SOUTHERN MISSOURI BANCORP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1: Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Securities and Exchange Commission (SEC) Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all material adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. The consolidated balance sheet of the Company as of June 30, 2007, has been derived from the audited consolidated balance sheet of the Company as of that date. Operating results for the nine-month period ended March 31, 2008, are not necessarily indicative of the results that may be expected for the entire fiscal year. For additional information, refer to the Company's June 30, 2007, Form 10-K, which was filed with the SEC and the Company's annual report, which contains the audited consolidated financial statements for the fiscal years ended June 30, 2007 and 2006.

The accompanying consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, Southern Missouri Bank & Trust Co. (SMBT or Bank). All significant intercompany accounts and transactions have been eliminated in consolidation.

Note 2: Securities

Available for sale securities are summarized as follows at estimated fair value:

	Amortized Cost	March 31, 2008		Estimated Fair Value

Note 5: Earnings Per Share

Basic and diluted earnings per share are based upon the weighted-average shares outstanding. The following table summarizes basic and diluted earnings per common share for the three- and nine-month periods ended March 31, 2008 and 2007.

	Three months ended		Nine months ended	
	March 31,		March 31,	
	2008	2007	2008	2007
Net income	\$ 898,111	\$ 651,777	\$ 2,584,162	\$ 2,115,127
Average Common shares – outstanding basic	2,212,961	2,228,514	2,194,069	2,228,373
Stock options under treasury stock method	10,716	56,437	9,703	54,627
Average Common share – outstanding diluted	2,223,677	2,284,951	2,203,772	2,283,000
Basic earnings per common share	\$ 0.41	\$ 0.29	\$ 1.18	\$ 0.95
Diluted earnings per common share	\$ 0.40	\$ 0.29	\$ 1.17	\$ 0.93

Note 6: Stock Option Plans

Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), "Share-Based Payment," requires that compensation costs related to share-based payment transactions be recognized in financial statements. With limited exceptions, the amount of compensation cost is measured based on the grant-date fair value of the equity instruments issued. Compensation cost is recognized over the vesting period during which an employee provides service in exchange for the award.

Note 7: Employee Stock Ownership Plan

The Bank established a tax-qualified ESOP in April 1994. The plan covers substantially all employees who have attained the age of 21 and completed one year of service. The Company's intent is to continue the ESOP for fiscal 2008. The Company has been accruing \$50,000 per quarter for ESOP benefit expenses during this fiscal year and intends to contribute cash to the plan to allow the purchase of shares for allocation to participants at some point during fiscal 2008.

Note 8: Corporate Obligated Floating Rate Trust Preferred Securities

Southern Missouri Statutory Trust I issued \$7.0 million of Floating Rate Capital Securities (the "Trust Preferred Securities") in March, 2004, with a liquidation value of \$1,000 per share. The securities are due in 30 years, redeemable after five years and bear interest at a floating rate based on LIBOR. The securities represent undivided beneficial interests in the trust, which was established by the Company for the purpose of issuing the securities. The Trust Preferred Securities were sold in a private transaction exempt from registration under the Securities Act of 1933, as amended (the "Act") and have not been registered under the Act. The securities may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements.

Southern Missouri Statutory Trust I used the proceeds from the sale of the Trust Preferred Securities to purchase Junior Subordinated Debentures of the Company. The Company has used its net proceeds for working capital and investment in its subsidiary.

Note 9: Authorized Share Repurchase Program

In June, 2007, the Board of Directors authorized and announced the open-market or privately-negotiated stock repurchase of up to 110,000 shares of the Company's outstanding stock. As of March 31, 2008, a total of 49,343 shares have been repurchased. The number of shares, as of March 31, 2008, held as treasury stock was 722,593.

Note 10: Newly Adopted Accounting Pronouncements

The Company adopted the provisions of FASB Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes," on July 1, 2007. Implementation of the new Standard did not have a material impact on the Company's financial statements. The Company files income tax returns in the U.S. federal jurisdiction and the state of Missouri. As of May 13, 2008, the open tax years under FIN 48 are 2006, 2005, and 2004. These tax years correspond to our fiscal years ended 2007, 2006, and 2005.

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements" ("SFAS No. 157"), which defines fair value, establishes a framework for measuring fair value in generally accepted accounting standards, and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years

beginning after November 15, 2007, and interim periods within those fiscal years. In March 2008, the FASB issued Staff Position No. FAS 157-2 (“FSP No. 157-2”), which delays the effective date of SFAS No. 157 for nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), to fiscal years and interim periods beginning after November 15, 2008. Management has evaluated the requirements of SFAS No. 157 and believes it will not have a material effect on the Company’s financial condition or results of operations.

In September 2006, the Emerging Issues Task Force (EITF) Issue 06-4, “Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements,” was ratified. This EITF Issue addresses accounting for separate agreements which split life insurance policy benefits between an employer and employee. The Issue requires the employer to recognize a liability for future benefits payable to the employee under these agreements. The effects of applying this Issue must be recognized through either a change in accounting principle through an adjustment to equity or through the retrospective application to all prior periods. The consensus in this Issue is effective for fiscal years beginning after December 15, 2007, with earlier application permitted. Management is reviewing the impact the adoption of the Issue will have on the Company’s financial results.

In February 2007, the FASB issued Statement No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115” (“SFAS No. 159”). SFAS No. 159 provides companies with an option to report selected financial assets and liabilities at estimated fair value. Most of the provisions of SFAS No. 159 are elective; however, the amendment to SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities, applies to all entities that own trading and available-for-sale securities. The fair value option created by SFAS No. 159 permits an entity to measure eligible items at fair value as of specified election dates. The fair value option (a) may generally be applied instrument by instrument, (b) is irrevocable unless a new election date occurs, and (c) must be applied to the entire instrument and not to only a portion of the instrument. SFAS No. 159 is effective as of the beginning of an entity’s first fiscal year beginning after November 15, 2007. Early adoption is permitted as of the beginning of the previous fiscal year provided that the entity makes that choice in the first 120 days of the fiscal year, has not yet issued financial statements for any interim period of such year, and also elects to apply the provisions of SFAS No. 157. Management has evaluated the requirements of SFAS No. 159 and believes it will not have a material effect on the Company’s financial condition or results of operations.

