SALISBURY BANCORP, INC. AND SUBSIDIARY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

NOTE 1 - BASIS OF PRESENTATION

The accompanying condensed consolidated interim financial statements are unaudited and include the accounts of Salisbury Bancorp, Inc. (the "Company"), its wholly owned subsidiary Salisbury Bank and Trust Company (the "Bank"), and the Bank's subsidiaries, S.B.T. Realty, Inc. and SBT Mortgage Service Corporation (the "PIC") formed in April 2004. The condensed consolidated interim financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

information and with the instructions to SEC Form 10-Q. Accordingly, they do not include all the information and footnotes required by GAAP for complete financial statements. All significant intercompany accounts and transactions have been eliminated in the consolidation. These financial statements reflect, in the opinion of Management, all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of the Company's financial position and the results of its operations and its cash flows for the periods presented. Operating results for the three months ended March 31, 2007 are not necessarily indicative of the results that may be expected for the year ending December 31, 2007. These financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's 2006 Annual Report on Form 10-K

The year-end condensed balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP.

### NOTE 2 - COMPREHENSIVE INCOME

-----

Statement of Financial Accounting Standards ("SFAS") No. 130, "Reporting Comprehensive Income," establishes standards for disclosure of comprehensive income which includes net income and any changes in equity from non-owner sources that are not recorded in the income statement (such as changes in the net unrealized gains (losses) on securities). The purpose of reporting comprehensive income is to report a measure of all changes in equity that result from recognized transactions and other economic events of the period other than transactions with owners in their capacity as owners. The Company's primary source of other comprehensive income is the net unrealized holding gain (loss) on securities.

Comprehensive income	\$ 548	\$1,460
	=====	=====

### NOTE 3 - IMPACT OF NEW ACCOUNTING STANDARDS

-----

In February 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 155, "Accounting for Certain Hybrid Instruments" (SFAS 155), which permits, but does not require, fair value accounting for any hybrid financial instrument that contains an embedded derivative that would otherwise require bifurcation in accordance with SFAS 133. The statement also subjects beneficial interests issued by securitization vehicles to the requirements of SFAS No. 133. The statement is effective as of January 1, 2007. The adoption of SFAS 155 is not expected to have a material impact on the Company's financial condition and results of operations.

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets- an amendment of FASB Statement No. 140 ("SFAS No. 156"). SFAS 156 requires any entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in specific situations. Additionally, the servicing asset or servicing liability shall be initially measured at fair value; however, an entity may elect the "amortization method" or "fair value method" for subsequent balance sheet reporting periods. SFAS 156 is effective as of an entity's first fiscal year beginning after September 15, 2006. Early adoption is permitted as of the beginning of an entity's fiscal year, provided the entity has not yet issued financial statements, including interim financial statements, for any period of that fiscal year. The Company does not expect the adoption of this statement to have a material impact on its financial condition, results of operations or cash flows.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles (GAAP) and enhances disclosures about fair value measurements. SFAS 157 retains the exchange price notion and clarifies that the exchange price is the price that would be received for an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date. SFAS 157 is effective for the Company's consolidated financial statements for the year beginning on January 1, 2008, with earlier adoption permitted. The Company does not expect the adoption of this statement to have a material impact on its financial condition and results of operations.

In September 2006, the FASB issued SFAS No. 158, "Employer's Accounting for Defined Benefit Pension and other Postretirement Plans - an amendment of FASB Statements No. 87, 88, 106 and 132 (R)" ("SFAS 158"). SFAS 158 requires 1) the recognition of an asset or liability for the over-funded or under-funded status of a defined benefit plan, 2) the recognition of actuarial gains and losses and prior service costs and credits in other comprehensive income, 3) measurement of plan assets and benefit obligations as of the employer's balance sheet date, rather than at interim measurement dates as currently allowed, and 4) disclosure of additional information concerning actuarial gains and losses and prior service costs and credits recognized in other comprehensive income. This statement is effective for financial statements with fiscal years ending after December 15, 2006. The Company does not believe the adoption of this Statement will have a material impact on the Company's financial position or result of operations.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FASB Statement No. 115" (SFAS 159). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This Statement also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The new standard is effective at the beginning of the Company's fiscal year beginning January 1, 2008, and early application may be elected in certain circumstances. The Company is currently evaluating and has not yet determined the impact the new standard is expected to have on its financial position, results of operations or cash flows.

