AMERICAN TECHNICAL CERAMICS CORP. AND SUBSIDIARIES  
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS  
(In thousands, except per share data)

(1) BASIS OF PRESENTATION:

The accompanying unaudited interim consolidated financial statements of American Technical Ceramics Corp. and subsidiaries (the "Registrant") reflect

## Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

all adjustments (consisting of normal recurring accruals) which are, in the opinion of management, necessary for a fair presentation of its consolidated financial position as of December 31, 2001 and the results of its operations for the three and six month periods ended December 31, 2001 and 2000. These consolidated financial statements should be read in conjunction with the summary of significant accounting policies and notes to consolidated financial statements included in the Registrant's Annual Report to Stockholders for the fiscal year ended June 30, 2001. Results for the three and six month periods ended December 31, 2001 are not necessarily indicative of results which could be expected for the entire year.

### (2) IMPACT OF NEW ACCOUNTING STANDARDS:

In July 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("SFAS No. 143"). SFAS No. 143 addresses financial accounting requirements for retirement obligations associated with retirement of tangible long-lived assets and for the associated asset retirement costs. SFAS No. 143 requires a company to record the fair value of an asset retirement obligation in the period in which it incurred a legal obligation associated with the retirement of tangible long-lived assets that results from the acquisition, construction development and/or normal use of the asset. The company is also to record a corresponding increase to the carrying amount of the related asset and to depreciate that cost over the life of the asset. The amount of the liability is changed at the end of each period to reflect the passage of time and changes in estimated future cash flows. SFAS No. 143 is effective for fiscal years beginning after June 15, 2002. The Registrant has not yet determined the impact of its planned adoption of SFAS No. 143 (anticipated for July 1, 2002).

In August 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS No. 144"), which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS No. 144 establishes accounting guidelines for the impairment of long-lived assets to be held and used; to be disposed of other than by sale; and to be disposed of by sale. SFAS No. 144 is effective for fiscal years beginning after December 15, 2001 and interim periods within those fiscal years. The Registrant has not yet determined the impact of its planned adoption of SFAS No. 144 (anticipated for July 1, 2002).

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL  
CONDITION AND RESULTS OF OPERATIONS  
(In thousands, except per share data)

The following discussion and analysis should be read in conjunction with the consolidated financial statements, related notes and other information included in this Quarterly Report on Form 10-Q.

Statements in this Quarterly Report on Form 10-Q that are not historical fact may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All such forward-looking statements are subject to risks and uncertainties, including, but not limited to, market and economic conditions, the impact of competitive products, product demand and market acceptance risks, changes in product mix, costs and availability of raw materials, fluctuations in operating results, delays in development of highly-complex products, risks associated with international sales and sales to the U.S. military, risk of customer contract or sales order cancellations and other risks detailed from time to time in the Registrant's filings with the Securities and Exchange Commission, including, without limitation, those contained under the caption "Item 1. BUSINESS - CAUTIONARY STATEMENTS REGARDING FORWARD - LOOKING STATEMENTS" in the Registrant's Annual Report on Form 10-K. These risks could cause the Registrant's actual results for future periods to differ materially from those expressed in any forward-looking statements made by, or on behalf of, the Registrant. Any forward-looking statement represents the Registrant's expectations or forecasts only as of the date it was made and should not be relied upon as representing its expectations or forecasts as of any subsequent date. The Registrant undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, even if its expectations or forecasts change.

RESULTS OF OPERATIONS  
-----

## Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

Three Months Ended December 31, 2001 Compared with Three Months Ended  
December 31, 2000

-----

Net sales for the three months ended December 31, 2001 decreased 46% to \$11,582, compared to \$21,326 in the comparable period in the prior fiscal year. The decrease in net sales was primarily the result of decreased sales volume across all major product lines. The decline in sales is due to the economic downturn affecting the entire electronic component industry. Sales were down in all market sectors except the medical equipment sector. Sales to a major medical equipment OEM accounted for 15% of the Registrant's net sales in the three months ended December 31, 2001.

Gross margin for the three months ended December 31, 2001 was 20.2% of net sales, compared to 41.5% for the comparable period in the prior fiscal year. The decrease in gross margin was principally due to lower sales volume. Cost of sales for the three months ended December 31, 2001 was also negatively impacted by a charge of \$830 for inventory that the Registrant believes may be scrapped in the future as a result of excess quantities, customer requirements and other causes. Similar charges may be necessary in future periods depending upon various factors, including demand for the Registrant's products and the efficiency of its production process. Cost reduction measures put in place during the fourth quarter of fiscal year 2001 and the first quarter of fiscal year 2002 have partially offset the impact of lower sales on gross margins. These measures included reduced headcount, reduced capital spending and general cost controls on discretionary spending.