In December 2007, the FASB issued Statement No. 141 (revised 2007), “Business Combinations—A Replacement of FASB Statement No. 141” (“SFAS No. 141(R)”) and Statement No. 160, “Noncontrolling Interests in Consolidated Financial Statements—An Amendment of ARB No. 51” (“SFAS No. 160”). SFAS No. 141(R) establishes principles and requirements for how an acquirer recognizes and measures certain items in a business combination, as well as disclosures about the nature and financial effects of a business combination. SFAS No. 160 establishes accounting and reporting standards surrounding noncontrolling interest, or minority interests, which are the portions of equity in a subsidiary not attributable, directly or indirectly, to a parent. The pronouncements are effective for fiscal years beginning on or after December 15, 2008 and apply prospectively to business combinations. Presentation and disclosure requirements related to noncontrolling interests must be retrospectively applied. Management is currently evaluating the impact of SFAS No. 141(R) on its accounting for future acquisitions; management has evaluated the requirements of SFAS No. 160 and believes it will not have a material effect on the Company’s financial condition or results of operations.

In March 2008, the FASB issued Statement No. 161, “Disclosures about Derivative Instruments and Hedging Activities—An Amendment of FASB Statement No. 133” (“SFAS No. 161”). SFAS No. 161 requires enhanced qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. Management is currently evaluating the impact of SFAS 161 on Company’s consolidated financial statements.

PART I: Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations
SOUTHERN MISSOURI BANCORP, INC.

General

Southern Missouri Bancorp, Inc. (Southern Missouri or Company) is a Missouri corporation and owns all of the outstanding stock of Southern Missouri Bank & Trust Co. (SMBT or the Bank). The Company's earnings are primarily dependent on the operations of the Bank. As a result, the following discussion relates primarily to the operations of the Bank. The Bank's deposit accounts are generally insured up to a maximum of \$100,000 (certain retirement accounts are insured up to \$250,000) by the Deposit Insurance Fund (DIF), which is administered by the Federal Deposit Insurance Corporation (FDIC). The Bank currently conducts its business through its home office located in Poplar Bluff and eight full service branch facilities in Poplar Bluff (2), Van Buren, Dexter, Kennett, Doniphan, Sikeston, and Qulin, Missouri.

The significant accounting policies followed by Southern Missouri Bancorp, Inc. and its wholly-owned subsidiary for interim financial reporting are consistent with the accounting policies followed for annual financial reporting. All adjustments, which are of a normal recurring nature and are in the opinion of management necessary for a fair statement of the results for the periods reported, have been included in the accompanying consolidated condensed financial statements.

The consolidated balance sheet of the Company as of June 30, 2007, has been derived from the audited consolidated balance sheet of the Company as of that date. Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Form 10-K annual report filed with the Securities and Exchange Commission.

Management's discussion and analysis of financial condition and results of operations is intended to assist in understanding the financial condition and results of operations of the Company. The information contained in this section should be read in conjunction with the unaudited consolidated financial statements and accompanying notes. The following discussion reviews the Company's consolidated financial condition at March 31, 2008, and the results of operations for the three- and nine-month periods ended March 31, 2008 and 2007, respectively.

Forward Looking Statements

This document, including information incorporated by reference, contains forward-looking statements about the Company and its subsidiaries which we believe are within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may include, without limitation, statements with respect to anticipated future operating and financial performance, growth opportunities, interest rates, cost savings and funding advantages expected or anticipated to be realized by management. Words such as "may," "could," "should," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan" and similar expressions are intended to identify these forward-looking statements. Forward-looking statements by the Company and its management are based on beliefs, plans, objectives, goals, expectations, anticipations, estimates and intentions of management and are not guarantees of future performance. The important factors we discuss below, as well as other factors discussed under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" and identified in our filings with the SEC and those presented elsewhere by our management from time to time, could cause actual results to differ materially from those indicated by the forward-looking statements made in this document:

-

the strength of the United States economy in general and the strength of the local economies in which we conduct operations;

- the strength of the real estate market in the local economies in which we conduct operations;
- the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Federal Reserve Board;
 - inflation, interest rate, market and monetary fluctuations;
- the timely development of and acceptance of our new products and services and the perceived overall value of these products and services by users, including the features, pricing and quality compared to competitors' products and services;
 - the willingness of users to substitute our products and services for products and services of our competitors;
- the impact of changes in financial services' laws and regulations (including laws concerning taxes, banking, securities and insurance);
 - the impact of technological changes;
 - acquisitions;

- changes in consumer spending and saving habits; and
- our success at managing the risks involved in the foregoing.

The Company disclaims any obligation to update or revise any forward-looking statements based on the occurrence of future events, the receipt of new information, or otherwise.

Critical Accounting Policies

Generally accepted accounting principles are complex and require management to apply significant judgments to various accounting, reporting and disclosure matters. Management of the Company must use assumptions and estimates to apply these principles where actual measurement is not possible or practical. For a complete discussion of the Company's significant accounting policies, see "Notes to the Consolidated Financial Statements" in the Company's 2007 Annual Report. Certain policies are considered critical because they are highly dependent upon subjective or complex judgments, assumptions and estimates. Changes in such estimates may have a significant impact on the financial statements. Management has reviewed the application of these policies with the Audit Committee of the Company's Board of Directors. For a discussion of applying critical accounting policies, see "Critical Accounting Policies" beginning on page 11 in the Company's 2007 Annual Report.

