Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Common Stock, par value  
\$2.50 per share

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendments to this Form 10-K

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12(b)2 of the Act). Yes  No

The aggregate market value of the Company's voting equity held by non-affiliates was \$280,758,759 on June 30, 2003, based on the last sales price that day.

The number of shares outstanding of the registrant's common stock as of January 31, 2004 was 28,729,496.

**DOCUMENTS INCORPORATED BY REFERENCE**

Portions of Riggs National Corporation's definitive Proxy Statement dated March 19, 2004 to Shareholders are incorporated by reference into Part III of this Form 10-K. With the exception of the portions of the Proxy Statement specifically incorporated herein by reference, the Proxy Statement is not deemed to be filed as part of this Form 10-K.

## FORWARD-LOOKING STATEMENTS

Certain information contained in this Annual Report, including, without limitation, the information appearing under the captions "Business and Management's Discussion and Analysis of Financial Condition and Results of Operations," includes forward-looking statements made pursuant to the safe harbor provisions of Section 21E of the Securities Exchange Act of 1934, as amended. These statements comprising all statements herein that are not historical reflect the Company's current expectations and projections about its future results, performance, liquidity, financial condition, prospects and opportunities and are based upon information currently available to the Company and its interpretation of what it believes to be significant factors affecting its businesses, including many assumptions regarding future events. References to the words "will," "anticipate," "believe," "intend," "estimated," "expect," "should," "goal," and similar expressions used herein indicate such forward-looking statements. Results, performance, liquidity, financial condition, prospects and opportunities could differ materially from those expressed in, or implied by, these forward-looking statements as a result of various risks, uncertainties and other factors, including the Company's ability to successfully implement its business strategies, the weakening of the domestic economy, social, economic or political instability, both domestic and foreign, changes in credit quality and interest rates, the impact of competitive products, services and pricing, customer business requirements, legislation, regulation, supervisory examinations or actions such as those described herein, the timing of technology enhancements for products and operating systems, volatility of venture capital portfolios, the collectibility of loans and similar matters. The reader should not place undue reliance on any forward-looking statements. Except as required by the federal securities laws, the Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or for any other reason.

## PART I

### ITEM 1. BUSINESS

#### Riggs National Corporation

Riggs National Corporation (the Company or Riggs) is a bank holding company registered under the Bank Holding Company Act of 1956, as amended (BHCA) and incorporated in the State of Delaware. Riggs engages in a variety of banking-related activities through its bank and non-bank subsidiaries. The Company currently has banking operations or separate subsidiaries in: the Washington, D.C. metropolitan area; New Haven (Connecticut), Miami (Florida); London (England); Berlin (Germany); Jersey (Channel Islands) and Nassau (Bahamas). It provides investment advisory services domestically through subsidiaries registered under the Investment Advisers Act of 1940, as amended. At December 31, 2003, Riggs and its subsidiaries had 1,450 full-time equivalent employees. The Company had assets of \$6.37 billion, liabilities of \$6.00 billion and shareholders' equity of \$373.5 million at December 31, 2003.

The Company has six reportable business segments which are: Banking, International Banking, Riggs & Co. (wealth management), Treasury, Riggs Capital Partners (venture capital) and Other, which are described in Note 17 of Notes to Consolidated Financial Statements. For the three years ended December 31, 2003, key elements of the Company's business strategy have been: the continued focus on growth opportunities through the additional accumulation of assets under management and fee income in the wealth management division (Riggs & Co.); the orientation of its retail banking branches toward money management relationships; the development and specialization of banking products and services in specific growth industries; and the continuation of Riggs' pre-eminent embassy banking operations coupled with growth in the international private banking business lines. As a complement to internally developed programs, Riggs may also pursue alliances or acquisitions that further its strategic goals. In 2004 the Company's Riggs & Co. segment will be absorbed into the Banking segment.

#### Riggs Bank N.A.

The principal subsidiary of the Company is Riggs Bank N.A. (Riggs Bank or the Bank), a national banking association founded in 1836 and organized under the national banking laws of the United States in 1896. Riggs Bank had assets of \$6.00 billion, deposits of \$4.29 billion and stockholders' equity of \$427.2 million at December 31, 2003.

Riggs Bank operates twenty-eight branches and an investment advisory subsidiary in Washington, D.C.; thirteen branches in Virginia; six branches in Maryland; a second investment advisory subsidiary in New Haven, Connecticut; a commercial bank and a portfolio management services company in London, England; an Edge Act (federally-chartered corporation allowed to engage only in international banking or other financial transactions related to international business) subsidiary in

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Miami, Florida; branch offices in London (England), Berlin (Germany) and Nassau (Bahamas); and a trust company in Jersey (Channel Islands).

As a commercial bank, Riggs Bank provides a wide array of financial products and services primarily to customers in the Washington, D.C. metropolitan area and, to a lesser extent, throughout the United States and internationally.

Riggs Bank's Corporate & Institutional Banking Group provides services to customers ranging from small businesses to major multinational companies and non-profit organizations. These services include lines of credit, secured and unsecured term loans, letters of credit, credit support facilities, foreign currency transactions and cash management.

The Bank's wealth management division, Riggs & Co., provides fiduciary and administrative services including financial management and tax planning for individuals, investment and accounting services for governmental, corporate and non-profit organizations, as well as estate planning and trust administration. Riggs & Co. provides domestic investment advisory services through Riggs Investment Advisors Inc. (RIA) and J. Bush & Co. Incorporated, both of which are wholly-owned subsidiaries incorporated in the State of Delaware and registered under the Investment Advisers Act of 1940, as amended. Internationally, Riggs provides these services through Riggs and Co. International Ltd. (RCIL).

Riggs Bank's Community Banking Group provides a variety of traditional services including checking, NOW, savings and money market accounts, personal loans and lines of credit, certificates of deposit, individual retirement accounts and investment sales. Additionally, the Community Banking Group provides 24-hour banking services through its telebanking operations and a network of 143 automated teller machines (ATMs) that is linked to national and regional ATM networks.

The Bank's International Banking Group also provides a variety of financial services, including issuing letters of credit in connection with trade and other transactions, taking deposits, foreign currency exchange, private banking and cash management. Customers include embassies and foreign missions in Washington, D.C. and elsewhere, foreign governments, central banks of foreign governments and other banks. Because of these relationships, Riggs has also developed secondary relationships with diplomats, embassy employees and other representatives of such entities that may be perceived as closely aligned with the Company's primary customers. These services are provided through both domestic and international offices.

International operations of Riggs Bank include:

- Riggs Bank Europe Ltd. (RBEL), located in London (England), which provides corporate banking, expatriate and embassy banking services. RBEL's main office is located in the West End of London. It also has a branch in Berlin (Germany);
- RCIL, located in London (England), provides portfolio management services to international customers;
- Riggs Bank London Branch, which has three locations in London, provides banking services to embassy and private banking clients;
- Riggs Bank and Trust Company Limited, located in Jersey (Channel Islands), which provides offshore banking and trust services to international clients; and
- Riggs Bank Nassau Branch (Bahamas) which provides limited offshore banking services.

The Company estimates that for 2003, 2002 and 2001, approximately 10%, 9% and 17%, respectively, of its consolidated revenues are attributable to foreign operations. For 2003, 2002 and 2001, 9%, 7% and 11%, respectively, of the consolidated assets at December 31 are attributable to its foreign operations. See Note 15 of Notes to the Consolidated Financial Statements.

### **Riggs Capital**

Riggs Capital issued 150,000 shares of 8.625% guaranteed preferred beneficial interests in junior subordinated deferrable interest debentures (trust preferred securities), Series A, with a liquidation preference of \$1,000 per share, in December 1996. The securities currently qualify as tier I capital with certain limitations.

Riggs Capital II issued 200,000 shares of 8.875% guaranteed preferred beneficial interests in junior subordinated deferrable interest debentures, Series C (trust preferred securities), with a liquidation preference of \$1,000 per share, in March 1997. The securities also currently qualify as tier I capital with certain limitations.

In accordance with an accounting interpretation which was adopted by the Company on October 1, 2003 (FASB Interpretation No. 46 (revised December 2003), Consolidation of Variable Interest Entities or FIN 46R), the Company no longer consolidates Riggs Capital and Riggs Capital II. At the time of adoption of this new accounting interpretation and at

December 31, 2003, Riggs owned \$60.3 million of the Series A trust preferred securities and \$47.6 million of the Series C trust preferred securities. In financial statements applicable to periods prior to October 1, 2003, the amount of trust preferred securities owned by Riggs was netted against the outstanding securities of Riggs Capital and Riggs Capital II and reported as guaranteed preferred beneficial interests in junior subordinated deferrable interest debentures in the Consolidated Statements of Condition. Prior to October 1, 2003, the interest earned by the Company on the trust preferred securities it owned was reflected in the Consolidated Statements of Operations as a reduction of minority interest in income of subsidiaries, net of taxes. Beginning in the fourth quarter of 2003, the trust preferred securities owned by Riggs are included in securities held to maturity in the Consolidated Statements of Condition and \$360.8 million of debt that the Company has to Riggs Capital and Riggs Capital II is included in long-term debt. Commencing in the fourth quarter of 2003, interest earned on the trust preferred securities that the Company owns is reflected as a component of interest income and the cost of the debt payable by the Company to Riggs Capital and Riggs Capital II is included in interest expense.

Because of this deconsolidation, regulatory authorities may conclude at a future date that the trust preferred securities should no longer be included as a component of tier I regulatory capital. The Company has determined that it and the Bank would continue to be well capitalized under regulatory guidelines at December 31, 2003 without including the trust preferred securities as a component of regulatory capital. See Capital Resources and Notes 10 and 11 of Notes to Consolidated Financial Statements.

### **Riggs Capital Partners**

Riggs Capital Partners LLC (RCP) and Riggs Capital Partners II LLC (RCP II), the Company's venture capital operations, invest in equity investments, typically in privately-held, high-tech and growth companies. As of December 31, 2003, the fair value of combined venture capital investments of RCP and RCP II was \$43.4 million.

### **Regulation-General**

The Company is a registered bank holding company, subject to broad federal regulation and oversight by the Federal Reserve Board (the Board). The Bank is a national bank, the deposits of which are federally insured and backed by the full faith and credit of the U.S. Government up to applicable limits. The Bank is subject to broad federal regulation and oversight extending to all its operations by the Office of the Comptroller of the Currency (the OCC), its primary federal regulator, and also by the Federal Deposit Insurance Corporation (the FDIC) and the Board. The Bank is also a member of the Federal Home Loan Bank of Atlanta (the FHLB), which serves as a source of funds for the Bank. To a lesser degree, other domestic and foreign regulatory agencies impact the Company and its subsidiaries, including the Bank.

Certain regulatory requirements and restrictions are discussed below or elsewhere in this document.

### **Federal Regulation of National Banks**

The OCC has extensive regulatory and supervisory authority over the operations of national banks. As part of this authority, the Bank is required to file periodic reports with the OCC and is subject to periodic examinations by the OCC. All national banks are subject to a semi-annual deposit insurance assessment, based upon the bank's total assets, to fund the operations of the OCC.

The OCC also has extensive enforcement authority over all national banks, including the Bank. This enforcement authority includes, among other things, the ability to assess civil money penalties, to issue cease-and-desist or removal orders, to initiate injunctive actions and to appoint the FDIC as conservator or receiver. In general, these enforcement actions may be initiated for violations of laws and regulations as well as unsafe or unsound practices, or with respect to receivership or conservatorship upon the determination that certain statutory criteria exist such as insolvency, substantial dissipation of assets, an unsafe or unsound condition in which to transact business, willful violation of cease and desist orders, concealment, losses or the likelihood of losses that will deplete substantially all capital, undercapitalization, similar factors, or upon notification by the U.S. Attorney General of guilt by a bank of a criminal offense arising under the money laundering laws of the United States. Other actions or inactions may provide the basis for enforcement action, including misleading or untimely reports filed with the OCC. Except under certain circumstances, public disclosure of final enforcement actions by the OCC is required.

The OCC, as well as the other federal banking agencies, have adopted regulations and guidelines establishing safety and soundness standards including but not limited to such matters as loan underwriting and documentation, internal controls and audit systems, interest rate risk exposure, asset quality and earnings, and compensation and other employee benefits.

Any institution which fails to comply with these standards must submit a compliance plan. A failure to submit a plan or to comply with an approved plan will subject the institutions to further enforcement action.

### **Insurance of Accounts and Regulation by the FDIC**

The Bank is a member of the Bank Insurance Fund (the BIF), which is administered by the FDIC. Deposits are insured up to applicable limits by the FDIC and such insurance is backed by the full faith and credit of the U.S. Government. As insurer, the FDIC assesses deposit insurance premiums and is authorized to conduct examinations of and to require reporting by FDIC-insured institutions. It also may prohibit any FDIC-insured institution from engaging in any activity the FDIC determines by regulation or order to pose a serious risk to the BIF. The FDIC also has the authority to initiate enforcement actions against banks after giving the OCC an opportunity to take such action, and may terminate the deposit insurance if it determines that the institution has engaged in unsafe or unsound practices or is in an unsafe or unsound condition.

### *Payment of Dividends*

Riggs National Corporation is not only the name of the consolidated financial reporting entity but also refers to a distinct legal entity (the Parent Company or RNC) other than the consolidated financial reporting entity. The majority of RNC's cash revenue is from dividends paid to it by the Bank. The Bank is subject to laws and regulations that limit the amount of dividends that it can pay. In addition, both RNC and the Bank are subject to various regulatory restrictions relating to the payment of dividends, including requirements to maintain capital at or above regulatory minimums.

Banking regulators have indicated that banking organizations should generally pay dividends only if the organization's net income available to common shareholders over the past year has been sufficient to fully fund the dividends and the prospective rate of earnings retention appears consistent with the organization's capital needs, asset quality and overall financial condition.

Neither the Bank nor RNC may make any capital distribution (or, also, in the case of the Bank, pay any management fee to RNC) if the Bank or RNC would thereafter be undercapitalized. Undercapitalized depository institutions and holding companies are subject to increased regulatory monitoring and asset growth limitations and are required to submit capital restoration plans. Both the Bank and the Company are considered well-capitalized under federal banking regulations at December 31, 2003.

The Bank's ability to pay dividends is governed by the National Bank Act and OCC regulations. Under such statute and regulations, all dividends by a national bank must be paid out of current or retained net profits, after deducting reserves for losses and bad debts. Various provisions of the National Bank Act further restrict the payment of dividends. In addition, the OCC has the authority to prohibit the payment of dividends by a national bank when it determines such payment to be an unsafe and unsound banking practice. In addition, the bank would be prohibited by federal statute and the OCC's prompt corrective action regulations from making any capital distribution if, after giving effect to the distribution, the bank would be classified as undercapitalized under OCC regulations. See Prompt Corrective Action.

### *Capital Adequacy*

The Board, the FDIC and the OCC have issued similar risk-based and leverage capital guidelines applicable to banking organizations these regulatory entities supervise. Under the risk-based capital guidelines, the Company and the Bank are each required to maintain a minimum ratio of total capital to risk-based assets, which by definition includes certain off-balance sheet amounts, of 8%. At least half of the total capital must be comprised of common equity, retained earnings, qualifying perpetual preferred stock and certain hybrid capital instruments, less certain intangibles (tier I capital). The remainder may consist of certain subordinated debt, certain hybrid capital instruments, qualifying preferred stock and a limited amount of the loan loss allowance (tier II capital which, together with tier I capital, comprises total capital). To be considered well-capitalized under the risk-based capital guidelines, an institution must maintain a total risk-weighted capital ratio of at least 10% and a tier I risk-weighted capital ratio of 6% or greater. An institution may be downgraded to, or deemed to be in, a capital category that is lower than is indicated by its capital ratios if it is determined to be in an unsafe or unsound condition by banking regulators or if it receives an unsatisfactory regulatory examination rating with respect to certain matters.

*Prompt Corrective Action*

The OCC is authorized and, under certain circumstances required, to take certain actions against national banks that fail to meet capital requirements. The OCC is generally required to take action to restrict the activities of an undercapitalized institution. Any such institution must submit a capital restoration plan and, until such plan is approved by the OCC, may not increase its assets, acquire another institution, establish a branch or engage in any new activities, and generally may not make capital distributions. Moreover, the OCC may designate an institution as significantly undercapitalized, which permits it to impose further additional restrictions.

Any national bank that fails to comply with its capital restoration plan or is significantly undercapitalized (i.e., tier 1 risk-based or core capital ratios of less than 3% or a risk-based capital ratio of less than 6%) must be made subject to one or more of additional specified actions and operating restrictions which may cover all aspects of its operations and include a forced merger or acquisition of the bank. A national bank that becomes critically undercapitalized (i.e., a tangible capital ratio of 2% or less) is subject to further mandatory restrictions on its activities in addition to those applicable to significantly undercapitalized institutions. In addition, the OCC must appoint a receiver (or conservator with the concurrence of the FDIC) for an institution, with certain limited exceptions, within 90 days after it becomes critically undercapitalized. Any undercapitalized institution is also subject to the general enforcement authority of the OCC, including the appointment of a conservator or a receiver.

The OCC is also generally authorized to reclassify a bank into a lower capital category and impose the restrictions applicable to such category if the institution is engaged in unsafe or unsound practices or is in an unsafe or unsound condition. The imposition by the OCC of any of these measures on the Bank may have a substantial adverse effect on the Bank's operations and profitability and the value of the Company's outstanding securities, including its common stock.

*Deposit Insurance Assessments*

Pursuant to the Federal Deposit Insurance Corporation Improvement Act of 1991, the FDIC adopted a risk-based assessment system for insured depository institutions that takes into account the risks attributable to different categories and concentrations of assets and liabilities. This risk-based system assigns an institution to one of three capital categories: well-capitalized; adequately capitalized; or undercapitalized. These three categories are substantially similar to the prompt corrective action categories used by the regulators, with the undercapitalized category including institutions that are undercapitalized, significantly undercapitalized, and critically undercapitalized for prompt corrective action purposes.

Under the risk-based assessment system, there are nine assessment risk classifications (i.e., three supervisory subgroups within each capital category) to which different deposit insurance assessment rates are applied. Assessment rates for deposit insurance currently range from 0 to 27 basis points ( bp ) per \$100 of deposits. The capital and supervisory subgroup to which an institution is assigned by the FDIC is confidential and may not be disclosed. The Bank's rate of deposit insurance assessments depends upon the category and subcategory to which it is assigned by the FDIC. Any increase in insurance assessments would have an adverse effect on the earnings of the Bank and the Company. Under the Deposit Insurance Funds Act of 1996, deposit insurance may be terminated by the FDIC upon a finding that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

*Community Reinvestment Act*

Under the Community Reinvestment Act (CRA), every FDIC-insured institution has a continuing and affirmative obligation consistent with safe and sound banking practices to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The CRA does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the CRA. The CRA requires the OCC, in connection with the examination of the institution, to assess the institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications, such as a merger or the establishment of a branch, by the institution. An unsatisfactory rating may be used as the basis for the denial of an application by the OCC. The Bank's CRA rating is outstanding .

### *Related Party Transactions*

There are legal restrictions on the extent to which RNC and its non-bank subsidiaries may borrow or otherwise obtain credit from the Bank. Subject to certain limited exceptions, the Bank may not extend credit to RNC or to any non-bank affiliates in an amount which exceeds 10% of RNC's capital stock and surplus and may not extend credit in the aggregate to such affiliates in an amount which exceeds 20% of its capital stock and surplus. There are further legal requirements as to the type, amount and quality of collateral that must secure such extensions of credit by the Bank to RNC or to its affiliates. Finally, extensions of credit and other transactions between the Bank and RNC or its affiliates must be on terms and under circumstances, including credit standards, that are substantially the same or at least as favorable to the Bank as those prevailing at the time for comparable transactions with non-affiliated companies.

In addition, the bank may not acquire the securities of most affiliates. Subsidiaries of the bank are not deemed affiliates. However, the Board has the discretion to treat subsidiaries of national banks as affiliates on a case-by-case basis.

Certain transactions with directors, officers or controlling persons (insiders) are also subject to conflict of interest rules enforced by the OCC. These conflict of interest regulations and other statutes also impose restrictions on loans to such persons and their related interests. Among other things, as a general matter, loans to insiders must be made on terms substantially the same as for loans to unaffiliated individuals.

### **Holding Company Regulation**

The Company is a bank holding company registered with the Board. Bank holding companies are subject to comprehensive regulation by the Board under the BHCA and the regulations of the Board. As a bank holding company, the Company is required to file reports with the Board and such additional information as the Board may require, and will be subject to regular examinations by it. The Board also has extensive enforcement authority over bank holding companies, including, among other things, the ability to assess civil money penalties, to issue cease and desist or removal orders and to require that a holding company divest subsidiaries (including its bank subsidiaries). In general, enforcement actions may be initiated for violations of law and regulations and unsafe or unsound practices.

Under Board policy, a bank holding company must serve as a source of strength for its subsidiary banks. Under this policy, the Board may require, and has required in the past, a holding company to contribute additional capital to an undercapitalized subsidiary bank.

Any loans made by RNC to the Bank are subordinate to deposits and to certain other indebtedness of the Bank. In the event of the RNC's bankruptcy, a commitment by it to a bank regulatory agency to maintain the capital adequacy of the Bank will be assumed by the bankruptcy trustee and entitled to a priority of payment.

Under the BHCA, a bank holding company must obtain Board approval before: (i) acquiring, directly or indirectly, ownership or control of any voting shares of another bank or bank holding company if, after such acquisition, it would own or control more than 5% of such shares (unless it already owns or controls the majority of such shares); (ii) acquiring all or substantially all of the assets of another bank or bank holding company; or (iii) merging or consolidating with another bank holding company.

The BHCA also prohibits a bank holding company, with certain exceptions, from acquiring direct or indirect ownership or control of more than 5% of the voting shares of any company which is not a bank or bank holding company, or from engaging directly or indirectly in activities other than those of banking, managing or controlling banks, or providing services for its subsidiaries. The principal exceptions to these prohibitions involve certain non-bank activities which, by statute or by Board regulation or order, have been identified as activities closely related to the business of banking or managing or controlling banks.

Bank holding companies are required to get the Board's prior written notice of any purchase or redemption of its outstanding equity securities if the gross consideration for the purchase or redemption, when combined with the net consideration paid for all such purchases or redemptions during the preceding 12 months, is equal to 10% or more of their consolidated net worth. The Board may disapprove such a purchase or redemption if it determines that the proposal would constitute an unsafe or unsound practice or would violate any law, regulation, Board order, or any condition imposed by, or written agreement with, the Board. This notification requirement does not apply to any company that meets the well capitalized standard for banks, is well managed and is not subject to any unresolved supervisory issues.

