

LAZARD GLOBAL TOTAL RETURN & INCOME FUND INC

Form N-30B-2

June 02, 2014

Lazard Global Total  
Return and Income  
Fund, Inc.

First Quarter Report

**MARCH 31, 2014**

*Lazard Global Total Return and Income Fund, Inc.*

## **Investment Overview**

### **Dear Stockholders,**

We are pleased to present this report for Lazard Global Total Return and Income Fund, Inc. (“LGI” or the “Fund”), for the quarter ended March 31, 2014. LGI is a diversified, closed-end management investment company that began trading on the New York Stock Exchange (“NYSE”) on April 28, 2004. Its ticker symbol is “LGI.”

For the first quarter 2014, the Fund’s net asset value (“NAV”) performance underperformed its benchmark, the Morgan Stanley Capital International (MSCI®) World® Index (the “Index”). However, we are pleased with LGI’s favorable NAV performance over the three-year period and since inception. We believe that the Fund has provided investors with an attractive yield and diversification, backed by the extensive experience, commitment, and professional management of Lazard Asset Management LLC (the “Investment Manager” or “Lazard”).

### **Portfolio Update (as of March 31, 2014)**

For the first quarter of 2014, the Fund’s NAV returned -0.3%, underperforming the Index return of 1.3%. Similarly, the Fund’s NAV return of 13.0% for the twelve months ended March 31, 2014 underperformed the Index gain of 19.1%. However, the Fund’s NAV performance outperformed the Index for the three-year period (11.5% versus the benchmark’s 10.2% return), on an annualized basis, as well as since inception, returning, on an annualized basis, 7.4% versus 6.8% for the Index. Shares of LGI ended the first quarter of 2014 with a market price of \$17.41, representing an 11.0% discount to the Fund’s NAV of \$19.56.

The Fund’s net assets were \$187.9 million as of March 31, 2014, with total leveraged assets of \$244.1 million, representing a 23.0% leverage rate. This leverage rate is lower than that at the end of the fourth quarter of 2013 (24.8%), and below the maximum permitted leverage rate of 33<sup>1</sup>/<sub>3</sub>%.

Within the global equity portfolio, stock selection in the health care sector contributed to performance in the first quarter. In contrast, stock selection in the financials sector and in Japan detracted from performance for the quarter.

Performance for the smaller, short duration<sup>1</sup> emerging market currency and debt portion of the Fund was relatively weak in the first quarter, and detracted from performance over the last twelve months. However, it has contributed positively to performance over longer time-periods and since inception.

As of March 31, 2014, 77.4% of the Fund's total leveraged assets consisted of global equities, 21.6% consisted of emerging market currency and debt instruments, and 1.0% consisted of cash and other net assets.

### **Declaration of Distributions**

Pursuant to LGI's Level Distribution Policy, the Fund declares, monthly, a distribution equal to 6.25% (on an annualized basis) of the Fund's NAV on the last business day of the previous year. The current monthly distribution rate per share of \$0.10386 represents a distribution yield of 7.2% based on the Fund's \$17.41 market price as of the close of trading on the NYSE on March 31, 2014. It is currently estimated that \$0.22434 of the \$0.31158 distributed per share year-to-date through March 31, 2014 may represent a return of capital.

### **Additional Information**

Please note that, available on [www.LazardNet.com](http://www.LazardNet.com), are frequent updates on the Fund's performance, press releases, distribution information, and a monthly fact sheet that provides information about the Fund's major holdings, sector weightings, regional exposures, and other characteristics, including the notices required by Section 19(a) of the Investment Company Act of 1940, as amended. You may also reach Lazard by phone at 1-800-823-6300.

On behalf of Lazard, we thank you for your investment in Lazard Global Total Return and Income Fund, Inc. and look forward to continuing to serve your investment needs in the future.

*Lazard Global Total Return and Income Fund, Inc.*

## **Investment Overview (continued)**

### **Message from the Portfolio Managers**

#### **Global Equity Portfolio**

(77.4% of total leveraged assets)

The Fund's global equity portfolio is invested primarily in equity securities of large, well-known global companies with, we believe, strong financial productivity at attractive valuations. Examples include GlaxoSmithKline, a global research-based pharmaceutical company based in the United Kingdom; Citigroup, a US-based financial services company; Canon, a Japanese manufacturer and distributor of network digital multifunction devices, copying machines, printers and cameras; and Total, a French energy supplier that explores for, produces, refines, transports, and markets oil and natural gas.

