CORILLIAN CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

(1) Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Corillian Corporation and subsidiaries have been prepared pursuant to Securities and Exchange Commission rules and regulations. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in Corillian's annual report on Form 10-K for the year ended December 31, 2004, filed with the Securities and Exchange Commission on March 16, 2005.

The condensed consolidated financial statements include all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the results for interim periods, except for a \$0.3 million out of period adjustment related to employee benefit costs which resulted in a decrease in net income in the current period. The adjustment should have been recorded in a prior period, but Corillian believes the amount to be immaterial to both the current fiscal year and prior periods. The results of operations for the three and six-month periods ended June 30, 2005 are not necessarily indicative of the results to be expected for the full year.

The preparation of condensed consolidated financial statements requires Corillian to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, Corillian evaluates its estimates, including those related to software revenue recognition, accrual for contracts in a loss position, allowance for doubtful accounts and the valuation allowance for deferred tax assets. Corillian bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

(2) Principles of Consolidation

The unaudited condensed consolidated financial statements include the financial statements of Corillian Corporation and its wholly-owned subsidiaries, Corillian International, Ltd. and Corillian South Asia Sdn Bhd. All intercompany balances and transactions have been eliminated in consolidation.

(3) Reclassification

Certain reclassifications have been made to the condensed consolidated financial statements for the six-month period ended June 30, 2004 in order to conform to the six-month period ended June 30, 2005 presentation. Such reclassifications had no effect on previously reported net income, liquidity or cash flows from operations.

In the current period, Corillian reclassified balances for the six-month period ended June 30, 2004, related to auction rate securities, totaling \$7.0 million, from cash equivalents to short-term investments. This reclassification affected the presentation of the cash flows statement for the six-months ended June 30, 2004.

(4) Revenue Recognition

Table of Contents

Corillian recognizes revenues from software licensing agreements in accordance with the provisions of Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, as amended by SOP No. 98-9, *Modification of SOP No. 97-2, Software Revenue Recognition, with Respect to Certain Transactions*. Corillian's software arrangements generally include software licenses, implementation and custom software engineering services, post-contractual customer support, training services and hosting services. Corillian's software licenses are, in general, functionally dependent on implementation, training and certain custom software engineering services; therefore, software licenses and implementation and training services, together with custom software engineering services that are essential to the functionality of the software, are combined and recognized using the percentage-of-completion method of contract accounting in accordance with SOP No. 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*. Corillian has determined that post-contractual customer support and hosting services can be separated from software licenses, implementation, training and custom software engineering services because (a) post-contractual customer support and hosting services are not essential to the functionality of any other element in the arrangement, and (b) sufficient vendor-specific objective evidence exists to permit the allocation of revenue to these service elements. The hosting element can be accounted for separately from the license element, as the customer can take possession of the software without significant penalty, in accordance with Emerging Issues Task Force (EITF) 00-3, *Application of AICPA Statement of Position 97-2 to Arrangements that Include the Right to Use Software Stored on Another Entity's Hardware*.

Percentage-of-completion is measured by the percentage of contract hours incurred to date compared to the estimated total contract hours for each contract. Corillian has the ability to make reasonably dependable estimates relating to the extent of progress towards completion, contract revenues and contract costs. Any estimation process, including that used in preparing contract accounting models, involves inherent risk. Profit estimates are subject to revision as the contract progresses towards completion. Revisions in profit estimates are charged to income in the period that the facts giving rise to the revision become known. Corillian reduces the inherent risk relating to revenue and cost estimates in percentage-of-completion models through various approval and monitoring processes and policies. Risks relating to service delivery, usage, productivity and other factors are considered in the estimation process. Cumulative revenues recognized may be less or greater than cumulative billings at any point in time during a contract's term. The resulting difference is recognized as deferred revenue or revenue in excess of billings, respectively. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are estimated.

Vendor-specific objective evidence has been established on post-contractual customer support and hosting services using the renewal rate. Corillian allocates revenue to these elements in multiple element arrangements using the residual method. The difference between the total software arrangement fee and the amount deferred for post-contractual customer support and hosting services is allocated to software license, implementation, training and custom software engineering services and recognized using contract accounting.

Revenues for post-contractual customer support are recognized ratably over the term of the support services period, generally a period of one year. Services provided to customers under customer support and maintenance agreements generally include technical support and unspecified product upgrades deliverable on a when and if available basis. Revenues from hosting services for transactions processed by Corillian are recognized ratably over the hosting term.

Pursuant to SOP No. 81-1, on projects where ultimate recoverability is questionable due to inherent hazards, Corillian limits revenue recognition in the period to the amount of project costs incurred in the same period, and postpones recognition of profits until results can be estimated more precisely. Under this zero profit methodology, equal amounts of revenues and costs, measured on the basis of performance during the period, are presented in Corillian's condensed consolidated statements of operations.

Corillian generally licenses Corillian Voyager on an end-user basis, with its initial license fee

Table of Contents

based on a fixed number of end users. As a customer increases its installed base of end users beyond the initial fixed number of end users, Corillian's software license agreements require customers to pay Corillian an additional license fee to cover additional increments of end users. Revenues from additional license seat sales, less any amounts related to maintenance included in the arrangement, are generally recognized in the period in which the licenses are sold.

In arrangements where Corillian does not have an obligation to install its products, but may become involved in the installation of these products, Corillian recognizes non-refundable license fees over the estimated implementation period for the customer or reseller's project. If Corillian determines that the customer or reseller can successfully install Corillian's products in a production environment without Corillian's involvement, Corillian will recognize non-refundable license fees in the period in which collectibility of the license fees is probable, assuming all other SOP No. 97-2 revenue recognition criteria are met.

