PART I

ITEM 1. DESCRIPTION OF BUSINESS.

Clariti Telecommunications International, Ltd. is a non-operating U.S. parent company with subsidiaries operating in the U.S. and Italy. In this Form 10-K, the terms "Clariti" and "the Company" are used interchangeably in reference to the parent company and/or any of its subsidiaries. Clariti is an international wireless communications technology company with proprietary technology for digital transmissions of data (including digital voice messages) utilizing radio frequencies transmitted by FM radio stations. Clariti's wireless technology will support voice messaging (including wireless voicemail and text-to-speech), data and information services to a high-speed digital wireless receiver.

The Company was originally formed in February 1988 as the successor to a music and recording studio business owned and operated by Peter Pelullo, the Company's current CEO and President. The Company became publicly held upon its merger in January 1991 with an inactive public company incorporated in Nevada. The surviving corporation changed its name to "Sigma Alpha Entertainment Group, Ltd." and was subsequently reincorporated in Delaware. In March 1998 the Company changed its name to Clariti Telecommunications International, Ltd. Beginning in 1995, the Company began shifting its focus to development and commercialization of its wireless technology and as a result, no longer has a significant interest in the music and recording business.

Wireless Datacasting

The Company is presently developing wireless applications of its proprietary technology for communications products and services that utilize radio frequencies transmitted by FM radio stations. Management believes that a need exists worldwide for communications products and services that communicate information in an economically feasible manner without the need for intensive capital investment for infrastructure and frequency licenses. The Company has developed a technology that utilizes existing FM radio frequencies to provide a wireless data transmission network without the significant investment capital requirements of traditional telecommunication and cellular infrastructure. The Company has trademarked the name of its technology as ClariCAST(TM).

ClariCAST(TM) Technology

The ClariCAST(TM) technology utilizes the FM-SCA channels available on FM radio stations throughout the world. FM-SCA (Subsidiary Communication Authorization) channels, also known as FM "subcarrier" channels, are the "sideband" of an FM radio station's broadcasting frequency. Each FM radio station has two FM-SCA channels and an RDS signal. Similar to the SAP (Secondary Audio Programming) channel in television broadcasting, the FM-SCA spectrum is licensed to the FM radio station and can be used for broadcasting alternate information and services.

The ClariCAST(TM) protocol is an advanced digital wireless communications protocol derived from various technologies, including some of which were previously used in high-end military communication systems. This proprietary protocol is highly robust, employing state-of-the-art digital technologies, coding and interleaving schemes, and error correction algorithms. At its core,

the ClariCAST(TM) protocol is a relatively high-speed digital wireless architecture that has been optimized for the transmission of large digital files, like digitized voicemail or graphic files, to low power, small, mobile receivers. The ClariCAST(TM) technology sends digital information over FM-SCA frequencies.

FM-SCA Broadcasting

Two significant advantages of the ClariCAST(TM) technology are (1) FM-SCA channels do not require new radio frequency spectrum allocation and (2) the transmission infrastructure for FM-SCA already exists in the form of the FM radio station equipment. As a result, the Company's wireless datacasting system will require significantly less investment to establish a network and acquire the necessary hardware than other wireless networks. In addition, the existence of the FM radio station's transmission infrastructure and the simplicity of the ClariCAST(TM) technology will allow for more rapid installation of the system. The Company expects to be able to install a city-wide wireless datacasting system in several days rather than the many months required for paging and cellular systems.

FM radio stations are typically assigned a frequency bandwidth of 100 kHz. A typical station will use 53 kHz for their commercial (main channel) stereo programming. The remaining 47 kHz, which is almost half of the available FM channel spectrum resource, is not required for broadcasting the main channel programming.

FM-SCA has been used in the United States for applications such as background music without commercial interruption, reading services for the blind, stock market quotes, sports scores, weather reports, educational services, and religious broadcasts. As a result, the FM-SCA channels in the U.S. may in some instances be limited due to these other uses. However, in most international markets, especially emerging growth nations, there appears to be little or no use of the FM-SCA band. International FM radio stations have been pursuing the use of this FM-SCA bandwidth to generate additional revenues from operations.

ClariCAST(TM) Applications

The first significant application of the ClariCAST(TM) technology is a wireless voicemail system, which is discussed in further detail below. At its core, however, the ClariCAST(TM) system is a digital wireless data broadcasting technology. The ClariCAST(TM) network has been designed from the outset to support applications beyond wireless voicemail and unified messaging. Clariti is in the process of developing several proof-of-concept application devices, which the Company plans to market and license to original equipment manufacturers and service providers already doing business in the appropriate market segments with existing subscriber bases. These future applications include:

PDA Wireless Modem - Clariti is developing protocol and network application software to support voicemail, email, graphics (maps, etc.), faxes, and data such as contact list and schedule updates to a personal digital assistant ("PDA") such as a Palm(TM) or Handspring(TM) handheld organizer or Windows CE(TM) pocket PC. Clariti is developing a self-contained "clamshell" for the Palm V and Palm OS(TM) application software for soft-button control of this

Palm accessory and information/data display. The ClariCAST(TM) clamshell will

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

be a self-contained, battery-operated unit with wireless voicemail capabilities as well. There are two distinct advantages to this: (1) unlike other Palm accessories, the ClariCAST(TM) wireless modem will not be a drain on the Palm's internal batteries; and (2) the ClariCAST(TM) wireless modem will operate and receive messages and data even when not connected to the Palm.

Intelligent Signage - A trend in advertising, especially outdoor and mobile advertising, is interactive, changeable billboards and signs. Signs that display real-time information such as weather, traffic conditions, lottery numbers, sale prices, etc., would also come under this category. With ClariCAST(TM), Clariti offers an economical way of transmitting information wirelessly to signs or billboards, especially if they are dispersed over a large geographic or remote area, or in a mobile environment (e.g. buses, trucks, taxi cabs). Clariti is developing the necessary tools and software to demonstrate information transmission to a multi-colored electronic sign.

Automobile Data Services - Because the ClariCAST(TM) protocol is optimized for mobile receivers, a natural application is information, messaging, and data services to the automobile. Automobile navigation systems are becoming more and more popular, even to the point of being standard equipment in high-end vehicles. ClariCAST(TM) offers an economical way of periodically updating these systems wirelessly with the latest road, waypoint, address, and phone number changes to their databases. A U.S. federal government initiative is the Intelligent Transportation System, or ITS. Part of this initiative calls for traffic information and alerts to the car. ClariCAST(TM), because of its low-cost of delivery, large geographic coverage, and point-to-multipoint broadcasting (data-casting) capabilities, represents a very practical and viable way to accomplish this. Also, the PC in the automobile (AutoPC) is expected to be commercialized within the next few years. ClariCAST(TM), with its one-way data, information, and messaging flow to the car with voice annunciation will be a safe, practical and economical means of implementing data flow to AutoPCs. Clariti is developing a vehicular ClariCAST(TM) module that will plug into the car and use its radio antenna and vehicular power. It will be capable of receiving the various types of data, messaging, and information as described above and be capable of outputting this data over a USB port. This USB port output gives it the capability of interfaces with built-in AutoPCs, after-market AutoPCs, laptops, and other types of personal communication devices.

Wireless Web Services - Clariti is developing a wireless modem for portable PCs where real-time information can be gathered from the Internet by a ClariCAST(TM) server and broadcast out to the PC at scheduled times.

While the above application device development will demonstrate the broader capabilities of ClariCAST(TM), Clariti also intends to market its wireless data service to a number of very different vertical markets. Other potential future applications include the following:

E-Books, E-newspapers: Information could be updated continuously during the day over Clariti's wireless network

Interactive Toys: Major toy makers like Mattel and Hasbro are creating interactive toys that teach and entertain children. With an embedded

ClariCAST(TM) receiver, these toys could constantly be sent new content, including personalized messages.

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

Interactive Games: Companies like Sony and Sega could use ClariCAST(TM) to continually distribute, update and keep fresh their most popular computer and video game software.

Microcontroller Software Updating: By adding a ClariCAST(TM) receiving module to their micro-controllers, manufacturers of consumer durables as diverse as automobiles, refrigerators and lawnmowers would have a way of maintaining and updating their products remotely.

The ClariCAST(TM) architecture is uniquely designed to allow Clariti to provide cost-effective solutions for these and other applications. ClariCAST(TM) will allow these future applications to share the same wireless highway covering a given geographic area with no need to develop a new network.

Furthermore, Clariti believes that the ClariCAST(TM) architecture is better suited (more robust, more cost-effective) for these types of applications than any other wireless technology in the market. The future applications examples described above all require the ability to broadcast large data files to multiple devices at the same time ("point-to-multipoint"). Cellular technology is geared for one-to-one ("point-to-point") communication, which requires greater bandwidth usage and higher costs. The ClariCAST(TM) technology is a cost-effective method to broadcast large data files to multiple wireless receivers.

Wireless Voicemail System

One application of the ClariCAST(TM) technology is a Wireless Voicemail System, which transmits a message to the owner of a handheld voicemail player, known as a Voca(TM), in the actual voice of the person generating the message. The Wireless Voicemail System is designed so that a subscriber must first buy a Voca(TM) and then pay a monthly subscription fee for the wireless voicemail service. Once a subscriber's account has been established, callers can leave voice messages for the subscriber by calling the system's central ClariCAST(TM) server or server farm, or the system may forward office voicemail messages. The calling party's message is then digitized, compressed and transmitted by a radio station's FM transmitter to the specific individual or group account of a subscriber's Voca(TM). The ClariCAST(TM) technology transmits messages that coexist with, but do not interfere with an FM radio station's existing commercial broadcast.

Wireless Voicemail System Design

- The Wireless Voicemail System is comprised of 4 major components:
- FM radio station's transmission facility (utilized by the Company for its wireless infrastructure)
 - ClariCAST(TM) Server
 - SCA Generator
 - Voca(TM) Wireless Voicemail Player

The FM radio station's transmission facility includes the antenna tower and all the other equipment used by the FM radio station for its main channel programming. This facility is already in place and owned by the FM radio

station. The system operator would lease one or both of the SCA channels from the FM radio station. The Voca(TM) must be within receiving distance of the FM radio station's signal in order to receive the message unless a roaming plan is utilized.