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

### NOTE 4 - DEFINED BENEFIT PENSION PLAN

The following summarizes the net periodic benefit cost of the Company's defined benefit pension plan for the periods indicated:

	Three Months Ended March 31,	
	2007	2006
Components of net periodic benefit cost:		
Service cost	\$ 114,090	\$ 121,433
Interest cost	88,977	81,748
Expected return on plan assets	(77,164)	(71,417)
Amortization of:		
Prior service costs	223	223
Actuarial loss	21,173	24,132
	\$ 147,299	\$ 156,119
	=====	=====

The following actuarial weighted average assumptions were used in calculating net periodic benefit cost:

Discount rate	6.00%	6.00%
Average wage increase	Graded table*	Graded table*
Return on plan assets	7.50%	7.50%

\*5% at age 20 grading down to 3% at age 60 and beyond (roughly 3.25% on average).

- 9 -

### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

#### Business

-----

The following provides Management's comments on the financial condition and results of operations of Salisbury Bancorp, Inc. (the "Company"), a Connecticut corporation which is the holding company for Salisbury Bank and Trust Company (the "Bank"). The Company's sole subsidiary is the Bank, which has six (6) full service offices including a Trust and Investment Services Division located in the towns of Canaan, Lakeville, Salisbury and Sharon, Connecticut and Sheffield and South Egremont, Massachusetts. The Company and Bank were formed in 1998 and 1848, respectively. In order to provide a strong foundation for building shareholder value and servicing customers, the Company remains committed to investing in the technological and human resources necessary to developing new personalized financial products and services to meet the needs of customers. This discussion should be read in conjunction with Salisbury Bancorp, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2006.

#### RESULTS OF OPERATIONS

-----

#### Overview

-----

The Company's net income for the three months ended March 31, 2007 was \$934,000. This compares to earnings of \$1,147,000 for the same period in 2006. Earnings

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

per share for the three months ended March 31, 2007 totaled \$.55 per share, compared to earnings per share of \$.68 for the corresponding period in 2006. The decrease in earnings is primarily attributable to an increase in noninterest expense, specifically, additional staff to support new marketing strategies, growth and our branch expansion into New York State. Total noninterest expense for the first quarter of 2007 increased 16.99% when compared to the corresponding period in 2006.

The Company's assets at March 31, 2007 totaled \$431,117,000 compared to total assets of \$450,339,000 at December 31, 2006. During the first three months of 2007, net loans outstanding decreased \$6,411,000 to \$246,053,000. This compares to total net loans outstanding of \$252,464,000 at December 31, 2006. The decrease is attributable to the \$12,000,000 in Term Fed Funds that matured in the first quarter of 2007, and has been partially offset by loan portfolio growth. Non-performing loans totaled \$829,000 at March 31, 2007 as compared to non-performing loans totaling \$886,000 at December 31, 2006. This represents a decrease of \$57,000 or 6.4%. The Bank continues to monitor the quality of the loan portfolio to ensure that loan quality will not be sacrificed for growth or otherwise compromise the Company's objectives. Deposits at March 31, 2007 totaled \$305,017,000 as compared to total deposits of \$313,586,000 at December 31, 2006. The decrease at quarter end is primarily attributable to seasonal cash flows and a \$4,582,000 brokered CD, which matured the end of March and was not replaced.

As of March 31, 2007, the most recent notification from the Federal Deposit Insurance Corporation categorized the Bank as "well capitalized" under the regulatory framework for prompt corrective action. The Bank's total risk based capital ratio was 13.38%; the Tier 1 capital ratio was 12.52%; and the leverage ratio was 8.28%. As a result of the Company's first quarter financial performance, the Board of Directors declared a first quarter cash dividend of \$.27 per common share, which was paid on April 30, 2007 to shareholders of record as of March 31, 2007. This compared to a cash dividend of \$.26 per common share that was paid for the first quarter of 2006.

