HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010

NOTE 1 BASIS OF PRESENTATION

Hanmi Financial Corporation (Hanmi Financial, we or us) is a Delaware corporation and is subject to the Bank Holding Company Act of 1956, as amended. Our primary subsidiary is Hanmi Bank (the Bank), a California state chartered bank. Our other subsidiaries are Chun-Ha Insurance Services, Inc. (Chun-Ha) and All World Insurance Services, Inc. (All World).

In the opinion of management, the accompanying unaudited consolidated financial statements of Hanmi Financial Corporation and Subsidiaries reflect all adjustments of a normal and recurring nature that are necessary for a fair presentation of the results for the interim period ended June 30, 2011, but are not necessarily indicative of the results that will be reported for the entire year. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted. In the opinion of management, the aforementioned unaudited consolidated financial statements are in conformity with GAAP. Such interim financial statements have been prepared in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC). The interim information should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended December 31, 2010 (the 2010 Annual Report on Form 10-K).

The preparation of interim consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Descriptions of our significant accounting policies are included in *Note 2 Summary of Significant Accounting Policies* in our 2010 Annual Report on Form 10-K.

Certain reclassifications were made to the prior period s presentation to conform to the current period s presentation.

NOTE 2 REGULATORY MATTERS

On November 2, 2009, the members of the Board of Directors of the Bank consented to the issuance of a Final Order (Final Order) with the California Department of Financial Institutions (the DFI). On the same date, Hanmi Financial and the Bank entered into a Written Agreement (the Agreement) with the Federal Reserve Bank of San Francisco (the FRB). The Final Order and the Agreement contain a list of strict requirements ranging from a capital directive to developing a contingency funding plan.

While Hanmi Financial intends to take such actions as may be necessary to enable Hanmi Financial and the Bank to comply with the requirements of the Final Order and the Agreement, there can be no assurance that Hanmi Financial or the Bank will be able to comply fully with the provisions of the Final Order and the Agreement, or that compliance with the Final Order and the Agreement will not have material and adverse effects on the operations and financial condition of Hanmi Financial and the Bank. Any material failure to comply with the provisions of the Final Order and the Agreement could result in further enforcement actions by both DFI and FRB, or the possible placement of the Bank into conservatorship or receivership.

Final Order and Written Agreement

The Final Order and the Agreement contain substantially similar provisions, and require the Board of Directors of the Bank to prepare and submit written plans to the DFI and the FRB that address the following items:

- (i) strengthening Board oversight of the management and operation of the Bank;
- (ii) strengthening credit risk management practices;
- (iii) improving credit administration policies and procedures;
- (iv) improving the Bank s position with respect to problem assets;
- (v) maintaining adequate reserves for loan and lease losses;
- (vi)

Table of Contents

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 2 REGULATORY MATTERS (Continued)

improving the capital position of the Bank and, with respect to the Agreement, of Hanmi Financial; (vii) improving the Bank's earnings through a strategic plan and a budget for 2010; and (viii) improving the Bank's liquidity position, funds management practices, and contingency funding plan. In addition, the Final Order and the Agreement place restrictions on the Bank's lending to borrowers who have adversely classified loans with the Bank, and require the Bank to charge off or collect certain problem loans and to review and revise its methodology for calculating allowance for loan and lease losses consistent with relevant supervisory guidance. The Bank is also prohibited from paying dividends, incurring, increasing or guaranteeing any debt, or making certain changes to its business without prior approval from the DFI, and Hanmi Financial and the Bank must obtain prior approval from the FRB prior to declaring and paying dividends.

Under the Final Order, the Bank is required to increase its capital and maintain certain regulatory capital ratios prior to certain dates as follows: 1) by July 31, 2010, the Bank was required to increase its contributed equity capital by not less than an additional \$100 million, and maintain a ratio of tangible stockholders' equity to total tangible assets of at least 9.0 percent, and 2) by December 31, 2010, and thereafter during the life of the Final Order, the Bank will be required to maintain a ratio of tangible stockholders' equity to total tangible assets of not less than 9.5 percent.

If the Bank is not able to maintain the capital ratios identified in the Final Order, it must notify the DFI, and Hanmi Financial and the Bank are required to notify the FRB if their respective capital ratios fall below those set forth in the capital plan approved by the FRB. On July 27, 2010, we completed a registered rights and best efforts offering in which we raised \$116.8 million in net proceeds. As a result, we satisfied the \$100 million capital contribution requirement set forth in the Final Order. While the Bank's tangible stockholders' equity to total tangible assets ratio was 8.59% at December 31, 2010, the ratio increased to 10.33 percent at June 30, 2011. Therefore, the Bank is currently in compliance with the tangible capital ratio requirement.

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 2 REGULATORY MATTERS (Continued)**Risk-Based Capital**

Federal bank regulatory agencies require a minimum ratio of qualifying total capital to risk-weighted assets of 8.0 percent and a minimum ratio of Tier 1 capital to risk-weighted assets of 4.0 percent. In addition to the risk-based guidelines, the regulators require banking organizations to maintain a minimum ratio of Tier 1 capital to average total assets, referred to as the leverage ratio, of 4.0 percent. For a bank rated in the highest of the five categories used by the regulators to rate banks, the minimum leverage ratio is 3.0 percent. In addition to these uniform risk-based capital guidelines that apply across the industry, the regulators have the discretion to set individual minimum capital requirements for specific institutions at rates significantly above the minimum guidelines and ratios.

As of June 30, 2011, Hanmi Financial's Tier 1 capital (stockholders' equity plus qualified junior subordinated debentures less intangible assets) was \$257.9 million. This represented an increase of \$25.2 million, or 10.8 percent, over Tier 1 capital of \$232.7 million as of December 31, 2010. The capital ratios of Hanmi Financial and the Bank were as follows as of June 30, 2011:

	Actual		Minimum		To be Categorized as	
	Amount	Ratio	Amount	Ratio	Well Capitalized under Prompt Corrective Action Provision	Ratio
<u>June 30, 2011</u>

NOTE 3 FAIR VALUE MEASUREMENTS

Fair Value Option and Fair Value Measurements

We determine the fair value of our assets and liabilities in accordance with ASC 820, which defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. The fair value of an asset or liability is determined based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for market activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact for the asset or liability.

In determining fair value, we use various methods including market and income approaches. Based on these approaches, we utilize certain assumptions that market participants would use in pricing the asset or liability. These inputs can be readily observable, market corroborated, or generally unobservable inputs. We utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Based on the observability of the inputs used in the valuation techniques, we classify and disclose assets and liabilities based on the fair value hierarchy presented below. The hierarchy is based on the quality and reliability of the information used to determine fair values. The hierarchy gives the highest priority to quoted prices available in active markets and the lowest priority to data lacking transparency.

In January 2010, the FASB issued ASU No. 2010-6, *Fair Value Measurements and Disclosures (Topic 820) Improving Disclosures about Fair Value Measurements*. This requires (i) fair value disclosures by each class of assets and liabilities (generally a subset within a line item as presented in the statement of financial position) rather than major category, (ii) for items measured at fair value on a recurring basis, the amounts of significant transfers between Levels 1 and 2, and transfers into and out of Level 3, and the reasons for those transfers, including separate discussion related to the transfers into each level apart from transfers out of each level, and (iii) gross presentation of the amounts of purchases, sales, issuances, and settlements in the Level 3 recurring measurement reconciliation. Additionally, the ASU clarifies that a description of the valuation techniques(s) and inputs used to measure fair values is required for both recurring and nonrecurring fair value measurements. In addition, if a valuation technique has changed, entities should disclose that change and the reason for the change. Disclosures other than the gross presentation changes in the Level 3 reconciliation were effective for the first reporting period beginning after December 31, 2009. The requirement to present the Level 3 activity of purchases, sales, issuances, and settlements on a gross basis was effective for fiscal years beginning after December 15, 2010. The adoption of FASB ASU 2010-06 did not have a material effect on our financial condition or result of operations.

We used the following methods and significant assumptions to estimate fair value:

Investment Securities Available for Sale The fair values of investment securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities. The fair values of investment securities are determined by reference to the average of at least two quoted market prices obtained from independent external brokers or independent external pricing service providers who have experience in valuing these securities. In obtaining such valuation information from third parties, we have evaluated the methodologies used to develop the resulting fair values. We perform a monthly analysis on the broker quotes received from third parties to ensure that the prices represent a reasonable estimate of the fair value. The procedures include, but are not limited to, initial and on-going review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes.

Table of Contents

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 3 FAIR VALUE MEASUREMENTS (Continued)

Level 1 investment securities include U.S. government and agency debentures and equity securities that are traded on an active exchange or by dealers or brokers in active over-the-counter markets. The fair value of these securities is determined by quoted prices on an active exchange or over-the-counter market. Level 2 investment securities primarily include mortgage-backed securities, municipal bonds, collateralized mortgage obligations, and asset-backed securities. In determining the fair value of the securities categorized as Level 2, we obtain reports from nationally recognized broker-dealers detailing the fair value of each investment security we hold as of each reporting date. The broker-dealers use observable market information to value our fixed income securities, with the primary sources being nationally recognized pricing services. The fair value of the municipal securities is based on a proprietary model maintained by the broker-dealer. We review the market prices provided by the broker-dealer for our securities for reasonableness based on our understanding of the marketplace. We also consider any credit issues related to the bonds. As we have not made any adjustments to the market quotes provided to us and they are based on observable market data, they have been categorized as Level 2 within the fair value hierarchy.

Securities classified as Level 3 investment securities are instruments that are not traded in the market. As such, no observable market data for the instrument is available. This necessitates the use of significant unobservable inputs into our proprietary valuation model. As of June 30, 2011 and December 31, 2010, we had no level 3 investment securities.

SBA Loans Held for Sale All Small Business Administration (SBA) loans originate for sale. Loans held for sale are carried at the lower of cost or fair value. As of June 30, 2011 and December 31, 2010, we had \$24.3 million and \$10.0 million of SBA loans held for sale, respectively. Management obtains quotes, bids or pricing indication sheets on all or part of these loans directly from the purchasing financial institutions. Premiums received or to be received on the quotes, bids or pricing indication sheets are indicative of the fact that cost is lower than fair value. At June 30, 2011 and December 31, 2010, the entire balance of the loans held for sale was recorded at its cost on a nonrecurring basis with Level 2 inputs.

Non-performing Loans Held for Sale We reclassify certain non-performing loans when we make the decision to sell those loans. The fair value of non-performing loans held for sale is generally based upon the quotes, bids or sales contract prices from buyers. Non-performing loans held for sale are recorded at estimated fair value less anticipated liquidation cost. As of June 30, 2011 and December 31, 2010, we had \$19.8 million and \$26.6 million of non-performing loans held for sale, respectively, and measured them on a nonrecurring basis with Level 3 inputs.

Impaired Loans FASB ASC 820 applies to loans measured for impairment using the practical expedients permitted by FASB ASC 310, *Receivables*, including impaired loans measured at an observable market price (if available), or at the fair value of the loan's collateral (if the loan is collateral dependent). Fair value of the loan's collateral, when the loan is dependent on collateral, is determined by appraisals or independent valuation, which is then adjusted for the cost related to liquidation of the collateral. These loans are classified as Level 3 and subject to non-recurring fair value adjustments.

Other Real Estate Owned Other real estate owned is measured at fair value less selling costs. Fair value was determined based on third-party appraisals of fair value in an orderly sale. Selling costs were based on standard market factors. We classify other real estate owned, which is subject to non-recurring fair value adjustments, as Level 3.

Servicing Assets and Servicing Liabilities The fair values of servicing assets and servicing liabilities are based on a valuation model that calculates the present value of estimated net future cash flows related to contractually specified servicing fees. The valuation model incorporates assumptions that market participants would use in estimating future cash flows. The valuation model inputs and results are compared to widely available published industry data for reasonableness. Since fair value measurements of servicing assets and servicing liabilities use significant unobservable inputs, we classify them as Level 3.

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 3 FAIR VALUE MEASUREMENTS (Continued)

Other Intangible Assets Other intangible assets consist of a core deposit intangible and acquired intangible assets arising from acquisitions, including non-compete agreements, trade names, carrier relationships and client/insured relationships. The valuation of other intangible assets is based on information and assumptions available to us at the time of acquisition, using income and market approaches to determine fair value. We test our other intangible assets annually for impairment, or when indications of potential impairment exist. Since fair value measurements of other intangible assets use significant unobservable inputs, we classify them, which are subject to non-recurring fair value adjustments, as Level 3.

Stock Warrants The fair value of stock warrants was determined by the Black-Scholes option pricing model. The expected stock volatility is based on historical volatility of our common stock over the expected term of the warrants. The expected life assumption is commensurate with the contract term. The dividend yield of zero is determined by the fact that we have no present intention to pay cash dividends. The risk free rate used for the warrant is equal to the zero coupon rate in effect at the time of the grant. As such, we classify them, which are subject to non-recurring fair value adjustments, as Level 3.

Fair Value Measurement

FASB ASC 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC 820 also establishes a three-level fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The three levels of inputs that may be used to measure fair value are defined as follows:

- Level 1 Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

- Level 2 Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

- Level 3 Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Fair value is used on a recurring basis for certain assets and liabilities in which fair value is the primary basis of accounting. Additionally, fair value is used on a non-recurring basis to evaluate assets or liabilities for impairment or for disclosure purposes in accordance with ASC 825, Financial Instruments.

We record investment securities available for sale at fair value on a recurring basis. Certain other assets, such as loans held for sale, mortgage servicing assets, impaired loans, other real estate owned, and other intangible assets, are recorded at fair value on a non-recurring basis. Non-recurring fair value measurements typically involve assets that are periodically evaluated for impairment and for which any impairment is recorded in the period in which the re-measurement is performed.

	Beginning Balance as of December 31, 2010	Purchases, Issuances and Settlements	Realized and Unrealized Gains or Losses in Earnings	Realized and Unrealized Gains or Losses in Comprehensive Income	Transfers In and/or Out of Level 3	Ending Balance as of June 30, 2011
	(In Thousands)					
LIABILITIES:						
Stock Warrants ⁽¹⁾	\$ 1,600	\$	\$ 311	\$	\$	\$ 1,289

⁽¹⁾ Reflects warrants for our common stock issued to Cappello Capital Corp. in connection with services it provided to us as a placement agent in connection with our best efforts public offering and as our financial adviser in connection with our completed rights offering. The warrants were immediately exercisable when issued at an exercise price of \$1.20 per share and expire on October 14, 2015. See Note 8 Stockholders' Equity for more details.

Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis

For the three and six months ended June 30, 2011 and 2010, assets and liabilities measured at fair value on a non-recurring basis are as follows:

	<i>Level 1</i>	<i>Level 2</i> Significant Observable Inputs With No Active Market With Identical	<i>Level 3</i> Significant Unobservable Inputs	Losses During The Three Months Ended June 30, 2011 and 2010	Losses During The Six Months Ended June 30, 2011 and 2010
	Quoted Prices in Active Markets for Identical Assets	Characteristics			
June 30, 2011					
ASSETS:					
Non-Performing Loans Held for Sale	\$	\$	\$ 18,683 ⁽¹⁾	\$ 682	\$ 9,462
Impaired Loans	\$	\$	\$ 178,090 ⁽²⁾	\$ 14,314	\$ 23,940
Other Real Estate Owned	\$	\$	\$ 1,298 ⁽³⁾	\$ 203	\$ 770
June 30, 2010					
ASSETS:					
Non-Performing Loans Held for Sale	\$	\$	\$ 23,663 ⁽⁴⁾	\$ 5,337	\$ 7,053
Impaired Loans	\$	\$	\$ 168,184 ⁽⁵⁾	\$ 19,857	\$ 48,696
Other Real Estate Owned	\$	\$	\$ 22,499 ⁽⁶⁾	\$ 966	\$ 5,912

(1) Includes commercial property loans of \$418,000, commercial term loans of \$12.0 million, SBA loans of \$6.0 million and residential property loans of \$266,000.

(2) Includes real estate loans of \$73.7 million, commercial and industrial loans of \$103.7 million, and consumer loans of \$732,000.

(3) Includes properties from the foreclosure of commercial property loans of \$308,000 and SBA loans of \$990,000.

(4) Includes commercial term loans of \$8.8 million and commercial property loans of \$14.9 million.

(5) Includes real estate loans of \$43.7 million, commercial and industrial loans of \$124.1 million, and consumer loans of \$388,000.

(6) Includes properties from the foreclosure of real estate loans of \$19.4 million, and commercial and industrial loans of \$3.1 million.

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 3 FAIR VALUE MEASUREMENTS (Continued)

FASB ASC 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring basis or non-recurring basis are discussed above.

