuation allowances are recorded in the period of change. In determining whether a valuation allowance is warranted, the Company evaluates factors such as prior earnings history, expected future earnings, carry-back and carry-forward periods and tax strategies that could potentially enhance the likelihood of the realization of a deferred tax asset.

S. FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date. In determining fair value, the Company utilizes certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and/or the risks inherent in the inputs to the valuation technique. Based on the examination of the inputs used in the valuation techniques, the Company is required to provide the following information according to the fair value hierarchy. The fair value hierarchy ranks the quality and reliability of the information used to determine fair values.

Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1 - Quoted market prices in active markets for identical assets or liabilities

Level 2 - Observable market based inputs or unobservable inputs that are corroborated by market data

Level 3 - Unobservable inputs that are not corroborated by market data

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The book value of cash equivalents, accounts receivable, accounts payable, and revolving credit facilities are considered to be representative of their fair values because of their short maturities. Fair value measurements of non-financial assets and non-financial liabilities are primarily used in goodwill, other intangible assets and long-lived assets impairment analysis, the valuation of acquired intangibles and in the valuation of assets held for sale. Goodwill and intangible assets are valued using Level 3 inputs.

T. SHARE-BASED COMPENSATION

Share-based compensation is measured at the grant date, based on the calculated fair value of the award, and is recognized as an expense over the requisite service period (generally the vesting period). Share-based expense includes expense related to restricted shares and performance shares issued under the Company's 2007 Long-Term Incentive Plan. The Company recognizes share-based expense within selling, general, and administrative expense.

U. SHIPPING AND HANDLING COSTS

The Company classifies all amounts billed to customers for shipping and handling as revenue and reflects shipping and handling costs in cost of sales.

V. RECLASSIFICATIONS

Certain amounts in prior years may have been reclassified to conform to the 2016 consolidated financial statement presentation.

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

In fiscal 2016, the Company revised its classification within the Consolidated Statement of Cash Flows by moving prior year amount of \$506 of other long-term liabilities caption from changes in operating assets and liabilities to adjustments to reconcile net loss to net cash provided by operating activities as these items are non-cash item and are not a part of operating assets and liabilities.

2. Inventories

Inventories at September 30 consist of:

	2016	2015
Raw materials and supplies	\$7,724	\$7,212
Work-in-process	10,459	11,088
Finished goods	10,313	9,643
Total inventories	\$28,496	\$27,943

If the FIFO method had been used for the entire Company, inventories would have been \$8,026 and \$8,508 higher than reported at September 30, 2016 and 2015, respectively. LIFO income of \$482 in fiscal 2016 and LIFO expense was \$629 in fiscal 2015, respectively.

3. Goodwill and Intangible Assets

The Company's intangible assets by major asset class subject to amortization as of:

September 30, 2016	Weighted Average Life at September 30,	Original Cost	Accumulated Amortization	Currency Translation	Net Book Value
Intangible assets:					
Trade name	8 years	\$2,776	\$ 1,240	\$ 9	\$1,545
Non-compete agreement	5 years	1,600	1,547	—	53
Below market lease	5 years	900	900	—	—
Technology asset	5 years	1,869	389	37	1,517
Customer relationships	10 years	15,568	7,571	26	8,023
Total intangible assets		\$22,713	\$ 11,647	\$ 72	\$11,138

September 30, 2015

Intangible assets:					
Trade name	8 years	\$2,776	\$ 886	\$ 6	\$1,896
Non-compete agreement	5 years	1,600	1,308	—	292
Below market lease	5 years	900	865	—	35
Technology asset	5 years	1,663	84	12	1,591
Customer relationships	10 years	15,352	5,912	11	9,451
Total intangible assets		\$22,291	\$ 9,055	\$ 29	\$13,265

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

Included in the intangible assets at September 30, 2015 are assets acquired in connection with the purchase of substantially all the outstanding equity from Maniago on July 1, 2015, as discussed more fully in Note 11. During fiscal 2016, final purchase price adjustments for Maniago were made and reflected as shown in the table below, which are included as September 30, 2016. These acquired intangible assets consist of:

	Estimated Useful Life	Initial Value	Purchase Price Adjustment	Final Value
Intangible assets:				
Trade name	5 years	\$776	\$ —	\$776
Technology asset	5 years	1,663	317	1,980
Customer relationships	10 years	1,552	105	1,657
Total intangible assets		\$3,991	\$ 422	\$4,413

The amortization expense on identifiable intangible assets for fiscal 2016 and 2015 was \$2,593 and \$2,245, respectively. Amortization expense associated with the identified intangible assets is expected to be as follows:

	Amortization Expense
Fiscal year 2017	\$ 2,345
Fiscal year 2018	2,324
Fiscal year 2019	2,309
Fiscal year 2020	2,168
Fiscal year 2021	1,127

Goodwill is not amortized, but is subject to an annual impairment test. The Company tests its goodwill for impairment in the fourth fiscal quarter, and in interim periods if certain events occur indicating that the carrying amount of goodwill may be impaired. At the end of the second quarter of fiscal 2016, there was a triggering event, which resulted in the Company performing an interim impairment test at its Orange, California reporting unit and its Maniago reporting unit. It was determined at the time that the fair value exceeded its carrying value; therefore, step 2 of the two-step goodwill impairment test was unnecessary. The Company completed its annual impairment review of goodwill as of July 31, 2016, using judgment to determine whether to use a qualitative analysis or a quantitative fair value measurement for its goodwill impairment testing. The Company's fair value measurement approach combines the income (discounted cash flow method) and market valuation (market comparable method) techniques for each of the Company's reporting units that carry goodwill. These valuation techniques use estimates and assumptions including, but not limited to, the determination of appropriate market comparables, projected future cash flows (including timing and profitability), discount rate reflecting the risk inherent in future cash flows, perpetual growth rate, and projected future economic and market conditions (level 3 inputs).

Upon completion of the annual testing, goodwill for the Orange, California ("Orange") reporting unit was determined to be impaired based on a quantitative analysis, as the carrying value exceeded the fair value. During 2016, the Orange reporting unit did not meet revenue expectations due, in part, to a product mix resulting in lower margins and related business practices have not come to fruition for cost savings measures undertaken to address increased costs. Based on the results of the annual testing, the Company recorded goodwill impairment charges for the entire goodwill balance of the Orange reporting unit in the amount of \$4,164 as the carrying value of the operating unit exceeded its fair value.

As of September 30, 2016, the remaining value of goodwill associated with our reporting units totaled \$11,748.

No other impairment charges were identified in connection with the annual goodwill impairment test with respect to any of the other identified reporting units. The fair values for our Alliance and Maniago reporting units were in excess of their carrying values. All of the goodwill is expected to be deductible for tax purposes. Changes in the net carrying amount of goodwill were as follows:

30

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

Balance at September 30, 2014	\$7,658
Goodwill acquired during the year	8,760
Currency translation	62
Balance at September 30, 2015	\$16,480
Goodwill adjustment	(589)
Currency translation	21
Impairment adjustment	(4,164)
Balance at September 30, 2016	\$11,748

4. Accrued Liabilities

Accrued liabilities at September 30 consist of:

	2016	2015
Accrued employee compensation and benefits	\$3,681	\$3,875
Accrued legal and professional	124	2,069
Accrued workers' compensation	324	688
Other accrued liabilities	1,105	1,814
Total accrued liabilities	\$5,234	\$8,446

5. Debt

Debt at September 30 consists of:

	2016	2015
Revolving credit agreement	\$12,751	\$16,500
Foreign subsidiary borrowings	9,540	13,197
Capital lease obligations	153	252
Term loan	16,429	19,286
Less: unamortized debt issuance cost	(241)	(306)
Term loan less unamortized debt issuance cost	16,188	18,980
Total debt	38,632	48,929
Less – current maturities	(31,009)	(10,503)
Total long-term debt	\$7,623	\$38,426

On June 26, 2015 the Company entered into a Credit and Security Agreement (the "2015 Credit Agreement") with its lender. The credit facility is comprised of (i) a five year revolving credit facility with a maximum borrowing amount of up to \$25,000, which reduces to \$20,000 on January 1, 2016, and (ii) a five year term loan of \$20,000. Amounts borrowed under the 2015 credit facility are secured by substantially all the assets of the Company and its U.S. subsidiaries and a pledge of 65% of the stock of its non-U.S. subsidiaries. The term loan under the 2015 Credit Agreement is repayable in quarterly installments of \$714 beginning September 30, 2015. The amounts borrowed under the 2015 Credit Agreement were used to repay the Company's existing revolver and term note, to fund the acquisition of Maniago on July 1, 2015, as referenced in Note 11 and for working capital and general corporate purposes. The 2015 Credit Agreement also has an accordion feature, which allows the Company to increase the availability by up to \$15,000 upon consent of the existing lenders or upon additional lenders being joined to the facility. Borrowings bore interest at the LIBOR rate, prime rate, or the eurocurrency reference rate depending on the type of loan requested by the Company in each case, plus the applicable margin as set forth in the 2015 Credit Agreement.