### Critical Accounting Estimates

-----

In preparing the Company's financial statements, management selects and applies numerous accounting policies. In applying these policies, management must make estimates and assumptions. The accounting policy that is most susceptible to critical estimates and assumptions is the allowance for loan losses. The determination of an appropriate provision is based on an estimation of the probable amount of future credit losses in the loan portfolio. Many factors influence the amount of future loan losses, relating to both the specific characteristics of the loan portfolio and general economic conditions nationally and locally. While management carefully considers these factors in determining the amount of the allowance for loan losses, future adjustments may be necessary due to changed conditions, which could have an adverse impact on reported earnings in the future. See "Provisions and Allowance for Loan Losses."

- 10 -

THREE MONTHS ENDED MARCH 31, 2007  
AS COMPARED TO THREE MONTHS ENDED MARCH 31, 2006

### Net Interest Income

-----

The Company's earnings are primarily dependent upon net interest and dividend income, and to a lesser extent its noninterest income, from its community banking operations. Net interest and dividend income is the difference between

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

interest and dividends earned on the loan and securities portfolio and interest paid on deposits and advances from the Federal Home Loan Bank. Noninterest income is primarily derived from the Trust and Investment Service Division, service charges and other fees related to deposit and loan accounts and from gains recognized on the sale of available-for-sale securities. For the following discussion, net interest and dividend income is presented on a fully taxable-equivalent ("FTE") basis. FTE interest income restates reported interest income on tax exempt securities as if such interest were taxed at the Company's federal tax rate of 34% for all periods presented.

(amounts in thousands)	2007	2006
Three Months ended March 31,	-----	-----
Total interest and dividend income (financial statements)	\$6,437	\$5,460
Tax equivalent adjustment	271	255
	-----	-----
Total interest and dividend income (on an FTE basis)	6,708	5,715
Total interest expense	3,071	2,167
	-----	-----
Net interest and dividend income-FTE	\$3,637	\$3,548
	=====	=====

Total interest and dividend income on an FTE basis for the three months ended March 31, 2007, when compared to the same period in 2006, increased \$993,000 or approximately 17.4%. The increase was primarily attributable to an economic environment of increased interest rates.

Interest expense on deposits for the first three months of 2007 totaled \$2,030,000, an increase of \$692,000 or 51.7% that compared to \$1,338,000 for the same period in 2006. This increase is primarily the result of an economic environment of generally higher interest rates. Although Federal Home Loan Bank advances have decreased during the three-month period ended March 31, 2007, interest expense on these advances increased 25.6% to \$1,041,000. This increase in interest expense is attributable to the increased monthly average balance of overnight borrowings. Total interest expense for the three months ended March 31, 2007 was \$3,071,000, an increase of \$904,000 or 41.7% when compared to the same period in 2006.

Overall, net interest and dividend income (on an FTE basis) increased \$89,000 or 2.5% to \$3,637,000 for the period ended March 31, 2007 when compared to the same period in 2006.

### Noninterest Income

-----

Noninterest income totaled \$1,124,000 for the three months ended March 31, 2007, an increase of \$98,000 or 9.6% compared to noninterest income of \$1,026,000 for the three months ended March 31, 2006. Continuing growth of the Trust and Investment Service Division has resulted in an increase in trust income of \$45,000 or 9.3% to \$530,000 for the first three months of 2007. Gains on sales of available-for-sale securities, net increased 58.1% to \$117,000 for the first three months of 2007 compared to the corresponding period in 2006. This increase is primarily the result of the movement of market rates during the year, which made it possible to take advantage of opportunities presented by the positive slope of yields during that time. Other income consists primarily of fees associated with transaction accounts and in addition, fees related to the origination and servicing of mortgage loans and gains related to the sale of mortgage loans. Other income for the first three months of 2007 totaled \$228,000 compared to \$214,000 for the same period in 2006.

# Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

- 11 -

## Noninterest Expense

Noninterest expense increased 16.99% for the first three months of 2007 as compared to the same period in 2006. The increases in the noninterest expenses listed in the table below are primarily attributable to additional staff to support new marketing strategies, growth and our branch expansion into New York State and fees associated with various projects under consideration. The components of noninterest expense and the changes in the period were as follows (amounts in thousands):

	2007	2006	Change	% Change
Salaries and employee benefits	\$ 1,952	\$ 1,703	\$ 249	14.62
Occupancy expense	191	176	15	8.52
Equipment expense	191	187	4	2.14
Data processing	337	283	54	19.08
Insurance	38	31	7	22.58
Printing and stationery	64	53	11	20.75
Professional fees	165	90	75	83.33
Legal expense	55	25	30	120.00
Amortization of core deposit intangible	41	41	0	0
Other expense	285	248	37	14.92
	-----	-----	-----	-----
Total noninterest expense	\$ 3,319	\$ 2,837	\$ 482	16.99
	=====	=====	=====	

## Income Taxes

The income tax provision for the first three months of 2007 totaled \$237,000 in comparison to \$335,000 for the same three-month period in 2006 as a result of less taxable income.

## Net Income

Overall, net income totaled \$934,000 for the three months ended March 31, 2007 and represents earnings of \$.55 per share. This compares to net income of \$1,147,000 or \$.68 per share for the same period in 2006.

## FINANCIAL CONDITION

Total assets at March 31, 2007 were \$431,117,000, compared to \$450,339,000 at December 31, 2006, a decrease of approximately 4.3%. The decrease is primarily the result of a decrease in earning assets during the quarter.

## Securities

During the three months ended March 31, 2007, the securities portfolio, which includes Federal Home Loan Bank stock, decreased \$9,580,000 or 5.9% to \$151,652,000 from \$161,232,000 at December 31, 2006. The decrease is primarily a reflection of portfolio available-for-sale securities being sold and called during the period with the proceeds being used primarily to fund loan growth and seasonal cash flow of transaction accounts.

The make up of the securities portfolio is diversified among U.S. Government sponsored agencies, mortgage-backed securities and securities issued by states

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

of the United States and political subdivisions of the states.

Securities are classified in the portfolio as either securities available-for-sale or securities held-to-maturity. Almost all securities are classified as available-for-sale. The securities reported as available-for-sale are stated at fair value in the financial statements of the Company. Unrealized holding gains and losses on available-for-sale securities (accumulated other comprehensive loss) are not included in earnings, but are reported as a net amount (less expected tax) in a separate component of capital until realized. At March 31, 2007, the unrealized loss net of tax was \$1,589,000. This compares to an unrealized loss net of tax of \$1,190,000 at December 31, 2006. The unrealized losses in these securities are attributable to changes in market interest rates. Management deems the securities that are currently in an unrealized loss position as not other than temporarily impaired. The securities reported as securities held-to-maturity are stated at amortized cost.

- 12 -

### Lending

-----

Total loans outstanding of \$248,319,000 at March 31, 2007 decreased compared to total loans outstanding of \$254,773,000 at December 31, 2006. This is a decrease of \$6,454,000 or 2.53%. New business development during the first three months of 2007 coupled with a small increase in loan demand nearly offset the \$12,000,000 maturity in Term Federal Funds that was included in the loan portfolio at December 31, 2006. Competition for loans remains aggressive in the Bank's market area, especially in the residential mortgage loan market.

The following table represents the composition of the loan portfolio at March 31, 2007 and December 31, 2006:

	March 31, 2007	December 31, 2006
	-----	-----
	(amounts in thousands)	
Commercial, financial and agricultural	\$ 17,722	\$ 16,465
Real Estate-construction and land development	22,288	21,169
Real Estate-residential	149,736	145,395
Real Estate-commercial	50,108	50,859
Consumer	8,395	8,816
Term federal funds	0	12,000
Other	71	69
	-----	-----
	248,320	254,773
Deferred costs, net	204	168
Unearned income	(2)	(3)
Allowance for loan losses	(2,469)	(2,474)
	-----	-----
Net Loans	\$ 246,053	\$ 252,464
	=====	=====

At March 31, 2007 and December 31, 2006, approximately 90% of the Bank's loan portfolio was related to real estate products.