- 9 -

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued) (In thousands, except per share data)

Selling, general and administrative expenses for the three months ended December 31, 2001 decreased 21% to \$3,135, compared to \$3,982 in the comparable period in the prior fiscal year. The decrease was due to decreased commission expense as a result of the decrease in net sales, lower bonus accruals due to decreased profitability and decreased payroll related expenses due to cost reduction measures instituted in the fourth quarter of fiscal year 2001 and the first quarter of fiscal year 2002, offset partially by severance and professional fees incurred in connection with closing the Registrant's sales office in England.

Research and development expenses for the three months ended December 31, 2001 decreased 24% to \$833, compared to \$1,089 in the comparable period in the prior fiscal year. A reduction in research and development spending was among the cost reduction measures referred to above.

Bookings for the three months ended December 31, 2001 were \$9,452, compared to \$24,101 for the three months ended December 31, 2000. Cancellations have returned to historical levels, but bookings remain low, particularly in the

## Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

fiber optic, wireless infrastructure and semiconductor manufacturing equipment sectors. Bookings for the second quarter of fiscal year 2002 have declined from the levels attained in the first quarter of fiscal year 2002. The decline was due to continued weakness in the fiber optic market and a temporary slowdown in the medical market due to inventory buildups. The Registrant expects the second quarter to be the weakest for the fiscal year and anticipates modest improvement over the next few quarters. Delivery times and price are key factors in obtaining orders. The Registrant believes its current levels of inventories should enable it to deliver orders in the short time frames currently required by many of its customers.

The backlog of unfilled orders was \$10,644 at December 31, 2001 compared to \$29,458 at December 31, 2000 and \$16,153 at June 30, 2001. The decrease in backlog compared to December 31, 2000 was primarily the result of bookings cancellations incurred during the latter half of fiscal year 2001 caused by the economic weakness in the electronic component industry. The decrease in backlog compared to June 30, 2001 was primarily due to shipments in excess of order bookings as the Registrant continued to ship orders out of backlog scheduled for delivery during the second quarter.

The Registrant expects the current level of backlog to be sustainable as order bookings begin to improve over the next several quarters. Customer order patterns are anticipated to improve as they deplete their current inventory and economic conditions improve. The Registrant anticipates that customers will place orders with short delivery requirements for the foreseeable future resulting in a slow growth in sales and bookings over the next few quarters.

As a result of the foregoing, net loss for the three months ended December 31, 2001 was \$1,038 or (\$.13) per common share (\$.13) per common share assuming dilution), compared to net income of \$2,445, or \$.31 per common share (\$.30 per common share assuming dilution), for the comparable period in the prior fiscal year.

- 10 -

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued) (In thousands, except per share data)

Six Months Ended December 31, 2001 Compared with Six Months Ended  
December 31, 2000

-----

Net sales for the six months ended December 31, 2001 decreased 40% to \$25,487, compared to \$42,223 in the comparable period in the prior fiscal year. The decrease in net sales was primarily the result of decreased sales volume across all major product lines. The decline in sales is due to the economic downturn affecting the entire electronic component industry. Sales were down in all market sectors except the medical equipment sector.

Gross margin for the six months ended December 31, 2001 was 26.3% of net sales, compared to 42.6% for the comparable period in the prior fiscal year. The decrease in gross margin was principally due to lower sales volume. Cost of sales for the six months ended December 31, 2001 was also negatively impacted by charges of \$1,427 for inventory that the Registrant believes may be scrapped in

## Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

the future as a result of excess quantities, customer requirements and other causes. Similar charges may be necessary in future periods depending upon various factors, including demand for the Registrant's products and the efficiency of its production process. Cost reduction measures put in place during the fourth quarter of fiscal year 2001 and in the first quarter of fiscal year 2002 have partially offset the impact of the lower sales. These measures included reduced headcount, reduced capital spending and general cost controls on discretionary spending.

Selling, general and administrative expenses for the six months ended December 31, 2001 decreased 24% to \$6,155, compared to \$8,072 in the comparable period in the prior fiscal year. The decrease was due to decreased commission expense as a result of the decrease in net sales, lower bonus accruals due to decreased profitability and decreased payroll related expenses due to cost reduction measures instituted in the fourth quarter of fiscal year 2001 and the first quarter of fiscal year 2002, partially offset by severance costs of \$203 incurred in connection with headcount reduction in the United States and England, and professional fees incurred in connection with closing the Registrant's sales office in England.

Research and development expenses for the six months ended December 31, 2001 decreased 21% to \$1,685, compared to \$2,130 in the comparable period in the prior fiscal year. Research and development spending was among the cost reduction measures referred to above.

The Registrant experienced a net loss for the six months ended December 31, 2001 primarily due to the low sales level in relation to fixed costs, particularly in the second quarter, and the inventory charges discussed above. The cost reduction measures employed by the Registrant did not fully compensate for the decline in revenue.