In certain arrangements, Corillian may defer all revenues and related costs of revenues until delivery is complete and customer acceptance is obtained. These arrangements have certain elements of risk such as an obligation to deliver new products when technological feasibility has not been obtained at the onset of the arrangement. In arrangements where Corillian is providing customized functionality on a best efforts basis, Corillian generally recognizes revenues as services are performed. Arrangements where customers fund expedited development of software products are accounted for as funded research and development. In arrangements where Corillian retains and reserves title and all ownership rights to the software products, Corillian recognizes these funds as a reduction of research and development expense.

(5) Concentration of Business and Credit Risk

Results of operations are substantially derived from United States operations and substantially all assets reside in the United States. A majority of Corillian's revenues are generated from banks and other financial institutions. Accordingly, Corillian's near-term and long-term prospects depend on its ability to attract the technology expenditures of these companies. The market for Internet-based financial services is intensely competitive and rapidly changing. Additionally, the sale and implementation of Corillian's products and services are often subject to delays because of Corillian's customers' internal budgets and procedures for approving large capital expenditures and deploying new technologies within their networks. Corillian's financial condition, results of operations and liquidity could be materially affected if adverse conditions in the industry developed, such as a reduction in technology expenditures or a delay in the sales or implementation timeline. An inability of Corillian to generate demand for its product, whether as a result of competition, technological change, economic, or other factors, could have a material adverse result on Corillian's financial condition, results of operations or liquidity.

Corillian continues to experience a high degree of customer concentration during some fiscal periods. During the three-month period ended June 30, 2005, two customers individually accounted for 18% and 10% of consolidated revenues, as compared to two customers individually accounting for 23% and 11% for the three-month period ended June 30, 2004. During the six-month period ended June 30, 2005, one customer accounted for 17% of consolidated revenues, as compared to two customers individually accounting for 25% and 13% of consolidated revenues for the six-month period ended June 30, 2004.

Corillian is exposed to concentration of credit risk principally from accounts receivable and revenue in excess of billing. As of June 30, 2005, two customers individually accounted for 24% and 15% of consolidated accounts receivable and three customers individually accounted for 42%, 13% and 12% of consolidated revenues in excess of billings.

As of December 31, 2004, four customers individually accounted for 24%, 15%, 13% and 13% of consolidated accounts receivable and one customer accounted for 49% of consolidated revenues in excess of billings.

Corillian is also subject to concentrations of credit risk from its cash, cash equivalents and short-

Table of Contents

term investments. Corillian limits its exposure to credit risk associated with cash, cash equivalents and short-term investments by placing its cash, cash equivalents and short-term investments with major financial institutions and by investing in investment-grade securities.

(6) Comprehensive Income

Comprehensive income (loss) is defined as changes in shareholders' equity exclusive of transactions with owners. To date, only foreign currency translation adjustments have been reported in comprehensive income (loss) for Corillian. All other amounts have not been material to Corillian's financial position or results of operations.

(7) Supplemental Disclosures of Cash Flow Information

	For the Six-Month Period Ended	
	June 30, 2005	June 30, 2004
	(in thousands)	
Cash paid during the period for:		
Interest	\$ 14	\$ 64
Taxes	15	66

(8) Deferred Stock-Based Compensation

At June 30, 2005, Corillian had various stock-based compensation plans, including stock option plans and an employee stock purchase plan. Corillian applies the intrinsic-value-based method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations including FASB Interpretation (FIN) No. 44, *Accounting for Certain Transactions Involving Stock Compensation, an interpretation of APB Opinion No. 25*, to account for its fixed-plan stock options. Under this method, compensation expense is generally recorded on the date a stock option is granted if the current market price of the underlying stock exceeded the exercise price. Statement No. 123, *Accounting for Stock-Based Compensation* and Statement No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure, an amendment of FASB Statement No. 123*, established accounting and disclosure requirements using a fair-value-based method of accounting for stock-based employee compensation plans. As permitted by existing accounting standards, Corillian has elected to continue to apply the intrinsic-value-based method of accounting described above, and has adopted only the disclosure requirements of Statement No. 123, as amended. Expense associated with stock-based compensation is amortized on an accelerated basis over the vesting period of the individual stock option awards consistent with the method prescribed in FIN No. 28.

In December 2004, the Financial Accounting Standards Board revised Statement of Financial Accounting Standards No. 123 (SFAS 123R), *Share-Based Payment*, which requires companies to expense the estimated fair value of employee stock options and similar awards. The accounting provisions of SFAS 123R will be effective for annual and interim periods beginning after January 1, 2006. Management is currently evaluating the requirements of SFAS No. 123R. The adoption of SFAS No. 123R is expected to have a significant effect on the consolidated financial statements of Corillian. Corillian has not yet determined whether the adoption will result in amounts that are similar to the current pro forma disclosures under SFAS 123.

The following table illustrates the effect on net income and net income per share if the fair-value-based method had been applied to all outstanding and unvested awards in each period:

Table of Contents

	For the Three-Month Period Ended		For the Six-Month Period Ended	
	June 30, 2005	June 30, 2004	June 30, 2005	June 30, 2004
	(in thousands, except per share data)			
Net income, as reported	\$ 2,098	\$ 2,299	\$ 2,752	\$ 4,132
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	(480)	(526)	(949)	(1,237)
Pro forma net income	\$ 1,618	\$ 1,773	\$ 1,803	\$ 2,895
Net income per share:				
Basic as reported	\$ 0.05	\$ 0.06	\$ 0.07	\$ 0.11
Diluted as reported	\$ 0.05	\$ 0.06	\$ 0.07	\$ 0.10
Basic pro forma	\$ 0.04	\$ 0.05	\$ 0.05	\$ 0.08
Diluted pro forma	\$ 0.04	\$ 0.04	\$ 0.05	\$ 0.07

(9) Net Income Per Share

Corillian computes net income per share in accordance with Statement No. 128, *Earnings Per Share*. Under the provisions of Statement No. 128, basic net income per share is computed by dividing the net income for the period by the weighted-average number of shares of common stock outstanding during the period. Diluted net income per share is computed by dividing net income for the period by the weighted-average number of shares of common stock and potential dilutive common shares outstanding during the period.