### Provisions and Allowance for Loan Losses

-----

Credit risk is inherent in the business of extending loans. The Bank monitors the loan portfolio to ensure that loan quality will not be sacrificed for growth

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

or otherwise compromise the Bank's objectives. Because of this risk associated with extending loans, the Bank maintains an Allowance for Loan and Lease Losses ("ALLL") through charges to earnings. The Bank determined that no provision for loan losses was warranted for the first three month period of 2007 and 2006.

The Bank evaluates the adequacy of the allowance no less frequently than on a quarterly basis. No material changes have been made in the estimation methods or assumptions that the Bank uses in making this determination during the period ended March 31, 2007. Such evaluations are based on assessments of credit quality and "risk rating" of loans by senior management, which is reviewed by the Bank's Loan Committee on a regular basis. Loans are initially risk rated when originated. If there is deterioration in the credit, the risk rating is adjusted accordingly.

The allowance also includes a component resulting from the application of the measurement criteria of Statements of Financial Accounting Standards No. 114, "Accounting by Creditors for Impairment of a Loan" ("SFAS 114"). Impaired loans receive individual evaluation of the allowance necessary on a monthly basis. Loans to be considered for impairment are defined in the Bank's Loan Policy as commercial loans with balances outstanding of \$100,000 or more and residential real estate mortgages with balances of \$300,000 or more. Such loans are considered impaired when it is probable that the Bank will not be able to collect all principal and interest due according to the terms of the note.

Any such commercial loan and/or residential mortgage will be considered for impairment under any of the following circumstances:

1. Non-accrual status;
2. Loans over 90 days delinquent;

- 13 -

3. Troubled debt restructures consummated after December 31, 1994;
4. Loans classified as "doubtful", meaning that they have weaknesses, which make collection or liquidation in full, based on currently existing facts, conditions, and values, highly questionable and improbable.

The individual allowance for any impaired loan is based upon the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral if the loan is collateral dependent. Specifically identifiable and quantifiable losses are immediately charged off against the allowance.

In addition, a risk of loss factor is applied in evaluating categories of loans generally as part of the periodic analysis of the Allowance for Loan Losses. This analysis reviews the allocations of the different categories of loans within the portfolio and it considers historical loan losses and delinquency figures as well as any recent delinquency trends.

The credit card delinquency and loss history is separately evaluated and given a special loan loss factor because management recognizes the higher risk involved in such loans. Concentrations of credit and local economic factors are also evaluated on a periodic basis. Historical average net losses by loan type are examined as well as trends by type. The Bank's loan mix over the same period is also analyzed. A loan loss allocation is made for each type of loan multiplied by the loan mix percentage for each loan type to produce a weighted average factor.

Nonperforming loans, which include all loans that are on a non-accrual status along with loans that are 90 days or more past due and still accruing, are

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

closely monitored by management. At March 31, 2007, nonperforming loans totaled \$829,000 or 0.33% of total loans outstanding of \$248,320,000. The allowance for loan losses totaled \$2,469,000, representing 297.83% of nonperforming loans and .99% of total loans outstanding at March 31, 2007. Nonperforming loans totaled \$964,000 or .38% of total loans outstanding of \$254,773,000 at December 31, 2006. The allowance for loan losses totaled \$2,474,000 at December 31, 2006 and represented 256.91% of nonperforming loans and 1.02% of total loans outstanding net of term federal funds sold. A total of \$39,000 of loans was charged off by the Bank during the three months ended March 31, 2007. These charged-off loans consisted primarily of credit card and consumer installment loans. This compares to loans charged off during the three months period ended March 31, 2006 that totaled \$41,000. A total of \$33,000 of previously charged-off loans was recovered during the three month period ended March 31, 2007. Recoveries for the same period in 2006 totaled \$7,000. While management estimates loan losses using the best available information, no assurances can be given that future additions to the allowance will not be necessary based on changes in economic and real estate market conditions, further information obtained regarding problem loans, identification of additional problem loans or other factors. Additionally, future additions to the allowance may be necessary to maintain adequate coverage ratios.