The estimated fair value of financial instruments has been determined by using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret market data to develop estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that we could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Interest-Bearing Deposits	1,797,563	1,807,148	1,919,906	1,927,314
Borrowings	86,919	87,017	237,626	233,077
Accrued Interest Payable	14,226	14,226	15,966	15,966
Off-Balance Sheet Items:				
Commitments to Extend Credit	167,018	100	178,424	130
Standby Letters of Credit	14,771	36	15,226	50

The methods and assumptions used to estimate the fair value of each class of financial instruments for which it was practicable to estimate that value are explained below:

Cash and Cash Equivalents For short-term instruments, including cash and due from banks, and interest bearing deposits with banks, the carrying amount is a reasonable estimate of fair value.

Investment Securities Fair values for investment securities are based on quoted market prices when available or through the use of market prices obtained from independent securities brokers or dealers, when market quotes are not readily accessible or available.

Loans Receivable, Net of Allowance for Loan Losses Fair values for loans receivable are estimated based on the discounted cash flow approach. The discount rate is derived from the associated yield curve plus spreads, and reflects the offering rates offered by the Bank for loans with similar financial characteristics. Yield curves are constructed by product type using the Bank's loan pricing model for like-quality credits. The discount rates used in the Bank's model represent the rates the Bank would offer to current borrowers for like-quality credits. These rates could be different from what other financial institutions could offer for these loans. No adjustments have been made for changes in credit within the loan portfolio. It is our opinion that the allowance for loan losses relating to performing and nonperforming loans results in a fair valuation of such loans. Additionally, the fair value of our loans may differ significantly from the values that would have been used had a ready market existed for such loans, and may differ materially from the values that we may ultimately realize.

Loans Held for Sale For loans held for sale, the carrying value approximates fair value.

Accrued Interest Receivable The carrying amount of accrued interest receivable approximates its fair value.

Investment in Federal Home Loan Bank and Federal Reserve Bank Stock The carrying amounts approximate fair value as the stock may be resold to the issuer at carrying value.

Noninterest-Bearing Deposits The fair value of noninterest-bearing deposits is equal to the amount payable on demand at the reporting date.

Table of Contents

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 3 FAIR VALUE MEASUREMENTS (Continued)

Interest-Bearing Deposits The fair value of interest-bearing deposits, such as savings accounts, money market checking, and certificates of deposit, is estimated based on the discounted value of contractual cash flows. The cash flows for non-maturity deposits, including savings accounts and money market checking, are estimated based on their historical decaying experiences. The discount rates used for fair valuation are based on interest rates currently being offered by the Bank on comparable deposits as to amount and term.

Borrowings Borrowings consist of Federal Home Loan Bank (FHLB) advances, junior subordinated debentures and other borrowings. Discounted cash flows are used to value borrowings.

Accrued Interest Payable The carrying amount of accrued interest payable approximates its fair value.

Stock Warrants The fair value of stock warrants is determined by the Black-Scholes option pricing model. The expected stock volatility is based on historical volatility of our common stock over expected term of the warrants. The expected life assumption is commensurate with the contract term. The dividend yield of zero is determined by the fact that we have no present intention to pay cash dividends. The risk free rate used for the warrant is equal to the zero coupon rate in effect at the time of the grant.

Commitments to Extend Credit and Standby Letters of Credit The fair values of commitments to extend credit and standby letters of credit are based upon the difference between the current value of similar loans and the price at which the Bank has committed to make the loans.

NOTE 4 INVESTMENT SECURITIES

The following is a summary of investment securities held to maturity:

	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Loss	Estimated Fair Value

	\$ 415,491	\$ 3,261	\$ 5,634	\$ 413,118

⁽¹⁾ Collateralized by residential mortgages and guaranteed by U.S. government sponsored entities.

⁽²⁾ Collateralized debentures of small business investment companies and state and local development companies, and guaranteed by SBA.

⁽³⁾ Balances presented for amortized cost, representing two equity securities, were net of an OTTI charge of \$790,000, which was related to a credit loss, as of December 31, 2010. We recorded an OTTI charge of \$790,000 to write down the value of one equity investment to its fair value during the year ended December 31, 2010.

The amortized cost and estimated fair value of investment securities at June 30, 2011, by contractual maturity, are shown below. Although collateralized mortgage obligations, mortgage-backed securities and asset-backed securities have contractual maturities through 2041, expected maturities may differ from contractual maturities because

borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

All individual securities that have been in a continuous unrealized loss position for 12 months or longer as of June 30, 2011 and December 31, 2010 had investment grade ratings upon purchase. The issuers of these securities have not established any cause for default on these securities and the various rating agencies have reaffirmed these securities long-term investment grade status as of June 30, 2011. These securities have fluctuated in value since their purchase dates as market interest rates have fluctuated.

The unrealized losses on investments in U.S. agencies securities were caused by changes in market interest rates or the widening of market spreads subsequent to the purchase of these securities. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than par. Because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

The unrealized losses on obligations of political subdivisions were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities. Management monitors published credit ratings of these securities and no adverse ratings changes have occurred since the date of purchase of obligations of political subdivisions which are in an unrealized loss position as of June 30, 2011. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

Of the residential mortgage-backed securities and collateralized mortgage obligations portfolio in an unrealized loss position at June 30, 2011, all of them are issued and guaranteed by U.S. government sponsored entities.

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 4 INVESTMENT SECURITIES (Continued)

The unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities, and not by concerns regarding the underlying credit of the issuers or the underlying collateral. It is expected that these securities will not be settled at a price less than the amortized cost of each investment. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

FASB ASC 320 requires other-than-temporarily impaired investment securities to be written down when fair value is below amortized cost in circumstances where: (1) an entity has the intent to sell a security; (2) it is more likely than not that an entity will be required to sell the security before recovery of its amortized cost basis; or (3) an entity does not expect to recover the entire amortized cost basis of the security. If an entity intends to sell a security or if it is more likely than not the entity will be required to sell the security before recovery, an OTTI write-down is recognized in earnings equal to the entire difference between the security's amortized cost basis and its fair value. If an entity does not intend to sell the security or it is not more likely than not that it will be required to sell the security before recovery, the OTTI write-down is separated into an amount representing credit loss, which is recognized in earnings, and the amount related to all other factors, which is recognized in other comprehensive income. We do not intend to sell these securities and it is not more likely than not that we will be required to sell the investments before the recovery of its amortized cost bases. Therefore, in management's opinion, all securities that have been in a continuous unrealized loss position for the past 12 months or longer as of June 30, 2011 and December 31, 2010 are not other-than-temporarily impaired, and therefore, no impairment charges as of June 30, 2011 and December 31, 2010 are warranted.

Realized gains and losses on sales of investment securities, proceeds from sales of investment securities and the tax expense on sales of investment securities were as follows for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2011	2010	2011	2010
	<i>(In Thousands)</i>			
Gross Realized Gains on Sales of Investment Securities	\$ 969	\$	\$ 969	\$ 210
Gross Realized Losses on Sales of Investment Securities	(1,039)		(1,039)	(105)
Net Realized Gains on Sales of Investment Securities	\$ (70)	\$	\$ (70)	\$ 105
Proceeds from Sales of Investment Securities	\$ 157,777	\$	\$ 157,777	\$ 3,252
Tax Expense on Sales of Investment Securities	\$	\$	\$	\$ 45

For the three months ended June 30, 2011, \$6.2 million (\$3.6 million, net of income taxes) of net unrealized gains arose during the period and was included in comprehensive income, and we recognized a \$70,000 loss in earnings resulting from the sale of investment securities that had previously recorded net unrealized losses of \$1.3 million in comprehensive income. For the three months ended June 30, 2010, \$1.9 million (\$1.1 million, net of income taxes) of net unrealized gains arose during the period and was included in comprehensive income. For the six months ended June 30, 2011, \$6.3 million (\$3.6 million, net of income taxes) of net unrealized gains arose during the period and was included in comprehensive income, and we recognized a \$70,000 loss in earnings resulting from the sale of investment securities that had previously recorded net unrealized losses of \$1.5 million in comprehensive income. For the six months ended June 30, 2010, \$2.9 million (\$1.7 million, net of income taxes) of net unrealized gains arose

during the period and was included in comprehensive income, and we recognized a \$105,000 gain in earnings resulting from the sale of investment securities that had previously recorded net unrealized gains of \$99,000 in comprehensive income.

Investment securities available for sale with carrying values of \$66.2 million and \$118.0 million as of June 30, 2011 and December 31, 2010, respectively, were pledged to secure FHLB advances, public deposits and for other purposes as required or permitted by law.

THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 5 LOANS

The Board of Directors and management review and approve the Bank's loan policy and procedures on a regular basis to reflect issues such as regulatory and organizational structure change, strategic planning revisions, concentrations of credit, loan delinquencies and non-performing loans, problem loans, and policy adjustments.

Real estate loans are subject to loans secured by liens or interest in real estate, to provide purchase, construction, and refinance on real estate properties. Commercial and industrial loans consist of commercial term loans, commercial lines of credit, and SBA loans. Consumer loans consist of auto loans, credit cards, personal loans, and home equity lines of credit. We maintain management loan review and monitoring departments that review and monitor pass graded loans as well as problem loans to prevent further deterioration.

Concentrations of Credit: The majority of the Bank's loan portfolio consists of commercial real estate loans and commercial and industrial loans. The Bank has been diversifying and monitoring commercial real estate loans based on property types, tightening underwriting standards, and portfolio liquidity and management, and has not exceeded certain specified limits set forth in the Bank's loan policy. Most of the Bank's lending activity occurs within Southern California.

Loans Receivable

Loans receivable consisted of the following as of the dates indicated:

	June 30, 2011	December 31, 2010
	<i>(In Thousands)</i>	
Real Estate Loans:		
Commercial Property	\$ 688,842	\$ 729,222

Credit Quality Indicators

As part of the on-going monitoring of the credit quality of our loan portfolio, we utilize an internal loan grading system to identify credit risk and assign an appropriate grade (from 0 to 8) for each and every loan in our loan portfolio.

Pass-grade (0 to 4) loans are reviewed for reclassification on an annual basis, while criticized (5) and classified (6 and 7) loans are reviewed semi-annually. Additional adjustments are made when determined to be necessary. The loan grade definitions are as follows:

Pass: These loans, risk rated 0 to 4, are in compliance in all respects with the Bank's credit policy and regulatory requirements, and do not exhibit any potential for defined weaknesses as defined under Special Mention (5),

Substandard (6) or Doubtful (7). This is the strongest level of the Bank's loan grading system. It incorporates all performing loans with no credit weaknesses. It includes cash and stock/security secured loans or other investment grade loans. Following are sub categories within the Pass grade:

Pass 0: Secured in full by cash or cash equivalents.

Pass 1: A very strong, well-structured credit relationship with an established borrower.

THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 5 LOANS (Continued)

The relationship should be supported by audited financial statements indicating cash flow, well in excess of debt service requirements, excellent liquidity, and very strong capital.

Pass 2: These loans require a well-structured credit that may not be as seasoned or as high quality as grade 1. Capital, liquidity, debt service capacity, and collateral coverage must all be well above average. This category includes individuals with substantial net worth supported by liquid assets and strong income.

Pass 3: Loans or commitments to borrowers exhibiting a fully acceptable credit risk. These borrowers should have sound balance sheet proportions and significant cash flow coverage, although they may be somewhat more leveraged and exhibit greater fluctuations in earning and financing but generally would be considered very attractive to the Bank as a borrower. The borrower has historically demonstrated the ability to manage economic adversity. Real estate and asset-based loans which are designated this grade must have characteristics that place them well above the minimum underwriting requirements. Asset-based borrowers assigned this grade must exhibit extremely favorable leverage and cash flow characteristics and consistently demonstrate a high level of unused borrowing capacity

Pass 4: Loans or commitments to borrowers exhibiting either somewhat weaker balance sheet proportions or positive, but inconsistent, cash flow coverage. These borrowers may exhibit somewhat greater credit risk, and as a result of this, the Bank may have secured its exposure in an effort to mitigate the risk. If so, the collateral taken should provide an unquestionable ability to repay the indebtedness in full through liquidation, if necessary. Cash flows should be adequate to cover debt service and fixed obligations, although there may be a question about the borrower's ability to provide alternative sources of funds in emergencies. Better quality real estate and asset-based borrowers who fully comply with all underwriting standards and are performing according to projections would be assigned this grade.

Special Mention or 5: A Special Mention credit has potential weaknesses that deserve management's close attention, as the borrower is exhibiting deteriorating trends that, if not corrected, could jeopardize repayment of the debt and result in a Substandard (6) grade. Credits which have significant actual, not potential, weaknesses are assigned lower grades than this grade.

Substandard or 6: A Substandard credit has a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. A credit graded Substandard is not protected by the sound worth and paying capacity of the borrower, or of the value and type of collateral pledged. With a Substandard loan, there is a distinct possibility that the Bank will sustain some loss if the weaknesses or deficiencies are not corrected.

Doubtful or 7: A Doubtful credit is one that has critical weaknesses that would make the collection or liquidation of the full amount due improbable. However, there may be pending events that may work to strengthen the credit, and therefore the amount or timing of a possible loss cannot be determined at the current time.

Loss or 8: Loans classified Loss are considered uncollectible and of such little value that their continuance as active Bank assets is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather that the loan should be charged off now, even though partial or full recovery may be possible in the future. Loans classified Loss will be charged off in a timely manner.

Impaired Loans

Loans are identified and classified as impaired when, non-accrual and principal or interest payments have been contractually past due for 90 days or more, unless the loan is both well-collateralized and in the process of collection; or they are classified as Troubled Debt Restructuring (TDR) loans to offer terms not typically granted by the Bank or when current information or events make it unlikely to collect in full according to the contractual terms of the loan agreements; or they are classified as Substandard loans in an amount over 5% of the Bank's Tier 1 Capital; or there is a deterioration in the borrower's financial condition that raises uncertainty as to timely collection of either principal or interest; or full payment of both interest and principal is in doubt according to the original contractual terms.

We evaluate loan impairment in accordance with applicable GAAP.

Table of Contents

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 5 LOANS (Continued)

Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent, less costs to sell. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses or, alternatively, a specific allocation will be established. Additionally, loans that are considered impaired are specifically excluded from the quarterly migration analysis when determining the amount of the allowance for loan losses required for the period.

The allowance for collateral-dependent loans is determined by calculating the difference between the outstanding loan balance and the collateral value as determined by recent appraisals. The allowance for collateral-dependent loans varies from loan to loan based on the collateral coverage of the loan at the time of designation as non-performing. We continue to monitor the collateral coverage, based on recent appraisals, on these loans on a quarterly basis and adjust the allowance accordingly.

(1) *Represents interest income recognized on impaired loans subsequent to classification as impaired.*

For the three and six months ended June 30, 2011, we recognized interest income of \$0 and \$33,000, respectively, on one impaired commercial term loan secured by real estate using a cash-basis method. For the three and six months ended June 30, 2010, we recognized interest income of \$67,000 and \$204,000, respectively, on one impaired commercial term loan secured by real estate using a cash-basis method. Except for such loan, no other interest income was recognized on impaired loans subsequent to classification as impaired using a cash-basis method.

	2011	2010	2011	2010
	<i>(In Thousands)</i>			
Interest Income That Would Have Been Recognized Had Impaired Loans Performed in Accordance With Their Original Terms	\$ 2,001	\$ 3,755	\$ 4,475	\$ 7,030
Less: Interest Income Recognized on Impaired Loans	(629)	(237)	(1,160)	(714)
Interest Foregone on Impaired Loans	\$ 1,372	\$ 3,518	\$ 3,315	\$ 6,316

There were no commitments to lend additional funds to borrowers whose loans are included above.

Non-Accrual Loans

Loans are placed on non-accrual status when, in the opinion of management, the full timely collection of principal or interest is in doubt. Generally, the accrual of interest is discontinued when principal or interest payments become more than 90 days past due, unless management believes the loan is adequately collateralized and in the process of collection. However, in certain instances, we may place a particular loan on non-accrual status earlier, depending upon the individual circumstances surrounding the loan's delinquency. When a loan is placed on non-accrual status, previously accrued but unpaid interest is reversed against current income. Subsequent collections of cash are applied as principal reductions when received, except when the ultimate collectibility of principal is probable, in which case interest payments are credited to income. Non-accrual loans may be restored to accrual status when principal and interest become current and full repayment is expected.

The following table details non-accrual loans, disaggregated by class of loan, for the periods indicated:

	June 30, 2011	December 31, 2010
	<i>(In Thousands)</i>

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 5 LOANS (Continued)

The following table details non-performing assets as of the dates indicated:

	June 30, 2011	December 31, 2010
	<i>(In Thousands)</i>	
Non-Accrual Loans	\$ 144,496	\$ 142,437
Loans 90 Days or More Past Due and Still Accruing		
Total Non-Performing Loans	144,496	142,437
Other Real Estate Owned	1,340	4,089
Total Non-Performing Assets	\$ 145,836	\$ 146,526
Troubled Debt Restructurings on Accrual Status	\$ 19,793	\$ 47,395

Loans on non-accrual status, excluding non-performing loans held for sale of \$22.6 million, totaled \$144.5 million as of June 30, 2011, compared to \$142.4 million as of December 31, 2010, representing an 1.4 percent increase. Delinquent loans (defined as 30 days or more past due), excluding loans held for sale, were \$77.7 million as of June 30, 2011, compared to \$120.9 million as of December 31, 2010, representing a 35.7 percent decrease.