The following is a reconciliation of basic and diluted weighted-average shares:

	For the Three-Month Period Ended		For the Six-Month Period Ended	
	June 30, 2005	June 30, 2004	June 30, 2005	June 30, 2004
	(in thousands)			
Shares for basic net income per share:				
Weighted-average common shares outstanding	38,935	37,499	38,827	37,327
Effect of dilutive securities:				
Stock options and employee stock purchase plan	1,116	2,699	1,324	3,096
Shares for diluted net income per share	40,051	40,198	40,151	40,423

The following shares issuable under stock options were excluded from dilutive shares under the treasury stock method as the exercise price of the stock options exceeded the average fair market value of the underlying common stock for the periods presented below:

Table of Contents

	For the Three-Month Period Ended		For the Six-Month Period Ended	
	June 30, 2005	June 30, 2004	June 30, 2005	June 30, 2004
	(in thousands)			
Shares issuable under stock options	2,242	1,225	1,966	1,213

(10) Segment Information

Statement No. 131, *Disclosures about Segments of an Enterprise and Related Information*, establishes standards for reporting information related to operating segments in annual financial statements and requires selected information for those segments to be presented in interim financial reports issued to shareholders. Statement No. 131 also establishes standards for related disclosures about products and services and geographic areas. Operating segments are defined as components of an enterprise about which separate, discrete financial information is available for evaluation by the chief operating decision maker, or decision-making group, in making decisions about how to allocate resources and assess performance. Corillian's chief operating decision maker, as defined under Statement No. 131, is its chief executive officer. Corillian operates in a single segment.

(a) Geographic Information

Results of operations are substantially derived from United States operations and substantially all assets reside in the United States. Direct operating expenses related to Corillian's international operations were insignificant for the three-month and six-month periods ended June 30, 2005 and 2004, respectively.

Consolidated revenues generated from Corillian's international operations increased \$33,000, or 17%, to \$226,000 for the three-month period ended June 30, 2005, as compared to \$193,000 for the three-month period ended June 30, 2004. Consolidated revenues generated from Corillian's international operations increased \$24,000, or 7%, to \$393,000 for the six-month period ended June 30, 2005, as compared to \$369,000 for the six-month period ended June 30, 2004. Domestic and international revenues were 98% and 2% of total revenues for the three and six-month periods ended June 30, 2005 and 2004, respectively.

Geographic revenue information for the three and six-month periods ended June 30, 2005 and 2004 is presented below:

	For the Three-Month Period Ended		For the Six-Month Period Ended	
	June 30, 2005	June 30, 2004	June 30, 2005	June 30, 2004
	(in thousands)			
Revenues from:				
United States	\$ 12,061	\$ 12,236	\$ 23,130	\$ 23,757
All foreign countries	226	193	393	369
	\$ 12,287	\$ 12,429	\$ 23,523	\$ 24,126

(b) Revenues

Corillian's chief decision-maker monitors the revenue streams of licenses and various services. There are many shared expenses generated by the various revenue streams. Because management believes that any allocation of the expenses to multiple revenue streams would be impractical and arbitrary, management has not historically made such allocations internally.

Table of Contents

The chief decision-maker does, however, monitor revenue streams at a more detailed level than those depicted in the accompanying condensed consolidated statement of operations.

Revenues derived from Corillian's licenses and services are as follows:

	For the Three-Month Period		For the Six-Month Period	
	Ended		Ended	
	June 30, 2005	June 30, 2004	June 30, 2005	June 30, 2004
	(in thousands)			
License and professional services	\$ 8,137	\$ 8,599	\$ 15,457	\$ 17,119
Post-contractual support	3,240	2,809	6,158	5,285
Hosting	910	1,021	1,908	1,722
	\$ 12,287	\$ 12,429	\$ 23,523	\$ 24,126

(c) Customer Concentration

Corillian continues to experience a high degree of customer concentration during some fiscal periods. During the three-month period ended June 30, 2005, two customers individually accounted for 18% and 10% of consolidated revenues. During the three-month period ended June 30, 2004, two customers individually accounted for 23% and 11% of consolidated revenues. During the six-month period ended June 30, 2005, one customer accounted for 17% of consolidated revenues. During the six-month period ended June 30, 2004, two customers individually accounted for 25% and 13% of consolidated revenues.

(11) Commitments and Contingencies*(a) Litigation*

Corillian is not currently engaged in any material legal proceedings.

(b) Long-term debt

In November 2000, Corillian obtained a \$5.0 million equipment line of credit with a financial institution. As of December 31, 2004, \$911,000 was outstanding under this line of credit. In February 2005 Corillian paid off the outstanding balance under this line of credit and no further amounts are available for borrowing.

In March 2005, Corillian entered into a new one-year revolving line of credit facility with another financial institution that allows Corillian to borrow up to \$4.0 million to assist with working capital needs as necessary. As of June 30, 2005, Corillian did not have an outstanding balance on this line of credit. Under this line of credit, Corillian must comply with affirmative covenants that require it to maintain a specified tangible net worth, quick ratio, liabilities to tangible net worth ratio and certain levels of net income.