### **Federal Home Loan Bank System**

The Bank is a member of the FHLB, which is one of 12 regional FHLBs. Each FHLB serves as a reserve or central bank for its members within its assigned region. It is funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB System. It makes loans (i.e., advances) to members in accordance with policies and procedures, established by the board of directors of the FHLB which are subject to the oversight of the Federal Housing Finance Board, an agency of the United States government. All advances from the FHLB are required to be fully secured by sufficient collateral as determined by the FHLB. In addition, all long-term advances are to be utilized to provide funding for residential home financing.

As a member, the Bank is required to purchase and maintain stock in the FHLB. At December 31, 2003, the Bank had \$25.6 million in FHLB stock, which was in compliance with this requirement. In the past year, the Bank has received dividends on its FHLB stock. Recent legislative changes will require the FHLB to change the characteristics and amount of stock held by its members. It is also anticipated that these changes will restrict somewhat the ability of FHLB members to redeem their shares of FHLB stock.

### **Legislation**

The Bank Secrecy Act of 1970 (BSA) was designed to deter money laundering and the use of secret foreign bank accounts, establish regulatory reporting standards for currency transactions and improve detection and investigation of criminal, tax and other regulatory violations. BSA and subsequent laws and regulations require the Bank to take steps to prevent the use of the Bank or its systems from facilitating the flow of illegal or illicit money and to file suspicious activity reports. Those requirements include ensuring effective Board and management oversight, the establishment of sound policies and procedures, developing effective monitoring and reporting capabilities, ensuring adequate training and establishing a comprehensive internal audit of BSA compliance activities.

In recent years, federal regulators have increased the attention paid to compliance with the provisions of BSA and related laws, with particular attention paid to Know Your Customer practices, which are now known commonly as Enhanced Due Diligence. Banks have been encouraged, by both regulators and by various industry groups, to enhance their identification procedures prior to accepting new customers in order to deter criminal elements from using the banking system to move and hide illicit profits and activities.

In 2001, the President of the United States signed into law the USA PATRIOT Act of 2001 that increases certain responsibilities for banks to, among other things, enhance due diligence in monitoring accounts related to certain terrorist activities. The USA PATRIOT Act also applies BSA procedures to broker-dealers. The Bank also is responsible for compliance with restrictions from the U.S. Treasury's Office of Foreign Assets Control (OFAC). Accordingly, Riggs Bank restricts transactions with certain countries except as permitted by OFAC or in accordance with a license from OFAC.

The Patriot Act is intended to strengthen U.S. law enforcement's and the intelligence communities' abilities to work cohesively to combat terrorism on a variety of fronts. The potential impact of the Patriot Act on financial institutions of all kinds is significant and wide ranging. The Patriot Act contains sweeping anti-money laundering and financial transparency laws and imposes various regulations, including standards for verifying customer identification at account opening, and rules to promote cooperation among financial institutions, regulators and law enforcement entities in identifying parties that may be involved in terrorism or money laundering. See Consent Order and Notification of Possible Assessment of Civil Money Penalties.

On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002 (the SOA). The SOA is the most far-reaching U.S. securities legislation enacted in many years, and includes many substantive and disclosure-based requirements. The stated goals of the SOA are to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities law. The SOA generally applies to all companies, both U.S. and non-U.S., that file or are required to file periodic reports with the Securities and Exchange Commission under the Securities Exchange Act of 1934 (the Exchange Act). Given the extensive and continuing SEC role in implementing rules relating to many of the SOA's new requirements, it is likely that the Company's costs will increase, at least in the short term, as a result of SOA implementation.

### **Consent Order and Notification of Possible Assessment of Civil Money Penalties**

In July 2003, the Bank entered into a Stipulation and Consent to the Issuance of a Consent Order and a Consent Order (collectively the Consent Order) with the OCC. The provisions of the Consent Order are effective until such time as they are amended, suspended, waived or terminated by the OCC. The Consent Order requires the Bank to take various actions to ensure compliance and improve the monitoring of compliance with BSA and related rules and regulations. The Consent Order allows the OCC to take whatever future actions it deems necessary to fulfill its regulatory responsibilities. These actions could include the imposition of a monetary penalty, including a civil money penalty.

On March 2, 2004, the OCC advised the Bank that it was considering whether to institute a civil money penalty action against the Bank and that such action would be based upon the OCC's allegations that the Bank violated the BSA and related rules and regulations, failed to comply with the Consent Order discussed above and failed to implement adequate controls to ensure that the Bank operates in a safe and sound manner with respect to BSA matters. The amount of the civil money penalty being considered was not specified by the OCC. The OCC also informed the Bank that it may seek unspecified modifications to the Consent Order and/or an additional consent order. Many of the regulatory violations alleged by the OCC predate the Consent Order. Under OCC procedures, the Bank is afforded the opportunity to submit information bearing on the appropriate amount of any penalty to be assessed before the imposition of such a penalty.

The OCC also informed the Bank that it is considering whether to take measures that would generally subject the Bank to increased regulatory supervision and operational restrictions. In particular, the OCC advised the Bank that primarily as a direct result of its BSA criticisms, that it expects to designate the Bank as being in a troubled condition. A bank that is classified as being in a troubled condition must have any new director or executive officer approved in advance by the OCC and is subject, along with its holding company, to a prohibition on making severance payments to the Bank's directors, officers and employees under the FDIC's golden parachute rules. The increased regulatory supervision is expected to result in more frequent and intensive examinations.

Also on March 2, 2004, the Bank was advised by the Financial Crimes Enforcement Network (FinCEN) of the United States Department of the Treasury that it was evaluating whether it is appropriate for FinCEN to assess a civil monetary penalty and/or take additional enforcement action against the Bank for alleged apparent willful violations of BSA and related rules and regulations. FinCEN generally categorizes its concerns as (1) failure to establish and implement an adequate anti-money laundering program, (2) failure to properly prepare and file suspicious activity reports, and (3) failure to file accurate currency transaction reports. The amount of the civil money penalty being considered was not specified by FinCEN. Under FinCEN's procedures, before it makes a determination as to the existence and willfulness of the Bank's violations, the Bank is allowed to submit further information that is relevant to FinCEN's evaluation of whether a civil money penalty and/or additional enforcement action is warranted for the alleged violations. The Company understands that the OCC and FinCEN are reviewing the involvement of employees, officers, and directors of the Bank with respect to the foregoing.

The Company cannot currently estimate the amount of any civil monetary penalty, if any, that either the OCC or FinCEN may assess.

The Bank expects these actions will increase the Bank's costs of doing business.

### *Competition and Environment*

The Company faces significant competitive pressure from local, regional, national and international banking institutions as well as thrifts, finance companies, credit unions, brokerage and insurance companies and other financial intermediaries. Many of the Company's competitors are larger and have greater financial and other resources than Riggs. While competitive pressures are intense, there have been no significant events or trends that have impacted the Company's ability to generate loans and deposits. The Company may be impacted, however, by future changes in social, political or economic environments, domestic and foreign terrorism, or a deterioration of the public's confidence in the banking system or the Company. Many of these factors are beyond the Company's ability to control.

While Riggs is not dependent on any individual loan, deposit or wealth management customer, the withdrawal of funds by a combination of large depositors or the repayments of loans by a combination of large borrowers or the termination of several large wealth management relationships could negatively impact operating results, financial condition or liquidity. See Risk Factors on page 18.

*Additional Information*

The Company files annual, quarterly, and current reports, proxy statements, and other documents with the Securities and Exchange Commission (SEC) under the Exchange Act. The public may read and copy any materials that the Company files with the SEC at the SEC's Public Reference Room at 450 Fifth Street, NW, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Also, the SEC maintains an Internet website that contains reports, proxy and information statements, and other information regarding issuers, including the Company, that file electronically with the SEC. The public can obtain any documents that the Company files with the SEC at <http://www.sec.gov>.

Beginning in 2003, the Company also makes available free of charge on or through its Internet website ([www.riggsbank.com](http://www.riggsbank.com)) its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act as soon as reasonably practicable after the Company electronically files such materials with, or furnishes them to, the SEC.

**EXECUTIVE OFFICERS OF THE REGISTRANT**

<i>Executive Officer*</i>	<i>Position</i>	<i>Age</i>
Robert L. Allbritton	Chairman of the Board and Chief Executive Officer of the Corporation since 2001, Chairman of the Board of Riggs Bank N.A. since 2001	34

**EXPERIENCE OF MANAGEMENT**

**Robert L. Allbritton** has been Chairman of the Board and Chief Executive Officer of the Company and Chairman of the Board of Riggs Bank N.A. since 2001. He also serves as a director of Perpetual Corporation (indirect owner of Allbritton Communications Company and 99.7% owner of ALLNEWSCO, Inc.), Chairman and Chief Executive Officer of Allbritton Communications Company and Chairman and director of ALLNEWSCO, Inc.

**Timothy C. Coughlin** has served as President of the Company since 1992. He has been a director of the Company since 1988, Chairman of Riggs Investment Advisors Inc. since 2001, and was a Director of Riggs Bank N.A. from 1983 to 1996.

**Joseph M. Cahill** was appointed General Counsel of the Company in 2000 and has served as Executive Vice President and General Counsel of Riggs Bank N.A. since 2001. Mr. Cahill also served as Executive Director of Legal Affairs of Riggs Bank N.A. from 1998 to 2001, Litigation Manager of Riggs Bank N.A. from 1996 to 1997, and Associate Litigation Manager from 1993 to 1995.

**David B. Caruso** has served as Executive Vice President, Compliance and Security of Riggs Bank N.A. since June of 2003. Mr. Caruso is accountable for the Bank's compliance with Department of Treasury regulations. Prior to joining Riggs, Mr. Caruso was a Director in KPMG's Investigation and Integrity Advisory Services practice and the Director of Ernst & Young's Anti-Money Laundering Compliance Practice. Prior to Ernst & Young he served as Manager of the Fraud and Money Laundering Prevention Group at JP Morgan & Company. From 1991 to 1996 Mr. Caruso served as a Special Agent with the U.S. Secret Service where he was assigned to the New York Field Office's Financial Institution Fraud Group.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

**William A. Craig**, Executive Vice President of the Bank, has served as head of Human Resources since 2000. Prior to joining Riggs Bank, Mr. Craig served as Senior Vice President and Chief Administrative Officer at Merchant's Inc., and held similar positions at Perpetual Financial Corporation, Woodward and Lothrop, and Giant Food.

**Jeffrey T. Glynn** has served as Executive Vice President of Community Banking since April of 2000. Mr. Glynn has served in various management positions with the Bank during the past 9 years. He held the position of Senior Vice President of RiggsDirect, the Bank's telephone banking group, from 1995 to 2000.

**Lawrence I. Hebert**, has served as President and Chief Executive Officer of Riggs Bank N.A. since 2001. He has served as a director of Riggs National Corporation since 1988 and as a director of Riggs Bank N.A. from 1981-1988, from 1989-1996, and since 2001. Mr. Hebert also serves as President and a director of Perpetual Corporation (indirect owner of Allbritton Communications Company and 99.7% owner of ALLNEWSCO, Inc.), director of ALLNEWSCO, Inc. and President of Westfield News Advertiser, Inc. Prior to joining Riggs Mr. Hebert served as Chairman and Chief Executive Officer of Allbritton Communications Company.

**Mark N. Hendrix**, has served as Executive Vice President and Chief Marketing Officer of Riggs Bank N.A. since 1998. Prior to joining the Bank, Mr. Hendrix served as Director of Marketing Communications for Barnett Banks, Inc.

**Shaun V. Kelley**, has served as Executive Vice President and Chief Credit Officer since 2001. Prior to joining Riggs Bank, Mr. Kelley was at First Union National Bank in Northern Virginia, serving as Managing Director of the Private Capital Management Group from 2000 to 2001, and as Senior Vice President and Senior Credit Officer from 1993 to 2000.

**Glenn E. Kinard**, was appointed Executive Vice President of Corporate and Institutional Banking in 2003. Mr. Kinard served as Senior Vice President, Deputy Group Head, Corporate and Institutional Banking from 2001 to 2003. Prior to joining the Bank, Mr. Kinard served as Executive Vice President, Retail Banking of United Bank of Virginia from 1995 to 2001 and held similar positions at First Union National Bank, Dominion Bankshares and American Security Bank.

**R. Ashley Lee** was appointed Executive Vice President and Chief Risk Officer for Riggs Bank, N.A. and Vice President and Chief Risk Officer for Riggs National Corporation with responsibility for enterprise-wide risk management in October 2003. Mr. Lee joined the Bank in 2002 as a Group Vice President and Loan Review Manager in the Credit Administration Department. Prior to joining Riggs he was with the Office of the Comptroller of the Currency from 1968 to 2002.

**Raymond M. Lund** has served as Executive Vice President of the International Banking Group since 1996. Mr. Lund has served in various management positions with the Bank during the past 15 years, including Head of the International and Domestic Private Banking Divisions.

**Henry D. Morneault**, has served as Executive Vice President and Chairman of Riggs & Co. since 2001. Mr. Morneault joined the Bank from FleetBoston Financial, where he was Group Manager and Managing Director of the Media and Entertainment Group.

**Eartha C. Morris** has served as Executive Vice President of Operations since April of 2000. Ms. Morris has served in various management positions within the Bank during the past eleven years. Prior to joining Riggs Bank, Ms. Morris held similar positions at James Madison Ltd., Equitable Bank, Provident Bank and First American Bank.

**Robert C. Roane**, Executive Vice President, has served as Chief Operating Officer of Riggs Bank N.A. since May of 1999. Mr. Roane has served in various management positions with Riggs Bank during the past twenty-five years.

**Wendy J. Ross** has served as Executive Vice President of Technology of the Bank since October of 2003. Ms. Ross has served in various management positions within the Bank since 1986.

**Steven T. Tamburo** has served as Chief Financial Officer and Treasurer of the Company and Executive Vice President and Chief Financial Officer of Riggs Bank N.A. since 2001. Mr. Tamburo also served as Deputy Chief Financial Officer of the Company and as Senior Vice President and Deputy Chief Financial Officer of Riggs Bank N.A. from 2000 to 2001, as Senior Vice President and Controller of Riggs Bank N.A. from 1999 to 2000, and as Group Vice President-Management and Regulatory Reporting-Riggs Bank N.A. from 1998 to 1999. Prior to joining Riggs, Mr. Tamburo was a Senior Manager in the financial services practice at KPMG.

**ITEM 2. PROPERTIES**

Riggs owns the properties located in Washington, D.C. which house its executive offices, fourteen of its branches and certain operational units of Riggs Bank. The Company also owns an office building in Maryland, where additional operational units of Riggs Bank are located. Further, it owns an office building in London (England) and leases various properties in: Washington, D.C.; London (England); Berlin (Germany); Jersey (Channel Islands); Miami (Florida); New Haven (Connecticut); Northern Virginia and Maryland. Additional information concerning the Company's facilities can be found in Notes 1 and 6 of Notes to Consolidated Financial Statements. The facilities the Company owns and leases are adequate to meet the needs of its customers and its operating requirements.

**ITEM 3. LEGAL PROCEEDINGS**

In the normal course of business the Company is involved in various types of litigation and disputes which may lead to litigation. The Company, based upon its assessment of the facts and circumstances of actual, threatened and unasserted legal actions and, when deemed necessary, after consultation with outside counsel, has determined that pending and threatened legal actions will not have a material impact on its financial condition or future operations (see Note 9 of Notes to Consolidated Financial Statements). As reported on Form 10-Q for the quarter ended September 30, 2003, the Company was informed on November 12, 2003 that it was, along with other financial institutions, a defendant in two consumer class action lawsuits which alleged that the Company, the Bank and the other defendants violated several state antitrust laws since merchants were required to accept Visa and MasterCard debit cards as a condition of accepting Visa and MasterCard credit cards, thereby inflating costs which were passed along to consumers. The Company has subsequently been advised that the plaintiffs in the two cases will not proceed against any of the banking organizations previously named as defendants, including Riggs Bank and the Company.

As discussed elsewhere in this Form 10-K on pages 10 and 61, the Company's primary subsidiary, Riggs Bank N.A. received notifications from the OCC and FinCEN that they are considering whether to assess civil money penalties.

**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

No matters were submitted to security holders for vote during the fourth quarter of 2003.

**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The common stock of the Company is traded on The Nasdaq National Market under the symbol: RIGS. A history of the Company's stock prices and dividends is as follows:

		PRICE RANGE		DIVIDENDS DECLARED AND PAID
		HIGH	LOW	
2003	Fourth Quarter	\$ 17.41	\$ 15.73	\$0.05
	Third Quarter	16.58	14.92	0.05
	Second Quarter	15.90	13.25	0.05
	First Quarter	16.20	13.51	0.05
2002	Fourth Quarter	\$ 16.99	\$ 12.90	\$0.05
	Third Quarter	16.47	11.30	0.05
	Second Quarter	17.02	13.47	0.05
	First Quarter	16.88	13.26	0.05

As of January 31, 2004 there were 1,749 shareholders of record.

**ITEM 6. SELECTED CONSOLIDATED FINANCIAL DATA**

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK OVERVIEW**

This overview is a summary-level presentation of those factors that are deemed most relevant to understanding the Company's financial condition and results of operations. For a more complete understanding of the significant factors that influenced the Company's performance during the past three years, read all of the following discussion and analysis and the consolidated financial statements and related notes included in this Annual Report on Form 10-K. The following discussion and analysis contains forward-looking statements that are subject to risks, uncertainties and other factors that could cause actual results, performance, prospects or opportunities to differ materially from those expressed in, or implied by, these forward-looking statements. See Forward-Looking Statements.

As previously described, Riggs National Corporation is a bank holding company headquartered in Washington, D.C. The Company engages in a variety of banking and financial services including community, commercial and international banking, trust and investment management services and venture capital investing. The Company has conducted its activities through six reportable segments: Banking, International Banking, Riggs & Co. (wealth management), Treasury, Riggs Capital Partners (venture capital) and Other. With the exception of venture capital investing, the activities of the Company are conducted through its principal operating subsidiary, Riggs Bank, and its subsidiaries and divisions. Venture capital investing is performed through two investments of RNC, Riggs Capital Partners LLC and Riggs Capital Partners II LLC.

The Company has forty-seven branch locations and 143 ATMs in the metropolitan Washington, D.C. area and a bank in the United Kingdom. There are additional operations or subsidiaries in London (England), Miami (Florida), Berlin (Germany), Jersey (Channel Islands) and Nassau (Bahamas). Riggs serves an array of customers including individuals, partnerships, corporations, foundations, not-for-profit organizations and foreign embassies and delegations.

The Company's principal source of revenue is net interest income, or the difference between what the Company earns on interest earning assets, such as loans, securities available for sale, securities held to maturity and short-term investments, and what it pays on interest bearing liabilities, such as deposits and the Company's short-term borrowings and long-term debt. Noninterest income, the next largest component of revenue, primarily represents service charges and fees earned on loans, deposits and assets under management, venture capital gains or losses and net securities gains or losses. Noninterest expense, the Company's largest source of expenditures, comprises the Company's operating expenses and includes salaries and benefits, occupancy, data processing, consulting, advertising and public relations, furniture, fixture and software and other operating expenses.

For the three years ended December 31, 2003, the Company's net interest income and net interest margin, or net interest income on a tax-equivalent basis as a percent of average earning assets, has been:

	<b>Net Interest Income</b>	<b>Net Interest Margin</b>
2003	\$171.6 million	3.09%
2002	192.8 million	3.59
2001	191.1 million	3.91

During this same three year period, the Company's interest rate spread, or the difference between the rate it earns on interest-earning assets and the rate it pays on interest-bearing liabilities, has been:

2003	2.95%
2002	3.41
2001	3.49

The three years ended December 31, 2003 were generally a period of declining interest rates during which it became increasingly difficult to adjust the pricing of funding sources as rapidly as earning assets. This led to rate compression which over this same period caused net interest income, net interest margin and interest rate spread to decrease. As explained in Results of Operations beginning on page 22, declining interest rates also adversely impacted the Bank's

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

previously disclosed leverage program as did changes in authoritative accounting literature (see Riggs Capital on page 4 and Results of Operations on page 22) and the methodology by which Riggs is compensated as a financial agent bank by the U.S. Treasury (see Results of Operations on page 22).

Noninterest income excluding net security gains, which is excluded because it is deemed to be discretionary on the part of Riggs management, has been:

2003	\$97.0 million
2002	84.0 million
2001	73.3 million

Noninterest income has been positively impacted by the decreasing losses in its venture capital operations during the last three years. These losses were \$4.2 million in 2003, \$14.8 million and \$31.1 million in 2002 and 2001, respectively. Significant factors impacting noninterest income are discussed in Results of Operations commencing on page 17.

Noninterest expense for the three years ended December 31, 2003 has been:

2003	\$260.8 million
2002	240.4 million
2001	266.3 million

Included in the 2001 noninterest expense is \$34.1 million of restructuring and other charges. The 2003 expense includes significant amounts related to the implementation of Project EPS, a two-year effort by the Company to upgrade its technology and operations. See Results of Operations on page 22 for additional analysis of noninterest expenses.

Primarily because of the above factors, the Company's net income (loss) for the three years ended December 31, 2003 has been:

2003	\$ 1.0 million
2002	13.0 million
2001	(23.4) million

The Company's asset quality at December 31, 2003 is good with nonaccrual and renegotiated loans of \$2.3 million, which represents 0.07% of all loans. At December 31, 2003 the Company's reserve for loan losses is approximately twice the total of nonaccrual, renegotiated and ninety-day past-due loans. The Company's regulatory capital exceeds regulatory requirements and the Company and the Bank are well-capitalized under regulatory guidelines.

Based upon mid-year data the Company believes it has approximately 23% of the Washington, D.C. FDIC-insured deposit market and approximately 5% of the FDIC-insured deposit market in the greater Washington D.C. metropolitan area. The Company cautions that this market share data may not be indicative of future deposit market share because of the change in the methodology by which Riggs is compensated as a financial agent bank by the U.S. Treasury. See Results of Operations commencing on page 22. The Company plans to open ten branches per year during the next three years. This plan is, however, dependent upon the Company identifying acceptable branch sites, procuring these sites on reasonable terms and obtaining regulatory approval. A new branch facility typically requires an investment of between \$500 thousand and \$1.5 million depending upon the location and type of branch. In addition, during 2004 and 2005 the Company will remodel all of its existing branches. The Company anticipates that these upgrades will cost approximately \$500 thousand to \$700 thousand per location.

## RISK FACTORS

Like all regulated financial institutions, the Company is exposed to numerous risks that could adversely impact profits, financial condition and cash flows, and, ultimately, franchise value. In order to mitigate these risks somewhat, the Company has various policies, personnel and committees that establish limits for and monitor various aspects of its risk profile. Moreover, in 2003, the Company created and staffed the position of Chief Risk Officer, an executive level position. The Chief Risk Officer develops and implements entity-wise risk management policies, serves as internal consultant regarding risk management matters and works with other management members to identify and resolve potential risk management issues.