Companies held in the global equity portfolio are all based in developed-market regions around the world. As of March 31, 2014, 49.3% of these stocks were based in North America, 27.0% were based in continental Europe (not including the United Kingdom), 13.8% were from the United Kingdom, 5.6% were from Japan, 3.7% were from the rest of Asia (not including Japan), and 0.6% were from the Middle East. The global equity portfolio is similarly well diversified across a number of industry sectors. The top two sectors, by weight, at March 31, 2014, were financials (17.6%), which includes banks, diversified financials, insurance, and real estate; and health care (16.1%), which includes health care equipment and services, and pharmaceuticals biotechnology and life sciences. Other sectors in the portfolio include consumer discretionary, consumer staples, energy, industrials, information technology, materials, and telecom services. The average dividend yield on the securities held in the global equity portfolio was approximately 2.7% as of March 31, 2014.

#### **Global Equity Markets Review**

Global markets rose during the first quarter, despite unease over the US Federal Reserve's (the "Fed") monetary policy, slowing growth in China, and geopolitical tension in eastern Europe. Stocks in the United States rose, but were somewhat volatile throughout the quarter, as investors reacted to messages from the Fed about tapering. Many investors became concerned that the Fed may begin to raise interest rates sooner than previously expected. However, at the end of the quarter Fed Chairman Janet Yellen reassured markets that the Fed intends to keep interest rates low until the US economy is stronger. Economic reports were mixed, with weaker data largely being attributed to severe winter weather in parts of the country. Japanese markets fell as disappointing fourth-quarter GDP growth and an impending consumption tax increase raised concerns about the effectiveness of Abenomics. In Europe, stocks rose after the euro zone posted positive fourth-quarter GDP growth, reassuring investors that the region's recovery was

gaining momentum. Chinese markets fell after a number of government reports indicated slowing economic activity in the country, including disappointing industrial production, fixed-asset investment, and retail sales. Uncertainty surrounding Crimea and its potential economic implications for other regions also spurred global uncertainty.

#### What Helped and What Hurt LGI

Stock selection in the health care sector contributed to performance. Shares of Danish pharmaceutical company Novo Nordisk rose after management reported solid quarterly results, which highlighted strong sales growth. Management also increased its guidance for 2014. We continue to like Novo Nordisk for its dominant position in diabetes treatments, which we believe can continue to drive high levels of financial productivity. Stock selection in the consumer discretionary sector also helped returns. Shares of German automaker BMW rose after management issued a bullish operating profit forecast for the year. We were encouraged by management's comments, and believe BMW should benefit from demand for new models, an increased focus on prudent capital management, and a recovery in European car markets.

In contrast, stock selection in the financials sector detracted from performance. Shares of Japanese diversified financial companies including Mitsubishi UFJ

*Lazard Global Total Return and Income Fund, Inc.*

### **Investment Overview (continued)**

Financial and Sumitomo Mitsui Financial fell as optimism about the impacts of Abenomics faded, causing investors to sell companies with broad exposure to the country's economy. However, we continue to believe that the government's reforms have great potential to spur economic growth in the country. Stock selection in the information technology sector also hurt returns. After a strong rally in the latter half of 2013, shares of German software services company SAP fell after management issued revenue guidance that disappointed investors. We continue to hold SAP as we believe its transition toward cloud computing will benefit the company over the longer term, and that valuation is attractive at current levels.

### **Emerging Market Currency and Debt Portfolio**

(21.6% of total leveraged assets)

The Fund also seeks enhanced income through investing in primarily high-yielding, short-duration emerging market forward currency contracts and local currency debt instruments. As of March 31, 2014, this portfolio consisted of forward currency contracts (81.3%) and sovereign debt obligations (18.7%). The average duration of the emerging market currency and debt portfolio remained relatively unchanged from the fourth quarter of 2013 to the first quarter at approximately 8 months, while the average yield increased from 5.8%<sup>2</sup> at the end of December 31, 2013 to 6.4% on March 31, 2014.

### **Emerging Market Currency and Debt Market Review**

Emerging-market local currency and debt markets began the year sharply weaker as capital fled emerging-market assets and global contagion spread into developed economies' asset markets. Most liquid, "mainstream" emerging markets subsequently recovered from January's sell-off, but frontier markets were generally weaker.

While emerging-market growth rates continue to outpace the developed world, the magnitude of that differential has been narrowing as emerging economies rebalance away from domestic demand, credit-fueled growth models which propelled their economic expansions in the years following the global financial crisis. As emerging-market growth becomes more evenly shared between domestic and external demand, and as domestic policies selectively tighten, we believe emerging countries' current account balances will continue to improve.

### **What Helped and What Hurt LGI**

Top contributors during the first quarter were Brazil, Indonesia, and India. Brazilian exposure benefited from carry, spot, and duration gains as the currency strengthened and local bonds (both nominal and inflation-linked) outperformed the money market. Indonesia and India benefited from fiscal improvement, reform momentum, and tighter monetary policy. The team also avoided exposure to Argentina and the Ukraine, which devalued sharply during the quarter.

Conversely, Russia, Kazakhstan, Zambia, and Ghana were the largest detractors during the first quarter. Russian exposure detracted as geopolitical tensions flared and capital flight overwhelmed the seasonal current account surplus. Russian authorities have intervened heavily to contain the market stress. Kazakhstan authorities devalued the tenge following sharp appreciation versus the Russian ruble, a key trading partner. Despite pre-emptively trimming exposure prior to the move, remaining Kazakh exposure detracted. Zambia and Ghana detracted due to commodity linkages to China in the former and weak balance of payments and high inflation in the latter. Both central banks hiked interest rates but have undertaken only limited intervention to support their respective currencies.

*Lazard Global Total Return and Income Fund, Inc.*

**Investment Overview (continued)**

**Notes to Investment Overview:**

A measure of the average cash weighted term-to-maturity of the investment holdings. Duration is a measure of the price sensitivity of a bond to interest rate movements. Duration for a forward currency contract is equal to its term-to-maturity.

<sup>2</sup>The quoted yield does not account for the implicit cost of borrowing on the forward currency contracts, which would reduce the yield shown.

All returns reflect reinvestment of all dividends and distributions. Past performance is not indicative, or a guarantee, of future results.

The performance data of the Index and other market data have been prepared from sources and data that the Investment Manager believes to be reliable, but no representation is made as to their accuracy. The Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The Index is unmanaged, has no fees or costs and is not available for investment.

The views of the Fund's Investment Manager and the securities described in this report are as of March 31, 2014; these views and portfolio holdings may have changed subsequent to this date. Nothing herein should be construed as a recommendation to buy, sell, or hold a particular security. There is no assurance that the securities discussed herein will remain in the Fund at the time you receive this report, or that securities sold will not have been repurchased. The specific securities discussed may, in aggregate, represent only a small percentage of the Fund's holdings. It should not be assumed that securities identified and discussed were, or will be, profitable, or that the investment decisions made in the future will be profitable, or equal the investment performance of the securities discussed herein.

The views and opinions expressed are provided for general information only, and do not constitute specific tax, legal, or investment advice to, or recommendations for, any person. There can be no guarantee as to the accuracy of the outlooks for markets, sectors and securities as discussed herein.

*Lazard Global Total Return and Income Fund, Inc.*

**Valuation of Investments:**

Net asset value per share is determined by State Street Bank and Trust Company for the Fund on each day the NYSE is open for business. Market values for securities listed on the NYSE, NASDAQ national market or other US or foreign exchanges or markets are generally based on the last reported sales price on the exchange or market on which the security is principally traded, generally as of the close of regular trading on the NYSE (normally 4:00 p.m. Eastern time) on each valuation date; securities not traded on the valuation date are valued at the most recent quoted bid price. The Fund values NASDAQ-traded securities at the NASDAQ Official Closing Price, which may not be the last reported sales price in certain instances. Forward currency contracts are valued using quotations from an independent pricing service. Investments in money market funds are valued at the fund's net asset value.

Bonds and other fixed-income securities that are not exchange-traded are valued on the basis of prices provided by independent pricing services which are based primarily on institutional trading in similar groups of securities, or by using brokers' quotations or a matrix system which considers such factors as other security prices, yields and maturities. Debt securities maturing in 60 days or less are valued at amortized cost, except where to do so would not accurately reflect their fair value, in which case such securities are valued at fair value as determined by, or in accordance with procedures approved by, the Board of Directors (the "Board").

The Valuation Committee of the Investment Manager, which meets periodically under the direction of the Board, may evaluate a variety of factors to determine the fair value of securities for which market quotations are determined not to be readily available or reliable. These factors include, but are not limited to, the type of security, the value of comparable securities, observations from financial institutions and relevant news events. Input from the Investment Manager's portfolio managers/analysts also will be considered.

If a significant event materially affecting the value of securities occurs between the close of the exchange or market on which the security is principally traded and the time when the Fund's net asset value is calculated, or when current market quotations otherwise are determined not to be readily available or reliable (including restricted or other illiquid securities such as certain derivative instruments), such securities will be valued at their fair value as determined by, or in accordance with procedures approved by, the Board.

The effect of using fair value pricing is that the net asset value of the Fund will reflect the affected securities' values as determined in the judgment of the Board or its designee instead of being determined by the market. Using a fair value pricing methodology to price securities may result in a value that is different from the most recent closing price of a

security and from the prices used by other investment companies to calculate their portfolios' net asset values.

**Fair Value Measurements:**

Fair value is defined as the price that the Fund would receive to sell an asset, or would pay to transfer a liability, in an orderly transaction between market participants at the date of measurement. The Fair Value Measurements and Disclosures provisions of accounting principles generally accepted in the United States of America also establish a framework for measuring fair value, and a three-level hierarchy for fair value measurement that is based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer, broadly, to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions that market participants would use in pricing the asset or liability based on market

*Lazard Global Total Return and Income Fund, Inc.*

**Notes to Portfolio of Investments (concluded)**

**March 31, 2014 (unaudited)**

data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances. Each investment's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the overall fair value measurement. The three-level hierarchy of inputs is summarized below.

•Level 1 – unadjusted quoted prices in active markets for identical investments

•Level 2 – other significant observable inputs (including unadjusted quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

•Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in these securities.

The following table summarizes the valuation of the Fund's investments by each fair value hierarchy level as of March 31, 2014:

Description	Unadjusted Quoted Prices in Active Markets for Identical Investments	Significant Other Observable Inputs	Significant Unobservable Inputs	Balance as of March 31, 2014
	(Level 1)	(Level 2)	(Level 3)

## **Dividend Reinvestment Plan**

**(unaudited)**

Unless you elect to receive distributions in cash (i.e., opt-out), all dividends, including any capital gain distributions, on your common stock will be automatically reinvested by Computershare, Inc., as dividend disbursing agent (the “Plan Agent”), in additional common stock under the Fund’s Dividend Reinvestment Plan (the “Plan”). You may elect not to participate in the Plan by contacting the Plan Agent. If you do not participate, you will receive all distributions in cash, paid by check mailed directly to you by the Plan Agent.

Under the Plan, the number of shares of common stock you will receive will be determined on the dividend or distribution payment date, as follows:

If the common stock is trading at or above net asset value at the time of valuation, the Fund will issue new shares at (1) a price equal to the greater of (i) net asset value per common share on that date or (ii) 95% of the common stock’s market price on that date.

If the common stock is trading below net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase common stock in the open market, on the NYSE or elsewhere, for the participants’ accounts. It is possible that the market price for the common stock may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may (2) exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in common stock issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase common stock in the open market within 30 days of the valuation date. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving written notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive whole shares in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus an initial \$15 service fee plus \$0.12 per share being liquidated (for processing and brokerage expenses).

The Plan Agent maintains all stockholders’ accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Shares of common stock in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all common stock you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in newly-issued shares of common stock. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

If you hold your common stock with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above. Consult your financial advisor for more information.

The Fund reserves the right to amend or terminate the Plan if, in the judgment of the Board, the change is warranted. There is no direct service charge to participants in the Plan (other than the service charge when you direct the Plan Agent to sell your common stock held in a dividend reinvestment account); however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from the Plan Agent at P.O. Box 43010, Providence, Rhode Island 02940-3010.