### Deposits

-----

The Company offers a variety of deposit accounts with a range of interest rates and terms. The following table illustrates the composition of the Company's deposits at March 31, 2007 and December 31, 2006:

	March 31, 2007	December 31, 2006
	-----	-----
	(amounts in thousands)	
Demand	\$ 65,263	\$ 70,502
NOW	24,648	21,461
Money Market	55,908	57,015
Savings	45,034	44,246
Time	114,164	120,362
	-----	-----
Total Deposits	\$305,017	\$313,586
	=====	=====

Deposits constitute the principal funding source of the Company's assets.

### Borrowings

-----

The Company utilizes advances from the Federal Home Loan Bank as part of its operating strategy to supplement deposit growth and fund its asset growth, a strategy that is designed to increase interest income. These advances are made pursuant to various credit programs, each of which has its own interest rate and range of maturities. At March 31, 2007, the Company had \$76,863,000 in outstanding advances from the Federal Home Loan Bank compared to \$87,093,000 at December 31, 2006. Management expects that it will continue this strategy of supplementing deposit growth with advances from the Federal Home Loan Bank.

- 14 -

### Interest Rate Risk

-----

Interest rate risk is the most significant market risk affecting the Company.

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

Interest rate risk is defined as an exposure to a movement in interest rates that could have an adverse effect on net interest income. Net interest income is sensitive to interest rate risk to the degree that interest-bearing liabilities mature or reprice on a different basis than earning assets. In an attempt to manage its exposure to changes in interest rates, the Bank's assets and liabilities are managed in accordance with policies established and reviewed by the Bank's Board of Directors. The Bank's Asset/Liability Management Committee monitors asset and deposit levels, developments, and trends in interest rates, liquidity and capital. One of the primary financial objectives is to manage interest rate risk and control the sensitivity of earnings to changes in interest rates in order to prudently improve net interest income and manage the maturities and interest rate sensitivities of assets and liabilities.

To quantify the extent of these risks, both in its current position and in actions it might take in the future, interest rate risk is monitored using gap analysis which identifies the differences between assets and liabilities which mature or reprice during specific time frames and model simulation which is used to "rate shock" the Company's assets and liability balances to measure how much of the Company's net interest income is "at risk" from sudden rate changes.

An interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets maturing or repricing within a specific time and the amount of interest-bearing liabilities maturing or repricing within that same period. A gap is considered positive when the amount of interest rate sensitive assets exceeds the amount of interest rate sensitive liabilities. A gap is considered negative when the amount of interest rate sensitive liabilities exceeds the amount of interest rate sensitive assets. At March 31, 2007, the Company maintains a slight asset sensitive (positive gap) position. This would suggest that during a period of rising interest rates, the Company would be in a better position to invest in higher yielding assets resulting in growth in interest income. To the contrary, during a period of falling interest rates, a positive gap would result in a decrease in interest income. The level of interest rate risk at March 31, 2007 is within the limits approved by the Board of Directors.

### Liquidity

-----

Liquidity is the ability to raise funds on a timely basis at an acceptable cost in order to meet cash needs. Adequate liquidity is necessary to handle fluctuations in deposit levels, to provide for customers' credit needs, and to take advantage of investment opportunities as they are presented. The Company manages liquidity primarily with readily marketable investment securities, deposits and loan repayments. The Company's subsidiary, the Bank, is a member of the Federal Home Loan Bank of Boston. This enhances the liquidity position by providing a source of available borrowings. At March 31, 2007, the Company had approximately \$52,550,000 in loan commitments outstanding. Management believes that the current level of liquidity is ample to meet the Company's needs for both the present and foreseeable future.

### Capital

-----

At March 31, 2007, the Company had \$44,443,000 in shareholders' equity, an increase of .2 % when compared to December 31, 2006 shareholders' equity totaling \$44,349,000. Net income for the three-month period ended March 31, 2007 totaled \$934,000. Market conditions resulted in an increase in accumulated other comprehensive loss to \$2,908,000 at March 31, 2007 from \$2,522,000 at December 31, 2006.