As of June 30, 2011, other real estate owned consisted of five properties, primarily located in California, with a combined net carrying value of \$1.3 million. During the six months ended June 30, 2011, five properties, with a carrying value of \$2.8 million, were transferred from loans receivable to other real estate owned, and eight properties, with a carrying value of \$4.4 million, were sold and a loss of \$681,000 was recognized. As of December 31, 2010, other real estate owned consisted of eight properties with a combined net carrying value of \$4.1 million.

During the six months ended June 30, 2011, we restructured monthly payments on 92 loans, with a net carrying value of \$77.4 million as of June 30, 2011, through temporary payment structure modifications ranging from changing the amount of principal and interest due monthly to allowing for interest only due monthly payments for six months or less. For the restructured loans on accrual status, we believe that, based on the financial capabilities of the borrowers at the time of the loan restructuring and the borrowers' past performance in the payment of debt service under the previous loan terms, performance and collection under the revised terms is probable. As of June 30, 2011, TDR loans, excluding loans held for sale, totaled \$76.0 million, all of which were temporary interest rate reductions, and a \$13.2 million reserve relating to these loans was included in the allowance for loan losses. As of December 31, 2010, TDR loans, excluding loans held for sale, totaled \$72.2 million and the related allowance for loan losses was \$10.2 million.

THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 6 INCOME TAXES

Under GAAP, a valuation allowance must be recorded if it is more likely than not that such deferred tax assets will not be realized. Appropriate consideration is given to all available evidence (both positive and negative) related to the realization of the deferred tax assets on a quarterly basis.

In conducting our regular quarterly evaluation, we decided to maintain a full deferred tax asset valuation allowance as of June 30, 2011 based primarily upon the existence of a three-year cumulative loss position. Although our current financial forecasts indicate that sufficient taxable income will be generated in the future to ultimately realize the existing deferred tax benefits, those forecasts were not considered to constitute sufficient positive evidence to overcome the observable negative evidence associated with the three-year cumulative loss position determined as of June 30, 2011.

At June 30, 2011, the valuation allowance decreased to \$82.7 million compared to \$88.6 million at March 31, 2011 and \$92.7 million at December 31, 2010. This decrease was mainly due to a decrease of deferred tax assets balance related to credit loss provision. We had zero balance of net deferred tax assets as of June 30, 2011 and December 31, 2010. During the first half of 2010, we recorded an additional valuation allowance of \$37.8 million against our deferred tax assets, resulting in \$83.0 million of valuation allowance at June 30, 2010. There was \$1.2 million of net deferred tax liabilities as of June 30, 2010.

The tax expense recognized for the three and six months ended June 30, 2011 was primarily due to an out-of-period adjustment of \$605,000 and \$718,000, respectively, to reserve for certain ASC 740-10(FIN 48) exposure items. During the fourth quarter of 2009, the Company recorded a tax benefit upon electing a 5-year net operating loss carryback according to the IRS Code section IRC § 172(b)(1)(H) amended in November 2009. This out-of-period adjustment was to reinstate the reserves that the Company released as the statute of limitations had expired in previous years. Due to the Company filing amended tax returns as a result of the tax law revision, the Company needed to reestablish these reserves. The tax benefit recognized during the first half of 2010 was primarily due to the reversal of FIN 48 reserves related to lower assessment from the result of the State of California Franchise Tax Board audit for the tax year 2005 through 2007.

NOTE 7 SHARE-BASED COMPENSATION***Share-Based Compensation Expense***

The table below shows the share-based compensation expense and related tax benefits for the periods indicated:

	Number of Shares	Weighted- Average Exercise Price Per Share	Weighted- Average Remaining Contractual Life	Aggregate Intrinsic Value of In-the-Money Options
<i>(Dollars in Thousands, Except Per Share Data)</i>				
Options Outstanding at Beginning of Period	1,210,091	\$ 10.58	5.7 years	\$ (1)
Options Expired	(17,200)	\$ 16.15	1.1 years	
Options Outstanding at End of Period	1,192,891	\$ 10.50	5.5 years	\$ (2)
Options Exercisable at End of Period	927,291	\$ 12.80	4.6 years	\$ (2)

(1) *Intrinsic value represents the excess of the closing stock price on the last trading day of the period, which was \$1.24 as of March 31, 2011, over the exercise price, multiplied by the number of options.*

(2) *Intrinsic value represents the excess of the closing stock price on the last trading day of the period, which was \$1.07 as of June 30, 2011, over the exercise price, multiplied by the number of options.*

The table below provides stock option information for the six months ended June 30, 2011:

	Number of Shares	Weighted- Average Exercise Price Per Share	Weighted- Average Remaining Contractual Life	Aggregate Intrinsic Value of In-the-Money Options
<i>(Dollars in Thousands, Except Per Share Data)</i>				
Options Outstanding at Beginning of Period	1,066,891	\$ 11.93	5.3 years	\$ (1)
Options Granted	150,000	\$ 1.30	9.7 years	
Options Expired	(21,200)	\$ 16.54	4.1 years	
Options Forfeited	(2,800)	\$ 18.00	4.8 years	
Options Outstanding at End of Period	1,192,891	\$ 10.50	5.5 years	\$ (2)
Options Exercisable at End of Period	927,291	\$ 12.80	4.6 years	\$ (2)

(1) *Intrinsic value represents the excess of the closing stock price on the last trading day of the period, which was \$1.15 as of December 31, 2010, over the exercise price, multiplied by the number of options.*

(2) *Intrinsic value represents the excess of the closing stock price on the last trading day of the period, which was \$1.07 as of June 30, 2011, over the exercise price, multiplied by the number of options.*

There were no options exercised during the three and six months ended June 30, 2011, and total intrinsic value of options exercised during the three and six months ended June 30, 2010 was \$14,000.

NOTE 7 SHARE-BASED COMPENSATION (Continued)**Restricted Stock Awards**

The table below provides restricted stock award information for the periods indicated:

	Three Months Ended June 30, 2011		Six Months Ended June 30, 2011	
	Number	Weighted- Average Grant Date Fair Value Per Share	Number	Weighted- Average Grant Date Fair Value Per Share
	of Shares		of Shares	
Restricted Stock at Beginning of Period	185,600	\$ 1.72	145,600	\$ 1.77
Restricted Stock Granted		\$	60,000	\$ 1.30
Restricted Stock Vested	(35,000)	\$ 1.40	(55,000)	\$ 1.33
Restricted Stock at End of Period	150,600	\$ 1.75	150,600	\$ 1.75

NOTE 8 STOCKHOLDERS EQUITY**Stock Warrants**

As part of the agreement executed on July 27, 2010 with Cappello Capital Corp, the placement agent in connection with our best efforts offering and the financial advisor in connection with our completed rights offering, we issued warrants to purchase two million shares of our common stock for services performed. The warrants have an exercise price of \$1.20 per share. According to the agreement, the warrants vested on October 14, 2010 and are exercisable until its expiration on October 14, 2015. The Company followed the guidance of FASB ASC Topic 815- 40,

Derivatives and Hedging Contracts in Entity's Own Stock (ASC 815- 40), which establishes a framework for determining whether certain freestanding and embedded instruments are indexed to a company's own stock for purposes of evaluation of the accounting for such instruments under existing accounting literature. Under GAAP, the issuer is required to measure the fair value of the equity instruments in the transaction as of earlier of i) the date at which a commitment for performance by the counterparty to earn the equity instruments is reached or ii) the date at which the counterparty's performance is complete. The fair value of the warrants at the date of issuance totaling \$2.0 million was recorded as a liability and a cost of equity, which was determined by the Black-Scholes option pricing model. The expected stock volatility is based on historical volatility of our common stock over the expected term of the warrants. We used a weighted average expected stock volatility of 111.46%. The expected life assumption is based on the contract term of five years. The dividend yield of zero is based on the fact that we have no present intention to pay cash dividends. The risk free rate of 2.07% used for the warrant is equal to the zero coupon rate in effect at the time of the grant.

Upon re-measuring the fair value of the stock warrants at June 30, 2011, compared to \$1.6 million at December 31, 2010, the fair value decreased by \$311,000, which we have included in other operating expenses for the six months ended June 30, 2011. We used a weighted average expected stock volatility of 83.02% and a remaining contractual life of 4.3 years based on the contract terms. We also used a dividend yield of zero as we have no present intention to pay cash dividends. The risk free rate of 1.75% used for the warrant is equal to the zero coupon rate in effect at the end of the measurement period.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 9 EARNINGS (LOSS) PER SHARE

Earnings (loss) per share (EPS) is calculated on both a basic and a diluted basis. Basic EPS excludes dilution and is computed by dividing income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted from the issuance of common stock that then shared in earnings, excluding common shares in treasury. Unvested restricted stock is excluded from the calculation of weighted-average common shares for basic EPS. For diluted EPS, weighted-average common shares include the impact of restricted stock under the treasury method.

The following tables present a reconciliation of the components used to derive basic and diluted EPS for the periods indicated:

	(<i>Numerator</i>)	2011 (<i>Denominator</i>)	Per Share	(<i>Numerator</i>)	2010 (<i>Denominator</i>)	Per Share
	Net Income	Weighted- Average Shares	Amount	Net Loss	Weighted- Average Shares	Amount
	<i>(Dollars in Thousands, Except Per Share Data)</i>					
Three Months Ended June 30:						
Basic EPS	\$ 8,001	151,104,636	\$ 0.05	\$(29,257)	51,036,573	\$ (0.57)
Effect of Dilutive Securities Options, Warrants and Unvested Restricted Stock		153,754				
Diluted EPS	\$ 8,001	151,258,390	\$ 0.05	\$(29,257)	51,036,573	\$ (0.57)
Six Months Ended June 30:						
Basic EPS	\$ 18,438	151,082,945	\$ 0.12	\$(78,743)	51,017,885	\$ (1.54)
Effect of Dilutive Securities Options, Warrants and Unvested Restricted Stock		174,405				
Diluted EPS	\$ 18,438	151,257,350	\$ 0.12	\$(78,743)	51,017,885	\$ (1.54)

For the three months ended June 30, 2011 and 2010, there were 3,192,891 and 1,266,115 options, warrants and unvested restricted stock outstanding, respectively, that were not included in the computation of diluted EPS because their effect would be anti-dilutive. For the six months ended June 30, 2011 and 2010, there were 1,192,891 and 1,266,115 options, warrants and unvested restricted stock outstanding, respectively, that were not included in the computation of diluted EPS because their effect would be anti-dilutive.

NOTE 10 OFF-BALANCE SHEET COMMITMENTS

We are a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Consolidated Balance Sheets. The Bank's exposure to credit losses in the event of

non-performance by the other party to commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for extending loan facilities to customers. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the counterparty.

NOTE 10 OFF-BALANCE SHEET COMMITMENTS (Continued)

Collateral held varies but may include accounts receivable; inventory; property, plant and equipment; and income-producing or borrower-occupied properties. The following table shows the distribution of undisbursed loan commitments as of the dates indicated:

	June 30, 2011	December 31, 2010
	<i>(In Thousands)</i>	
Commitments to Extend Credit	\$ 167,018	\$ 178,424
Standby Letters of Credit	14,771	15,226
Commercial Letters of Credit	7,654	11,899
Unused Credit Card Lines	17,058	24,649
Total Undisbursed Loan Commitments	\$ 206,501	\$ 230,198

NOTE 11 SEGMENT REPORTING

Through our branch network and lending units, we provide a broad range of financial services to individuals and companies located primarily in Southern California. These services include demand, time and savings deposits; and commercial and industrial, real estate and consumer lending. While our chief decision makers monitor the revenue streams of our various products and services, operations are managed and financial performance is evaluated on a company-wide basis. Accordingly, we consider all of our operations to be aggregated in one reportable operating segment.

NOTE 12 LIQUIDITY**Hanmi Financial**

Currently, management believes that Hanmi Financial, on a stand-alone basis, has adequate liquid assets to meet its operating cash needs through December 31, 2011. On August 29, 2008, we elected to suspend payment of quarterly dividends on our common stock in order to preserve our capital position. In addition, Hanmi Financial has elected to defer quarterly interest payments on its outstanding junior subordinated debentures until further notice, beginning with the interest payment that was due on January 15, 2009. As of June 30, 2011, Hanmi Financial's liquid assets, including amounts deposited with the Bank, totaled \$6.3 million, down from \$7.7 million at December 31, 2010.

Hanmi Bank

Management believes that the Bank, on a stand-alone basis, has adequate liquid assets to meet its current obligations. The Bank's primary funding source will continue to be deposits originating from its branch platform. The Bank's wholesale funds historically consisted of FHLB advances and brokered deposits. As of June 30, 2011, in compliance with its regulatory restrictions, the Bank had no brokered deposits, and had FHLB advances of \$3.5 million, a decrease of \$150.2 million from \$153.7 million at December 31, 2010.

The Bank's primary source of borrowings is the FHLB, from which the Bank is eligible to borrow up to 15 percent of its total assets. As of June 30, 2011, the total borrowing capacity available based on pledged collateral and the remaining available borrowing capacity were \$391.6 million and \$387.7 million, respectively. The Bank's FHLB borrowings as of June 30, 2011 totaled \$3.5 million, representing 0.1 percent of total assets.

As of August 5, 2011, the Bank's FHLB borrowing capacity available based on pledged collateral and the remaining available borrowing capacity were \$378.1 million and \$374.6 million, respectively. The amount that the FHLB is willing to advance differs based on the quality and character of qualifying collateral pledged by the Bank, and the advance rates for qualifying collateral may be adjusted upwards or downwards by the FHLB from time to time.

Table of Contents

HANMI FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
THREE AND SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (Continued)

NOTE 12 LIQUIDITY (Continued)

To the extent deposit renewals and deposit growth are not sufficient to fund maturing and withdrawable deposits, repay maturing borrowings, fund existing and future loans and investment securities and otherwise fund working capital needs and capital expenditures, the Bank may utilize the remaining borrowing capacity from its FHLB borrowing arrangement.

As a means of augmenting its liquidity, the Bank had an available borrowing source of \$150.5 million from the Federal Reserve Discount Window (the Fed Discount Window), to which the Bank pledged loans with a carrying value of \$321.1 million, and had no borrowings as of June 30, 2011. The Bank is currently in the secondary program of the Borrower in Custody Program of the Fed Discount Window, which allows the Bank to request very short-term credit (typically overnight) at a rate that is above the primary credit rate within a specified period. In August 2010, South Street Securities LLC extended a line of credit to the Bank for reverse repurchase agreements up to a maximum of \$100.0 million.

Current market conditions have limited the Bank's liquidity sources principally to interest-bearing deposits, unpledged marketable securities, and secured funding outlets such as the FHLB and Fed Discount Window. There can be no assurance that actions by the FHLB or Federal Reserve Bank would not reduce the Bank's borrowing capacity or that the Bank would be able to continue to replace deposits at competitive rates. As of June 30, 2011, in compliance with its regulatory restrictions, the Bank did not have any brokered deposits and would consult in advance with its regulators if it were to consider accepting brokered deposits in the future.

The Bank has Contingency Funding Plans (CFPs) designed to ensure that liquidity sources are sufficient to meet its ongoing obligations and commitments, particularly in the event of a liquidity contraction. The CFPs are designed to examine and quantify its liquidity under various stress scenarios. Furthermore, the CFPs provide a framework for management and other critical personnel to follow in the event of a liquidity contraction or in anticipation of such an event. The CFPs address authority for activation and decision making, liquidity options and the responsibilities of key departments in the event of a liquidity contraction.

The Bank believes that it nonetheless has adequate liquidity resources to fund its obligations with its interest-bearing deposits, unpledged marketable securities, and secured credit lines with the FHLB and Fed Discount Window.

NOTE 13 SUBSEQUENT EVENTS

Management has evaluated subsequent events through the date of issuance of the financial data included herein. There have been no subsequent events that occurred during such period that would require disclosure in this Form 10-Q or would be required to be recognized in the Consolidated Financial Statements (Unaudited) as of June 30, 2011.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of the major factors that influenced our results of operations and financial condition as of and for the three and six months ended June 30, 2011. This analysis should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2010 and with the unaudited consolidated financial statements and notes thereto set forth in this Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2011 (this Report).