(12) Acquisitions

On March 31, 2005, Corillian, IntelliData Technologies Corporation (Nasdaq: INTD) and Wizard Acquisition Corporation, a newly created wholly-owned subsidiary of Corillian, entered into a merger agreement providing for the merger of IntelliData with and into Wizard Acquisition Corporation, with Wizard Acquisition Corporation being the surviving entity as a wholly-owned subsidiary of Corillian. The acquisition will be accounted for as a purchase under U.S. generally accepted accounting principles. Upon completion of the merger, Corillian will issue an aggregate of 4,918,032 shares of its common stock and pay an estimated aggregate of \$4.3 million in cash, in exchange for all of the outstanding shares of IntelliData common stock. The consummation of the merger is subject to the approval of IntelliData's

Table of Contents

shareholders and other customary closing conditions. The Annual Meeting of Stockholders of IntelliData Technologies Corporation will be held on August 18, 2005 at which time the IntelliData stockholders will be asked to adopt the Agreement and Plan of Merger and to approve the transactions contemplated thereby. The merger is expected to close promptly following approval by the IntelliData stockholders, subject to satisfaction of the other closing conditions.

(13) Subsequent Events

On August 5, 2005, Corillian and qbt Systems, Inc., a company that provides products and services related to Corillian's business, entered into a merger agreement providing for the merger of qbt with and into a wholly-owned subsidiary of Corillian's, with qbt being the surviving entity as a wholly-owned subsidiary of Corillian, followed by the merger of qbt with the limited liability company being the surviving entity as a wholly-owned subsidiary of Corillian. Pursuant to the Agreement, on August 8, 2005, the merger was consummated and qbt became a wholly-owned subsidiary of Corillian. In consideration of the acquisition, the agreement provides for the payment of 649,785 unregistered shares of Corillian's common stock and \$3.2 million in cash to the shareholders of qbt, for an aggregate purchase price of \$5.3 million. The acquisition will be accounted for as a purchase under U.S. generally accepted accounting principles.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**Forward-Looking Statements and Risk Factors**

This Quarterly Report on Form 10-Q and the documents incorporated herein by reference contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact made in this Quarterly Report on Form 10-Q are forward-looking including but not limited to, statements regarding industry prospects; future results of operations or position; Corillian's expectations and beliefs regarding future revenue growth and future profits; Corillian's strategies, expectations and intentions regarding acquisitions; the outcome of any litigation to which Corillian is a party; Corillian's accounting and tax policies; Corillian's future strategies regarding investments, product offerings, research and development, market share, and strategic relationships and collaboration; Corillian's dividend policies; Corillian's future capital requirements; and Corillian's intentions and expectations regarding credit facilities. These statements relate to future events or Corillian's future financial performance. In some cases, you can identify forward-looking statements by terminology including intend, could, may, will, should, expect, plan, anticipate, believe, estimate, predict, potential, negative of these terms or other comparable terminology. These statements are only predictions. Actual events or results may differ materially from those expressed or implied in such forward-looking statements. In evaluating these statements, you should specifically consider various factors, including the risks described below and in greater detail in Exhibit 99.1 to this Report, Corillian's registration statements and reports filed with the Securities and Exchange Commission, and contained in Corillian's press releases from time to time. You are advised to read the more detailed and thorough discussion of the following risks Corillian faces in its business contained in Exhibit 99.1 to this Report.

While Corillian has generated net income in each of the most recent eight fiscal quarters, Corillian has a history of losses and may incur losses in future periods if Corillian is not able to, among other things, increase its sales to new and existing customers.

Corillian's quarterly results fluctuate significantly and may fall short of anticipated levels, which may cause the price of Corillian's common stock to decline.

A small number of customers account for a substantial portion of Corillian's revenues in each period; Corillian's results of operations and financial condition could suffer if Corillian loses customers or fails to add additional customers to its customer base.

If Corillian, or its implementation partners, do not effectively implement Corillian's solutions at financial service providers' facilities, Corillian may not achieve anticipated revenues or gross margins.

Corillian's products' lengthy sales cycles may cause revenues and operating results to be

Table of Contents

unpredictable and to vary significantly from period to period.

Corillian may not achieve anticipated revenues if Corillian does not successfully introduce new products or develop upgrades or enhancements to its existing products.

Corillian's partners may be unable to fulfill their service obligations and cause Corillian to incur penalties or other expenses with its customers.

Corillian's facility and operations may be disabled by a disaster or similar event, which could damage Corillian's reputation and require Corillian to incur financial loss.

Competition in the market for Internet-based financial services is intense and could reduce Corillian's sales and prevent Corillian from achieving profitability.

Consolidation in the financial services industry could reduce the number of Corillian's customers and potential customers.

If Corillian loses key personnel, Corillian could experience reduced sales, delayed product development and diversion of management resources.

If Corillian does not develop international operations as expected or fails to address international market risks, Corillian may not achieve anticipated sales growth.

Acquisitions by Corillian may be costly and difficult to integrate, divert management resources or dilute shareholder value. Recently, Corillian acquired qbt Systems, Inc. and entered into an agreement to acquire IntelliData Technologies Corporation, and both of these acquisitions may be subject to these challenges. In addition, IntelliData has reported internal control deficiencies without a clear plan to correct those deficiencies and qbt has not been subject to the internal control standards of a public company. The failure to successfully integrate the two companies, and timely and cost effectively implement appropriate internal controls and procedures, could have a material adverse effect on the results of operations and financial condition of the combined companies.

If Corillian becomes subject to intellectual property infringement claims, these claims could be costly and time consuming to defend, divert management attention or cause product delays.

Network or Internet security problems could damage Corillian's reputation and business.

New technologies could render Corillian's products obsolete.

Defects in Corillian's solutions and system errors in Corillian's customers' data processing systems after installing Corillian's solutions could result in loss of revenues, delay in market acceptance and injury to Corillian's reputation.

Corillian's products and services must interact with other vendors' products, which may not function properly.

If Corillian becomes subject to product liability litigation, it could be costly and time consuming to defend.

If Corillian is unable to protect its intellectual property, Corillian may lose a valuable competitive advantage or be forced to incur costly litigation to protect its rights.

Increasing government regulation of the Internet and the financial services industry would limit the market for Corillian's products and services impose on Corillian liability for transmission of protected data and increase its expenses.