### Geographic Risks

A significant majority of the Company's assets, deposits and fee income is generated in the Washington, D.C. metropolitan area. As a result, deterioration of local economic conditions in this metropolitan area could expose the Company to losses associated with higher loan default rates and lower asset collateral values, deposit withdrawals and other factors that could adversely impact its financial condition and results of operations.

### Exposure to International Events

The Company's exposure to customer relationship risk is significant because of its relatively high concentration of foreign customers, including foreign governments. These customers may be subject to deteriorating economic conditions, investigations, political and social upheaval, currency depreciation or devaluation, as well as nationalization and expropriation of assets or other factors over which the Company has no control, some or all of which may adversely impact the performance or financial condition of the Company. Moreover, terrorist activities and other hostile actions against U.S. interests could have an adverse impact upon the general economic condition of the Company's foreign customers, as well as the U.S. economy, thereby impacting the activities and performance of the Company.

### Fluctuations in Interest Rates (Market Risk)

Significant increases in market interest rates, or the perception that an increase may occur, could adversely impact the Company's ability to generate new variable loans and cause the value of its fixed-rate assets to decline. An increase in market interest rates may also adversely impact the ability of adjustable rate borrowers to meet repayment obligations, thereby causing nonperforming loans and loan charge-offs to increase. Significant decreases in market interest rates could result in an acceleration of loan repayments thereby mitigating the positive impact of declining interest rates on fixed rate assets. Changes in market interest rates, including changes in the relationship between short-term and long-term market interest rates or between different rate indices, can impact interest rate spread. See Sensitivity to Market and Other Risk on page 32.

### Competition Risk

The Company faces significant competitive pressure from local, regional, national and international banking institutions as well as thrifts, finance companies, credit unions, brokerage and insurance companies and other financial intermediaries. Many of the Company's competitors are larger and have greater financial and other resources. Riggs competes on the basis of its reputation, localized decision-making, interest rates, convenient locations and quality of customer service. See Competition and Environment on page 10.

### Credit Risk

The Company is exposed to credit risk on the loans and other credit instruments it has in its portfolio. While the portfolio is closely monitored and an on-going analysis and evaluation of this risk is performed, because of the nature of the Company's business, unexpected credit losses may subsequently be identified as a result of additional analysis performed by the Company or comments received from regulatory examiners. In addition, collateral values may deteriorate subsequent to the making of a loan so that a loss exposure develops. See Asset Quality on page 29.

### Legislative and Regulatory Risk

The Company's operations are subject to extensive regulation by federal banking authorities and are also subject to various laws and judicial and administrative decisions imposing requirements and restrictions on its operations. Policies adopted and positions taken by these regulatory and administrative entities can impact the Company's operations. In addition, these

authorities periodically conduct examinations of the Company and may impose various requirements or sanctions. The regulatory environment may periodically change significantly as new laws and regulations are promulgated. As a result of new laws and regulations, the competitive environment may also change significantly.

#### Dividend Limitation Risk

The Company is a holding company and its operations are conducted primarily through its operating subsidiary, Riggs Bank. RNC's ability to pay dividends to its shareholders and to service its debt is dependent primarily upon the ability of the Bank to make dividend and other payments to RNC. Certain laws and regulatory requirements restrict the ability of Riggs Bank to make such payments to the RNC. See Payment of Dividends and Capital Adequacy on page 6.

#### Liquidity Risk

The Company closely monitors its liquidity position including its sources of funding and commitments to fund assets or deposit withdrawals. The Company maintains several credit facilities and the Company's securities available for sale portfolio is very marketable and is, therefore, a source of liquidity. In addition, substantially all of the securities available for sale portfolio can be pledged to secure borrowings. Hence, the Company believes that it has sufficient liquidity to fund its commitments. However, changes in the stability of the economic, social or political environments culminating in withdrawals by several of the Bank's largest depositors, or a deterioration in the public's confidence in the banking system in general or the Company in particular, could have an adverse impact on the Company's liquidity position. While marketable, liquidating the securities available for sale portfolio to fund liquidity requirements may result in the recognition of a loss. See also Cross Border Outstandings on page 26 and Commitments and Liquidity on page 28.

#### Operational Risk

The Company relies on various information systems for operating significant aspects of its business, including loan and deposit information, as well as internal management systems. These systems and the Company's operations are vulnerable to, among other things, damage or interruption from natural disasters, power loss, network failure, improper operations, security breaches, computer viruses or intentional sabotage. Controls and procedures have been implemented to minimize these risks, but any disruption in the operation of the Company's various information systems could adversely impact its operations which may affect its results of operations and financial condition. In addition, noncompliance with laws, regulations or contractual obligations, or failure to perform in accordance with industry standards could result in claims for damages, fines or monetary sanctions including, but not limited to, monetary sanctions which may be imposed under the provisions of the BSA and related regulations.

#### Bank Secrecy Act and Money Laundering Compliance; Consent Order

As discussed on page 10, on March 2, 2004, the Bank was informed by the OCC and FinCEN that each is considering whether to assess civil monetary penalties and may modify the existing Consent Order or take additional enforcement action. The Company cannot currently estimate the amount of these penalties, if any, or, the additional adverse financial consequences that may result from them. Similarly, the Company is unable to determine the financial consequences, if any, that may result from modifications to its existing Consent Order or the imposition of an additional enforcement action, if any.

#### Reputation Risk

Riggs strives to operate in a professional manner and has implemented various personnel policies and procedures, including an employee code of conduct applicable to all employees, to help ensure the maintenance of integrity and professionalism. Nevertheless, Riggs or its employees may fail to perform in accordance with these policies and procedures, or Riggs may find itself in a situation that is embarrassing from a public relations perspective and, upon this information becoming public knowledge, may suffer damage to its reputation. This damage could adversely impact customer confidence and have an adverse impact on the Company's financial condition and results of operations.

#### Risk Caused by Fluctuations in Currency Values

Riggs is exposed to changes in the relative values of the currencies in which it conducts business and the value of the United States dollar. Where deemed appropriate, the Company has attempted to mitigate this risk by entering into hedging transactions. See Note 19 to the Consolidated Financial Statements. The Company also monitors on a quarterly basis its

total risk exposure on a country-by-country basis and has established maximum risk exposures for each country. See Sensitivity to Market and Other Risk on page 32.

#### Reliance on Outside Vendors for Significant Overhead-Related Activities

The Company has made a significant investment in the utilization of third-party vendors to provide it with certain core services, such as, but not limited to, information technology services and telecommunications. Should these service providers fail to provide the Company with the products and services contracted for, fail to keep current with market standards in their respective industries or curtail or cease operations due to market or other conditions, the Company's operations could be negatively impacted.

#### Disintermediation

In the banking and financial services businesses, disintermediation is the process by which customers and potential customers bypass banks and other traditional financial institutions thereby depleting anticipated revenue streams. While the Company continues its efforts to make its products and services an integral, valuable component of its customers' financial transactions, the possibility of disintermediation is an inherent risk in the banking and traditional financial services business as customers may migrate to other financial intermediaries.

#### Concentration of Ownership

Members of a family beneficially own or control approximately 43% of the Company stock. The effect of this concentration could impair or prevent the Company's other shareholders from effecting certain actions deemed desirable by such shareholders.

#### Critical Accounting Policies and Estimates

Management of the Company has prepared the consolidated financial statements included in this Form 10-K in conformity with accounting principles generally accepted in the United States of America applied on a consistent basis and which follow general practice within the banking industry. Accordingly, management of the Company is required to make certain estimates, judgments and assumptions that it believes to be reasonable based upon the information available. These estimates, judgments and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of net interest income, the provision for loan losses, noninterest income and noninterest expense during the periods presented. Based on its consideration of accounting policies that involve the most complex and subjective estimates and assumptions as well as its analysis of whether and to what extent such estimates and assumptions will have a material impact on the Company's financial condition or results of operations, management has identified the following critical accounting policies. Due to uncertainty inherent in these matters, actual results of future operations could differ from the estimates, judgments and assumptions used in applying these critical accounting policies.

#### Reserve for Loan Losses

The reserve for loan losses is maintained at a level deemed adequate to absorb probable losses in the loan portfolio. The determination of the adequacy of the reserve for loan losses is based upon an on-going, analytical review of the loan portfolio. This analysis requires application of judgment, subjective evaluation of economic uncertainties and assessment of business conditions that may change. Because of these and other factors, adjustments to the reserve for loan losses may be required.

The analytical review of the loan portfolio performed to determine the adequacy of the reserve for loan losses includes a review of loans with balances over \$250 thousand for impairment, an analysis of historical loss experience by loan type and, for groups of loans with similar characteristics, an evaluation of current economic conditions and all other factors considered pertinent to the analysis. Impaired loans are defined as those credits where the Company has determined it probable that all amounts due in accordance with the loan agreements will not be collected or recovered from the disposition of collateral. Impaired loans are generally commercial and financial loans and commercial real estate loans and are usually on non-accrual status. Each impaired loan with an outstanding balance equal to or greater than \$250 thousand has a specific, identified loan loss reserve associated with it. Impaired loans do not include groups of smaller balance homogeneous loans with similar collateral characteristics, such as residential mortgage and home equity loans. Loss reserves for these types of loans are established on an aggregate basis using historical loss experience. Balances related to impaired loans for which there are specific reserves are excluded when applying historical loss ratios to determine loan loss reserves.

The specific reserves for impaired loans are included in the reserve for loan losses. Impaired loans are valued based upon the fair value of the related collateral if the loans are collateral dependent. For all other impaired loans, the specific reserves are based on the present values of expected cash flows discounted at each loan's initial effective interest rate.

Provisions to the reserve for loan losses are charged against, or credited to, earnings in amounts necessary to maintain an adequate reserve for loan losses. Commercial loans are charged-off when it is determined that they cannot be fully recovered and non-commercial loans are generally charged-off or loan foreclosure proceedings begun upon becoming 120 days delinquent or at such time as permitted by law or other regulations. Recoveries of loans previously charged-off are credited to the reserve for loan losses.

The Company maintains its reserve for loan losses in accordance with a policy approved by the Board of Directors. The Company has an established methodology for analyzing its reserve for loan losses that includes an internal loan classification policy. The Company periodically reviews its loan loss methodology to ascertain that it produces accurate assessments of probable loan losses. Domestic and international loans are subjected to similar review procedures.

While the Company believes its credit monitoring procedures are adequate, credit losses are, however, inherent to the business, and it is possible there may be unidentified losses in the loan portfolio at December 31, 2003 that may become apparent at a later date pursuant to internal analysis or pursuant to comment following regulatory examination. The establishment of loan loss reserves for problem credits that are currently unidentified or unanticipated would negatively impact future earnings. A charge, if any is needed, would generally be recorded in the segment in which the loan is recorded.

#### Venture Capital Investments

Venture capital investments are accounted for at fair value with gains and losses included in noninterest income in the Consolidated Statements of Operations.

At December 31, 2003, the Company valued its venture capital portfolio at \$43.4 million. This valuation was arrived at using a variety of factors including, but not limited to: market prices, where available, and discounted, if necessary, to reflect trading history, lock-up provisions, lack of market liquidity and other factors; cost, if there is no readily determinable market price and there has not been a material event, such as a follow-on round of financing or strategic sale; a value higher than cost if indicated by additional financing which fulfills certain requirements; and analysis and commentary from a fund's Investment Manager/ General Partner. The largest investment in the venture capital portfolio is valued at \$3.7 million at December 31, 2003.

Since the Company has no present intention to sell or liquidate the venture capital portfolio, the valuation of venture capital investments is subject to uncertainty in that it does not represent a negotiated value between the Company, as seller, and an independent, willing buyer that has the necessary knowledge and financial ability to complete the purchase. Additionally, if the Company attempted to sell its venture capital portfolio, particularly if it deemed it necessary to liquidate the investments within a short period of time, the actual proceeds from the sale could differ significantly from the recorded carrying value. The market for the type of venture capital investments Riggs holds has since 2000 been impacted by a slowing economy, a depressed domestic equity market in which, notwithstanding the recent recovery of stock prices, the values of publicly traded companies have declined, and, because of these market conditions, there has been a decline in the number of initial public offerings and acquisitions of private companies by publicly traded firms. The gradual improvement in these sectors has begun to afford the Company better liquidation opportunities and it continues to actively manage the portfolio to maximize current valuations. Although these and other factors have been assessed in determining current values, because of the subjectivity in determining values, it is possible that the Company would experience a loss if it chose to liquidate its venture capital portfolio, particularly if it attempted to do so quickly. The loss, if any, would be recorded in the Riggs Capital Partners segment.

#### Deferred Taxes

The Company records a provision for income taxes based upon the amount of current taxes payable (or refundable) and the change in net deferred tax assets or liabilities during the year. Deferred tax assets and liabilities are recognized for the tax effects of differing carrying values of assets and liabilities for tax and financial statement reporting purposes that will reverse in future periods. When substantial uncertainty exists concerning the recoverability of a deferred tax asset, the

carrying value of the asset is reduced by a valuation allowance. Establishing a valuation allowance results in an increase in income tax expense.

Unrealized losses in venture capital operations have resulted in the maintenance of \$12.9 million of deferred tax assets as of December 31, 2003. Of this amount, \$1.5 million was established in 2003. These assets can be utilized to reduce taxes payable on future capital gains but must be utilized within five years of the year in which the loss is realized for tax return purposes. Because of continuing losses in the venture capital portfolio and the lack of current suitability of alternatives to generate capital gains, Riggs has established a valuation allowance of \$6.9 million against the deferred tax asset at December 31, 2003. Of the \$6.9 million, \$1.5 million was established in 2003. The Company believes that the unreserved deferred tax asset balance of \$6.0 million at December 31, 2003, which includes a deferred tax asset related to realized losses of \$3.3 million, will be realized through generation of future net capital gains within its venture capital operations or the implementation of alternative business strategies that generate net capital gains. Management has identified several alternative business strategies that could produce sufficient capital gains to allow the deferred tax asset balance to be realized.

If sufficient net capital gains within the Company's venture capital operations are not realized in a timely manner, or if business conditions or other factors make it impossible, impractical or imprudent to implement alternative strategies, an additional valuation allowance, resulting in a charge against income for that portion of the deferred tax asset which will not be utilized, will be recorded in the Other segment.

Uncertainty related to the utilization of deferred tax amounts generated by foreign subsidiaries resulted in the maintenance of a 100% valuation allowance of \$7.6 million and \$6.4 million as of December 31, 2003 and 2002, respectively.

#### Impairment of Long-Lived Assets

The Company tests for impairment in the carrying value of any asset or group of assets whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Intangible assets, which were \$5.9 million at December 31, 2003, are reviewed for impairment on at least an annual basis.

In 1999, the Company contracted to develop, implement and maintain a computer system to be utilized by the United States Department of the Treasury ( Treasury ) in its cash management and reporting. Because of cost overruns and significant uncertainties relating to costs required to complete the system, the willingness of the Treasury to fund these additional costs and the recurring revenues to be realized upon implementation of the system, the Company recorded impairment charges of \$8.4 million and \$1.0 million in 2001 and 2002, respectively. There was no impairment charge in 2003 related to this asset. This system became operational in September 2003 and, subsequent to December 31, 2003, Riggs and the government have substantially concluded negotiations that significantly reduce the uncertainties regarding recovery of costs incurred on the contract. Accordingly, beginning in the first quarter of 2004 the Company will no longer report this matter as a component of its Critical Accounting Policies and Estimates.

## RESULTS OF OPERATIONS

### Net Interest Income

Net interest income is the Company's largest revenue source representing 61%, 67% and 69% of all revenues in 2003, 2002 and 2001, respectively. Revenues of the Company include net interest income and noninterest income.

Net interest income is affected by changes in the level of interest rates and the composition of interest-earning assets and interest-bearing liabilities. While the Company can exert some effect on its net interest income through its product pricing and promotional decisions, many factors, such as the overall condition of the economy, monetary policy, tax laws, credit demand and competition impact net interest income and are beyond the control of the Company (see Tables A and B of this Form 10-K).

Net interest income decreased \$21.2 million, or 11%, in 2003 compared to 2002 and in 2002 increased \$1.7 million, or less than 1%, from 2001. In general, across almost all components of interest income, decreases in rates more than offset increases in interest income due to increases in volume. As a result, interest income decreased \$22.9 million, from \$259.5 million in 2002 to \$236.6 million in 2003. A similar analysis applies to the comparison of 2001 to 2002, when interest income decreased \$42.4 million from \$302.0 million in 2001 to \$259.5 million in 2002. The decline in net interest income in 2003 from the prior year is due primarily to the rapid repayment of existing loans, particularly mortgage loans,

stimulated by low interest rates. The Company estimates that approximately 46% of its mortgage loan balances at December 31, 2002 were paid-off during 2003 and an additional 20% of these balances were refinanced into lower rates. While Riggs participated aggressively in the competitive refinancing market, the loans it recorded were at lower rates than those previously on its books. In addition, many of the older loans had net deferred acquisition costs and purchase premiums which were charged against income at payoff.

Net interest income was also adversely impacted by a mid-year change in the methodology by which the Treasury compensates financial agent banks. Prior to July 14, 2003, Riggs was compensated by net interest earned on Treasury deposits, which was reflected in net interest income. Beginning on this date, Riggs utilizes non-interest earning Treasury deposits to purchase a non-marketable, Treasury-issued depository compensation security (DCS) for the same amount as the Treasury deposits. The DCS and deposit balances are netted in the Statements of Financial Condition in accordance with FIN 39 (Offsetting of Amounts Related to Certain Contracts) and income earned on the DCS, which was \$3.3 million in 2003, is reflected in the Statements of Operations as non-interest income, rather than a component of net interest income. The average deposit balance that the Treasury maintained at Riggs to compensate it as a financial agent bank was \$472.0 million, \$895.1 million and \$233.1 million in 2003, 2002 and 2001, respectively.

Beginning October 1, 2003, due to the adoption of FIN 46R, the Company does not consolidate the two trusts that previously issued \$350.0 million of trust preferred securities, of which \$107.9 million have been repurchased by the Company. As a result, the debt from the Company to these trusts no longer eliminates in consolidation and, consequently, the interest on this debt, which was \$5.4 million for the fourth quarter of 2003, negatively impacts net interest income in 2003, but not prior years.

Net interest margin was 3.09% in 2003 compared to 3.59% and 3.91% in 2002 and 2001, respectively. As noted in Table B, the net interest margin decreases in both 2003 compared to 2002 and 2002 compared to 2001 are attributable to decreases in interest rates which were partially offset by volume increases.

As reported in the 2002 Annual Report on Form 10-K, the Company completed a leveraging program whereby it borrowed funds from the Federal Home Loan Bank of Atlanta ( FHLB ) and utilized those funds to purchase mortgage-backed securities. Riggs had \$419.0 million and \$292.0 million of borrowings from the FHLB at December 31, 2003 and 2002, respectively. These borrowings generally are not repayable prior to maturity and, hence, as the mortgages in the mortgage-backed securities paid off or refinanced into a lower rate it was not possible for Riggs to concurrently lower its funding costs, thereby negatively impacting net interest income. The leveraging program was expanded during 2003 and the average assets in this program were approximately \$545.1 million. The Company anticipated earning a minimum interest rate spread of 1.75% on these leveraged assets but, because of rapid repayments, estimates its actual spread was approximately 1.38%. The Company anticipates that interest rates will not decline further and will begin to rise in 2004. As a result, the Company expects reduced loan pay-offs and refinancings in 2004 and anticipates improvement in its net interest margin.

Interest income on a tax equivalent basis in 2003 was \$241.4 million, a decline of \$22.1 million, or 8%, from \$263.5 million in 2002. On a tax equivalent basis, interest income decreased \$41.2 million from 2001 to 2002. As indicated in Table A of this Form 10-K, average earning assets have increased from \$4.96 billion in 2001 to \$5.70 billion in 2003. The rates earned on these assets decreased from 6.14% in 2001 to 4.81% in 2002 and 4.23% in 2003.

Average loan balances increased by \$157.7 million in 2003 compared to 2002 and decreased by \$34.6 million in 2002 compared to 2001. In 2002 Riggs realigned its RBEL operations to focus on expatriate and embassy banking rather than on corporate lending and, consequently, sold \$138.3 million in loans and loan commitments. The next largest average earning asset category, securities available for sale, increased \$167.8 million or 9% from 2002 to 2003 and \$596.0 million in 2002 compared to 2001. As with loan yields discussed above, rates earned on available for sale securities declined from 5.27% in 2001 to 3.74% in 2002 and further decreased to 3.26% in 2003. Because of attractive tax equivalent rates, Riggs acquired state and municipal securities in 2003. Riggs had an average balance of \$947 thousand of these securities in 2003 which are classified as securities available for sale and yield 4.52% on a tax equivalent basis.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

The composition of average earning assets for the past three years is as follows:

	2003	2002	2001
Loans	52.9%	52.2%	58.3%
Securities Available for Sale	36.2	34.6	26.3
Securities Held to Maturity	0.5		
Time Deposits with Other Banks	4.4	3.9	6.7
Federal Funds Sold and Reverse Repurchase Agreements	6.0	9.3	8.7
	100.0%	100.0%	100.0%

Interest expense decreased by \$1.7 million from 2002 to 2003. Decreases in interest expense allocated to decreases in rates occurred across all components of interest expense. These decreases, along with decreases in the volume of time deposits in domestic offices, were almost entirely offset by increases in interest expense due to a higher volume of long-term debt. The average cost of all interest-bearing funds decreased to 1.40% in 2002 from 2.65% in 2001 and further decreased to 1.28% in 2003. This result contrasts with the comparison between 2001 and 2002, when the \$52.8 million decrease in interest expense attributable to decreases in rates were far greater than the \$8.7 million increase in interest expense attributable to increases in volume.

The composition of average interest-bearing liabilities for the past three years is as follow:

	2003	2002	2001
Interest-Bearing Deposits	78.9%	89.0%	86.6%
Federal Funds Purchased and Repurchase Agreements	8.6	9.2	11.5
Other Short-Term Borrowings	0.1	0.3	0.3
Long-Term Debt	12.4	1.5	1.6
	100.0%	100.0%	100.0%

### Provision for Loan Losses

The provision for loan losses in 2003 was \$5.1 million compared to \$421 thousand in 2002 and \$2.5 million in 2001. Nonaccrual and renegotiated loans were \$2.3 million, \$548 thousand and \$1.9 million at December 31, 2003, 2002 and 2001, respectively. This represents 0.07%, 0.02% and 0.07% of all loans at December 31, 2003, 2002 and 2001, respectively. See Table J.

### Noninterest Income

Noninterest income represented 39% of the Company's 2003 revenue and was 33% and 31% of the Company's total revenue in 2002 and 2001, respectively.