- 11 -

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued) (In thousands, except per share data)

#### LIQUIDITY AND CAPITAL RESOURCES

-----

The Registrant's financial position at December 31, 2001 remains strong as evidenced by working capital of \$33,652 and stockholders' equity of \$55,499. The Registrant's current ratio at December 31, 2001 was 6.9, compared to a current ratio of 4.2 at June 30, 2001. The Registrant's quick ratio (current assets minus inventory divided by current liabilities) at December 31, 2001 was 2.8 as compared to 1.9 at June 30, 2001. The improvements in the Registrant's current ratio and quick ratio were primarily due to a reduction in current liabilities as a result of lower raw material purchases, lower bonus and commission accruals due to the lower sales and profitability and reduced capital spending, partially offset by a reduction in accounts receivable.

Cash, cash equivalents and investments increased by \$1,944 to \$7,123 at December 31, 2001 from \$5,179 at June 30, 2001, primarily as a result of collection of accounts receivable, reduced purchasing of raw material and reduced discretionary spending, partially offset by payment of year end bonus

## Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

and commission accruals and investment in property, plant and equipment. Accounts receivable decreased by \$5,872 to \$5,658 at December 31, 2001 from \$11,530 at June 30, 2001, primarily due to lower sales volumes and collection of balances due at June 30, 2001. Inventories decreased by \$917 to \$23,651 at December 31, 2001 from \$24,568 at June 30, 2001. Accounts payable and accrued expenses decreased by \$3,636 to \$4,354 at December 31, 2001 from \$7,990 at June 30, 2001, primarily due to payment of fiscal year end bonus accruals, lower capital spending due to cost reduction measures and lower purchasing levels of raw materials due to the lower production volumes commensurate with lower sales volumes.

The Registrant has available two credit facilities with Bank of America, N.A.: a revolving line of credit of \$4,000 and an equipment line of credit of \$8,500. The outstanding principal balance under both lines bears interest at 1.5% above the one month rate for U.S. Dollar deposits on the London Interbank Market ("LIBOR") and is subject to certain financial covenants, including maintenance of asset and liability percentage ratios. The outstanding principal balance of the equipment line rolls over periodically into a self-amortizing term note of not less than four nor more than seven years. Borrowings under the equipment line are secured by the related equipment purchases.

The Registrant did not incur any borrowings under the revolving line of credit or the equipment line during the three and six months ended December 31, 2001. Through December 31, 2001, the Registrant's borrowings aggregated \$4,768 under the equipment line.

The Registrant has available credit facilities with Citibank N.A. (as successor to European American Bank, N.A.); a \$5,000 line for equipment purchases and a \$2,000 unsecured term loan line. The lines bear interest at either the Citibank prime rate or 1.5% above the Reserve Adjusted LIBOR rate (as defined) and are subject to certain financial covenants. Borrowings under the equipment line will be secured by the related equipment purchases. The outstanding balance six months after the term loan line is made available and at expiration of the line (January 2002) will roll into fully amortizing term loans with a maturity of five years. The Registrant has not incurred any borrowings under either of these facilities. These facilities were scheduled to expire in January 2002. The Registrant is negotiating a new credit facility with the bank. While there can be no assurance that an agreement will be reached, Citibank N.A. has agreed to extend these lines on a month-to-month basis while discussions are in progress.

- 12 -

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued) (In thousands, except per share data)

Capital expenditures for the six months ended December 31, 2001 totaled \$1,925, including amounts for machinery and equipment and planned leasehold improvements. The Registrant intends to use cash on hand and available lines of credit to finance budgeted capital expenditures, primarily for equipment acquisition and facility expansion, of approximately \$2,000 for the remainder of fiscal year 2002.

Aggregate contractual obligations as of December 31, 2001 mature as follows:

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

Contractual Obligations	Total	Payments Due by Period	
		Less than 1 year	1- 3 years
Long-Term Debt	\$ 5,083	\$ 761	\$ 2,282
Capital Lease Obligations	2,703	217	764
Operating Leases	262	149	113
<b>Total Contractual Obligations</b>	<b>\$ 8,048</b>	<b>\$ 1,127</b>	<b>\$ 3,159</b>

Aggregate other commitments as of December 31, 2001 mature as follows:

Other Commercial Commitments	Total Amounts Committed	Amount of Commitments
Lines of Credit	\$ 19,500	

In the normal course of business, the Company routinely enters into binding and non-binding purchase obligations primarily covering anticipated purchases of inventory and equipment. The terms of these commitments generally do not extend beyond six months. None of these obligations are individually significant. The Company does not expect that these commitments will materially adversely affect its liquidity in the foreseeable future.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Registrant has identified four market risks relative to its business: interest rate risk, foreign currency exchange rate risk, commodity price risk and security price risk. There has been no material changes in the way the Registrant conducts its worldwide business, foreign exchange risk management, investments in marketable securities or raw material commodity purchasing from the descriptions thereof in the Registrant's Form 10-K for the fiscal year ended June 30, 2001.