A review and analysis of securities has determined that there has been no credit deterioration and that the unrealized loss on securities available-for-sale is

due to the current interest rate environment and management deems the securities to be not other than temporarily impaired. Under current regulatory definitions, the Company and the Bank are considered to be "well capitalized" for capital adequacy purposes. As a result, the Bank pays the lowest federal deposit insurance deposit premiums possible. One primary measure of capital adequacy for regulatory purposes is based on the ratio of risk-based capital to risk-weighted assets. This method of measuring capital adequacy helps to establish capital requirements that are more sensitive to the differences in risk associated with various assets. It takes into account off-balance sheet exposure in assessing capital adequacy and it minimizes disincentives to holding liquid, low-risk assets. At March 31, 2007, the Company had a total consolidated risk based capital ratio of 13.38%, a Tier 1 risk based capital ratio of 12.52% and a leverage ratio of 8.28%. This compares to a total consolidated risk based capital ratio of 15.28%, a Tier 1 risk based capital ratio of 14.28% and a leverage ratio

- 15 -

of 8.43% at December 31, 2006. Maintaining strong capital is essential to bank safety and soundness. However, the effective management of capital resources requires generating attractive returns on equity to build value for shareholders while maintaining appropriate levels of capital to fund growth, meet regulatory requirements and be consistent with prudent industry practices. Management believes that the capital levels of the Company and Bank are adequate to continue to meet the foreseeable capital needs of the institutions.

#### Impact of Inflation and Changing Prices

-----

The Company's consolidated financial statements are prepared in conformity with generally accepted accounting principles, which require the measurement of financial condition, and operating results in terms of historical dollars without considering changes in the relative purchasing power of money, over time, due to inflation. Unlike most industrial companies, virtually all of the assets and liabilities of the Company are monetary and as a result, interest rates have a greater impact on the Company's performance than do the effects of general levels of inflation, although interest rates do not necessarily move in the same direction or with the same magnitude as the prices of goods and services. Although not an influence in recent years, inflation could impact earnings in future periods.

#### Forward Looking Statements

-----

This Form 10-Q and future filings made by the Company with the Securities and Exchange Commission, as well as other filings, reports and press releases made or issued by the Company and the Bank, and oral statements made by executive officers of the Company and the Bank, may include forward-looking statements relating to such matters as:

- (a) assumptions concerning future economic and business conditions and their effect on the economy in general and on the markets in which the Company and the Bank do business; and
- (b) expectations for revenues and earnings for the Company and Bank.

Such forward-looking statements are based on assumptions rather than historical or current facts and, therefore, are inherently uncertain and subject to risk. For those statements, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Act of 1995.

## Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

The Company notes that a variety of factors could cause the actual results or experience to differ materially from the anticipated results or other expectations described or implied by such forward-looking statements. The risks and uncertainties that may effect the operation, performance, development and results of the Company and Bank's business include the following:

- (a) the risk of adverse changes in business conditions in the banking industry generally and in the specific markets in which the Bank operates;
- (b) changes in the legislative and regulatory environments that negatively impact the Company and Bank through increased operating expenses;
- (c) increased competition from other financial and non-financial institutions;
- (d) the impact of technological advances; and
- (e) other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission.

Such developments could have an adverse impact on the Company's and the Bank's financial position and results of operations.

- 16 -

### Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The main components of market risk for the Company are interest rate risk and liquidity risk. The Company manages interest rate risk and liquidity risk through an ALCO Committee comprised of outside Directors and Senior Management. The Committee monitors compliance with the Bank's Asset/Liability Policy, which provides guidelines to analyze and manage the interest rate sensitivity gap, which is the difference between the amount of assets and the amounts of liabilities that mature or reprice during specific periods. Model simulation is used to measure earnings volatility under both rising and falling rate scenarios. Please refer to Interest Rate Risk and Liquidity under Part I, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operation, of this Form 10-Q. The Company's interest rate risk and liquidity position has not significantly changed from year-end 2006.

- 17 -

### Item 4. Controls and Procedures.

The Company's Chief Executive Officer and Chief Financial Officer concluded that, based upon an evaluation as of March 31, 2007, the Company's disclosure controls and procedures are effective and designed to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and is accumulated and communicated to the Company's Management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely discussions regarding required disclosure. During the three month period ended March 31, 2007, there were no changes in the Company's internal control over financial reporting that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## Part II - OTHER INFORMATION