Excluding net securities gains, noninterest income increased by \$13.0 million, or 15% in 2003 from 2002. Including net securities gains, noninterest income increased by \$16.9 million, or 18% from the prior year. The increase in noninterest income in 2003 was primarily attributable to a \$10.6 million reduction in venture capital losses from 2002. Similarly, venture capital losses decreased to \$14.8 million in 2002 from \$31.1 million in 2001. Also contributing to the increase in noninterest income was a \$4.1 million increase in service charges and fee income in 2003 compared to 2002. This increase was primarily the result of new fee initiatives initiated as part of Project EPS. Partially offsetting these improvements was a \$5.2 million, or 12% decrease in trust and investment advisory income. Trust and investment advisory income was adversely impacted by the second quarter 2002 renegotiation of a 10-year agreement with the real estate advisor to the Multi-Employer Property Trust (MEPT), an open commingled real estate fund. This advisor will now perform all asset management services for the fund but Riggs will continue to act as trustee, investment manager and custodian, and will provide portfolio-level financial and valuation reporting. The new agreement, which became effective July 15, 2002, resulted in a reduction in revenue of approximately \$3.5 million from 2002. Noninterest income in 2003 also includes \$2.2 million of life insurance proceeds and a \$1.2 million gain on the sale of the Riggs mutual

funds.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Securities gains were \$13.3 million and \$9.5 million in 2003 and 2002, respectively. Substantially all of the 2001 securities gains were attributable to the sale of Concord EFS, Inc., a company in which Riggs had an equity investment for many years.

Trust and investment advisory income impacts the Riggs & Co. segment while venture capital losses impact the Riggs Capital Partners segment. Securities gains impact the Treasury segment. Service charges and fee income primarily impacts the Banking segment.

### Noninterest Expense

Noninterest expense increased by \$20.4 million, or 8%, to \$260.8 million in 2003 compared to \$240.4 million in 2002. In 2003, noninterest expenses were adversely impacted by \$11.4 million of consulting and other costs incurred in conjunction with Project EPS, \$3.9 million of consulting costs incurred to improve the Bank's compliance with BSA, a \$3.8 million write-down of a building the Company is attempting to sell and a \$950 thousand write-down of goodwill.

In 2003 and 2002, respectively, the Company approved for award 210,407 and 161,909 shares to certain key executives under a deferred Stock Award Agreement subject to performance and time vesting. Based on achieved 2003 and 2002 performance targets, 76,466 shares were awarded at December 31, 2003 and none at December 31, 2002. The 76,466 deferred shares earned at December 31, 2003 will vest in three equal annual installments, beginning in January of 2004. A total of \$325 thousand in stock compensation expense was recorded at December 31, 2003 and is included in pension and other employee benefits in the Consolidated Statements of Operations. Future expense amounts could vary since the individual to whom the award was granted must be employed by the Company on the distribution date each year and new participants could be added.

In 2002 Riggs increased its matching of employee 401(k) Plan contributions from \$0.50 for every dollar contributed (up to 6% of eligible wages) to a dollar-for-dollar match (up to 6% of eligible wages). This change in matching resulted in an increase in pension and other employee benefits expense of \$2.1 million in 2002 compared to 2001. Pension and other employee benefits costs affect all segments with the exception of Riggs Capital Partners.

In 2003 and 2002, respectively, the Company awarded 73,000 and 370,000 shares of its common stock to certain key executives under the terms of a plan approved by shareholders in April 2002. This award will vest annually in equal amounts over a period of four to five years, beginning in January 2003 and January 2004. For the years ended 2003 and 2002, respectively, Riggs recorded \$1.2 million and \$646 thousand of expense related to this award which is recorded in pension and other employee benefits in the Consolidated Statements of Operations. New participants may be added and, in addition, to obtain this award, the individual to whom it was granted must be employed by the Company on the date of distribution each year. Projected expense amounts, therefore, could vary.

The Company recorded impairment charges amounting to approximately \$4.8 million in 2003 and \$4.5 million in 2002. The 2003 impairment charge includes a \$950 thousand write-down of goodwill and also includes a \$3.8 million write-down of a facility in London that the Company is attempting the sell. This facility was written down by \$1.3 million in 2002. The amount of these facility write-downs was determined based upon consultation with real estate experts. In 2002, as part of Project EPS, Riggs also wrote off \$1.1 million in costs related to prior development of an information system to support bank tellers when it was determined that this development would not be compatible with the Company's new technology. In London, the Company incurred a charge of \$1.1 million to exit long-term maintenance contracts in 2002 and domestically, it wrote down a long-term, fixed price, non-cancelable technology contract by \$1.0 million due to cost overruns that will not be passed on to subcontractors or other parties to the contract.

Noninterest expense increased by \$42.0 million, or 19% to \$266.3 million in 2001 compared to \$224.4 million in 2000. Approximately \$34.1 million of this increase, or 81%, is attributable to the restructuring and other charges described in Note 2 of Notes to Consolidated Financial Statements. Other significant changes from the prior year include an additional \$5.3 million or 6% increase in salaries and wages, a \$1.9 million increase in pension and other employee benefits that is primarily attributable to a \$2.4 million increase in the actuarially determined domestic pension plan expense and a \$2.1 million increase in consultants and outsourcing fees, which is primarily due to increased management fees related to an additional venture capital partnership. Decreases in advertising and public relations expense of \$1.2 million partially offset these increases.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

In 2003, the Company reduced its workforce by 5%, from 1,522 full-time equivalent positions at December 31, 2002 to 1,450 at December 31, 2003.

### FINANCIAL POSITION AND LIQUIDITY

#### Summary

Total assets declined from \$6.83 billion at December 31, 2002 to \$6.37 billion at December 31, 2003, a decrease of \$456.1 million. The decrease was primarily attributable to decreases in cash and cash equivalents of \$528.7 million and securities available for sale of \$493.1 million, offset in part by an increase in net loans of \$214.9 million, increases in other assets of \$141.9 million, the establishment of a securities held to maturity portfolio of \$107.9 million and an increase in time deposits with other banks of \$83.8 million.

#### Earning Assets

Loans, securities available for sale, securities held to maturity and other short-term investments are the Company's primary earning assets. At December 31, 2003, 2002 and 2001 these assets represented approximately 86%, 90% and 90%, respectively, of the Company's total assets and 90% of the Company's average assets for each of those years.

Loans represent the largest earning asset category. At December 31, 2003, 2002 and 2001 loans were 59%, 49% and 52% of earning assets and 53%, 52% and 58% of average earning assets for those years, respectively. The primary reason for the decrease in 2002 compared with 2001 was the sale of \$138.3 million of loans and loan commitments by RBEL as well as growth in the securities portfolio to secure the additional U.S. Government Agency deposits.

Securities available for sale, the next largest component of earning assets, were 34%, 38% and 31% of earning assets at December 31, 2003, 2002 and 2001, respectively, and represented 36%, 35% and 26% of average earning assets for those years.

The third component of the Company's earning asset mix, short-term investments, was 5%, 13% and 17% of earning assets at December 31, 2003, 2002 and 2001, respectively, and represented 10%, 13% and 16% of average earning assets for the those years.

Securities held to maturity represent 2% of the Company's earning assets at December 31, 2003 and an insignificant portion of average earning assets in 2003. The Company did not have securities held to maturity in 2002 or 2001.

#### Loans

Loans are primarily generated in the Banking segment through both retail and commercial banking activities and in the International Banking segment through embassy banking and RBEL (see Tables C and D of this Form 10-K).

Total loans at December 31, 2003 were \$3.23 billion, a \$217.2 million or 7% increase from December 31, 2002. The largest increases were in commercial real estate loans, which increased \$255.6 million or 46%, home equity loans, which increased \$26.9 million or 10%, loans to foreign governments and official institutions, which increased \$14.9 million or 14%, and loans to foreign commercial and industrial customers, which increased by \$33.1 million or 30%. Offsetting these increases were decreases in: commercial and financial loans of \$32.6 million or 5%; residential mortgage loans of \$70.1 million or 6%; and other foreign loans of \$8.3 million or 20%.

Total loans at December 31, 2002 were \$3.01 billion, a \$139.3 million, or 5% increase from December 31, 2001. The largest increase occurred in commercial and financial and commercial real estate loans which increased \$134.5 million and \$65.2 million or 28% and 13%, respectively. Partially offsetting these increases was a \$156.6 million decrease (38%) in total foreign loans primarily attributable to the previously noted sale of loans and commitments at RBEL.

At December 31, 2003, approximately 25% of the loan portfolio matures in less than one year. This compares to 27% at the end of the prior year. At December 31, 2003, approximately 35% of the loan portfolio has fixed interest rates that do not adjust during the term of the loan and 65% has floating or adjustable interest rates that adjust prior to the loan's maturity.

#### Cross-Border Outstandings

Riggs extends credit to borrowers domiciled outside of the United States primarily through its International Banking segment. Cross-border outstandings include loans, acceptances, interest-bearing deposits with other banks, investments and other monetary assets. In addition,

cross-border outstandings include guarantees issued on behalf of non-local third parties

and local currency outstandings to the extent they are not funded by local currency borrowings. While the Company routinely reviews these assets, monitors the international economic climate and assesses the impact of any changes on foreign domiciled borrowers, the economic value and recoverability of these assets may be affected by changing economic and political conditions in the respective countries. In addition, some of the Company's loans are to sovereign entities, some of which might be subject to deteriorating economic conditions, political and social upheaval, currency depreciation or devaluation, or other factors over which Riggs has no control. If, for any reason, a loan to such a borrower became past due or a problem credit, collection efforts would be made more difficult because of the sovereign status of the borrower. Several sovereign entities also maintain significant depository relationships with the Company. The simultaneous withdrawal of funds by several of these depositors could adversely impact the Company's liquidity position.

At December 31, 2003, Riggs had no cross-border outstandings exceeding 1% of total assets to countries experiencing difficulties in repaying their external debt. At December 31, 2003 and at December 31, 2001, the United Kingdom was the only foreign country with cross-border outstandings in excess of 1% of total assets that had loans in either a nonperforming or past-due loan status. There were no foreign countries with cross-border outstandings in excess of 1% that had loans in a nonperforming or past-due loan status at December 31, 2002 (see Tables E and F of this Form 10-K and Note 15 of Notes to Consolidated Financial Statements).

### Short-Term Investments

Short-term investments are managed in the Treasury segment and include time deposits with other banks, federal funds sold and reverse repurchase agreements. These investments are liquid assets with original maturities generally of less than 90 days. Short-term investments are generally lower-yielding assets that are highly interest-rate sensitive. The amount of funds available for short-term investments is a function of daily movements in the securities, loan and deposit portfolios combined with the Company's interest-rate risk management strategy.

At December 31, 2003, short-term investments totaled \$287.1 million, a decrease of \$526.2 million from December 31, 2002. At December 31, 2002, short-term investments totaled \$813.3 million, a decrease of \$105.2 million when compared to year-end 2001. Average short-term investments was \$594.1 million, \$722.6 million and \$764.1 million for 2003, 2002 and 2001, respectively. The average yield on short-term investments was 1.60% in 2003, 1.63% in 2002 and 3.74% in 2001.

### Securities Available for Sale and Securities Held to Maturity

At December 31, 2003, the Company had \$1.83 billion of securities classified as available for sale (94% of all securities) and \$107.9 million of securities classified as held to maturity (6% of all securities). At December 31, 2002, the Company had \$2.32 billion of securities classified as available for sale and no securities held to maturity.

The securities available for sale portfolio is managed by the Treasury segment as part of the Company's liquidity and interest-rate risk management process. Securities available for sale are reflected in the Consolidated Statements of Condition at fair value. Differences between amortized cost and fair value are reported net of applicable taxes as a component of other comprehensive income or loss within shareholders equity. On a tax equivalent basis the securities available for sale portfolio yielded 3.26%, 3.74% and 5.27% in 2003, 2002 and 2001, respectively.

The percentage composition at fair value of the securities available for sale portfolio at December 31 is as follows:

	2003	2002	2001
U.S. Treasury Securities	1.4%	0.2%	6.1%
State and Municipal Securities	1.4		
Government Agency Securities	39.3	54.9	55.4
Mortgage-Backed Securities	55.1	42.5	35.6
Other Securities	2.8	2.4	2.9
	100.0%	100.0%	100.0%

Gross unrealized gains and losses at December 31, 2003 were \$2.3 million and \$10.2 million, respectively.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Approximately 98.6% of the available for sale securities have been issued by the U.S. Treasury, an agency of the U.S. Government or a government sponsored entity (such as the Federal National Mortgage Association or the Federal Home

Loan Mortgage Corporation) and therefore the repayment of substantially all securities is either guaranteed by the government or a AAA rated entity. As a result, timely payment of principal and interest is assured and any unrealized gain or loss is primarily attributable to changes in market interest rates. All of the Company's state and municipal securities are insured by an independent, non-government third party as to repayment of principal and interest.

At December 31, 2003, 2002 and 2001, 10%, 21% and 43% of the available for sale portfolio matures within one year and the portfolio duration is 2.3, 1.0, and 1.8 years, respectively. Although most of the securities have contractual maturity dates that are greater than one year, many have call features which allow the issuer to call the securities away from the Bank. Anticipated calls of securities and estimated mortgage prepayments on mortgage-backed securities have been factored into the overall portfolio duration calculation (see Note 3 of Notes to Consolidated Financial Statements).

See **Minority Interest in Trust Preferred Securities** for a discussion of securities held to maturity on page 32.

### **Venture Capital Investments**

Venture capital investments amounted to \$43.4 million at December 31, 2003 and \$49.4 million at the close of the prior year. The Company recorded a loss of \$4.2 million on its venture capital investments in 2003 that is primarily attributable to unrealized losses in the fair value of its venture capital investments. In 2002, the Company recorded a \$14.8 million loss, substantially unrealized, on these investments (see Note 1 of Notes to Consolidated Financial Statements).

The losses in 2003 and 2002 are attributable to several factors. First, there has been a general slowing of the domestic economy that was exacerbated by the terrorist attacks in September 2001 and continued uncertainty about potential military conflict. This slowing resulted in large corporations reducing their spending on information technology assets which in turn affected the financial performance and valuations of information technology vendors to which the Company's venture capital portfolio was exposed. While the technology sector of the stock market experienced a rebound in 2003, it remains at depressed levels relative to prior years. Second, the domestic stock market in general declined in 2002 and 2001 and, in particular, the valuations of publicly-traded technology companies declined dramatically. As a result, the Company reduced the carrying value of a number of privately-held investments in order to better align its valuations with those of comparable publicly-traded companies. Third, initial public offerings (IPOs) and acquisitions by public companies of private companies has declined significantly from prior years. Since venture capital investors typically look to the IPO process and acquisitions as a means of liquidating investments, the lack of such markets was detrimental to the value of investments held.

As previously noted, at December 31, 2003 the Company maintained a \$6.9 million valuation allowance against total deferred tax assets of \$12.9 million relating to venture capital losses. The Company has concluded that it is more likely than not that the remaining deferred tax assets which are attributable to losses from venture capital operations will be realized through capital gains generated by its venture capital operations or through such gains generated elsewhere within the Company.

### **Commitments and Liquidity**

At December 31, 2003, the Company had approximately \$1.33 billion of loan commitments outstanding and was contingently liable for \$106.4 million of letters of credit. The Company also is obligated to fund \$9.5 million of venture capital commitments and has various other contractual obligations arising in the normal course of business, including approximately \$243.8 million of contractual obligations payable in 2004. See Table O and Note 9 of Notes to Consolidated Financial Statements.

At December 31, 2003, the Company believes it has the necessary liquidity to meet these obligations. As noted previously, the Company had \$287.1 million of short-term investments and has approximately \$567.8 million of unused credit lines at December 31, 2003. The securities available for sale portfolio has a relatively short duration of 2.3 years which can, with the exception of the state and municipal securities, be pledged to secure borrowings. The Company has \$982.4 million of loans and securities available for sale maturing in 2004. In addition, despite the fact that average interest-bearing deposits declined by \$228.0 million from 2002 to 2003, substantially all of this decline is due to a \$424.5 million decline in average time deposits in domestic offices from 2002 to 2003. The decrease in average time deposits in domestic offices from 2002 to 2003 is almost entirely attributable to the change in the previously described change in the methodology by which the Treasury compensates financial agent banks. As a result of this change, average Treasury time deposits utilized to compensate Riggs as a financial agent bank were \$423.0 million less in 2003 than 2002. Average non-interest bearing

deposits were \$571.1 million in 2003 and \$509.5 million in 2002. Because of these factors, the Company believes that its deposit base comprises a stable source of funding.

In late February 2004 the Bank informed a large depositor that it was terminating its depository relationship with the customer. At the end of February 2004 this depositor and related parties had approximately \$360.0 million of deposits at the Bank, or approximately 8% of the Bank's total deposits. The Bank has adequate liquidity to fund this withdrawal.

Changes in the stability of the economic, social or political environments culminating in further withdrawals by several of the Bank's largest depositors, or a deterioration of the public's confidence in the banking system in general or the Company in particular, could be very detrimental. The further withdrawal of funds by a combination of large depositors could have an adverse impact on the Company's liquidity and operations as would the withdrawal of funds by a significant portion of the Company's smaller balance depositors. In addition, the FHLB has the authority to cancel the Company's unused lines of credit.

Another potential constraint on liquidity is the regulatory limitations on dividends that the Bank can pay to RNC. Generally, such dividends are limited to the earnings of the Bank for the current and prior two years less any dividend payments during the same period. However, dividends payable by the Bank and its subsidiaries are further limited by requirements for the maintenance of adequate capital and the underlying strength of the Bank. Any restrictions on dividends that the Bank can pay to RNC could adversely impact the holding company's cash flow and its ability to fund future debt payments and dividends. Since regulatory authorities maintain that a holding company should be a source of financial strength for its subsidiary bank, dividends paid by the Bank to the Company, or by the Company to its shareholders, may be restricted if the regulators conclude that the Company's operating condition so warrants.

## **ASSET QUALITY**

### **Credit Risk Administration**

Since the loan portfolio is the Company's largest component of earning assets, one of the Company's primary objectives is to maintain a high quality loan portfolio. This is achieved through promulgation of and adherence to loan underwriting standards and regular evaluation of credit risk within the portfolio. The potential for loss is, however, inherent to the lending process. Riggs attempts to minimize this risk by stressing the integrity, financial strength and liquidity of borrowers and, if integral to the granting of credit, the stability of supporting collateral values. The credit administration function establishes credit policies including those related to credit underwriting, limits on the ability of an individual loan officer or group of loan officers to extend credit, policies addressing concentrations of credit risk and internal credit scoring. The credit administration function reports to a chief credit officer who works with the various business units to ensure the integrity of established procedures and policies. In addition, the Company maintains a loan review group that monitors compliance with these policies and thereby further ensures the integrity of the credit process (see Notes 1 and 4 of Notes to Consolidated Financial Statements).

### **Provision and Reserve for Loan Losses**

The adequacy of the reserve for loan losses is determined based on an analysis of the composition of the loan portfolio, the level and trend of loan delinquencies, the financial condition of specific delinquent or problem borrowers and related guarantors, historical charge-off rates, general economic and industry-specific conditions and all other factors deemed relevant, including supervisory comment during the examination process. Based upon this analysis, which is performed quarterly and reviewed by a standing management committee, a provision for loan losses is recorded to maintain the reserve for loan losses at a level adequate to absorb probable losses in the portfolio.

For loan pools with homogeneous characteristics, such as residential mortgage, home equity and consumer loans, provisions are determined using historical loss factors. For non-homogeneous loans, the Company allocates specific reserves for loan losses to individual loans in the highest risk categories and provides for the remainder using historical factors. In addition, the Company maintains a qualitative component in its reserve for loan losses. This portion of the reserve is adjusted when the Company concludes that recent charge-off experience may not be indicative of future experience, either adverse general economic or industry-specific conditions are not manifested as specific problem credits or in delinquency ratios, or the Company knows of specific potentially adverse events or conditions of a borrower. The Company maintains its reserve for loan losses in accordance with a Board of Directors approved policy.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Based upon the above, the Company recorded a loan loss provision of \$5.1 million in 2003. At December 31, 2003, the reserve for loan losses was \$28.3 million, or approximately 0.88% of loans and 195% of the Company's nonaccrual, renegotiated, and 90 days past due credits. Foreign nonperforming assets represent approximately 33% of consolidated nonperforming assets (including 90 days past due credits).

The Company recorded a loan loss provision of \$421 thousand in 2002. At December 31, 2002, the reserve for loan losses was \$26.0 million, or approximately .86% of loans and 224% of the Company's nonaccrual, renegotiated and 90 days past due credits. The foreign loan loss provision in 2002 was approximately \$(4.2) million and the domestic provision was \$4.6 million. The foreign reversal was taken as those reserves were no longer necessary since foreign nonperforming assets decreased by \$2.0 million, or 77%, from the prior year end, aggregate loan balances decreased due to significant pay-downs and maturities and the Company sold \$138.3 million in commercial loans and commitments from its London operations.

Riggs recorded a loan loss provision of \$2.5 million in 2001. This provision was comprised of a \$5.9 million foreign provision and a \$(3.4) million domestic provision. The domestic provision was the result of a reduction in domestic nonperforming loans from \$34.3 million at December 31, 2000 to \$472 thousand a year later.

During the three years ended December 31, 2003, the reserve for loan losses as a percentage of loans has decreased from 1.23% to .88%. During this same period, nonaccrual, renegotiated and 90 days past due credits decreased from \$47.2 million to \$14.5 million. In addition, 45% of the Company's portfolio is secured by residential real estate at December 31, 2003. Traditionally, net losses on such loans have been minimal (see Table H of this Form 10-K).

Foreign exchange translation adjustments in the reserve for loan losses were \$251 thousand and \$717 thousand in 2003 and 2002, respectively. These adjustments relate to reserves recorded in British pounds sterling, and are made to account for changes in our reserve for loan losses resulting from fluctuating foreign exchange rates.

The estimated allocation of the reserve for loan losses by loan category is detailed in Table I of this Form 10-K and represents the Company's assessment of existing conditions and risk factors within these categories. Changes in the risk characteristic and loan amounts within the loan portfolio affect the overall level of required reserves.

### **Nonperforming Assets and Past Due Loans**

Nonperforming assets include nonaccrual loans, renegotiated loans, other real estate owned and other repossessed assets. Nonaccrual loans are loans for which recognition of interest income has been discontinued. Impaired loans are nonaccrual loans for which it is probable that all amounts due will not be collected according to the contractual terms of the loan agreement (see Tables J and K of this Form 10-K).

Riggs evaluates each past due commercial loan (commercial and financial loans and commercial real estate loans) and discontinues the accrual of interest based on the delinquency status, an evaluation of any collateral and the financial condition of the borrower. If there is doubt as to the collection of either principal or interest, or when interest or principal is 90 days past due and the commercial loan is not well-secured and in the process of collection, it is placed into nonaccrual status. A nonaccrual loan may be restored to accrual status when interest and principal payments are brought current and the collection of future payments is not in doubt. Nonaccrual loans totaled \$2.3 million at December 31, 2003, an increase of \$1.8 million from December 31, 2002.