FORWARD-LOOKING STATEMENTS

Some of the statements under *Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations* and elsewhere in this Report constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). All statements in this Report other than statements of historical fact are forward looking statements for purposes of federal and state securities laws, including, but not limited to, statements about anticipated future operating and financial performance, financial position and liquidity, business strategies, regulatory and competitive outlook, investment and expenditure plans, capital and financing needs, plan and availability, plans and objectives of management for future operations, and other similar forecasts and statements of expectation and statements of assumption underlying any of the foregoing. In some cases, you can identify forward-looking statements by terminology such as may, will, should, could, expects, plans, intends, anticipates, believes, estimates, potential, or continue, or the negative of such terms and other comparable terminology. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ from those expressed or implied by the forward-looking statement. These risks, uncertainties and other factors include the following:

failure to raise enough capital to support our operations or meet our regulatory requirements, including requirements under the Final Order and the Agreement;

failure to maintain adequate levels of capital to support our operations;

a significant number of customers failing to perform under their loans or other extensions of credit;

our compliance with and the effect of regulatory orders and agreements that we and Hanmi Bank have entered into with our respective regulators and potential future supervisory or governmental actions against us or Hanmi Bank;

fluctuations in interest rates and a decline in the level of our interest rate spread;

failure to attract or retain deposits and restrictions on taking brokered deposits;

sources of liquidity available to us and to Hanmi Bank becoming limited or our potential inability to access sufficient sources of liquidity when needed or the requirement that we obtain government waivers to do so;

adverse changes in domestic or global financial markets, economic conditions or business conditions;

regulatory restrictions on Hanmi Bank's ability to pay dividends to us and on our ability to make payments on our obligations;

significant reliance on loans secured by real estate and the associated vulnerability to downturns in the local real estate market, natural disasters and other variables impacting the value of real estate;

our use of appraisals in deciding whether to make loans secured by real property, which does not ensure that the value of the real property collateral will be sufficient to pay our loans;

failure to attract or retain our key employees;

credit quality and the effect of credit quality on our provision for credit losses and allowance for loan losses;

our ability to raise capital on reasonable terms;

volatility and disruption in financial, credit and securities markets, and the price of our common stock;

deterioration in financial markets that may result in impairment charges relating to our securities portfolio;

competition and demographic changes in our primary market areas;

global hostilities, acts of war or terrorism, including but not limited to, conflict between North Korea and

Table of Contents

South Korea;

the effects of climate change and attendant regulation on our customers and borrowers;

the effects of litigation against us;

failed or circumvented internal controls and procedures;

adverse changes in the soundness of other financial institutions with whom we have trading, clearing, counterparty or other relationships;

risks associated with security breaches in our online banking services, and fears of security breaches that limit the growth of our online services;

significant government regulations, legislation and potential changes thereto; and

other risks described herein and in the other reports and statements we file with the SEC.

For a discussion of some of the other factors that might cause such a difference, see the discussion contained in this Report under the heading *Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations*. Also see *Item 1A. Risk Factors* and *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2010 as well as other factors we identify from time to time in our periodic reports filed pursuant to the Exchange Act. We undertake no obligation to update these forward-looking statements to reflect events or circumstances that occur after the date on which such statements were made, except as required by law.

CRITICAL ACCOUNTING POLICIES

We have established various accounting policies that govern the application of GAAP in the preparation of our financial statements. Our significant accounting policies are described in the *Notes to Consolidated Financial Statements* in our Annual Report on Form 10-K for the year ended December 31, 2010. Certain accounting policies require us to make significant estimates and assumptions that have a material impact on the carrying value of certain assets and liabilities, and we consider these critical accounting policies. For a description of these critical accounting policies, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies* in our Annual Report on Form 10-K for the year ended December 31, 2010. We use estimates and assumptions based on historical experience and other factors that we believe to be reasonable under the circumstances. Actual results could differ significantly from these estimates and assumptions, which could have a material impact on the carrying value of assets and liabilities at the balance sheet dates and our results of operations for the reporting periods. Management has discussed the development and selection of these critical accounting policies with the Audit Committee of Hanmi Financial's Board of Directors.

- (1) Loans are net of deferred fees and related direct costs.
- (2) Total stockholders' equity divided by common shares outstanding.
- (3) Calculation based upon annualized net loss.
- (4) Net loss divided by average total assets.
- (5) Net loss divided by average stockholders' equity.
- (6) Total non-interest expenses divided by the sum of net interest income before provision for credit losses and total non-interest income.
- (7) Average yield earned on interest-earning assets less average rate paid on interest-bearing liabilities. Computed on a tax-equivalent basis using an effective marginal rate of 35 percent.
- (8) Net interest income before provision for credit losses divided by average interest-earning assets. Computed on a tax-equivalent basis using an effective marginal rate of 35 percent.
- (9) The required ratios for a well-capitalized institution, as defined by regulations of the Board of Governors of the Federal Reserve System, are 10 percent for the Total Risk-Based Capital Ratio (total capital divided by total risk-weighted assets); 6 percent for the Tier 1 Risk-Based Capital Ratio (Tier 1 capital divided by total risk-weighted assets); and 5 percent for the Tier 1 Leverage Ratio (Tier 1 capital divided by average total assets).
- (10) Non-performing loans consist of non-accrual loans and loans past due 90 days or more and still accruing interest.
- (11) This Quarterly Report on Form 10-Q includes corrected data regarding total non-performing loans as of and for the quarter ended June 30, 2011, which differ from and supersede data included in the Earnings Release dated July 21, 2011. These corrections had no effect on the statement of operations or earnings per share for the second quarter of 2011.
- (12) Non-performing assets consist of non-performing loans (see footnote (10) and (11) above) and other real estate owned.
- (13) Calculation based upon annualized net loan charge-offs.

Table of Contents**Non-GAAP Financial Measures*****Tangible Stockholders' Equity to Tangible Assets Ratio***

The ratio of tangible stockholders' equity to tangible assets is supplemental financial information determined by a method other than in accordance with GAAP. This non-GAAP measure is used by management in the analysis of Hanmi Bank's capital strength. Tangible equity is calculated by subtracting goodwill and other intangible assets from total stockholders' equity. Banking and financial institution regulators also exclude goodwill and other intangible assets from total stockholders' equity when assessing the capital adequacy of a financial institution. Management believes the presentation of this financial measure, excluding the impact of these items, provides useful supplemental information that is essential to a proper understanding of the capital strength of Hanmi Bank. This disclosure should not be viewed as a substitution for results determined in accordance with GAAP, nor is it necessarily comparable to non-GAAP performance measures that may be presented by other companies.

The following table reconciles this non-GAAP performance measure to the GAAP performance measure for the periods indicated:

Hanmi Bank

	June 30, 2011	December 31, 2010
	<i>(In Thousands)</i>	
Total Assets	\$ 2,705,997	\$ 2,900,415
Less Intangible Assets	(184)	(450)
Tangible Assets	\$ 2,705,813	\$ 2,899,965
Total Stockholders' Equity	\$ 279,712	\$ 249,637
Less Intangible Assets	(184)	(450)
Tangible Stockholders' Equity	\$ 279,528	\$ 249,187
Total Stockholders' Equity to Total Assets Ratio	10.34%	8.61%
Tangible Stockholders' Equity to Tangible Assets Ratio	10.33%	8.59%

As of June 30, 2011 and December 31, 2010, the Bank had a tangible stockholders' equity to tangible assets ratio of 10.33% and 8.59%, respectively.

Table of Contents**EXECUTIVE OVERVIEW**

For the second quarter ended June 30, 2011, we reported net income of \$8.0 million, or \$0.05 per diluted share, compared to a net loss of \$29.3 million, or \$(0.57) per diluted share for the same period in 2010. We reported net income for the first six months ended June 30, 2011 of \$18.4 million, or \$0.12 per diluted share, compared to a net loss of \$78.7 million, or \$(1.54) per diluted share for the same period in 2010. The increase in net income for the second quarter and first half ended June 30, 2011 was primarily driven by the lack of any provision for credit losses, reflecting continued improvement in most credit metrics. We recorded \$37.5 million and \$95.5 million in provision for credit losses for the second quarter ended June 30, 2010 and for the first half of 2010, respectively.

With profits generated for three consecutive quarters since the fourth quarter of 2010 and the successful completion of the \$120 million registered rights and best efforts offering during the third quarter of 2010, the Bank exceeded the threshold for being considered well-capitalized for regulatory purposes since September 30, 2010 and, as of June 30, 2011, complies with the tangible capital ratio requirement set forth in the Final Order.

Significant financial highlights include (as of and for the period ended June 30, 2011):

The Bank's total risk-based capital ratio improved to 14.02 percent as of June 30, 2011 compared to 12.22 percent as of December 31, 2010. The Bank's tangible common equity to tangible assets ratio also improved to 10.33 percent as of June 30, 2011 compared to 8.59 percent as of December 31, 2010.

Due to the success of recent marketing initiatives, core deposits (defined as total deposits less time deposits greater than \$100,000) increased by \$171.4 million, or 12.7 percent, to \$1.52 billion as of June 30, 2011 from \$1.35 billion as of December 31, 2010. At June 30, 2011, noninterest-bearing demand deposits represented 25.1 percent of total deposits compared to 22.2 percent of total deposits at December 31, 2010.

The average loan yield improved by 19 basis points to 5.49 percent in the second quarter of 2011 compared to 5.30 percent for the same period in 2010, and improved by 21 basis points to 5.55 percent for the first half of 2011 compared to 5.34 percent for the same period in 2010, reflecting the improvement in credit quality.

The cost of funds decreased primarily through downward re-pricing of matured time deposits. The average funding cost decreased by 32 basis points to 1.41 percent in the second quarter of 2011 compared to 1.73 percent for the same period in 2010, and decreased by 34 basis points to 1.45 percent for the first half of 2011 compared to 1.79 percent for the same period in 2010.

Net interest margin improved by 9 basis points to 3.65 percent in the second quarter of 2011 compared to 3.56 percent for the same period in 2010, and improved by 4 basis points to 3.66 percent for the first half of 2011 compared to 3.62 percent for the same period in 2010.

Outlook for the Remainder of 2011

Our priorities for the remainder of 2011 are to reevaluate the adequacy of our capital given the level and nature of the risks to which we are exposed, continue to improve our credit quality, and fully comply with all of the requirements of the Final Order and the Agreement.

We will continue to actively work down problem loans through bulk and individual note sales, and redeploy the proceeds into performing loans or securities investments. We believe that our continuous proactive initiatives to manage credit risk exposure have resulted in improvement of our asset quality over the past several quarters. Our commitment to elevate our credit risk management systems will continue in order to meet the challenges of our uncertain economic environment. In addition, we have reinvigorated sales with targeted marketing programs that focus on generating quality loans and core deposits to improve profitability and expand existing customer base.

Table of Contents

RESULTS OF OPERATIONS

Net Interest Income before Provision for Credit Losses

Our earnings depend largely upon the difference between the interest income received from our loan portfolio and other interest-earning assets and the interest paid on deposits and borrowings. The difference is net interest income. The difference between the yield earned on interest-earning assets and the cost of interest-bearing liabilities is net interest spread. Net interest income, when expressed as a percentage of average total interest-earning assets, is referred to as the net interest margin.

Net interest income is affected by the change in the level and mix of interest-earning assets and interest-bearing liabilities, referred to as volume changes. Our net interest income also is affected by changes in the yields earned on interest-earning assets and rates paid on interest-bearing liabilities, referred to as rate changes. Interest rates charged on loans are affected principally by the demand for such loans, the supply of money available for lending purposes and competitive factors. Those factors are affected by general economic conditions and other factors beyond our control, such as Federal economic policies, the general supply of money in the economy, income tax policies, governmental budgetary matters and the actions of the FRB.

Table of Contents**Three Months Ended June 30, 2011 vs. Three Months Ended June 30, 2010**

The following table shows the average balances of assets, liabilities and stockholders equity; the amount of interest income and interest expense; the average yield or rate for each category of interest-earning assets and interest-bearing liabilities; and the net interest spread and the net interest margin for the periods indicated. All average balances are daily average balances.

Change in Net Interest Income	\$ (3,065)	\$ 2,222	\$ (843)

For the three months ended June 30, 2011 and 2010, net interest income before provision for credit losses on a tax equivalent basis was \$25.5 million and \$26.3 million, respectively. Interest income decreased 9.8 percent to \$32.6 million for the three months ended June 30, 2011 from \$36.2 million for the same period in 2010. Interest expense also decreased 27.7 percent to \$7.1 million for the three months ended June 30, 2011 from \$9.9 million for the same period in 2010. The net interest spread and net interest margin for the three months ended June 30, 2011 were 3.26 percent and 3.65 percent, respectively, compared to 3.17 percent and 3.56 percent, respectively, for the same period in 2010. The decrease in net interest income was primarily due to the decrease in loan volume resulting

from the credit quality improvement strategy, coupled with relatively weak loan demand in current challenging business and economic conditions. This decrease was mostly offset by lower deposit costs resulting from the replacement of high-cost promotional time deposits with low-cost deposit products through a series of core deposit campaigns.

Average gross loans decreased by \$474.2 million, or 18.2 percent, to \$2.14 billion for the three months ended June 30, 2011 from \$2.61 billion for the same period in 2010. Average investment securities increased by \$338.5 million, or 213.5 percent, to \$497.1 million for the three months ended June 30, 2011 from \$158.5 million for the same period in 2010. Average interest-earning assets decreased by \$161.2 million, or 5.4 percent, to \$2.80 billion for the three months ended June 30, 2011 from \$2.97 billion for the same period in 2010. The decrease in average interest earning assets was a direct result of our balance sheet deleveraging and credit quality improvement strategy implemented since early 2009 through the disposition of problem assets while maintaining a strong level of liquidity with increased investment in short and mid-term instruments. Consistent with this strategy, the average interest-bearing liabilities decreased by \$266.7 million, or 11.6 percent, to \$2.03 billion for the three months ended June 30, 2011 from \$2.29 billion for the same period in 2010. Average FHLB advances decreased by \$47.1 million, or 30.6 percent, to \$106.7 million for the three months ended June 30, 2011 from \$153.9 million for the same period in 2010.

The average yield on interest-earning assets decreased by 23 basis points to 4.67 percent for the three months ended June 30, 2011 from 4.90 percent for the same period in 2010, primarily due to lower yields on investment securities in the current low interest rate environment, partially offset by an increase in loan portfolio yields. Total loan interest and fee income decreased by \$5.2 million, or 15.19 percent, to \$29.2 million for the three months ended June

Table of Contents

30, 2011 from \$34.5 million for the same period in 2010 due primarily to an 18.16 percent decrease in the average gross loans. The average yield on loans increased to 5.49 percent for the three months ended June 30, 2011 from 5.30 percent for the same period in 2010. This increase reflected improvement in credit quality metrics, including lowered levels of delinquent loan and non-performing loans. The average cost on interest-bearing liabilities decreased by 32 basis points to 1.41 percent for the three months ended June 30, 2011 from 1.73 percent for the same period in 2010. This decrease was primarily due to a continued shift in funding sources toward lower-cost funds through disciplined deposit pricing while reducing wholesale funds and rate sensitive deposits. Average brokered deposits decreased to zero for the three months ended June 30, 2011 from \$39.7 million for the same period in 2010. Average FHLB advances decreased by \$47.1 million, or 30.64 percent, to \$106.7 million for the three months ended June 30, 2011 from \$153.9 million for the same period in 2010.

Change in Net Interest Income	\$ (5,978)	\$ 3,890	\$ (2,088)

For the six months ended June 30, 2011 and 2010, net interest income before provision for credit losses on a tax equivalent basis was \$51.6 million and \$53.7 million, respectively. Interest income decreased 10.5 percent to \$66.5 million for the six months ended June 30, 2011 from \$74.3 million for the same period in 2010. Interest expense also decreased 27.6 percent to \$14.9 million for the six months ended June 30, 2011 from \$20.6 million for the same period in 2010. The net interest spread and net interest margin for the six months ended June 30, 2011 were 3.26 percent and 3.66 percent, respectively, compared to 3.22 percent and 3.62 percent, respectively, for the same period in 2010. The decrease in net interest income was primarily due to the decrease in loan volume resulting from the credit quality improvement strategy, coupled with relatively weak loan demand in current challenging business

and economic conditions. This decrease was partially offset by lower deposit costs resulting from the replacement of high-cost promotional time deposits with low-cost deposit products through a series of core deposit campaigns.

Average gross loans decreased by \$502.7 million, or 18.7 percent, to \$2.19 billion for the six months ended June 30, 2011 from \$2.69 billion for the same period in 2010. Average investment securities increased by \$343.1 million, or 241.6 percent, to \$485.1 million for the six months ended June 30, 2011 from \$142.0 million for the same period in 2010. Average interest-earning assets decreased by \$140.0 million, or 4.7 percent, to \$2.85 billion for the six months ended June 30, 2011 from \$2.99 billion for the same period in 2010. The decrease in average interest earning assets was a direct result of our balance sheet deleveraging and credit quality improvement strategy implemented since early 2009 through the disposition of problem assets while maintaining a strong level of liquidity with increased investment in short and mid-term instruments. Consistent with this strategy, the average interest-bearing liabilities decreased by \$247.4 million, or 10.6 percent, to \$2.08 billion for the six months ended June 30, 2011 from \$2.33 billion for the same period in 2010. Average FHLB advances decreased by \$33.4 million, or 20.4 percent, to \$130.0 million for the six months ended June 30, 2011 from \$163.4 million for the same period in 2010.