The revolver has a rate based on LIBOR plus 2.75% spread and a prime rate which resulted in a weighted average rate of 3.9% and 3.2% at September 30, 2016 and 2015, respectively and the term loan has a rate of 3.8% and 3.1% at September 30, 2016 and 2015, respectively, which was based on LIBOR plus 2.75% spread. This rate becomes effective at a fixed rate of 3.9% after giving effect to the interest rate swap agreement as of September 30, 2016. The interest rate swap was not in place as of September 30, 2015. There is also a commitment fee ranging from 0.15% to 0.35%, to be incurred on the unused balance.

The bank loans are subject to certain customary financial covenants including, without limitation, covenants that require the Company to not exceed a maximum leverage ratio and to maintain a minimum fixed charge coverage ratio. As discussed in Note 13 Subsequent Event, on November 9, 2016, the Company entered into an Amended and Restated Credit and Security agreement ("Amended and Restated Agreement") with its lender. The new Amended and Restated Agreement matures on June 25, 2020 and consists of senior secured loans in an aggregate principal amount of up to \$39,871 (the "Credit Facility"). The Credit Facility is comprised of (i) a senior secured revolving credit facility of a maximum borrowing amount of \$35,000, including swing line loans and letters of credit provided by the lender and (ii) senior secured term loan facility in the amount of \$4,871 (the "Term Facility"). The new Term Facility is repayable in monthly installments of \$81 beginning December 1, 2016. The terms of Credit Facility contain both a lockbox arrangement and subjective acceleration clause. As a result, the amounts outstanding on the revolving credit facility will be classified as a short term liability. The amounts borrowed under the Amended and Restated Agreement will be used to repay the amounts outstanding under the Company's existing Credit Agreement as of September 30, 2016, for working capital, for general corporate purposes and to pay fees and expenses associated with this transaction. In connection with entering into the Amended and Restated Agreement, the Company terminated its interest rate swap agreement with the lender. Upon closing of the Credit Facility, any defaults that may have existed under the 2015 Credit Agreement were waived and no longer in effect. As a result of the Amended and Restated Agreement and the inclusion of a lockbox arrangement and subjective acceleration clause, the revolver and all but \$4,061 of the term loan at September 30, 2016 were classified as current maturities of long-term debt. Refer to Note 13 Subsequent Event for further discussion.

The Company incurred debt issuance costs in connection with its 2015 Credit Agreement in the amount of \$724. As shown above, \$241 of debt issuance costs as it relates to the term note, net of amortization of \$81, remains as of September 30, 2016. The remaining \$301 debt issuance cost relates to the revolver. This portion is shown in the consolidated balance sheet as a deferred charge in other assets, net of amortization of \$101 at September 30, 2016. Prior to the replacement of the revolver and term loan with the 2015 Credit Agreement as previously discussed, in October 2011, the Company entered into an amendment to its then existing credit agreement with its bank to increase the maximum borrowing amount from \$30,000 to \$40,000, of which \$10,000 was a five (5) year term loan and \$30,000 was a five (5) year revolving loan, secured by substantially all the assets of the Company and its U.S. subsidiaries and a pledge of 65% of the stock of its non-U.S. subsidiaries. The term loan was repayable in quarterly installments of \$500 starting December 1, 2011. The term loan was repaid in the third quarter of fiscal year 2015 and replaced by the 2015 Credit Agreement discussed previously.

As of September 30, 2016 and 2015, the total foreign debt borrowings were \$9,540 and \$13,197, respectively, of which \$5,833 and \$7,542, respectively is current. Current debt as of September 30, 2016 and 2015, consists of \$3,262 and \$3,184 of short-term borrowings, \$2,014 and \$2,371 is the current portion of long-term debt, and \$557 and \$1,987, of factoring. Interest rates on the term notes are based on Euribor rates which range from 1.0% to 4.0%. The factoring programs are uncommitted, whereby the Company offers receivables for sale to an unaffiliated financial institution, which are then subject to acceptance by the unaffiliated financial institution. Following the sale and transfer of the receivables to the unaffiliated financial institution, the receivables are not isolated from the Company, and effective control of the receivables is not passed to the unaffiliated financial institution, which does not have the right to pledge or sell the receivables. The Company accounts for the pledge of receivables under this agreement as short-term debt and continues to carry the receivables on its consolidated condensed balance sheets. There were \$557 and \$1,987 of short-term borrowings relating to this agreement at September 30, 2016 and 2015, respectively,

classified within short-term debt. The carrying value of the receivables pledged as collateral was \$599 and \$1,620 at September 30, 2016 and 2015, respectively.

Payments on long-term debt under the 2015 Credit Agreement (excluding capital lease obligations, see Note 9) over the next 5 years are as follows:

	Minimum long-term debt payments
2017	\$ 4,871
2018	4,132
2019	4,019
2020	21,599
2021	252
2022 and thereafter	—
Total Minimum long-term debt payments	34,873

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

6. Income Taxes

The components of loss from continuing operations before income tax benefit are as follows:

	Years Ended	
	September 30,	
	2016	2015
U.S.	\$(11,506)	\$(6,373)
Non-U.S.	(1,827)	348
Loss before income tax benefit	\$(13,333)	\$(6,025)

Income taxes from continuing operations before income tax benefit consist of the following:

	Years Ended	
	September 30,	
	2016	2015
Current income tax provision (benefit):		
U.S. federal	\$(2,687)	\$(2,560)
U.S. state and local	(111)	55
Non-U.S.	94	338
Total current tax benefit	(2,704)	(2,167)
Deferred income tax provision (benefit):		
U.S. federal	1,481	(277)
U.S. state and local	69	(83)
Non-U.S.	(844)	83
Total deferred tax provision (benefit)	706	(277)
Income tax benefit	\$(1,998)	\$(2,444)

The income tax benefit from continuing operations in the accompanying consolidated statements of operations differs from amounts determined by using the statutory rate as follows:

	Years Ended	
	September 30,	
	2016	2015
Loss before income tax benefit	\$(13,333)	\$(6,025)
Less-U.S. state and local income tax benefit	(111)	(13)
Loss before U.S. and non-U.S. federal income tax provision	\$(13,222)	\$(6,012)
Income tax benefit at U.S. federal statutory rates	\$(4,628)	\$(2,104)
Tax effect of:		
Foreign rate differential	254	334
Permanent items	8	438
Undistributed earnings of non-U.S. subsidiaries	—	(992)
Prior year tax adjustments	(56)	(23)
State and local income taxes	(80)	(113)
Impact of tax law changes	(338)	—
Federal tax credits	(572)	(92)
Valuation allowance	3,309	147
Changes in uncertain tax positions	(37)	58
Other	142	(97)
Income tax benefit	\$(1,998)	\$(2,444)

SIFCO Industries, Inc. and Subsidiaries
Notes to Consolidated Financial Statements – (Continued)

Deferred tax assets and liabilities at September 30 consist of the following:

	2016	2015
Deferred tax assets:		
Net non-U.S. operating loss carryforwards	\$777	\$595
Employee benefits	3,366	3,340
Inventory reserves	1,032	865
Allowance for doubtful accounts	234	377
Foreign tax credits to undistributed earnings	870	—
Intangibles	4,364	1,936
Foreign tax credits	575	517
Other	2,307	1,007
Total deferred tax assets	13,525	8,637
Deferred tax liabilities:		
Depreciation	(10,777)	(9,022)
Unremitted foreign earnings	(65)	(65)
Prepaid expenses	(566)	(432)
Other	(647)	(87)
Total deferred tax liabilities	(12,055)	(9,606)
Net deferred tax assets (liabilities)	1,470	(969)
Valuation allowance	(4,399)	(1,095)
Net deferred tax liabilities	\$(2,929)	\$(2,064)

As a result of losses incurred in recent years, the Company's U.S. jurisdiction entered into a three year cumulative loss position in the fourth quarter of fiscal 2016. A cumulative loss position is considered significant negative evidence in assessing the realizability of a deferred tax asset that is difficult to overcome in determining that a valuation allowance is not needed against deferred tax assets. Positive evidence was also considered, including taxable income available in the carryback period. Based on the weight of available positive and negative evidence, the Company established a valuation allowance of \$3,259 in the fourth quarter of fiscal 2016 on its U.S. deferred tax assets. Of this amount, \$838 relates to deferred tax assets that existed as of the beginning of the fiscal year. A valuation allowance had already been maintained on certain U.S. federal and state tax credit carryforwards with limited lives, the total U.S. valuation allowance as of September 30, 2016 is \$3,902.