Income recognition on non-commercial loans is discontinued and the loans are generally charged off or loan foreclosure proceedings begun upon becoming 120 days delinquent or at such time as permitted by law or other regulations. At this point, any uncollected interest is eliminated from income.

Renegotiated loans are those loans where there has been an extension of the original repayment period or a reduction of the obligation to pay principal or interest because of a deterioration in the borrower's financial position. There were no renegotiated loans at December 31, 2003 or 2002.

Loans are transferred into other real estate owned and other repossessed assets owned when collateral securing the loans is acquired through foreclosure. Other real estate and other repossessed assets owned totaled \$40 thousand on December 31, 2003 compared to \$122 thousand on December 31, 2002.

The 90 days past due loan category amounted to \$12.2 million and \$11.0 million at December 31, 2003 and 2002, respectively. The balances are primarily attributable to secured residential real estate loans that are in the process of collection and are accruing interest.

At December 31, 2003, the Company identified \$814 thousand of potential problem loans compared to \$5.3 million of such loans at December 31, 2002. The current year balance consists of six mortgage credits. Potential problem loans are defined as loans that are currently performing but which have certain attributes that may lead to nonaccrual or past due status in the foreseeable future.

Foreign loans and other credits may be adversely affected by social, economic and political instabilities, including military confrontations. The Company cannot estimate the losses, if any, associated with any such instabilities (see Note 15 of Notes to Consolidated Financial Statements).

## DEPOSITS AND FUNDING SOURCES

Deposits, short-term borrowings, FHLB and long-term debt and, until October 1, 2003, trust preferred securities were the Company's principal funding sources. For 2003, these funding sources averaged \$5.84 billion, an increase of \$268.9 million from the \$5.57 billion for 2002. In 2001, these funding sources averaged \$5.04 billion. Beginning on October 1, 2003, trust preferred securities are no longer a funding source for the Company but, rather, because of the Company's previously discussed adoption of FIN 46R, the debt the Company has to the two trusts that issued the trust preferred securities is considered a funding source.

### Deposits

Deposit balances are the primary funding source of the Company. The average deposit balance for 2003 was \$4.58 billion which compares to average deposit balances of \$4.75 billion in 2002 and \$4.13 billion in 2001. Average interest bearing deposits were \$4.01 billion, \$4.24 billion and \$3.62 billion in 2003, 2002 and 2001, respectively. Average deposit balances and average interest bearing deposit balances were significantly impacted by the amount of deposits maintained at Riggs by the Treasury to compensate the Company as a financial agent bank and the previously discussed change in methodology by which Riggs as a financial agent bank is compensated by the Treasury. As previously noted, the average Treasury deposit balances to compensate Riggs as a financial agent bank were \$472.0 million, \$895.1 million and \$233.1 million in 2003, 2002 and 2001, respectively.

Average demand deposits were \$571.1 million, \$509.5 million and \$509.6 million in 2003, 2002 and 2001. As a means of reducing deposit reserve requirements, the Company periodically sweeps excess demand funds into money market accounts. The average balances transferred, which are not included in demand deposits in Table A of this Form 10-K, were \$480.8 million in 2003 compared to \$468.4 million and \$440.2 million in 2002 and 2001, respectively.

The average cost of interest-bearing deposits was .85%, 1.25% and 2.40% in 2003, 2002 and 2001, respectively. The change in the cost of these funds is primarily attributable to actions of the Federal Reserve. From December 31, 2000 to year-end 2003, the Federal Reserve lowered its target federal funds rate by 550 bps, from 6.50% to 1.00%.

### Short-Term Borrowings

Short-term borrowings consist primarily of federal funds purchased and repurchase agreements and, to a lesser extent, short-term FHLB borrowings. These obligations are an additional source of funds used to meet liquidity and interest-rate risk management objectives. On average, short-term borrowings were \$442.2 million, \$451.1 million and \$493.3 million for 2003, 2002 and 2001, respectively. The cost of these funds was 1.10%, 1.54% and 3.53% for 2003, 2002 and 2001, respectively (see Note 8 of Notes to Consolidated Financial Statements). Riggs has secured and unsecured lines of credit with various parties in the amount of \$1.05 billion that can be drawn upon to meet potential funding requirements. \$567.8 million of these facilities are unused as of December 31, 2003. The FHLB can cancel at any time any unused portion of the credit facilities. Any borrowings under these facilities are subject to the negotiated terms.

### FHLB Borrowings and Other Long-Term Debt

The \$1.05 billion balance of long-term debt at December 31, 2003 consists of \$66.5 million subordinated debentures due in 2009, \$360.8 million payable to the two entities that issued the Company's trust preferred securities, \$419.0 million in FHLB advances and \$206.0 million in repurchase agreements.

The \$66.5 million subordinated debentures have a fixed interest rate of 9.65% and are not callable in advance of maturity. The effective cost of this debt is 9.73%. The FHLB advances have maturity dates through 2007 and carry a blended interest rate of 2.58%. The FHLB may exercise its option to call \$75.0 million of these advances prior to scheduled

maturity. In 2004, \$140.0 million of these advances having an average rate of 2.37% are repayable. The \$206.0 million of repurchase agreements mature between 2005 and 2007 and have an average rate of 1.64%. Average long-term debt was \$629.8 million in 2003 compared to \$73.4 million in 2002 and \$66.5 million in 2001.

#### **Minority Interest in Trust Preferred Securities**

Trust preferred securities totaled \$248.6 at December 31, 2002. Included in these securities are \$152.4 million of 8.875% securities issued in 1997 and \$89.7 million of 8.625% securities issued in 1996. The securities were issued by two wholly-owned subsidiaries of the Company and are classified on the Consolidated Statements of Condition as guaranteed preferred beneficial interests in junior subordinated deferrable interest debentures. The related expense is included on the year to date September 30, 2003 and December 31, 2002 and 2001 Consolidated Statements of Operations as minority interest in income of subsidiaries, net of taxes. Dividends are paid semi-annually and these securities cannot be redeemed for ten years from the date of issuance. The securities have a final maturity of 30 years from their issuance date. Dividends are cumulative and deferrable for a period not to exceed five years. These securities qualify as tier I capital, with certain limitations. Amounts not included in tier I capital are included in tier II capital (see Note 11 of Notes to Consolidated Financial Statements).

As previously noted, on October 1, 2003 the Company adopted FIN 46R and no longer consolidates the two entities that issued its trust preferred securities. Because of this, the Company no longer has minority interest expense attributable to the trust preferred securities. Rather, at December 31, 2003 the Consolidated Statements of Condition reflect long-term debt of \$360.8 million which is payable by the Company to the entities that have issued the trust preferred securities. Beginning October 1, 2003 interest on this debt is included in interest expense in the Consolidated Statements of Operations. Trust preferred securities that the Company has repurchased, totaling \$107.9 million are now reflected as securities held to maturity in the Consolidated Statements of Condition and interest earned on these securities is included in interest income in the Consolidated Statements of Operations. The market value of these securities is \$115.3 million at December 31, 2003.

Since the rate on both the Series A and Series C trust preferred securities is generally above yields that the Company can earn on its short term investments, loans and securities, the Company is attempting to repurchase additional trust preferred securities but will only do so if the repurchase terms are acceptable. During the first quarter of 2004, the Company acquired more than 50% of the debentures of one of the series, and the Company intends to reconsolidate the subsidiary that issued the guaranteed preferred beneficial interests in junior subordinated deferrable interest debentures.

#### **Sensitivity to Market and Other Risk**

As previously noted, the Company is exposed to various business risks. Two types of market risk that could materially impact the operating results of the Company are interest rate risk and foreign currency exchange exposure. Though the Company's Asset/Liability Committee (ALCO) closely monitors its exposure to these risks, the modeling of these risks requires a variety of assumptions including the level of interest rates, the shape of the yield curve, the asset and liability mix and the path of foreign exchange rates. If the actual results vary significantly from the forecast, or if errors occur in the Company's modeling techniques, the Company may be limited in controlling or mitigating such risks.

Riggs manages its interest-rate risk through the use of an income simulation model which forecasts the impact on net interest income of a variety of different interest rate scenarios. A most likely interest rate scenario is forecasted based upon an analysis of current market conditions and expectations. The model then evaluates the impact on net interest income of rates moving significantly higher or lower than the most likely scenario. Most likely is defined as the outlook of the Bank's Treasury segment on the path of future interest rates. As of December 31, 2003, the most likely interest rate scenario calls for the federal funds target rate to be 1.00% through July 2004. The federal funds target rate then rises gradually to 3.75% by June 2006, holding at that level for the remainder of the forecast horizon. The results are compared to risk tolerance limits set by corporate policy. The model's results as of December 31, 2003 are shown in Table M of this Form 10-K. Current policy establishes limits for possible changes in net interest income for 12 and 36 month horizons. The interest rate scenarios monitored by ALCO are based upon a 100 bp (1%) gradual increase or decrease in rates over a 12-month time period versus the most likely scenario and a 300 bp (3%) gradual increase or decrease in rates over a 36-month time period versus the most likely scenario.

As of December 31, 2003, the forecasted impact of rates rising or falling 100 bp versus the most likely scenario over a 12-month time period was a change in net interest income not exceeding 3%. For a 300 bp movement in rates versus the most likely scenario over a 36-month period, the impact on net interest income did not exceed 4.50%. The results of the

simulation for December 31, 2003 indicated that the Bank was liability sensitive due to a large portion of its assets being comprised of fixed-rate instruments. Earnings benefit from the down 100 bp versus most likely from increasing spreads on fixed rate assets but are offset somewhat by floors on deposits and faster prepayment rates on mortgage loans and mortgage backed securities.

In managing interest-rate risk, ALCO uses financial derivative instruments, such as interest-rate swaps. Financial derivatives are employed to assist in the management and/ or reduction of interest-rate risk and can effectively alter the interest-rate sensitivity of the Company. Along with financial derivative instruments, the income simulation model includes assumptions about short-term financial instruments, investment securities, loans, deposits, and other borrowings.

At December 31, 2003 and 2002, the Company's cumulative one year gap was \$(1.28) billion and \$(51.0) million, respectively. A negative gap position indicates that the Company would be adversely impacted by rising interest rates since interest bearing deposits would reprice more quickly than interest earning assets. The Company does not monitor its interest rate risk exposure through gap measurement techniques but rather utilizes the income simulation techniques discussed above.

At December 31, 2003, Riggs had \$33.7 million in commitments to purchase foreign currency and \$110.4 million in commitments to sell foreign currency. Included in the commitments to sell foreign currency was a foreign exchange contract for a notional amount of \$76.1 million to hedge the investment in London-based legal entities. In addition, interest rate swaps were used to hedge interest rate risk. At December 31, 2003, there were 17 interest rate swaps totaling \$102.0 million in notional principal balances of which \$47.0 million was used to hedge cash flows from variable rate liabilities (see Note 19 to Consolidated Financial Statements).

## CAPITAL RESOURCES

One of the Company's fundamental objectives is to maintain a level of capitalization that promotes depositor and investor confidence. In addition to maintaining conservative loan underwriting standards, the Company places an emphasis on capital strength and its ability to withstand unfavorable economic conditions and business losses.

The Company's policy is to ensure that the Bank is capitalized in accordance with regulatory guidelines. As previously discussed, the Bank is subject to minimum capital ratios as prescribed by the OCC, which are essentially the same as those prescribed by the Federal Reserve Board for bank holding companies. However, as previously noted, the Company has changed the method by which it accounts for trust preferred securities. Because of this change, banking regulators, which currently allow trust preferred securities to be included in regulatory capital to a limited extent, may in the future exclude trust preferred securities from the calculation of regulatory capital.

Total shareholders' equity at December 31, 2003 was \$373.5 million, a \$15.7 million decrease from year-end 2002. The decrease was primarily the result of unrealized securities losses, net of taxes of \$17.9 million and \$5.7 million in dividend payments for the year. Offsetting these decreases to equity were increases of \$4.2 million related to issuance of the Company's common stock, a \$1.6 million unrealized gain after tax on the Company's hedging activities, a \$1.5 million foreign exchange after tax translation gain and net income of \$979 thousand. Total shareholders' equity at December 31, 2002 was \$389.2 million, a \$28.4 million increase from year-end 2001. The increase was primarily the result of net income of \$13.0 million, unrealized after tax securities gains of \$12.8 million, and a \$7.4 million increase in paid in capital due to the previously described trust preferred securities repurchases. These increases were partially offset by \$5.7 million in dividend payments for the year.

Banking regulators have issued risk-based capital guidelines for banks and bank holding companies. These requirements provide minimum total, tier I, and leverage capital ratios that measure capital adequacy. The total capital ratio measures combined tier I and tier II capital to risk-weighted assets. The tier I capital ratio measures tier I capital to risk-weighted assets. The leverage capital ratio measures tier I capital to average assets. At December 31, 2003 and 2002, the Company's and Bank's capital ratios significantly exceeded the well-capitalized levels under each of the regulatory ratios (see Table N of this Form 10-K and Note 10 of Notes to Consolidated Financial Statements).

As previously noted, because of FIN 46R and the deconsolidation of the two entities that have issued trust preferred securities, regulatory authorities may conclude at a future date that the trust preferred securities should no longer be included as a component of tier I regulatory capital. The Company has determined that it and the Bank would continue to

be well capitalized at December 31, 2003 without including the trust preferred securities as a component of regulatory capital.

**FOURTH QUARTER 2003 VS. FOURTH QUARTER 2002**

For the quarter ended December 31, 2003, the Company reported a net loss of \$6.9 million, or \$.24 per share, compared to net income of \$2.2 million, or \$0.08 per diluted share, in the fourth quarter of 2002.

Net interest income was \$37.7 million in the fourth quarter of 2003 compared to \$49.4 million in the comparable quarter of the prior year, a decrease of 24%. This decrease is primarily attributable to the previously discussed changes as a result of the Company's adoption of FIN 46R on October 1, 2003 and mid-year changes in the methodology by which Riggs, as a financial agent bank, is compensated by the Treasury. Average earning assets were \$5.36 billion and \$5.77 billion and the net interest margin was 2.88% and 3.48% for the fourth quarter of 2003 and 2002, respectively.

The Company provided \$2.8 million and \$689 thousand for loan losses in the fourth quarter of 2003 and 2002, respectively, reflecting strong loan growth in the fourth quarter of 2003 compared to the comparable quarter of the prior year.

Noninterest income totaled \$25.4 million in the fourth quarter of 2003, an increase of \$728 thousand from the \$24.7 million in the comparable quarter of the prior year primarily due to the decreases in venture capital losses noted previously. Net securities gains in the fourth quarter of 2003 were \$774 thousand compared to \$2.1 million in the prior year's fourth quarter.

Noninterest expense for the 2003 fourth quarter was \$70.2 million, compared to \$64.4 million in the year-ago quarter, an increase of 9%. The increase is attributable to residual Project EPS expenses and a \$950 thousand impairment charge.

- (1) Income and rates are computed on a tax-equivalent basis using a Federal income tax rate of 35% and local tax rates as applicable. Net interest income on a tax equivalent basis, or net interest income plus an amount equal to the tax savings on tax-exempt interest, is utilized in this table to improve year to year comparability as well as facilitate comparison with other banking organizations.
- (2) Nonperforming loans are included in average balances used to determine rates.
- (3) The averages and rates for the securities available for sale portfolio are based on amortized cost.
- (4) Excludes venture capital investments
- (5) Demand deposit balances for all periods presented exclude certain accounts transferred to the money market classification to reduce the level of deposit reserves required.

Other Short-Term Borrowings	(84)	(79)	(163)	(205)	61	(144)
Long-Term Debt	(5,439)	25,008	19,569	(443)	644	201
<b>Total Interest Expense</b>	<b>(21,081)</b>	<b>19,386</b>	<b>(1,695)</b>	<b>(52,827)</b>	<b>8,710</b>	<b>(44,117)</b>
<b>Net Interest Income</b>	<b>\$ (17,167)</b>	<b>\$ (3,199)</b>	<b>\$ (20,366)</b>	<b>\$ (10,670)</b>	<b>\$ 13,597</b>	<b>\$ 2,927</b>

- (1) The dollar amount of changes in interest income and interest expense attributable to changes in rate/volume (change in rate multiplied by change in volume) has been allocated between rate and volume variances based on the percentage relationship of such variances to each other. Income and rates are computed on a tax-equivalent basis using a Federal income tax rate of 35% and local tax rates as applicable.
- (2) Effective October 1, 2003, trust preferred securities are classified as held to maturity securities due to the adoption of FIN 46R. Consequently, the change in interest income from 2002 to 2003 is entirely due to volume.

Maximum Amount Outstanding at any Month- End	518,711	567,286	584,706	13,544	11,832	16,632

*1 Average amounts are based on daily balances. Average rates are computed by dividing actual interest expense by average amounts outstanding.*

**TABLE M:****INTEREST-RATE SENSITIVITY ANALYSIS<sup>1</sup>****MOVEMENTS IN INTEREST RATES FROM DECEMBER 31, 2003**

(IN THOUSANDS, EXCEPT RATES)	SIMULATED IMPACT OVER NEXT TWELVE MONTHS		SIMULATED IMPACT OVER NEXT THIRTY-SIX MONTHS	
	+100BP	-100BP	+300BP	-300BP
Simulated Impact Compared with a Most Likely Scenario:				
Net Interest Income				
Increase (Decrease)	(1.3)%	2.7%	(3.6)%	4.4%
Net Interest Income				
Increase (Decrease)	\$(2,170)	\$4,348	\$(17,650)	\$21,527

*1 Key Assumptions:*

*Assumptions with respect to the model's projection of the effect of changes in interest rates on net interest income include:*

- 1. Target balances for various asset and liability classes, which are solicited from the management of the various units of the Company.*
- 2. A most likely federal funds rate and U.S. Treasury yield curve which are determined by an authorized committee and variances from this rate which are established by policy.*
- 3. Spread relationships between various interest rate indices which are generated by the analysis of historical data and committee consensus.*
- 4. Assumptions about the effect of embedded options and prepayment speeds: instruments that are callable are assumed to be called at the first opportunity if an interest rate scenario makes it advantageous for the owner of the call to do so. Prepayment assumptions for mortgage products are derived from accepted industry sources.*
- 5. Reinvestment rates for funds replacing assets or liabilities that are assumed (through early withdrawal, prepayment, calls, etc.) to run off the balance sheet, which are generated by the spread relationships.*
- 6. Maturity strategies with respect to assets and liabilities, which are solicited from the management of the various units of the Company.*

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Riggs National Corporation (the Company or Riggs), a Delaware Corporation, is a bank holding company that provides financial services to a wide variety of customers. These services include community banking, corporate and institutional banking, international banking and trust and investment management services.

These services are provided through the Company's wholly-owned subsidiary and principal operating unit, Riggs Bank N.A. (the Bank or Riggs Bank), and its operating subsidiaries and divisions: Riggs Bank Europe Ltd. (RBEL), Riggs & Co., Riggs & Co. International Ltd. (RCIL) and Riggs Real Estate Investment Corporation (RREIC).

In addition, the Company has invested in two partnerships that make venture capital investments. The Company has a 99% interest in each of these partnerships.

### NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### Basis of Presentation

The Company's accounting and reporting policies are in conformity with accounting principles generally accepted in the United States of America, are applied on a consistent basis and follow general practice within the banking industry.

The consolidated financial statements include the accounts of the Company and all subsidiaries except two wholly-owned trusts which have been deconsolidated effective October 1, 2003, at which date the Company adopted Financial Accounting Standards Board Interpretation No. 46 (revised December 2003), Consolidation of Variable Interest Entities or FIN 46R. These consolidated financial statements include all adjustments necessary to fairly present the Company's results of operations, financial condition and cash flows. All significant intercompany transactions and balances have been eliminated. Certain prior period amounts have been reclassified to conform to the current year's presentation. None of these reclassifications affect net income (loss) or earnings per share for the periods presented.

The preparation of financial statements requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Material estimates particularly susceptible to near term changes include the adequacy of the reserve for loan losses, the valuation of venture capital investments, the realizability of deferred tax assets and the assessment of asset impairment.

#### Cash and Cash Equivalents

For purposes of reporting cash flows, cash equivalents include cash on hand, amounts due from banks, federal funds sold and collateralized reverse repurchase agreements. Cash equivalents have original maturities of 30 days or less.

#### Securities

Securities are designated as trading securities, securities held to maturity or securities available for sale at the time of purchase and remain in that category until sale or maturity. Security purchases are made in accordance with a policy established by the Board of Directors.

At December 31, 2003 and 2002, 94% and 100%, respectively of the Company's securities are classified as available for sale and, as such, are carried at their fair values with any unrealized gains and losses, net of taxes, reported as a separate component of other comprehensive income (loss) within shareholders' equity. Fair values are generally obtained from quoted market values or independent sources. Short-term securities, generally those with initial maturities of three months or less, are carried at cost as cost is deemed to approximate market value. At December 31, 2003, the Company has \$107.9 million of securities classified as held to maturity which consists of the Company's repurchase of trust preferred securities issued by two previously consolidated entities. These securities are reflected in the Consolidated Statements of Condition at amortized cost.

The specific identification method is used to determine the gain or loss of any security sold.

Income on securities available for sale and held to maturity is recognized as earned and any purchase premiums or discounts from par value are amortized or accreted so as to approximate income recognition on a level yield basis. The Company suspends income recognition and eliminates from revenue any previously accrued income related to any security

that has significant uncertainty regarding collection of principal or interest. The Company invests in investment grade securities and there were no nonperforming investments during the three year period ended December 31, 2003.

### **Loans**

Loans are carried at the principal amount outstanding plus or minus any associated premium or discount. Loan origination fees and direct costs are deferred and the net amount is amortized as an adjustment of loan yield. Income is recognized as earned using methods that generally result in level rates of return on principal amounts outstanding over the estimated lives of the loans.

The Company evaluates each past due commercial loan (commercial and financial loans and commercial real estate loans) and discontinues the accrual of interest based on the delinquency status, an evaluation of any collateral and the financial condition of the borrower. If there is doubt as to the collection of either principal or interest, or when interest or principal is 90 days past due and the loan is not well-secured and in the process of collection, it is placed into non-accrual status. A non-accrual loan may be restored to accrual status when interest and principal payments are brought current and the collection of future payments is not in doubt.

Income recognition on non-commercial loans is discontinued and the loans are generally charged off or foreclosure begun after a delinquency period of 120 days or as permitted by laws and other regulations. At that point, any uncollected interest is eliminated from income.

The Company originates with the intent to sell certain residential mortgage loans. These loans are carried at the lower of cost or fair value and are sold servicing released. The amount of these loans at December 31, 2003 and 2002 was \$524 thousand and \$1.2 million, respectively.