The yield on average interest-earning assets decreased by 30 basis points to 4.71 percent for the six months ended June 30, 2011 from 5.01 percent for the same period in 2010, primarily due to lower yields on investment securities in the current low interest rate environment, partially offset by an increase in loan portfolio yields. Total loan interest and fee income decreased by \$11.0 million, or 15.49 percent to \$60.2 million for the six months ended June 30, 2011 from \$71.2 million for the same period in 2010 due primarily to an 18.70 percent decrease in the average gross loans.

Table of Contents

The average yield on loans increased to 5.55 percent for the six months ended June 30, 2011 from 5.34 percent for the same period in 2010. This increase reflected improvement in credit quality metrics, including improved levels of delinquent and non-performing loans. The average cost on interest-bearing liabilities decreased by 34 basis points to 1.45 percent for the six months ended June 30, 2011 from 1.79 percent for the same period in 2010. This decrease was primarily due to a continued shift in funding sources toward lower-cost funds through disciplined deposit pricing while reducing wholesale funds and rate sensitive deposits. Average brokered deposits decreased to zero for the six months ended June 30, 2011 from \$52.0 million for the same period in 2010. Average FHLB advances decreased by \$33.4 million, or 20.43 percent to \$130.0 million for the six months ended June 30, 2011 from \$163.4 million for the same period in 2010.

Provision for Credit Losses

For the three months ended June 30, 2011 and 2010, the provision for credit losses was \$0 and \$37.5 million, respectively. For the six months ended June 30, 2011 and 2010, the provision for credit losses was \$0 and \$95.5 million, respectively. The decrease in the provision for credit losses is attributable to decreases in net charge-offs and problem loans, reflecting the improvement in asset quality through aggressive management of our problem assets. Net charge-offs decreased \$22.4 million, or 57.6 percent, to \$16.5 million for the three months ended June 30, 2011 from \$38.9 million for the same period in 2010. Non-performing loans decreased to \$167.1 million, or 7.91 percent of total gross loans, as of June 30, 2011 from \$242.1 million, or 9.67 percent of total gross loans, as of June 30, 2010. See *Non-Performing Assets* and *Allowance for Loan Losses and Allowance for Off-Balance Sheet Items* for further details. We continually assess the quality of our loan portfolio to determine whether additional provision for credit losses is necessary. We anticipate future provisions will be required to account for probable credit losses.

Non-Interest Income

We earn non-interest income from five major sources: service charges on deposit accounts, insurance commissions, remittance fees, other service charges and fees and fees generated from international trade finance. In addition, we sell certain assets, including investment securities, non-performing loans and SBA loans, primarily for risk management purposes.

Three Months Ended June 30, 2011 vs. Three Months Ended June 30, 2010

The following table sets forth the various components of non-interest income for the periods indicated:

	Three Months Ended June 30,		Increase (Decrease)	
	2011	2010	Amount	Percentage
	<i>(Dollars in Thousands)</i>			
Service Charges on Deposit Accounts	\$ 3,278	\$ 3,602	\$ (324)	(9.0%)
Insurance Commissions	1,203	1,206	(3)	(0.2%)
Remittance Fees	499	523	(24)	(4.6%)
Trade Finance Fees	328	412	(84)	(20.4%)
Other Service Charges and Fees	368	372	(4)	(1.1%)
Bank-Owned Life Insurance Income	233	235	(2)	(0.9%)
Net Loss on Sales of Investment Securities	(70)		(70)	%
Net Gain (Loss) on Sales of Loans	(77)	220	(297)	%
Other Operating Income	255	106	149	%
Total Non-Interest Income	\$ 6,017	\$ 6,676	\$ (659)	(9.9%)

For the three months ended June 30, 2011, non-interest income was \$6.0 million, a decrease of \$659,000, or 9.9 percent, from \$6.7 million for the same period in 2010. The decrease in non-interest income was primarily

attributable to the decrease in service charges on deposit accounts and net gain on sales of loans, partially offset by the increase in other operating income. The service charges on deposit accounts decreased by \$324,000, or 9.0 percent, to \$3.3 million for the three months ended June 30, 2011 compared to \$3.6 million for the same period in 2010, due mainly to a decrease of \$299,000 in non-sufficient fund charges, reflecting the continued underlying decline in activity as customers better managed their account balances. Net loss on sales of loans increased by \$297,000 for the three months ended June 30, 2011 compared to the same period in 2010. The net loss on sales of loans reflected \$682,000 of valuation adjustments on loans held for sale, partially offset by \$605,000 of gains from the sales of loans held for sale. Other operating income increased by \$149,000 to \$255,000 for the three months ended June 30, 2011 compared to \$106,000 for the same period in 2010. The increase was primarily attributable to an \$85,000 increase in foreign exchange gain driven by favorable changes in exchange rates.

Table of Contents**Six Months Ended June 30, 2011 vs. Six Months Ended June 30, 2010**

The following table sets forth the various components of non-interest income for the periods indicated:

	Six Months Ended June 30,		Increase (Decrease)	
	2011	2010	Amount	Percentage
			<i>(Dollars in Thousands)</i>	
Service Charges on Deposit Accounts	\$ 6,419	\$ 7,328	\$ (909)	(12.4%)
Insurance Commissions	2,463	2,484	(21)	(0.8%)
Remittance Fees	961	985	(24)	(2.4%)
Other Service Charges and Fees	701	784	(83)	(10.6%)
Trade Finance Fees	625	763	(138)	(18.1%)
Bank-Owned Life Insurance Income	463	466	(3)	(0.6%)
Net Gain (Loss) on Sales of Loans	(415)	214	(629)	%
Net Gain (Loss) on Sales of Investment Securities	(70)	105	(175)	%
Other Operating Income	378	552	(174)	(31.5%)
Total Non-Interest Income	\$ 11,525	\$ 13,681	\$ (2,156)	(15.8%)

For the six months ended June 30, 2011, non-interest income was \$11.5 million, a decrease of \$2.2 million, or 15.8 percent, from \$13.7 million for the same period in 2010. The decrease in non-interest income was primarily attributable to the decreases in service charges on deposit accounts, net gain on sales of loans and investment securities, and other operating income. The service charges on deposit accounts decreased by \$909,000, or 12.4 percent, to \$6.4 million for the six months ended June 30, 2011 compared to \$7.3 million for the same period in 2010, due mainly to a decrease of \$820,000 in non-sufficient fund charges, reflecting the continued underlying decline in activity as customers better managed their account balances. Net loss on sales of loans increased by \$629,000 for the six months ended June 30, 2011 compared to the same period in 2010. This increase reflected \$2.9 million of valuation adjustments on loans held for sale, partially offset by \$2.5 million of gains from the sales of loans held for sale. Net gain on sales of investment securities decreased by \$175,000 for the six months ended June 30, 2011 compared to the same period in 2010. The sales of investment securities for the first half of 2011 were a direct result of implementing our rate risk minimization strategy through replacing long- duration investments with short-duration ones in anticipation of rising rates. The proceeds from the sale of investment securities provided additional liquidity to reduce the FHLB advance due in June 2011. Other operating income decreased by \$174,000, or 31.5 percent, to \$378,000 for the six months ended June 30, 2011 compared to \$552,000 for the same period in 2010. The decrease was primarily attributable to the absence of a \$274,000 recovery on a previously recorded loss on sale of OREO during the first quarter of 2010, partially offset by an \$82,000 increase in foreign exchange gain driven by favorable changes in exchange rates.

Table of Contents**Non-Interest Expense****Three Months Ended June 30, 2011 vs. Three Months Ended June 30, 2010**

The following table sets forth the breakdown of non-interest expense for the periods indicated:

	Three Months Ended June 30,		Increase (Decrease)	
	2011	2010	Amount	Percentage
	<i>(Dollars in Thousands)</i>			
Salaries and Employee Benefits	\$ 8,762	\$ 9,011	\$ (249)	(2.8%)
Occupancy and Equipment	2,650	2,674	(24)	(0.9%)
Data Processing	1,487	1,487		%
Deposit Insurance Premiums and Regulatory Assessments	1,377	4,075	(2,698)	(66.2%)
Professional Fees	1,138	1,022	116	11.4%
Advertising and Promotion	908	503	405	80.5%
Other Real Estate Owned Expense	806	1,718	(912)	(53.1%)
Directors and Officers Liability Insurance	733	716	17	2.4%
Supplies and Communications	496	574	(78)	(13.6%)
Amortization of Other Intangible Assets	190	301	(111)	(36.9%)
Loan-Related Expense	184	310	(126)	(40.6%)
Expenses Related to Unconsummated Capital Raises	2,220		2,220	%
Other Operating Expenses	1,935	2,374	(439)	(18.5%)
Total Non-Interest Expense	\$ 22,886	\$ 24,765	\$ (1,879)	(7.6%)

For the three months ended June 30, 2011, non-interest expense was \$22.9 million, a decrease of \$1.9 million, or 7.6 percent, from \$24.8 million for the same period in 2010. The efficiency ratio for the three months ended June 30, 2011 was 72.67 percent, compared to 75.11 percent for the same period in 2010. The \$1.9 million decrease in non-interest expense was primarily due to the decreases in deposit insurance premiums and regulatory assessments and OREO expense, partially offset by increases in expenses related to unconsummated capital raises and advertising and promotion. The deposit insurance premiums and regulatory assessments decreased by \$2.7 million, or 66.2 percent, to \$1.4 million for the three months ended June 30, 2011 compared to \$4.1 million for the same period in 2010, primarily due to the lower assessment rates for the FDIC insurance on deposits. The assessment rates decreased by 22 basis points to 23 basis points for the three months ended June 30, 2011 from 45 basis points for the same period in 2010, resulting from the improvement in risk categories of the Bank and the Dodd-Frank Act's changes to the FDIC assessment system. OREO expense decreased by \$912,000, or 53.1 percent to \$806,000 for the three months ended June 30, 2011 compared to \$1.7 million for the same period in 2010, primarily as a result of a \$937,000 decrease in valuation allowance. During the three months ended June 30, 2011, non-interest expense included \$2.2 million for our unconsummated capital offerings related to a definitive securities purchase agreement with Woori Finance Holdings Co. Ltd. and a planned equity offering. Advertising and promotion increased by \$405,000, or 80.5 percent, to \$908,000 for the three months ended June 30, 2011 compared to \$503,000 for the same period in 2010, primarily due to the launch of new branding campaigns.

Table of Contents**Six Months Ended June 30, 2011 vs. Six Months Ended June 30, 2010**

The following table sets forth the breakdown of non-interest expense for the periods indicated:

	Six Months Ended		Increase (Decrease)	
	2011	June 30, 2010	Amount	Percentage
			<i>(Dollars in Thousands)</i>	
Salaries and Employee Benefits	\$ 17,886	\$ 17,797	\$ 89	0.5%
Occupancy and Equipment	5,215	5,399	(184)	(3.4%)
Deposit Insurance Premiums and Regulatory Assessments	3,447	6,299	(2,852)	(45.3%)
Data Processing	2,886	2,986	(100)	(3.3%)
Professional Fees	1,927	2,088	(161)	(7.7%)
Other Real Estate Owned Expense	1,635	7,418	(5,783)	(78.0%)
Advertising and Promotion	1,474	1,038	436	42.0%
Directors and Officers Liability Insurance	1,467	1,433	34	2.4%
Supplies and Communications	1,074	1,091	(17)	(1.6%)
Loan-Related Expense	409	617	(208)	(33.7%)
Amortization of Other Intangible Assets	408	629	(221)	(35.1%)
Expenses Related to Unconsummated Capital Raises	2,220		2,220	%
Other Operating Expenses	3,899	4,194	(295)	(7.0%)
Total Non-Interest Expense	\$ 43,947	\$ 50,989	\$ (7,042)	(13.8%)

For the six months ended June 30, 2011, non-interest expense was \$43.9 million, a decrease of \$7.0 million, or 13.8 percent, from \$51.0 million for the same period in 2010. The efficiency ratio for the three months ended June 30, 2011 was 69.64 percent, compared to 75.75 percent for the same period in 2010. The \$7.0 million decrease in non-interest expense was primarily due to the decreases in OREO expense and deposit insurance premiums and regulatory assessments, partially offset by increases in expenses related to unconsummated capital raises and advertising and promotion. OREO expense decreased by \$5.8 million, or 78.0 percent, to \$1.6 million for the six months ended June 30, 2011 compared to \$7.4 million for the same period in 2010, primarily as a result of a \$6.0 million decrease in valuation allowance. The deposit insurance premiums and regulatory assessments decreased by \$2.9 million, or 45.3 percent, to \$3.4 million for the three months ended June 30, 2011 compared to \$6.3 million for the same period in 2010, primarily due to the lower assessment rates for the FDIC insurance on deposits. The average assessment rates decreased by 17 basis points to 28 basis points for the six months ended June 30, 2011 from 45 basis points for the same period in 2010, resulting from the improvement in risk categories of the Bank and the Dodd-Frank Act's changes to the FDIC assessment system in early April of 2011. Partially offsetting the declines in non-interest expense were the \$2.2 million expense for our unconsummated capital offerings and the \$436,000 increase in advertising and promotion for the six months ended June 30, 2011 compared to the same period in 2010.

Provision for Income Taxes

For the three months ended June 30, 2011, income tax expense of \$605,000 was recognized on pre-tax income of \$8.6 million, representing an effective tax rate of 7.0 percent, compared to income tax benefits of \$36,000 recognized on pre-tax loss of \$29.3 million, representing an effective tax rate of 0.1 percent for the same period in 2010. For the six months ended June 30, 2011, income tax expense of \$724,000 was recognized on pre-tax income of \$19.2 million, representing an effective tax rate of 3.8 percent, compared to income tax benefits of \$431,000 recognized on pre-tax loss of \$79.2 million, representing an effective tax rate of 0.5 percent for the same period in 2010.

The tax expense recognized for the three and six months ended June 30, 2011 was primarily due to an out of period adjustment of \$605,000 and \$718,000, respectively, to reserve for certain ASC 740-10(FIN 48) exposure items.

During the fourth quarter of 2009, the Company recorded a tax benefit upon electing a 5-year net operating loss carryback according to the IRS Code section IRC § 172(b)(1)(H) amended in November 2009. This out-of-period adjustment was to reinstate the reserves that the Company released as the statute of limitations had expired in previous years. Due to the Company filing amended tax returns as a result of the tax law revision, the Company needed to reestablish these reserves. The tax benefit recognized during the first half of 2010 was primarily due to the reversal of FIN 48 reserves related to lower assessment from the result of the State of California Franchise Tax Board audit for the tax year 2005 through 2007.

Table of Contents**FINANCIAL CONDITION****Investment Portfolio**

Investment securities are classified as held to maturity or available for sale in accordance with GAAP. Those securities that we have the ability and the intent to hold to maturity are classified as held to maturity. All other securities are classified as available for sale. There were no trading securities as of June 30, 2011 and December 31, 2010. Securities classified as held to maturity are stated at cost, adjusted for amortization of premiums and accretion of discounts, and available for sale securities are stated at fair value. The composition of our investment portfolio reflects our investment strategy of providing a relatively stable source of interest income while maintaining an appropriate level of liquidity. The investment portfolio also provides a source of liquidity by pledging as collateral or through repurchase agreement and collateral for certain public funds deposits.

As of June 30, 2011, the investment portfolio was composed primarily of mortgage-backed securities, U.S. government agency securities, and collateralized mortgage obligations. Investment securities available for sale were 99.79 percent and 99.80 percent of the total investment portfolio as of June 30, 2011 and December 31, 2010, respectively. Most of the securities held carried fixed interest rates. Other than holdings of U.S. government agency securities, there were no investments in securities of any one issuer exceeding 10 percent of stockholders' equity as of June 30, 2011 and December 31, 2010.

As of June 30, 2011, securities available for sale were \$390.2 million, or 14.4 percent of total assets, compared to \$413.1 million, or 14.2 percent of total assets, as of December 31, 2010. Securities available for sale, at fair value, decreased \$22.9 million, or 5.54 percent, from December 31, 2010 to June 30, 2011. The decrease was due primarily to \$95.6 million of sales of securities, \$108.2 million of matured and called bonds and \$24.8 million of principal paydowns, partially offset by \$200.7 million of purchased securities and \$6.3 million of fair value increases.

The following table summarizes the amortized cost, estimated fair value and unrealized gain (loss) on investment securities as of the dates indicated:

	June 30, 2011			December 31, 2010

Available for Sale	\$ 386,299	\$ 390,212	\$ 3,913	\$ 415,491	\$ 413,118	\$ (2,373)

(1) Collateralized by residential mortgages and guaranteed by U.S. government sponsored entities.

(2) Collateralized debentures of small business investment companies and state and local development companies, and guaranteed by SBA.