Executive Summary

Our results of operations depend primarily on our net interest margin, which is directly impacted by the interest rate environment. The net interest margin represents interest income earned on interest-earning assets (primarily mortgage loans, commercial loans and the investment portfolio), less interest expense paid on interest-bearing liabilities (primarily certificates of deposit, savings, interest-bearing demand accounts and borrowed funds), as a percentage of average interest-earning assets. Net interest margin is directly impacted by the spread between long-term interest rates and short-term interest rates, as our interest-earning assets, particularly those with initial terms to maturity or repricing greater than one year, generally price off longer term rates while our interest-bearing liabilities generally price off shorter term interest rates.

Our net interest income is also impacted by the shape of the market yield curve. A steep yield curve – in which the difference in interest rates between short term and long term periods is relatively large – could be beneficial to our net interest income, as the interest rate spread between our additional interest-earning assets and interest-bearing liabilities would be larger. Conversely, a flat or flattening yield curve, in which the difference in rates between short term and long term periods is relatively small or shrinking, or an inverted yield curve, in which short term rates exceed long term rates, could have an adverse impact on our net interest income, as our interest rate spread could decrease.

Our results of operations may also be affected significantly by general and local economic and competitive conditions, particularly those with respect to changes in market interest rates, government policies and actions of regulatory authorities.

During the first nine months of fiscal 2008, we grew our balance sheet by \$25.2 million, which was consistent with the Company's growth strategies. This additional growth reflected an \$18.9 million increase in total net loans, an \$8.7 million increase in investments, a \$12.2 million increase in deposits, and a \$10.4 million increase in borrowed funds. The growth in loans was primarily due to residential and commercial real estate loan originations. The increase in borrowed funds was primarily in the form of both Federal Home Loan Bank (FHLB) borrowings and securities sold under agreements to repurchase, and was used primarily to fund loan and investment growth.

Our net income for the third quarter of fiscal 2008 increased 37.8% to \$898,000, as compared to \$652,000 earned during the same period of the prior year. The increase in net income compared to the year-ago period was primarily

due to a 25.3% increase in net interest income and a 16.5% increase in non-interest income, partially offset by a 250.0% increase in loan loss provisions and a 5.2% increase in non-interest expense. Diluted earnings per share for the third quarter of fiscal 2008 were \$0.40, as compared to \$0.29 for the third quarter of fiscal 2007. For the first nine months of fiscal 2008, net income increased 22.2% to \$2.58 million, as compared to \$2.12 million earned during the same period of the prior year. The increase in net income compared to the year-ago period was primarily due to a 15.2% increase in net interest income and a 9.1% increase in non-interest income, partially offset by a 6.8% increase in non-interest expense and a 71.9% increase in loan loss provisions. For the third quarter of fiscal 2008, our increase in net interest income was due primarily to an increase in average interest rate spread, as well as an increase in average interest-earning assets. For the fiscal year-to-date, the increase in net interest income was due primarily to an increase in average interest-earning assets, as well as an increase in average interest rate spread.

Short-term market interest rates declined significantly during the first nine months of fiscal 2008, following increases during the previous two fiscal years. After two years of increases left the targeted overnight lending rate at 5.25% in June 2006, the Federal Open Market Committee of the Federal Reserve Bank (FOMC) held the rate steady until September 2007, when it cut the rate by 50 basis points, to 4.75%, and then followed with another 50 basis points in cuts from October to December, lowering the rate to 4.25%. In January, the FOMC cut the targeted Fed Funds rate another 125 basis points (including one unscheduled meeting), to 3.00%, and then lowered the rate an additional 75 basis points in March, to 2.25%. Subsequently, a

market consensus has emerged which indicates that the Fed has neared the end of the easing cycle, prompting a sell-off in treasuries, sending the yield curve higher. From July 1, 2007, to March 17, 2008, rates on short term treasuries declined based on investor expectations regarding short-term monetary policy. At July 1, 2007, the six-month treasury bill, two-year treasury note, and ten-year treasury bond each yielded about 5%; at March 17, 2008, immediately prior to the FOMC meeting, the yield was off approximately 370 basis points on the six-month bill, and 365 basis points on the two-year note, while the ten-year bond yield had declined about 165 basis points. The result was a generally steepened yield curve. In this rate environment, our net interest margin increased 42 basis points when comparing the third quarter of fiscal 2008 with the corresponding period in fiscal 2007; comparing the first nine months of fiscal 2008 to the corresponding period in fiscal 2007, our margin increased 20 basis points. Subsequent to the quarter end, the FOMC cut rates by an additional 25 basis points on April 30, 2008. The changing assumptions about the direction of monetary policy following the mid-March meeting of the FOMC prompted a significant sell-off in treasuries that has increased rates across the yield curve. The six-month treasury bill is yielding 1.64% at April 30, 2008, up from 1.31% at March 17, 2008. Similarly, the two-year treasury note is yielding 2.29%, up from 1.35%, and the ten-year bond is yielding 3.77%, up from 3.34%. The Company believes rate cuts to date have had and will continue to have a positive impact on our results of operations, but additional rate cuts could bring the short end of the yield curve to a point at which we cannot maintain our historical pricing margins on deposit products, which may have a negative impact on operating results.

The Company's net income is also affected by the level of non-interest income and operating expenses. Non-interest income consists primarily of service charges, ATM and loan fees, and other general operating income. Operating expenses consist primarily of salaries and employee benefits, occupancy-related expenses, postage, insurance, advertising, professional fees, office expenses, and other general operating expenses. During the three- and nine-month periods ended March 31, 2008, non-interest income increased 16.5% and 9.1%, respectively, compared to the same periods of the prior fiscal year, primarily due to increased non-sufficient funds activity, debit card and ATM transaction fee income, and payment of loan late charges, and was partially offset by decreased secondary market residential real estate loan fee income. Non-interest expense increased during the three- and nine-month periods ended March 31, 2008, by 5.2% and 6.8%, respectively, compared to the same periods of the prior fiscal year, primarily in the categories of compensation and benefits, data processing, accounting services, and additional charges for debit card activity, as well as charges to amortize the Company's investments in tax credits, and were partially offset by lower advertising expenses, legal expenses, losses on the disposition of foreclosed real estate, and other miscellaneous expenses.