Corillian does not guarantee future results, levels of activity, performance or achievements. Corillian does not plan to update any of the forward-looking statements after the date of this document to conform them to actual results or to changes in its expectations.

Table of Contents**Overview**

Corillian is a leading provider of solutions that enable banks, brokers, financial portals and other financial service providers to rapidly deploy Internet-based financial services. Corillian's solutions allow consumers to conduct financial transactions, view personal and market financial information, pay bills and access other financial services on the Internet. Corillian Voyager is a software platform combined with a set of applications for Internet banking, electronic bill presentment and payment, targeted marketing, data aggregation, alerts and online customer relationship management. Corillian's solutions integrate into existing database applications and systems and enable its customers to monitor transactions across all systems in real time. Corillian's solutions are also designed to support multiple lines of business, including small business banking and credit card management, and to scale to support millions of users. Current Corillian customers include J.P. Morgan Chase, Wachovia Bank, The Huntington National Bank, Capital One and SunTrust Bank.

Substantially all of Corillian's revenues are derived from licensing Corillian's software and performing professional services for its customers, both through direct sales channels and indirect sales partners. These professional services include implementation, custom software engineering, consulting, maintenance, training and hosting. In most cases, Corillian recognizes revenues for licenses, implementation, training and custom engineering services using the percentage-of-completion method. Revenues relating to maintenance and hosting services are recognized ratably over the term of the associated maintenance or hosting contract. Revenues derived from consulting services are recognized as the services are performed. Corillian generally licenses Corillian Voyager on an end-user basis, with its initial license fee based on a fixed number of end users. As a customer increases its installed base of end users beyond the initial fixed number of end users, Corillian's software license requires the customer to pay Corillian an additional license fee to cover additional increments of end users. Revenues from additional seat sales are generally recognized in the period in which the licenses are sold.

The market for new sales of Internet banking solutions continued to be challenging in 2004 and the first six months of 2005 due to various factors, including reluctance on the part of some banks to upgrade their Internet banking platforms or improve their Internet banking websites. Despite these conditions, Corillian was able to sign a significant contract in the second quarter of 2005 with a major financial institution. However, the majority of the related revenues have been deferred and will be recognized in the second half of 2005 as implementation progresses. Most of Corillian's license revenues for the three and six-month periods ended June 30, 2005 and 2004 came from sales to existing customers. Moving forward, Corillian will continue to focus on developing additional applications to complement its market position within retail Internet banking and selling products and services to new and existing customers.

Since incorporation, Corillian has incurred substantial costs to develop and market its technology and to provide professional services. As a result, Corillian has an accumulated deficit of approximately \$94.7 million as of June 30, 2005. Corillian's operating history makes it difficult to forecast future operating results. As a result of the rapid evolution of Corillian's business and limited operating history, Corillian believes period-to-period comparisons of its results of operations, including its revenues and cost of revenues and operating expenses as a percentage of revenues are not necessarily indicative of its future performance.

On March 31, 2005, Corillian, IntelliData Technologies Corporation (Nasdaq: INTD) and Wizard Acquisition Corporation, a newly created wholly-owned subsidiary of Corillian, entered into a merger agreement providing for the merger of IntelliData with and into Wizard Acquisition Corporation, with Wizard Acquisition Corporation being the surviving entity as a wholly-owned subsidiary of Corillian. The acquisition will be accounted for as a purchase under U.S. generally accepted accounting principles. Upon completion of the merger, Corillian will issue an aggregate of 4,918,032 shares of its common stock and pay an estimated aggregate of \$4.3 million in cash, in exchange for all of the outstanding shares of IntelliData common stock. The consummation of the merger is subject to the approval of IntelliData's shareholders and other customary closing conditions. The Annual Meeting of Stockholders of IntelliData Technologies Corporation will be held on August 18, 2005 at which time the IntelliData stockholders will

Table of Contents

be asked to adopt the Agreement and Plan of Merger and to approve the transactions contemplated thereby. The merger is expected to close promptly following approval by the IntelliData stockholders, subject to satisfaction of the other closing conditions. We believe the acquisition will allow us to significantly expand our bill payment warehousing services.

On August 5, 2005, Corillian and qbt Systems, Inc., a company that provides products and services related to Corillian's business, entered into a merger agreement providing for the merger of qbt with and into a wholly-owned subsidiary of Corillian's, with qbt being the surviving entity as a wholly-owned subsidiary of Corillian, followed by the merger of qbt with and into a single member limited liability company that is wholly-owned by Corillian, with the limited liability company being the surviving entity as a wholly-owned subsidiary of Corillian. Pursuant to the Agreement, on August 8, 2005, the merger was consummated and qbt became a wholly-owned subsidiary of Corillian. In consideration of the acquisition, the agreement provides for the payment of 649,785 unregistered shares of Corillian's common stock and \$3.2 million in cash to the shareholders of qbt, for an aggregate purchase price of \$5.3 million. The acquisition will be accounted for as a purchase under U.S. generally accepted accounting principles. We believe the addition of qbt Systems will expand our expertise in delivering seamless, realtime integration to many different systems in the industry.

Critical Accounting Policies and Estimates

We reaffirm the critical accounting policies and estimates as reported in our Form 10-K for the year ended December 31, 2004, which was filed with the Securities and Exchange Commission on March 16, 2005.

Table of Contents**Results of Operations*****Revenues***

Corillian's revenues are derived from licensing Corillian's software and performing professional services for its customers, both through direct sales channels and indirect sales partners. These professional services include implementation, custom software engineering, consulting, maintenance, training and hosting.

Revenues decreased approximately \$100,000, or 1%, to \$12.3 million for the three-month period ended June 30, 2005, as compared to \$12.4 million for three-month period ended June 30, 2004. The slight decrease was primarily due to decreases in license and professional services and hosting revenues of \$462,000 and \$111,000, respectively, for the three-month period ended June 30, 2005, as compared to the three-month period ended June 30, 2004. The decreases in license and professional service and hosting revenues were partially offset by an increase in post-contractual support revenues of \$431,000, which was the result of a significant new customer receiving maintenance services beginning in mid 2004.

Revenues decreased approximately \$600,000, or 2%, to \$23.5 million for the six-month period ended June 30, 2005, as compared to \$24.1 million for the six-month period ended June 30, 2004. The slight decrease in revenues was primarily due to a decrease in license and professional services of approximately \$1.7 million for the six-month period ended June 30, 2005, as compared to the six-month period ended June 30, 2004. The decrease in license and professional services revenues was partially offset by increases in post-contractual support and hosting revenues of approximately \$900,000 and \$200,000, respectively, both of which increased as a result of two new significant customers receiving services for the full six-month period ended June 30, 2005, as compared to the six-month period ended June 30, 2004.

Cost of Revenues

Cost of revenues consists primarily of salaries and related expenses for professional service personnel and outsourced professional service providers who are responsible for the implementation and customization of Corillian's software and for maintenance and support personnel who are responsible for post-contractual customer support.

Cost of revenues decreased approximately \$600,000, or 13%, to \$4.2 million for the three-month period ended June 30, 2005, as compared to \$4.8 million for the three-month period ended June 30, 2004. Cost of revenues decreased \$1.3 million, or 13%, to \$8.5 million for the six-month period ended June 30, 2005, as compared to \$9.8 million for the six-month period ended June 30, 2004. The decrease in cost of revenues during both the three and six-month periods ended June 30, 2005, as compared to the three and six-month periods ended June 30, 2004, was primarily attributable to approximately \$500,000 and \$900,000 in research and development expenses being allocated to cost of revenues for the three and six-month periods ended June 30, 2004, respectively, as Corillian's research and development personnel provided services for one of Corillian's customers.

Gross profit as a percentage of revenues was 66% for the three-month period ended June 30, 2005, as compared to 62% for the three-month period ended June 30, 2004. Gross profit as a percentage of revenues was 64% for the six-month period ended June 30, 2005, as compared to 59% for the six-month period ended June 30, 2004. Consistent with the decrease in cost of revenues, the increase in gross profit as a percentage of revenues was due to Corillian's research and development personnel providing services for one of Corillian's customers for the three and six-month periods ended June 30, 2004.

Operating Expenses

Table of Contents*Sales and Marketing Expenses*

Sales and marketing expenses consist of salaries, commissions and related expenses for personnel involved in marketing, sales and support functions, as well as costs associated with trade shows and other promotional activities.

Sales and marketing expenses decreased approximately \$100,000, or 6%, to \$1.7 million for the three-month period ended June 30, 2005, as compared to \$1.8 million for the three-month period ended June 30, 2004. Sales and marketing expenses remained constant at \$3.5 million for the six-month periods ended June 30, 2005 and 2004. The decrease for the three-month period ended June 30, 2005, as compared to the three-month period ended June 30, 2004, was primarily due to a decrease in consulting expenses related to product development of the Corillian Consumer Banking application.

Research and Development Expenses

Research and development expenses consist primarily of salaries and related expenses for engineering personnel and costs of materials and equipment associated with the design, development and testing of Corillian's products.

Research and development expenses increased approximately \$1.0 million, or 63%, to \$2.6 million for the three-month period ended June 30, 2005, as compared to \$1.6 million for the three-month period ended June 30, 2004. The increase was due to approximately \$500,000 of costs associated with research and development employees being allocated to cost of revenues during the three-month period ended June 30, 2004, as these employees provided services to one of Corillian's customers during the respective period. The remaining increase related to an increase in salaries, wages and other employee related costs due to headcount increasing to 65 at June 30, 2005, as compared to 49 at June 30, 2004.

Research and development expenses increased approximately \$2.2 million, or 73%, to \$5.2 million for the six-month period ended June 30, 2005, as compared to \$3.0 million for the six-month period ended June 30, 2004. The increase was due to approximately \$900,000 of costs associated with research and development employees being allocated to cost of revenues during the six-month period ended June 30, 2004, as these employees provided services to one of Corillian's customers during the respective period. An increase of approximately \$400,000 due to cost associated with professional services personnel being allocated to research and development expense during the six-month period ended June 30, 2005, as these personnel worked on research and development projects during the respective period. The remaining increase related to salaries, wages and other employee related costs due to headcount increasing to 65 at June 30, 2005, as compared to 49 at June 30, 2004.

Research and development expenses, to a certain extent, could fluctuate in future periods due to the additional funding of Corillian's research and development activities by customers accounted for under the provisions of Statement No. 68, *Research and Development Arrangements*, as well as internal funding for the development of new products and enhancements to existing products and the use of Corillian's research and development personnel to provide services for Corillian's customers.

General and Administrative Expenses

General and administrative expenses consist of salaries and related expenses for executive, finance, human resources, legal, information systems management and administration personnel, as well as professional fees, bad debt expenses and other general corporate expenses.

General and administrative expenses increased approximately \$200,000, or 12%, to \$1.9 million for the three-month period ended June 30, 2005, as compared to \$1.7 million for the three-month period ended June 30, 2004. The increase was primarily due to increases in salaries, wages and other employee related costs due to headcount, increasing to 36 at June 30, 2005, as compared to 30 at June 30, 2004.

General and administrative expenses increased approximately \$700,000, or 22%, to \$3.9 million for the

Table of Contents

six-month period ended June 30, 2005, as compared to \$3.2 million for the six-month period ended June 30, 2004. The increase, in part, was due to additional accounting fees of \$133,000 related to Sarbanes-Oxley compliance initiatives. The remaining increase was primarily due to salaries, wages and other employee related costs due to headcount increasing to 36 at June 30, 2005, as compared to 30 at June 30, 2004.

Corillian's net income decreased approximately \$200,000, or 9%, to \$2.1 million for the three-month period ended June 30, 2005, as compared to \$2.3 million for the three-month period ended June 30, 2004. Corillian's net income decreased approximately \$1.3 million, or 32%, to \$2.8 million for the six-month period ended June 30, 2005, as compared to \$4.1 million for the six-month period ended June 30, 2004. Included in net income for the six-month period ended June 30, 2005 was a \$0.3 million out of period adjustment related to employee benefit costs which resulted in a decrease in net income in the current period. The adjustment should have been recorded in a prior period, but Corillian believes the amount to be immaterial to both the current fiscal year and prior periods.

Other Income (Expense), Net

Other income (expense), net, consists primarily of interest earned on cash, cash equivalents and short-term investments, gains and losses recognized upon sale of Corillian's assets, interest expense, Corillian's share of losses in equity investments, and other miscellaneous items.

Other income (expense), net, increased \$492,000 to income of \$280,000 for the three-month period ended June 30, 2005, as compared to expense of \$212,000 for the three-month period ended June 30, 2004. The increase was due to a decrease of \$236,000 in the amount of loss taken in Corillian's proportionate share of Synoran LLC's net loss during the three-month period ended June 30, 2005, as compared to the three-month period ended June 30, 2004. The remaining increase was primarily due to an increase of \$212,000 in interest income as Corillian increased cash and short-term investments and received higher interest rates on short-term investments for the three-month period ended June 30, 2005, as compared to the three-month period ended June 30, 2004.

Other income (expense), net, increased \$759,000 to income of \$375,000 for the six-month period ended June 30, 2005, as compared to expense of \$384,000 for the six-month period ended June 30, 2004. The increase was due to a decrease of \$318,000 in the amount of loss taken in Corillian's proportionate share of Synoran LLC's net loss during the six-month period ended June 30, 2005, as compared to the six-month period ended June 30, 2004. The remaining increase was primarily due to an increase of \$372,000 in interest income as Corillian increased cash and short-term investments and received higher interest rates on short-term investments for the six-month period ended June 30, 2005, as compared to the six-month period ended June 30, 2004.

Income Taxes

Corillian expects to be profitable for the twelve-month period ended December 31, 2005, and, therefore, expects to incur an alternative minimum tax liability for this period. As a result, Corillian recorded income tax charges of \$50,000 and \$63,000 during the three and six-month periods ended June 30, 2005, respectively, related to estimated alternative minimum taxes for these periods. Corillian recorded an income tax charge of \$50,000 and \$90,000 during the three and six-month periods ended June 30, 2004, respectively. Alternative minimum taxes paid are available to be carried forward to reduce the excess of regular taxes over alternative minimum taxes in future years. Such alternative minimum tax credit carryforwards are includable in deferred tax assets. Corillian has recorded a full valuation allowance against such credit carryforwards in addition to all other net deferred tax assets, as it believes it is more likely than not that these deferred tax assets will not be realized. We consider future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event we were to determine that we would be able to realize our deferred tax assets in the future in excess of our net recorded amount, an adjustment to decrease the valuation allowance would increase income in the period such determination was made.

Liquidity and Capital Resources

As of June 30, 2005, Corillian had \$38.9 million in cash, cash equivalents and short-term investments, as compared to \$39.4 million as of December 31, 2004. Cash equivalents consisted mainly of demand deposits, money market mutual funds and commercial paper with original maturities less than 90 days. Short-term investments consisted mainly of taxable government agency bonds with original maturities between 90 and 180 days, taxable municipal bonds and auction rate securities, with original maturities greater than one year. Although original maturities are greater than one year, Corillian classifies auction rate securities as short-term investments as they are bought and sold

at par every 28 to 35 days and

Table of Contents

therefore are available for use in normal operations.

In November 2000, Corillian obtained a \$5.0 million equipment line of credit with a financial institution. As of December 31, 2004, \$911,000 was outstanding under this line of credit. In February 2005 Corillian paid off the outstanding balance under this line of credit and no further amounts are available for borrowing.

In March 2005, Corillian entered into a new one-year revolving line of credit facility with another financial institution that allows Corillian to borrow up to \$4.0 million to assist with working capital needs as necessary. As of June 30, 2005, Corillian did not have an outstanding balance on this line of credit. Under this line of credit, Corillian must comply with affirmative covenants that require it to maintain a specified tangible net worth, quick ratio, liabilities to tangible net worth ratio and certain levels of net income.

Net cash provided by operating activities was \$119,000 for the six-months ended June 30, 2005, as compared to \$10.8 million for the six-months ended June 30, 2004. Net income, adjusted to add back the effects of non-cash items such as depreciation, amortization and equity losses on the Synoran investment, decreased by \$2.4 million for the six-month period ended June 30, 2005, as compared to the six-month period ended June 30, 2004. Various other items affected Corillian's cash provided by operating activities, contributing to and offsetting the \$10.7 million decrease in net operating activities noted above. Corillian's cash provided by operating activities decreased as deferred revenue decreased \$4.3 million for the six-month period ended June 30, 2005, as compared to an increase of \$2.7 million for the six-month period ended June 30, 2004. These changes were primarily due to the timing of billings on large sales in relation to the period revenue was recognized. The decrease in cash provided by operating activities due to deferred revenue was partially offset by a decrease in accounts receivable of \$329,000 for the six-month period ended June 30, 2005, as compared to a decrease of \$3.6 million for the six-month period ended June 30, 2004. The decrease is due to the timing of billings and receipt of payments on large sales.

Net cash used in investing activities was \$1.0 million for the six-months ended June 30, 2005. Net cash provided by investing activities was \$1.9 million for the six-months ended June 30, 2004. During the six-month period ended June 30, 2005 net cash used by investing activities consisted primarily of net purchases of short-term investments of \$600,000 and purchases of property and equipment of \$446,000. During the six-month period ended June 30, 2004, net cash provided by investing activities consisted of net proceeds from the sales of short-term investments of \$2.3 million and purchases of property and equipment of \$430,000.

Net cash used in financing activities was \$180,000 for the six-month period ended June 30, 2005. Net cash provided by financing activities was \$236,000 for the six-month period ended June 30, 2004. During the six-month period ended June 30, 2005, net cash used in financing activities consisted of \$917,000 in repayments of long-term borrowings and capital lease obligations, which was offset, in part, by \$737,000 in proceeds received from the issuance of common stock under Corillian's stock option and employee stock purchase plans. Net cash provided by financing activities during the six-month period ended June 30, 2004 consisted primarily of \$1.1 million received from the issuance of common stock under Corillian's stock option and employee stock purchase plans, which was offset, in part, by repayments on long-term borrowings and capital lease obligations of \$840,000.

Working capital increased to \$32.3 million as of June 30, 2005, as compared to \$29.4 million as of December 31, 2004. The increase was primarily due to a decrease in the deferred revenue balance of \$4.0 million to \$12.6 million at June 30, 2005, as compared to \$16.6 million at December 31, 2004.

Corillian had no material financial obligations as of June 30, 2005, other than its obligations under its operating lease. However, due to the acquisition of qbt Systems Inc. closing on August 8, 2005, Corillian became obligated to pay \$3.2 million in cash to the shareholders of qbt as of such closing date. Additionally, if the merger with InteliData is consummated, Corillian will be obligated to pay an estimated \$4.3 million in cash consideration to the shareholders of InteliData. Further capital requirements will depend on many factors, including the timing of research and development efforts and the expansion of Corillian's operations, both domestically and internationally. Corillian believes its current cash, cash equivalents, and short-term investments will be sufficient to meet its working capital requirements for at least the next 12 months.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Foreign Exchange Rate Sensitivity**

Corillian develops products in the United States and markets its products and services in the United States, and to a lesser extent in Europe, Asia and Australia. As a result, its financial results could be affected by factors such as changes in foreign currency exchange rates or weak economic conditions in foreign markets. Because nearly all of Corillian's revenues are currently denominated in United States dollars, a strengthening of the United States dollar could make Corillian's products less competitive in foreign markets.

Corillian does not use derivative financial instruments for speculative purposes. Corillian does not engage in exchange rate hedging or hold or issue foreign exchange contracts for trading purposes. Corillian does have foreign-based operations where transactions are denominated in foreign currencies and are subject to market risk with respect to fluctuations in the relative value of currencies. Corillian has limited operations in Europe, Asia and Australia and conducts transactions in various local currencies in these locales. To date, the impact of fluctuations in the relative fair value of other currencies has not been material.

Interest Rate Sensitivity

As of June 30, 2005, Corillian had \$38.9 million in cash, cash equivalents and short-term investments compared to \$39.4 million at December 31, 2004. Cash equivalents consist mainly of demand deposit accounts, money market mutual funds and commercial paper with original maturities less than 90 days. Short-term investments consist of taxable government agency bonds with original maturities ranging between 90 and 180 days taxable municipal bonds, auction rate securities, with original maturities ranging from greater than one year. Government agency bonds are classified as held-to-maturity. All auction rate securities are classified as available-for-sale and reported on the balance sheet at par value, which equals market value, as these securities are bought and sold every 28 to 35 days. Corillian is not subject to interest rate risks on its available-for-sale investments as these investments are bought and sold at par value. Corillian's short-term held-to-maturity investments are subject to interest rate risk and will decrease in value if market interest rates increase. Corillian manages this risk by maintaining an investment portfolio with high credit quality. Changes in the overall level of interest rates affect our interest income that is generated from our short-term investments. If interest rates increase or decrease equally during 2005, by a total of one percent, Corillian's interest income would increase or decrease by approximately \$150,000, respectively. In 2005, Corillian may invest in short-term investments with original maturities greater than 180 days. These investments would be subject to higher levels of interest rate risks.

ITEM 4. CONTROLS AND PROCEDURES**(a) Evaluation of disclosure controls and procedures.**

The term "disclosure controls and procedures" (defined in SEC Rule 13a-15(e)) refers to the controls and other procedures of a company that are designed to ensure that the information required to be disclosed by a company in the reports that it files under the Exchange Act is recorded, processed, summarized and reported within required time periods. Corillian's management, with the participation of the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operations of the Company's disclosure controls and procedures as of the end of the period covered by this quarterly report (the Evaluation Date). In designing and evaluating our disclosure controls and procedures, management recognized that a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the system are met. Corillian's disclosure

Table of Contents

controls and procedures are designed to provide reasonable assurance that the objectives of the system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based partly on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based on that evaluation, Corillian's management, with the participation of the Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, such controls and procedures were effective.

(b) Changes in internal controls over financial reporting

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) identified in connection with the evaluation required by Rule 13a-15(d) that occurred during the period covered by this quarterly report on Form 10-Q and that have materially affected, or are reasonable likely to materially affect, our internal control over financial reporting

We intend to regularly review and evaluate the design and effectiveness of our disclosure controls and procedures and internal controls over financial reporting on an ongoing basis and to improve these controls and procedures over time and to correct any significant deficiencies that we may discover in the future. While we believe the present design of our disclosure controls and procedures and internal controls over financial reporting are effective, future events affecting our business may cause us to modify these controls and procedures in the future.

PART II. OTHER INFORMATION**ITEM 6. EXHIBITS****(a) Exhibits**

The exhibits listed on the accompanying index are filed as part of this Form 10-Q:

Exhibit No.	Description
31.1	Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
31.2	Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
32.1	Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
99.1	Risk Factors