(3) Balances presented for amortized cost, representing two equity securities, were net of an OTTI charge of \$790,000, which was related to a credit loss, as of December 31, 2010. We recorded an OTTI charge of \$790,000 to write down the value of one equity investment to its fair value during the year ended December 31, 2010.

Table of Contents

The amortized cost and estimated fair value of investment securities as of June 30, 2011, by contractual maturity, are shown below. Although collateralized mortgage obligations, mortgage-backed securities and asset-backed securities have contractual maturities through 2041, expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Available for Sale		Held to Maturity	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
	<i>(In Thousands)</i>			
Within One Year	\$	\$	\$	\$

Other Securities	3	1,997	2	43	957	1	46	2,954	
Corporate Bonds	257	17,210	5			257	17,210	5	
	\$ 5,591	\$ 268,111	68	\$ 43	\$ 957	1	\$ 5,634	\$ 269,068	69

All individual securities that have been in a continuous unrealized loss position for 12 months or longer as of June 30, 2011 and December 31, 2010 had investment grade ratings upon purchase. The issuers of these securities have not established any cause for default on these securities and the various rating agencies have reaffirmed these securities long-term investment grade status as of June 30, 2011. These securities have fluctuated in value since their purchase dates as market interest rates have fluctuated.

The unrealized losses on investments in U.S. agencies securities were caused by changes in market interest rates or the widening of market spreads subsequent to the purchase of these securities. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than par. Because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

Table of Contents

The unrealized losses on obligations of political subdivisions were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities. Management monitors published credit ratings of these securities and no adverse ratings changes have occurred since the date of purchase of obligations of political subdivisions which are in an unrealized loss position as of June 30, 2011. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not more likely than not that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

Of the residential mortgage-backed securities and collateralized mortgage obligations portfolio in an unrealized loss position at June 30, 2011, all of them are issued and guaranteed by governmental sponsored entities. The unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities, and not by concerns regarding the underlying credit of the issuers or the underlying collateral. It is expected that these securities will not be settled at a price less than the amortized cost of each investment. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

FASB ASC 320 requires an entity to assess whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. We do not intend to sell these securities and it is not more likely than not that we will be required to sell the investments before the recovery of its amortized cost bases. Therefore, in the opinion of management, all securities that have been in a continuous unrealized loss position for the past 12 months or longer as of June 30, 2011 and December 31, 2010 are not other-than-temporarily impaired, and therefore, no impairment charges as of June 30, 2011 and December 31, 2010 are warranted.

Investment securities available for sale with carrying values of \$66.2 million and \$118.0 million as of June 30, 2011 and December 31, 2010, respectively, were pledged to secure FHLB advances, public deposits and for other purposes as required or permitted by law.

Table of Contents**Loan Portfolio**

The following table shows the loan composition by type, including loans held for sale, as of the dates indicated.

⁽¹⁾ Includes loans held for sale, at the lower of cost or fair value, of \$708,000 and \$2.3 million as of June 30, 2011 and December 31, 2010, respectively.

⁽²⁾ Includes loans held for sale, at the lower of cost or fair value, of \$0 and \$1.4 million as of June 30, 2011 and December 31, 2010, respectively.

⁽³⁾ Includes owner-occupied property loans of \$846.5 million and \$894.8 million as of June 30, 2011 and December 31, 2010, respectively.

⁽⁴⁾ Includes loans held for sale, at the lower of cost or fair value, of \$12.9 million and \$14.9 million as of June 30, 2011 and December 31, 2010, respectively.

⁽⁵⁾ *Includes loans held for sale, at the lower of cost or fair value, of \$30.3 million and \$18.1 million as of June 30, 2011 and December 31, 2010, respectively.*

As of June 30, 2011 and December 31, 2010, loans receivable (including loans held for sale), net of deferred loan fees and allowance for loan losses, totaled \$2.00 billion and \$2.12 billion, respectively, a decrease of \$117.4 million, or 5.5 percent. Total gross loans decreased by \$155.0 million, or 6.8 percent, from \$2.27 billion as of December 31, 2010 to \$2.11 billion as of June 30, 2011.

During the first half of 2011, total new loan production and advances amounted to \$169.1 million. For the same period, we experienced decreases in loans totaling \$323.5 million, comprised of \$224.5 million in principal amortization and payoffs, \$47.7 million in charge-offs, \$49.2 million in problem loan sales, and \$2.1 million that were transferred to OREO. For the first half of 2011, the \$41.9 million decrease in commercial property loans was attributable to \$64.2 million in principal amortization and payoffs, \$12.0 million in charge-offs, and \$21.5 million in loan sales, partially offset by new loan production and advances of \$55.8 million. The \$88.8 million decrease in commercial term loans for the six months ended June 30, 2011 was attributable to \$117.2 million in principal amortization and payoffs, \$24.1 million in charge-offs, and \$22.6 million in loan sales, partially offset by new loan production and advances of \$75.1 million.

Real estate loans, composed of commercial property, construction loans and residential property, decreased \$68.0 million, or 7.9 percent, to \$788.6 million as of June 30, 2011 from \$856.5 million as of December 31, 2010, representing 37.3 percent and 37.8 percent, respectively, of total gross loans. Commercial and industrial loans, composed of owner-occupied commercial property, trade finance, SBA and commercial lines of credit, decreased \$83.2 million, or 6.1 percent, to \$1.28 billion as of June 30, 2011 from \$1.36 billion as of December 31, 2010, representing 60.5 percent and 60.0 percent, respectively, of total gross loans. Consumer loans decreased \$3.8 million, or 7.6 percent, to \$46.5 million as of June 30, 2011 from \$50.3 million as of December 31, 2010.

Table of Contents

As of June 30, 2011, our loan portfolio included the following concentrations of loans to one type of industry that were greater than 10 percent of total gross loans outstanding:

Industry	Balance as of June 30, 2011 (In Thousands)	Percentage of Total Gross Loans Outstanding
Lessors of Non-Residential Buildings	\$ 372,732	17.6%
Accommodation/Hospitality	\$ 307,428	14.6%
Gasoline Stations	\$ 270,816	12.8%

There was no other concentration of loans to any one type of industry exceeding ten percent of total gross loans outstanding.

Non-Performing Assets

Non-performing loans consist of loans on non-accrual status and loans 90 days or more past due and still accruing interest. Non-performing assets consist of non-performing loans and OREO. Loans are placed on non-accrual status when, in the opinion of management, the full timely collection of principal or interest is in doubt. Generally, the accrual of interest is discontinued when principal or interest payments become more than 90 days past due, unless management believes the loan is adequately collateralized and in the process of collection. However, in certain instances, we may place a particular loan on non-accrual status earlier, depending upon the individual circumstances surrounding the loan's delinquency. When an asset is placed on non-accrual status, previously accrued but unpaid interest is reversed against current income. Subsequent collections of cash are applied as principal reductions when received, except when the ultimate collectibility of principal is probable, in which case interest payments are credited to income. Non-accrual assets may be restored to accrual status when principal and interest become current and full repayment is expected. Interest income is recognized on the accrual basis for impaired loans not meeting the criteria for non-accrual. OREO consists of properties acquired by foreclosure or similar means that management intends to offer for sale.

Management's classification of a loan as non-accrual is an indication that there is reasonable doubt as to the full collectibility of principal or interest on the loan; at this point, we stop recognizing income from the interest on the loan and reverse any uncollected interest that had been accrued but unpaid. These loans may or may not be collateralized, but collection efforts are continuously pursued.

Except for non-performing loans set forth below, management is not aware of any loans as of June 30, 2011 and December 31, 2010 for which known credit problems of the borrower would cause serious doubts as to the ability of such borrowers to comply with their present loan repayment terms, or any known events that would result in the loan being designated as non-performing at some future date. Management cannot, however, predict the extent to which a deterioration in general economic conditions, real estate values, increases in general rates of interest, or changes in the financial condition or business of borrower may adversely affect a borrower's ability to pay.

Table of Contents

The following table provides information with respect to the components of non-performing assets as of the dates indicated:

	June 30, 2011	December 31, 2010	Increase (Decrease)	
			Amount	Percentage
	<i>(Dollars in Thousands)</i>			
Non-Performing Loans:				
Non-Accrual Loans:				
Real Estate Loans:				
Commercial Property	\$ 44,132	\$ 47,937	\$ (3,805)	(7.9%)
Construction	12,298	19,097	(6,799)	(35.6%)
Residential Property	1,726	1,925	(199)	(10.3%)
Commercial and Industrial Loans:				
Commercial Term	70,811	63,012	7,799	12.4%
Commercial Lines of Credit	2,905	2,798	107	3.8%
SBA	31,163	33,085	(1,922)	(5.8%)
International	3,243	127	(3,116)	%
Consumer Loans	824	1,047	(223)	(21.3%)
Total Non-Accrual Loans	167,102	169,028	(1,926)	(1.1%)
Loans 90 Days or More Past Due and Still Accruing (as to Principal or Interest):				
Total Non-Performing Loans ^{(1) (2)}	167,102	169,028	(1,926)	(1.1%)
Other Real Estate Owned	1,340	4,089	(2,749)	(67.2%)
Total Non-Performing Assets	\$ 168,442	\$ 173,117	\$ (4,675)	(2.7%)
Non-Performing Loans as a Percentage of Total Gross Loans	7.91%	7.45%		
Non-Performing Assets as a Percentage of Total Assets	6.21%	5.95%		
Troubled Debt Restructured Performing Loans	\$ 19,793	\$ 47,395	\$ (27,602)	(58.2%)

(1) Includes troubled debt restructured non-performing loans of \$66.0 million and \$27.0 million as of June 30, 2011 and December 31, 2010, respectively.

(2) Includes loans held for sale.

Non-accrual loans totaled \$167.1 million as of June 30, 2011, compared to \$169.0 million as of December 31, 2010, representing a 1.1 percent decrease. Delinquent loans (defined as 30 days or more past due) were \$97.2 million

as of June 30, 2011, compared to \$147.5 million as of December 31, 2010, representing a 34.1 percent decrease. Of the \$97.2 million delinquent loans as of June 30, 2011, \$81.6 million was included in non-performing loans. The \$126.1 million of \$147.5 million delinquent loans as of December 31, 2010 was included in non-performing loans. During the first six months of 2011, loans totaling \$81.8 million were placed on nonaccrual status. The additions to nonaccrual loans of \$81.8 million were offset by \$35.1 million in charge-offs, \$29.3 million in sales of problem loans, \$14.3 million in principal paydowns and payoffs, \$3.2 million that were placed back to accrual status, and \$1.9 million that were transferred to OREO.

The ratio of non-performing loans to total gross loans increased to 7.91 percent at June 30, 2011 from 7.45 percent at December 31, 2010. During the same period, our allowance for loan losses decreased by \$37.0 million, or 25.4 percent, to \$109.0 million from \$146.1 million. Of the \$167.1 million non-performing loans, approximately \$128.9 million were impaired based on the definition contained in FASB ASC 310, Receivables, which resulted in aggregate impairment reserve of \$19.3 million as of June 30, 2011. We calculate our allowance for the collateral-dependent loans as the difference between the outstanding loan balance and the value of the collateral as determined by recent appraisals less estimated costs to sell. The allowance for collateral-dependent loans varies from loan to loan based on the collateral coverage of the loan at the time of designation as non-performing. We continue to monitor the collateral coverage, based on recent appraisals, on these loans on a quarterly basis and adjust the allowance accordingly.

As of June 30, 2011, \$140.2 million, or 83.9 percent, of the \$167.1 million of non-performing loans were secured by real estate, compared to \$138.1 million, or 81.7 percent, of the \$169.0 million of non-performing loans as of December 31, 2010. In light of declining property values in the current challenging economic condition affecting the real estate markets, the Bank obtained current appraisals for most non-performing loan collaterals, but factored in adequate market discounts on some non-performing loan collaterals to compensate for their non-current appraisals.

Table of Contents

As of June 30, 2011, other real estate owned consisted of five properties, primarily located in California, with a combined net carrying value of \$1.3 million. During the six months ended June 30, 2011, five properties, with a carrying value of \$2.8 million, were transferred from loans receivable to other real estate owned and eight properties, with a carrying value of \$4.4 million, were sold and a loss of \$681,000 was recognized. As of December 31, 2010, other real estate owned consisted of eight properties with a combined net carrying value of \$4.1 million.

We evaluate loan impairment in accordance with applicable GAAP. Loans are considered impaired when it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement, including scheduled interest payments. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as an expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent, less costs to sell. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses or, alternatively, a specific allocation will be established. Additionally, impaired loans are specifically excluded from the quarterly migration analysis when determining the amount of the allowance for loan losses required for the period.

⁽¹⁾ *Represents interest income recognized on impaired loans subsequent to classification as impaired.*

For the three and six months ended June 30, 2011, we recognized interest income of \$0 and \$33,000, respectively, on one impaired commercial term loan secured by real estate using a cash-basis method. For the three and six months ended June 30, 2010, we recognized interest income of \$67,000 and \$204,000, respectively, on one impaired commercial term loan secured by real estate using a cash-basis method. Except for such loan, no other interest income was recognized on impaired loans subsequent to classification as impaired using a cash-basis method.

Table of Contents

The following is a summary of interest foregone on impaired loans for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2011	2010	2011	2010
	<i>(In Thousands)</i>			
Interest Income That Would Have Been Recognized Had Impaired Loans Performed in Accordance With Their Original Terms	\$ 2,001	\$ 3,755	\$ 4,475	\$ 7,030
Less: Interest Income Recognized on Impaired Loans	(629)	(237)	(1,160)	(714)
Interest Foregone on Impaired Loans	\$ 1,372	\$ 3,518	\$ 3,315	\$ 6,316

There were no commitments to lend additional funds to borrowers whose loans are included above.

During the six months ended June 30, 2011, we restructured monthly payments on 92 loans, with a net carrying value of \$77.4 million as of June 30, 2011, through temporary payment structure modification from principal and interest due monthly to interest only due monthly for six months or less. For the restructured loans on accrual status, we determined that, based on the financial capabilities of the borrowers at the time of the loan restructuring and the borrowers' past performance in the payment of debt service under the previous loan terms, we believe that performance and collection under the revised terms is probable. As of June 30, 2011, troubled debt restructurings on accrual status totaled \$19.8 million, all of which were temporary interest rate reductions, and a \$4.4 million reserve relating to these loans is included in the allowance for loan losses. Troubled debt restructurings on accrual status are comprised of loans that are contractually current and have sustained repayment ability and performance or well secured and in process of collection. As of December 31, 2010, troubled debt restructured loans on accrual status totaled \$47.4 million and a \$6.4 million reserve relating to these loans is included in the allowance for loan losses.

Allowance for Loan Losses and Allowance for Off-Balance Sheet Items

The Bank will charge off a loan and declare a loss when its collectability is sufficiently questionable that the Bank can no longer justify showing the loan as an asset on its balance sheet. To determine if a loan should be charged off, all possible sources of repayment are analyzed, including the potential for future cash flow from income or liquidation of other assets, the value of any collateral, and the strength of co-makers or guarantors. When these sources do not provide a reasonable probability that principal can be collected in full, the Bank will fully or partially charge off the loan.

Provisions to the allowance for loan losses are made quarterly to recognize probable loan losses. The quarterly provision is based on the allowance need, which is determined through analysis involving quantitative calculations based on historic loss rates for general reserves and individual impairment calculations for specific allocations to impaired loans as well as qualitative adjustments.

To determine general reserve requirements, existing loans are divided into 10 general loan pools of risk-rated loans (commercial real estate, construction, commercial term unsecured, commercial term T/D secured, commercial line of credit, SBA, international, consumer installment, consumer line of credit, and miscellaneous loans) as well as 3 homogenous loan pools (residential mortgage, auto loans, and credit card). For risk-rated loans, migration analysis allocates historical losses by loan pool and risk grade (pass, special mention, substandard, and doubtful) to determine risk factors for potential loss inherent in the current outstanding loan portfolio.

During the first quarter of 2010, to enhance reserve calculations to better reflect the Bank's current loss profile, the two loan pools of commercial real estate and commercial term T/D secured were subdivided according to the 21 collateral codes used by the Bank to identify commercial property types (apartment, auto, car wash, casino, church, condominium, gas station, golf course, industrial, land, manufacturing, medical, mixed used, motel, office, retail, school, supermarket, warehouse, wholesale, and others). This further segregation allows the Bank to more specifically allocate reserves within the commercial real estate portfolio according to risks defined by historic loss as well as

current loan concentrations of the different collateral types.

Risk factor calculations were previously based on 12-quarters of historic loss analysis with 1.5 to 1 weighting given to the most recent six quarters. In the first quarter of 2010, the historic loss window was reduced to eight quarters with 1.5 to 1 weighting given to the most recent four quarters. The enhanced window places greater emphasis on losses taken by the Bank within the past year, as recent loss history is more relevant to the Bank's risks given the rapid changes to asset quality within the current economic conditions.