### **Reserve for Loan Losses**

The reserve for loan losses is maintained at a level deemed adequate to absorb probable losses in the loan portfolio. The determination of the adequacy of the reserve for loan losses is based upon an on-going, analytical review of the loan portfolio. This analysis requires application of judgment, evaluation of economic uncertainties and assessment of business conditions that may change. Because of these and other factors, adjustments to the reserve for loan losses may be required. Any such adjustments would impact future operating results.

The analytical review of the loan portfolio performed to determine the adequacy of the reserve for loan losses includes a review of large balance loans for impairment, an analysis of historical loss experience by loan type and, for groups of loans with similar characteristics, an evaluation of current economic conditions and all other factors deemed pertinent to the analysis. Impaired loans are defined as specifically reviewed loans for which it is probable that Riggs will be unable to collect all amounts due in accordance with the loan agreement. Impaired loans are generally commercial and financial loans and commercial real estate loans and are usually on non-accrual status. Each impaired loan with an outstanding balance equal to or greater than \$250 thousand has a specific, identified loan loss reserve associated with it or has been written down to its estimated net realizable value. Impaired loans do not include groups of smaller balance homogeneous loans with similar collateral characteristics, such as residential mortgage and home equity loans. Loss reserves for these types of loans are established on an aggregate basis using historical loss experience. Balances related to impaired loans are excluded when applying historical loss ratios to determine loan loss reserves.

The specific reserves for impaired loans are included in the reserve for loan losses. Impaired loans are valued based upon the fair value of the related collateral if the loans are collateral dependent. For all other impaired loans, the specific reserves are based on the present values of expected cash flows discounted at each loan's initial effective interest rate.

Provisions to the reserve for loan losses are charged against, or credited to, earnings in amounts necessary to maintain an adequate reserve for loan losses. Commercial loans are charged-off when it is determined that the loan cannot be fully recovered and, as noted previously, non-commercial loans are generally charged-off at the time of loan foreclosure. Recoveries of loans previously charged-off are credited to the reserve for loan losses.

The Company maintains its reserve for loan losses in accordance with a policy approved by the Board of Directors. The Company has an established methodology for analyzing its reserve for loan losses that includes an internal loan classification policy. The Company periodically reviews its methodology to ascertain that it produces accurate assessments of probable loan losses. Domestic and foreign loans are subjected to substantially identical review procedures.

### **Premises and Equipment**

Land is recorded and carried at cost. Premises, leasehold improvements and furniture and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line method over the estimated useful lives of the assets. Ranges of useful lives for computing depreciation and amortization are generally twenty-five to thirty-five years for premises, five to twenty years for leasehold improvements and four to fifteen years for furniture and equipment. Software is generally amortized over three to seven years.

Major improvements and alterations to premises and leaseholds are capitalized. Leasehold improvements are amortized over the shorter of the terms of the respective leases or the estimated useful lives of the improvements. Interest costs relating to the construction of certain fixed assets are capitalized at the Bank's weighted-average cost of interest-bearing liabilities.

### **Impairment of Long-Lived Assets**

Long-lived assets to be held and used, including premises and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the related carrying amount may not be recoverable. When required, impairment losses on assets to be held and used are recognized based on the fair value of the asset. Long-lived assets to be disposed of are reported at the lower of carrying value or fair value less selling costs.

Goodwill and other intangible assets with indefinite lives are tested at least annually for impairment by comparing their fair values with their recorded amounts. At December 31, 2003, the Company had \$5.9 million of goodwill and other intangibles and in the fourth quarter of 2003 recorded a \$950 thousand goodwill impairment.

### **Venture Capital Investments**

Venture capital investments, which include both direct investments and investments in venture capital funds, are accounted for at fair value with gains and losses included in noninterest income in the Consolidated Statements of Operations.

The valuation of venture capital investments was arrived at using a variety of factors including, but not limited to: market prices, where available, and discounted, if necessary, to reflect trading history, lock-up provisions, lack of market liquidity and other factors; cost, if there is no readily determinable market price and there has not been a material event, such as a follow-on round of financing or strategic sale; a value higher than cost if indicated by additional financing which fulfills certain requirements; and analysis and commentary from a fund's Investment Manager/ General Partner.

The Company does not intend to sell or liquidate the venture capital portfolio and the valuation of venture capital investments is subject to uncertainties in that it does not represent a negotiated value between the Company, as seller, and an independent, willing buyer that has the necessary knowledge and financial ability to complete the purchase. Additionally, if the Company attempted to sell the venture capital portfolio, particularly if it deemed it necessary to liquidate the investments within a short period of time, the actual proceeds from the sale could differ significantly from the carrying value. The market for the type of venture capital investments held has since 2000 been impacted by a slowing economy, a depressed domestic equity market in which the values of publicly traded companies have declined, and, because of these market conditions, a decline in the number of initial public offerings and acquisitions of private companies by publicly traded firms. The gradual improvement in these sectors has begun to afford the Company better liquidation opportunities and it continues to actively manage the portfolio to maximize current valuations. Although these and other factors have been assessed in determining the values, because of the subjectivity in determining values, it is possible that the Company would experience a material loss if it chose to liquidate its venture capital portfolio, particularly if it attempted to do so quickly. The loss, if any, would be recorded in the Riggs Capital Partners segment.

### **Income Taxes and Deferred Tax Assets on Venture Capital Losses**

A provision for income taxes is recorded based upon the amounts of current taxes payable or refundable and the change in net deferred tax assets or liabilities during the year. Deferred tax assets and liabilities are recognized for the tax effects of differing carrying values of assets and liabilities for tax and financial statement reporting purposes that will reverse in future periods. When substantial uncertainty exists concerning the recoverability of a deferred tax asset, the carrying value of the asset is reduced by a valuation allowance. Establishing a valuation allowance results in an increase in income tax expense.

Unrealized losses in the venture capital operations have resulted in the maintenance of \$12.9 million of deferred tax assets as of December 31, 2003. Of this amount, \$1.5 million was established in 2003. These assets can be utilized to reduce taxes payable on future capital gains but must be utilized within five years of the year in which the loss is realized for tax return

purposes. Because of continuing losses in the venture capital portfolio and the lack of current suitability of alternatives to generate capital gains, Riggs has established a valuation allowance of \$6.9 million against the deferred tax assets at December 31, 2003. Of this amount, \$1.5 million was established in 2003. The Company believes that the unreserved deferred tax asset balance of \$6.0 million at December 31, 2003, which includes a deferred tax asset related to realized losses of \$3.3 million, will be realized through generation of future net capital gains within its venture capital operations or the implementation of alternative business strategies that generate net capital gains. Management has identified several alternative business strategies that could produce sufficient capital gains to allow the remaining net deferred tax asset balance to be realized.

If sufficient net capital gains within the Company's venture capital operations are not realized in a timely manner, or if business conditions make it impossible, impractical or imprudent to implement the identified alternative strategies, an additional valuation allowance, resulting in a charge against income, for that portion of the deferred tax asset which will not be utilized, will be recorded in the Other segment.

In addition, uncertainty related to the utilization of deferred tax amounts generated by foreign subsidiaries resulted in the maintenance of a 100% valuation allowance of \$7.6 million and \$6.4 million as of December 31, 2003 and 2002, respectively.

### **Benefit Plans**

Effective February 28, 2002, the Company froze its domestic non-contributory defined benefit pension plan. Participants will no longer earn additional benefits under the plan for service after February 28, 2002. Salary increases and service with the Company will not increase participants' benefits already accrued under the plan, although service after this date may allow participants to become vested in benefits earned before February 28, 2002 or to qualify for early retirement benefits under the plan. Net periodic pension expense is actuarially determined and includes service cost and interest cost components that reflect the long term expected return on plan assets and the effect of deferring and amortizing actuarial gains and losses and the prior service costs. On an annual basis Riggs contributes at least the minimum funding requirements to the pension plan as determined by the actuary.

The Company also provides health insurance benefits to retired employees and, to employees who retired prior to January 1, 1998, life insurance benefits. The estimated cost of retiree health insurance benefits is accrued during the employment period and a transition asset, recognized when the current accounting treatment for postretirement benefits was adopted, is being amortized over a 20 year period.

The Company sponsors a 401(k) Plan that is available to all domestic employees who meet certain age and length of service requirements. In 2002 Riggs began fully matching employee contributions up to a maximum of 6% of an employee's eligible yearly earnings. Prior to 2002, the Company matched employee contributions for the first \$100 the employee contributed and 50% thereafter up to a maximum of 6% of an employee's eligible yearly earnings.

During 2002, the Company terminated a Supplemental Executive Retirement Plan (SERP) which it had maintained to provide supplemental income and postretirement death benefits to certain key employees. Upon termination of this plan, the actuarially determined liability for active participants with greater than one year of service prior to retirement was transferred into the Company's Executive Deferred Compensation Plan. Vested participants who are no longer employed by the Company were paid an amount equal to the current value of their benefit. Vested participants who were receiving benefits prior to plan termination will continue to receive these benefits. This supplemental plan has no assets (see Note 14 of Notes to Consolidated Financial Statements).

### **Stock-Based Employee Compensation Plans**

At December 31, 2003, the company had five stock-based employee compensation plans which are described more fully in Note 14 of Notes to Consolidated Financial Statements. The Company accounts for these plans under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, SFAS 148, Accounting for Stock-Based Compensation-Transition and Disclosure, an amendment of FASB Statement 123, and related Interpretations. There is no stock-based compensation expense for these plans reflected in the Consolidated Statements of Operations as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant.

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

In 2003 and 2002, the Company approved for award 210,407 and 161,909 shares, respectively, of its common stock to certain key executives under a Deferred Stock Award Agreement which are subject to performance and time vesting. Based on achieved 2003 and 2002 performance targets, 76,466 shares were awarded at December 31, 2003 and none at December 31, 2002. The 76,466 deferred shares earned at December 31, 2003 will vest in three equal annual installments, beginning in January of 2004. A total of \$325 thousand in compensation expense was recorded in 2003 related to this award.

In 2003 and 2002, the Company granted 73,000 and 370,000, respectively, of its common stock to certain key executives under a Deferred Stock Award Agreement that are subject to time vesting. These shares vest in equal annual installments over a period of four to five years, beginning in January 2003 and January 2004. A total of \$1.2 million and \$646 thousand in expense was recognized for these awards in 2003 and 2002, respectively.

The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS 123, Accounting for Stock-Based Compensation, to stock-based employee compensation.

(IN THOUSANDS, EXCEPT PER SHARE AMOUNTS AND RATES)	Year Ended December 31,		
	2003	2002	2001
Net income, as reported	\$ 979	\$ 13,021	\$ (23,377)
Add: Stock-based employee compensation expense included in reported net income, net of related tax effects	1,012	420	
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(6,754)	(3,068)	(3,040)
Pro forma net income	\$ (4,763)	\$ 10,373	\$ (26,417)
Earnings per share:			
Basic as reported	\$ 0.03	\$ 0.46	\$ (0.82)
Basic pro forma	\$ (0.17)	\$ 0.36	\$ (0.93)
Diluted as reported	\$ 0.03	\$ 0.45	\$ (0.82)
Diluted pro forma	\$ (0.16)	\$ 0.36	\$ (0.93)
<b>Weighted-Average Fair Value of Options Granted</b>	\$ 5.20	\$ 6.03	\$ 7.21
<b>Weighted-Average Assumptions:</b>			
Expected Lives (Years)	9.00	9.00	9.00
Risk-Free Interest Rate	4.18%	4.97%	5.32%
Expected Volatility	29.92%	38.70%	37.27%
Expected Dividends (Annual Per Share)	\$ 0.20	\$ 0.20	\$ 0.20

The fair values of the stock options outstanding are used to determine the proforma impact of the options on compensation expense over their vesting period. Proforma net income and earnings per share were based on the Black-Scholes options pricing model for each grant made, using the key assumptions detailed above.

#### Earnings Per Common Share

Basic earnings per share is calculated by dividing net income by the weighted-average number of shares of common stock outstanding. Diluted earnings per share is calculated by dividing net income by the weighted-average number of shares of common stock and common stock equivalents, unless determined to be anti-dilutive. The following is a reconciliation of the weighted average common shares for basic and diluted per share calculations:

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

	2003	2002	2001
Basic average common shares	28,609,296	28,505,405	28,470,953
Dilutive effect of stock options and unvested deferred stock awards	967,789	398,794	
Dilutive average common shares	28,577,085	28,904,199	28,470,953

Stock options not included in the above per share calculations because inclusion would be anti-dilutive were 2,777,248 in 2003, 3,762,710 in 2002 and 437,532 in 2001.

### **Foreign Currency Translation**

The functional currency amounts of assets and liabilities of foreign entities are translated into U.S. dollars at year-end exchange rates. Income and expense items are translated using appropriate weighted-average exchange rates for the period. Functional currency to U.S. dollar translation gains and losses, net of related hedge transactions, are credited or charged directly to the accumulated other comprehensive income section of shareholders' equity.

### **Foreign Exchange Income**

Open foreign currency trading and exchange positions, including spot and forward exchange contracts, are valued daily and recorded monthly; the resulting trading gains and losses are recorded in other noninterest income. The amount of net foreign exchange trading gains included in the accompanying Consolidated Statements of Operations were \$5.8 million for 2003, \$4.7 million for 2002 and \$4.3 million for 2001.

### **Interest Rate and Foreign Currency Risk**

The Company maintains a risk management policy that includes the use of derivative instruments. Use of these instruments is in accordance with a formal policy that is monitored by a committee that has delegated responsibility for the interest rate and foreign exchange risk management function. These instruments are utilized to reduce fluctuations in earnings and equity values caused by interest rate or foreign exchange fluctuations.

The derivative instruments that Riggs uses include interest rate swaps, futures contracts and option contracts that relate to the pricing of specific assets and liabilities. Interest rate swaps involve the exchange of fixed and variable interest rate payments based upon a notional principal amount and maturity date. Interest rate futures generally involve exchange-traded contracts to buy or sell U.S. Treasury bonds or notes in the future at specified prices. Interest options represent contracts that give the owner the option to receive cash or purchase, sell or enter into a financial instrument at a specified price within a specified time period. Certain of these contracts grant the right to enter into interest rate swaps and cap and floor agreements with the writer of the option.

Riggs also enters into foreign exchange derivative contracts, including foreign currency forward contracts, to manage its exchange risk associated with the translation of foreign currency into U.S. dollars.

As a result of the use of derivative instruments the Company is exposed to credit and market risk. If the fair value of the derivative contract is positive, the counterparty owes Riggs and, hence, a repayment or credit risk exists. If the fair value of the derivative contract is negative, Riggs owes the counterparty and, therefore, there is no repayment risk. The Company attempts to minimize repayment risk by entering into transactions with financially stable counterparties that are specified in the Company's policy and reviewed periodically by the Company's credit committee. Derivative contracts are governed by an International Swap Dealers Association Master Agreement and, depending on the nature of the agreements, bilateral collateral arrangements also may be obtained. When Riggs has multiple derivative transactions with a counterparty, the net mark-to-market exposure represents the netting of positive and negative exposures with the same counterparty. The net mark-to-market exposure with a counterparty is a measure of credit risk when there is a legally enforceable master netting agreement between Riggs and the counterparty. Riggs uses master netting agreements with the majority of its counterparties.

Market risk is the adverse effect that a change in interest rates or comparative currency values has on the fair value of a financial instrument or expected cash flows. Riggs manages the market risk associated with interest rate and foreign exchange hedge contracts by establishing formal policy limits concerning the types and degree of risk that may be undertaken. The Company's Treasury segment monitors compliance with this policy.

### **Accounting for Derivatives**

All derivatives are recorded at fair value in the Consolidated Statements of Condition within other assets or other liabilities. When a derivative contract is entered into, Riggs determines if it qualifies as a hedge. If it does, the derivative is designated as a hedge of the fair value of a recognized asset or liability, a hedge of cash flows or a hedge of a net investment in a foreign operation. Changes in the fair value of a derivative that is designated a fair value hedge and qualifies as a highly effective hedge, along with any gain or loss on the hedged asset or liability attributable to the hedged risk, are recorded in current earnings. The effective portion of changes in fair value of a derivative that is designated a cash flow hedge and that qualifies as a highly effective hedge is recorded in other comprehensive income until such time as periodic settlements on a variable rate hedged item are recorded in earnings. The ineffective portion of changes in fair value of cash-flow derivatives

is recorded in current earnings. Changes in the fair value of a derivative designated as a foreign currency hedge and that qualifies as a highly effective hedge, are either recorded in current earnings, other comprehensive income, or both, depending on whether the transaction is a fair value hedge or a cash flow hedge. If a derivative is used as a hedge of a net investment in a foreign operation, changes in its fair value, to the extent effective as a hedge, are recorded in other comprehensive income.

When entering into hedging transactions, the relationships between hedging instruments and hedged items is documented as is the risk management objective and strategy. This process links all derivatives that are designated as fair value, cash flow or foreign currency hedges to specific assets and liabilities on the Consolidated Statements of Condition or to forecasted transactions. The Company evaluates, both at inception of the transaction and on an on-going basis, the effectiveness of all hedges in offsetting changes in fair values or cash flows of hedged items.

Riggs discontinues hedge accounting prospectively when the derivative is no longer effective in offsetting changes in fair values or cash flows of a hedged item, the derivative matures or is sold, terminated or exercised or the derivative is de-designated as a hedge instrument.

When hedge accounting is discontinued because the derivative no longer qualifies as an effective fair value hedge, it will continue to be carried on the Consolidated Statements of Condition at its fair value and the hedged asset or liability will no longer be adjusted to reflect changes in fair value. When hedge accounting is discontinued because it is probable that a forecasted transaction will not occur, Riggs continues to carry the derivative in the Consolidated Statements of Condition at its fair value and any gains or losses accumulated in other comprehensive income will be recognized immediately in earnings. In all situations in which hedge accounting is discontinued, the derivative will be carried at fair value with changes in fair value recognized in income. The Company also enters into derivative transactions which do not qualify for hedge accounting. Generally these transactions are intended to protect the Company from fluctuations in foreign currency exchange rates.

#### **Treasury Stock**

The Company periodically purchases shares of its own common stock. These treasury shares are recorded at cost and are accounted for as a component of shareholders' equity. If, at a future date, the Company uses this stock, the treasury stock account will be relieved based upon the average cost of all treasury shares.

#### **NOTE 2. RESTRUCTURING AND OTHER CHARGES**

In December 2001 the Company announced plans to upgrade its technology and infrastructure and realign several of its business operations and, as a result of these decisions, recorded a \$4.3 million restructuring charge. At December 31, 2002, the Company had remaining accrued employee severance payments of \$334 thousand which were paid during 2003.

Also in 2001, the Company recorded various other charges including \$25.7 million to write-down the carrying value of various assets because of significant uncertainties concerning their recoverability, \$3.6 million to discharge its obligation under an employment contract and a \$500 thousand penalty to exit a domestic technology-related contract. In 2001 the Company also established a \$5.9 million valuation allowance against deferred tax assets.

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

**NOTE 3: SECURITIES AVAILABLE FOR SALE**

Securities available for sale at December 31 are as follows:

(IN THOUSANDS)	2003				2002			
	AMORTIZED COST	GROSS UNREALIZED GAINS	GROSS UNREALIZED LOSSES	FAIR VALUE	AMORTIZED COST	GROSS UNREALIZED GAINS	GROSS UNREALIZED LOSSES	FAIR VALUE
U.S. Treasury Securities	\$ 25,103	\$	\$ 29	\$ 25,074	\$ 4,998	\$	\$	\$ 4,998
State and Municipal Securities	24,917	145	44	25,018				
Government Agencies Securities	720,212	506	3,191	717,527	1,268,874	4,499	9	1,273,364
Mortgage-Backed Securities	1,012,635	1,547	6,933	1,007,249	970,386	15,109	11	985,484
Other Securities	51,831	119		51,950	56,049	22		56,071
<b>Total Securities Available for Sale</b>	<b>\$ 1,834,698</b>	<b>\$ 2,317</b>	<b>\$ 10,197</b>	<b>\$ 1,826,818</b>	<b>\$ 2,300,307</b>	<b>\$ 19,630</b>	<b>\$ 20</b>	<b>\$ 2,319,917</b>

Realized gains from the sale of securities totaled \$13.3 million during 2003 and realized losses totaled \$12 thousand, compared with realized gains of \$9.7 million and realized losses of \$207 thousand in 2002 and realized gains of \$14.3 million and realized losses of \$2.3 million in 2001. At December 31, 2003, a \$5.2 million unrealized loss, net of tax, was recorded in shareholders' equity and included in accumulated other comprehensive income (loss), compared to a \$12.7 million unrealized gain, net of tax, in 2002. Unrealized gains and losses are attributable to changes in market interest rates since the securities were purchased.

The following table details unrealized losses in the Company's securities available for sale portfolio.

(IN THOUSANDS)	LESS THAN 12 MONTHS		12 MONTHS OR MORE		TOTAL	
	FAIR VALUE	UNREALIZED LOSSES	FAIR VALUE	UNREALIZED LOSSES	FAIR VALUE	UNREALIZED LOSSES
U.S. Treasury Securities	\$ 25,074	\$ 29	\$	\$	\$ 25,074	\$ 29
State and Municipal Securities	6,468	44			6,468	44
Government Agencies Securities	448,231	3,191			448,231	3,191
Mortgage-Backed Securities	602,581	6,933			602,581	6,933
<b>Total Securities Available for Sale with Unrealized Losses</b>	<b>\$ 1,082,354</b>	<b>\$ 10,197</b>	<b>\$</b>	<b>\$</b>	<b>\$ 1,082,354</b>	<b>\$ 10,197</b>

Securities available for sale that were pledged to secure deposits and other borrowings were \$660.1 million at December 31, 2003 and \$1.69 billion at December 31, 2002. The decline in pledged assets was due to a change in the way the U.S. Treasury compensates financial agent banks such as Riggs. Under the prior compensation methodology, Riggs was compensated by net interest earned on Treasury deposit balances which was reflected in net interest income. Under the new compensation methodology, Riggs uses zero cost Treasury deposits to purchase a non-marketable Treasury-issued depositary compensation security (DCS). The pledged asset balance has declined because under the old methodology Riggs was required to purchase securities to collateralize any Treasury deposit. The DCS balance is netted against the Treasury deposit balance in the Statements of Financial Condition in accordance with FIN 39 (Offsetting of Amounts Related to Certain Contracts) and the income from the DCS is recorded as a component of noninterest income.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

The Other Securities category consists of Federal Home Loan Bank of Atlanta (FHLB) and Federal Reserve stock, money market mutual funds and other equity securities. The FHLB and Federal Reserve stock are valued at cost which approximates fair value. Equity securities are valued at fair value.

The contractual maturity distribution of securities available for sale at December 31 follows. Actual maturities may differ from contractual maturities because issuers may have the right to call obligations and mortgages underlying mortgage-backed securities may be repaid more quickly than scheduled.

