These Unaudited Condensed Consolidated Interim Financial Statements have been approved for issue by the Board of Directors on March 25, 2011.

Revisions to accounting estimates are recognised in the period of change and future periods, if the change affects both and, if material, their effects are disclosed in the notes to the financial statements.

In preparing the Unaudited Condensed Consolidated Interim Financial Statements, the significant judgements made by management in applying the Group s accounting policies and key sources of estimating uncertainties were the same as that were applied to the consolidated financial statements as at and for the year ended March 31, 2010.

4. Recent accounting pronouncements

A number of new standards, amendments to standards and interpretations are not yet effective for the period ended September 30, 2010, and have not been applied in preparing these consolidated financial statements:

Improvements to IFRS- In April 2009, the IASB issued *Improvements to IFRSs* a collection of amendments to twelve International Financial Reporting Standards as part of its program of annual improvements to its standards, which is intended to make necessary, but non-urgent, amendments to standards that will not be included as part of another major project. The latest amendments were included in exposure drafts of proposed amendments to IFRS published in October 2007, August 2008, and January 2009. The amendments resulting from this standard mainly have effective dates for annual periods beginning on or after January 1, 2010, although entities are permitted to adopt them earlier. In May 2010, the IASB issued *Improvements to IFRS 2010*, which comprises 11 amendments to 7 standards. Effective dates, early application and transitional requirements are addressed on a standard-by-standard basis. The majority of the amendments will be effective January 1, 2011. The Company is evaluating the impact, these amendments will have on the Group's consolidated financial statements.

In November 2009, the IASB issued *IFRS 9, Financial instruments*, to introduce certain new requirements for classifying and measuring financial assets. IFRS 9 divides all financial assets that are currently in the scope of IAS 39 into two classifications – those measured at amortized cost and those measured at fair value. The standard along with proposed expansion of IFRS 9 for classifying and measuring financial liabilities, de-recognition of financial instruments, impairment, and hedge accounting will be applicable from the year 2013, although entities are permitted to adopt earlier. The Company is evaluating the impact which this new standard will have on the Group's financial statements.

* VALS Developers Private Limited (VALS) is owned and controlled by Raju Vegesna Infotech & Industries Private Limited, a Company in which Mr. Raju Vegesna, the principal share holder and Chief Executive Officer of Sify is holding 35.99% equity in his personal capacity. During the year ended March 31, 2009, Sify entered into a memorandum of understanding with VALS Developers Private Limited to obtain land and building which is in the process of being constructed on a long term lease. The lease agreement, when final, is expected to have an initial non-cancellable term of 5 years, with a further option for Sify to renew or cancel the lease for two five year terms. In connection with this lease, Sify has paid a security deposit of Rs. 125,700 and advance rental of Rs. 157,125 to VALS. The security deposit will be refunded at the end of lease term and the advance rental would be adjusted over a period of 15 months from the commencement of the lease. Subsequently on October 30, 2010, the Board of Directors have proposed to cancel the MoU for lease arrangement and have decided to acquire the property which is under construction from the third party directly. The above deposits would be adjusted against the consideration payable for acquiring the property. To give effect to the above, the company has entered into a multiparty agreement with all the concerned parties and has paid Rs 400,000 as part consideration for the above purchase.

20. Legal proceedings

(a) The Group and certain of its officers and directors are named as defendants in a securities class action lawsuit filed in the United States District Court for the Southern District of New York. This action, which is captioned In re Satyam Infoway Ltd. Initial Public Offering Securities Litigation, also names several of the underwriters involved in Sify s initial public offering of American Depositary Shares as defendants. This class action is brought on behalf of a purported class of purchasers of Sify s ADSs from the time of Sify s Initial Public Offering (IPO) in October 1999 through December 2000. The central allegation in this action is that the underwriters in Sify s IPO solicited and received undisclosed commissions from, and entered into undisclosed arrangements with, certain investors who purchased Sify s ADSs in the IPO and the aftermarket. The complaint also alleges that Sify violated the United States Federal Securities laws by failing to disclose in the IPO prospectus that the underwriters had engaged in these allegedly undisclosed arrangements. More than 300 issuers have been named in similar lawsuits.

Table of Contents

In July 2002, an omnibus motion to dismiss all complaints against issuers and individual defendants affiliated with issuers was filed by the entire group of issuer defendants in these similar actions. In October 2002, the cases against the Company's executive officers who were named as defendants in this action were dismissed without prejudice. In February 2003, the court in this action issued its decision on defendants' omnibus motion to dismiss. This decision denied the motion to dismiss the Section 11 claim as to the Company and virtually all of the other issuer defendants. The decision also denied the motion to dismiss the Section 10(b) claim as to numerous issuer defendants, including the Company. On June 26, 2003, the plaintiffs in the consolidated IPO class action lawsuits currently pending against Sify and over 300 other issuers who went public between 1998 and 2000, announced a proposed settlement with Sify and the other issuer defendants. The proposed settlement provided that the insurers of all settling issuers would guarantee that the plaintiffs recover \$1 billion from non-settling defendants, including the investment banks who acted as underwriters in those offerings. In the event that the plaintiffs did not recover \$1 billion, the insurers for the settling issuers would make up the difference. This proposed settlement was terminated on June 25, 2007, following the ruling by the United States Court of Appeals for the Second Circuit on December 5, 2006, reversing the District Court's granting of class certification.

On August 14, 2007, the plaintiffs filed Amended Master Allegations. On September 27, 2007, the Plaintiffs filed a Motion for Class Certification. Defendants filed a Motion to dismiss the focus cases on November 9, 2007. On March 26, 2008, the Court ruled on the Motion to Dismiss, holding that the plaintiffs had adequately pleaded their Section 10(b) claims against the Issuer Defendants and the Underwriter Defendants in the focus cases. As to the Section 11 claim, the Court dismissed the claims brought by those plaintiffs who sold their securities for a price in excess of the initial offering price, on the grounds that they could not show cognizable damages, and by those who purchased outside the previously certified class period, on the grounds that those claims were time barred. This ruling, while not binding on the Company's case, provides guidance to all of the parties involved in this litigation. On October 2, 2008, plaintiffs requested that the class certification motion in the focus cases be withdrawn without prejudice. On October 10, 2008, the Court signed an order granting that request. On April 2, 2009, the parties lodged with the Court a motion for preliminary approval of a proposed settlement between all parties, including the Company and its former officers and directors. The proposed settlement provides the plaintiffs with \$586 million in recoveries from all defendants. Under the proposed settlement, the Issuer Defendants collectively would be responsible for \$100 million, which would be paid by the Issuers' insurers, on behalf of the Issuer Defendants and their officers and directors.

Accordingly, any direct financial impact of the proposed settlement is expected to be borne by the Company's insurers. On June 12, 2009, the Federal District Court granted preliminary approval of the proposed settlement. On October 6, 2009, the District Court issued an order granting final approval of the settlement. Subsequent to the final approval of Settlement agreement by the District court, there are several notices of appeal filed. Most were filed by the same parties that objected to the settlement in front of the District Court. These will likely be consolidated into a single appeal and briefing schedule will be provided shortly. Any direct financial impact of the preliminary approved settlement is expected to be borne by the Company's insurers. The Company believes, the maximum exposure under this settlement is approximately US\$338,983, an amount which the Company believes is fully recoverable from the Company's insurer.

(b) Proceedings before Department of Telecommunications**(i) License fees**

On October 12, 2009 (as later clarified by the DoT), the Department of Telecommunications (DOT) raised a demand on Sify Technologies for INR 14 million after correcting the arithmetical error in the Assessment letter.

On February 26, 2010 DOT raised a demand on Sify Communications (erstwhile subsidiary merged with Sify Technologies Limited) for INR 26 million.

The above demands were made by the DoT on the premise that all amounts of income (whether direct or indirect) including certain items like other income, interest on deposits, gain on foreign exchange fluctuation, profit on sale of assets & provision written back, that have got anything to do with telecom operations of the Company or arise in connection with the Telecom business of the Company, are to be considered as income for the purpose of calculation

of the license fee.

The Company has responded to the above demand notices stating that the above demands are not tenable as the demands were not in accordance with the Telecom Disputes Settlement & Appellate Tribunal (TDSAT) Order, in which Order the TDSAT has clarified on what all items of income are liable for calculation of license fee and what all items of income on which license fees are not liable to be paid. The TDSAT Order however has been challenged and is presently pending before the Supreme Court. Till such time the Supreme Court pronounces its final verdict on this case, the TDSAT Order continues to be in force and the Company currently continues to pay the license fee in accordance with the TDSAT Order. Sify believes that it has adequate legal defenses for these demands and the ultimate outcome of these actions will not have a material adverse effect on Sify.

(ii) In November 2009, the Company received a demand notice pertaining to the allocation of spectrum in the 3.3-3.4 GHz frequency, from DoT, demanding INR 345 million (US\$7.68 million) towards spectrum charges payable from the date of issue of allocation letter for 170 Base Stations. As per the notice, in case no payment is received within 15 days from the date of issue of the notice, then it would be presumed that the Company is no longer interested for the frequency assignments in 3.3-3.4 GHz band.

Table of Contents

Whilst the Company received allotment letter for Spectrum in *3.3 GHz band* (3303.5/3353.5 MHz) (Total 12 MHz) the Company had neither started any operations in this frequency band nor had applied for any Operating License from DOT/ Wireless Planning Commission (WPC). Sify believes that the obligation to make payment will arise only after obtaining the operating license from DOT/WPC. Sify also believes that it has adequate legal defences for these demands, as the Company has not yet obtained any operative license, hence such demand is not tenable. Nevertheless, the Company has as a commitment to hold and use the spectrum in the above band has paid INR 11.56 million towards 40 Base Stations and has surrendered the remaining 130 Base Stations. The Company believes that the ultimate outcome of these actions will not have a material adverse effect.

c) The Group is party to additional legal actions arising in the ordinary course of business. Based on the available information, as at September 30, 2010, Group believes that it has adequate legal defences for these actions and that the ultimate outcome of these actions will not have a material adverse effect. However in the event of adverse judgement in all these cases, the maximum financial exposure would be Rs 9,051 (March 31, 2010: Rs 9,051)

21. Liquidity

As of September 30, 2010 the current liabilities of the Group exceeded the current assets by Rs. 308,010. Based on the projected cash flow, available lines of credit and capital infusion by promoter group that was consummated in October 2010, the Company will have sufficient resources to meet capital expenditure needs and working capital requirements over the course of the next 12 months.

VALS is owned and controlled by Raju Vegesna Infotech & Industries Private Limited, in which Mr. Raju Vegesna, our principal share holder and Chief Executive Officer, is holding 35.99% equity in his personal capacity. During the year ended March 31, 2009, Sify entered into a Memorandum of Understanding (MoU) for long term lease with VALS Developers Private Limited to obtain land and building which is in the process of being constructed. The lease agreement, when final and executed, was expected to have an initial non-cancellable term of 5 years, with a further option for Sify to renew or cancel the lease for the incremental five year terms. In connection with this memorandum of understanding, Sify has paid a security deposit of Rs. 125,700 and advance rental of Rs. 157,125 to VALS. As per the terms of the MOU, the security deposit was to be refunded at the end of lease term and the advance rental would be adjusted over a period of 15 months from the commencement of the lease. Subsequently on October 30, 2010, the Board of Directors have cancelled the MoU for lease arrangement and has decided to acquire the property which is under construction from the third party directly. The above deposits would be adjusted against the consideration payable for acquiring the property. To give effect to the above, the company has entered into a multiparty agreement with all the concerned parties and has paid Rs 400,000 as part consideration for the above

purchase.

2. The Company has entered into a lease agreement with Ms Radhika Vegesna, Daughter of Mr Anand Raju Vegesna, Executive Director of the company, to lease the premises owned by her for a period of three years effective June 1, 2010 on a rent of Rs. 256 per month and payment of refundable security deposit of Rs. 2,558. This arrangement will be automatically renewed for a further period of two blocks of three years with all the terms remaining unchanged.

Table of Contents**23. Financial risk management**

The Group's financial risk management objectives and policies are consistent with that disclosed in the consolidated financial statements as of and for the year ended March 31, 2010.

Credit risk: Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Group's trade receivables, treasury operations and other activities that are in the nature of leases.

Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. Management considers that the demographics of the Group's customer base, including the default risk of the industry and country in which customers operate, has less of an influence on credit risk. The group is not exposed to concentration of credit risk to any one single customer since the services are provided to and products are sold to customers who are spread over a vast spectrum. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the credit worthiness of the customers to which the Company grants credit terms in the normal course of the business.

Cash and cash equivalents and other investments

In the area of treasury operations, the Group is presently exposed to counter-party risks relating to short term and medium term deposits placed with public-sector banks, and also to investments made in mutual funds.

Guarantees

The Group's policy is to provide financial guarantees only to subsidiaries.

The Chief Financial Officer is responsible for monitoring the counterparty credit risk, and has been vested with the authority to seek Board's approval to hedge such risks in case of need.

Liquidity risk: Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. Typically the Group ensures that it has sufficient cash on demand to meet expected operational expenses, servicing of financial obligations. In addition, the Group has concluded arrangements with well reputed Banks, and has unused lines of credit that could be drawn upon should there be a need. The Company is also in the process of infusing further capital from its promoter group for funding its requirements.

Market risk: Market risk is the risk of loss of future earnings or fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign exchange rates and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including foreign currency receivables and payables. The Group is exposed to market risk primarily related to foreign exchange rate risk (currency risk), interest rate risk and the market value of its investments. Thus the Group's exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currencies.

Currency risk: The Group's exposure in USD, Euro and other foreign currency denominated transactions gives rise to Exchange Rate fluctuation risk. Group's policy in this regard incorporates:

Forecasting inflows and outflows denominated in US\$ for a twelve-month period

Estimating the net-exposure in foreign currency, in terms of timing and amount

Determining the extent to which exposure should be protected through one or more risk-mitigating instruments to maintain the permissible limits of uncovered exposures.

Carrying out a variance analysis between estimate and actual on an ongoing basis, and taking stop-loss action when the adverse movements breaches the 5% barrier of deviation, subject to review by Audit Committee.

Table of Contents**24. Subsequent event**

On August 4, 2010, the Board of Directors of the company approved the issuance, in a private placement, of upto an aggregate of 125,000,000 of the company's equity shares, par value Rs. 10 per share (Equity shares), for an aggregate purchase price of Rs 400 crores (USD 86 million), to a group of investors affiliated with the company's promoter group, including entities affiliated with Mr Raju Vegesna, the company's Chief Executive Officer and Managing Director and Mr Ananda Raju Vegesna, Executive Director and brother of Mr Raju Vegesna (the Offering). The company's shareholders approved the terms of the Offering at the Company's Annual General Meeting held on September 27, 2010.

Subsequently, on October 22 2010, the company entered into a Subscription Agreement with Mr Ananda Raju Vegesna, acting as representative (the Representative) of the acquirers in connection with the offering. The company issued 125,000,000 equity shares to the Representative on October 30, 2010. Accordingly, a sum of Rs 0.50 per share was received on October 30, 2010 and a further sum of Rs 2.00 per share was received on allotment of these shares. The remaining amount of the purchase price will be called up at such time as determined by the company. Until the full purchase price is paid by the purchasers, the company retains a lien on the equity shares purchased in connection with the Offering.

As a result of the consummation of the Offering, Mr Raju Vegesna and Mr Ananda Raju Vegesna together beneficially hold approximately 86.4% of the outstanding Equity Shares of the company.

Revenue recognition from construction contract

Contract revenue includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments, to the extent that it is probable that they will result in revenue and can be measured reliably. As soon as the outcome of a construction contract can be estimated reliably, contract revenue is recognised in profit or loss in proportion to the stage of completion of the contract. Contract expenses are recognised as incurred unless they create an asset related to future contract activity.

The stage of completion is assessed by reference to the cost incurred till date to the total estimated costs. When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable. An expected loss on a contract is recognised immediately in profit or loss.

As of September 30, 2010 our current liabilities exceeded current assets by Rs. 334,038 (\$7,437). Based on the projected cash flow, including cash from operations, available lines of credit, and capital infusion from promoter group, we believe we will have sufficient resources to meet capital expenditure needs and working capital requirements over the course of the next 12 months.

We intend to continue to focus on the reduction of our cash burn. Based upon our present business and funding plans, we believe that our cash and cash equivalents were negative to the extent of Rs. 395 million (\$8.79 million) as of September 30, 2010, including bank overdraft of Rs. 1,140 million (\$25.37 million).

Our principal sources of liquidity are cash flow that we generate from our operations and borrowings from banks. Our external sources of credit include facilities sanctioned to us by Indian banks. We have working capital facilities in the form of cash credit and overdraft facilities of Rs. 1,315 million (\$29.27 million) and the same has been almost utilized fully as on September 30, 2010. Further, we were provided non-funded limits of Rs. 1,350 million (\$30.05 million) (primarily in the form of bank guarantees and letters of credit) out of which Rs. 1,250 million (\$27.83 million) remained unutilized as of September 30, 2010. We believe that our cash and cash equivalents, short-term investments, working capital lines and the proceeds of a private placement to our promoter group are sufficient to meet our present capital expenditure and working capital requirements for the next 12 months. The private placement, consummated in October 2010, will provide up to Rs. 400 crores (\$86 million) from the promoter group, which funds can be drawn down as needed by the Company. However, our ongoing working capital requirements are significantly affected by the profitability of our operations and we continue to periodically evaluate existing and new sources of liquidity and financing.

We are taking steps to improve the cash position to meet our currently known requirements at least over the next twelve months. In the light of the highly dynamic nature of our business, however, we cannot assure you that our capital requirements and sources will not change significantly in the future

Under Indian Tax law, business loss carry forwards from a particular year may be used to offset taxable income over the next eight years and unabsorbed depreciation for an infinite number of years. The statutory corporate income tax rate and the surcharge thereon are subject to change in line with the changes announced in the Union Budget each year. For fiscal year 2010, the corporate Income Tax rate is 30%, subject to a surcharge of 10% (if the Company makes taxable profits greater than Rs. 10 million) and education cess of 3%, resulting in an effective tax rate of 30.9% for companies who have taxable profits less than Rs. 10 million and 33.99% for companies who have taxable profits greater than Rs. 10 million. For fiscal year 2011, the corporate income tax rate is 30%, subject to a surcharge of 7.5% (if the Company makes taxable profits greater than Rs. 10 million) and education cess of 3%, resulting in an effective tax rate of 30.9% for companies who have taxable profits less than Rs. 10 million and 33.22% for companies who have taxable profits greater than Rs. 10 million. Further in India, companies are subject to a Minimum Alternate Tax (MAT) of 18% on the book profits of the Company. Certain changes in the income tax rates were introduced in the union budget 2011-12 of the Government of India. The key changes included the reduction of the surcharge to 5% and the increase of MAT to 18.5% of book profits. We cannot assure you that the current income tax rate will remain unchanged in the future. We also cannot assure you that the surcharge will be in effect for a limited period of time or that additional surcharges will not be levied by the Government of India. Currently, dividend income is exempt from tax for shareholders. Domestic companies are liable to pay dividend distribution tax at the rate of 15%.

During the year 2008-09, Sify entered into a memorandum of understanding with VALS to obtain land and building which is in the process of being constructed on a long term lease. Item 3. Quantitative And Qualitative Disclosures About Market Risk**General**

Market risk is the risk of loss of future earnings, to fair values or to future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments, foreign currency receivables, payables and debt. Our exposure to market risk is a function of our investment and borrowing activities and our revenue generating activities in foreign currency. The objective of market risk management is to avoid excessive exposure of our earnings and equity to loss.

Please see Note 38 to the financial statements included in our Annual Report on Form 20-F for the year ended March 31, 2010.

Risk Management Procedures

We manage market risk through a corporate treasury department, which evaluates and exercises independent control over the entire process of market risk management. Our corporate treasury department recommends risk management objectives and policies which are approved by senior management and our Audit Committee. The activities of this department include management of cash resources, implementing hedging strategies for foreign currency exposures, borrowing strategies, and ensuring compliance with market risk limits and policies on a daily basis.

Recent Accounting Pronouncements

A number of new standards, amendments to standards and interpretations are not yet effective for the period ended September 30, 2010, and have not been applied in preparing these consolidated financial statements:

Improvements to IFRS In April 2009, the IASB issued *Improvements to IFRSs* a collection of amendments to twelve International Financial Reporting Standards as part of its program of annual improvements to its standards, which is intended to make necessary, but non-urgent, amendments to standards that will not be included as part of another major project. The latest amendments were included in exposure drafts of proposed amendments to IFRS published in October 2007, August 2008, and January 2009. The amendments resulting from this standard mainly have effective dates for annual periods beginning on or after January 1, 2010, although entities are permitted to adopt them earlier. In May 2010, the IASB issued *Improvements to IFRS 2010*, which comprises 11 amendments to 7 standards. Effective dates, early application and transitional requirements are addressed on a standard-by-standard basis. The majority of the amendments will be effective January 1, 2011. The Company is evaluating the impact, these amendments will have on the Group's consolidated financial statements.

In November 2009, the IASB issued *IFRS 9, Financial instruments*, to introduce certain new requirements for classifying and measuring financial assets. IFRS 9 divides all financial assets that are currently in the scope of IAS 39 into two classifications – those measured at amortized cost and those measured at fair value. The standard along with proposed expansion of IFRS 9 for classifying and measuring financial liabilities,

de-recognition of financial instruments, impairment, and hedge accounting will be applicable from the year 2013, although entities are permitted to adopt earlier. The Company is evaluating the impact which this new standard will have on the Group's financial statements.