We expect to continue to grow our assets modestly through the origination and occasional purchase of loans, and purchases of investment securities. The primary funding for our asset growth is expected to come from retail deposits, short- and long-term FHLB borrowings, and, as needed, brokered certificates of deposit. We intend to grow deposits by offering desirable deposit products for our existing customers and by attracting new depository relationships. We will continue to explore branch expansion opportunities in market areas that we believe present attractive opportunities for our strategic business model.

Comparison of Financial Condition at March 31, 2008, and June 30, 2007

The Company's total assets increased by \$25.2 million, or 6.6%, to \$405.2 million at March 31, 2008, as compared to \$379.9 million at June 30, 2007. Loans, net of the allowance for loan losses, increased \$18.9 million, or 6.1%, to \$331.0 million, as compared to \$312.1 million at June 30, 2007. Residential real estate loans grew by \$8.9 million, while commercial real estate loans grew by \$8.3 million. The Company continues to focus on origination of commercial and commercial real estate loans. Investment balances increased by \$8.7 million, or 24.8%, to \$43.5 million, as compared to \$34.9 million at June 30, 2007. Additional collateral requirements due to increased public funds deposits and securities sold under agreements to repurchase prompted the increase, which was also timed to take

advantage of historically wide spreads available on some investment purchases. Cash and cash equivalent balances decreased \$2.4 million, or 33.1%, to \$4.9 million, as compared to \$7.3 million at June 30, 2007.

Asset growth during the first nine months of fiscal 2008 has been funded primarily with deposit growth; deposits increased \$12.2 million, or 4.5%, to \$282.3 million at March 31, 2008, compared to \$270.1 million at June 30, 2007. The increase in deposits was due to a \$15.2 million increase in certificates of deposit, and a \$1.4 million increase in checking accounts, partially offset by a \$4.7 million decrease in money market savings and money market deposit accounts. FHLB advances totaled \$59.5 million at March 31, 2008, compared to \$54.0 million at June 30, 2007, an increase of \$5.5 million, or 10.2%. Securities sold under agreements to repurchase totaled \$22.7 million at March 31, 2008, an increase of \$4.9 million, or 27.6%, compared to \$17.8 million at June 30, 2007.

Total stockholders' equity increased \$2.4 million, or 8.2%, to \$31.1 million at March 31, 2008, as compared to \$28.7 million at June 30, 2007. The increase was primarily due to retention of net income, an increase in the market value of the available-for-sale investment portfolio, and the exercise of stock options outstanding, partially offset by purchases of treasury stock and cash dividends paid.

Average Balance Sheet for the Three- and Nine-Month Periods Ended March 31, 2008 and 2007

The tables below present certain information regarding Southern Missouri Bancorp, Inc.'s financial condition and net interest income for the three- and nine-month periods ending March 31, 2008 and 2007. The tables present the annualized average yield on interest-earning assets and the annualized average cost of interest-bearing liabilities. We derived the yields and costs by dividing annualized income or expense by the average balance of interest-earning assets and interest-bearing liabilities, respectively, for the periods shown. Yields on tax-exempt obligations were not computed on a tax equivalent basis.

	Three-month period ended March 31, 2008			Three-month period ended March 31, 2007

average interest-bearing
liabilities

- (1) Calculated net of deferred loan fees, loan discounts and loans-in-process. Non-accrual loans are included in average loans.
- (2) Includes FHLB stock and related cash dividends.
- (3) Includes average balances for fixed assets and BOLI of \$8.5 million and \$7.1 million, respectively, for the nine-month period ending March 31, 2008, as compared to \$8.8 million and \$6.8 million for the same period of the prior year.
- (4) Interest rate spread represents the difference between the average rate on interest-earning assets and the average cost of interest-bearing liabilities.
- (5) Net interest margin represents net interest income divided by average interest-earning assets.

Results of Operations – Comparison of the three- and six-month periods ended March 31, 2008 and 2007

General. Net income for the three- and nine-month periods ended March 31, 2008, was \$898,000 and \$2.58 million, respectively, increases of \$246,000, or 37.8%, and \$469,000, or 22.2%, as compared to net income of \$652,000 and \$2.12 million, respectively, earned during the same periods of the prior year. Basic and diluted earnings per share were \$0.41 and \$0.40, respectively, for the third quarter of fiscal 2008, compared to \$0.29 basic and diluted earnings per share for the third quarter of fiscal 2007. For the first nine months of fiscal 2008, basic and diluted earnings per share were \$1.18 and \$1.17, respectively, compared to \$0.95 and \$0.93, respectively, for the same period of the prior year. Our annualized return on average assets for the three- and nine-month periods ended March 31, 2008, was .90% and .89%, respectively, compared to .71% and .78%, respectively, for the same periods of the prior year. Our return on average stockholders' equity for the three- and nine-month periods ended March 31, 2008, was 11.8% and 11.6%, respectively, compared to 9.2% and 10.2%, respectively, for the same periods of the prior year.

Net Interest Income. Net interest income for the three- and nine-month periods ended March 31, 2008, increased \$621,000, or 25.3%, and \$1.12 million, or 15.2%, respectively, as compared to the same periods of the prior year. These increases reflected an expansion of our net interest rate spread, and our growth initiatives, which resulted in increases in the average balances of both interest-earning assets and interest-bearing liabilities. Our interest rate spread was 2.95% for the three-month period ended March 31, 2008, as compared to 2.51% for the same period of the prior year; for the nine-month period ended March 31, 2008, our interest rate spread was 2.76%, as compared to 2.57% for the same period of the prior year. For the three- and nine-month periods ended March 31, 2008, our net interest margin, determined by dividing the annualized net interest income by total average interest-earning assets, was 3.25% and 3.09%, respectively, compared to 2.83% and 2.89%, respectively, for the same periods of the prior year. The increase in interest rate spread for the three-month period ended March 31, 2008, resulted from a 51 basis point decrease in the average cost of interest-bearing liabilities, partially offset by an eight basis point decrease in the average yield on interest-earning assets. The increase in interest rate spread for the nine-month period ended March 31, 2008, resulted from an eleven basis point increase in the average yield on interest-earning assets, combined with an eight basis point decrease in the average cost of interest-bearing liabilities. Expansion of our interest rate spread was attributed primarily to the faster re-pricing of liabilities (compared to assets) on the Company's balance sheet, combined with the improved slope of the yield curve.

Interest Income. Total interest income for the three- and nine-month periods ended March 31, 2008, was \$6.4 million and \$19.1 million, respectively, increases of \$466,000, or 7.9%, and \$1.7 million, or 9.7%, respectively, compared to the same periods of the prior year. The increases were due to increases of \$31.5 million, or 9.1%, and \$26.7 million, or 7.9%, respectively, in the average balance of interest-earning assets during the third quarter and first nine months of fiscal 2008, combined with an eleven basis point increase in the average yield on those assets for the first nine months of fiscal 2008, and partially offset by an eight basis point decrease in the average yield on those assets for the third quarter of fiscal 2008. For the three- and nine-month periods ended March 31, 2008, the average interest rate on interest-earning assets was 6.76% and 6.95%, respectively, as compared to 6.83% and 6.84%, respectively, for the same periods of the prior year.

Interest Expense. Total interest expense for the three-month period ended March 31, 2008, was \$3.3 million, a decrease of \$155,000, or 4.5%, compared to the same period of the prior fiscal year. The decrease was due to a 51 basis point decrease in the average cost of interest-bearing liabilities, partially offset by a \$27.1 million increase in the average balance of interest-bearing liabilities. For the nine-month period ended March 31, 2008, total interest expense was \$10.6 million, an increase of \$566,000, or 5.6%, compared to the same period of the prior fiscal year. The increase was due to an increase of \$24.1 million, or 7.7%, in the average balance of interest-bearing liabilities, compared to the same period of the prior year, partially offset by an eight basis point decline in the average cost of funds, compared to the same period of the prior year. For the three- and nine-month periods ended March 31, 2008, the average interest rate on interest-bearing liabilities was 3.81% and 4.19%, respectively, as compared to 4.32% and

4.27%, respectively, for the same periods of the prior year. The increases in the average balances of interest-bearing liabilities was primarily due to funding needed for asset growth.

Provision for Loan Losses. The provision for loan losses for the three- and nine-month periods ended March 31, 2008, was \$350,000 and \$550,000, respectively, as compared to \$100,000 and \$320,000, respectively, for the same periods of the prior year. The increased provision was primarily due to management's belief that it is appropriate to maintain larger reserves in light of continuing deterioration of the credit and housing markets. In addition, the Company's growth, over the last several years, in its commercial and commercial real estate loan portfolios has required increased provisions for loan losses, as those loan types generally carry additional risk. In general, however, the Company does not anticipate that it will realize the level of credit problems that have been experienced by financial institutions more heavily involved in either subprime or Alt-A residential lending, or construction and development lending. Although we believe that we have established and maintained the allowance for loan losses at adequate levels, additions may be necessary as the loan portfolio grows, as economic conditions change, and as other conditions differ from the current operating environment. Even though we use the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. (See "Critical Accounting Policies", "Allowance for Loan Loss Activity" and "Nonperforming Assets").

Non-interest Income. Non-interest income for the three- and nine-month periods ended March 31, 2008, increased \$85,000, or 16.5%, and \$149,000, or 9.1%, to \$601,000 and \$1.79 million, respectively, as compared to \$516,000 and \$1.64 million, respectively, for the same periods of the prior year. The increases were primarily due to increased non-sufficient funds charges, debit card and ATM transaction fee income, and payment of loan late charges, and was partially offset by decreased secondary market residential real estate loan fee income. NSF charges were up based on activity by depositors; debit card and ATM transaction fee income was up due to a greater preference for that type of transaction by our customer base, as well as due to the Company's encouragement of that activity within our account products; late charges were up primarily due to a payoff on a single large commercial loan; and secondary market residential loan fee income was down due to a weakened real estate market and difficulties in obtaining approval for many prospective borrowers.

Non-interest Expense. Non-interest expense for the three- and nine-month periods ended March 31, 2008, increased \$97,000, or 5.2%, and \$372,000, or 6.8%, to \$1.99 million and \$5.86 million, respectively, as compared to \$1.89 million and \$5.49 million, respectively, for the same periods of the prior year. The increases in non-interest expense were primarily due to increased compensation and benefits expenses, data processing charges, expenses for accounting services, and additional charges for debit card activity, as well as charges to amortize the Company's investments in tax credits, and were partially offset by lower advertising expenses, legal expenses, losses on the disposition of foreclosed real estate, and other miscellaneous expenses. Compensation was up due to salary increases and additional personnel; data processing expenses were up due primarily to software costs. As the Company continues to grow its balance sheet, non-interest expense will continue to increase due to compensation, expenses related to expansion, and inflation. Our efficiency ratio, determined by dividing total non-interest expense by the sum of net interest income and non-interest income, was 54.0% and 57.1%, respectively, for the three- and nine-month periods ended March 31, 2008, as compared to 63.6% and 61.0%, respectively, for the same periods of the prior year.

Income Taxes. Provisions for income taxes for the three- and nine-month periods ended March 31, 2008, increased \$112,000, or 34.0%, and \$199,000, or 18.5%, to \$442,000 and \$1.27 million, respectively, as compared to \$330,000 and \$1.08 million, respectively, for the same periods of the prior year. Our effective tax rate for the nine-month period ended March 31, 2008, was 33.0%, as compared to 33.7% for the same period of the prior year. The decrease in the effective tax rate was attributable to the Company's investment in tax-exempt securities and purchases of tax credits; the increase in tax provisions was due to increased pre-tax income, partially offset by the lower effective tax rate.

Allowance for Loan Loss Activity

The Company regularly reviews its allowance for loan losses and makes adjustments to its balance based on management's analysis of the loan portfolio, the amount of non-performing and classified assets, as well as general economic conditions. Although the Company maintains its allowance for loan losses at a level that it considers sufficient to provide for losses, there can be no assurance that future losses will not exceed internal estimates. In addition, the amount of the allowance for loan losses is subject to review by regulatory agencies, which can order the establishment of additional loss provisions. The following table summarizes changes in the allowance for loan losses over the nine months ended March 31, 2008 and 2007:

	2008	2007
Balance, beginning of period	\$ 2,537,659	\$ 2,058,144
Loans charged off:		
Residential real estate	(18,919)	(82,676)
Consumer	(40,883)	(45,589)
Gross charged off loans	(59,802)	(128,265)
Recoveries of loans previously charged off:		

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10-Q

Residential real estate	792	3,728
Commercial business	162,851	21,051
Consumer	3,417	9,660
Gross recoveries of charged off loans	167,060	34,439
Net recoveries (charge offs)	107,258	(93,826)
Provision charged to expense	550,000	320,000
Balance, end of period	\$ 3,194,917	\$ 2,284,318

Ratio of net (recoveries) charge offs during the period

to average loans outstanding during the period

-0.03%

0.03%

The allowance for loan losses has been calculated based upon an evaluation of pertinent factors underlying the various types and quality of the Company's loans. Management considers such factors as the repayment status of a loan, the estimated net fair value of the underlying collateral, the borrower's intent and ability to repay the loan, local economic conditions, and the Company's historical loss ratios. We maintain the allowance for loan losses through the provisions for loan losses that we charge to income. We charge losses on loans against the allowance for loan losses when we believe the collection of loan principal is unlikely. The allowance for loan losses increased \$657,000 to \$3.2 million at March 31, 2008, from \$2.5 million at

June 30, 2007. At March 31, 2008, the Bank had \$4.2 million, or 1.03% of total assets adversely classified (\$4.2 million classified “substandard”; none classified “doubtful” or “loss”), as compared to adversely classified assets of \$1.1 million, or 0.30% of total assets at June 30, 2007, and \$1.2 million, or 0.31% of total assets, adversely classified at March 31, 2007. The increase in classified assets was due primarily to a single loan with an outstanding balance of \$3.1 million, secured by commercial real estate and performing according to terms at March 31, 2008. The loan was classified due to concerns regarding the borrower’s ability to generate sufficient cash flows to service the debt.

While management believes that our asset quality remains strong, it recognizes that, due to the continued growth in the loan portfolio and potential changes in market conditions, our level of nonperforming assets and resulting charge offs may fluctuate. Higher levels of net charge offs requiring additional provisions for loan losses could result. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

Nonperforming Assets

The ratio of nonperforming assets to total assets and non-performing loans to net loans receivable is another measure of asset quality. Nonperforming assets of the Company include nonaccruing loans, accruing loans delinquent/past maturity 90 days or more, and assets which have been acquired as a result of foreclosure or deed-in-lieu of foreclosure. The following table summarizes changes in the Company’s level of nonperforming assets over selected time periods:

	3/31/2008	6/30/2007	03/31/2007
Loans past maturity/delinquent 90 days or more and non-accrual loans			
Residential real estate	\$ -	\$ -	\$ 11,000
Commercial real estate	-	20,000	43,000
Consumer	25,000	4,000	2,000
Total loans past maturity/delinquent 90 days or more and non-accrual loans	25,000	24,000	56,000
Foreclosed real estate or other real estate owned	38,000	111,000	233,000
Other repossessed assets	19,000	12,000	2,000
Total nonperforming assets	\$ 82,000	\$ 147,000	\$ 291,000
Percentage nonperforming assets to total assets	0.02%	0.04%	0.08%
Percentage nonperforming loans to net loans	0.01%	0.01%	0.02%

Liquidity Resources

The term “liquidity” refers to our ability to generate adequate amounts of cash to fund loan originations, loans purchases, deposit withdrawals and operating expenses. Our primary sources of funds include deposit growth, securities sold under agreements to repurchase, FHLB advances, brokered deposits, amortization and prepayment of loan principal and interest, investment maturities and sales, and funds provided by our operations. While the scheduled loan repayments and maturing investments are relatively predictable, deposit flows, FHLB advance redemptions, and loan and security prepayment rates are significantly influenced by factors outside of the Bank’s control, including interest rates, general and local economic conditions and competition in the marketplace. The Bank relies on FHLB advances and brokered deposits as additional sources for funding cash or liquidity needs.

The Company uses its liquid resources principally to satisfy its ongoing cash requirements, which include funding loan commitments, funding maturing certificates of deposit and deposit withdrawals, maintaining liquidity, funding

maturing or called FHLB advances, purchasing investments, and meeting operating expenses. At March 31, 2008, the Company had outstanding commitments to fund approximately \$55.6 million in mortgage and non-mortgage loans. These commitments are expected to be funded through existing cash balances, cash flow from normal operations and, if needed, FHLB advances. At March 31, 2008, the Bank had pledged its residential real estate loan portfolio with the FHLB for available credit of approximately \$103.2 million, of which \$59.5 million had been advanced. In addition, the Bank has the ability to pledge several of its other loan portfolios, including commercial real estate, home equity, and commercial business loans, which could provide additional collateral for an additional \$91.1 million in borrowings at March 31, 2008. In total, FHLB borrowings are generally limited to 40% of Bank assets (as of January 2008), or \$161.1 million, which means \$101.6 million in borrowings remain available. Along with the ability to borrow from the FHLB, management believes its liquid resources will be sufficient to meet the Company's liquidity needs.

Regulatory Capital

The Bank is subject to minimum regulatory capital requirements pursuant to regulations adopted by the federal banking agencies. The requirements address both risk-based capital and leverage capital. As of March 31, 2008, and June 30, 2007, the Bank met all applicable adequacy requirements.

The FDIC has in place qualifications for banks to be classified as “well-capitalized.” As of March 31, 2008, the most recent notification from the FDIC categorized the Bank as “well-capitalized.” There were no conditions or events since the FDIC notification that has changed the Bank’s classification.

The Bank’s actual capital amounts and ratios are also presented in the following tables.

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of March 31, 2008						
Total Capital (to Risk-Weighted Assets)	\$34,098,000	11.93%	\$23,570,000	8.00%	\$29,462,000	10.00%
Tier I Capital (to Risk-Weighted Assets)	31,958,000	10.85%	11,785,000	4.00%	17,677,000	6.00%
Tier I Capital (to Average Assets)	31,958,000	8.09%	15,808,000	4.00%	19,761,000	5.00%
As of June 30, 2007						
Total Risk-Based Capital (to Risk-Weighted Assets)	\$ 32,420,000	11.81%	\$ 21,954,000	8.00%	\$ 27,443,000	10.00%
Tier I Capital (to Risk-Weighted Assets)	29,882,000	10.89%	10,977,000	4.00%	16,466,000	6.00%
Tier I Capital (to Average Assets)	29,882,000	8.10%	14,756,000	4.00%	18,445,000	5.00%

PART I: Item 3: Quantitative and Qualitative Disclosures About Market Risk
SOUTHERN MISSOURI BANCORP, INC.

Asset and Liability Management and Market Risk

The goal of the Company's asset/liability management strategy is to manage the interest rate sensitivity of both interest-earning assets and interest-bearing liabilities in order to maximize net interest income without exposing the Bank to an excessive level of interest rate risk. The Company employs various strategies intended to manage the potential effect that changing interest rates may have on future operating results. The primary asset/liability management strategy has been to focus on matching the anticipated re-pricing intervals of interest-earning assets and interest-bearing liabilities. At times, however, depending on the level of general interest rates, the relationship between long- and short-term interest rates, market conditions and competitive factors, the Company may determine to increase its interest rate risk position somewhat in order to maintain its net interest margin.

In an effort to manage the interest rate risk resulting from fixed rate lending, the Bank has utilized longer term FHLB advances (with maturities up to ten years), subject to early redemptions and fixed terms. Other elements of the Company's current asset/liability strategy include (i) increasing originations of commercial business, commercial real estate, agricultural operating lines, and agricultural real estate loans, which typically provide higher yields and shorter repricing periods, but inherently increase credit risk; (ii) limiting the price volatility of the investment portfolio by maintaining a weighted average maturity of less than five years, (iii) actively soliciting less rate-sensitive deposits, and (iv) offering competitively-priced money market accounts and CDs with maturities of up to five years. The degree to which each segment of the strategy is achieved will affect profitability and exposure to interest rate risk.

During the first nine months of fiscal year 2008, fixed rate residential loan production totaled \$16.1 million, as compared to \$12.2 million during the same period of the prior year. At March 31, 2008, the fixed rate residential loan portfolio was \$98.0 million with a weighted average maturity of 205 months, as compared to \$89.2 million at March 31, 2007, with a weighted average maturity of 196 months. The Company originated \$6.5 million in adjustable-rate residential loans during the nine-month period ended March 31, 2008, as compared to \$5.0 million during the same period of the prior year. At March 31, 2008, fixed rate loans with remaining maturities in excess of 10 years totaled \$81.8 million, or 24.7% of net loans receivable, as compared to \$73.0 million, or 24.2% of net loans receivable at March 31, 2007. The Company originated \$43.0 million of fixed rate commercial and commercial real estate loans during the nine-month period ended March 31, 2008, as compared to \$53.2 million during the same period of the prior year. At March 31, 2008, the fixed rate commercial and commercial real estate loan portfolio was \$112.3 million with a weighted average maturity of 29 months, compared to \$83.7 million at March 31, 2007, with a weighted average maturity of 33 months. The Company originated \$35.9 million in adjustable rate commercial and commercial real estate loans during the nine-month period ended March 31, 2008, as compared to \$34.6 million during the same period of the prior year. At March 31, 2008, adjustable-rate home equity lines of credit totaled \$7.4 million, as compared to \$6.3 million at March 31, 2007. Over the last several years, the Company had maintained a relatively short weighted average life of its investment portfolio; however, in anticipation of the current declining rate environment, management began to expand the portfolio's duration during this fiscal year. At March 31, 2008, the portfolio's weighted-average life stands at 4.9 years, compared to 2.9 years at March 31, 2007. Management continues to focus on customer retention, customer satisfaction, and offering new products to customers in order to increase the Company's amount of less rate-sensitive deposit accounts. As the Company believed the Federal Reserve's Open Market Committee was approaching the peak of the interest rate cycle in 2006, management began to avoid extending maturities of deposits and borrowings. As rates have been lowered recently, management has re-evaluated this strategy, locking in some long-term borrowing costs, and expects to continue to do so during the remainder of the fiscal year. The company remains "liability-sensitive," in that our liabilities generally re-price more quickly than our assets. As we reach what we expect to be the bottom of the current interest rate cycle, it is expected that management

will seek to reduce the amount of sensitivity, using both traditional means (e.g., longer-term borrowings or certificates of deposit) and derivative products (e.g., interest rate swaps).