<b>Total Loans</b>	<b>3,221,887</b>	<b>3,004,092</b>
Net Deferred Loan Fees, Costs, Premiums and Discounts	3,267	3,813
<b>Loans</b>	<b>\$3,225,154</b>	<b>\$3,007,905</b>

A summary of nonperforming and loans contractually past-due 90 days or more at December 31 follows.

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

(IN THOUSANDS)	2003	2002
Nonaccrual Loans	\$ 2,308	\$ 548
Past-Due Loans	12,178	11,045

Nonaccrual loans at December 31, 2003 is comprised of two foreign loans both of which were placed on nonaccrual status during 2003. Nonaccrual loans at December 31, 2002 consists of another foreign loan which repaid during 2003. There were no renegotiated loans at December 31, 2003 or 2002. Nonaccrual and renegotiated loans may include certain impaired loans. The two foreign loans mentioned previously were the Company's only impaired loans at December 31, 2003. Charge-offs were taken on these loans and at year end they are reflected at net realizable value, and accordingly, there are no specific reserves at December 31, 2003. There were no impaired loans as of December 31, 2002. The 2003 average investment in impaired loans was \$2.9 million, entirely in foreign loans. For 2002, the average investments in impaired loans was \$309 thousand, also entirely in foreign loans.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

An analysis of the changes in the reserve for loan losses follows:

(IN THOUSANDS)	2003	2002	2001
<b>Balance, January 1</b>	\$25,958	\$29,540	\$36,197
Provision for Loan Losses	5,146	421	2,526
Loans Charged-Off	5,880	6,972	11,464
Less: Recoveries of Charged-Off Loans	2,810	2,252	2,485
<b>Net Charge-Offs</b>	<b>3,070</b>	<b>4,720</b>	<b>8,979</b>
Foreign Exchange Translation Adjustments	251	717	(204)
<b>Balance, December 31</b>	<b>\$28,285</b>	<b>\$25,958</b>	<b>\$29,540</b>

The Company's reserve for loan losses at December 31, 2003 was \$28.3 million, an increase from the December 31, 2002 balance of \$26.0 million. A provision of \$5.1 million was taken for the year, primarily to cover loan growth in the commercial real estate portfolio and for one of the foreign impaired loans that was placed on nonaccrual status during the year.

Cash payments received on impaired loans are generally applied to principal. The interest income that would have been earned in 2003, 2002 and 2001 if such loans had not been classified as impaired and therefore on nonaccrual status, was \$215 thousand, \$20 thousand, and \$820 thousand, respectively. \$4 thousand of interest was included in net interest income for impaired loans in 2003 while none was included in 2002.

Geographically, the Company's domestic loans are concentrated in the Washington, D.C. metropolitan area. Loans originated by the Company's United Kingdom operations represent 57% of foreign loans at December 31, 2003 and are predominantly to borrowers located in the United Kingdom.

At December 31, 2003, approximately \$816.2 million or 25% of the Company's loan portfolio consisted of loans secured by real estate, excluding single-family residential loans, of which almost 100% was secured by properties located in the Washington, D.C. area. Approximately 45% of the Company's loan portfolio is secured by the primary residence of the borrower at December 31, 2003 compared to 50% at December 31, 2002.

### NOTE 5: TRANSACTIONS WITH RELATED PARTIES

In the ordinary course of banking business, loans are made to officers and directors of the Company and its affiliates as well as to their associates. These loans are underwritten at the Bank level consistent with standard banking practices and regulatory requirements and do not involve more than the normal risk of collectibility. At December 31, 2003 and 2002, loans to executive officers and directors of the Company and its affiliates, including loans to their associates, totaled \$95.5 million and \$140.9 million, respectively. During 2003 loan additions were \$46.2 million and loan repayments were \$91.7 million. In addition, there was an addition of \$65 thousand due to changes in the composition of our Board of Directors and executive officers. In addition to the transactions set forth above, the Bank had \$2.3 million in letters of credit outstanding at December 31, 2003 to related parties compared with \$1.9 million at December 31, 2002. There were no related party loans that were impaired, on nonaccrual status, past due, restructured or deemed potential problem loans at December 31, 2003 and 2002.

At December 31, 2003, the Company had one \$34.0 million repurchase agreement with a related party. The customer was considered a related party because a member of one of the Company's subsidiaries' Board of Directors was in a senior management position at the customer. There were no repurchase agreements with related parties at December 31, 2002.

In 2003, the Company, through two venture capital investment partnerships each in which it has 99% interest, paid approximately \$750 thousand in management fees to entities controlled by a director of the Company. In 2002 and 2001 the Company paid approximately \$2.6 million and \$4.0 million to these entities, respectively. These entities reimbursed the Bank approximately \$660 thousand in 2003, \$1.4 million in 2002 and \$2.0 million in 2001 for rent, salaries and other services provided by the Bank to these entities while also incurring additional operating expense with non-related parties. These venture capital partnerships also have an obligation to repay all management fees to the Company prior to any profits being accrued by the partnerships.

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

In 2001, the Company used a corporate aircraft that is owned by two entities directly or indirectly controlled by an individual who is both a member of the Board of Directors and a significant shareholder of the Company, and paid \$86 thousand to the owners for its use. The aircraft owned by these two entities was not substantially used by the Company in 2003 or 2002. The Company, through an agency, purchased advertising time on two television stations indirectly owned by this board member and shareholder in the amount of \$185 thousand in 2001. There were no such transactions in 2003 or 2002. In addition, another entity indirectly controlled by this individual leases space in a Company-owned facility through 2007. Lease payments received were \$469 thousand, \$433 thousand and \$397 thousand in 2003, 2002 and 2001, respectively. The Company was also reimbursed by the same entity in the amount of \$81 thousand in each of these same years for use of a sports entertainment suite. In 2003 and 2002 the Company was reimbursed \$146 thousand and \$68 thousand for the use of a second sports entertainment suite.

The above transactions with related parties were reviewed by the Board of Directors.

**NOTE 6. PREMISES AND EQUIPMENT**

Investments in premises and equipment at year-end were as follows:

(IN THOUSANDS)	2003	2002
Premises and Land	\$ 191,908	\$ 194,542
Furniture and Equipment	130,985	116,895
Leasehold Improvements	45,738	41,724
Purchased and Capitalized Software	73,081	48,589
Accumulated Depreciation and Amortization	(215,210)	(198,497)
<b>Total Premises and Equipment, Net</b>	<b>\$ 226,502</b>	<b>\$ 203,253</b>

Depreciation and amortization expense amounted to \$19.0 million in 2003, \$17.6 million in 2002 and \$18.9 million in 2001.

During 2003 and 2002 Riggs continued to streamline and consolidate its London based operations. As a result, it is attempting to sell a facility there and, because of a continued depressed real estate market in the City of London, wrote down the carrying value of this building by \$3.8 million in the second quarter of 2003. This was in addition to a write down of this building by \$1.3 million in the fourth quarter of 2002. These write downs were based upon consultation with real estate experts and are included in other noninterest expense in the Consolidated Statements of Operations.

At December 31, 2003, Riggs is committed to the following future minimum lease payments under non-cancelable operating lease agreements overing equipment and premises. These commitments expire intermittently through 2024.

(IN THOUSANDS)	MINIMUM LEASE PAYMENTS
2004	\$ 8,472
2005	7,198
2006	6,362
2007	5,157
2008	4,322
2009 and thereafter	12,967
<b>Total Minimum Lease Payments</b>	<b>\$ 44,478</b>

Total minimum operating lease payments included in the preceding table have not been reduced by future minimum payments from sublease rental agreements that expire through 2005. Minimum sublease rental income for 2004 is expected

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

to be approximately \$211 thousand. Rental expense for all operating leases (cancelable and non-cancelable), less rental income on these properties, consisted of the following:

(IN THOUSANDS)	2003	2002	2001
Rental Expense	\$9,563	\$9,114	\$ 9,439
Sublease Rental Income	(300)	(481)	(1,007)
<b>Net Rental Expense</b>	<b>\$9,263</b>	<b>\$8,633</b>	<b>\$ 8,432</b>

In the normal course of business, Riggs also leases space to others in buildings it owns. This rental income amounted to \$2.4 million in 2003, and \$2.3 million in 2002 and 2001 and it is accounted for as a credit to occupancy expense. For 2004, the Company anticipates that minimum rental income from the leasing of space in owned buildings will be approximately \$2.1 million.

**NOTE 7: TIME DEPOSITS \$100 THOUSAND OR MORE**

The aggregate amount of time deposits in domestic offices, each with a minimum balance of \$100 thousand, was \$315.0 million and \$1.42 billion at December 31, 2003 and 2002, respectively. This decrease of \$1.12 billion was due primarily to the previously described change in the method by which the U.S. Treasury compensates financial agent banks such as Riggs.

Approximately 96% of time deposits in foreign offices were in denominations of \$100 thousand or more at December 31, 2003 compared to about 89% at December 31, 2002.

Total time deposits at December 31, 2003 had the following scheduled maturities:

(IN THOUSANDS)	
2004	\$ 799,884
2005	95,943
2006	25,599
2007	13,940
2008	3,925
2009 and thereafter	6
<b>Total</b>	<b>\$939,297</b>

**NOTE 8: BORROWINGS**

**Short-Term Borrowings**

Short-term borrowings consist of the following at December 31:

(IN THOUSANDS)	2003	2002
Federal Funds Purchased	\$ 64,500	\$ 10,150
Repurchase Agreements	454,211	448,948
Other Short-Term Borrowings	11,671	11,274
<b>Total Short-Term Borrowings</b>	<b>\$530,382</b>	<b>\$470,372</b>

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Additional information regarding short-term borrowings is as follows:

(IN THOUSANDS, EXCEPT RATES)	2003	2002	2001
Average Outstanding <sup>1</sup>	\$442,180	\$451,068	\$493,282
Maximum Outstanding at any Month-End	530,382	578,463	596,620
Weighted-Average Rate Paid <sup>1</sup>	1.10%	1.54%	3.53%
Year-End Rate	0.60%	0.63%	1.14%

*1 Average amounts are based on daily balances. Average rates are computed by dividing actual interest expense by average amounts outstanding.*

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

The Company has a credit facility with the Federal Home Loan Bank of Atlanta (FHLB) in the amount of \$815.0 million that is secured by a blanket lien agreement. The Company has \$396.0 million of available credit under this facility at December 31, 2003. The Company also has a credit facility with the Federal Reserve for \$127.0 million which is secured by an assignment of commercial loans and has not been drawn on at December 31, 2003. The Company also has two short-term, unsecured bank credit lines totaling \$109.5 million of which \$64.5 million is utilized at December 31, 2003. The blanket lien agreement with the FHLB and the collateral assignment to the Federal Reserve are applicable to both short and long term borrowings.

**Long-Term Borrowings**

Long-term borrowings consists of the following at December 31:

(IN THOUSANDS)	2003	2002
Subordinated Debentures	\$ 66,525	\$ 66,525
FHLB Advances	419,000	292,000
Repurchase Agreements	206,000	
Payable to Issuers of Trust Preferred Securities	360,808	
	\$ 1,052,333	\$ 358,525

The \$66.5 million of subordinated debentures have a 9.65% fixed rate, mature in 2009 and cannot be called. Issuance costs related to this debt are being amortized as a component of interest expense making the effective cost of this debt 9.73%. These debentures qualify as tier II regulatory capital.

In 2003 and 2002, Riggs borrowed \$127.0 million and \$292.0 million, respectively from the FHLB. These advances have maturity dates through 2007 and carry a blended interest rate of 2.58%. Of the \$419.0 million total of FHLB advances, \$50.0 million is callable in 2004 and \$25.0 million is callable in 2005. This debt matures as follows:

(IN THOUSANDS, EXCEPT RATES)	TOTAL ADVANCE AMOUNTS	WEIGHTED-AVERAGE RATE
2004	\$ 140,000	2.37%
2005	67,000	3.15
2006	162,000	2.45
2007	50,000	2.80
	\$ 419,000	2.58%

In 2003 the Company borrowed \$206.0 million under long-term repurchase agreements. These repurchase agreements have maturity dates through 2007 and carry a blended interest rate of 1.64%. Of the \$206.0 million, \$100.0 million is callable in 2004. This debt matures as follows:

(IN THOUSANDS, EXCEPT RATES)	TOTAL REPURCHASE AMOUNTS	WEIGHTED-AVERAGE RATE
2005	\$ 11,000	1.63%
2006	150,000	1.25
2007	45,000	2.97
	\$ 206,000	1.64%

**NOTE 9: COMMITMENTS AND CONTINGENCIES**

Riggs issues primarily two types of letters of credit: commercial and stand-by. Commercial letters of credit are normally short-term instruments used to finance a commercial contract for the shipment of goods from a seller to a buyer. Commercial letters of credit are contingent upon the satisfaction of specified conditions and, therefore, they represent a loss exposure if the customer defaults on the underlying transaction.

Stand-by letters of credit can be either financial or performance-based. Financial stand-by letters of credit obligate the Company to disburse funds to a third party if the Riggs customer fails to repay an outstanding loan or debt instrument.

Performance stand-by letters of credit obligate the Company to disburse funds if the Riggs customer fails to perform a contractual obligation including obligations of a non-financial nature. The Company's policies generally require that all stand-by letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

Commitments to extend credit and letters of credit outstanding at December 31 are as follows:

<b>(IN THOUSANDS)</b>	<b>2003</b>	<b>2002</b>
Commitments to extend credit	\$ 1,327,070	\$ 1,039,724
Commercial letters of credit	46,273	70,479
Stand-by letters of credit	60,115	53,540

The above commitment amounts are not reflected in the Consolidated Statements of Condition and many of the commitments will expire without being drawn upon. Such commitments are issued upon careful evaluation of the financial condition of the customer.

The Company is also committed to fund future venture capital investments. At December 31, 2003 and 2002, these commitments totaled \$9.5 million and \$15.9 million, respectively.

The Company has change of control agreements with 17 executive officers. The maximum amount payable under these contracts is approximately \$9.5 million at December 31, 2003. The Company also has one employment contract that will expire on March 31, 2006. At December 31, 2003, the commitment for payment under this contract is approximately \$743 thousand.

The Company has fully and unconditionally guaranteed the trust preferred securities issued by two subsidiary business trusts, as discussed in Note 11 of Notes to Consolidated Financial Statements.

In the normal course of business the Company is involved in various types of litigation and disputes which may lead to litigation. The Company, based upon an assessment of the facts and circumstances of actual, threatened and unasserted legal actions, and, when deemed necessary, after consultation with outside counsel, has determined that pending legal actions will not have a material impact on its financial condition or future operations. Losses involving actual, threatened and unasserted legal actions are reflected in the financial statements when it is determined a loss is probable and the amount of such loss can be reasonably estimated.

#### **Consent Order and Notification of Possible Assessment of Civil Money Penalties**

In July 2003, the Bank entered into a Stipulation and Consent to the Issuance of a Consent Order and a Consent Order (collectively the Consent Order) with the OCC. The provisions of the Consent Order are effective until such time as they are amended, suspended, waived or terminated by the OCC. The Consent Order requires the Bank to take various actions to ensure compliance and improve the monitoring of compliance with BSA and related rules and regulations. The Consent Order allows the OCC to take whatever future actions it deems necessary to fulfill its regulatory responsibilities. These actions could include the imposition of a monetary penalty, including a civil money penalty.

On March 2, 2004, the OCC advised the Bank that it was considering whether to institute a civil money penalty action against the Bank and that such action would be based upon the OCC's allegations that the Bank violated the BSA and related rules and regulations, failed to comply with the Consent Order discussed above and failed to implement adequate controls to ensure that the Bank operates in a safe and sound manner with respect to BSA matters. The amount of the civil money penalty being considered was not specified by the OCC. The OCC also informed the Bank that it may seek unspecified modifications to the Consent Order and/or an additional consent order. Many of the regulatory violations alleged by the OCC predate the Consent Order. Under OCC procedures, the Bank is afforded the opportunity to submit information bearing on the appropriate amount of any penalty to be assessed before the imposition of such a penalty.

The OCC also informed the Bank that it is considering whether to take measures that would generally subject the Bank to increased regulatory supervision and operational restrictions. In particular, the OCC advised the Bank that primarily as a direct result of its BSA criticisms, that it expects to designate the Bank as being in a troubled condition. A bank that is classified as being in a troubled condition must have any new director or executive officer approved in advance by the OCC and is subject, along with its holding company, to a prohibition on making severance payments to the Bank's

directors, officers and employees under the FDIC's golden parachute rules. The increased regulatory supervision is expected to result in more frequent and intensive examinations.

Also on March 2, 2004, the Bank was advised by the Financial Crimes Enforcement Network (FinCEN) of the United States Department of the Treasury that it was evaluating whether it is appropriate for FinCEN to assess a civil monetary penalty and/or take additional enforcement action against the Bank for alleged apparent willful violations of BSA and related rules and regulations. FinCEN generally categorizes its concerns as (1) failure to establish and implement an adequate anti-money laundering program, (2) failure to properly prepare and file suspicious activity reports, and (3) failure to file accurate currency transaction reports. The amount of the civil money penalty being considered was not specified by FinCEN. Under FinCEN's procedures, before it makes a determination as to the existence and willfulness of the Bank's violations, the Bank is allowed to submit further information that is relevant to FinCEN's evaluation of whether a civil money penalty and/or additional enforcement action is warranted for the alleged violations. The Company understands that the OCC and FinCEN are reviewing the involvement of employees, officers, and directors of the Bank with respect to the foregoing.

The Company cannot currently estimate the amount of any civil monetary penalty, if any, that either the OCC or FinCEN may assess.

The Bank expects these actions will increase the Bank's costs of doing business.

#### **NOTE 10: REGULATORY REQUIREMENTS**

The Company and its subsidiaries, including the Bank, are subject to various regulatory restrictions including:

The Bank must maintain non-interest earning reserves with the Federal Reserve against its deposits and Eurocurrency liabilities. At December 31, 2003 and 2002, the Company's reserves with the Federal Reserve were \$167.3 million and \$95.3 million, respectively. The average of such reserves was \$70.1 million in 2003 and \$53.3 million in 2002.

There are limitations on the amount of loans or advances that the Bank can make to the Company and any non-bank subsidiaries or affiliates. In addition, such loans and advances must be secured by collateral. At December 31, 2003, the Bank had total equity capital of \$427.2 million, of which \$121.6 million is retained earnings.

Regulations impose limitations on dividends that the Bank can pay to the Company. Generally, such dividends are limited to the earnings of the Bank for the current and prior two years less any dividend payments during the same period. However, dividends payable by the Bank and its subsidiaries are further limited by requirements for the maintenance of adequate capital. This limitation on dividends that the Bank can pay to the Company could adversely impact the Company's cash flow and its ability to pay future debt payments and dividends. Since regulatory authorities maintain that a holding company should be a source of financial strength for its subsidiary bank, dividends paid by the Bank to the Company may be restricted if the regulators conclude that the Company's operating expenses and debt servicing requirements place the Bank's capital position at risk. At December 31, 2003, the retained earnings of the Bank were not available for payment of dividends to the Company. The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and additional discretionary actions by regulators that could have a material effect on the consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and regulatory classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established and defined by regulation to ensure capital adequacy require the Company and the Bank maintain minimum ratios for total and tier I capital to risk-weighted assets and of tier I capital to average assets. As of December 31, 2003, the Company and the Bank exceed all applicable capital adequacy requirements.

As of December 31, 2003, the most recent notification from the Office of the Comptroller of the Currency categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Company and the Bank must maintain total risk-based, tier I risk-based, and tier I leverages ratios as set forth in the table below.

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

<i>(Dollar Amounts In Millions)</i>	ACTUAL		MINIMUM REQUIREMENTS FOR CAPITAL ADEQUACY PURPOSES		TO BE WELL CAPITALIZED UNDER PROMPT CORRECTIVE ACTION PROVISIONS

Riggs Bank	436	7.17	243	4.00	304	5.00

**NOTE 11: GUARANTEED PREFERRED BENEFICIAL INTERESTS IN JUNIOR SUBORDINATED DEFERRABLE INTEREST DEBENTURES**

The Company owns two business trusts, Riggs Capital and Riggs Capital II, each of which is a qualifying special purpose entity created for the purpose of issuing trust preferred securities. The trusts have used the proceeds from the issuance of the trust preferred securities to purchase the Company's subordinated debentures with comparable interest and repayment terms as the trust preferred securities. The following summarizes the terms of the trust preferred securities:

	Series A	Series C	Total
Amount Originally Issued	\$150.0 million	\$200.0 million	\$350.0 million
Rate	8.625%	8.875%	8.768%
Liquidation Preference	\$1,000/share	\$1,000/share	
Earliest Redemption	12/31/06	3/15/07	
Maturity	12/31/26	3/15/27	
Dividends	semi-annual	semi-annual	

In the third quarter of 2003 the Company repurchased for cash \$6.5 million of these trust preferred securities which had a blended coupon rate of 8.80%. \$4.0 million of these repurchases were at par and \$2.5 million of the repurchases were at a premium, which resulted in a direct after-tax decrease to shareholders' equity of \$97 thousand. During 2002 the Company repurchased for cash \$101.4 million of these trust preferred securities which had a blended coupon rate of 8.73%. These repurchases were at a discount and resulted in a direct after-tax increase to shareholders' equity of \$7.4 million. There were no trust preferred security repurchases in the fourth quarter of 2003.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

As a result of the above repurchases, the amounts of trust preferred securities outstanding at September 30, 2003 were as follows:

	Series A	Series C	Total
Amount Outstanding	\$89.7 million	\$152.4 million	\$242.1 million
Rate	8.625%	8.875%	8.782%

Through September 30, 2003, dividends on trust preferred securities were reflected in the Consolidated Statements of Operations as minority interest in income of subsidiaries, net of taxes. The trust preferred securities, with certain limitations, qualify as tier I capital.

Effective October 1, 2003, and in accordance with FIN 46R, the Company no longer consolidates Riggs Capital and Riggs Capital II. At the time of the adoption of FIN 46R and at December 31, 2003, Riggs owned \$60.3 million of the Series A trust preferred securities and \$47.6 million of the Series C trust preferred securities. In financial statements issued prior to October 1, 2003, the amount of trust preferred securities owned by Riggs was netted against the outstanding debt of Riggs Capital and Riggs Capital II and reported as minority interest in the Consolidated Statements of Condition. And, prior to October 1, 2003, the interest earned by the Company on the trust preferred securities it owned was reflected in the Consolidated Statements of Operations as a reduction of minority interest in income of subsidiaries, net of taxes. Beginning in the fourth quarter of 2003, the trust preferred securities owned by Riggs are classified as securities held to maturity in the Consolidated Statements of Condition and \$360.8 million of debt that the Company has that is payable to Riggs Capital and Riggs Capital II is included in long-term debt. Commencing in the fourth quarter of 2003, interest earned on the trust preferred securities that the Company owns is reflected as a component of interest income and the cost of the debt payable to Riggs Capital and Riggs Capital II is included in interest expense.