Table of Contents

As homogenous loans are bulk graded, the risk grade is not factored into the historical loss analysis; however, as with risk-rated loans, risk factor calculations are based on 8-quarters of historic loss analysis with 1.5 to 1 weighting given to the most recent four quarters.

The Bank will charge off a loan and declare a loss when its collectability is sufficiently questionable that the Bank can no longer justify showing the loan as an asset on its balance sheet. To determine if a loan should be charged off, all possible sources of repayment are analyzed, including the potential for future cash flow from income or liquidation of other assets, the value of any collateral, and the strength of co-makers or guarantors. When these sources do not provide a reasonable probability that principal can be collected in full, the Bank will fully or partially charge off the loan.

For purposes of determining the allowance for credit losses, the loan portfolio is subdivided into three portfolio segments: real estate, commercial and industrial, and consumer. The portfolio segment of real estate contains the allowance loan pools of commercial real estate, construction, and residential mortgage. The portfolio segment of commercial and industrial contains the loan pools of commercial term unsecured, commercial term T/D secured, commercial line of credit, SBA, international, and miscellaneous. Lastly, the portfolio segment of Consumer contains the loan pools of consumer installment, consumer line of credit, auto, and credit card.

Real estate loans, which are mostly dependent on rental income from non-owner occupied or investor properties, have been subject to increased losses. Prior to 2009, no historic losses were recorded for loans secured by commercial real estate. However, given the decrease in sales and increase in vacancies due to the current slowed economy, losses in loans secured by office and retail properties have been significant. Loans secured by vacant land have also had significant losses as valuations have decreased and further development has been limited. Also, commercial term T/D secured loans, which are mostly owner-occupied property loans, have been subject to decreases in collateral value and have had more losses than prior to the current economic condition. Similarly, construction loans have been subject to losses due to unforeseen difficulties in completion of projects. As such, allocations to general reserves for those loan pools have been higher than that of loan pools with lower risk. Residential mortgage loans constitute a limited concentration within the Bank's entire loan portfolio, and losses as well as supplementary reserves have been minimal.

Commercial and industrial loans, which are largely subject to changes in business cash flow, have had the most historic losses within the Bank's entire loan portfolio. The largest loan pool within the commercial and industrial sector is commercial term T/D secured, which are mostly loans secured by owner-occupied business properties. Loans secured by car washes, gas stations, golf courses, and motels have had the most significant losses, as the hospitality and recreation industries have been negatively affected by the current economy. As such, allocations to general reserve for those loan pools have been increased. Also, commercial term unsecured and SBA loans have had considerable losses and additional general reserves as decreased business cash flow due to the challenging economic condition has weakened borrowers' repayment abilities.

Consumer loans constitute a limited concentration within the Bank's loan portfolio and are mostly evaluated in bulk for general reserve requirements due to the relatively small volume per loan.

Specific reserves are allocated for loans deemed impaired. FASB ASC 310, Receivables, indicates that a loan is impaired when it is probable that a creditor will be unable to collect all amounts due, including principal and interest, according to the contractual terms and schedules of the loan agreement. Loans that represent significant concentrations of credit, material non-performing loans, insider loans and other material credit exposures are subject to FASB ASC 310 impairment analysis.

Loans that are determined to be impaired under FASB ASC 310, are individually analyzed to estimate the Bank's exposure to loss based on the following factors: the borrower's character, the current financial condition of the borrower and the guarantor, the borrower's resources, the borrower's payment history, repayment ability, debt servicing ability, action plan, the prevailing value of the underlying collateral, the Bank's lien position, general economic conditions, specific industry conditions, and outlook for the future.

The loans identified as impaired are measured using one of the three methods of valuations: (1) the present value of expected future cash flows discounted at the loan's effective interest rate, (2) the fair market value of the collateral if the loan is collateral dependent, or (3) the loan's observable market price.

Table of Contents

When determining the appropriate level for allowance for loan losses, the management considers qualitative adjustments for any factors that are likely to cause estimated credit losses associated with the Bank's current portfolio to differ from historical loss experience, including but not limited to:

changes in lending policies and procedures, including underwriting standards and collection, charge-offs, and recovery practice;

changes in national and local economic and business conditions and developments, including the condition of various market segments;

changes in the nature and volume of the portfolio;

changes in the trend of the volume and severity of past due and classified loans, and trends in the volume of non-accrual loans, troubled debt restructurings, charge-offs and other loan modifications;

changes in the quality of the Bank's loan review system and the degree of oversight by the Board of Directors;

the existence and effect of any concentrations of credit, and changes in the level of such concentrations;

transfer risk on cross-border lending activities; and

the effect of external factors such as competition and legal and regulatory requirements as well as declining collateral values on the level of estimated credit losses in the Bank's current portfolio.

In order to systematically quantify the credit risk impact of trends and changes within the loan portfolio, a credit risk matrix is utilized. The above factors are considered on a loan pool by loan pool basis subsequent to, and in conjunction with, a loss migration analysis. The credit risk matrix provides various scenarios with positive or negative impact on the asset portfolio along with corresponding basis points for qualitative adjustments.

The following table reflects our allocation of allowance for loan and lease losses by loan category as well as the loans receivable for each loan type:

Allowance for Loan Losses Applicable To	June 30, 2011		December 31, 2010	
	Allowance Amount	Loans Receivable	Allowance Amount	Loans Receivable
	<i>(Dollars in Thousands)</i>			
Real Estate Loans:				
Commercial Property	\$ 21,298	\$ 688,842	\$ 26,248	\$ 729,222
Construction	1,984	40,684	5,606	60,995
Residential Property	833	58,059	911	62,645
Total Real Estate Loans ⁽¹⁾	24,115	787,585	32,765	852,862
Commercial and Industrial Loans: ⁽¹⁾	82,845	1,234,519	108,986	1,327,910
Consumer Loans	1,587	46,500	2,077	50,300
Unallocated	482		2,231	
Total	\$ 109,029	\$ 2,068,604	\$ 146,059	\$ 2,231,072

62

Table of Contents

The following table sets forth certain information regarding our allowance for loan losses and allowance for off-balance sheet items for the periods presented. Allowance for off-balance sheet items is determined by applying reserve factors according to loan pool and grade as well as actual current commitment usage figures by loan type to existing contingent liabilities.

	As of and for the Three Months Ended			As of and for the Six Months Ended	
	June 30, 2011	March 31, 2011	June 30, 2010	June 30, 2011	June 30, 2010

Non-Performing Loans at End of Period	\$ 167,102	\$ 151,730	\$ 242,133	\$ 167,102	\$ 242,133

⁽¹⁾ *Net loan charge-offs are annualized to calculate the ratios.*

The allowance for loan losses decreased by \$37.0 million, or 25.4 percent, to \$109.0 million as of June 30, 2011 as compared to \$146.1 million as of December 31, 2010. The allowance for loan losses as a percentage of total gross loans decreased to 5.16 percent as of June 30, 2011 from 6.44 percent as of December 31, 2010. For the three months ended June 30, 2011 and 2010, the provision for credit losses was \$0 and \$37.5 million, respectively. For the six months ended June 30, 2011 and 2010, the provision for credit losses was \$0 and \$95.5 million, respectively. For the three months ended June 30, 2011, the \$250,000 provision for off-balance items was offset by the \$250,000 reversal in provision for loans, resulting in the \$0 total provision for credit losses as of June 30, 2011. For the six months ended June 30, 2011, the \$1.0 million provision for loans was offset by the \$1.0 million reversal in provision for off-balance items, resulting in the \$0 total provision for credit losses as of June 30, 2011.

The decrease in the allowance for loan losses as of June 30, 2011 was due primarily to subsequent decreases in historical loss rates, classified assets, and overall gross loans. Due to these factors, general reserves decreased \$33.8 million, or 38.1 percent, to \$54.9 million as of June 30, 2011 as compared to \$88.7 million at December 31, 2010. In addition, total qualitative reserves decreased \$2.0 million, or 8.1 percent, to \$23.5 million as of June 30, 2011 as compared to \$25.5 million as of December 31, 2010. This was a direct result of the decrease in overall loan volume of \$155.0 million, or 6.8 percent, to \$2.11 billion at June 30, 2011 as compared to \$2.27 billion at December 31, 2011. Improvements in metrics related to credit quality as well as decreases in overall gross loan balances have directly resulted in subsequent decreases in allowance and provision for loan losses as of June 30, 2011.

Total impaired loans, excluding loans held for sale, decreased \$11.2 million, or 5.5 percent, to \$193.5 million as of June 31, 2011 as compared to \$204.7 million at December 31, 2010. However, specific reserve allocations associated with impaired loans increased \$0.3 million, or 0.8 percent, to \$29.7 million as of June 30, 2011 as compared

Table of Contents

to \$29.4 million as of December 31, 2010. The increase in impairment reserves was mostly due to more conservative discounts taken by the Bank on out-dated valuations and out-of-state collaterals as a measure of prudence against potential losses.

The following table presents a summary of charge-offs by the loan portfolio.

	As of and for the			
	Three Months Ended June 30, 2011	2010	Six Months Ended June 30, 2011	2010
	<i>(Dollars in Thousands)</i>			
Charge-offs:				
Real Estate Loans	\$ 5,591	\$ 12,412	\$ 12,644	\$ 17,817
Commercial Term Loans	9,591	19,572	23,939	40,426
SBA Loans	577	3,354	3,730	6,334
Commercial Lines of Credit	4,453	4,831	4,904	5,083
International Loans	120	194	120	194
Consumer Loans	320	355	496	978
Total Charge-offs	20,652	40,718	45,833	70,832
Recoveries:				
Real Estate Loans	2,223	162	2,744	1,865
Commercial Term Loans	1,666	1,015	4,594	2,596
SBA Loans	122	136	232	487
Commercial Lines of Credit	4	42	56	86
International Loans	123	337	129	338
Consumer Loans	13	80	22	121
Total Recoveries	4,151	1,772	7,777	5,493
Net Charge-offs	\$ 16,501	\$ 38,946	\$ 38,056	\$ 65,339

For the three months ended June 30, 2011, total net charge-offs were \$16.5 million, compared to \$38.9 million for the same period in 2010. During the six months ended June 30, 2011, total net charge-offs were \$38.1 million, compared to \$65.3 million for the same period in 2010.

The Bank recorded in other liabilities an allowance for off-balance sheet exposure, primarily unfunded loan commitments, of \$2.4 million and \$3.4 million as of June 30, 2011 and December 31, 2010, respectively. The decrease was primarily due to lower reserve factors based on historical loss rates as well as decreases in total off-balance items. The Bank closely monitors the borrower's repayment capabilities while funding existing commitments to ensure losses are minimized. Based on management's evaluation and analysis of portfolio credit quality and prevailing economic conditions, we believe these reserves are adequate for losses inherent in the loan portfolio and off-balance sheet exposure as of June 30, 2011 and December 31, 2010.

Deposits

The following table shows the composition of deposits by type as of the dates indicated.

June 30, 2011	December 31, 2010		Increase (Decrease)	
	Amount	Percentage	Amount	Percentage
<i>(Dollars in Thousands)</i>				

Edgar Filing: HANMI FINANCIAL CORP - Form 10-Q

Demand Noninterest-Bearing	\$ 600,812	\$ 546,815	\$ 53,997	9.9%
Interest-Bearing:				
Savings	110,935	113,968	(3,033)	(2.7%)
Money Market Checking and NOW Accounts	484,132	402,481	81,651	20.3%
Time Deposits of \$100,000 or More	878,871	1,118,621	(239,750)	(21.4%)
Other Time Deposits	323,625	284,836	38,789	13.6%
Total Deposits	\$ 2,398,375	\$ 2,466,721	\$ (68,346)	(2.8%)

Total deposits decreased \$68.3 million, or 2.8 percent, to \$2.40 billion as of June 30, 2011 from \$2.47 billion as of December 31, 2010. Total time deposits outstanding decreased \$201.0 million, or 14.3 percent, to \$1.20 billion as of June 30, 2011 from \$1.40 billion as of December 31, 2010, representing 50.1 percent and 56.9 percent, respectively, of total deposits. The decreases in total deposits were the direct results of strategic plans aiming to increase core deposits while reducing the reliance on volatile wholesale funds and rate-sensitive time deposits. During the first half of 2011, \$166.4 million of high-cost promotional time deposits and \$152.9 million of deposits raised from rate listing services

Table of Contents

matured. Core deposits (defined as total deposits less time deposits greater than \$100,000) increased by \$171.4 million, or 12.7 percent, to \$1.52 billion as of June 30, 2011 from \$1.35 billion as of December 31, 2010. At June 30, 2011, noninterest-bearing demand deposits represented 25.1 percent of total deposits compared to 22.2 percent at December 31, 2010. We had no brokered deposits as of June 30, 2011 and December 31, 2010. As of June 30, 2011, time deposits of more than \$250,000 were \$346.9 million.

Federal Home Loan Bank Advances

FHLB advances and other borrowings mostly take the form of advances from the FHLB of San Francisco and overnight federal funds. At June 30, 2011, advances from the FHLB were \$3.5 million, a decrease of \$150.1 million from the December 31, 2010 balance of \$153.7 million. As of June 30, 2011, there were no FHLB advances with a remaining maturity of less than one year.

Junior Subordinated Debentures

During the first half of 2004, we issued two junior subordinated notes bearing interest at the three-month London InterBank Offered Rate (LIBOR) plus 2.90 percent totaling \$61.8 million and one junior subordinated note bearing interest at the three-month LIBOR plus 2.63 percent totaling \$20.6 million. The outstanding subordinated debentures related to these offerings, the proceeds of which were used to finance the purchase of Pacific Union Bank, totaled \$82.4 million at June 30, 2011 and December 31, 2010. In October 2008, we committed to the FRB that no interest payments on the junior subordinated debentures would be made without the prior written consent of the FRB. Therefore, in order to preserve its capital position, Hanmi Financial's Board of Directors has elected to defer quarterly interest payments on its outstanding junior subordinated debentures until further notice, beginning with the interest payment that was due on January 15, 2009. In addition, we are prohibited from making interest payments on our outstanding junior subordinated debentures under the terms of our recently issued regulatory enforcement actions without the prior written consent of the FRB and DFI. Accrued interest payable on junior subordinated debentures amounted to \$8.3 million and \$6.9 million at June 30, 2011 and December 31, 2010, respectively.

Table of Contents**INTEREST RATE RISK MANAGEMENT**

Interest rate risk indicates our exposure to market interest rate fluctuations. The movement of interest rates directly and inversely affects the economic value of fixed-income assets, which is the present value of future cash flow discounted by the current interest rate; under the same conditions, the higher the current interest rate, the higher the denominator of discounting. Interest rate risk management is intended to decrease or increase the level of our exposure to market interest rates. The level of interest rate risk can be managed through such means as the changing of gap positions and the volume of fixed-income assets. For successful management of interest rate risk, we use various methods to measure existing and future interest rate risk exposures, giving effect to historical attrition rates of core deposits. In addition to regular reports used in business operations, repricing gap analysis, stress testing and simulation modeling are the main measurement techniques used to quantify interest rate risk exposure.

The following table shows the status of our gap position as of June 30, 2011:

	Within Three Months	After Three Months But Within One Year	After One Year But Within Five Years	After Five Years	Non- Interest- Sensitive	Total
ASSETS						
Cash and Due From Banks	\$	\$	\$	\$	\$ 67,166	\$ 67,166

Cumulative Repricing Gap as a Percentage of

Interest-Earning Assets	49.29%	21.47%	23.13%	25.76%		
-------------------------	--------	--------	--------	--------	--	--

The repricing gap analysis measures the static timing of repricing risk of assets and liabilities (i.e., a point-in-time analysis measuring the difference between assets maturing or repricing in a period and liabilities maturing or repricing within the same period). Assets are assigned to maturity and repricing categories based on their expected repayment or repricing dates, and liabilities are assigned based on their repricing or maturity dates. Core deposits that have no maturity dates (demand deposits, savings, money market checking and NOW accounts) are assigned to categories based on expected decay rates.

Table of Contents

As of June 30, 2011, the cumulative repricing gap for the three-month period was at an asset-sensitive position and was 49.29 percent of interest-earning assets, which increased from 33.67 percent as of December 31, 2010. The increase was mainly caused by decreases of \$150.0 million and \$243.2 million in Federal Home Loan Bank advances and fixed rate time deposits, respectively, partially offset by decreases of \$54.6 million and \$49.1 million in interest-bearing deposits in other banks and fixed rate loans, respectively.

The cumulative repricing gap for the twelve-month period was at an asset-sensitive position and was 21.47 percent of interest-earning assets, which decreased from 31.25 percent as of December 31, 2010. The decrease was primarily caused by decreases of \$160.9 million, \$89.0 million, \$57.0 million, and \$5.1 million in fixed rate loans, floating rate loans, interest-bearing deposits in other banks, and floating rate securities, respectively, and increases of \$166.4 million and \$36.3 million in fixed rate time deposits, and money market checking and NOW accounts, respectively. Partially offsetting the declines in the twelve-month period gap were a decrease of \$150.0 million in FHLB advances and an increase of \$44.8 million in fixed rate investment securities, respectively.