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

The ClariCAST(TM) server incorporates a full-featured voicemail system. It automatically answers incoming telephone calls with a customized greeting from the subscriber, prompts the caller to leave a message, and records the message in the caller's voice. After the caller has hung up, the voice message is digitally compressed into a compact digital packet and the appropriate Voca(TM) address is added. These packets are then forwarded to the SCA Generator for modulation and mixing with the FM station's main channel programming. This combined signal is then sent through the FM radio station's transmitter.

The Voca(TM) receives the signal from the FM radio station, extracts the messages that are addressed to it, and decodes the message. An audible or vibrating signal alerts the user that a message has been received. Upon playback the user listens to the message in the caller's actual voice. The user can play, fast forward, rewind, save, and delete messages, similar to using voicemail or a home answering machine.

Status of Wireless Voicemail System Development

During the last fiscal year, the Company implemented a limited scope test launch of its Wireless Voicemail System in Jacksonville, Florida. The test launch consisted of the sale of approximately 50 Vocas(TM) to third party consumers who used the service in their daily lives. The Company has been evaluating and utilizing the information obtained in the limited scope test in the technology development process and discontinued the limited scope test.

During the second quarter of calendar 2001, the Company was faced with an extremely difficult financial situation. The Company had exhausted most of its cash reserves and had been unable to raise sufficient additional capital to fund continued development of the Wireless Voicemail System. As a result, the Wireless group terminated most of its R&D operations in Boynton Beach, Florida and relocated those efforts to Philadelphia, laid off substantially all of the engineering staff in Florida, and also laid off most of the network engineering, marketing and administrative staff and relocated its group headquarters from Fort Washington, Pennsylvania to Philadelphia.

The Company plans to improve the performance of the Voca(TM) using one or more third party development firms and launch a commercial Wireless Voicemail System in Milan, Italy under the Company's joint venture with the Pasubio Group, RadioNet Italia, Srl (see "Marketing the Wireless Voicemail System"). New product development efforts are subject to all of the risks inherent in the development of new technology and products, including unanticipated delays, expenses, market acceptance, and technical problems. There can be no assurance as to when, or whether, the Wireless Voicemail System or other applications of the ClariCAST(TM) technology will be successfully completed. No assurance can be given that products or services can be developed within a reasonable development schedule, if at all, or that they can be produced or provided at a reasonable cost. There can be no assurance that the Company will have sufficient economic or human resources to complete such development in a timely manner, or at all.

Commercialization of the Wireless Voicemail System

To commercialize its Wireless Voicemail System, the Company or a licensee of the ClariCAST(TM) technology will be required to secure the use of FM radio subcarrier frequencies in the markets it intends to enter. Based on the experience of its management, the Company does not expect difficulty in accessing such frequencies. The Company has already secured the use of several

FM radio subcarrier frequencies in multiple U.S. cities. In addition, RadioNet Italia Srl, the Company's 60%-owned joint venture with the Pasubio Group in Italy, has entered a contract with Centro di Produzione SpA (also known as "Radio Radicale") whose FM radio station network covers approximately 95% of Italy, to use their FM-SCA channels in exchange for a percentage of RadioNet Italia's revenues. However, there can be no assurance that FM radio station owners in other targeted market areas will make their subcarrier frequencies available for use by the Company, which would have a material adverse effect on the Company's business.

Marketing the Wireless Voicemail System

With its large installed base of voicemail users, plus users of messaging products with voicemail boxes, the U.S. represents a significant business opportunity. However, the opportunities may even be greater in many international markets, especially large emerging markets such as China and Brazil. According to Strategis Group, there are approximately 190 million paging subscribers worldwide, with the vast majority of those outside the U.S., Western Europe, and Japan. In these emerging markets, there appears to be significant pent-up demand for communications capabilities, yet only a small percentage of users can afford cellular phones. The Company believes the Wireless Voicemail System's combination of wireless capabilities, digital voice communications, and affordability, will appeal to a large number of potential users in these markets. In addition, the Company's FM-SCA technology makes it possible to rapidly deploy systems in just about any country with FM radio stations.

The Company plans to develop partnerships with companies inside and outside the U.S. to help market the wireless information services. The Company expects to seek out partners who are experienced with marketing and distribution of telecommunications products in their respective geographic areas. The Company believes this approach will provide it with the ability to address multiple markets simultaneously.

The marketing strategy in each location will vary, depending on the local market environment. However, several elements of the strategy are likely to be similar. First, the Company and its local partner(s) expect to position the product and service relative to other popular telecommunications products and services. Since the Company's technology, products and services share common attributes with pagers, voicemail, and cellular phones, it is possible that the Company's wireless information services will be positioned differently in different locations. Second, the Company and its local partner(s) will determine the best mix of customers and distribution. In most locations, the Company anticipates its customers will use a variety of distribution channels, including selling directly to corporate accounts, through retail electronic outlets, or through wireless dealers.

During Fiscal 2001, the Company entered into a joint venture agreement with the Pasubio Group, an Italian telecommunications holding company controlled by Marco Podini, the Italian entrepreneur. The name of the joint venture is RadioNet Italia Srl and it is owned 60% by Clariti and 40% by Pasubio. The purpose of the joint venture is to market the ClariCAST(TM) technology and related products and services in Italy. RadioNet Italia will operate all of the Company's business interests in Italy. This includes the March 2000 Memorandum of Understanding ("MOU") the Company signed with Albacom SpA, the Italian telecommunications provider for businesses, to explore the

potential for integrating Clariti's wireless technology and products into Albacom's services portfolio in Italy and other European countries. In September 2000, the Company also signed a MOU with Broadnet, a European subsidiary of Comcast Corporation that provides Internet, communication and applications services, to explore integrating Clariti's wireless technology into Broadnet's portfolio of services for small and medium sized businesses in Portugal and the Czech Republic. The Company expects to enter discussions with other parties regarding partnership opportunities in other regions. There can be no assurance however that RadioNet Italia will be successful or that the Company will be successful in its efforts to execute the terms of these MOU's, nor can there be any assurance that the Company will be successful in its efforts to enlist strong partners in every market it plans to enter.

Competition

The Company expects its wireless datacasting products and services to compete with those of numerous well-established companies that design, manufacture or market pagers, cellular phones, wireless communications systems, and paging and cellular services. Most of these companies have substantially greater financial, technical, personnel and other resources than the Company, and have established reputations for success in the development, licensing, and sale of their products and services. Certain of these competitors may also have the financial resources necessary to enable them to withstand substantial price competition or downturns in the market for pagers, cellular phones, and related products.

In order for a wireless technology to be commercially successful, the Company believes it must meet user requirements for cost, device size, performance, functionality, and in the case of a voice-based product, audio quality. While some competing voice messaging technologies match the Company's ClariCAST(TM) technology on one or more of these parameters, the Company is not aware of any competing technology that can match ClariCAST(TM) technology in all of these critical areas.

Production and Manufacturing Plans

The Company does not presently intend to establish its own manufacturing facilities to produce the Voca(TM), the ClariCAST(TM) Server, or the SCA Generator. Instead, the Company plans to license other companies to manufacture such items. As such, the Company will be dependent upon the ability of licensed manufacturers to manufacture and assemble products in accordance with specifications provided by the Company. If such contractors are unable to meet these specifications or experience delays in delivering products, the Company's business would be adversely affected.

Periodically, worldwide demand for and production of wireless devices may be greater than manufacturers and component suppliers had anticipated and/or manufacturers may discontinue manufacturing certain components or operations. As a result, there have been shortages of certain types of components used in manufacturing wireless devices, including some of those used in the Voca(TM). If such component suppliers are unable to meet industry demand for certain components and thus experience delays in delivering components or discontinue operations or the manufacturing of certain components, the Company's business would be adversely affected.

The Company may in the future seek to establish its own manufacturing

facilities and/or form joint ventures with manufacturers abroad in order to manufacture and assemble the Company's products. In such event, the Company would need further financing to implement such manufacturing plans. There can be no assurance that financing will be available to the Company at such time, or if available, on terms acceptable to the Company.

Patents and Trade Secrets

In March 1999, the U.S. Patent and Trademark Office issued to the Company a patent, originally filed in January 1996, dealing with FM Subcarrier Digital Voice Messaging. In July of 2000, the U.S. Patent and Trademark Office issued the Company a second patent on the invention with improved claim coverage. This invention had previously been approved by government authorities in South Africa and Taiwan, and is still pending in three additional countries. In April 2000 the U.S. Patent and Trademark Office issued to the Company a patent, originally filed in March 1999, on the overall design of its Wireless Voicemail Player, the Voca(TM). The Company's current patents expire between 2014 and 2016.

During the past fiscal year, the Company has filed patent applications in the United States and multiple foreign countries on a number of additional patents. The Company has two pending patent applications for the protection of its proprietary wireless protocol and pending patent applications for a unique interference-reduction technique, an improved message quality estimator, the Voca(TM) antenna shield, and other Voca(TM) performance-enhancing features.

There can be no assurance as to the ultimate success of the Wireless Voicemail System patent applications in the United States or any foreign country. Furthermore, even if patents are issued to the Company, there can be no assurance that such patents will not be circumvented and/or invalidated by competitors of the Company. Further, the enforcement of patent rights often requires the institution of litigation against infringers, which litigation is often costly and time consuming. The Company also intends to rely on trade secrets, know how and continuing technological advancement to establish a competitive position in the marketplace. There can be no assurance that the Company will be able to adequately protect its technology from competitors in the future.

Research and Development

The Company's research and development costs relate exclusively to development of its Wireless Voicemail System and ClariCAST(TM) technology. Research and development costs incurred by the Company during the years ended June 30, 2001, 2000 and 1999 were \$4,711,000, \$4,161,000 and \$2,465,000,

9

respectively. The Company has incurred cumulative research and development costs of \$12,846,000 on its ClariCAST(TM) technology and Wireless Voicemail System through June 30, 2001. As further described above, the Company has been experiencing a severe cash shortage, which has resulted in a significant reduction of R&D expenditures since the second quarter of calendar 2001. Management expects a significantly reduced level of R&D expenditures for the remainder of Fiscal 2002, even if additional funds are raised by the Company.

Management believes its ClariCAST(TM) technology has the capability to fill a need that exists worldwide for a wireless telecommunications network that can communicate information in an economically feasible manner without the need for significant investment capital requirements of traditional telecommunication and cellular infrastructure. Utilization of the existing

telecommunications infrastructure and that of FM radio towers located around the world has the capability to provide such a network to the vast majority of the world's population. The Company plans to continue research and development into applications of its technology that have the potential to fill such a need.

Employees

As of June 30, 2001, the Company had a total of 15 employees. All of the Company's employees work on a full time basis and none of the Company's employees belong to a labor union. All of the Company's employees work in the United States.

ITEM 2. DESCRIPTION OF PROPERTY

The Company is located at 1341 N. Delaware Avenue, Suite 300, Philadelphia, Pennsylvania 19125, which the Company leases pursuant to a written lease agreement that expires in 2006.

ITEM 3. LEGAL PROCEEDINGS

France Telecom SA v. Clariti Telecommunications International, Ltd. This matter was initiated in a complaint filed by Plaintiff, France Telecom SA, on May 12, 2000 before the Tribunal de Commerce de Paris (Paris Commercial Court) in Paris, France. Plaintiff's claim relates to a debt Plaintiff claims it is owed by Global First Communications SA, a French subsidiary of Global First Holdings Limited, for long-distance telephone services. Plaintiff claims that Clariti entered into negotiations with Plaintiff to resolve such debt in bad faith. Plaintiff seeks payment from Clariti of 20,000,000 French Francs (approximately \$2,600,000). Plaintiff further claims unspecified damages corresponding to the loss of revenue resulting from the ceasing of commercial relations with Global First Communications SA. The Company intends to vigorously defend the claims asserted by Plaintiff. Clariti believes (i) that it did not negotiate with Plaintiff in bad faith, (ii) that it did not verbally or in writing make a promise to pay any obligations of Global First Communications SA, and (iii) that Clariti caused no damages to Plaintiff because commercial relations with Global First Communications SA had ceased before Clariti held any negotiations with Plaintiff. A first hearing on this complaint was held on September 13, 2000. Clariti plans to file its defense against France Telecom's claims at a hearing scheduled for October 10, 2001.

10

IDT Corporation v. Clariti Carrier Services, Ltd. and Clariti Telecommunications International, Ltd. This matter was initiated by a Complaint filed by Plaintiff, IDT Corporation on November 30, 1999 in the Court of Common Pleas of Philadelphia, PA. Plaintiff seeks payment for long-distance telephone services and claims, in part, that a contract, including all obligations arising thereunder, between the Plaintiff and Global First Communications, Ltd. ("Global First Com") was assigned to the Company. In the alternative, Plaintiff claims that the Company is the "alter ego" of Global First Com and is responsible for the debts of Global First Com. The Plaintiff has alleged damages in an amount of \$690,163 plus interest, costs and attorneys fees. The Company advises that it did not receive an assignment of the contract, did not receive such telephone services, and is not the "alter ego" of Global First Com. Preliminary objections were filed by the Company seeking dismissal of the Complaint on a number of grounds including, without limitation, jurisdictional issues. On March 20, 2000, the Court of Common Pleas, Philadelphia County,

Pennsylvania ("Court"), sustained the Company's preliminary objections concerning the Court's jurisdiction over this matter. By sustaining this preliminary objection (i.e., stating that it did not have jurisdiction over this matter), it was unnecessary for the Court to decide upon the other preliminary objections. The Court's Order dismissed the Complaint on the basis of jurisdiction, provided that jurisdiction lies in England. If Clariti objects to jurisdiction in England, it is conceivable that the Court may then decide to hear the case subject to its decision on the Company's other preliminary objections. On or about April 15, 2000, IDT filed an appeal with the Superior Court of Pennsylvania appealing the decision of the Court of Common Pleas. On or about April 19, 2001, the Superior Court sustained the decision of the Court of Common Pleas regarding jurisdiction. To date, the Company is not aware of any further action taken by IDT in this matter.

Michael P. McAndrews v. Clariti, et al. On or about September 28, 2000, Michael P. McAndrews filed a Demand for Arbitration with the American Arbitration Association against Clariti and its wholly-owned subsidiary, Clariti Wireless Messaging, Inc. ("Clariti Wireless"), concerning obligations arising under Mr. McAndrews' Employment Agreement. Mr. McAndrews is claiming damages against both Clariti Wireless as well as against the Company, alleging that the Company had guaranteed and assumed the obligation due Mr. McAndrews pursuant to an Assignment and Guaranty Agreement. Mr. McAndrews claims that as a result of a material change in his duties, he resigned from employment for "good reason" (as defined in the Employment Agreement), therefore entitling him to a severance package in an amount in excess of \$294,000. Additionally, Mr. McAndrews requests reasonable attorney fees and other costs and fees, together with interest thereon. Clariti Wireless and the Company dispute Mr. McAndrews' allegations and assert that Mr. McAndrews is not entitled to any payments and/or damages under the Employment Agreement. Further, the Company and Clariti Wireless request that it be reimbursed its reasonable attorney fees and other costs and fees, together with such other relief as the Arbitrators may deem just and proper. The Arbitrators held a hearing on June 14 and 15, 2001 regarding matter. On or about September 19, 2001, the parties submitted post-hearing briefs. A decision by the Arbitrators is pending.

M&T Bank Successor By Merger to Keystone Financial Bank, N.A. v. Clariti Telecommunications International, Ltd. This matter was initiated by a Complaint filed by Plaintiff on June 12, 2001 in the Court of Common Pleas of Montgomery County, Pennsylvania. Plaintiff seeks to hold Clariti responsible under the terms of a guaranty agreement pursuant to which Clariti allegedly guaranteed

certain obligations of its former subsidiary, Clariti Telecom, Inc. Plaintiff seeks damages in the amount of \$368,000. This case is in the early stages of discovery with no case management scheduled or trial date set.

As further described in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, the Company has been experiencing a severe cash shortage. As a result, the Company has been unable to pay its vendors on a timely basis. Some vendors have chosen to use the legal process to attempt to collect their debts, including obtaining judgments against the Company. If the Company is able to raise significant additional funding, the Company expects to attempt to work out settlements with respect to these judgments.

The Company is, from time to time, during the normal course of its business operations, subject to various other litigation claims and legal disputes. The Company expects none to have a material adverse impact on its operations; however, no assurance can be given that an adverse determination of

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

any claim or dispute would not have an adverse impact on its operations during any given period.

any public offering in that said transactions involved the issuance by the Company of shares of its common stock to financially sophisticated individuals who were fully aware of the Company's activities, as well as its business and financial condition, and acquired said securities for investment purposes.

The Company has placed a restrictive legend on all of the stock certificates representing the shares issued above and will give appropriate "stop transfer" instructions to its transfer agent, until such time as those shares are registered pursuant to the Act, or a valid exemption from registration exists under the Act.

ITEM 6. SELECTED FINANCIAL DATA

The following selected consolidated financial data relating to the Company and its subsidiaries have been taken or derived from the financial statements and other records of the Company. Such selected consolidated financial data are qualified in their entirety by, and should be read in conjunction with, the consolidated financial statements of the Company. During Fiscal 2001, the Company divested substantially all of its interests in the Telephony/Internet Services business segment, representing the disposal of a business segment under Accounting Principals Board Opinion No. 30. Accordingly, the selected financial data have been restated to conform to discontinued operations treatment for all periods presented. In 1998, the Company changed its fiscal year end from July 31 to June 30. Therefore, Fiscal 1998 consists of the 11 months ended June 30, 1998 and all other fiscal years consist of 12 months.

In addition, certain statements may involve risk and uncertainty if they are preceded by, followed by, or that include the words "intends," "estimates," "believes," "expects," "anticipates," "should," "could," or similar expressions, and other statements contained herein regarding matters that are not historical facts. Although we believe that our expectations are based on reasonable assumptions, we can give no assurance that our expectations will be achieved. The important factors that could cause actual results to differ materially from those in the forward-looking statements herein (the "Cautionary Statements") include, without limitation, risks related to our ability to obtain funding, risks relating to our significant capital requirements, risks associated with our operating losses, risks relating to our development and expansion and possible inability to manage growth, risks relating to competition and regulatory developments, as well as the other risks

16

identified below under "Risk Factors" and those referenced from time to time in our filings with the Securities and Exchange Commission. All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by the Cautionary Statements. We do not undertake any obligation to release publicly any revisions to such forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

RISK FACTORS

We Need to Obtain Financing in Order to Continue Our Operations

To date, we have funded our operations principally through private equity funding. More recently, we have obtained limited short-term debt financing in order to continue operating, including a \$750,000 secured loan from a related party. The \$750,000 loan is secured by substantially all of our assets. The due date for repayment of the loan has already passed and the lender has notified us that we are in default of the loan agreement. If we were unable to repay the loan on demand by the lender, the lender could foreclose on the collateral described above. The lender has not yet made demand for immediate payment.

Due to operating losses, we remain undercapitalized. We have substantially exhausted our cash reserves, we have no credit lines and we have no firm commitments for near-term funding. These matters raise substantial doubt about our ability to continue as a going concern.

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

On a prospective basis, we will require both short-term financing for operations and debt repayment and longer-term capital to fund our expected growth. We have no existing bank lines of credit and have not established any sources for additional financing. Our ability to grow will be dependent upon our ability to raise longer-term capital or otherwise finance our plans. We are actively pursuing opportunities to secure additional financing which, if obtained, is expected to be sufficient to repay short-term borrowings and meet operating cash requirements through most of the next fiscal year. However, additional financing may not be available to us, or if available, may not be available upon terms and conditions acceptable to us. Inability to raise sufficient funds for operations will have an adverse impact on our business.

The Market Price of Our Stock Has Fallen Precipitously, Making It More Difficult For Us to Obtain Financing

The market price of our common stock has fallen from over \$5.00 per share in January 2001 to less than \$0.10 per share currently. As a result, our common stock is no longer eligible for listing on the Nasdaq SmallCap Stock Market. In addition, we will have to substantially dilute the stock held by existing shareholders in order to raise sufficient capital to meet our funding requirements, if we can obtain the necessary funding.

We Have a Limited Operating History Upon Which to Base an Evaluation of Our Performance

We were formed in February 1988 as the successor to a music and recording studio business. In January 1991, we became a publicly held company upon a

17

merger with an inactive public company incorporated in Nevada. In early 1995, we were introduced to the concept of voice paging using FM radio frequencies, which we have now developed into our ClariCAST(TM) wireless messaging technology. As an early stage company in the new and rapidly evolving wireless technology industry, we face numerous risks and uncertainties. In addition, we have had only a limited operating history upon which investors may base an evaluation of our performance.

We Have a History of Losses and Expect that Losses Will Continue in the Future

Since our inception, we have incurred significant losses from continuing operations of \$15,255,000, \$16,364,000 and \$8,978,000 for Fiscal 2001, Fiscal 2000 and Fiscal 1999, respectively, including \$4,711,000, \$4,161,000 and \$2,465,000, respectively, on research and development of our ClariCAST(TM) technology and the Wireless Voicemail system. In order to achieve profitability in the future, we will need to generate significant revenue. We cannot assure you that we will generate sufficient revenue to achieve profitability. We currently project that we will continue to generate operating losses and negative cash flow from operations at least through Fiscal 2002. We cannot assure you that we will ever achieve, or if achieved, maintain, profitability. If revenue grows more slowly than we anticipate or if research and development, marketing and operating expenses exceed our expectations or cannot be adjusted accordingly, our business, results of operation and financial condition will be materially adversely affected.

We Are in Competition With Companies That Are Larger, More Established and Better Capitalized Than We Are

The wireless telecommunications industry is highly competitive, rapidly

evolving and subject to constant technological change. We expect that our wireless voicemail products and services will compete with those of numerous well-established companies, including Motorola, AT&T, Sprint PCS and many paging companies, which design, manufacture or market pagers, cellular phones, wireless communications systems and cellular service. Many of our competitors have greater financial, technical, engineering, personnel and marketing resources; longer operating histories; greater name recognition; and larger consumer bases than us. These advantages afford our competitors pricing flexibility.

Our Success Is Largely Dependent Upon Our Key Executive Officers and Other Key Personnel

Our success is largely dependent upon our key executive officers, the loss of one or more of whom could have a material adverse effect on us. We believe that our continued success will depend to a significant extent upon the efforts and abilities of our executive officers and our ability to (i) retain them and (ii) attract new, highly qualified executives. Although we believe that we would be able to locate suitable replacements for our executives if their services were lost, there can be no assurance we would be able to do so.

In addition, our future operating results will substantially depend upon our ability to attract and retain highly qualified management, financial, technical and administrative personnel. Competition for highly trained technical personnel is intense. We cannot assure you that we will be able to attract and retain the personnel necessary for the development of our business.

18

Rapid Technological Change Makes Our Success Unpredictable

The wireless telecommunications industry is characterized by rapid technological change, new product introduction and evolving industry standards. Our success will depend, in significant part, on our ability to make timely and cost-effective enhancements and additions to our technology and introduce new services that meet consumer demands. We expect new products and services, and enhancements to existing products and services, will be developed and introduced in order to compete with our services. We are in the process of completing the development of technology that will permit us to market and deliver our Wireless Voicemail System. The proliferation of new telecommunications technologies may reduce demand for wireless voice messaging products. There can be no assurance that we will have the financial resources to or will be successful in developing and marketing new services or enhancements to services that respond to these or other technological changes or evolving industry standards. In addition, we may experience difficulties that could delay or prevent the successful development, introduction and marketing of our existing services, or our new services or enhancements may not adequately meet the requirements of the marketplace and achieve market acceptance. Delay in the introduction of new services or enhancements, our inability to develop new services or enhancements or the failure of such services or enhancements to achieve market acceptance could have a material adverse effect on our business, financial condition and results of operations.

We Are Subject to Uncertain Government Regulation

We are subject to varying degrees of foreign, federal, state and local rules and regulations. The rules and regulations could change at any time in an unpredictable manner, which could have a material impact on our activities and our operating results. Our wireless voice messaging technology utilizes

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

FM-SCA channels available on nearly all FM radio stations worldwide. In the United States, the FCC considers FM-SCA channels to be part of the total FM frequency allocated to a radio station and therefore regulates only the FM licensee, and does not require a separate license for the contractual use of FM-SCA channels. There can be no assurance that Congress, the FCC, state regulatory agencies, foreign governments or supranational bodies will not in the future require us to obtain a license to operate our business or impose other requirements on radio stations that may limit our ability to operate. Regulators in most of the foreign markets we plan to enter may take a similar position in their countries to that of the FCC regarding the licensing and regulation of FM-SCA channels. There can be no assurance that foreign regulatory agencies will allow us to operate our services.

Legal Disputes May Affect Our Financial Position and the Price of Our Common Stock

As further described above under Item 3 "Legal Proceedings," we are involved in several significant legal disputes any one of which, if resolved unfavorably to us, would have a negative effect on our financial position.

Operating Internationally May Expose Us to Additional and Unpredictable Risks

We have established a joint venture in Italy to market our technology, and we intend to enter other international markets as well. International operations are subject to inherent risks, including:

19

- potentially weaker intellectual property rights;
- difficulties in obtaining foreign licenses;
- changes in regulatory requirements;
- political instability;
- unexpected changes in regulations and tariffs;
- fluctuations in exchange rates;
- varying tax consequences; and
- uncertain market acceptance and difficulties in marketing efforts due to language and cultural differences.

Our Common Stock Is Illiquid

Our common stock is currently traded on the OTC Bulletin Board and, as such, our common stock is relatively illiquid. There can be no assurance that an active public trading market for our common stock will be sustained.

Possible Depressive Effect of Future Sales of Common Stock Subject to Rule 144

As of September 10, 2001, we had 38,529,565 shares of common stock outstanding. Approximately 87% of our common stock is freely tradable without restriction under the Securities Act of 1933, as amended, subject to the lock-up restrictions on transfer referred to below. The remaining 13% of our common stock was issued by us in private transactions. Such shares are treated as "restricted securities" as defined under the Securities Act. Restricted securities may be sold in compliance with Rule 144 under the Securities Act or pursuant to a registration statement filed under the Securities Act. Rule 144 generally provides that a person holding restricted securities for a period of one year may sell every three months in brokerage transactions or market-maker transactions an amount equal to the greater of (1) one percent (1%) of our issued and outstanding common stock or (2) the average weekly trading volume of the common stock during the four calendar weeks prior to such sale. Rule 144 also permits, under certain circumstances, the sale of shares without any

quantity limitation by a person who is not an affiliate of Clariti and who has satisfied a two-year holding period. The sale of substantial numbers of such shares, whether pursuant to Rule 144 or pursuant to a registration statement, may have a depressive effect on the market price of our common stock.

As of September 10, 2001, 15,553,584 shares, or 40% of our common stock, were subject to lock-up agreements. The parties to the lock-up agreements are not permitted to sell their shares until the expiration of the lock-up period without our prior consent. Current lock-up agreements have expiration dates in December 2001 and March 2002. The expiration of a particular lock-up period could have a depressive effect on the market price of our common stock.

Future Issuances of Preferred Stock May Dilute the Rights of Common Stockholders

Our Board of Directors has the authority to issue up to two million shares of a new series of preferred stock and to determine the price, privileges and other terms of such shares. The Board may exercise this authority without the approval of the stockholders. The rights of the holders of common stock may be adversely affected by the rights of the holders of any preferred stock that may be issued in the future. In addition, the issuance of preferred stock may make it more difficult for a third party to acquire control of Clariti.

20

SPECIFIC RISKS ASSOCIATED WITH OUR WIRELESS PRODUCTS AND SERVICES

Consumers May Not Accept our Wireless Voicemail System

The acceptance of our Wireless Voicemail system is a key element to our success and profitability. As with all new products, there is a risk that consumers may not accept our product. We may not be able to demonstrate the benefits of our product to consumers to sufficiently convince them to purchase our system. The development of new voicemail services is evolving and highly competitive. Other companies may develop products in response to technological changes that make our system noncompetitive, especially if the development, introduction and marketing of our product is delayed.

We May Not Be Able to Complete Development of Our Wireless Voicemail System or Other Wireless Products and Services

Although we have tested a prototype of our digital Wireless Voicemail System in selected areas, we may not be able to successfully develop a commercially viable production model. During the last fiscal year, we implemented a limited scope test launch of our Wireless Voicemail service in Jacksonville, Florida. The test launch consisted of the sale of approximately 50 Vocas(TM) to third party consumers who used the service in their daily lives. The Company has been evaluating and utilizing the information obtained in the limited scope test in the technology development process. New product development efforts are subject to many inherent risks, including unanticipated delays, expenses, market acceptance, technical problems or difficulties, as well as possible insufficiency of funding to complete development. We cannot be certain when our Wireless Voicemail System will be completed, that our products can be developed within a reasonable development schedule, if at all, or that they can be produced at a reasonable cost.

We Will Be Dependent Upon Other Companies to Manufacture Our Wireless Products and Services

We plan to license other companies to manufacture our products, including

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

Vocas(TM), SCA generators and related components. We will depend on the ability of other companies to engineer, develop, manufacture and assemble certain components of our system in accordance with our specifications. These companies may be unable to meet our specifications or may experience delays in delivering our products to us.

Such manufacturers must acquire the component parts of our products from other companies. Periodically, worldwide demand for and production of wireless devices were greater than manufacturers and component suppliers had anticipated. As a result, there have been shortages of certain types of components used in manufacturing wireless devices, including some of those used in our Voca(TM) and SCA generator. If such component suppliers are unable to meet industry demand for certain components and thus experience delays in delivering components and/or manufacturers of components parts may discontinue operations or manufacturing, our business would be adversely affected.

We May Be Dependent Upon Third Parties to Market and Distribute Our Wireless Products and Services

We intend to enter agreements with third parties to market and distribute our wireless products. The success of our wireless products and services will

21

depend upon our ability to seek out partners who are experienced with marketing and distributing wireless products in their respective geographic areas. We have executed a Memorandum of Understanding with Albacom SpA, the Italian telecommunications provider for businesses, to explore the potential for integrating Clariti's wireless technology and products into Albacom's services portfolio in Italy and other European countries. We will need additional arrangements to distribute our wireless voicemail system. We may not be able to maintain our arrangement with Albacom or enter into additional distribution arrangements. In addition, we have little control over the resources that our partners will devote to marketing our system.

We May Be Dependent Upon Third Parties To Provide FM-SCA Channels in Areas in Which We Intend to Operate Our Wireless Services

In markets where we intend to distribute and operate our wireless services, we will be required to enter into contractual arrangements with FM radio stations in order to secure the use of FM radio subcarrier frequencies to operate our wireless system. RadioNet Italia, our joint venture with the Pasubio Group in Italy, has entered a contract with Centro di Produzione SpA (also known as "Radio Radicale"), whose FM radio station network covers approximately 95% of Italy, to use their FM-SCA channels in exchange for a percentage of RadioNet Italia's revenues. We will need additional arrangements in other countries to operate our wireless systems. We may not be able to enter into these arrangements or we may not be able to obtain sufficient radio frequency coverage in our target market. In addition, FM radio station owners may develop other uses for their subcarrier frequencies which would limit our ability to enter into these arrangements. If we are unable to enter into arrangements with a significant number of FM radio stations, or to do so on economically advantageous terms, our ability to commercialize our wireless products and services and our profitability, if any, will be limited.

We Have Limited Protection of Proprietary Rights and Technology

Our intellectual property rights include patents, copyrights, trade secrets, trademarks and exclusive and non-exclusive licenses. We have been granted a U.S. patent dealing with FM Subcarrier Digital Voice Paging. Patents

on this invention have also been granted in South Africa and Taiwan and are pending in 10 additional countries. We have also filed for patent protection in the United States and multiple foreign countries on a number of additional inventions. During the past fiscal year, the Company has filed patent applications in the United States and multiple foreign countries on a number of additional patents. The Company has two pending patent applications for the protection of its proprietary wireless protocol and pending patent applications for a unique interference-reduction technique, an improved message quality estimator, the Voca(TM) antenna shield, and other Voca(TM) performance-enhancing features.

- aspects of our proprietary wireless protocol ClariCast(TM);
- a unique interference-reduction technique;
- the overall design of our wireless voicemail player;
- the Voca(TM) antenna shield; and
- other Voca(TM) performance-enhancing features.

22

We cannot be certain that any patent applications will result in the issuance of a patent or that our patents will withstand any challenges by third parties.

We Face Risks of Infringement Claims

We may be subject to legal proceedings and claims from time to time relating to the intellectual property of others, even though we take steps to assure that neither our employees nor our contractors knowingly incorporate unlicensed copyrights or trade secrets into our products. It is possible that third parties may claim that our current or future products may infringe upon their patent, copyright, trademark or trade secret rights. Any such claims, regardless of their merit, could be time consuming, expensive, cause delays in introducing new or improved products or services, require us to enter into royalty or licensing agreements or require us to stop using the challenged intellectual property. Successful infringement claims against us may materially disrupt the conduct of our business or affect profitability. There are currently no legal proceedings or claims for infringement of intellectual property rights pending against us.

Unauthorized Use of Our Intellectual Property and Trade Secrets May Affect our Market Share and Profitability

We rely on our patents, copyrights, trademarks, trade secrets, know how and continuing technological advancement to establish a competitive position in the marketplace. We attempt to protect our proprietary technology through an employee handbook and agreements with our employees. Other companies may independently develop or otherwise acquire similar technology or gain access to our proprietary technology. Despite our precautions, there can be no assurance that we will be able to adequately protect our technology from competitors in the future. The enforcement of patent rights often requires the institution of litigation against infringers. This litigation is often costly and time consuming.

ANALYSIS OF THE BUSINESS

The following discussion should be read in conjunction with the Company's consolidated financial statements appearing elsewhere in this

report.

General Operations

The current focus of our business is the development and commercialization of ClariCAST(TM), our wireless technology that will support voice messaging (including wireless voicemail and text-to-speech), data and information services to a high-speed digital wireless device. Further description of the Wireless Datacasting business and its operations is included above under Item 1, Business.

23

Results of Operations

During the period from December 1998 to May 2001, several of our former subsidiaries were providers of wire-line telecommunication services through their interests in several businesses with operations in the United States, United Kingdom, Europe and Australia. We previously referred to these operations as our Telephony/Internet Services business segment. We have divested substantially all of our interests in the Telephony/Internet Services business segment, representing the disposal of a business segment under Accounting Principals Board Opinion No. 30. Accordingly, our financial statements have been restated to conform to discontinued operations treatment for all periods presented.

Year Ended June 30, 2001 (Fiscal 2001)
vs. Year Ended June 30, 2000 (Fiscal 2000)

For Fiscal 2001, we incurred a net loss of \$21,581,000 (\$0.60 per share) on no revenue compared to a net loss of \$4,872,000 (\$0.14 per share) on no revenue for Fiscal 2000. Excluding discontinued operations, we incurred a net loss of \$15,255,000 (\$0.43 per share) in Fiscal 2001 compared to a net loss of \$16,364,000 (\$0.49 per share) for Fiscal 2000. The \$1,109,000 reduction in loss from continuing operations was primarily due to lower general and administrative expenses partially offset by higher marketing and research and development expenses.

General and administrative expenses were \$9,471,000 in Fiscal 2001 as compared to \$12,146,000 in Fiscal, 2000, a decrease of \$2,675,000. This decrease resulted from a \$3,919,000 reduction in the fair market value of common stock warrants issued as compensation to various consultants for assisting us in our efforts to raise additional capital to fund our operations. Partially offsetting this decrease were higher staff levels and associated costs for back office operations and systems development incurred in our Wireless headquarters to support the launch of our Wireless Voicemail System in Jacksonville, Florida and in the future, Milan, Italy. By the end of Fiscal 2001, our severe cash shortage forced us to lay off most of our Wireless network engineering, marketing and administrative staff and relocate its group headquarters from Fort Washington, Pennsylvania to Philadelphia.

Marketing expenses increased from \$247,000 in Fiscal 2000 to \$1,044,000 in Fiscal 2001 as we expanded our marketing staff and activities for the launch of our Wireless Voicemail service in Jacksonville, Florida and in the future,

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

Milan, Italy. Research and development expenses increased \$550,000, from \$4,161,000 in Fiscal 2000 to \$4,711,000 in Fiscal 2001 primarily due to due to continued acceleration of development work on our Wireless Voicemail System and additional applications of our ClariCAST(TM) technology. Included in the Fiscal 2000 R&D expense amount is \$950,000 for the purchase from a third party engineering contractor of all the technology and related designs, schematics and know-how for one of the key components of our ClariCAST(TM) technology. By the end of Fiscal 2001, we reduced both marketing and R&D expenditure rates to minimal levels as a result of our severe cash shortage. See Capital Resources and Liquidity.

Our results of operations for all fiscal years presented reflect our former business segment, Telephony/Internet Services, as discontinued operations. In Fiscal 2001 when we divested a substantial portion of such

24

businesses, we recognized a loss from discontinued operations of \$6,519,000 as compared to income of \$12,254,000 from discontinued operations in Fiscal 2000. As of June 30, 1999, we had written off all assets related to certain subsidiaries of the UK Telecommunications Group and had accrued for all of their estimated losses from operations up to October 11, 1999, the date these companies filed for voluntary liquidation. The liquidation proceedings subsequently discharged all of their liabilities, and as a result we recognized a gain of \$33,502,000 on the discharge of such indebtedness in Fiscal 2000. Partially offsetting this gain in Fiscal 2000 was a write-off of \$10,441,000 of goodwill related to the acquisition of MegaHertz-NKO, Inc. Excluding these unusual items, results of discontinued operations in Fiscal 2000 reflected a loss of \$10,807,000 as compared to a loss of \$6,519,000 in Fiscal 2001. The \$4,288,000 decline in the amount of such operating losses principally results from 12 months of operations in Fiscal 2000 as compared to 10 months or less of operations in Fiscal 2001. In Fiscal 2001, results of disposal of discontinued operations reflected an adjustment to goodwill of \$2,909,000 because 245,000 shares of our common stock previously considered issued and outstanding were retired as a result of the divestment of MegaHertz-NKO, Inc. This adjustment was partially offset by losses of \$1,054,000 and 1,185,000 on the divestments of certain of our UK operating net assets and a 91% interest in NKA Communications Pty. Ltd., respectively. In Fiscal 2000, we incurred a \$762,000 loss on the sale of certain assets of the UK operations remaining after the liquidation proceedings described above.

Year Ended June 30, 2000 (Fiscal 2000)
vs. Year Ended June 30, 1999 (Fiscal 1999)

For Fiscal 2000, we incurred a net loss of \$4,872,000 (\$0.14 per share) on no revenue compared to a net loss of \$220,412,000 (\$11.86 per share) on no revenue for Fiscal 1999. Excluding discontinued operations, we incurred a net loss of \$16,364,000 (\$0.49 per share) in Fiscal 2000 compared to a net loss of \$8,978,000 (\$0.48 per share) for Fiscal 1999. The \$7,386,000 increase in loss from continuing operations was primarily due to higher general and administrative expenses and higher research and development expenses.

General and administrative expenses increased \$5,391,000, from \$6,755,000 in Fiscal 1999 to \$12,146,000 in Fiscal 2000. This increase resulted from the recognition of \$5,509,000 in the fair market value of common stock warrants issued as compensation to various consultants for assisting us in our efforts to raise additional capital to fund our operations. Research and development expenses increased \$1,696,000, from \$2,465,000 in Fiscal 1999 to \$4,161,000 in Fiscal 2000 due to continued acceleration of development work on our Wireless

Voicemail System. Included in the Fiscal 2000 R&D expense amount is \$950,000 for the purchase from a third party engineering contractor of all the technology and related designs, schematics and know-how for one of the key components of our ClariCAST(TM) technology.

Our results of operations for all fiscal years presented reflect our former business segment, Telephony/Internet Services, as discontinued operations. In Fiscal 2000 we recognized income from discontinued operations of \$12,254,000 as compared to a loss of \$211,434,000 from discontinued operations in Fiscal 1999. The Fiscal 1999 loss resulted from a \$152,214,000 write-off of goodwill from the acquisitions of the UK Telecommunications Group companies and \$59,220,000 in operating losses incurred by the UK Telecommunications Group. As of June 30, 1999, we had written off all assets

25

related to certain subsidiaries of the UK Telecommunications Group and had accrued for all of their estimated losses from operations up to October 11, 1999, the date these companies filed for voluntary liquidation. The liquidation proceedings subsequently discharged all of their liabilities, and as a result we recognized a gain of \$33,502,000 on the discharge of such indebtedness in Fiscal 2000. Partially offsetting this gain in Fiscal 2000 was a write-off of \$10,441,000 of goodwill related to the acquisition of MegaHertz-NKO, Inc. Excluding these unusual items, results of discontinued operations in Fiscal 2000 reflected a loss of \$10,807,000 from the combined operations of MegaHertz-NKO, Inc. in Fiscal 2000 and NKA Communications Pty. Ltd. and Tekbilt World Communications, Inc. from their respective acquisition dates in October and December 1999. In Fiscal 2000, we also incurred a \$762,000 loss on the sale of certain assets of the UK operations remaining after the liquidation proceedings described above.

Liquidity and Capital Resources

At June 30, 2001, we had a working capital deficit of \$2,954,000 (including a cash balance of \$124,000) as compared to working capital of \$13,007,000 (including a cash balance of \$13,752,000) at June 30, 2000. The working capital decrease of \$15,961,000 is primarily due to use of cash in continuing operations, investments made in discontinued operations, \$813,000 of short-term borrowings made during Fiscal 2001, and a \$1,491,000 million increase in accounts payable caused by our cash shortage.

We have historically relied principally on equity financing to meet our cash requirements. Adverse market conditions for telecommunications companies during Fiscal 2001 have made it extremely difficult for us to raise additional equity financing. We have substantially exhausted our cash reserves, we have no credit lines, and we have no firm commitments for near-term funding. Substantially all of our assets have been pledged as collateral for a short-term loan, which is in default because we do not have the funds to repay it. These matters raise substantial doubt about our ability to continue as a going concern. We are considering methods to restructure and/or reorganize our obligations.

In May and June 2001, we obtained limited short-term debt financing in order to continue operating, including a \$750,000 secured loan from a related party. The \$750,000 loan is secured by substantially all of our assets. The due date for repayment of the loan has already passed and the lender has notified us that we are in default of the loan agreement. If we were unable to repay the loan on demand by the lender, the lender could foreclose on the collateral described above. The lender has not yet made demand for immediate payment.

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

A major factor in our recent inability to raise equity funding has been the rapid and precipitous fall in the market price of our common stock, from \$5.25 per share in January 2001 to \$0.08 per share on September 10, 2001, resulting in a reduction of our market capitalization from \$187.7 million to \$3.1 million. As a result of this decline, our common stock was moved from being listed on the Nasdaq SmallCap Stock Market to the OTC Bulletin Board effective September 11, 2001. If we are able to obtain additional equity investments sufficient to continue our operations through the next fiscal year end (at least \$3 million), the low level of our stock price will cause substantial dilution of the stock held by existing shareholders.

26

We have chosen to focus our future efforts on development and commercialization of our patented ClariCAST(TM) wireless datacasting technology. Because our technology is still under development, we expect no revenues or positive operating cash flow in the near term. Future cash expenditure requirements have been significantly reduced through the discontinuance of the Telephony/Internet Services businesses and through major reductions in wireless technology development and corporate overhead expenses.

We are actively pursuing opportunities to secure additional financing which, if obtained, is expected to be sufficient to repay short-term borrowings and meet operating cash requirements through most of the next fiscal year. There can be no assurances that such funding will be generated or available, or if available, on terms acceptable to us. Failure to secure additional financing will have a material adverse impact on our business.

Significant additional funding will be required beyond 2001 to launch the Wireless Voicemail System in Italy and other specified target markets and to meet expected negative operating cash flows and capital expenditure plans. There can be no assurances that such funding will be generated or available, or if available, on terms acceptable to us.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors and Stockholders of
Clariti Telecommunications International, Ltd.
Philadelphia, Pennsylvania

We have audited the accompanying consolidated balance sheets of Clariti Telecommunications International, Ltd. and subsidiaries as of June 30, 2001 and 2000, and the related consolidated statements of operations, stockholders' equity (deficit), and cash flows for each of the three years in the period ended June 30, 2001. These consolidated financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Clariti Telecommunications International, Ltd. and subsidiaries as of June 30, 2001 and 2000, and the results of their consolidated operations and cash flows for each of the three years in the period ended June 30, 2001, in conformity with accounting principles generally accepted in the United States.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 3, the Company is currently developing technology, has not received any revenue from operations and has a working capital deficit. These factors raise substantial doubt about the entity's ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 3. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTE 1 - HISTORY AND NATURE OF THE BUSINESS

Clariti Telecommunications International, Ltd. ("Clariti" or the "Company") is an international wireless communications technology company with proprietary technology for transmitting data, including digital voice messages, utilizing radio frequencies transmitted by FM radio stations.

The Company was originally formed in February 1988 as the successor to a music and recording studio business owned and operated by the Company's current CEO and President. In 1995, the Company began shifting its focus to development and commercialization of its wireless technology and no longer has a significant interest in the music and recording studio business.

During the period from December 1998 to May 2001, the Company was also a significant provider of wire-line telecommunication services through its interest in several businesses with operations in the United States, United Kingdom, Europe and Australia. During Fiscal 2001, the Company discontinued its wire-line telecommunication operations (see Note 4).

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Fiscal Year End

The Company has a fiscal year ending on June 30. In these financial statements, the twelve month periods ended June 30, 2001, 2000 and 1999 are referred to as Fiscal 2001, Fiscal 2000 and Fiscal 1999, respectively.

Principles of Consolidation and Basis of Presentation

The consolidated financial statements include the accounts of the Company and all wholly-owned subsidiaries not deemed to be discontinued operations (see Note 4). All significant intercompany transactions have been eliminated in consolidation.

Cash Equivalents

The Company considers certificates of deposit, money market funds and all other highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

Concentration of Credit Risk

Certain financial instruments potentially subject the Company to concentrations of credit risk. These financial instruments consist primarily of cash and equivalents. The Company places its temporary cash investments with high credit quality financial institutions to limit its credit exposure.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FISCAL YEARS ENDED JUNE 30, 2001, 2000 AND 1999

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates based on management's knowledge and experience. Accordingly actual results may differ from those estimates.

Fair Value of Financial Instruments

The Company's financial instruments consist primarily of cash and equivalents, accounts payable, accrued expenses, and short-term borrowings. These balances, as presented in the balance sheet as of June 30, 2001 and 2000, approximate their fair value because of their short maturities.

Inventory

Inventory is stated at the lower of cost or market determined on a first-in, first-out basis and consists of component parts for the Voca(TM), the Company's wireless voicemail product currently in the final stages of development.

Property and Equipment

Property and equipment are recorded at cost, and are depreciated primarily using the declining balance and straight line methods over estimated useful lives of 3 to 10 years.

Intangible Assets

The Company's intangible assets consist principally of capitalized costs related to its patents and technology. The Company has filed patent applications for its wireless messaging technology (trademarked as ClariCAST(TM)) in the United States and numerous foreign countries. The capitalized patent and technology costs are amortized on a straight-line basis over a 5-year period. Amortization recognized was \$74,000, \$86,000 and \$67,000 in Fiscal 2001, 2000 and 1999, respectively. Accumulated amortization was \$302,000 and \$222,000 at June 30, 2001 and 2000, respectively.

Research and Development Expenses

Research and development expenditures, which are expensed as incurred, totaled \$4,711,000, \$4,161,000 and \$2,465,000 during Fiscal 2001, Fiscal 2000 and Fiscal 1999, respectively.

Income Taxes

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

The Company has adopted FASB Statement No. 109, "Accounting for Income Taxes", which requires an asset and liability approach to financial accounting and reporting for income taxes. Deferred income tax assets and liabilities are computed annually for temporary differences between financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

Comprehensive Income

The Company has adopted SFAS No. 130, Reporting Comprehensive Income. This statement establishes rules for the reporting of comprehensive income and its components. The Company has no components of comprehensive income.

Net Loss Per Common Share

The Company has adopted FASB Statement 128, "Earnings Per Share," which establishes standards for computing and presenting earnings per share. Under FASB Statement 128, net loss per common share is based upon the weighted average number of common shares outstanding during the period. Net loss per common share after the assumed conversion of potential common shares (warrants, stock options and convertible debt) was not presented because the effect of such conversions would be antidilutive.

Accounting for Stock-Based Compensation

Compensation costs attributable to stock option and similar plans are recognized based on any difference between the quoted market price of the stock on the date of the grant over the amount the employee is required to pay to acquire the stock (the intrinsic value method under APB Opinion 25). Such amount, if any, is accrued over the related vesting period, as appropriate.

The Company has adopted FASB Statement 123, "Accounting for Stock-Based Compensation," which encourages employers to account for stock-based compensation awards based on their fair value on their date of grant. The fair value method was used to value common stock warrants issued in transactions with other than employees during the periods presented. Entities may choose not to apply the new accounting method for options issued to employees but instead, disclose in the notes to the financial statements the pro forma effects on net income and earnings per share as if the new method had been applied. The Company has adopted the disclosure-only approach to FASB Statement 123 for options issued to employees. See Note 10.

Recent Accounting Pronouncements

In August 2001, FASB Statement 142, "Goodwill and Other Intangible Assets" was

issued, which is effective for fiscal years beginning after December 15, 2001. Statement 142 addresses how intangible assets that are acquired individually or with a group of assets should be accounted for upon their acquisition and also addresses how goodwill and other intangible assets should be accounted for after they have been initially recognized in the financial statements. Also, for previously recognized non-goodwill intangible assets, the useful lives must be reassessed with remaining amortization periods adjusted accordingly, and reflected as a change in accounting principle. Based on the Company's policy for accounting for intangible assets, management does not anticipate the adoption of this standard will result in any significant impact on earnings or financial position of the Company.

NOTE 3 - MANAGEMENT'S PLANS

The Company's consolidated financial statements have been presented on the basis that it is a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has experienced recurring net losses of \$21,581,000, \$4,872,000 and \$220,412,000 in Fiscal 2001, 2000 and 1999, respectively, or a total of \$246,865,000 over the 3-year period. \$206,314,000 of such losses were incurred in the Telephony/Internet Services business segment, which was discontinued in Fiscal 2001.

The Company has historically relied on equity and debt financing to meet its cash requirements. However, adverse market conditions for telecommunications companies during Fiscal 2001 have made it extremely difficult for the Company to raise additional financing. The Company has substantially exhausted its cash reserves and has no firm commitments for near-term funding. These matters raise substantial doubt about the Company's ability to continue as a going concern. Management is considering methods to restructure and/or reorganize its obligations.

The Company has chosen to focus its future efforts on development and commercialization of its patented ClariCAST(TM) wireless messaging technology. Because the Company's technology is still under development, the Company expects no revenues or operating cash flows in the near term. Future cash expenditure requirements have been significantly reduced through the discontinuance of the Telephony/Internet Services businesses and through major reductions in wireless technology development and corporate overhead expenses.

The Company is actively pursuing opportunities to secure additional financing which, if obtained, is expected to be sufficient to repay short-term borrowings and meet operating cash requirements through most of the next fiscal year.

NOTE 3 - MANAGEMENT'S PLANS (continued)

There can be no assurances that such funding will be generated or available, or if available, on terms acceptable to the Company. Failure to secure additional financing will have a material adverse impact on the Company.

The consolidated financial statements do not include any adjustments relating to the recoverability of recorded asset amounts or the amounts of liabilities

that might be necessary should the Company be unable to continue as a going concern.

NOTE 4 - DISCONTINUED OPERATIONS

During the period from December 1998 to May 2001, the Company was a significant provider of wire-line telecommunication services through its interest in several businesses with operations in the United States, United Kingdom, Europe and Australia. The Company previously referred to these operations as the Telephony/Internet Services business segment. As further described below, the Company has divested substantially all of its interests in the Telephony/Internet Services business segment, representing the disposal of a business segment under Accounting Principals Board Opinion No. 30. Accordingly, the accompanying financial statements have been restated to conform to discontinued operations treatment for all periods presented. These divestments consist of the following:

- In October 1999, the Company's wire-line operations in the United Kingdom and Europe (the "UK Telecommunications Group") filed for voluntary liquidation and ceased operation of its businesses. As a result, the Company recorded a write-off of goodwill of \$152,214,000 in Fiscal 1999. The liquidation proceedings discharged all liabilities of the UK Telecommunications Group. All losses from operations of the UK Telecommunications Group had been provided for as of June 30, 1999. Therefore, during Fiscal 2000 the Company recognized a gain of \$33,502,000 largely attributable to the excess of liabilities discharged over the book value of assets of the UK Telecommunications Group as of the liquidation date. Through such liquidation proceedings, the Company received certain operating assets of the UK Telecommunications Group consisting principally of telephone switching equipment in the United Kingdom. In March 2001, the Company sold such operating assets in the United Kingdom for total consideration valued at \$623,000, consisting of \$227,000 cash, 71,301 shares of Clariti common stock valued at \$98,000 and the assumption by the buyer of net liabilities aggregating \$298,000.
- In January and March of 2001, the Company sold a total of 91% of its interest in NKA Communications Pty Ltd. ("NKA"), an Australian provider of telephony to corporate clients, in exchange for 277,210 shares of Clariti stock valued at approximately \$1,143,000. The estimated net realizable value of the remaining 9% of NKA still held by the Company is -0-.

NOTE 4 - DISCONTINUED OPERATIONS (continued)

- The Company acquired MegaHertz-NKO, Inc. ("M-NKO") in May 1999 and Tekbilt World Communications, Inc. ("TWC") in December 1999. Prior to their sale, the combined businesses of TWC and M-NKO operated as an Internet Service Provider and a facilities-based provider of IP and conventional switched telecommunication services in the United States. During Fiscal 2000, the Company terminated most of M-NKO's revenue-generating activities and consolidated those remaining operations into

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

TWC, resulting in a write-off of \$10,441,000 of goodwill related to the acquisition of M-NKO. In May 2001, the Company sold all of the common stock of TWC for an unsecured note for \$250,000 (the "TWC Note") and in a separate transaction, the Company also sold all of the common stock of M-NKO for an unsecured note for \$250,000 (the "M-NKO Note"). The TWC Note carries a fixed interest rate of 6% and is payable on May 9, 2003. The M-NKO Note carries a fixed interest rate of 6% and is payable on May 23, 2003. The estimated net realizable value of both notes is -0-.

balance sheet as of June 30, 2001 includes \$12,000 of accrued interest. In connection with this loan, the Company granted to Anstead warrants to purchase 400,000 shares of the Company's common stock at an exercise price of \$0.95 per share. Such warrants expire on May 3, 2003. The Company was unable to repay the loan from Anstead by the July 3, 2001 due date, and is therefore in default of the loan agreement.

NOTE 7 - CONVERTIBLE SHORT-TERM BORROWINGS

On June 28, 2001, the Company borrowed \$62,500 from a third party. The

unsecured note is due on November 1, 2001 and carries interest at the rate of 8% per annum. The note is convertible into shares of the Company's common stock at the option of the lender at a conversion price of \$0.075 per share. In connection with this loan, the Company granted to the third party warrants to purchase a total of 125,000 shares of the Company's common stock, 62,500 of which are exercisable at \$0.25 per share and 62,500 of which are exercisable at \$0.50 per share. Such warrants expire on June 28, 2002.

NOTE 8 - INCOME TAXES

There is no income tax benefit for operating losses for Fiscal 2001, Fiscal 2000 and Fiscal 1999 due to the following:

Current tax benefit - the operating losses cannot be carried back to earlier years.

Deferred tax benefit - the deferred tax assets were offset by a valuation allowance required by FASB Statement 109, "Accounting for Income Taxes." The valuation allowance is necessary because, according to criteria established by FASB Statement 109, it is more likely than not that the deferred tax asset will not be realized through future taxable income.

Clariti Telecommunications International, Ltd. files a consolidated corporate income tax return in the United States and its foreign subsidiaries will be required to file income tax returns in their respective countries.

The use of net operating loss carryforwards for United States income tax purposes is limited when there has been a substantial change in ownership (as defined) during a three-year period. Because of the recent and contemplated changes in ownership of the Company's common stock, such a change may occur in the future. In this event, the use of net operating losses each year would be restricted to the value of the Company on the date of such change multiplied by the federal long-term rate ("annual limitation"); unused annual limitations may then be carried forward without this limitation.

At June 30, 2001 the Company had net operating loss carryforwards of approximately \$267,476,000 which if not used will expire primarily during the years 2004 through 2016.

Employment Agreements

 The Company maintains employment agreements with several of its executive officers and other key employees. Such employment agreements generally obligate the Company to pay such executives' salaries and provide them with certain fringe benefits until the expiration of the agreements, or until the executive resigns voluntarily or is terminated for cause.

Legal Proceedings

 France Telecom SA ("France Telecom") initiated a complaint against the Company on May 12, 2000 before the Tribunal de Commerce de Paris (Paris Commercial Court) in Paris, France. France Telecom's claim relates to a debt it claims it is owed by GlobalFirst Communications SA, a former French subsidiary of the UK Communications Group, for long-distance telephone services. France Telecom seeks payment from Clariti of 20,000,000 French Francs (approximately \$2,600,000). France Telecom further claims unspecified damages corresponding to the loss of revenue resulting from the ceasing of commercial relations with GlobalFirst Communications SA. The Company intends to vigorously defend the claims asserted by France Telecom. Clariti believes that it did not verbally or in writing make a promise to pay any obligations of GlobalFirst Communications SA, and that it caused no damages to France Telecom because commercial relations with GlobalFirst Communications SA had ceased before Clariti held any negotiations with France Telecom. A first hearing on this complaint was held

on September 13, 2000. Clariti plans to file its defense against France Telecom's claims at a hearing scheduled for October 10, 2001.

On November 30, 1999, IDT Corporation ("IDT") filed a complaint in the Court of Common Pleas in Philadelphia, Pennsylvania against the Company and Clariti Carrier Services Limited, an inactive United Kingdom subsidiary of the Company, seeking payment for long-distance telephone services pursuant to a contract between IDT and GlobalFirst Communications Limited, a former subsidiary of the UK Telecommunications Group. The complaint seeks damages in the amount of \$690,163 plus interest, costs and attorneys fees. On March 20, 2000, the Court of Common Pleas dismissed the complaint on the basis of jurisdiction, provided that proper jurisdiction lies in England. On or about April 15, 2000, IDT filed an appeal with the Superior Court of Pennsylvania appealing the decision of the Court of Common Pleas. On or about April 19, 2001, the Superior Court sustained the decision of the Court of Common Pleas regarding jurisdiction. To date, the Company is not aware of any further action taken by IDT in this matter. The Company believes damages IDT may have suffered, if any, must be

recovered through the liquidation proceedings of the UK Telecommunications Group, and that neither the Company nor Clariti Carrier Services Limited has any liability with respect to IDT's claim.

On or about September 28, 2000, Michael P. McAndrews filed a Demand for Arbitration with the American Arbitration Association against Clariti and its wholly-owned subsidiary, Clariti Wireless Messaging, Inc. ("Clariti Wireless"), concerning obligations arising under Mr. McAndrews' Employment Agreement. Mr. McAndrews is claiming damages against both Clariti Wireless and the Company, alleging that the Company had guaranteed and assumed the obligation due Mr. McAndrews pursuant to an Assignment and Guaranty Agreement. Mr. McAndrews claims that as a result of a material change in his duties, he resigned from employment for "good reason" (as defined in the Employment Agreement), therefore entitling him to a severance package in an amount in excess of \$294,000. Additionally, Mr. McAndrews requests reasonable attorney fees and other costs and fees, together with interest thereon. Clariti Wireless and the Company dispute Mr. McAndrews' allegations and assert that Mr. McAndrews is not entitled to any payments and/or damages under the Employment Agreement. The Arbitrators held a hearing on June 14 and 15, 2001 regarding the matter. On or about September 19, 2001, the parties submitted post-hearing briefs. A decision by the Arbitrators is pending.

On June 12, 2001, M&T Bank filed an action against Clariti Telecommunications International, Ltd. in the Court of Common Pleas of Montgomery County, Pennsylvania. M&T Bank seeks to hold Clariti responsible under the terms of a guaranty agreement pursuant to which Clariti allegedly guaranteed certain obligations of its former subsidiary, Clariti Telecom, Inc. M&T Bank seeks damages in the amount of \$368,000. This case is in the early stages of discovery with no case management scheduled or trial date set.

NOTE 9 - COMMITMENTS AND CONTINGENCIES (continued)

As further described in Note 3, the Company has been experiencing a severe cash shortage. As a result, the Company has been unable to pay its vendors on a timely basis. Some vendors have chosen to use the legal process to attempt to collect their debts, including obtaining judgments against the Company. If the Company is able to raise significant additional funding, the Company expects to attempt to work out settlements with respect to these judgments. All judgments obtained have been included in current liabilities as of June 30, 2001.

The Company is, from time to time, during the normal course of its business operations, subject to various other litigation claims and legal disputes. The Company expects none to have a material adverse impact on its operations; however, no assurance can be given that an adverse determination of any claim or dispute would not have an adverse impact on its operations during any given period.

NOTE 10 - STOCKHOLDERS' EQUITY

Common Stock

 Effective as of July 3, 2000, the Company implemented a 1 for 4 reverse split of its common stock. All amounts of Clariti common stock presented in these financial statements and notes have been retroactively restated to give effect to this reverse split.

During Fiscal 2001, the Company issued approximately 222,000 shares of Clariti common stock pursuant to its December 1999 agreement to acquire TWC. In addition, approximately 85,000 shares of Clariti common stock were returned to the Company pursuant to the terms of such agreement to acquire TWC. The Company has retired these returned shares. Also during Fiscal 2001, the Company received and retired approximately 348,000 shares of its common stock as consideration for the sale of the Company's UK operating assets and the sale of a 91% interest in NKA. The Company also retired 245,000 shares of its common stock as a result of the sale of M-NKO in May 2001.

During Fiscal 2000 the Company sold approximately 3,914,000 shares of its common stock to several third party investors for proceeds, net of commissions, of \$32,373,000. In addition, the Company issued 125,000 shares to an investor in settlement of a loan for \$1,000,000 such investor had made to the Company. Also during Fiscal 2000, approximately 611,000 shares of the Company's common stock was issued in connection with the acquisitions of TWC and NKA, and the Company recognized the issuance of approximately 128,000 shares in connection with the May 1999 acquisition of M-NKO.

Warrants

 From time to time, the Board of Directors of the Company may authorize the issuance of warrants to purchase the Company's common stock to parties other than employees and directors. Warrants may be issued as a unit with shares of common stock, as an incentive to help the Company achieve its goals, or in consideration for cash, financing costs or services rendered to the Company, or a combination of the above, and generally expire within several months to 5 years from the date of issuance. The following table summarizes activity for common stock warrants outstanding during the 3-year period ended June 30, 2001:

The Company has adopted FASB Statement 123, "Accounting for Stock-Based Compensation," which requires compensation cost associated with warrants issued to parties other than employees and directors to be valued based on the fair value of the warrants. Such fair value was estimated using the Black-Scholes model with the following assumptions for Fiscal 2001: no dividend yield, expected volatility of 80%, and a risk-free interest rate of 6.5%. The Black-Scholes model valued the warrants issued during Fiscal 2001, Fiscal 2000 and Fiscal 1999 at \$1,590,000, \$11,973,000 and \$383,000, respectively.

Stock Option Plan

The Company, with stockholder approval, has adopted a Stock Option Plan (the "Plan") which provides for the granting of options to officers, key employees, certain consultants and others. Options to purchase the Company's common stock may be made for a term of up to ten years at the fair market value at the time of the grant. Incentive options granted to a ten percent or more stockholder may not be for less than 110% of fair market value nor for a term of more than five years.

FOR VALUE RECEIVED, Burns & Gimble, PA, Inc., a Delaware corporation ("Maker"), promises to pay to the order of Clariti Telecommunications International, Ltd., a Delaware corporation ("Payee"), on the first (1st) business day occurring two (2) years after the date hereof (the "Due Date"), the principal sum of Two Hundred and Fifty Thousand U.S. Dollars (USD \$250,000), together with interest at a rate equal to six percent (6%) per annum compounded annually (the "Interest Rate"), or, upon the occurrence of an Event of Default (as defined in Section 4) and prior to the cure thereof, at a rate equal to eighteen percent (18%) per annum compounded monthly (the "Default Rate"), on the unpaid principal balance hereof on the basis of the actual number of days elapsed during any period during which shall be outstanding any of the unpaid principal balance of this Promissory Note (this "Note"), all upon the terms and conditions set forth herein.

1. Payments; Prepayment. On the Due Date, the unpaid principal balance hereof and all interest accrued on the unpaid principal balance hereof and not previously paid through such date shall be due and payable on the Due Date, without notice or demand by Maker to Payee. At any time and from time to time hereafter, Maker may prepay any or all of any sums due and payable hereunder, without penalty or premium provided that any prepayment of principal shall be accompanied by the payment of all accrued and unpaid interest thereon to the date of such prepayment. Each payment to Payee hereunder shall be payable by check or wire transfer to such account as Payee shall have designated in writing upon no less than two (2) business days prior notice in advance of the date on which such payment shall first be due and payable, or, in the absence of such designation, by check in good funds delivered to Payee at its address pursuant to Section 11 of this Note.

2. Usury; Post-Judgment Interest. Notwithstanding any provision contained herein, Maker's liability for the payment of interest under this Note shall not exceed the limits now imposed by the applicable usury law. If any provision of this Note requires interest payments in excess of the highest rate permitted by law, the provision in question shall be deemed to require only the highest such payment permitted by law. Any amounts theretofore received by Payee hereunder in excess of the maximum amount of interest so permitted to be collected by Payee shall be applied by Payee in reduction of the outstanding principal balance hereof (in which event any applicable prepayment prohibition or premium shall be waived with respect to the amount so prepaid) or, if this Note shall have theretofore been paid in full, the amount of such excess shall be promptly returned by Payee to the Maker. Any judgment obtained for sums due under this Note shall accrue interest at the rate set forth herein until paid.

3. Events of Default. For purposes hereof, each of the following shall constitute an Event of Default ("Event of Default") hereunder:

(a) The first (1st) business day occurring two (2) years after the date hereof;

(b) The failure of Maker to pay any sum due and payable hereunder on or before the date on which it first become due;

(c) Maker shall be in default, after the expiration of any applicable period of notice, grace and opportunity to cure, of or under any agreement (other than this Note) to which Maker and Payee are parties;

Edgar Filing: CLARITI TELECOMMUNICATIONS INTERNATIONAL LTD - Form 10-K

reorganization or other similar relief under the bankruptcy or other similar laws of the United States or any state (domestic or foreign) or any other competent jurisdiction; (iii) file, or have filed against it, a proceeding under any bankruptcy, reorganization, arrangement of debt, insolvency, readjustment of debt or receivership law, provided, however, that, in the case of an involuntary proceeding, such involuntary proceeding is not dismissed within thirty (30) days; (iv) make an assignment for the benefit of creditors; (v) voluntarily or involuntarily dissolve or be liquidated; (vii) sell, transfer, exchange, pledge, mortgage, encumber or otherwise dispose, liquidate or hypothecate substantially all of its assets; or (vi) take any action to authorize any of the foregoing.

4. Remedies. Upon the occurrence of the Event of Default, Payee, at its option and without further notice to Maker, may enforce and seek to recover any all sums due and payable hereunder by any remedy available to Payee hereunder, at law or in equity. All remedies shall be cumulative and concurrent and may be pursued singly, successively or concurrently at Payee's discretion and may be exercised as often as occasion therefore shall occur. The failure to exercise any right or remedy shall in no event be construed as a waiver or release of the same.

5. Waiver of Defenses. Maker waives presentment for payment, demand, notice of demand, notice of nonpayment or dishonor, protest and notice of protest of this Note, and all other notices in connection with the delivery, acceptance, performance, default, or enforcement of the payment of this Note.