During the first quarter of 2004, the Company acquired more than 50% of the debentures of one of the series and the Company intends to reconsolidate the subsidiary that issued the guaranteed preferred beneficial interests in junior subordinated deferrable interest debentures. At December 31, 2003, the fair market value of repurchased securities classified as held to maturity is \$115.3 million.

### **NOTE 12: DISCLOSURE ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS**

The following methods and assumptions were used to estimate the fair value of each major class of financial instruments for which it is practicable to estimate that value:

#### **Cash and Short-Term Investments**

For short-term investments that reprice or mature within 90 days, the carrying amounts are deemed a reasonable estimate of fair value.

#### **Securities**

Fair values are generally based on quoted market prices or other independent sources. Federal Reserve and FHLB-Atlanta stock are included at carrying value which approximates fair value.

#### **Venture Capital Investments**

Fair values are based on quoted market prices when available. If a quoted market price is not available, information and techniques that estimate the fair value are utilized as described in Note 1 of Notes to Consolidated Financial Statements. The Company has commitments to fund future venture capital investments of \$9.5 million and \$15.9 million at December 31, 2003 and 2002, respectively. The Company does not assign a fair value to these commitments.

#### **Loans**

The fair values of loans are estimated by discounting the expected future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. For short-term loans, defined as those maturing or repricing in 90 days or less, the carrying amounts are deemed to be a reasonable estimate of fair value.

### **Deposit Liabilities**

The fair values of demand deposit, savings and NOW accounts and money market deposit accounts are the amounts payable at the reporting date. The fair values of investment and negotiable certificates of deposit and foreign time deposits with a repricing or maturity date extending beyond 90 days are estimated using discounted cash flows at the rates currently offered for deposits of similar remaining maturities.

### **Short-Term Borrowings**

For short-term liabilities, defined as those repricing or maturing in 90 days or less, the carrying amounts are deemed a reasonable estimate of fair value.

### **Long-Term Debt**

The fair values of the Company's subordinated debentures are based on dealer quotes. For FHLB advances, repurchase agreements and the debt payable to the two trusts which issued trust preferred securities, fair values are based on market prices obtained from a national quotation system.

### **Guaranteed Preferred Beneficial Interests in Junior Subordinated Deferrable Interest Debentures**

In 2002, the fair value of these securities are assumed to equal their carrying values.

### **Derivative Instruments**

Financial derivatives, including foreign exchange contracts and interest rates swaps, are carried at fair value, determined by reference to independent sources.

### **Commitments to Extend Credit and Other Off-Balance Sheet Financial Instruments**

The Company does not assign a value to loan commitments and commercial letters of credit. A liability for stand-by letters of credit has been established in accordance with FIN 45 (Guarantor's Accounting and Disclosure Requirements for Guarantors, including Indirect Guarantees of Indebtedness of Others: an Interpretation of FASB Statements No. 5, 57 and 107 and rescission of FASB Interpretation No. 34). This liability, which amounts to \$167 thousand at December 31, 2003, is deemed to be the fair value of the stand-by letters of credit.

### **Accrued Interest Receivable and Accrued Interest Payable**

The carrying value of accrued interest receivable and accrued interest payable is deemed to approximate fair value.

### **Estimated Fair Values of Financial Instruments**

Changes in interest rates, assumptions or estimation methodologies may have a material effect on these estimated fair values. As a result, Riggs ability to realize these derived values cannot be assured. Reasonable comparability between financial institutions may not be likely because of the wide range of permitted valuation techniques and numerous estimates and assumptions that must be made. In addition, the estimated fair values exclude non-financial assets, such as premises and equipment, and certain intangibles. Thus, the aggregate fair values presented do not represent the value of the Company.

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

The estimated fair values of the Company's financial instruments are as follows:

(IN THOUSANDS)	DECEMBER 31, 2003		DECEMBER 31, 2002	
	CARRYING AMOUNT	FAIR VALUE	CARRYING AMOUNT	FAIR VALUE
<b>Financial Assets:</b>

**NOTE 13: INCOME TAXES**

Deferred income taxes are recorded using enacted tax laws and rates for the years in which taxes are expected to be paid. In addition, deferred tax assets are recognized for tax losses and tax credit carryforwards to the extent that realization of such assets is more likely than not.

Income before taxes and minority interest relating to the operations of domestic offices and foreign offices are as follows:

(IN THOUSANDS)	2003	2002	2001
Domestic Offices	\$ 17,307	\$ 43,335	\$ 15,026
Foreign Offices	(1,363)	2,068	(7,468)
<b>Total</b>	<b>\$ 15,944</b>	<b>\$ 45,403</b>	<b>\$ 7,558</b>

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Components of income tax provision (benefit) are as follows:

(IN THOUSANDS)	2003	2002	2001
<b>Current Provision (Benefit):</b>			
Federal	\$ 10,364	\$ 16,144	\$ (2,093)
State	11	114	297
Foreign	9	70	
<b>Total Current Provision (Benefit):</b>	<b>10,384</b>	<b>16,328</b>	<b>(1,796)</b>
<b>Deferred Provision (Benefit):</b>			
Federal	(5,998)	(857)	13,784
State			(913)
<b>Total Deferred Provision</b>	<b>(5,998)</b>	<b>(857)</b>	<b>12,871</b>
<b>Provision for Income Tax Expense</b>	<b>\$ 4,386</b>	<b>\$ 15,471</b>	<b>\$ 11,075</b>

The income tax benefit recorded in shareholders' equity reflecting the benefit of the return deduction relating to employee stock option exercises was \$200 thousand, \$15 thousand and \$151 thousand for 2003, 2002 and 2001, respectively.

At December 31, 2003 and 2002, the Company maintained a valuation allowance against deferred tax assets of approximately \$7.6 million and \$6.4 million respectively, as a result of uncertainty related to the utilization of deferred tax amounts generated by foreign subsidiaries. In addition, the Company maintained a valuation allowance of approximately \$6.9 million and \$5.4 million at December 31, 2003 and 2002, respectively, attributable to capital losses on venture capital investments. The Company has concluded that it is more likely than not that the remaining deferred tax assets which are attributable to losses from venture capital operations will be realized through capital gains generated by its venture capital operations or through capital gains generated elsewhere within the Company. Riggs also established a valuation allowance of approximately \$1.3 million and \$230 thousand during 2003 and 2002 attributable to write-downs on other capital assets. The Company has concluded that it is more likely than not that the remaining deferred tax asset attributable to this asset write-down will be realized through capital gains generated elsewhere within the Company or through other tax planning strategies.

Income tax expense related to minority interest was \$5.7 million, \$9.1 million and \$10.7 million in 2003, 2002 and 2001, respectively.

### Reconciliation of Statutory Tax Rates to Effective Tax Rates:

(IN THOUSANDS, EXCEPT PERCENTAGES)	2003	2002	2001
Income Tax Computed at Federal Statutory Rate of 35%	\$ 5,580	\$ 15,891	\$ 2,645
Add (Deduct):			
State Tax, Net of Federal Tax Benefit	7	74	(400)
Tax-Exempt Interest	(2,878)	(2,477)	(1,760)
Increase in Tax Credits	(1,893)	(242)	(394)
Increase of Valuation Allowance	4,528	726	9,334
Nontaxable Life Insurance	(1,143)	(432)	(319)
Other, Net	185	1,931	1,969
<b>Provision for Income Tax Expense</b>	<b>4,386</b>	<b>15,471</b>	<b>11,075</b>
<b>Effective Tax Rate</b>	<b>27.5%</b>	<b>34.1%</b>	<b>146.5%</b>

At December 31, 2003 and 2002, the Company maintained a domestic net operating loss carryforward of approximately \$49.3 million and \$45.7 million, respectively. The domestic net operating loss carryforward will begin expiring in the year 2020. A portion of the domestic net operating

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

loss carryforward is subject to separate return limitation year restrictions. However, we believe it is more likely than not the full domestic net operating loss carryforward will be fully utilized. At December 31, 2003 and 2002, the Company maintained a foreign net operating loss carryforward of approximately \$20.8 million and \$15.0 million, respectively.

The net deferred tax liability is included in other liabilities in the Consolidated Statements of Condition. The Company believes that it is more likely than not that deferred tax assets will be realized, except in cases where valuation allowances have been established against these assets. The components of income tax liabilities (assets) that result from temporary differences in the recognition of revenue and expenses for income tax and financial reporting purposes at December 31, 2003 and 2002 are detailed below:

**Sources of Temporary Differences Resulting in Deferred Tax Liabilities (Assets):**

(IN THOUSANDS)	2003	2002
Excess Tax Over Book Depreciation-Domestic	\$ 741	\$ 2,010
Pension Plan and Post-Retirement	15,370	16,648

**NOTE 14: BENEFIT PLANS**

**Pension Plans**

*Riggs Bank Europe Ltd.*

Prior to October 1, 1998, RBEL had operated a defined benefit pension plan. Effective October 1, 1998, future service benefits are provided on a defined contribution basis. Upon adoption of the defined contribution plan, some active plan participants and retirees, but not all participants and retirees, opted to convert past service rights to the defined contribution plan. The assets of the prior defined benefit plan are held separately from the Bank in trust-administered funds and are maintained for the benefit of those participants in the defined benefit plan who opted not to convert to the defined contribution plan. No further pension benefits accrue under the prior plan effective October 1, 1998.

*Riggs National Corporation*

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Effective February 28, 2002, the Company froze its non-contributory defined benefit pension plan and, therefore, participants will no longer earn benefits under the plan for service after February 28, 2002. Salary increases and service with the Company will not increase participants' benefits already accrued under the plan, although future service may allow participants to become vested in benefits earned before February 28, 2002 or to qualify for early retirement benefits under the plan. Net periodic pension expense is actuarially determined and includes service cost and interest cost components that

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

reflect the long-term expected return on plan assets and the effect of deferring and amortizing actuarial gains and losses and any prior service costs.

The Company's funding policy is to contribute an amount equal to the greater of the minimum annual required contribution according to ERISA and the IRS and the amount necessary to ensure the market value of assets are at least as great as the Unfunded Accumulated Benefit Obligation according to SFAS 87-Employers' Accounting for Pensions.

The assets of the pension plan consist primarily of equity and fixed income mutual funds, which are held in trust. Some of these mutual funds are part of an Immediate Participation Guarantee contract with a life insurance company. Over the past two pension plan years, approximately 14% of plan assets were invested in the Riggs Funds, mutual funds which were an affiliate of the Company.

The allocation of pension plan assets at December 31 were:

	2003	2002
Cash and cash equivalents	2%	2%
Domestic equity mutual funds	49	44
International equity mutual funds	10	9
High grade fixed income mutual funds	35	41
High yield fixed income mutual funds	4	4
	100%	100%

### Health and Insurance Benefits

The Company provides certain health care and, for employees who retired prior to January 1, 1998, life insurance benefits for retired employees. Substantially all active employees may become eligible for medical and dental insurance benefits if they reach age 65 with five or more years of service or if they retire at or after age 55 with at least 10 years of service. Effective January 1, 2004, employees that retire prior to age 65 will pay 100% of the cost of health insurance until the retiree reaches age 65. Effective January 1, 2008, healthcare benefits will only be available to those employees who retire at age 65 or greater with at least five years of service.

Similar benefits for active employees are provided through an insurance company and several health maintenance organizations. The Company recognizes the cost of providing benefits by expensing the annual insurance premiums, which, net of employee contributions, were \$6.6 million in 2003, \$5.2 million in 2002, and \$4.8 million in 2001.

Riggs accounts for postretirement benefits under SFAS 106, Employers' Accounting for Postretirement Benefits Other than Pensions. SFAS 106 requires accrual of the expected cost of benefits during the years that the employee renders the necessary service. Adoption of SFAS 106 in 1993 resulted in an accumulated transition obligation of \$13.0 million which is being recognized over a 20-year period. Riggs incurred \$2.2 million in 2003 for postretirement health and life insurance expenses, which included \$357 thousand relating to the amortization of the transition obligation. This compares to \$4.2 million in health and life insurance expenses for 2002 and \$2.0 million for 2001, with transition obligation amortization of \$357 thousand in each of those years.

The yearly benefits expected to be paid to participants in the domestic pension plan and the retiree health and life insurance plans are as follows:

(IN MILLIONS)	Domestic Pension Plan	Postretirement Plans
2004	\$ 6.8	\$ 1.4
2005	6.8	1.4
2006	6.7	1.4
2007	6.8	1.4
2008 and thereafter	236.4	82.0

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

The expected benefits to be paid are based on the same assumptions used to measure the Company's benefit obligations at December 31, 2003 and include estimated future employee service.

The measurement date for the pension and postretirement plans is December 31, 2003.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

At December 31, 2003, the Company attempted to maintain approximately 60% of the pension plan assets in equity securities and 40% in fixed income securities. This target allocation is adjusted periodically based upon the Company's assessment of such factors as equity market conditions and trends, current and anticipated interest rates, the shape of the yield curve, the interest rate futures market and general domestic and international economic conditions and trends. Consideration is given to the demographics of the retiree population and active employees approaching retirement.

The pension plan has an investment policy that includes investment guidelines for equity, fixed income, cash, and cash equivalents and other investments. These guidelines include the minimum and maximum percentage of the plan assets that may be invested in various types of investments. The policy also specifies the maximum amount that can be invested in a single issuer and industry and identifies prohibited types of investments and transactions. The goal of the investment policy is to preserve the capital of the plan's assets and maximize investment earnings in excess of inflation, while maintaining acceptable levels of volatility.

The long-term expected rate of return on plan assets was 8.0% in 2003 and 2002 but will be reduced to 7.5% in 2004. The discount rate for valuing plan liabilities was 6.0% and 6.5% at December 31, 2003 and 2002, respectively, and is projected to be 6.0% at December 31, 2004. The Company believes that the assumed return on plan assets of 7.5% is reasonable over the long-term given the investment flexibility in the plan investment policy and long-term historical returns achieved on the types of assets in which the plan invests. The Company further believes that the targeted long-term return on investments is appropriate given the current funding status relative to its benefit obligation and the fact that participation in the plan and benefits accruing under the plan have been frozen.

<b>Net Periodic Cost</b>	<b>\$ 2,158</b>	<b>\$4,116</b>	<b>\$2,014</b>

The assumed health care cost trend rate averaged 11.0% for 2003, gradually decreasing to 5.0% by the year 2009 and remaining constant thereafter. An average rate of 12.0% was used in 2002. A discount rate of 6.0% was used at December 31, 2003 and a rate of 6.50% was used at December 31, 2002 to determine the projected postretirement benefit

obligation. Increasing the assumed health care cost trend rate by one percentage point would increase the net periodic postretirement benefit cost for 2003 by \$384 thousand and increase the accumulated postretirement benefit obligation at December 31, 2003, by \$4.6 million. Decreasing the assumed health care cost trend rate by one percentage point would decrease the net periodic postretirement benefit cost for 2003 by \$309 thousand and decrease the accumulated postretirement benefit obligation at December 31, 2003 by \$3.7 million.

### Stock Option Plans

The Board of Directors and shareholders of the Company approved stock option plans in 1993, 1994, and 1996 under which options to purchase shares of common stock were granted to key employees. The exercise price could not be less than the fair market value of the common stock at the date of grant. For options under these plans, the vesting periods have ranged from zero to three years. All stock options have a life of 10 years. The total number of shares of common stock reserved for issuance upon exercise of options granted were 1,250,000, 1,250,000, and 9,000,000 for the 1993, 1994, and 1996 Plans, respectively. In 2002, the Board of Directors terminated these plans. The Board and shareholders of the Company in 2002 approved a 2002 Long-Term Incentive Plan. As options under the 1993, 1994 and 1996 plans are terminated, a corresponding amount is added to the total number of shares of common stock reserved for issuance upon exercise of options granted under the new 2002 Plan.

A summary of the stock option activity under the 1993, 1994, 1996 and 2002 Plans follows:

	STOCK OPTIONS	WEIGHTED- AVERAGE EXERCISE PRICE
Outstanding at December 31, 2000	6,254,954	\$ 18.97
Granted	1,315,625	15.36

Granted	1,506,369	13.86
Exercised	158,561	12.09
Terminated	437,520	15.30
Outstanding at December 31, 2003	8,295,448	\$ 15.05

Prior to 2002, members of the Board of Directors of the Company were eligible to participate in the 1997 Non-employee Directors Stock Option Plan (the 1997 Plan). Under the 1997 Plan, options to purchase up to 600,000 shares of common stock could be granted to non-employee directors of the Company or a subsidiary. The exercise price could not be less than the fair market value of the common stock at the date of grant, with vesting occurring at the date of grant. This 1997 Plan also was terminated by the Board of Directors in 2002. Non-employee directors are eligible to participate in the 2002 Long-Term Incentive Plan.

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

A summary of the stock option activity under the 1997 Plan follows:

	STOCK OPTIONS	WEIGHTED- AVERAGE EXERCISE PRICE
Outstanding at December 31, 2000	375,000	\$ 19.02
Granted	40,000	17.00

**Other Benefit Plans**

During 2002, the Company terminated the Supplemental Executive Retirement Plan that provided supplemental retirement income and preretirement death benefits to certain key employees. The amount of benefits was based on the participant's corporate title, functional responsibility and service as a key employee. Upon the later of a participant's termination of employment or attainment of age 62, the participant would have received the vested portion of the supplemental retirement benefit, payable for the life of the participant, but for no more than 15 years. Upon Plan termination, the current liability for active participants with greater than one year of service prior to their retirement was transferred into our Executive Deferred Compensation Plan. Vested participants who are no longer employed by the Company have been paid an

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

amount equal to the current value of their benefit. Vested participants who were receiving benefits will continue to receive them. At December 31, 2003 the Company had a \$642 thousand pension benefit obligation for this supplemental plan, compared with \$1.1 million at year-end 2002. Accrued pension costs were \$690 thousand at year-end 2003 and \$1.1 million at year-end 2002. This supplemental plan has no assets and incurred \$41 thousand in net periodic costs in 2003, compared with \$306 thousand and \$298 thousand for 2002 and 2001, respectively. Payments from this plan will be approximately \$97 thousand per year through 2007 and \$523 thousand thereafter.

Riggs sponsors a defined contribution plan under Section 401(k) of the Internal Revenue Code that is available to all domestic employees who meet certain age and length of service requirements (the 401(k) Plan). In 2002 Riggs began match funding employee contributions 100% up to a maximum of 6% of an employee's eligible yearly earnings. Prior to 2002, Riggs match funded employee contributions 100% on the first \$100 the employee contributed and 50% thereafter up

to a maximum of 6% of an employee's eligible yearly earnings. In addition, the Board of Directors may elect to make discretionary contributions to the 401(k) Plan. An expense of \$3.3 million in 2003 related to the Company's match of employees' 401(k) Plan contributions is included in pension and other employee benefits in the Consolidated Statements of Operations. The comparable expense in 2002 and 2001 was \$3.2 million and \$1.1 million, respectively.

The Company grants awards to certain key executives under Deferred Time Vested Stock and Performance Time Vested Stock Agreements which are discussed in Stock-Based Compensation Plans in Note 1.

The Company has an Executive Deferred Compensation Plan to allow certain employees to defer wages and non-employee directors to defer directors' fees. Under the plan, non-employee directors may elect to defer fees and have the deferred amounts treated as having been invested in cash, shares of the Company's common stock, or a combination of cash and stock.

#### NOTE 15: FOREIGN ACTIVITIES

Foreign activities are those conducted with customers domiciled outside of the United States, regardless of the location of the banking office utilized by these customers. Because foreign activity is integrated within the Company, it is not possible to definitively classify the customers activities as entirely domestic or foreign.

The following table reflects changes in the reserve for loan losses on loans to foreign-domiciled customers. Allocations of the provision for loan losses are based upon actual charge-off experience and the risk inherent in the foreign loan portfolio.

#### FOREIGN RESERVE FOR LOAN LOSSES

(IN THOUSANDS)	2003	2002	2001
Balance, January 1	\$4,930	\$ 11,651	\$ 9,449
Provision for Loan losses	181	(4,182)	5,943
Loans Charged-Off	2,932	4,094	4,913
Less: Recoveries on Charged-Off Loans	1,862	838	1,376
Net Charge-Offs	1,070	3,256	3,537
Foreign Exchange Translation Adjustments	251	717	(204)
Balance, December 31	\$4,292	\$ 4,930	\$ 11,651

The 2002 reversal in the foreign portfolio was taken as those reserves were no longer necessary since foreign nonperforming assets decreased by \$2.0 million, or 77%, from the prior year end, aggregate loan balances decreased due to significant pay-downs and maturities and the Company sold \$138.3 million in commercial loans and commitments at its London operations.

The following table reflects foreign assets by geographical location for the last three years and selected categories of the Consolidated Statements of Operations. Loans made to, or deposits placed with, a branch of a foreign bank located outside the foreign bank's home country are considered as loans to, or deposits with, the foreign bank. To measure profitability of foreign activity, Riggs has established a funds pricing system for business units that are net users or providers of funds. When identifiable, noninterest income and expense are reflected in specific regions and the remainder is allocated based on earning assets identified in each geographical area.

## Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

The Company's reportable segments are strategic business units that provide diverse products and services within the financial services industry. Riggs has six reportable segments: Banking, International Banking, Riggs & Co. (wealth management), Treasury, Riggs Capital Partners (venture capital) and Other. These segments are described in further detail on the following pages.

Except for utilization of funds transfer pricing methodologies, the accounting policies for the segments are generally the same as those described in Note 1 of Notes to Consolidated Financial Statements. Riggs accounts for intercompany transactions as if the transactions were to third parties under market conditions. Overhead and support expenses are allocated to each operating segment based on number of employees, service usage and other factors relevant to the expense incurred. Geographic financial information is provided in Note 15 of Notes to Consolidated Financial Statements. The 2001 restructuring and other charges described in Note 2 of Notes to Consolidated Financial Statements are recorded in the Other segment as this presentation reflects how the Company manages and evaluates its segments.

Revenue and expense allocation formulas and funds transfer pricing methodologies may change. If necessary, prior periods are restated to reflect material changes in the components of the segments. Prior periods have not been restated to reflect changes in the Company's revenue and cost allocations and funds transfer pricing methodologies. In addition, revenues and expenses which are unusual or noncontrollable may be reflected in the Other segment, which is consistent with internal financial reporting, if management believes such presentation most accurately represents the remaining operating segments' performance.

Edgar Filing: RIGGS NATIONAL CORP - Form 10-K

Reconciliations are provided from the segment totals to the consolidated financial statements. The reconciliations of noninterest income and noninterest expense offset as these items result from intercompany transactions and the reconciliation of total average assets represents the elimination of intercompany balances.