Interest Rate Sensitivity Analysis

The following table sets forth as of March 31, 2008, management's estimates of the projected changes in net portfolio value ("NPV") in the event of 100, 200, and 300 basis point ("bp") instantaneous and permanent increases, and 100, 200, and 300 basis point instantaneous and permanent decreases in market interest rates. Dollar amounts are expressed in thousands.

BP Change in Rates	Estimated Net Portfolio Value			NPV as % of PV of Assets	
	\$ Amount	\$ Change	% Change	NPV Ratio	Change
+300	\$ 25,178	\$ (12,223)	-33%	6.21%	-2.12%
+200	29,901	(7,500)	-20%	7.08%	-1.25%
+100	34,282	(3,119)	-8%	7.85%	-0.48%
NC	37,401	-	-	8.33%	-
-100	38,792	1,391	4%	8.50%	0.17%
-200	40,065	2,664	7%	8.92%	0.59%
-300	41,830	4,492	12%	9.49%	1.16%

Computations of prospective effects of hypothetical interest rate changes are based on an internally generated model using actual maturity and repricing schedules for the Bank's loans and deposits, and are based on numerous assumptions, including relative levels of market interest rates, loan repayments and deposit run-offs, and should not be relied upon as indicative of actual results. Further, the computations do not contemplate any actions the Bank may undertake in response to changes in interest rates.

Management cannot predict future interest rates or their effect on the Bank's NPV in the future. Certain shortcomings are inherent in the method of analysis presented in the computation of NPV. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in differing degrees to changes in market interest rates. Additionally, certain assets, such as adjustable-rate loans, have an initial fixed rate period typically from one to five years and over the remaining life of the asset changes in the interest rate are restricted. In addition, the proportion of adjustable-rate loans in the Bank's portfolio could decrease in future periods due to refinancing activity if market interest rates remain steady in the future. Further, in the event of a change in interest rates, prepayment and early withdrawal levels could deviate significantly from those assumed in the table. Finally, the ability of many borrowers to service their adjustable-rate debt may decrease in the event of an interest rate increase.

The Bank's Board of Directors (the "Board") is responsible for reviewing the Bank's asset and liability policies. The Board's Asset/Liability Committee meets monthly to review interest rate risk and trends, as well as liquidity and capital ratios and requirements. The Bank's management is responsible for administering the policies and determinations of the Board with respect to the Bank's asset and liability goals and strategies.

PART I: Item 4: Controls and Procedures
SOUTHERN MISSOURI BANCORP, INC.

An evaluation of Southern Missouri Bancorp's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934, as amended, (the "Act")) as of March 31, 2008, was carried out under the supervision and with the participation of our Chief Executive and Financial Officer, and several other members of our senior management. The Chief Executive and Financial Officer concluded that, as of March 31, 2008, the Company's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to management (including the Chief Executive and Financial Officer) in a timely manner, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Act) that occurred during the quarter ended March 31, 2008, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

The Company does not expect that its disclosures and procedures will prevent all error and all fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

Section 404 of the Sarbanes-Oxley Act of 2002 requires that companies evaluate and annually report on their systems of internal control over financial reporting. We are in the process of completing documentation of internal control over financial reporting to provide the basis for our report that will, for the first time, be a required part of our Annual Report on Form 10-K for the fiscal year ending June 30, 2008. In addition, our independent accountants must report on management's evaluation of its internal control over financial reporting beginning June 30, 2010, according to the latest proposal from the SEC. Due to the ongoing evaluation and testing of our internal controls, there can be no assurance that, if any control deficiencies are identified, they will be remediated before the end of the 2008 fiscal year, or that there may not be significant deficiencies or material weaknesses that would be required to be reported. In addition, we expect the evaluation process and any required remediation, if applicable, to increase our accounting, legal, and other costs, and to divert management resources from core business operations.

PART II: Other Information
SOUTHERN MISSOURI BANCORP, INC.

Item 1: Legal Proceedings

Except as set forth below, in the opinion of management, the Bank is not a party to any pending claims or lawsuits that are expected to have a material effect on the Bank's financial condition or operations. Periodically, there have been various claims and lawsuits involving the Bank mainly as a defendant, such as claims to enforce liens, condemnation proceedings on properties in which the Bank holds security interests, claims involving the making and servicing of real property loans and other issues incident to the Bank's business. Aside from such pending claims and lawsuits, which are incident to the conduct of the Bank's ordinary business, the Bank is not a party to any material pending legal proceedings that would have a material effect on the financial condition or operations of the Bank.

In April 2005, the Bank discovered there had been an adverse development with respect to a substandard loan that resulted from allegedly fraudulent activities on the part of the borrower. To date, we have liquidated all assets of the borrower of which we were able to take possession, and have incurred charge-offs of \$4.7 million. Since June 30, 2006, the Bank no longer reports any amount of this loan relationship, or any collateral related thereto, as an asset. On October 22, 2007, the Bank announced a recovery of \$162,500, resulting from claims made by the Bank and other financial institutions against the bonding company insuring the accounting firm that performed audits on said borrower. The Bank does not anticipate further significant recoveries related to this loan relationship.

Item 1a: Risk Factors

There have been no material changes to the risk factors set forth in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended June 30, 2007.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet be Purchased Under the Plans or Program
1/01/2008 thru 1/31/2008	735	14.00	735	91,300
2/01/2008 thru 2/29/2008	1,814	14.00	1,814	60,657
3/01/2008 thru 3/31/2008	-	-	-	60,657
Total	2,549	14.00	2,549	60,657