The following table summarizes the status of the cumulative gap position as of the dates indicated.

	Less Than Three Months		Less Than Twelve Months	
	June 30, 2011	December 31, 2010	June 30, 2011	December 31, 2010
	<i>(Dollars in Thousands)</i>			
Cumulative Repricing Gap	\$ 1,235,281	\$ 921,942	\$ 538,037	\$ 855,812
Cumulative Repricing Gap as a Percentage of Total Assets	45.57%	31.71%	19.85%	29.44%
Cumulative Repricing Gap as a Percentage of Interest-Earning Assets	49.29%	33.67%	21.47%	31.25%

The spread between interest income on interest-earning assets and interest expense on interest-bearing liabilities is the principal component of net interest income, and interest rate changes substantially affect our financial performance. We emphasize capital protection through stable earnings rather than maximizing yield. To achieve stable earnings, we prudently manage our assets and liabilities and closely monitor the percentage changes in net interest income and equity value in relation to limits established within our guidelines.

To supplement traditional gap analysis, we perform simulation modeling to estimate the potential effects of interest rate changes. The following table summarizes one of the stress simulations performed to forecast the impact of changing interest rates on net interest income and the market value of interest-earning assets and interest-bearing liabilities reflected on our balance sheet (i.e., an instantaneous parallel shift in the yield curve of the magnitude indicated). This sensitivity analysis is compared to policy limits, which specify the maximum tolerance level for net interest income exposure over a one-year horizon, given the basis point adjustment in interest rates reflected below.

Change in Interest Rate	Rate Shock Table		Change in Amount	
	Percentage Changes		Net	Economic
	Net Interest Income	Economic Value of Equity	Interest Income	Value of Equity
	<i>(Dollars in Thousands)</i>			
200%	10.26%	(8.91)%	\$ 11,285	\$ (30,908)
100%	4.62%	(4.37)%	\$ 5,081	\$ (15,174)
(100%)	(1)	(1)	(1)	(1)
(200%)	(1)	(1)	(1)	(1)

⁽¹⁾ The table above only reflects the impact of upward shocks due to the fact that a downward parallel shock of 100 basis points or more is not possible given that some short-term rates are currently less than one percent.

The estimated sensitivity does not necessarily represent our forecast, and the results may not be indicative of actual changes to our net interest income. These estimates are based upon a number of assumptions including: the nature and timing of interest rate levels including yield curve shape, prepayments on loans and securities, pricing strategies on loans and deposits, and replacement of asset and liability cash flows. While the assumptions used are based on current economic and local market conditions, there is no assurance as to the predictive nature of these conditions, including how customer preferences or competitor influences might change.

Table of Contents**CAPITAL RESOURCES AND LIQUIDITY*****Capital Resources***

Historically, our primary source of capital has been the retention of operating earnings. To ensure adequate capital levels, the Board continually assesses projected sources and uses of capital in conjunction with projected increases in assets and levels of risk. Management considers, among other things, earnings generated from operations, and access to capital from financial markets through the issuance of additional securities, including common stock or notes, to meet our capital needs.

Under the Final Order, the Bank is required to increase its capital and maintain certain regulatory capital ratios prior to certain dates specified in the Final Order. By July 31, 2010, the Bank was required to increase its contributed equity capital by not less than an additional \$100 million, and maintain a ratio of tangible stockholders' equity to total tangible assets of at least 9.0 percent. By December 31, 2010, and thereafter during the life of the Final Order, the Bank will be required to maintain a ratio of tangible stockholders' equity to total tangible assets of not less than 9.5 percent.

If the Bank is not able to maintain the capital ratios identified in the Final Order, it must notify the DFI, and Hanmi Financial and the Bank are required to notify the FRB if their respective capital ratios fall below those set forth in the capital plan submitted to the FRB. On July 27, 2010, we completed a registered rights and best efforts offering in which we raised \$116.8 million in net proceeds. As a result, we satisfied the \$100 million capital contribution requirement set forth in the Final Order. While the Bank's tangible stockholders' equity to total tangible assets ratio was 8.59 percent at December 31, 2010, the ratio increased to 10.33 percent at June 30, 2011. Therefore, the Bank is currently in compliance with the tangible capital ratio requirement. Further, the Bank's capital ratios exceeded the ratios required to be considered well capitalized under the regulatory PCA guidelines.

Our board has assessed and will continue to periodically assess our capital position. If it determines that the Bank's capital does not exceed the amount necessary to fund its operating and strategic needs and to fully comply with regulatory orders we are subject to, we will evaluate various opportunities to further enhance our capital position with additional capital.

Liquidity Hanmi Financial

Currently, management believes that Hanmi Financial, on a stand-alone basis, has adequate liquid assets to meet its operating cash needs through December 31, 2011. On August 29, 2008, we elected to suspend payment of quarterly dividends on our common stock in order to preserve our capital position. In addition, Hanmi Financial has elected to defer quarterly interest payments on its outstanding junior subordinated debentures until further notice, beginning with the interest payment that was due on January 15, 2009. As of June 30, 2011, Hanmi Financial's liquid assets, including amounts deposited with the Bank, totaled \$6.3 million, down from \$7.7 million as of December 31, 2010.

Liquidity Hanmi Bank

Management believes that the Bank, on a stand-alone basis, has adequate liquid assets to meet its current obligations. The Bank's primary funding source will continue to be deposits originating from its branch platform. The Bank's wholesale funds historically consisted of FHLB advances and brokered deposits. As of June 30, 2011, in compliance with its regulatory restrictions, the Bank had no brokered deposits, and had FHLB advances of \$3.5 million, a decrease of \$150.2 million from \$153.7 million at December 31, 2010.

The Bank's primary source of borrowings is the FHLB, from which the Bank is eligible to borrow up to 15 percent of its total assets. As of June 30, 2011, the total borrowing capacity available based on pledged collateral and the remaining available borrowing capacity were \$391.2 million and \$387.7 million, respectively. The Bank's FHLB borrowings as of June 30, 2011 totaled \$3.5 million, representing 0.1 percent of total assets. As of August 5, 2011, the Bank's FHLB borrowing capacity available based on pledged collateral and the remaining available borrowing capacity were \$378.1 million and \$374.6 million, respectively. The amount that the FHLB is willing to advance differs based on the quality and character of qualifying collateral pledged by the Bank, and the advance rates for qualifying collateral may be adjusted upwards or downwards by the FHLB from time to time. To the extent deposit renewals and deposit growth are not sufficient to fund maturing and withdrawable deposits, repay maturing borrowings, fund existing and future loans and investment securities and otherwise fund working capital needs and capital expenditures, the Bank may utilize the remaining borrowing capacity from its FHLB borrowing arrangement.

Table of Contents

As a means of augmenting its liquidity, the Bank had an available borrowing source of \$150.5 million from the Federal Reserve Discount Window (the Fed Discount Window), to which the Bank pledged loans with a carrying value of \$321.1 million, and had no borrowings as of June 30, 2011. The Bank is currently in the secondary program of the Borrower in Custody Program of the Fed Discount Window, which allows the Bank to request very short-term credit (typically overnight) at a rate that is above the primary credit rate within a specified period. In August 2010, South Street Securities LLC extended a line of credit to the Bank for reverse repurchase agreements up to a maximum of \$100.0 million.

Current market conditions have limited the Bank's liquidity sources principally to interest-bearing deposits, unpledged marketable securities, and secured funding outlets such as the FHLB and Fed Discount Window. There can be no assurance that actions by the FHLB or Federal Reserve Bank would not reduce the Bank's borrowing capacity or that the Bank would be able to continue to replace deposits at competitive rates. As of June 30, 2011, in compliance with its regulatory restrictions, the Bank did not have any brokered deposits and would consult in advance with its regulators if it were to consider accepting brokered deposits in the future.

The Bank has Contingency Funding Plans (CFPs) designed to ensure that liquidity sources are sufficient to meet its ongoing obligations and commitments, particularly in the event of a liquidity contraction. The CFPs are designed to examine and quantify its liquidity under various stress scenarios. Furthermore, the CFPs provide a framework for management and other critical personnel to follow in the event of a liquidity contraction or in anticipation of such an event. The CFPs address authority for activation and decision making, liquidity options and the responsibilities of key departments in the event of a liquidity contraction.

The Bank believes that it nonetheless has adequate liquidity resources to fund its obligations with its interest-bearing deposits, unpledged marketable securities, and secured credit lines with the FHLB and Fed Discount Window.

OFF-BALANCE SHEET ARRANGEMENTS

For a discussion of off-balance sheet arrangements, see *Note 10 Off-Balance Sheet Commitments* of Notes to Consolidated Financial Statements (Unaudited) in this Report and *Item 1. Business Off-Balance Sheet Commitments* in our Annual Report on Form 10-K for the year ended December 31, 2010.

CONTRACTUAL OBLIGATIONS

There have been no material changes to the contractual obligations described in our Annual Report on Form 10-K for the year ended December 31, 2010.

RECENTLY ISSUED ACCOUNTING STANDARDS

FASB ASU 2011-05, *Presentation of Comprehensive Income (Topic 220)* ASU 2011-05 is intended to improve the comparability, consistency, and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. To increase the prominence of items reported in other comprehensive income and to facilitate convergence of U.S. GAAP and IFRS, the FASB decided to eliminate the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity, among other amendments in this Update. These amendments apply to all entities that report items of other comprehensive income, in any period presented. Under the amendments to Topic 220, an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments in ASU 2011-05 are effective fiscal years, and interim periods within those years, beginning after December 15, 2011. Adoption of ASU 2011-05 is not expected to have a significant impact on our financial condition or result of operations.

FASB ASU 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (Topic 820)* ASU 2011-04 provides guidance on fair value measurement and disclosure requirements that the FASB deemed largely identical across U.S. GAAP and IFRS.

Table of Contents

The requirements do not extend the use of fair value accounting, but provide guidance on how it should be applied where its use is already required or allowed. ASU 2011-04 supersedes most of the guidance in ASC topic 820, but many of the changes are clarifications of existing guidance or wording changes to reflect IFRS 13. Amendments in ASU 2011-04 change the wording used to describe U.S. GAAP requirements for fair value and disclosing information about fair value measurements. ASU 2011-04 is effective for interim and annual reporting periods beginning after December 15, 2011, and early application is not permitted. Adoption of ASU 2011-04 is not expected to have a significant impact on our financial condition or result of operations.

FASB ASU 2011-02, *Receivable (Topic 310), Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses* ASU 2011-02 clarifies the guidance for evaluating whether a restructuring constitutes a troubled debt restructuring (TDR). The guidance requires that a creditor separately conclude that both of the following exist: i) The restructuring constitutes a concession, ii) The debtor is experiencing financial difficulties. In addition, the guidance clarifies that a creditor is precluded from using the effective interest rate test in the debtor's guidance on restructuring of payables when evaluating whether a restructuring constitutes a TDR. The amendments in ASU 2011-02 are effective for the first interim or annual period beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. We are evaluating the impact of adoption of ASU 2011-02 on its disclosures in the consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For quantitative and qualitative disclosures regarding market risks in Hanmi Bank's portfolio, see *Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Interest Rate Risk Management* and *Capital Resources and Liquidity*.

ITEM 4. CONTROLS AND PROCEDURES

As of June 30, 2011, Hanmi Financial carried out an evaluation, under the supervision and with the participation of Hanmi Financial's management, including Hanmi Financial's Chief Executive Officer and Chief Financial Officer, of the effectiveness of Hanmi Financial's disclosure controls and procedures and internal controls over financial reporting pursuant to Securities and Exchange Commission rules. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that Hanmi Financial's disclosure controls and procedures were effective as of the end of the period covered by this Report.

During our most recent fiscal quarter ended June 30, 2011, there have been no changes in our internal control over financial reporting that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS**

From time to time, Hanmi Financial and its subsidiaries are parties to litigation that arises in the ordinary course of business, such as claims to enforce liens, claims involving the origination and servicing of loans, and other issues related to the business of Hanmi Financial and its subsidiaries. In the opinion of management, the resolution of any such issues would not have a material adverse impact on the financial condition, results of operations, or liquidity of Hanmi Financial or its subsidiaries.

ITEM 1A. RISK FACTORS

There have been no material changes in the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2010 that was filed with the SEC on March 16, 2011. Together with those risk factors and other information on the risks we face and our management of risk contained in this Quarterly Report on Form 10-Q, the following presents additional risks that may affect us. Events or circumstances arising from one or more of these risks could adversely affect our business, financial condition, operating results and prospects and the value and price of our common stock could decline. The risks identified below are not intended to be a comprehensive list of all risks we face and additional risks that we may currently view as not material may also adversely impact our financial condition, business operations and results of operations.

Table of Contents

Our use of appraisals in deciding whether to make loans secured by real property does not ensure that the value of the real property collateral will be sufficient to repay our loans. In considering whether to make a loan secured by real property, we require an appraisal of the property. However, an appraisal is only an estimate of the value of the property at the time the appraisal is made and requires the exercise of a considerable degree of judgment and adherence to professional standards. If the appraisal does not reflect the amount that may be obtained upon sale or foreclosure of the property, whether due to declines in property values after the date of the original appraisal or defective preparation, we may not realize an amount equal to the indebtedness secured by the property and may suffer losses.

Our controls and procedures could fail or be circumvented. Management regularly reviews and updates our internal controls, disclosure controls and procedures and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, but not absolute, assurances of the effectiveness of these systems and controls, and that the objectives of these controls have been met. Any failure or circumvention of our controls and procedures, and any failure to comply with regulations related to controls and procedures could adversely affect our business, results of operations and financial condition.

We could be liable for breaches of security in our online banking services. Fear of security breaches could limit the growth of our online services. We offer various Internet-based services to our clients, including online banking services. The secure transmission of confidential information over the Internet is essential to maintain our clients' confidence in our online services. Advances in computer capabilities, new discoveries or other developments could result in a compromise or breach of the technology we use to protect client transaction data. Although we have developed systems and processes that are designed to prevent security breaches and periodically test our security, failure to mitigate breaches of security could adversely affect our ability to offer and grow our online services and could harm our business.

The soundness of other financial institutions could adversely affect us. Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutional clients. Many of these transactions expose us to credit risk in the event of default of our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the financial instrument exposure due us. Any such losses could have a material adverse effect on our financial condition and results of operations.

A failure by the U.S. government to meet the conditions of the August 2011 debt ceiling agreement or to reduce its budget deficits or a downgrade of U.S. sovereign debt from its AAA credit rating could have a material adverse effect on the availability of financing, our borrowing costs, the liquidity and valuation of securities in our investment portfolio, our financial condition and our results of operations. As widely reported, there continues to be concerns over the ability of the United States government to reduce its budget deficits and resolve its debt crisis. The U.S. sovereign debt continues to be under review for a downgrade of its AAA credit rating to account for the risk that U.S. lawmakers fail to meet the conditions of the August 2011 debt ceiling agreement and/or reduce its overall debt. Any such failures or a downgrade of the U.S. sovereign debt rating could have a material adverse effect both on the U.S. economy and on the global economy. In particular, this could cause disruption in the capital markets and impact the stability of future U.S. treasury auctions and the trading market for U.S. government securities, resulting in increased interest rates and borrowing costs. The Bank relies on customer deposits, brokered deposits and advances from the Federal Home Loan Bank to fund operations. The Bank's financial flexibility will be severely constrained if it is unable to maintain its access to funding or if adequate financing is not available to accommodate future growth at acceptable interest rates. If the Bank is required to rely on more expensive funding sources to support future growth, revenues may not increase proportionately to cover costs. In this case, profitability would be adversely affected. Any of these factors could negatively impact our borrowing costs and our liquidity, which could have a material adverse impact on our financial condition and our results of operations.

ITEM 4. (REMOVED AND RESERVED)**ITEM 5. OTHER INFORMATION****Corrections of Certain Data Regarding Non-performing Loans Set Forth in Our Earnings Release dated July 21, 2011.**

This Quarterly Report on Form 10-Q includes corrected data regarding total non-performing loans as of and for the quarter ended June 30, 2011, which differ from and supersede data included in the Earnings Release dated July 21, 2011. These corrections had no effect on the consolidated statements of operations or earnings per share for the second quarter of 2011.

The following table sets forth the corrected items.

Total Non-Performing Loans

	As Previously Reported		Adjustment (In Thousands)		As Adjusted	
	Balance	Percentage	Amount	Percentage Change	Balance	Percentage
June 30, 2011:						
Real Estate Loans:						
Commercial Property						
Retail	\$ 14,335	9.0%	\$		\$ 14,335	8.6%
Land	25,184	15.9%			25,184	15.1%
Other	3,672	2.3%	941	0.5%	4,613	2.8%
Construction	12,298	7.8%			12,298	7.4%
Residential Property	1,726	1.1%			1,726	1.0%
Commercial and Industrial Loans:
