Item 5. Other Events.

On January 29, 2002, the Registrant issued the following press release announcing operating results on an unaudited basis for the second quarter and six months of fiscal year 2002 ended December 31, 2001:

FOR IMMEDIATE RELEASE

TUESDAY, JANUARY 29, 2002

PRECISION OPTICS CORPORATION ANNOUNCES
SECOND QUARTER RESULTS

GARDNER, Massachusetts - Precision Optics Corporation, Inc. (Nasdaq: POCI) today announced operating results on an unaudited basis for the second quarter and six months of fiscal year 2002 ended December 31, 2001.

OPERATING RESULTS

Revenues for the quarter were \$323,314, compared to \$778,534 for the same period in fiscal year 2001, a decrease of 58.5%. Net loss, including restructuring charges of \$668,250, was \$1,995,301, or \$0.19 per share, compared to \$855,895 or \$0.08 per share, for the same period last year. The weighted average common shares outstanding were 10,503,908 compared to 10,498,608 for the same period

Edgar Filing: PRECISION OPTICS CORPORATION INC - Form 8-K

last year.

For the six months ended December 31, 2001, revenues were \$814,410 compared to \$1,666,833 for the same period last year, a decrease of 51.1%. Net loss, including charges for asset impairment, restructuring and inventory write-down totaling \$4,652,628, was \$7,501,230, or \$0.71 per share, compared to \$1,291,885 or \$0.12 per share, for the same period last year. The weighted average common shares outstanding were 10,503,908 compared to 10,447,425 for the same period last year.

The revenue decrease from the prior year for the second quarter was due primarily to lower sales of medical products (down 64%). For the quarter ended December 31, 2001, medical sales were lower due primarily to significantly lower shipments of stereo endoscopes and cameras.

The revenue decrease from the prior year for the six months ended December 31, 2001 was due to lower sales of medical products (down 60%), and lower sales of non-medical products (down 10%). For the six months ended December 31, 2001, medical sales were lower due primarily to lower sales of stereo endoscopes and cameras. Non-medical sales were lower due primarily to lower sales of Dense Wavelength Division Multiplexing (DWDM) filters. DWDM filter sales represented 13.2% of total revenues during the six months ended December 31, 2001 compared to 12.9% for the corresponding period of the prior year (a reduction in filter sales of approximately 50%).

PROVISION FOR ASSET IMPAIRMENT AND RESTRUCTURING AND INVENTORY WRITE-DOWN

As previously announced in November 2001, the Company recorded a provision for restructuring costs in the second quarter ended December 31, 2001 totaling \$668,250 related to its November 2001 workforce reduction affecting 13 employees and the resulting idle leased space in its Optical Thin Films Technology Center. The provision for asset impairment and restructuring of \$668,250 and \$4,112,628, respectively, in the quarter and six months ended December 31, 2001 consists of (1) a provision for restructuring costs recorded in the quarter ended December 31, 2001, representing the present value of future lease payments related to idle leased space and employee severance costs; and (2) a provision for asset impairment of approximately \$3,444,000 recorded in the quarter ended September 30, 2001 which represents a write-down to the lower of carrying value or fair market value of certain of the Company's property, plant and equipment invested in its optical thin films coating business.

The Company determined that certain inventories of DWDM filters and filter test instrumentation may not be sold within the Company's business cycle or the products' life cycle. As previously announced in November 2001, the Company recorded, in cost of goods sold, a provision for excess and obsolete inventory of approximately \$540,000 in the quarter ended September 30, 2001.

OUTLOOK

The asset impairment and restructuring measures as mentioned above, along with the August 2001 workforce reduction, which affected in total 37 employees, are expected to result in a reduction in future annual expenses. During the quarter ended December 31, 2001, total recurring operating expenses (excluding inventory purchases) were approximately \$1 million (or 39%) lower than the quarter ended June 30, 2001. Going forward, these cost reduction measures are expected to result in expense savings of at least \$3.5 million per year, of which approximately \$2.8 million per year represent actual cash savings.

Capital equipment expenditures during the six months ended December 31, 2001

Edgar Filing: PRECISION OPTICS CORPORATION INC - Form 8-K

were approximately \$59,000, down 93% from the same period last year. It is anticipated that the level of capital spending for the balance of fiscal year 2002 will continue to be substantially lower than last year.

For the quarter ended December 31, 2001, research and development expenses were approximately \$737,000, down 4.5% from the quarter ended December 31, 2000. It is anticipated that the quarterly level of R&D expenses for the balance of fiscal year 2002 will be substantially lower than last year.

The Company believes that downward trends in the selling prices of DWDM filters along with severely reduced demand may continue for an indeterminate period of time. For these reasons, the Company is proceeding cautiously in this market, conserving cash and other vital resources while evaluating potential courses of action during this period of market slowdown. The Company has retained certain DWDM capabilities in order to be positioned to capitalize on potential future opportunities in this market.

-2-

Meanwhile, the Company is pursuing advances on several fronts in the medical area and certain non-medical applications. Among these initiatives are improvements in medical instrument lens coatings, a new 30 DEG. line of sight version of the successful 5 mm Laparoscope, and other new products. The Company has made significant progress in autoclavable seal technology, which is expected to result in autoclavable sterilization of new endoscope products. Recent achievements of ISO 9001 and CE Mark certification, as recently announced, is also expected to support increased sales opportunities, both foreign and domestic, for the Company's medical products, as autoclavable endoscopes become available by the Company.

ABOUT PRECISION OPTICS

Precision Optics Corporation, a leading manufacturer of optical thin films and optical instruments since 1984, designs and manufactures high-quality optical thin film coatings, medical instruments, and other advanced optical systems. Major applications for the Company's thin film coatings have included DWDM filters used to increase the bandwidth capacity of fiber-optic telecommunications networks. The Company's medical instrumentation line includes laparoscopes, arthroscopes and endocouplers and a world-class 3-D endoscope for use in minimally invasive surgical procedures.