At September 30, 2016, the Company has a non-U.S. tax loss carryforward of approximately \$6,132, which primarily relates to the Company's Irish and Italian subsidiaries. The Company's Irish subsidiary ceased operations in 2007 and therefore, a valuation allowance has been recorded against the deferred tax asset related to the Irish tax loss carryforward because it is unlikely that such operating loss can be utilized unless the Irish subsidiary resumes operations. The non-U.S. tax loss carryforward does not expire.

The Company has \$575 of foreign tax credit carryforwards that are subject to expiration in fiscal 2023-2026, \$520 of U.S. general business tax credits that are subject to expiration in 2035-2036, and alternative minimum tax of \$95 that do not expire. A valuation allowance has been recorded against the deferred tax assets related to the foreign tax credit carryforwards and U.S. general business credits.

In addition, the Company has \$165 of U.S. state tax credit carryforwards subject to expiration in fiscal 2022-2024 and \$10,583 of U.S. state and local tax loss carryforwards subject to expiration in fiscal 2020-2036. The U.S. state tax credit carryforwards have been fully offset by a valuation allowance. A portion of the U.S. state and local tax loss carryforwards presented in the table above have been reduced by unrealized stock compensation deductions of \$5. The Company reported liabilities for uncertain tax positions, excluding any related interest and penalties, in fiscal 2016 and 2015 of \$69 and \$105, respectively. If recognized, \$69 of the fiscal 2016 uncertain tax positions would impact the effective tax rate. As of September 30, 2016, the Company had accrued interest of \$21 and recognized \$3

for interest and penalties in continuing operations. The Company classifies interest and penalties on uncertain tax positions as income tax expense. A summary of activity related to the Company's uncertain tax position is as follows:

33

SIFCO Industries, Inc. and Subsidiaries

Notes to Consolidated Financial Statements – (Continued)

	2016	2015
Balance at beginning of year	\$105	\$56
Increase due to tax positions taken in current prior year	—	49
Decrease due to lapse of statute of limitations	(36)	—
Balance at end of year	\$69	\$105

The Company is subject to income taxes in the U.S. federal jurisdiction, Ireland, Italy and various states and local jurisdictions. The Company believes it has appropriate support for its federal income tax returns. The Company is no longer subject to U.S. federal income tax examinations by tax authorities for fiscal years prior to 2013, state and local income tax examinations for fiscal years prior to 2012, or non-U.S. income tax examinations by tax authorities for fiscal years prior to 2007.

As of September 30, 2016, the Company has \$9,766 of undistributed earnings of non-U.S. subsidiaries for which no deferred taxes have been provided as the Company intends to permanently reinvest these earnings outside the U.S. Quantification of the deferred tax liability associated with these undistributed earnings is not practicable.

7. Retirement Benefit Plans

Defined Benefit Plans

The Company and certain of its subsidiaries sponsor defined benefit pension plans covering most of its employees. The Company's funding policy for its defined benefit pension plans is based on an actuarially determined cost method allowable under Internal Revenue Service regulations. One of the defined benefit pension plans covers substantially all non-union employees of the Company's U.S. operations who were hired prior to March 1, 2003, and this plan was frozen in 2003, while another plan that covered union employees no longer has active participants due to the business closure. Consequently, although both plans continue, the non-union plan ceased the accrual of additional pension benefits for service subsequent to March 1, 2003, and the related union plan has had no participants accrue any additional benefits subsequent to December 31, 2013. The Company sponsors a defined pension plan for certain of its employees. The plan is a severance entitlement payable to the Italian employees who qualified prior to December 27, 2006. The plan is considered an unfunded defined benefit plan and is measured as the actuarial present value of the vested benefits to which the employees would be entitled if the employee separated at the consolidated balance sheet date.

The Company uses a September 30 measurement date for its U.S. defined benefit pension plans. Net pension expense, benefit obligations and plan assets for the Company-sponsored defined benefit pension plans consists of the following:

	Years Ended	
	September 30,	
	2016	2015
Service cost	\$ 280	\$ 148
Interest cost	1,017	978
Expected return on plan assets	(1,632)	(1,671)
